
A: Double Mampaey easy-release electrical capstans (100 tons each)
B: Two (2) bollards 50 tons each
C: Double Mampaey easy-release electrical capstans (100 tons each)
D: Bollards of 50, 25 and 10 tons (every 20 m.)

Fendering: Vredestein Gigant Fenders; Block fenders and D-fenders (made of rubber).

Roll-on/Roll-off Facilities: At the South Pier a small Ro-Ro Platform for "coaster-size" ships and small "landing-craft" type. Max. permitted load factor 2,000 kilos p.sq.m. Depth 5 m.

Off the Harbour Office between the North Pier and the South Pier a Ro-Ro Pier for ships up to 3,000 gross and/or a max. length of 90 m. Max. permitted load factor unlimited. Depth 6 m. Max. size: LOA 300 ft. Draft 15 ft.

For the mooring and unmooring at the pier shore labourers are engaged by Agents at the expense of the shipping line. Motor-boats are available for running lines.

Salina: Position: Lat. 12° 05.3′ N., Long. 68° 16.7′ W. This port is situated 4 miles South of Kralendijk and is owned by the Antilles International Salt Co., loading of salt in bulk only can be carried out at this pier. Pilot boards 0.75 miles from jetty.

Vessels of approximately 40,000 tons d.w.t. can be accommodated.

Depth alongside 45 ft. The Pilot will board vessels destined for this port 0.75 miles West of the jetty, from a motorboat displaying the signals as referred to for Kralendijk. Also see "Bulk Cargo Handling Facilities".

CRANES: There are 2 mobile cranes available 1×18 tons and 1×24 tons lifting capacity.

BULK CARGO FACILITIES: Salt in bulk is handled at the port of Salina. The pier consists of 5 breasting dolphins and 2 mooring dolphins. The loading chute is situated on the centre breasting dolphin. Loading rate approximately 2,000 t.p.h. The chute is fixed and for shifting ship there are 2 mooring buoys, one on each side of the pier. The total length of the pier is 614 ft. and the max. draft is 45 ft. although the max. size of vessel which can be accommodated is approximately 40,000 d.w.t.

SPECIALISED CARGO HANDLING FACILITIES: There are no liquid, chemicals and LPG facilities. For Roll-on/Roll-off facilities see "Berthing".

BRIDGES: There are no bridges in the port of Bonaire.

STEVEDORES: There are no regular stevedores (longshoremen) available in Bonaire. For cargo handling operations ordinary labourers are engaged by the Agents for account and risk of the ship.

Working Hours: Monday-Friday 0700 – 1200 and 1300 – 1600. Overtime possible.

MEDICAL: Modern facilities are available for medical and dental treatment. A "Medical Service Request" form must be signed by the Master or other authorised officer for crew members requiring medical or dental treatment. In case of crew members having to be left behind at Bonaire for hospitalisation or otherwise, Master must sign an authorisation guaranteeing expense of treatment and repatriation.

TANKERS: There is no tanker facility in the port.

DENSITY: Average salinity of water is 1025.

FRESH WATER: Fresh water from the Government water distillation and power plant can be supplied at the pier.

FUEL: On advance request, bunkers are delivered by craft at rates comparable to those in Curacao or Aruba.

FIRE PRECAUTIONS: No specific precautions.

CONSULS: Venezuela and Colombia.

GANGWAY/DECK WATCHMEN: Watchmen are not necessary but recommended; Overtime as usual.

OPENING/CLOSING HATCHES: This work is normally carried out by crew.

IDENTIFICATION CARDS: Passengers: No landing cards required, but some ships carrying a large number of passengers furnish landing cards to passengers for their own control of passengers returning on board. Crew: No landing cards required.

REPAIRS: There are no facilities for carrying out major repairs. Qualified technicians are available for electronic instrument repairs.

DRY DOCKS: No dry dock facilities.

SURVEYORS: No classification surveyors available, nearest port is Curacao. Cargo inspectors Saybolt and Caleb Brett, Independent Maritime Bureau represents ICS, P and I club nautical and technical inspectors, inspectors for Liberian Bureau of Maritime Affairs.

CUSTOMS ALLOWANCES: No specific regulations, customs allow only a reasonable quantity out of bond.

CARGO GEAR: Load/discharge operations always by ship's gear.

REPATRIATION: All facilities exist for crew changes. Good connections, several times a day to Curacao and several times a week to U.S.A. and Europe.

HOLIDAYS: The following are the official holidays observed in Bonaire: New Year's Day (Jan. 1st); Good Friday; Easter Monday; Queen's Birthday (April 30th); Labour Day (May 1st); Ascension Day; Holy Saturday (Monday after Carnival); Kingdom Day (December 15th); Christmas Day (December 25th); Second Christmas Day (December 26th).

TIME: 4 hours slow of GMT. No summer time kept.

AIR SERVICES: There is a good daily air service between Bonaire and Curacao. 8 to 10 flights a day with good connections at Curacao with the international services to and from many parts of the world.

CUSTOMS OFFICERS ON BOARD: 1 or 2 Customs Officers will remain on board during the vessel's stay in port. Such officer(s) must be furnished meals at regular meal hours.

POLICE/AMBULANCE/FIRE: Police, tel. 8000; Ambulance, 8000; Fire, Tel. 8000.

TELEPHONE: Telephone connection on board is possible, to be arranged by ship's Agent in advance.

SERVICES: No tank cleaning equipment or facilities for discharge of tank washings. Compass adjusting, draft and quantity surveys, damage surveyors, marine consultants. Survey of tanks and machinery contact Independent Maritime Bureau, Tel: 8151.

SHORE LEAVE: No restrictions for shore leave.

REGULATIONS: No particular or unusual regulations for the port.

DELAYS: As a rule there is no delay in berthing, loading or discharge. Delay in loading or discharging may be caused by rain.

BANKS: ABN Bank, Simon Bolivarstraat, Tel: 8417 and 8429.

Maduro and Curiel's Bank, P.O.Box 66. Tel: 8420 and 8414. Telex: 1201 Mcbon NA.

Banco Barclays Antillano N.V. Breedestraat, Tel: 8295.

EMERGENCY CO-ORDINATION CENTRE: Nearest Emergency Co-ordination Centre is the Rescue Co-ordination Centre of the Royal Netherlands Air Force on Curacao, Tel: Curacao 81622 and 81628.

STORING: As a rule the vessel is stored by truck. Trucks can proceed alongside at the berth. Forklifts can be used on jetty to handle stores.

No particular Customs Regulations regarding storing.

Local people can be employed for storing, contact ship's Agent.

GENERAL:

Live Animals: The importation of dogs, cats, horses and certain other animals is permitted, provided these animals are accompanied by a certificate issued at place of origin by a licensed Veterinarian, stating that the animal in question is free from any contagious disease. Dogs must have, in addition, a certificate of Rabies Inoculation. All animals imported (including birds) will moreover be examined on arrival.

Prohibited Imports: The importation of the following is strictly prohibited: Parrots and parakeets, absinth, explosives, firearms, ammunition and firework, except with prior permission from local authorities. All kinds of narcotics and drugs, the sale and use of which is regulated by International Conventions, except for legitimate use by and for sale to drugstores by duly accredited importers. Unauthorised reprints of copyrighted scientific and literary works of art. Copper, bronze and nickel coins, except for account of the Government of the Netherlands Antilles. Obscene printed matter.

Immigration Law: All passengers disembarking in Bonaire as temporary visitors, for business purposes, on vacation, or in transit to other destination, must be in possession of:

(a) Valid passport/birth certificate.
(b) One passport photograph.
(c) A return ticket, through ticket or passenger-order to next destination outside of the territory of the Netherlands Antilles.
(d) All documents and visas necessary for continuing to next destination or return to place of origin.
(e) Sufficient means to be able to support themselves during their stay in the territory.

No visa is required from a Netherlands Consul on any of the aforementioned documents.

DEVELOPMENTS: No developments expected in the near future.

AUTHORITY: Bonaire Port Authority, Harbour Office, Kralendijk, Bonaire, Netherlands Antilles. *Tel:* 8151. *Telex:* 1292 Gobon NA. *Contact:* Captain Reginald M. Berenos, Harbour Master.

ORANJESTAD, Aruba: 12.31 N. 70.02 W.

(See Plan Book)

DOCUMENTS:

Clearance from last port.
Derat Exemption Certificate.
Ship's Register.
Manifest of Cargo (or ballast), or Bills of Lading for import goods and transit goods separately.
Crew List (4 copies).
List of Stores on Board (2 copies).
Consignee Mail (if cargo for discharge).
Passenger List (if any passengers).

The Passenger List must carry full names, ages, sex, nationality and occupation of passengers landing at Aruba. The ultimate destination of in-transit passengers must also be shown on the Passenger List.

Derat Exemption Certificates can be renewed at Oranjestad, Barcadera and St. Nicholas.

Outward clearance, cargo documents and list of outgoing passengers are delivered on board by the Agent's representative, thereby making it unnecessary for Masters to visit the Customs Office to obtain outward clearance.

PILOTAGE: Masters are requested to advise Agents of their expected time of arrival at least 48 hours in advance. Arrival messages should include advice regarding cash or other requirements. This information is particularly necessary in order to give prompt attention to vessel's requirements and to avoid delay after arrival.

Pilots are government employees and pilotage is compulsory for vessels from 50 g.r.t. upward entering or leaving the harbour. Pilots board inbound vessels within 2 miles of shore. The Agent's representative will arrange for Pilots to board vessels as necessary. Inbound vessels should close the West entrance of the harbour as near as prudently possible and make a lee to facilitate the Pilot's boarding.

Every vessel arriving or departing must provide and properly secure a pilot ladder which conforms with the standards of construction normally accepted by international safety standards. Failure to provide such a ladder may result in the Pilot's refusal to board a vessel.

ANCHORAGE: Anchorages, suitable even for deepest draft vessels, are located outside the protecting reef along the whole length of the Western and S.W. coast. The depth of water ranges from 10 to 35 fathoms. Because of the sharply shelving nature of the bottom in this area, it is recommended that the services of a Pilot be obtained in taking up an anchorage. Ships are anchored only during daylight hours.

TUGS: A tugboat of 1,000 h.p. is available for assisting vessels to and from the docks. The tug-boat is fitted out with radio-telephone which is open on 2182 kHz. while tug is in operation.

An additional tug, 2,200 h.p. fitted with VHF Channel 16 (Working Channel 11), is available.

MINIMUM DRAFTS: For tankers arriving or sailing in ballast the following minimum drafts are required for manoeuvring under normal weather conditions:

G.R.T.	*Forward*	*Aft.*
16,600 (T-2)	8 ft.	18 ft.
18,000	8 ft.	18 ft.
27,000-30,000	10 ft.	20 ft.
30,000-36,000	14 ft.	22 ft.
37,000	14 ft.	24 ft.
46,000	16 ft.	26 ft.

MAX. SIZE: The harbour itself has a depth of 36 ft. at MLW. The safe salt water draft approved for entering and leaving is 33 ft. Vessels normally enter via the West channel and depart via the East channel.

HEALTH: The Port Doctor will visit an arriving ship only if there is a case of quarantinable disease on board, if the ship has no clean Bill of Health or if one of the preceding ports of call has been declared to harbour a quarantinable disease. The Netherland Antilles Bill of Health is free of charge.

RADIO: Shore station for R/T communication with 24-hour service. VHF Channel 16, 156.80 MHz (calling); Channel 11, 156.55 kHz (working channel).

HF 2182 kHz, 2558 kHz (working frequency transmitter), 2158 kHz (receiving frequency SSB).

BERTHING: In total there are 4,070 ft. of dock length available to accommodate ocean-going vessels and 1,090 ft. of dock for small craft, of which:

1,720 ft. with 36 ft. of water alongside
2,350 ,, ,, 34 ,, ,, ,, ,,
460 ,, ,, 16 ,, ,, ,, ,,
230 ,, ,, 10 ,, ,, ,, ,,
400 ,, ,, 6 ,, ,, ,, ,,

CONTAINER FACILITIES: 30 acre container terminal in operation. Length of quay 450 m., depth alongside 12.0 m. 1×50 ton container crane. 2×35 ton forklifts.

STEVEDORES: Stevedoring is performed at a fairly fast rate compared with other ports in the Caribbean area. All cargo has to be handled with ship's tackle, while on the docks and in the warehouses fork-lift trucks are used for transportation of merchandise. General cargo is handled at an average of 8 tons per gang per hour.

REPAIRS: There are no facilities at Aruba for major ship repairs. Local workshops can do repairs of minor nature. Preliminary advice regarding such minor repairs should be included in ETA messages and work requisitions for repairs should be prepared for handing to the Agent's representative immediately upon arrival.

Radar, radio and gyro repairs can be carried out. However, it is important that Masters radio in their requirements as early as possible and give a brief reference as to the nature of the breakdown or fault of the equipment concerned.

While alongside vessels must be prepared to move at 1 hour's notice. Engine repairs to the effect of demobilizing the vessel may only be carried out with special permission.

MEDICAL: Excellent medical and dental attention is available at any hour of the day or night to crew members of all vessels.

FRESH WATER: Boiler and drinking water of purest quality is supplied by hose from the docks at a rate of 200 t.p.h. (in special cases 400 t.p.h.).

FUEL: The port of Oranjestad is an official Esso bunker station. All grades of bunker fuels can be supplied from shore tanks at a rate of 1,500 bbls./p.h. A minimum of 48 hours advance notice is required.

SURVEYORS: Representatives of the American Bureau of Shipping, the Lloyd's Register of Shipping and the Norske Veritas are resident in the area. Masters may request the surveyors' services through the Agent.

BALLAST: Vessels must arrive with sufficient ballast to permit safe handling. All vessels should enter port with clean ballast that can be pumped over board when alongside, as it is prohibited to pump dirty ballast into the harbour.

GANGWAY/DECK WATCHMEN: An efficient and continuous watch must be maintained on deck and in the engine-room of all ships while in port, and a sufficient number of men must be on board at all times to move vessels either for harbour operations purposes or in emergency situations.

OPENING/CLOSING HATCHES: This work is normally carried out by the crew.

AIRPORT: The port of Oranjestad – the commercial and tourist harbour of Aruba – is only 5 miles by road from the airport. The connection by air with the U.S.A. and Europe is very good and frequent (TCA, KLM, VIASA); other airlines operating in Aruba are: ALM, LAV, Aerocondor, and Caribbair.

POLICE/AMBULANCE/FIRE: Police, Oranjestad, Tel: 1000; Ambulance, Oranjestad, Tel: 2010/1234; Fire Alarm, Tel: 00.

CONSULS: The following countries have consular representatives at Aruba:

Brazil
Chile
Colombia
Costa Rica
Denmark
Dominican Republic
El Salvador
Great Britain
Guatemala
Haiti
Italy
Lebanon
Liberia
Nicaragua
Norway
Panama
Peru
Portugal
Spain
Sweden
Switzerland
Venezuela
West Germany

Necessary for Masters of Panamanian and Italian flag vessels to visit Consulates at Oranjestad to present documents and receive despatches. Other Consulates have similar requirements. Masters may check with Agent for clarification.

TIME: Local time is 4 hours slow of GMT. Vessels are requested to use local time in ETA messages and when dealing with their Agents.

CUSTOMS GUARDS: Local authorities assign 1 or more Customs guards to each vessel during its stay in port; the charges for guarding are for the account of the vessel. These officials must be provided with meals on board at regular meal hours.

SHORE LEAVE: Under normal circumstances no restrictions are imposed by the Government Immigration Authorities on shore liberty. Masters are requested to endeavour to have all crew members on board prior to departure time, so that the ship will have no delay in sailing.

AUTHORITY: Aruba Ports Authority N.V., L. G. Smith Boulevard 68, Oranjestad, Netherlands Antilles. *Tel:* 26633. *Telex:* 5120.

PHILIPSBURG, St. Maarten: 18.05 N. 63.10 W.

(See Plan Book)

LOCATION: Philipsburg, capital of Netherlands St. Maarten, lies in a well-protected bay in the S.E. corner of the island. The only obstruction to the harbour is "Proselyte Reef" or "Man-of-War-Shoals", located Lat. 17° 56′ N., Long. 63° 04′ W., with a minimum depth of 2.5 fathoms. Entrance to the harbour can be accomplished by passing either to the North or the East of this reef.

DOCUMENTS:

Crew List: Immigration 1 copy.
Agent 1 copy.
Passenger List: Immigration 1 copy.
Agent 1 copy.
Store List: None required.
Ship's Register: Pilot will require to see this document for obtaining the official tonnage.

Note: No special form is prescribed for the above documents, consequently these may be made out in Company's regular form.

No consular visa required on any of the above documents.

Immigration: Immigration Officer boards ship immediately after docking. Passengers and crew are usually free to disembark immediately after boarding.

Agency Personnel: Agency personnel board immediately after vessel is docked together with Immigration Officer.

PILOTAGE: Pilotage is compulsory and performed by Government Pilots. Ships bound for the pier at Philipsburg should await the Pilot at a max. distance of 1 mile from the line Point Blanche-Fort Amsterdam. Pilotage service available day and night.

Pilot Ladder: Jacob's ladder, in clean and sound condition is sufficient.

Time to Berth: From pilot station to pier, about 15 to 30 minutes.

ANCHORAGE: Ample suitable anchorage area available with sufficient depths of water for several large ships simultaneously.

A good anchorage can be found in 40 ft. depth at the cross point of line joining the pier and Fort Amsterdam (Fl. ev. 4.5 secs.) and line joining radio masts and the mountain "Naked Boy".

If and when the pier is already occupied by another cruise-ship, cruise-ships can proceed to anchorage, in which case communications between ship and shore to be by ships' own launches.

For ships proceeding to anchorage, pilotage is also compulsory.

MAX. SIZE: 1 berth (North side of pier) max. LOA 300 ft. and draft 30 ft. 1 berth (South side of pier) max. LOA – no limit, max. draft 30 ft. Vessels berth portside alongside. 1 berth (East side of pier) max. LOA 360 ft. and maximum draft forward 12 ft.

RADIO: The Government radio and telegraph service operates daily from 0700 L.T. to 2400 L.T. worldwide.

Radio Telephone: VHF Channel 16.

ETA Messages: ETA messages should be sent to Agent preferably in local time at least 24 hours in advance and any changes occurring thereafter should be advised.

Use of Ship's Radio in Port: Prohibited.

TUGS: None available.

BERTHING: *A. C. Wathey Pier:* The new concrete pier at Philipsburg is located at Point Blanche in Great Bay and has a length of 210 m., with an additional 60 m. of berthing space, located at a 60° angle to the finger pier. Minimum depth is 34 ft. of water. 4 jumbo rubber fenders are located along the berthing space.

Height from sea-level to the deck of the pier at high tide is 4.02 m., at low tide 4.48 m. Ship will lie with port side to the pier.

Mooring and Unmooring: 3 dolphins are located in an extended line of the berthing space for mooring. Minimum required size of openings in shackles is 40×50 cm. Mooring boat is available.

Equipment: Cranes are available with a capacity of 20 tons max. Forklifts up to 40 tons for handling 20 ft. and 40 ft. containers and sufficient flat-bed trailers and low-buoys are also available.

STEVEDORES: There are 3 gangs available. Each gang has a total of 9 workers.

MEDICAL: Government physicians are available in Philipsburg and there is also a small, but up-to-date hospital operated by the Netherlands Antillean Government. A "Medical Service Request" form must be signed by the Master or other Authorised Officer for crew members requiring medical treatment.

Dental facilities available.

FRESH WATER: Available.

FUEL: No facilities for carrying out repairs except for radio and radar (Radio Holland).

SURVEYORS: There is a representative of Lloyd's on the island.

AIRPORT: The island is served by A.L.M. (Dutch Antillean Airlines), Air France, Eastern Airlines, K.L.M. (Royal Dutch Airlines), L.I.A.T. (Leeward Island Air Transport), Prinair.

There are direct, almost daily flights, to and from New York and Miami connecting to other major places.

TIME: GMT minus 4 hours.

HOLIDAYS: The following Official holidays are observed in St. Maarten: New Year's Day (January 1st); Good Friday (varies); Easter Monday (varies); Queen's Birthday (April 30th); Labour Day (May 1st); Ascension Day (varies); Whit Monday (varies); St. Maarten Day (November 11th); Kingdoms Day (December 15th); Christmas Day (December 25th); Boxing Day (December 26th).

TELEPHONE: Service from ship to shore is not available.

GENERAL:

Ship's Bars and Shops: No restrictions and these may remain open for business while in port.

Laundry: Available.

Wind: Prevailing winds on the island between the months of March and December are East to South, velocity 6 to 10 knots. Between December and March winds are generally North to East at a velocity of 8 knots to 15 knots.

Tide: The tidal range in Philipsburg is at most 2 ft., but regularly not more than 1 ft.

Current: The current outside Philipsburg Harbour changes from Easterly to Westerly, with a max. velocity of 2 knots. At the Pier the current generally runs from North to South, with an average velocity of 0.5 knots.

Gangways: No gangways are available from the pier and ship's gangways will have to be used.

Ship's Launches: There are no restrictions on the use of ship's launches.

Stores: Available.

Garbage: No disposal facilities available.

Port Health: No regulations or requirements.

Customs: None.

AUTHORITY: Harbour Office, Philipsburg, St. Maaten, Netherlands Antilles. *Tel:* 2307-2348. *Contact:* John Ph. F. Craane, Harbour Master.

ST. EUSTATIUS: 17.29 N. 63.00 W. (See Plan Book)

LOCATION: Statia Terminals N.V.'s jetty and shore facilities are located at Tumbledown Dick Bay on the Northwest shore of the island in position Lat. 17° 29′ 25.8″ N., Long. 63° 00′ 00.8″ W.

The jetty extends approximately 0.5 miles seaward and can accommodate a vessel on each side.

Vessels of up to 175,000 tons can be accommodated in the Southern berth and up to 100,000 tons on the Northern berth.

A barge loading berth and tug berth are located inshore of the platform on the South side of the pier.

Vessels are also bunkered at the anchorage which lies to the South of the jetty.

DOCUMENTS:

2 copies Crew Lists.
2 copies Passenger Lists.

PILOTAGE: The Pilot will normally board vessels 2 miles from the end of the finger jetty.

Pilotage to the terminal berths is compulsory.

Pilotage to the anchorage is not compulsory but is available on request.

ANCHORAGE: The recommended anchorage is off the village of Oranjestad where a shelf with depths of up to 90 ft. extends almost 2 miles offshore.

Vessels awaiting bunkers by barge should anchor in the Northern part of the anchorage off Fort Royal (Interlopers Point), which is closer to the barge loading facility.

The anchorage area provides good holding ground throughout.

MAX. SIZE: See "Berthing".

HEALTH: Pratique will normally be granted when the Pilot boards. Masters must report on any communicable disease which may have occurred on board prior to arrival.

RADIO: Statia Terminal and the pilot station maintain listening watch on Channel 16 and Channel 9 is used as a working Channel between ship and shore.

Vessels to make contact on Channel 16, 4 hours prior to arrival for berthing/anchoring instructions.

ETA: ETA should be sent 72, 48 and 24 hours prior to arrival. Fullest details of the vessel and her cargo should be sent in the initial message. Cables should be addressed to "Staterm, Saint Eustatius" and sent via Radio Curacao (PJC).

TUGS: Two twin screw Kort nozzle tugs, "Statia" and "Saba", assist vessels at the terminal.

The Pilot will normally board from one of the tugs.

BERTHING:

Berth	*Max. d.w.t.*	*Max. Draft (ft.)*	*Loading Arms*
No. 1 (South Berth)	175,000	60.0	3×12 in. 1×6 in.
No. 2 (North Berth)	100,000	60.0	4×12 in. 1×6 in.

Bunker "C", I.F.O. and M.D.O. can be handled at both berths.

Connection to the shore is by Chicksan loading arms which the vessel's crew will connect under the supervision of a responsible officer.

Discharge is by ship's pumps assisted by shore booster pumps as required.

Loading is by gravity and/or shore pumps.

Both berths can accommodate vessels of up to 60 ft. draft.

Maximum discharge rate is 25,000 bbls./hr. and loading rate 30,000 bbls./hr.

The bunker "C" and I.F.O. arms on the jetties are fitted with 12 in. presentation flanges, and the diesel and gas oil arms are fitted with 6 in. presentation flanges.

Both berths are fitted with gangways for ships' use.

Ballast Facilities: The terminal can receive up to 63,000 barrels of dirty ballast, which is processed at 2,800 bbls./hr. The terminal will not accept ballast containing any chemical which may affect the processing systems.

MEDICAL: A qualified general practitioner practices on the island and there is a local hospital in Oranjestad.

In the case of more serious illness the patient can be evacuated for hospitalisation at St. Kitts or St. Maarten.

FRESH WATER: Available.

FUEL: All grades of bunkers can be supplied at the terminal berths.

In addition, Statia Terminals operates a bunker barge which can deliver all grades of bunkers in the anchorage area.

SAFETY/FIRE PRECAUTIONS: The provisions of the current edition of the "International Safety Guide for Oil Tankers and Terminals" will be observed by vessels alongside the terminal facilities, and a copy of the Company's "Terminal Information and Regulations" booklet will be given to the Master by the Pilot on boarding.

REPAIRS: There are very limited repair services on the island.

AIRPORT: Windair services the island with four flights per day to and from St. Maarten, where international connections can be made.

CUSTOMS: There are no Customs restrictions.

TIME: Local time is GMT minus 4 hours.

BANKS: Barclays Bank of the Netherlands Antilles N.V. operates a sub-office in Oranjestad, St. Eustatius. The address of the main office in St. Maarten is: P.O.Box 141, Front Street, Philipsburg, St. Maarten, Netherlands Antilles. Tel: 3511. Telex: 8022.

SHIPMASTER'S REPORT: June, 1983.

Approaches: Except for the Saba Bank about 10 miles to the West of the Island, the waters in the vicinity of St. Eustatius Island are generally clear of obstructions. However, vessels are advised to heed the cautionary notices on the charts of the area regarding the existence of shoal patches, and should keep outside the 200 m. line where possible. The bottom slopes gently all around the Island and in the terminal area the depth one mile off shore is 150 ft.

The Island, and the neighbouring islands of St. Kitts and Saba, are steep to and present excellent radar targets. The mountains on all 3 islands also provide good visual bearings during the approach. The Southern portion of the Island is dominated by an extinct volcano 600 m. high (the Quill) while a lesser hill 289 m. high (Boven) is located at the Northern end.

Statia Terminals maintains a navigational light on the seaward mooring dolphin of the jetty. The position is Lat. 17° 29′ 25.8″ N., Long. 63° 00′ 08″ W., at a height of approximately 9 m. The characteristic is flashing white every five seconds and the light has a nominal visual range of 10 miles.

Documents: 2 copies Crew List.
2 copies Passenger List.

Pilotage: Pilotage to and from the jetty berths is compulsory.

Pilotage to the anchorage is not compulsory but is available on request.

Pilotage is available around the clock and is provided under the terms and conditions of the Statia Pilotage/Towage Certificate. The terms and conditions contained in the Conditions for Use of Terminal Facilities control the legal and practical relationship between Statia and the vessels using the terminal. The Statia Pilotage/Towage Certificate summarises these terms as well as providing data necessary for controlling terminal operations. The Certificate must be signed by Masters of all vessels using the terminal.

The Pilot will board incoming vessels about 2 miles from the end of the finger jetty. Communications with the Pilot is by VHF radio. Contact should be established on Channel 16 after which vessels will be asked to shift to another Channel.

Pilot ladders must conform to internationally accepted standards of construction. When vessels arrive at the pilot station, a good lee should be provided for the Pilot who will normally board from one of the tugs attending the vessel.

Radio: ETA must be communicated 72, 48 and 24 hours prior to arrival by cable addressed to Staterm St. Eustatius via Radio Curacao (PJC). Thereafter if ETA varies by more than 2 hours, the terminal must be advised. The initial message should include the following:

Discharging Vessels:
1. Name of vessel, call sign.
2. ETA St. Eustatius.
3. Draft on arrival.
4. Gross barrels and temperature on arrival (by grade).
5. Expected discharge rate.
6. Number and size of manifold connections.
7. Ballast hours required after completion.
8. Bunker requirements: quantity and grade.

Loading Vessels:
1. Name of vessel, call sign.
2. ETA St. Eustatius.
3. Draft on arrival.
4. Ballast: quantity and discharge time.
5. Last cargo carried.
6. Ability to load while deballasting.
7. Maximum loading rate.
8. Number and size of manifold connections.
9. Departure draft.
10. Bunker requirements: quantity and grade.
11. Slops retained: quantity and grade.

Tugs: Statia has 2 tugs to assist vessel to and from the berths. These vessels, the "Statia" and the "Saba", are twin screw and twin rudder vessels and are fitted with Kort Nozzles producing a 34 ton bollard pull. The tugs are equipped with fire fighting monitors capable of delivering either water or foam.

The lines needed for use with the tugs will be provided by the tugs. Tugs are normally made fast alongside the vessel, forward and aft.

Berthing: The axis of the jetty lies in a direction 245° 42′, and construction is of steel pilings supporting a trestle catwalk and loading platform. The co-ordinates of the seaward dolphin of the jetty are: Lat. 17° 29′ 25.8″ N., Long. 63° 00′ 08″ W.

Vessels lie alongside flexible, woodfaced breasting dolphins on either side of the jetty. Vessel mooring lines are secured to mooring dolphins fitted with quick release hooks. Spring lines are secured to the breasting dolphins. Vessels are usually moored with their bows shoreward.

Berth No. 1 on the South side of the jetty can accommodate vessels from 20,000 d.w.t. to 175,000 d.w.t. in 62 ft. of water, and Berth No.2 on the North side of the jetty can accommodate vessels from 20,000 d.w.t. to 100,000 d.w.t. in 62 ft. of water. The water inshore along the jetty shoals gradually. The tug and barge berths are at the shore end of the jetty.

The normal tidal range at the jetty does not exceed 2.5 ft.

Loading arms are used for the transfer of cargo and bunkers.

Fire fighting monitors are installed on the loading platform.

Fresh Water: Available from barge "St. Maarten" (4,000 d.w.t.).

Fuel: Vessels using the jetty will generally be bunkered from the terminal jetty. Vessels not using the jetty will be bunkered from the barge "St. Maarten", capable of handling gas oil, marine diesel, intermediate fuel oils, bunker C and potable water.

General: Between the months of May and October hurricanes may develop in the Caribbean area although St. Eustatius is outside the normal hurricane tracks. However, in the event that hurricanes should threaten, all seamanlike precautions should be taken by vessels using the anchorage and terminal facilities.

OPERATOR: Statia Terminals, N.V., Staterm Building, P.O.Box 170, Oranjestad, St. Eustatius, Netherlands Antilles. *Tel:* 2300. *Telex:* 8029 Term NA. *Contact:* Captain D. C. McNab, Marine Operation Manager.

Statia Terminals Service Inc., 345 Palermo, Coral Gables, Florida 33134. *Tel:* (305) 445-2639. *Telex:* 807578.

SAN NICOLAS, Aruba: 12.26 N. 69.55 W.

(See Plan Book)

DOCUMENTS/HEALTH and all General Information, refer to "Oranjestad".

PILOTAGE: (Inner Harbour) Pilotage is compulsory. Pilot boards 1.5 miles S.W. of the West Entrance Buoy.

A pilot service for anchoring off Lago Aruba Terminal is available upon the Master's request, providing radar and echo sounder are functioning properly.

ANCHORAGES: There are 3 anchoring areas off Aruba.

1. About 3 miles W.S.W. of Noordwest Point.
   This anchorage can be affected by swell so equipment and personnel changes can be risky in poor weather. Because of the changeable weather this anchorage is not recommended for vessels staying for long periods or for VLCCs. When anchoring care should be taken to avoid the submarine cable in this vicinity.
2. About 6 miles S.W. of Oranjestad.
   This anchorage is generally quieter than the one described above, however, transport to the shore may take longer. This area is suitable for all ship sizes and with many years of experience there have been no reported problems of anchors dragging.
3. The "Restricted Anchorage".
   There is a Restricted Anchorage about 2 miles off-shore and some 4 miles N.W. of Oranjestad. This anchorage is only to be used by vessels engaged in operations requiring assistance from the shore. Operations would include repairs, hull cleaning or tank cleaning. Vessels proceeding to this anchorage will be specially advised by Charterers or Owners. For anchoring Masters are recommended to take a Pilot.

It should be noted that in all the anchorages described above inward clearance and other formalities are not necessary, as long as there is no direct contact with the shore. If crew changes or other direct contact with the shore is to take place then normal procedures have to be followed.

Tug and launch services are available at all the anchorages for stores or personnel reasons.

Whilst waiting for orders or acting as floating storage, vessels are required to take every precaution to avoid all forms of pollution including dumping of floating garbage.

Prohibited Anchorage: Lat. 12° 25.83′ N., Long. 69° 55.52′ W., in the vicinity thereof.

RESTRICTIONS: The port is open for day and night navigation, allowing vessels to enter at any hour. The safe salt water draft approved for entering is 39 ft. and 40 ft. for leaving. Vessels normally enter via the West channel and depart via the East channel.

Tides: Diurnal with max. amplitude of 18 in. Datum used is MLW., water level never falls more than 6 in. below MLW.

MAX. SIZE: *Reef Berths:* Tankers up to 550,000 d.w.t. No. 2 Reef berth, depth alongside, 105 ft. MLW. Also see "Reef berths".

Inner Harbour: 90,000 d.w.t.

RADIO: Radio-telephonic communication is possible on frequency of 156.70 VHF (Channel 14). Calling and listening Channel 16. Call sign "Lagomarine". Agency business is conducted on international Channel 19 (call sign "Stanship Aruba").

TUGS: 2 diesel-powered tugs are used for berthing and unberthing. For vessels over 50,000 d.w.t. a third tug is used.

BERTHING: All port facilities are controlled by Lago Oil and Transport Company.

The max. limitations for vessels using San Nicolas facilities are:

Berths	*Length (ft.)*	*Beam (ft.)*	*Salt water max. draft (ft.)*	*Bow to manifold (ft.)*	*Approx. Deadweight*
1 South	710	UNL	38	340	50,000
1 North	690	110	37	340	50,000
2 South	800	120	39	400	50,000
2 North	720	120	38	350	50,000
3 South	870	130	39	440	90,000
3 North	760	120	39	380	80,000
HDS Pier	600	90	30	UNL	30,000 (dry cargo only)

The max. entering draft is 39 ft. even keel salt water. The maximum sailing draft from No. 2 South, No. 3 South and No. 3 North is 40 ft.

The following is the suggested ballast draft for vessels.

MDWT	*Fore (ft.)*	*Aft (ft.)*
10 – 20	8	18
20 – 30	10	20
30 – 40	14	22
40 – 50	14	24
50 – 100	16	26

REEF BERTHS:

VLCC anchorage: When anchoring is necessary, Masters of VLCCs may wish to anchor in the following position; 12° 24′ N., 70° 07′ W., approx. 12 miles West of San Nicolas Harbour in approx. 25 fathoms.

Pilot Station: 2 miles to 3 miles West of San Nicolas Harbour entrance. When Pilot is boarding, the vessel should be on an Easterly course with a speed of not more than 2 knots.

Embarking Pilot, Loaded VLCCs: On the port side with either pilot hoist or conventional pilot ladder.

Ballast VLCCs: On the port side with a combination of accommodation ladder and conventional pilot ladder, or with only accommodation ladder.

Disembarking Pilot, Loaded VLCCs: On the starboard side with either pilot hoist or conventional pilot ladder.

Ballast VLCCs: On the starboard side with a combination of accommodation ladder and conventional pilot ladder, or with only accommodation ladder.

Tugs: Normally 4 tugs used for tankers over 250,000 d.w.t. 2 on long lines, 1 forward and 1 aft and 2 alongside starboard side. Tug's lines used.

Docking: Always portside to, with starboard anchor ready, walked out to 1 shackle in the pipe.

Approach Velocity: RB II is equipped with a Doppler traffic light system.

Approach velocity 00–12 ft./min.=green.
12–20 ft./min.=amber.
above 20 ft./min.=red.

When the vessel is receding, the light is always green.

Mooring Launch: Used for all lines, except for the spring lines fore and aft. Forward moorings first, after moorings second.

Mooring Capstans: All mooring and breasting dolphins are equipped with capstans, 2 ton pull capacity, 100 ft./min. line hauling capacity.

Max. Size:

	MDWT	*Max. LOA (ft.)*	*Beam*	*Depth (ft.)*	*Max. draft (ft.)*	*Pier Heading*	*Approac angle*
RB I	40–400	1200	UNL	80	75	130° true	15°
RB II	40–550	1400	UNL	105	95	114° true	10°

Sailing Draft Ballast VLCCs: about 25 ft. fore and 35 ft. aft.

Lines and Winches: Mooring lines assumed to be 1.625 in. diameter steel wire with a breaking strength of 90–100 tons.

Mooring winches assumed to have about 25 metric tons heave capacity and 55 metric tons brake holding capacity (minimum).

Combination of a wire and a synthetic line to a single dolphin will not be permitted.

Mooring lines must not be stressed beyond 55% of their breaking strength.

Self tensioning is not permitted. Automatic winches should be used on manual brake.

Synthetic tails on wires should have a higher breaking strength than the wire to which they are connected. The eyes of the tails should be protected from abrasion with suitable coverings, and tails should be connected to wires with suitably designed shackles.

A maximum of only 2 layers of line to be allowed on working or tension drum of split drum winches.

Current and Wind: Current is less than 0.5 of a knot 90% of the time. Wind is less than 20 knots 70% of the time, and less than 25 knots 97% of the time.

Wind direction True	*% of time*	*Current direction* True	*% of time*
20° – 40°	2	40° – 70°	24
50° – 60°	6	100° – 110°	17
70° – 80°	33	140° – 240°	10
90° – 100°	40	260° – 290°	24
110° – 120°	13	320° – 340°	25
140° – 170°	1		
220°	5		

Wind tolerance: At 30 knots steady, loading will be discontinued, and the loading arms will be drained, engine to be confirmed ready for use.

At 35 knots steady, arms will be disconnected and tugs will be on stand-by.

Loading Arms: RB I; four 16 in. cargo arms with 16 in. bolted flange connections. One 8 in. bunker arm (No. 5 arm, the most Westerly arm). RB II; five 16 in. cargo arms with 16 in. connections.

Discharge/Loading Lines: RB I 36 in., 3,000 ft. long. RB II 56 in., 4,000 ft. long.

Radio Contact: Contact between Loading Master, control room, marine office by VHF and UHF. Particulars will be given by Loading Master.

Bunkers: RBI; through bunker arm (No. 5). RB II; through No. 1 or No. 5 loading arms with reducers.

Water: Not available.

Provisions: By launch; to be taken on board by ship's lifting gear on the port quarter.

Shore Leave: No pedestrian traffic allowed between ship and main gate. Arrangements for crew transportation can be made with Agent.

LIGHTERING OPERATIONS: VLCCs discharging at Aruba may be called upon to discharge part of their cargo by ship-to-ship transfer off Aruba. The lightening operation is carried out by vessels suitably equipped for ship-to-ship transfer operations, and is under the control of Exxon's Lightening Master on the lightening vessel.

The Lightening Master will board about 1.5 miles off San Nicolas Haven to discuss the operations. A derrick or crane should be ready on the lee side to pick up various equipment for the mooring and pipe-line connection. A Lightening Assistant stays on board to advise and assist with mooring procedures.

The VLCC and the Lightening vessel rendezvous in position: Lat. 12° 24′ N., Long 70° 14′ W. Communications are by portable radio placed on board and/or VHF Channel 8. The designated lightening area is bounded by the following positions:

(1) Lat. 12° 25′ N., Long 70° 04.4′ W.
(2) Lat. 12° 25′ N., Long 70° 10.3′ W.
(3) Lat. 12° 30′ N., Long 70° 13.5′ W.
(4) Lat. 12° 30′ N., Long 70° 07.2′ W.

The mooring takes place whilst steaming into the prevailing wind on an Easterly course at about 3 knots. Thereafter the VLCC anchors within the designated lightening area for the ship-to-ship transfer. Wind speeds in excess of 23 knots are considered unsuitable for the mooring and the lightening operations to take place.

Masters need not come ashore to clear ship with Customs. The ship's Agent can do this by proxy. Ship's papers for clearance and signed proxy will be picked up from ship off port by tug or launch.

FRESH WATER: Not available.

FUEL: All grades of bunkers available.

Berth: Vessels arriving for bunkers only with a draft greater than 39 ft. or over 90,000 d.w.t. must use the Reef Berths. As the berth is used for crude oil trans-shipment bunkering vessels can expect delays. Also the following considerations apply:

1. Vessels working cargo have priority over vessels bunkering.
2. In assigning tugs, vessels working cargo take priority. (2 to 3 hours tug service required at the sea berth.)
3. Vessels using the Reef Berths must have at least 12 good mooring lines. All mooring winches and equipment will be inspected and must be in good order. Vessels may not be docked if equipment is faulty.
4. In the event of marginal weather, deep draft vessels calling for bunkers may not be docked.

REPAIRS: A local workshop can do minor repairs.

PORT FIRE PROTECTION: The port of San Nicolas is very well equipped with modern equipments for fire-fighting and fire prevention.

BALLAST: Vessels must arrive with no more than 8% d.w.t. dirty ballast. Clean ballast will be discharged overboard after docking. Slops can be discharged to the disposal facilities ashore. Shore reception facilities are limited.

SPECIAL REGULATIONS: Strict compliance with Harbour Safety Regulations is mandatory. Stringent regulations prohibit the transportation of alcoholic beverages through Lago refinery and harbour area. No liquor or beer may be taken on board or removed from vessels except only bonded stores ordered by the Master.

SHORE LEAVE: As all ship's personnel when going ashore have to pass through the docks and the company's concession, every seaman must carry an identity card to check off against ship's crew list at main gate. Seamen must have special pass to use any other gate than refinery main gate.

POLICE/AMBULANCE/FIRE: Dial 2222 on jetty telephone. Call "Lagomarine" on UHF set which is supplied to every ship whilst alongside.

AUTHORITY: Lago Oil and Transport Co. Ltd., Seroe Colorado, Aruba, Netherlands Antilles. *Tel:* 9-2067. *Telex:* 5026. *Cables:* Essolago Aruba (Manufacturing). "Stanship" (Marine). *Contact:* J. D. Vanderlinde.

SINT MICHIELSBAY, Curacao: 12.09 N., 69.01 W.

LOCATION: Sint Michielsbay, on the South coast of Curacao, 5 miles N.W. of Willemstad, is an open bay, naturally protected from prevailing winds and sea.

PILOTAGE: Compulsory.

ANCHORAGE: In the bay 650 ft. out of the coast in 130 ft. water is laid a S.P.M. buoy, which gives a good anchorage to vessels which, because of dangerous cargo, quarantine or because of a defect cannot enter another port of Curacao.

BERTHING: Vessels moored with their stern to the buoy and their bow anchors are heaved out to hold the foreship from the coast.

REPAIRS: Repairs or handling cargo can be carried out by way of barges. A landing jetty for barges is available.

GENERAL: Other services as tugboats, lighterage, stevedoring, etc. are rendered from Willemstad.

AUTHORITY: Curacao Port Authority, N.V., Werf de Wilde Z/N, Willemstad, Curacao, Netherlands Antilles. *Tel:* 611133, 611740. *Contact:* E. P. Sint Jago, Harbour Master.

WILLEMSTAD/EMMASTAD, Curacao: 12.06 N. 68.56 W. **(See Plan Book)**

DOCUMENTS:

For Immigration:

2 copies of Crew List.

2 copies of list of passengers. Passenger lists should indicate full names, age, sex, civil state, and occupation. Passengers must show proof of citizenship (a passport, voter's registration or birth certificate is acceptable).

For Customs:

1 copy of list of stores (deck, engine and stewards department).

Manifest of cargo for Curacao, if any, in duplicate, on special form called "Vrachtlijst" itemising the cargo by lots of the same mark and showing numbers, kind of packages, general description of contents and weights in kilograms or pounds of each lot.

Manifest of cargo for Curacao, in transit, for transhipment to other ports, if any, in duplicate for each different port separately on special form and itemised as indicated above.

Manifest of cargo on board, in transit, if any, in duplicate on special form as indicated above, showing only the total number of packages on board, general description of the merchandise and total weight in kilograms or pounds; if the cargo is in bulk, this is indicated accordingly.

2 copies of tally books of cargo for discharge at Curacao, if any.

1 copy of crew list plus 1 copy of personal effects list.

1 copy passenger list landing at Curacao.

If the ship is in ballast, only the stores list is required.

The Customs Officer will then make out his "Akte van inklaring" (Certificate of Entry).

The above documents have to be signed by the Master. They may be made out in Dutch, English, Spanish or French.

PILOTAGE: Pilotage is compulsory. Rendered day and night. Pilots are government officials and are stationed at Willemstad. The Harbour Master is also the head of the Pilot Service.

Vessels must provide a lighted, manned, properly secured and clean pilot ladder, fitted with sufficient spreaders.

A life buoy fitted with a Holmes light, as well as a reliable heaving line, should be placed close to the pilot ladder and the embarkation and disembarkation should be supervised by an officer. Vessels arriving or leaving with a freeboard exceeding 30 ft. must use the accommodation ladder in conjunction with the pilot ladder (Safety of Life at Sea Convention 1960).

Vessels bound for Curacao should proceed to Willemstad harbour except when they have specified orders for another bay.

Vessels in sight of Willemstad will be contacted by the signal station at Fort Nassau for further orders. From this same station, lights are shown to direct the traffic in port.

Vessels should stay 3-4 miles off shore S.W. of the harbour entrance to await Pilot. Both anchors should be ready for immediate use. Defects of engines, steering gear, anchor gear and other defects which influence the manoeuvring ability of the vessel should be reported before entering to the Harbour Master. The pilot motorboat is identified by a blue flag with the letter "L" in daytime, and a red light above a white light at night.

ANCHORAGE: As a rule there is no anchorage area in the harbour of Willemstad, but in the Eastern part of the Schottegat there is a dolphin with mooring buoy on each side available to await berth or orders for limited time subject to permission and conditions from the Harbour Master.

4 vessels, 2 vessels alongside each other can be safely moored at these buoys. Depth: 40 ft.; distance between each buoy and dolphin 1,000 ft. Furthermore, in the Southern part of the harbour a set of 2 dolphins can accommodate 2 vessels with length up to 600 ft. and a max. draft of 20 ft.

RESTRICTIONS: The harbour of Willemstad consists of a 1,400 yd. long and min. 270 ft. broad channel, the Santa Anna Bay, with depths from 50 ft. to 79 ft. and an adjacent inner bay, the Schottegat, a 150-acre body of water with a depth of more than 10 ft. and a max. of 79 ft.

The navigable portion of the entrance of the port is 865 ft. wide, marked on either side by a light-buoy, and the minimum depth is 50 ft.

Required minimum draft for tankers arriving, shifting and sailing:

g.r.t.	fwd. ft.	aft. ft.
up to 11,000	10	16
11,000–15,000	11	18
15,000–19,000	13	19
19,000–25,000	14	20
25,000–29,000	15	21
29,000–35,000	17	23
35,000–43,000	18	24
43,000–45,000	19	25
45,000–47,000	20	25
47,000–50,000	21	26
50,000–55,000	22	28
55,000–60,000	22	29
60,000–65,000	23	30
65,000–70,000	23	31
more than 70,000	24	32

Maximum trim for tankers: 10 ft. by the stern, 2 ft. by the head.

BRIDGES: Santa Anna Bay is crossed by 2 bridges, the Queen Emma floating pontoon bridge and the new, fixed bridge.

The pontoon bridge opens day and night for in and outgoing vessels. There will no longer be any waiting period at the harbour entrance. Automobile traffic will be diverted to the new bridge and those on foot will have continuous ferry service available. Ships will have overall preference for openings.

The new fixed bridge, dominating Willemstad's skyline and the entrance to Schottegat Bay, is 185 ft. high, (clearance 180 ft.) enabling the biggest vessels to pass under. The bridge is of box girder construction and is open to automobile traffic only. Glare-proof lights are installed to prevent interference with light signals that harbour Pilots rely on when bringing a ship through the channels.

Tankers passing through the Santa Anna Bay must have all tank-lids properly closed, even if they are gas free. This is a harbour regulation.

MAX. SIZE: Length 850 ft., draft 45 ft. Vessels with a LOA of 1,000 ft. have been piloted in the harbour.

RADIO: Port Operations Station (Operated by Harbour Authorities): Location, Fort Nassau. Call sign, Fort Nassau. Frequencies, International Channels 16 (156.80 MHz), calling and safety; 12 (156.60 MHz), working, first choice; 14 (156.70 MHz). Watchkeeping, 24 hours on Channel 16. Type of operation, Simplex, Frequency modulated. Range, 20 to 25 miles.

Main Private Station (Operated by Shell Curacao N.V.): Location, on the Zwartberg. Call sign, Shell Curacao. Frequency, international Channel 25 (receiving, 157.25 MHz); (transmitting, 161.85 MHz). Type of operation, Duplex working, frequency modulated; operated by remote control from Shell's telephone exchange; ask operator for connection with party desired. Range, 20 miles. Watch-keeping, 24 hours on Channel 25; normal daily business, 0730 hrs. till 2400 hrs.; urgent business only, 2400 hrs. till 0730 hrs.

Tug Base Station: Location, on the Zwartberg. Call sign, Marine Department – for tug movements only and in an emergency to direct the tugs. Watchkeeping during office hours. Central Post – for tug movements only. Watchkeeping 24 hours. Shell Curacao – for emergency calls to tugs only after having been alerted on Channel 25. No watchkeeping. Frequency, International Channel 14 (156.70 MHz). Operation, Simplex – frequency modulated. Operation by remote control from Shell's Marine Department, Central Post and telephone exchange.

Tug Mobile Stations: Location, 1 on each tug. Call sign, Balau, Drado, Koraal, Passaat, Karet, Piku, Buni, Mula and Orca. Frequency, International Channels 16, 12, 14, 9, 8 and 6. Watchkeeping, 24 hours on Channel 14. Operation, Simplex – frequency modulated.

Curacao Drydock Co. – VHF Channel 6. SEL Maduro and Sons Inc. – VHF Channel 10.

HEALTH: The Port Doctor will visit only if there is a case of quarantinable disease on board. The Netherlands Antilles Bill of Health is free of charge.

TUGS: Compulsory for all tankers exceeding 3,000 g.r.t. Tankers exceeding 700 ft. overall length must make one tug fast forward before entering.

S.I.A. (Smit International Antilles N.V.) has 3 modern powerful tugs stationed at Bullen Bay, for rendering services to tankers calling at Bullen Bay.

The "Piku", 4,000 h.p., 59 tons bollard pull, built in 1974.
The "Buni", 4,000 h.p., 59 tons bollard pull, built in 1975.
The "Drado", 2,800 h.p., 37 tons bollard pull, built in 1976.

They are also used by "ship to ship transfer" in the coastal waters South of Curacao.

All tugs are provided with extensive firefighting and salvage equipment, and each tug carries some 25 tons of oil dispersant together with a spray system to be utilised in case of oil spill.

Another tug the "Balau", 2,800 h.p., 37 tons bollard pull and built in 1976 is stationed in the harbour of Willemstad for rendering towage and salvage assistance both inside and outside the harbour.

Shell Curacao N.V. has three sea-going motor tugs stationed at Willemstad.

The "Passaat", 1,250 h.p., 280 g.r.t., bollard pull 18 tons.
The "Karet", 2,250 h.p., 280 g.r.t., bollard pull 34 tons.
The "Koraal", 1,250 h.p. 298 g.r.t., bollard pull 18 tons.

The tugs can be engaged for rendering towage assistance both inside and outside the harbour. As a rule, however, all vessels dock or undock at all wharves and enter or leave the port without tug assistance. In case of abnormal circumstances or in case the Harbour Master may require tug assistance.

Tugs can be requested by the Master for speeding up docking or undocking the vessel.

There are about 20 small harbour tugs available, varying from 60 h.p. to 300 h.p. and about 80 lighters, to receive cargo or bring it alongside a vessel, varying from 60 to 250 tons capacity.

Also see "Services".

BERTHING: There are berths on either side of the Santa Anna Bay North of the pontoon bridge, with depths varying from 18 ft. to 33 ft. alongside, generally used for bunker, cargo and passenger ships.

On the Eastern side four wharves: the Handelskade, depth 18 ft.; the Kleinewharf, depth 24 ft.; Grotewharf, depth 31 ft.; and Salazar, depth 24 ft.

On the Western side six wharves: the Matheywerf, depth 23 ft.; Westwerf S., 25 ft.; Westwerf N., 36 ft.; Nieuwewerf, 33 ft.; Motetwerf, 33 ft.; Oranjewerf, 19 ft.

In the Schottegat there are seven more berths, generally used for bunker, cargo or passenger ships.

Prins Hendrikwerf which closes the Western corner Santa Anna Bay/Schottegat, has a depth of 35 ft.; however, ships with a draft of more than 35 ft. can be moored by way of placing rafts of 10 ft. width between vessel and the quay.

At the Eastern part of the Schottegat are the Admiral Brion Wharves, which has 3,000 ft. docking space available with 34 ft. depth alongside.

In the Schottegat on the peninsula of Asiento are situated the 14 piers owned by Shell Curacao N.V., which are mostly used by tankers; however, other vessels are enabled to use these wharves for bunker facilities. Pier No. 1 may be used for general cargo (mostly packed oil products).

The names and the depths alongside these piers from West to East are: Pier I, 32 ft.; Piers II and III, 34 ft.; Pier IV, 40 ft.; Pier V, 46 ft.; Pier VI, 41 ft.; Pier VII, 34 ft.; Pier VIII, 46 ft.; Pier IX, 36 ft.; Pier X, 33 ft.; Pier XI, 19 ft. Also see "Tankers".

The Schottegat also has about 5,000 ft. of quay available for repairs. The names of the wharves, lengths and depths alongside are: Beatrix I and II, 1,300 ft. (each) – 21 ft.; Beatrix III, 400 ft. fore, 10 ft. aft – 35 ft.; Beatrix IV, 350 ft. – 31 ft.; Beatrix V and VI, 1,000 ft. (each) – 37 ft.; Repair Quay, 1,650 ft. – 35 ft.

There are sufficient covered and open storage places available on the wharves to load or unload a ship, generally dry cargo. Total covered storage area: 219,500 sq.ft., open storage: 1,100,000 sq.ft.

These areas can be used for transit as well as local cargo; also barges are used for transit cargo.

In the N.E. part of the Schottegat LASH lighters can be moored at 2 sets of buoys, depth 20 ft.

Storage capacity for liquid petrol products is 4,600,000 tons in tanks of refineries of "Shell Curacao N.V.".

All Shell piers are modernly equipped to handle oil in bulk, safely, and speedily, in order to make the turn around of the vessels as short as possible. Sufficient hose connections are installed to load or discharge oil, water-ballast or residue, and to supply steam and fresh water.

The wharves in Santa Anna Bay and the Brion wharves are all modernly equipped to supply different kinds of bunkers and also handle cargo simultaneously. Normally, general cargo is handled with the ship's tackle; there are no apron cranes or cargo masts or conveyors.

There are lighters alongside, and sufficient pallets and fork-trucks are available. Mobile and floating cranes are available if needed up to 140 tons.

Docking of cruise ships in Willemstad harbour: The following piers are regularly used by cruise ships and cargo ships:

Nieuwewerf, Motetwerf: West side St. Anna Bay. Type: quay. Construction: sheet piling, concrete top, stelcon plates floor. Length: 1,200 ft. Draft: 33 ft. Height above water: 4 ft. One transit shed each: Nieuwewerf, width 65 ft., length 216 ft., area 14,000 sq.ft.

Motetwerf, width 65 ft., length 216 ft., area 14,000 sq.ft. Open space area 200,000 sq.ft. One warehouse facility 6,500 sq.ft.

Oranjewerf: On West corner St. Anna Bay/Schottegat. Type: quay. Construction: iron piles, concrete top, concrete floor. Length: 418 ft. Draft: 19 ft. Height above water: 6 ft. Special bunker pier, cargo handling mostly via lighters alongside.

Prins Hendrikwerf: In the Schottegat near West corner Santa Anna Bay. Type: quay. Construction: iron piles, concrete top, concrete floor. Length: 400 ft. Draft: 34 ft. Height above water: 5 ft. One transit shed: width 65 ft., length 385 ft., area 25,000 sq.ft. Open space area 100,000 sq.ft. No warehouse facilities.

Admiral Brion Wharves: Nos. 1, 2, 3, 4, 5 and 6 situated at the East side Schottegat. Type: quay. Construction: sheet iron cells with concrete top, asphalt floor. Total length: 3×1,000 ft. Depth: 34 ft. Height above water: 5 ft. Two transit sheds: one with width 65 ft., length 680 ft., area 44,000 sq.ft.; one with width 65 ft., length 330 ft., area 21,000 sq.ft. Open space area 510,000 sq.ft. Two special platforms for Ro-Ro ships have been constructed. Max. draft 23 ft.–33 ft. These platforms are also the mooring berths for ferry service between Curacao-Venezuela-Aruba and Bonaire.

Kleinewerf, Grotewerf, Salazarwerf: East side of St. Anna Bay. Type: quay. Construction: sheet piling, concrete top, asphalt floor. Total length wharf: 1,470 ft. Maximum draft alongside 24 ft.–31 ft. Height above water: 2 ft. One transit shed, width 65 ft., length 330 ft., area 21,500 sq.ft. Open space area 154,000 sq.ft. No bunkering facilities.

Matheywerf, Westwerf, Westwerf North: West side Santa Anna Bay. Type: quay. Construction: sheet piling, concrete top, asphalt floor. Total length wharf: 640 ft. Draft: 23 ft. Height above water: 4.5 ft. One transit shed: Mathey loods. Width: 61 ft. Length: 320 ft. Area: 19,000 sq.ft. Open space area: 17,000 sq.ft.

Westwerf: West side Santa Anna Bay. Type: quay. Construction: sheet piling, concrete top, asphalt floor. Length: 396 ft. Draft: 25 ft. Height above water: 4.5 ft. One transit shed: Westwerf. Width: 61 ft. Length: 396 ft. Area: 20,000 sq.ft. Open space area: nil.

Westwerf North: West side Santa Anna Bay. Type: quay. Construction: sheet piling, concrete top, asphalt floor. Length: 396 ft. Draft: 36 ft. Height above water: 4.5 ft. One transit shed: Westwerf North. Width: 61 ft. Length: 106 ft. Area: 6,400 sq.ft. Open space area 18,000 sq.ft.

Cargo handling and bunkering can be carried out simultaneously.

STEVEDORES: Gangs must be engaged between 0600 and 0630 hrs. for the day, on weekends and Saturdays. For work on Sundays and holidays, gangs must be ordered between 0600 and 0630 hrs. on Saturday or the workday preceding the holiday. Masters of vessels carrying out cargo operations are consequently recommended to advise Agents their ETA well in advance of above deadlines.

TANKERS: Besides the wharves mentioned in "Berthing", there are 13 oil piers in the Schottegat for discharging crude oil and feed-stocks for the Shell refinery and loading products. These wharves are therefore used mainly by tankers. They are all equipped to provide bunkers.

All main grades of marine lubricants are stocked at the port of Curacao. Shell Marine lubricants and Marine Technical Service with laboratory facilities for the examination of used oil samples are available 24 hours a day.

Name	*Max. Draft (ft.)*	*Max. Displ. (tons)*	*Max. Length (ft.)*
Shell Jetty 1	27	25,500	580
Shell Jetty 2	30	25,500	575
Shell Jetty 3	33	25,500	575
Shell Jetty 4	38	54,000	775
Shell Jetty 5	45	100,000	850
Shell Jetty 6	39	54,000	750
Shell Jetty 7	31	25,000	560
Shell Jetty 8	45	100,000	850
Shell Jetty 9	33.5	40,000	850
Shell Jetty 10	For'd 21 Aft 3	40,000	850

SLOP RECEPTION FACILITIES: Available at all Shell Terminals.

FRESH WATER: Fresh water for drinking and use in boilers is available day and night in sufficient quantities at all wharves through pipe-lines. Fresh water is distilled from sea water by one of the biggest distillation plants in the world. The quality is very good and chemically pure.

Fresh water is also delivered alongside by means of water barges. 5 water barges are available. Each barge can deliver 50/100 tons of fresh water per hour. The rate of delivery depends on the quantity required and how many barges can simultaneously deliver fresh water in the vessel. It also depends on the amount of connections on board the vessel and the height above water to be lifted.

On the *Admiral Brion Wharves, Motetwerf, Nieuwewerf* and *Prins Hendrikwerf* water can be delivered by means of a pipe-line.

FUEL: Besides the Shell piers there are 2 bunkering installations: namely, the "Admiral Brion Wharves" comprised of 6 berths and the "Motet" bunkering installation comprised of 4 berths.

The "Admiral Brion Wharves" bunkering installation is directly supplied from the refinery by means of 2 pipe-lines with diameters of 12 in. and 8 in. The pipe-lines run the full length of the piers, each with 5 bunkerpits, from which the oil can be delivered directly to the ships via a mobile blending unit if this is required. The capacity of the pipe-line and the pumps is 600 t.p.h. for fuel oil and 300 t.p.h. for diesel oil. Gas oil is also available.

The bunkering facilities of the "Motet" installations in Otrabanda, which are comprised of 7 storage tanks and pumping facilities, are supplied through 2 pipe-lines of 12 in. and 6 in. diameter from the refinery. The rate of delivery, by gravity and pumps, is 600 t.p.h. for fuel oil and 500 t.p.h for diesel oil.

Modern fuel blending facilities are available at all installations in Willemstad.

REPAIRS: The Curacao Drydock Company Inc. has repair yards and 2 graving docks laid out in the Schottegat.

The largest graving dock is 919 ft. long, width of entrance between wheel fenders 152 ft. and a depth of water over sill of 27 ft. 10 in. Suitable for up to 120,000 d.w.t. Movable cranes of 25 and 75 tons lifting capacity are fitted alongside the dock.

The Curacao Drydock Company Inc. has 6,000 ft. of repair wharf with varying depths up to 40 ft. Cranes alongside up to 75 tons lifting capacity. A floating crane with capacity of 30 tons and a mobile truck crane of 140 tons also available.

Electric shore-power A.C., D.C. 110, 220 or 440 volts can be supplied directly from shore at wharves of Shell Curacao N.V. and at other wharves from generators on barges. Shell can also supply steam directly from the shore at a pressure of 8–15 kg./cm.

SURVEYORS: A.B.S., Lloyd's, N.V., B.V., R.I. and G.L.

Caleb Brett, Independent Marine Bureau and T. J. Kerklaan.

TIME: GMT minus 4 hours.

HOLIDAYS: New Year's Day, Carnival Monday (February), Good Friday, Easter Monday, Queen's Birthday, Labour Day, Ascension Day, Kingdom Day, Christmas Day, Second Christmas Day. "No work", holidays for cargo operations: New Year's Day, Good Friday, Labour Day and Christmas Day.

POLICE/AMBULANCE/FIRE: Police and Fire, Tel: 44444. Ambulance Tel: 25822.

EMERGENCY CO-ORDINATION CENTRE: Curacao is a major Search and Rescue Centre in the Southern Caribbean and disposes of the following means:

Communications: Curacao Radio is listening on the standard frequencies (VHF Channel 16) (2182 kHz. (voice) and 500 kHz (morse) Fort Nassau (Channel 12 and 16) is the harbour semaphore and traffic control centre.

Co-Ordination: MLD (Royal Netherlands Navy Air Service) Rescue Co-Ordination Centre (Curacao Rescue) at the Dr. Albert Plesman International Airport. Tel: 81628 (24 hours service).

During the emergencies the following frequencies are being used: 2182 kHz VHF Channel 16.

The Curacao RCC maintains a communication link with the United States Coast Guard RCC in San Juan (Puerto Rico) and can use the AMVER information.

Air Search: In case of a missing aircraft or vessels the following forces are available for conducting Search and Rescue missions under control of the Curacao RCC:

RNN long range patrol aircraft of the type Lockheed Neptune SP-2H gradually to be replaced by Fokker F27 Maritime aircraft (both aircraft can communicate on Channel 16 and 2182 kHz).

Coast Guard Auxiliary (CITRO) short range aircraft. Consisting of single and twin-engined light aircraft flown by Civil Pilots under RCC direction. Some of them can communicate on Channel 16.

Helicopters are unavailable.

Rescue Units: Commercial tugboats. Coast Guard Auxiliary (Citizens Rescue Organisation of the Netherlands Antilles CITRO). Using private boats and especially designed 20 knots life-boat, especially equipped to handle all emergencies, including medical evacuations.

Royal Netherlands Navy. If available the station vessel (a destroyer) will be despatched for emergencies.

Merchant Navy ships of convenience; in general Merchant Navy vessels which will be directed by the aircraft described before, to emergencies. This in accordance with the Mersar-booklet on Search and Rescue.

GENERAL: Customs Officers remain on board on duty during the vessel's stay in port. They must be fed by the ship and are entitled to the equivalent of officers' mess or first-class dining saloon.

REGULATIONS: Both anchors should be ready for immediate use. Defects of engines, steering gear, anchor gear and other defects which influence manoeuvring abilities of the vessel should be reported before entering, to the Harbour Master.

Dangerous Cargo: Explosives, ammunition, fireworks, radio active material and other dangerous cargo.

All vessels carrying explosives or other dangerous cargo, for discharge at Curacao, for transhipment or in transit without transhipment, *require special permission in writing, obtained prior to arrival,* for entering any port in the island of Curacao. Full details must be furnished in advance.

Only limited quantities of explosives, etc., are permitted in the port of Willemstad. For calls with larger quantities outports are used. Details of the regulations in force on the subject will be furnished on request by shipping Agents.

Entry permit required for ships carrying dangerous and/or hazardous cargo. Cost of form including stamp is fls. 4.00. Additionally administration fee is charged on the following basis:

Cargo in transit not being off-loaded from the ship – Nil. Local cargo to be discharged from the ship:

Up to 500 kilos	Cfls. 5.00
500 kilos to 5 tons	Cfls. 15.00
5 tons up to 25 tons	Cfls. 30.00
25 tons to 50 tons	Cfls. 45.00
over 50 tons	Cfls. 60.00

Transhipment cargo landed from one ship and reloaded on another ship: Double the local charge, indicated above.

At the discretion of the Harbour Master a special guard may be assigned onboard vessels handling or having dangerous and/or hazardous cargo on board. The charge, if and when incurred, is Cfls. 15.00 per hour in straight time and Cfls. 30.00 in overtime. Please note that this happens very seldom.

AIRPORT: There are daily international flights from Dr. Albert Plesman Airport.

ALM: Frequent daily trips to Aruba and Bonaire. Daily flights to Miami and New York. Regular air services to St. Maarten, Caracas, Maracaibo, Colombia, Haiti, Sto. Domingo, Puerto Rico, Trinidad and Paramaribo.

Eastern Airlines: Daily flights to Puerto Rico and transfers to all points.

American Airlines: Daily flights to New York and transfers to all points.

VIASA: Regular scheduled flights to Caracas, Sto. Domingo, Paris and Amsterdam.

Aerocondor: Daily flights to Colombia.

LAV: Many daily flights to Caracas.

KLM: Daily flights to Amsterdam, Lisbon, Madrid, Frankfurt and Zurich.

Ferry: Ferry's Del Caribe S.A. runs a regular service with a new modern ferry which carries 1,200 people and 120 automobiles. This ferry has regular service between Curacao and Coro, Venezuela on Monday, Tuesday, Wednesday and Thursday. On Thursday the ferry also goes to Aruba and Punto Fijo, Venezuela.

SERVICES: *Salvage, etc.:* A supply vessel named "Orca" is permanently stationed at Willemstad by "Smit Tak International Antilles N.V." on a 24 hours service base. She is provided with extensive salvage equipment such as pumps, hoses, burning and welding equipment and an hydraulic crane with a capacity of 10 tons.

Facilities for divers such as compressors, decompression tank, etc., are on board. The ship is furthermore very suitable for bringing stores, spare parts, packed oil products, crew on board, passing, or on the roads, waiting ships.

Underwater Cleaning/Underwater Services Smit Tak (Antilles) N.V.:

Cleaning of submerged hull sections of ships while afloat. This cleaning can take place while the ship is moored in the main harbour at Willemstad and also at other locations, such as Caracas Bay, Bullen Bay and St. Michiels Bay.

Cleaning of cruise ships takes place while bunkering and the passengers are ashore.

Smit Tak (Antilles) N.V. has developed its own underwater cleaning apparatus which cleans ships up to 250,000 d.w.t. within 24 hours. Also the rudder and propeller are properly cleaned. The cleaning does not affect the paint but only removes the very thin upper layer of spent anti-fouling paint, leaving the active anti-fouling exposed.

Smit Tak (Antilles) N.V. carries out various kinds of underwater works e.g. sealing off sea-intakes and ropeguard, all other kinds of cutting and welding works, underwater inspections, made by certified divers, which can be combined with photographing of bottom condition in colour and black and white. Closed circuit underwater television with video-tape recorder is available.

Smit Tak (Antilles) N.V. is the largest professional salvage and underwater cleaning company in the Netherlands Antilles and has experienced divers able to make certified damage reports.

Peteres Divers Company Ltd.: The following underwater services are carried out by Peters Divers Company Ltd. Underwater hull cleaning by means of the "Scamp" makes it possible to clean the largest VLCC's during loading or discharging.

The average cleaning time for a VLCC is 12 hours. Underwater T.V. system for underwater surveys and inspections are available.

Further underwater services are: welding, cutting, photographing of the bottom condition, etc. in colour and black and white, sealing of intakes, etc. All inspections are carried out by licensed marine engineers.

DEVELOPMENTS: There is a Container Terminal under construction South of Admiral Brion Wharves. Length of quay 500 m., depth 40 ft., of which 20 m. will be a Ro-Ro quay. Total area 90,000 sq.m.

New floating dock under construction. 80,000 ton graving dock in planning stage.

AUTHORITY: Curacao Port Authority N.V., Werf de Wilde Z/N, Willemstad, Curacao, Netherlands Antilles. *Cables:* Harbour Office Curacao. *Tel:* 611133, 611740. *Contact:* E. P. Sint Jago, Harbour Master.

AGENT: SEL Maduro & Sons (Curacao) Inc., Maduro Plaza, P.O.Box 3304, Willemstad, Curacao, Netherlands Antilles. Tel: 76900. Telex: 1092, 3325 or 3393. Selms NA. Cables: "Maduroship".

NOTES

Please also advise Shipping Guides Ltd.

New Caledonia

BABOUILLAT: 20.23 S. 164.08 E.

SHIPMASTER'S REPORT: October 1983.

LOCATION: Babouillat is a village located at the Northern part of the Island of New Caledonia at approximate position Lat. 20° 23.2′ S., Long. 164° 07.6′ E., at Baie De Nehoue which is incompletely surveyed. There is a chrome ore mine nearby operated by International Nickel France.
DOCUMENTS: Last Port Clearance, 1 Health Form, 2 Store Lists, 2 Personal Effects Lists, 3 Crew Lists. Customs Officers and Agents board vessel on arrival at anchorage. As Agents come from Noumea, 450 km. away from Babouillat (takes 5 hours by car), they come only on arrival and on departure. Any contact should be made by telegram through Noumea Radio Station.
PILOTAGE: Pilot is picked up on arrival at Deverd Passage, Lat. 20° 44′ S., Long. 164° 12′ E., marked by Fl.4s. light buoy. An accurate ETA message is required 24 hours prior to arrival as Pilot comes from Noumea by tug.

Only day time pilotage is possible to Babouillat. Vessels with draft not exceeding 25 ft. can use Inner Route, otherwise the vessel must drift outside Gazelle Passage with Pilot aboard and pass through Gazelle Passage in daylight. Vessels can also await daylight at anchor in Deverd Passage with the Pilot aboard.

For departure, Noumea Pilots require 24 hours' notice. Latest departure time is 1530 hrs.; earliest departure time 0545 hrs. Pilot disembarks at Gazelle Passage.

Also see "VHF".
ANCHORAGES: The anchorage is located at Lat. 20° 22.2′ S., Long. 164° 06.1′ E., 3 cables South of Ilit Ti (80 m. high), with depths from 13.5 m. to 18 m. and good holding ground.

Vessels load high grade low silica fines (refractory), which are Chrome ore concentrates of Tiebaghi Area, at the anchorage from barges.
RADIO: Noumea Radio Station.
VHF: Pilot has a portable VHF with Channel 16. Tug which brings Pilot from Noumea has no VHF.
BULK CARGO FACILITIES: Loading effected by ship's gear (cranes) and shore equipment (shovel like 12 tonne capacity equipment which are filled in the barge with a bulldozer and mechanically discharged into the hold). It is possible to load 3,000 to 3,500 tonnes per day with 3 gangs and work from 0500 hrs. to 2200 hrs.
MEDICAL: Doctor is available at Coumac Hospital located at Lat. 20° 34′ S., Long. 164° 16.5′ E. The boarding representative of shippers can make the necessary arrangements.
REPATRIATION: All facilities exist to foreign countries for crew changes and repatriation through Noumea Airport.
AUTHORITY: Port Autonome de Noumea, P.O.Box 14, Noumea. *Tel:* 275966. *Telex:* c/o Comin, 045 NM. *Contact:* Captain Jean Louis Boglio, Port Captain – Noumea.
AGENT: Establissement Ballande. Telex: Ballande 025 NM. Cable Address: Ballande, Noumea.

NOUMEA: 22.16 S. 166.27 E. (See Plan Book)

PORT LIMITS: *Port Area:* Main Harbour as far as entrance between Port Lestelle and Point Kongou.

Secondary Harbour and Orphelinat Bay as far as the entrance between Brun Islet and Point Denouel.
DOCUMENTS:

8 Copies Cargo Manifest.
2 Copies Manifest of parcels to be unloaded for New Caledonian Residents.
2 Copies List of Personal Objects.
(detailing photographic material, audio-visual equipment, watches, etc.).
2 Copies List of Foreign Currency.
2 Copies List of Provisions.
2 Copies Inventory of Consumable Matter.
2 Copies List of Drugs and Narcotics.
(which *must* remain on board).
2 Copies List of Weapons and Ammunition.
(under Master's responsibility).
4 Copies List of Crew Members.
4 Copies List of Disembarking Passengers.
(or notification of no Disembarking Passengers).
4 Copies Transit Passenger List.
1 Copy Maritime Health Certificate.
4 Copies Declaration of Vessel's Specifications.
1 Copy Submission Form.

PILOTAGE: Compulsory for foreign vessels (exemption for vessel with French registery under 60 m. LOA), pilotage rendered day or night. Ladder to be 1.5 m. above water.

Pilot boats are wooden launches about 15 m. long, with black hull, equipped with VHF (permanent reception on Channel 16. Channels 12, 14 and 17 working). Pilot boats also transmit on 2182, 4072.3 and 8207.4 and receive on 2197.5, 4366.7 and 8731.3

Two access channels to Noumea through reef.

Boulari Channel: (Lat. 22° 30′ S., Long. 166° 26′ E.)

Pilot boards 1 mile off, on the Leads of Amedee Lighthouse.

Havannah Channel: (Lat. 22° 21′ S., Long. 167° 03′ E.)

Pilot boards off Goro Lighthouse on the Leads of Cap N'Dua by day, and off Port Boise at night.

In bad weather, pilot launches remain on leads as close as possible to entrance.

Pilot should be ordered at least 6 office hours before departure or moving.

ANCHORAGES: In Great or Small Road. Prohibited zone shown on chart in vicinity of underwater sealine.
RESTRICTIONS: Vessels may enter and anchor at any time, mooring may be effected at night, except for tankers at buoys.
MAX. SIZE:
Cargo Vessels: Max. draft 10.30 m.
Tankers: Max. LOA – 300 m. Max. draft 14.80 m.
HEALTH: If vessel is "healthy", Pratique is accorded by the Pilot at the entrance, or by the Harbour Master (VHF).

In the case of contagious disease or death on board the Harbour Master must be notified by radio (VHF) before entering inner reef and the vessel must anchor at the Quarantine Station at N'Die (East of Freycinet Islet in Dumbea Bay).
Port Regulations: All vessels must comply with current Quarantine Regulations and if necessary undergo fumigation and disinfestation before tying up.

Before docking, any vessel arriving from a country infected by Rhino Beetle (*Oryctes Rhinoceros*) must:

a) Anchor 400 m. from the coast between sunrise and sunset, keeping holds closed.

b) Be visited by a Quarantine Inspector and if necessary disinfested.

c) Holds must remain closed 2 hours after fumigation.

Infected Countries: Fiji, Tonga, Samoa, Wallis/Futuna, Bismarck Archipelago (New Britain, New Ireland, New Hanover), Sarmi, Manokwari Sorenarwa (Western Irian Jaya), Palau Islands (Carolines), Indonesia, Philippines, Taiwan, Japan, Dominican Republic/Haiti, Cuba.

d) Any ship coming from Japan is inspected to prevent contamination by *Papillia Japonica.*

e) Any vegetable goods to be unloaded must be accompanied by a Quarantine Clearance Certificate.

f) Special permit is necessary from the New Caledonian Agricultural Department prior to importation of plants and seeds, etc.
Hygiene: All ships alongside must be equipped with rat guards.

RADIO: All messages by Coast Station Noumea, call sign FJP. Harbour Master's Office equipped with VHF Channels 16, 12 and 14, operated during normal working hours.
Arrival Advice: To Agent 48 hours before arrival: Indicate: Arrival time at Pilot pick-up point; name of pass; overall length; forward and aft drafts of vessel; damage or mechanical problems, if any to vessel's apparatus and cargo; tonnage to be unloaded; dangerous cargo, explosives, etc.

Note: This information must be lodged with the Harbour Master's Office 24 hours before arrival.

VERY IMPORTANT: Tankers carrying hydrocarbons must notify their Agent as to whether they have or have not the International Certificate for Prevention of Pollution by Hydrocarbons.

To Agent and Pilot Station 24 hours prior to arrival: Confirmation of arrival time at Havannah Passage or passes outside the Southern Zone.

12 hours prior to arrival: Confirmation of arrival time at Boulari Pass.

Note: Application for a Pilot must be made to the Pilot Station during official office hours (Monday to Friday 0700 to 1100 hrs. and 1330 to 1730 hrs.; Saturday 0700 to 1100 hrs.), either by telephone or telegram by the ship's Master addressed to the Pilot Headquarters and transmitted to the Coastal Communications Centre (Tel: 27.32.74).
TUGS: Tug's service is compulsory for vessels over 60 m. LOA. One tug of 1,200 h.p. and 2 of 400 h.p. available to assist. Tugs equipped with VHF Channels 16, 12 and 14.

BERTHING:

Berth	*Length* (m.)	*Depth* (m.)
Petite Rade (Small Road):		
Main Wharf (Berth Nos. 1–3)	428	5.50 – 7.00
Coaster Wharf	190	3.50 – 5.50
Coastal Trader Wharf	140	3.50 – 4.50
Tourist Vessel Wharf	75 (with 2 dolphins 155 m. apart)	9.50 (For vessels up to 170.0 m. LOA)
Grande Rade (Great Road):		
Fishing Vessel Wharf	121	8.00
Coaster Wharf	140	3.80 – 5.00
Main Wharf (Berths Nos. 4–7)	694	10.00 – 10.50

Note: Access to Berth No. 4 limited to 8.80 m. by shoal 70 m. off wharf.

There is one mooring buoy 160 m. from the N.W. corner and in line with the main wharf.

BULK HANDLING FACILITIES:
Grain: 3 grain silos of 815 tonnes each.
Cement Berth: Private berth located in Baie de Numbo (position: Lat. 22° 15′ S., Long. 166° 25′ E.). Initially designed for vessels of LOA 135 m. but can handle vessels with a max. LOA not exceeding 168 m. and draft not exceeding 9 m. Vessels berth alongside 3 dolphins 110 m. apart with mooring buoys fore and aft. Middle dolphin equipped with crane, hopper and conveyor. Fresh water available.
Usine le Nickel: Private wharves with 3 berths for ore carriers, tankers and freighters.

Quai Sud: 1 berth, length 170 m., depth 9 m. Equipped with 3 shore cranes for unloading ore carriers.

Quai Nord Ouest: 2 berths. Total length 397 m. Berth No. 3/4 depth 9 m. Berth No. 5/6 depth 10 m. Loading of processed metal and unloading of tankers on behalf of Shell.

Also see "Tankers".

STEVEDORES: Service provided by three private companies. 2 or 3 days' notice required to arrange work.
Working Hours: Normal Hours: Monday to Friday 0700 – 1100 hrs. and 1300 – 1700 hrs. Overtime: Monday to Friday 1800 – 2300 hrs., Saturday 0700 – 1100 hrs. and 1300 – 1700 hrs.

EQUIPMENT: Stevedore Company equipment:

Societe du Chalandage:

Fork Lift Trucks: 6×1.5 tons, 10×2.5 tons, 12×4.0 tons, 3×5.0 tons, 4×6.0 tons, 10×10.0 tons.

Forklift/Frames (for Ro-Ro/Spreaders): 1×30 tons, 1×25 tons, 2×22 tons, 1×12 tons.

Karry Crane: 5×3 tons (6 tons doubled).

Tractors for Vehicles: 2.

Cranes: Poclain P.P.M. automotive, 14 tons (4 – 5 tons useful load). Richier on carrier (jib 24 m.) 40 tons (at 3 m.).

Self-Loading Trailers for Container Vessels: 20 tons (1 container 20 ft.). 30 tons (containers 20 ft. – 40 ft.)

Spreaders for Containers: 3 automatic for 20 ft., 1 automatic for 40 ft.

Trucks with Crane: 2 with jib 6 m., 7.5 tons/m., 1 with jib 7 m., 9 tons/m.

Semi-Trailer: 10×12 m. long. 7 Espadon type.

SOFRAC:

Crane Belotti: 1×22 tons with directional spreader.

Forklifts: 2×22 tons with frontal frame.

Forklifts: 3×8.5 tons, 2×6.5 tons, 1×6 tons, 1×5 tons, 3×4 tons, 2×3 tons, 1×3 tons (lowered for unloading containers), 1×2.5 tons (lowered for unloading containers), 2×2 tons (lowered for unloading containers).

Karry Crane: 1×3 tons (6 tons doubled).

Semi-Trailers for Containers: 6 for 20 ft., 24 tons. 4 for 20 ft. – 40 ft., 24 tons.

Heavy Duty Tractors: 6 for loads from 38 tons to 60 tons.

Tank Trucks: 1×35 cu.m. (1 tank), 22 tons. 1×24 cu.m. (2 tanks), 22 tons.

Automatic Spreaders: 2 for containers 20 ft., 25 tons. 1 for containers 40 ft., 30 tons.

Suction Pumps for Grain: 1×140 t.p.h., nominal 40 – 45 t.p.h. 1×35 t.p.h., nominal 25 t.p.h. 1×200 t.p.h.

Semi-Trailer with Worm: 1 for unloading grain containers.

S.A.T.O.:

Forklift Trucks: 2×2.5 tons (on board), 4×4 tons, 3×6 tons, 1×8 tons, 1×12 tons, 1×25 tons.

Karry Crane: 1×3 tons (6 tons).

Automatic Spreader for Containers: 1×20 ft., 25 tons.

TANKERS:

SBM: (Societe le Nickel): In the entrance to Grande Rade (position: Lat. 22° 14′ 15″ S., Long. 166° 23.4′ E.). Mooring during daylight only. Max. LOA 300 m. Max. draft 14.80 m. Pumping rate for No. 2, heavy fuel oil 3,000 cu.m./h.

Baie des Dames: (Mobil Oil Australia). (Position: Lat. 22° 14′ S., Long. 166° 24′ E.).

1. 5 mooring buoys (max. distance between East and West Buoys 361 m.) 2×8 in. lines for clean and black oils (each marked by a Spar Buoy and a Marker Buoy). Max. LOA 200 m., max. draft 10 m. The buoy mooring is used to discharge Mobil/Total tankers and bunker cargo vessels, liners and ore carriers.

2. "T" shaped jetty, length 9 m. 4 mooring dolphins and 2 mooring buoys (110 m. apart). Max. LOA of tankers 100 m., max. draft 5 m. Berth used for discharge of tankers and liquid gas carriers, bunkering of vessels and loading of tankers.

	These two terminals are operated by Mobil Oil and are used for discharging and loading tankers as well as for bunkering all types of vessels.		Terminal owned by SLN who makes available its berthing Master. Follow instructions SLN/SIE 146, September 1979.	For tankers containing products for Shell.

LPG Terminal:

Gas carriers berth port side to wharf, against the jetty and the 4 dolphins which make up the Mobil Oil installations in Bay des Dames.

Limits: Overall length : 100 m. Draft: 5 m.

Capacity of reservoirs: 3,115 tons. Sphere No. 1: 330 tons; Sphere No. 2: 560 tons; Sphere No. 3: 2,225 tons.

All the spheres can be used for stocking butane.

Sphere No. 1 can also stock propane.

Average density of butane gas: 0.580.

Maximum pressure of liquid: 15 kg/sq.cm.

Normal delivery pressure: 7 kg/sq.cm.

Maximum vapour pressure: 5 kg/sq.cm.

Pumping speed: Maximum 70 t.p.h. Minimum speed: 10 t.p.h.

Hoses used by vessel: 1 hose for liquids 4 in. diameter; 1 hose for vapours 3 in. diameter.

Obligatory requirements for tankers carrying Hydrocarbons: Masters of all vessels carrying hydrocarbons and on the point of entering New Caledonian waters are under obligation to send to the Marine Commander in Noumea (F.U.J.), a message, indicating:

(1) Intended course.

(2) Navigation and manoeuvring possibilities.

6 hours before entering territorial waters.

6 hours before sailing.

Note: During sojourn or transit in New Caledonian waters, permanent radio contact is observed; international radotelephonic call frequency on the maritime metric band.

Tankers must use the following passes:

Havannah or Boulari: Tankers carrying less than 8,000 tons of petroleum products and less than 8 m. draft.

Pilot pick-up point 5 nautical miles off Boulari:

1. Entry via Boulari Pass if less than 20,000 tons of petroleum products and draft under 10 m. (night or day);

2. Entry via Dumbea Pass if more than 20,000 tons of petroleum products or more than 20 m. draft (daytime only).

Thio and Poro:

Tankers: Less than 20,000 tons of products and draft under 10 m.

Very Important:

Docking of tankers is in accordance with the possession of:

International Certificate for the Prevention of Pollution by Hydrocarbons; consequently:

This must be indicated to ship's Agent 48 hours prior to arrival.

Certificate must be shown to Pilot at the entrance, and to the Harbour Master or his representative upon docking.

MEDICAL: Clinique de Magenta, Rue du 18-Juin, Magenta, Box H5. Tel: 28.49.29.

Clinique Magnin: Route Territoriale No. 13, Vallee des Colons, Box 64. Tel: 27.26.01.

Hospital Gaston-Bourret, Avenue Paul-Doumer, Noumea, Box C5. Tel: 27.21.21.

Polyclinique de l'Anse-Vata, Route de l'Anse-Vata. Tel: 26.14.22.

Note: Numerous dispensaries located in villages and mining centres of the interior. If necessary, urgent medical evacuation possible by plane or helicopter.

DENSITY: 1026.

FRESH WATER: Supplied by pipe-line at the quays in the Commercial Port, S.L.N. and Numbo Private Cement Factory; rate, 40 t.p.h.

FUEL: Refuelling with marine diesel oil (M.D.O.) or bunkering fuel oil (B.F.O.) is possible.

Authorisation previously obtained by the shipowner from the Australian or French Head Offices of the 3 companies present in Noumea can aid local formalities:

Mobil Tel: 27.31.52

Shell Tel: 28.57.20

Total Tel: 27.52.91

"Light" fuels can be delivered by tanker, but "heavy" fuels must be loaded at the Mobil refuelling post, Bay des Dames.

Docking: LOA 100 m. draft 5 m.

Mooring to buoys: LOA 183 m. draft 10 m.

Note: When tying up to buoys: One must count 3/4 hours' lost time for the various operations. A derrick capable of lifting the hose (3 tons) is necessary.

GANGWAY/DECK WATCHMEN: Recommended, but not compulsory.

OPENING/CLOSING HATCHES: Can be performed by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes per man(400 cigarettes at Outports). Additional allowance can be made after 10 days. Maximum 2 bottles of spirits per man. Wines and beer not limited. Landing of cigarettes, wines and spirits prohibited.

SURVEYORS: *Marine Surveyors:*

Bureau Naval Serve, 32 Rue du General-Gallieni, Noumea. Tel: 28.25.02.

Bureau Veritas, 21-23 Rue de l'Alma, Noumea. Tel: 27.20.31.

Lloyd's Register of Shipping, 7 Rue Anatole-France, Noumea. Tel: 27.20.83.

For all problems relating to cargo and/or vessel damages.

Draft surveys for estimation of nickel ore loads per ship.

Classification Societies:

Lloyd's Register of Shipping, Societe W. A. Johnston, 7 Rue Anatole-France, Noumea, Box 445. Tel: 27.20.83. Cables: Johnston. Telex: 070 NM.

Bureau Veritas, Societe des Etablissements Ballande, 21-23 Rue de l'Alma, Noumea, Box C4. Tel: 27.20.31. Cables: Ballande. Telex: 025 NM.

Germanischer Lloyd and Nippon Kaiji Kyokai. Bureau Naval Serve, 32 Rue Gallieni, Noumea, Box 2387. Tel: 28.25.02. Cables: Surveyor. Telex: Gemar 065 NM.

REPAIRS: Many engine, hull and electronic repairs can be effected. Slipway for small vessels. One slipway, to lift vessels of 1,000 tonnes.

CARGO GEAR: Ship's gear normally used. Possibility of hiring cranes 10 ton – 104 tons.

IDENTIFICATION CARDS: Recommended that crew carry Seamen's Books.

CONSULS: Australia, 19-21 Avenue du Marechal-Foch, Noumea. B.P. 22. Tel: 27.24.14. Cables: Austcom. Telex: 087 NM.
Belgium, 13 Rue Jules-Ferry, Noumea. Box 2683. Tel: 28.46.46.
Indonesia, 4 Rue de Strasbourg, Noumea. Box 26. Tel: 28.25.74.
New Zealand: 4 Boulevard Vauban, Noumea. Box 2219. Tel: 27.25.43. Cables: Kereru. Telex: 036 NM.

REPATRIATION: All facilities available for crew change and repatriation.

AIRPORT: Tontouta Airport situated 50 km. from Noumea. Several connections a week to all parts of the world.

TIME: GMT plus 11 hours. N.B. Daylight saving is sometimes introduced between December and February.

HOLIDAYS: 1st January, Easter Monday, 1st May, Pentecost Monday, Ascension Day, Whit Monday, 14th July, 15th August, 24th September, 1st November, 11th November, 25th December. Work may be arranged on Sundays and holidays.

POLICE/AMBULANCE/FIRE: Police, Tel: 17; Fire, Tel: 18; Ambulance, Tel: 27.21.21.

EMERGENCY CO-ORDINATION CENTRE: Call "Noumea Marine" on VHF Channel 11.

BANKS: Banque de l'Indochine et de Suez, Corner of Rue de l'Alma and Avenue du Marechal-Foch, Noumea. Box G5 Tel: 27.22.12. Cables: Indosuez. Telex: 023 NM.

Societe Generale Caledonienne de Banque. 56 Avenue de la Victorie, Noumea. Box G2. Tel: 27.22.64. Cables: Pacsoge. Telex: 067 NM.

STORING: See "Prelims" page viii.

1. By Truck.
2. None.
3. Yes.
4. Yes.
5. Duty Free.
6. Yes.

WEATHER: *Wind:* The prevailing wind is the South-Easterly Tradewind blowing regularly from June to October.

N.B.: The Tradewind freshens with the sun.

Close to shore: Maximum around 1400 hours.

Open Sea: Maximum around 1800 hours.

Cyclone Season: From November to April (variable winds, rain, gusty conditions).

Rainfall: Dry season: Minimum 50 mm./month.

From January to March: Heaviest rainfall owing to the Cyclone season.

Rainfall varies between coasts depending on their exposure to winds.

Temperature: Average temperature: 24°C.

The maximum temperatures are during the month of February: 34°C.

Tides: Semi-diurnal type affected by daily inequalities. The high and low April tides are on an average 0.40 m. higher/lower than the October tides.

SHORE LEAVE: Allowed.

SHIPMASTER'S REPORT:

Communications: Radio W/T. Short wave service and MF service very good. First message to state which passage used – Draft – Tonnage – and nature of dangerous cargo, this should be sent at least 24 hours before arrival, Agent and Harbour Master required this message.

Shore Telephone. Service available as receivers can be connected.

VHF. Available to Harbour Office and pilot station during office hours 0700 to 1100 hrs. and 1300 to 1700 hrs. Monday to Friday. Pilot vessel when at Havannah Passage keeps VHF watch 1 hour before the last given ETA. In our case we made contact with the pilot vessel when 12 miles from Havannah Passage. If at anchor VHF contact to Agents can be made via Harbour Office.

Pilotage: Boarding ground. Canal de Havannah. The Pilot boards the vessel when on the leads, but inside the reef, when the vessel is off Port Goro. The 3 leading lights stand out well at night time, each light is individually powered in case of failure, in our case they were seen 25 miles away. During strong S.W'ly winds the Pilot will board in the lee of Ioro Reef. As the leads do not stand out so well in day time, night time seems to be the best arrival time. This channel has been swept to a depth of 34 ft. Strong cross currents can be expected at the entrance to Havannah Passage.

Anchorages. See CHINPACS for area dangerous due to mines. Otherwise vessel anchors Grande Rade.

Quarantine. Pratique granted by Pilot, Health Signal not required unless notifiable sickness on board.

Controlling Factors: Berthing times. Vessels are now berthed at any time, the usual side to being Starboard side, a 1,200 h.p. tug being used to assist.

Length. No limit at berth.

Berthage. 700 m. at the New Wharves.

Stevedoring. Working time. 0700 to 1100 hrs. then 1300 to 1700 hrs. and overtime from 1800 to 2200 hrs. The labour will also clean out the hatches provided one gang is actually working cargo, otherwise they stop when cargo work is all finished. Saturday is not an overtime day. Only Sunday is an overtime day. Good Friday and Easter Saturday are considered normal working days. The Stevedoring is good, with a fast working rate, but I regret to state that some pillage took place. As regards unprotected cars, the most minor marks were claimed against the vessel, these were repudiated.

Documents:

1 Cargo Manifest.
1 List of Dangerous Cargo.
2 Crew Lists.
1 Crew Personal Effects List, this list to include currency held, (French Forms accepted).
1 Bonded Stores List.
1 Health Form.

OUTPORTS: (See Plan Book).

For Ore loading vessels:

Nepoui: Lat. 21° 20.1′ S., Long. 164° 25.5′ E.

LOA vessel 163 m. Draft 8.7 m. Telescopic shuttle clearance 12.5 m. Loading rate 1,250 t.p.h.

1 Launch available.

Tankers: 6 in. flexible hose, weight 2 tons, 8 in. pipe-line. Pumping rate 200 t.p.h. Pressure 7 kg/sq.cm.

Thio: Lat. 21° 37.5′ S., Long. 166° 15.5′E.

LOA vessel 170 m. Draft 10.8 m. Telescopic shuttle clearance 11 m. Loading rate 686 t.p.h.

1 Launch available.

Tankers: 6 in. flexible hose weight 2 tons. 6 in. pipe-line. Pumping rate 130 t.p.h. Pressure 7 kg/sq.m.

Kouaoua: Lat. 21° 24′ S., Long. 165° 49.8′ E.

LOA vessel 150 m. Draft 8.5 m. Telescopic shuttle clearance 10.5 m. Loading rate 628 t.p.h.

2 Launches (1 shared with Poro) available.

Poro: Lat. 21° 19′ S., Long. 165° 44′ E.

LOA vessel 169 m. Draft 9 m. Telescopic shuttle clearance 11.05 m. Loading rate 900 t.p.h.

2 Launches (1 shared with Kouaoua) available.

Tankers: 8 in. flexible hose, weight 2 tons. Pipe-line 6 in. Pumping rate 130 – 150 t.p.h. Pressure 7kg/sq.cm.

Baie Ugue: Lat. 21° 09′ S., Long. 165° 33′ E.

LOA vessel 170 m. Draft 11 m. Telescopic shuttle clearance 12 m. Loading rate 600 t.p.h.

1 Launch and 1 tug 400 h.p. available.

Loading of Ore by Lighters:

Vessels anchored in bays, sheltered from the ocean swell by the barrier reef, but not sheltered from heavy seas caused by wind.

West Coast: Poum/Paagoumene, Karembe, Teoudie, Poya, Bourail (anchorage and mooring buoy), Bay N'Go (anchorage and mooring buoy).

East Coast: Moneo, Kouaoua, Nakety, N'Goye, Ouinne (anchorage and mooring buoy).

Loading Operations: Loading is carried out under supervision of the miner and his stevedore who embarks and lodges part of his personnel on board the vessel.

1. Lighter train towed by a tug, runs a shuttle between the loading wharf and the anchored vessel. Very few powered lighters.
2. Trucks empty their load into lighters.
3. Lighters are emptied by unloading apparatus on board vessel.
4. Ore estimations (richness and humidity) are carried out on shore by the miner and a Japanese representative of O.M.I.C., and a sample is placed on board for the smelter, another sample being reserved for the Department of Mines.
5. Non-stop loading, except in some bays where tide flow inhibits loading lighters at low tide.

Loading rate: From 1,500 to 9,000 tons per day.

Depending on:

1. Whether port is sheltered or not;
2. Distance between loading point and anchorage.
3. Tide flow at lighter loading point;
4. Number of lighters and tugs used by the stevedore.

OFF-LYING ISLANDS: (See Plan Book).

Art Island – Wala Wharf: Lat. 19° 43′ S., Long. 161° 19′ E. Wharf orientated N.N.E./S.S.W., parallel to shore. Length 30 m. framed by 2 dolphins each 15 m. Width 7 m. Wharf top 3.50 m. above low tide. Depth 4 m. Roadway: 85 m. long, 2.7 m. wide with 2 footpaths 80 cm. wide, supporting vehicles of up to 19 tons (axle 13 tons).

Ouvea Island – Wadrilla Wharf: Lat. 20° 35′ S., Long. 166° 33′ E. Wharf orientated W.N.W./S.S.W., perpendicular to shore. Length 40 m. with mooring buoy 35 m. from the end. Width 7 m. Wharf top 3.5 m. above low tide. Depth 4 m. Roadway: 220 m. long, 2.7 m. wide with 1 footpath 80 cm. wide, supporting vehicles of up to 19 tons (axle 13 tons).

Lifou Island – We Wharf: Lat. 20° 55′ S., Long. 167° 17′ E. Wharf orientated N.E./S.W., parallel to shore. Length 40 m. prolongated to the N.E. by a dolphin 15 m. away. Width 7 m. Wharf top 3.5 m. above low tide. Depth 5.5 m. Roadway: 90 m. long, 4 m. wide, supporting vehicles of up to 19 tons (axle 13 tons).

Mare Island – Tadine Wharf: Lat. 21° 33′ S., Long. 167° 53.5′ E. Wharf orientated N.N.E./S.S.W. Length 48 m. with an adjacent wharf 13 m. long (150 in. lower). Width 2 m. Wharf top 2.8 m. above low tide. Depth 3 m.

Isle of Pines – Kuto Wharf: Lat. 22° 39.7′ S., Long. 167° 26′ E. Wharf orientated W.N.W./E.S.E., parallel to shore. Length 30 m. framed by 2 dolphins 15 m. away. Width 11 m. Wharf top 3.35 m. above low tide. Depth 4 m. Roadway: 118 m. long, 2.70 m. wide with one footpath 80 cm. wide, supporting vehicles of up to 19 tons (axle 13 tons).

EQUIPMENT: Stevedore Company equipment:

Societe du Chalandage:

Fork Lift Trucks: 6×1.5 tons, 10×2.5 tons, 12×4.0 tons, 3×5.0 tons, 4×6.0 tons, 10×10.0 tons.

Forklift/Frames (for Ro-Ro/Spreaders): 1×30 tons, 1×25 tons, 2×22 tons, 1×12 tons.

Karry Crane: 5×3 tons (6 tons doubled).

Tractors for Vehicles: 2.

Cranes: Poclain P.P.M. automotive, 14 tons (4 – 5 tons useful load). Richier on carrier (jib 24 m.) 40 tons (at 3 m.).

Self-Loading Trailers for Container Vessels: 20 tons (1 container 20 ft.). 30 tons (containers 20 ft. – 40 ft.)

Spreaders for Containers: 3 automatic for 20 ft., 1 automatic for 40 ft.

Trucks with Crane: 2 with jib 6 m., 7.5 tons/m., 1 with jib 7 m., 9 tons/m.

Semi-Trailer: 10×12 m. long. 7 Espadon type.

SOFRAC:

Crane Belotti: 1×22 tons with directional spreader.

Forklifts: 2×22 tons with frontal frame.

Forklifts: 3×8.5 tons, 2×6.5 tons, 1×6 tons, 1×5 tons, 3×4 tons, 2×3 tons, 1×3 tons (lowered for unloading containers), 1×2.5 tons (lowered for unloading containers), 2×2 tons (lowered for unloading containers).

Karry Crane: 1×3 tons (6 tons doubled).

Semi-Trailers for Containers: 6 for 20 ft., 24 tons. 4 for 20 ft. – 40 ft., 24 tons.

Heavy Duty Tractors: 6 for loads from 38 tons to 60 tons.

Tank Trucks: 1×35 cu.m. (1 tank), 22 tons. 1×24 cu.m. (2 tanks), 22 tons.

Automatic Spreaders: 2 for containers 20 ft., 25 tons. 1 for containers 40 ft., 30 tons.

Suction Pumps for Grain: 1×140 t.p.h., nominal 40 – 45 t.p.h. 1×35 t.p.h., nominal 25 t.p.h. 1×200 t.p.h.

Semi-Trailer with Worm: 1 for unloading grain containers.

S.A.T.O.:

Forklift Trucks: 2×2.5 tons (on board), 4×4 tons, 3×6 tons, 1×8 tons, 1×12 tons, 1×25 tons.

Karry Crane: 1×3 tons (6 tons).

Automatic Spreader for Containers: 1×20 ft., 25 tons.

TANKERS:

SBM: (Societe le Nickel): In the entrance to Grande Rade (position: Lat. 22° 14′ 15″ S., Long. 166° 23.4′ E.). Mooring during daylight only. Max. LOA 300 m. Max. draft 14.80 m. Pumping rate for No. 2, heavy fuel oil 3,000 cu.m./h.

Baie des Dames: (Mobil Oil Australia). (Position: Lat. 22° 14′ S., Long. 166° 24′ E.).

1. 5 mooring buoys (max. distance between East and West Buoys 361 m.) 2×8 in. lines for clean and black oils (each marked by a Spar Buoy and a Marker Buoy). Max. LOA 200 m., max. draft 10 m. The buoy mooring is used to discharge Mobil/Total tankers and bunker cargo vessels, liners and ore carriers.

2. "T" shaped jetty, length 9 m. 4 mooring dolphins and 2 mooring buoys (110 m. apart). Max. LOA of tankers 100 m., max. draft 5 m. Berth used for discharge of tankers and liquid gas carriers, bunkering of vessels and loading of tankers.

Shell Tel: 28.57.20

Total Tel: 27.52.91

"Light" fuels can be delivered by tanker, but "heavy" fuels must be loaded at the Mobil refuelling post, Bay des Dames.

Docking: LOA 100 m. draft 5 m.

Mooring to buoys: LOA 183 m. draft 10 m.

Note: When tying up to buoys: One must count 3/4 hours' lost time for the various operations. A derrick capable of lifting the hose (3 tons) is necessary.

GANGWAY/DECK WATCHMEN: Recommended, but not compulsory.

OPENING/CLOSING HATCHES: Can be performed by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes per man(400 cigarettes at Outports). Additional allowance can be made after 10 days. Maximum 2 bottles of spirits per man. Wines and beer not limited. Landing of cigarettes, wines and spirits prohibited.

6. Yes.

WEATHER: *Wind:* The prevailing wind is the South-Easterly Tradewind blowing regularly from June to October.

N.B.: The Tradewind freshens with the sun.

Close to shore: Maximum around 1400 hours.

Open Sea: Maximum around 1800 hours.

Cyclone Season: From November to April (variable winds, rain, gusty conditions).

Rainfall: Dry season: Minimum 50 mm./month.

From January to March: Heaviest rainfall owing to the Cyclone season.

Rainfall varies between coasts depending on their exposure to winds.

Temperature: Average temperature: 24°C.

The maximum temperatures are during the month of February: 34°C.

Tides: Semi-diurnal type affected by daily inequalities. The high and low April tides are on an average 0.40 m. higher/lower than the October tides.

SHORE LEAVE: Allowed.

SHIPMASTER'S REPORT:

Communications: Radio W/T. Short wave service and MF service very good. First message to state which passage used – Draft – Tonnage – and nature of dangerous cargo, this should be sent at least 24 hours before arrival, Agent and Harbour Master required this message.

Shore Telephone. Service available as receivers can be connected.

VHF. Available to Harbour Office and pilot station during office hours 0700 to 1100 hrs. and 1300 to 1700 hrs. Monday to Friday. Pilot vessel when at Havannah Passage keeps VHF watch 1 hour before the last given ETA. In our case we made contact with the pilot vessel when 12 miles from Havannah Passage. If at anchor VHF contact to Agents can be made via Harbour Office.

Pilotage: Boarding ground. Canal de Havannah. The Pilot boards the vessel when on the leads, but inside the reef, when the vessel is off Port Goro. The 3 leading lights stand out well at night time, each light is individually powered in case of failure, in our case they were seen 25 miles away. During strong S.W'ly winds the Pilot will board in the lee of Ioro Reef. As the leads do not stand out so well in day time, night time seems to be the best arrival time. This channel has been swept to a depth of 34 ft. Strong cross currents can be expected at the entrance to Havannah Passage.

Anchorages. See CHINPACS for area dangerous due to mines. Otherwise vessel anchors Grande Rade.

Quarantine. Pratique granted by Pilot, Health Signal not required unless notifiable sickness on board.

Controlling Factors: Berthing times. Vessels are now berthed at any time, the usual side to being Starboard side, a 1,200 h.p. tug being used to assist.

Length. No limit at berth.

Berthage. 700 m. at the New Wharves.

Stevedoring. Working time. 0700 to 1100 hrs. then 1300 to 1700 hrs. and overtime from 1800 to 2200 hrs. The labour will also clean out the hatches provided one gang is actually working cargo, otherwise they stop when cargo work is all finished. Saturday is not an overtime day. Only Sunday is an overtime day. Good Friday and Easter Saturday are considered normal working days. The Stevedoring is good, with a fast working rate, but I regret to state that some pillage took place. As regards unprotected cars, the most minor marks were claimed against the vessel, these were repudiated.

Documents:

1 Cargo Manifest.
1 List of Dangerous Cargo.
2 Crew Lists.
1 Crew Personal Effects List, this list to include currency held, (French Forms accepted).
1 Bonded Stores List.
1 Health Form.

OUTPORTS: (See Plan Book).

For Ore loading vessels:

Nepoui: Lat. 21° 20.1′ S., Long. 164° 25.5′ E.

LOA vessel 163 m. Draft 8.7 m. Telescopic shuttle clearance 12.5 m. Loading rate 1,250 t.p.h.

1 Launch available.

Tankers: 6 in. flexible hose, weight 2 tons, 8 in. pipe-line. Pumping rate 200 t.p.h. Pressure 7 kg/sq.cm.

Thio: Lat. 21° 37.5′ S., Long. 166° 15.5′E.

LOA vessel 170 m. Draft 10.8 m. Telescopic shuttle clearance 11 m. Loading rate 686 t.p.h.

1 Launch available.

Tankers: 6 in. flexible hose weight 2 tons. 6 in. pipe-line. Pumping rate 130 t.p.h. Pressure 7 kg/sq.m.

Kouaoua: Lat. 21° 24′ S., Long. 165° 49.8′ E.

LOA vessel 150 m. Draft 8.5 m. Telescopic shuttle clearance 10.5 m. Loading rate 628 t.p.h.

2 Launches (1 shared with Poro) available.

Poro: Lat. 21° 19′ S., Long. 165° 44′ E.

LOA vessel 169 m. Draft 9 m. Telescopic shuttle clearance 11.05 m. Loading rate 900 t.p.h.

2 Launches (1 shared with Kouaoua) available.

Tankers: 8 in. flexible hose, weight 2 tons. Pipe-line 6 in. Pumping rate 130 – 150 t.p.h. Pressure 7kg/sq.cm.

Baie Ugue: Lat. 21° 09′ S., Long. 165° 33′ E.

LOA vessel 170 m. Draft 11 m. Telescopic shuttle clearance 12 m. Loading rate 600 t.p.h.

1 Launch and 1 tug 400 h.p. available.

Loading of Ore by Lighters:

Vessels anchored in bays, sheltered from the ocean swell by the barrier reef, but not sheltered from heavy seas caused by wind.

West Coast: Poum/Paagoumene, Karembe, Teoudie, Poya, Bourail (anchorage and mooring buoy), Bay N'Go (anchorage and mooring buoy).

East Coast: Moneo, Kouaoua, Nakety, N'Goye, Ouinne (anchorage and mooring buoy).

Loading Operations: Loading is carried out under supervision of the miner and his stevedore who embarks and lodges part of his personnel on board the vessel.

1. Lighter train towed by a tug, runs a shuttle between the loading wharf and the anchored vessel. Very few powered lighters.
2. Trucks empty their load into lighters.
3. Lighters are emptied by unloading apparatus on board vessel.
4. Ore estimations (richness and humidity) are carried out on shore by the miner and a Japanese representative of O.M.I.C., and a sample is placed on board for the smelter, another sample being reserved for the Department of Mines.
5. Non-stop loading, except in some bays where tide flow inhibits loading lighters at low tide.

Loading rate: From 1,500 to 9,000 tons per day.

Depending on:

1. Whether port is sheltered or not;
2. Distance between loading point and anchorage.
3. Tide flow at lighter loading point;
4. Number of lighters and tugs used by the stevedore.

OFF-LYING ISLANDS: (See Plan Book).

Art Island – Wala Wharf: Lat. 19° 43′ S., Long. 161° 19′ E. Wharf orientated N.N.E./S.S.W., parallel to shore. Length 30 m. framed by 2 dolphins each 15 m. Width 7 m. Wharf top 3.50 m. above low tide. Depth 4 m. Roadway: 85 m. long, 2.7 m. wide with 2 footpaths 80 cm. wide, supporting vehicles of up to 19 tons (axle 13 tons).

Ouvea Island – Wadrilla Wharf: Lat. 20° 35′ S., Long. 166° 33′ E. Wharf orientated W.N.W./S.S.W., perpendicular to shore. Length 40 m. with mooring buoy 35 m. from the end. Width 7 m. Wharf top 3.5 m. above low tide. Depth 4 m. Roadway: 220 m. long, 2.7 m. wide with 1 footpath 80 cm. wide, supporting vehicles of up to 19 tons (axle 13 tons).

Lifou Island – We Wharf: Lat. 20° 55′ S., Long. 167° 17′ E. Wharf orientated N.E./S.W., parallel to shore. Length 40 m. prolongated to the N.E. by a dolphin 15 m. away. Width 7 m. Wharf top 3.5 m. above low tide. Depth 5.5 m. Roadway: 90 m. long, 4 m. wide, supporting vehicles of up to 19 tons (axle 13 tons).

Mare Island – Tadine Wharf: Lat. 21° 33′ S., Long. 167° 53.5′ E. Wharf orientated N.N.E./S.S.W. Length 48 m. with an adjacent wharf 13 m. long (150 in. lower). Width 2 m. Wharf top 2.8 m. above low tide. Depth 3 m.

Isle of Pines – Kuto Wharf: Lat. 22° 39.7′ S., Long. 167° 26′ E. Wharf orientated W.N.W./E.S.E., parallel to shore. Length 30 m. framed by 2 dolphins 15 m. away. Width 11 m. Wharf top 3.35 m. above low tide. Depth 4 m. Roadway: 118 m. long, 2.70 m. wide with one footpath 80 cm. wide, supporting vehicles of up to 19 tons (axle 13 tons).

EQUIPMENT: Stevedore Company equipment:

Societe du Chalandage:

Fork Lift Trucks: 6×1.5 tons, 10×2.5 tons, 12×4.0 tons, 3×5.0 tons, 4×6.0 tons, 10×10.0 tons.

Forklift/Frames (for Ro-Ro/Spreaders): 1×30 tons, 1×25 tons, 2×22 tons, 1×12 tons.

Karry Crane: 5×3 tons (6 tons doubled).

Tractors for Vehicles: 2.

Cranes: Poclain P.P.M. automotive, 14 tons (4 – 5 tons useful load). Richier on carrier (jib 24 m.) 40 tons (at 3 m.).

Self-Loading Trailers for Container Vessels: 20 tons (1 container 20 ft.). 30 tons (containers 20 ft. – 40 ft.)

Spreaders for Containers: 3 automatic for 20 ft., 1 automatic for 40 ft.

Trucks with Crane: 2 with jib 6 m., 7.5 tons/m., 1 with jib 7 m., 9 tons/m.

Semi-Trailer: 10×12 m. long. 7 Espadon type.

SOFRAC:

Crane Belotti: 1×22 tons with directional spreader.

Forklifts: 2×22 tons with frontal frame.

Forklifts: 3×8.5 tons, 2×6.5 tons, 1×6 tons, 1×5 tons, 3×4 tons, 2×3 tons, 1×3 tons (lowered for unloading containers), 1×2.5 tons (lowered for unloading containers), 2×2 tons (lowered for unloading containers).

Karry Crane: 1×3 tons (6 tons doubled).

Semi-Trailers for Containers: 6 for 20 ft., 24 tons. 4 for 20 ft. – 40 ft., 24 tons.

Heavy Duty Tractors: 6 for loads from 38 tons to 60 tons.

Tank Trucks: 1×35 cu.m. (1 tank), 22 tons. 1×24 cu.m. (2 tanks), 22 tons.

Automatic Spreaders: 2 for containers 20 ft., 25 tons. 1 for containers 40 ft., 30 tons.

Suction Pumps for Grain: 1×140 t.p.h., nominal 40 – 45 t.p.h. 1×35 t.p.h., nominal 25 t.p.h. 1×200 t.p.h.

Semi-Trailer with Worm: 1 for unloading grain containers.

S.A.T.O.:

Forklift Trucks: 2×2.5 tons (on board), 4×4 tons, 3×6 tons, 1×8 tons, 1×12 tons, 1×25 tons.

Karry Crane: 1×3 tons (6 tons).

Automatic Spreader for Containers: 1×20 ft., 25 tons.

TANKERS:

SBM: (Societe le Nickel): In the entrance to Grande Rade (position: Lat. 22° 14′ 15″ S., Long. 166° 23.4′ E.). Mooring during daylight only. Max. LOA 300 m. Max. draft 14.80 m. Pumping rate for No. 2, heavy fuel oil 3,000 cu.m./h.

Baie des Dames: (Mobil Oil Australia). (Position: Lat. 22° 14′ S., Long. 166° 24′ E.).

1. 5 mooring buoys (max. distance between East and West Buoys 361 m.) 2×8 in. lines for clean and black oils (each marked by a Spar Buoy and a Marker Buoy). Max. LOA 200 m., max. draft 10 m. The buoy mooring is used to discharge Mobil/Total tankers and bunker cargo vessels, liners and ore carriers.

2. "T" shaped jetty, length 9 m. 4 mooring dolphins and 2 mooring buoys (110 m. apart). Max. LOA of tankers 100 m., max. draft 5 m. Berth used for discharge of tankers and liquid gas carriers, bunkering of vessels and loading of tankers.

Also see table below.

	These two terminals are operated by Mobil Oil and are used for discharging and loading tankers as well as for bunkering all types of vessels.		Terminal owned by SLN who makes available its berthing Master. Follow instructions SLN/SIE 146, September 1979.	For tankers containing products for Shell.

LPG Terminal:

Gas carriers berth port side to wharf, against the jetty and the 4 dolphins which make up the Mobil Oil installations in Bay des Dames.

Limits: Overall length : 100 m. Draft: 5 m.

Capacity of reservoirs: 3,115 tons. Sphere No. 1: 330 tons; Sphere No. 2: 560 tons; Sphere No. 3: 2,225 tons.

All the spheres can be used for stocking butane.

Sphere No. 1 can also stock propane.

Average density of butane gas: 0.580.

Maximum pressure of liquid: 15 kg/sq.cm.

Normal delivery pressure: 7 kg/sq.cm.

Maximum vapour pressure: 5 kg/sq.cm.

Pumping speed: Maximum 70 t.p.h. Minimum speed: 10 t.p.h.

Hoses used by vessel: 1 hose for liquids 4 in. diameter; 1 hose for vapours 3 in. diameter.

Obligatory requirements for tankers carrying Hydrocarbons: Masters of all vessels carrying hydrocarbons and on the point of entering New Caledonian waters are under obligation to send to the Marine Commander in Noumea (F.U.J.), a message, indicating:

(1) Intended course.

(2) Navigation and manoeuvring possibilities.

6 hours before entering territorial waters.

6 hours before sailing.

Note: During sojourn or transit in New Caledonian waters, permanent radio contact is observed; international radotelephonic call frequency on the maritime metric band.

Tankers must use the following passes:

Havannah or Boulari: Tankers carrying less than 8,000 tons of petroleum products and less than 8 m. draft.

Pilot pick-up point 5 nautical miles off Boulari:

1. Entry via Boulari Pass if less than 20,000 tons of petroleum products and draft under 10 m. (night or day);

2. Entry via Dumbea Pass if more than 20,000 tons of petroleum products or more than 20 m. draft (daytime only).

Thio and Poro:

Tankers: Less than 20,000 tons of products and draft under 10 m.

Very Important:

Docking of tankers is in accordance with the possession of:

International Certificate for the Prevention of Pollution by Hydrocarbons; consequently:

This must be indicated to ship's Agent 48 hours prior to arrival.

Certificate must be shown to Pilot at the entrance, and to the Harbour Master or his representative upon docking.

MEDICAL: Clinique de Magenta, Rue du 18-Juin, Magenta, Box H5. Tel: 28.49.29.

Clinique Magnin: Route Territoriale No. 13, Vallee des Colons, Box 64. Tel: 27.26.01.

Hospital Gaston-Bourret, Avenue Paul-Doumer, Noumea, Box C5. Tel: 27.21.21.

Polyclinique de l'Anse-Vata, Route de l'Anse-Vata. Tel: 26.14.22.

Note: Numerous dispensaries located in villages and mining centres of the interior. If necessary, urgent medical evacuation possible by plane or helicopter.

DENSITY: 1026.

FRESH WATER: Supplied by pipe-line at the quays in the Commercial Port, S.L.N. and Numbo Private Cement Factory; rate, 40 t.p.h.

FUEL: Refuelling with marine diesel oil (M.D.O.) or bunkering fuel oil (B.F.O.) is possible.

Authorisation previously obtained by the shipowner from the Australian or French Head Offices of the 3 companies present in Noumea can aid local formalities:

Mobil Tel: 27.31.52

Shell Tel: 28.57.20

Total Tel: 27.52.91

"Light" fuels can be delivered by tanker, but "heavy" fuels must be loaded at the Mobil refuelling post, Bay des Dames.

Docking: LOA 100 m. draft 5 m.

Mooring to buoys: LOA 183 m. draft 10 m.

Note: When tying up to buoys: One must count 3/4 hours' lost time for the various operations. A derrick capable of lifting the hose (3 tons) is necessary.

GANGWAY/DECK WATCHMEN: Recommended, but not compulsory.

OPENING/CLOSING HATCHES: Can be performed by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes per man(400 cigarettes at Outports). Additional allowance can be made after 10 days. Maximum 2 bottles of spirits per man. Wines and beer not limited. Landing of cigarettes, wines and spirits prohibited.

Pilot vessel when at Havannah Passage keeps VHF watch 1 hour before the last given ETA. In our case we made contact with the pilot vessel when 12 miles from Havannah Passage. If at anchor VHF contact to Agents can be made via Harbour Office.

Pilotage: Boarding ground. Canal de Havannah. The Pilot boards the vessel when on the leads, but inside the reef, when the vessel is off Port Goro. The 3 leading lights stand out well at night time, each light is individually powered in case of failure, in our case they were seen 25 miles away. During strong S.W'ly winds the Pilot will board in the lee of Ioro Reef. As the leads do not stand out so well in day time, night time seems to be the best arrival time. This channel has been swept to a depth of 34 ft. Strong cross currents can be expected at the entrance to Havannah Passage.

Anchorages. See CHINPACS for area dangerous due to mines. Otherwise vessel anchors Grande Rade.

Quarantine. Pratique granted by Pilot, Health Signal not required unless notifiable sickness on board.

Controlling Factors: Berthing times. Vessels are now berthed at any time, the usual side to being Starboard side, a 1,200 h.p. tug being used to assist.

Length. No limit at berth.

Berthage. 700 m. at the New Wharves.

Stevedoring. Working time. 0700 to 1100 hrs. then 1300 to 1700 hrs. and overtime from 1800 to 2200 hrs. The labour will also clean out the hatches provided one gang is actually working cargo, otherwise they stop when cargo work is all finished. Saturday is not an overtime day. Only Sunday is an overtime day. Good Friday and Easter Saturday are considered normal working days. The Stevedoring is good, with a fast working rate, but I regret to state that some pillage took place. As regards unprotected cars, the most minor marks were claimed against the vessel, these were repudiated.

OUTPORTS: (See Plan Book).

For Ore loading vessels:

Nepoui: Lat. 21° 20.1′ S., Long. 164° 25.5′ E.

LOA vessel 163 m. Draft 8.7 m. Telescopic shuttle clearance 12.5 m. Loading rate 1,250 t.p.h.

1 Launch available.

Tankers: 6 in. flexible hose, weight 2 tons, 8 in. pipe-line. Pumping rate 200 t.p.h. Pressure 7 kg/sq.cm.

Thio: Lat. 21° 37.5′ S., Long. 166° 15.5′E.

LOA vessel 170 m. Draft 10.8 m. Telescopic shuttle clearance 11 m. Loading rate 686 t.p.h.

1 Launch available.

Tankers: 6 in. flexible hose weight 2 tons. 6 in. pipe-line. Pumping rate 130 t.p.h. Pressure 7 kg/sq.m.

Kouaoua: Lat. 21° 24′ S., Long. 165° 49.8′ E.

LOA vessel 150 m. Draft 8.5 m. Telescopic shuttle clearance 10.5 m. Loading rate 628 t.p.h.

2 Launches (1 shared with Poro) available.

Poro: Lat. 21° 19′ S., Long. 165° 44′ E.

LOA vessel 169 m. Draft 9 m. Telescopic shuttle clearance 11.05 m. Loading rate 900 t.p.h.

2 Launches (1 shared with Kouaoua) available.

Tankers: 8 in. flexible hose, weight 2 tons. Pipe-line 6 in. Pumping rate 130 – 150 t.p.h. Pressure 7kg/sq.cm.

Baie Ugue: Lat. 21° 09′ S., Long. 165° 33′ E.

LOA vessel 170 m. Draft 11 m. Telescopic shuttle clearance 12 m. Loading rate 600 t.p.h.

1 Launch and 1 tug 400 h.p. available.

Loading of Ore by Lighters:

Vessels anchored in bays, sheltered from the ocean swell by the barrier reef, but not sheltered from heavy seas caused by wind.

West Coast: Poum/Paagoumene, Karembe, Teoudie, Poya, Bourail (anchorage and mooring buoy), Bay N'Go (anchorage and mooring buoy).

East Coast: Moneo, Kouaoua, Nakety, N'Goye, Ouinne (anchorage and mooring buoy).

Loading Operations: Loading is carried out under supervision of the miner and his stevedore who embarks and lodges part of his personnel on board the vessel.

1. Lighter train towed by a tug, runs a shuttle between the loading wharf and the anchored vessel. Very few powered lighters.
2. Trucks empty their load into lighters.
3. Lighters are emptied by unloading apparatus on board vessel.
4. Ore estimations (richness and humidity) are carried out on shore by the miner and a Japanese representative of O.M.I.C., and a sample is placed on board for the smelter, another sample being reserved for the Department of Mines.
5. Non-stop loading, except in some bays where tide flow inhibits loading lighters at low tide.

Loading rate: From 1,500 to 9,000 tons per day.

Depending on:

1. Whether port is sheltered or not;
2. Distance between loading point and anchorage.
3. Tide flow at lighter loading point;
4. Number of lighters and tugs used by the stevedore.

OFF-LYING ISLANDS: (See Plan Book).

Art Island – Wala Wharf: Lat. 19° 43′ S., Long. 161° 19′ E. Wharf orientated N.N.E./S.S.W., parallel to shore. Length 30 m. framed by 2 dolphins each 15 m. Width 7 m. Wharf top 3.50 m. above low tide. Depth 4 m. Roadway: 85 m. long, 2.7 m. wide with 2 footpaths 80 cm. wide, supporting vehicles of up to 19 tons (axle 13 tons).

Ouvea Island – Wadrilla Wharf: Lat. 20° 35′ S., Long. 166° 33′ E. Wharf orientated W.N.W./S.S.W., perpendicular to shore. Length 40 m. with mooring buoy 35 m. from the end. Width 7 m. Wharf top 3.5 m. above low tide. Depth 4 m. Roadway: 220 m. long, 2.7 m. wide with 1 footpath 80 cm. wide, supporting vehicles of up to 19 tons (axle 13 tons).

Lifou Island – We Wharf: Lat. 20° 55′ S., Long. 167° 17′ E. Wharf orientated N.E./S.W., parallel to shore. Length 40 m. prolongated to the N.E. by a dolphin 15 m. away. Width 7 m. Wharf top 3.5 m. above low tide. Depth 5.5 m. Roadway: 90 m. long, 4 m. wide, supporting vehicles of up to 19 tons (axle 13 tons).

Mare Island – Tadine Wharf: Lat. 21° 33′ S., Long. 167° 53.5′ E. Wharf orientated N.N.E./S.S.W. Length 48 m. with an adjacent wharf 13 m. long (150 in. lower). Width 2 m. Wharf top 2.8 m. above low tide. Depth 3 m.

Isle of Pines – Kuto Wharf: Lat. 22° 39.7′ S., Long. 167° 26′ E. Wharf orientated W.N.W./E.S.E., parallel to shore. Length 30 m. framed by 2 dolphins 15 m. away. Width 11 m. Wharf top 3.35 m. above low tide. Depth 4 m. Roadway: 118 m. long, 2.70 m. wide with one footpath 80 cm. wide, supporting vehicles of up to 19 tons (axle 13 tons).

EQUIPMENT: Stevedore Company equipment:

Societe du Chalandage:

Fork Lift Trucks: 6×1.5 tons, 10×2.5 tons, 12×4.0 tons, 3×5.0 tons, 4×6.0 tons, 10×10.0 tons.

Forklift/Frames (for Ro-Ro/Spreaders): 1×30 tons, 1×25 tons, 2×22 tons, 1×12 tons.

Karry Crane: 5×3 tons (6 tons doubled).

Tractors for Vehicles: 2.

Cranes: Poclain P.P.M. automotive, 14 tons (4 – 5 tons useful load). Richier on carrier (jib 24 m.) 40 tons (at 3 m.).

Self-Loading Trailers for Container Vessels: 20 tons (1 container 20 ft.). 30 tons (containers 20 ft. – 40 ft.)

Spreaders for Containers: 3 automatic for 20 ft., 1 automatic for 40 ft.

Trucks with Crane: 2 with jib 6 m., 7.5 tons/m., 1 with jib 7 m., 9 tons/m.

Semi-Trailer: 10×12 m. long. 7 Espadon type.

SOFRAC:

Crane Belotti: 1×22 tons with directional spreader.

Forklifts: 2×22 tons with frontal frame.

Forklifts: 3×8.5 tons, 2×6.5 tons, 1×6 tons, 1×5 tons, 3×4 tons, 2×3 tons, 1×3 tons (lowered for unloading containers), 1×2.5 tons (lowered for unloading containers), 2×2 tons (lowered for unloading containers).

Karry Crane: 1×3 tons (6 tons doubled).

Semi-Trailers for Containers: 6 for 20 ft., 24 tons. 4 for 20 ft. – 40 ft., 24 tons.

Heavy Duty Tractors: 6 for loads from 38 tons to 60 tons.

Tank Trucks: 1×35 cu.m. (1 tank), 22 tons. 1×24 cu.m. (2 tanks), 22 tons.

Automatic Spreaders: 2 for containers 20 ft., 25 tons. 1 for containers 40 ft., 30 tons.

Suction Pumps for Grain: 1×140 t.p.h., nominal 40 – 45 t.p.h. 1×35 t.p.h., nominal 25 t.p.h. 1×200 t.p.h.

Semi-Trailer with Worm: 1 for unloading grain containers.

S.A.T.O.:

Forklift Trucks: 2×2.5 tons (on board), 4×4 tons, 3×6 tons, 1×8 tons, 1×12 tons, 1×25 tons.

Karry Crane: 1×3 tons (6 tons).

Automatic Spreader for Containers: 1×20 ft., 25 tons.

TANKERS:

SBM: (Societe le Nickel): In the entrance to Grande Rade (position: Lat. 22° 14′ 15″ S., Long. 166° 23.4′ E.). Mooring during daylight only. Max. LOA 300 m. Max. draft 14.80 m. Pumping rate for No. 2, heavy fuel oil 3,000 cu.m./h.

Baie des Dames: (Mobil Oil Australia). (Position: Lat. 22° 14′ S., Long. 166° 24′ E.).

1. 5 mooring buoys (max. distance between East and West Buoys 361 m.) 2×8 in. lines for clean and black oils (each marked by a Spar Buoy and a Marker Buoy). Max. LOA 200 m., max. draft 10 m. The buoy mooring is used to discharge Mobil/Total tankers and bunker cargo vessels, liners and ore carriers.

2. "T" shaped jetty, length 9 m. 4 mooring dolphins and 2 mooring buoys (110 m. apart). Max. LOA of tankers 100 m., max. draft 5 m. Berth used for discharge of tankers and liquid gas carriers, bunkering of vessels and loading of tankers.

Also see table below.

	These two terminals are operated by Mobil Oil and are used for discharging and loading tankers as well as for bunkering all types of vessels.		Terminal owned by SLN who makes available its berthing Master. Follow instructions SLN/SIE 146, September 1979.	For tankers containing products for Shell.

LPG Terminal:

Gas carriers berth port side to wharf, against the jetty and the 4 dolphins which make up the Mobil Oil installations in Bay des Dames.

Limits: Overall length : 100 m. Draft: 5 m.

Capacity of reservoirs: 3,115 tons. Sphere No. 1: 330 tons; Sphere No. 2: 560 tons; Sphere No. 3: 2,225 tons.

All the spheres can be used for stocking butane.

Sphere No. 1 can also stock propane.

Average density of butane gas: 0.580.

Maximum pressure of liquid: 15 kg/sq.cm.

Normal delivery pressure: 7 kg/sq.cm.

Maximum vapour pressure: 5 kg/sq.cm.

Pumping speed: Maximum 70 t.p.h. Minimum speed: 10 t.p.h.

Hoses used by vessel: 1 hose for liquids 4 in. diameter; 1 hose for vapours 3 in. diameter.

Obligatory requirements for tankers carrying Hydrocarbons: Masters of all vessels carrying hydrocarbons and on the point of entering New Caledonian waters are under obligation to send to the Marine Commander in Noumea (F.U.J.), a message, indicating:

(1) Intended course.

(2) Navigation and manoeuvring possibilities.

6 hours before entering territorial waters.

6 hours before sailing.

Note: During sojourn or transit in New Caledonian waters, permanent radio contact is observed; international radotelephonic call frequency on the maritime metric band.

Tankers must use the following passes:

Havannah or Boulari: Tankers carrying less than 8,000 tons of petroleum products and less than 8 m. draft.

Pilot pick-up point 5 nautical miles off Boulari:

1. Entry via Boulari Pass if less than 20,000 tons of petroleum products and draft under 10 m. (night or day);

2. Entry via Dumbea Pass if more than 20,000 tons of petroleum products or more than 20 m. draft (daytime only).

Thio and Poro:

Tankers: Less than 20,000 tons of products and draft under 10 m.

Very Important:

Docking of tankers is in accordance with the possession of:

International Certificate for the Prevention of Pollution by Hydrocarbons; consequently:

This must be indicated to ship's Agent 48 hours prior to arrival.

Certificate must be shown to Pilot at the entrance, and to the Harbour Master or his representative upon docking.

MEDICAL: Clinique de Magenta, Rue du 18-Juin, Magenta, Box H5. Tel: 28.49.29.

Clinique Magnin: Route Territoriale No. 13, Vallee des Colons, Box 64. Tel: 27.26.01.

Hospital Gaston-Bourret, Avenue Paul-Doumer, Noumea, Box C5. Tel: 27.21.21.

Polyclinique de l'Anse-Vata, Route de l'Anse-Vata. Tel: 26.14.22.

Note: Numerous dispensaries located in villages and mining centres of the interior. If necessary, urgent medical evacuation possible by plane or helicopter.

DENSITY: 1026.

FRESH WATER: Supplied by pipe-line at the quays in the Commercial Port, S.L.N. and Numbo Private Cement Factory; rate, 40 t.p.h.

FUEL: Refuelling with marine diesel oil (M.D.O.) or bunkering fuel oil (B.F.O.) is possible.

Authorisation previously obtained by the shipowner from the Australian or French Head Offices of the 3 companies present in Noumea can aid local formalities:

Mobil Tel: 27.31.52

Shell Tel: 28.57.20

Total Tel: 27.52.91

"Light" fuels can be delivered by tanker, but "heavy" fuels must be loaded at the Mobil refuelling post, Bay des Dames.

Docking: LOA 100 m. draft 5 m.

Mooring to buoys: LOA 183 m. draft 10 m.

Note: When tying up to buoys: One must count 3/4 hours' lost time for the various operations. A derrick capable of lifting the hose (3 tons) is necessary.

GANGWAY/DECK WATCHMEN: Recommended, but not compulsory.

OPENING/CLOSING HATCHES: Can be performed by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes per man(400 cigarettes at Outports). Additional allowance can be made after 10 days. Maximum 2 bottles of spirits per man. Wines and beer not limited. Landing of cigarettes, wines and spirits prohibited.

SURVEYORS: *Marine Surveyors:*

Bureau Naval Serve, 32 Rue du General-Gallieni, Noumea. Tel: 28.25.02.

Bureau Veritas, 21-23 Rue de l'Alma, Noumea. Tel: 27.20.31.

Lloyd's Register of Shipping, 7 Rue Anatole-France, Noumea. Tel: 27.20.83.

For all problems relating to cargo and/or vessel damages.

Draft surveys for estimation of nickel ore loads per ship.

Classification Societies:

Lloyd's Register of Shipping, Societe W. A. Johnston, 7 Rue Anatole-France, Noumea, Box 445. Tel: 27.20.83. Cables: Johnston. Telex: 070 NM.

Bureau Veritas, Societe des Etablissements Ballande, 21-23 Rue de l'Alma, Noumea, Box C4. Tel: 27.20.31. Cables: Ballande. Telex: 025 NM.

Germanischer Lloyd and Nippon Kaiji Kyokai. Bureau Naval Serve, 32 Rue Gallieni, Noumea, Box 2387. Tel: 28.25.02. Cables: Surveyor. Telex: Gemar 065 NM.

REPAIRS: Many engine, hull and electronic repairs can be effected. Slipway for small vessels. One slipway, to lift vessels of 1,000 tonnes.

CARGO GEAR: Ship's gear normally used. Possibility of hiring cranes 10 ton – 104 tons.

IDENTIFICATION CARDS: Recommended that crew carry Seamen's Books.

CONSULS: Australia, 19-21 Avenue du Marechal-Foch, Noumea. B.P. 22. Tel: 27.24.14. Cables: Austcom. Telex: 087 NM.

Belgium, 13 Rue Jules-Ferry, Noumea. Box 2683. Tel: 28.46.46.

Indonesia, 4 Rue de Strasbourg, Noumea. Box 26. Tel: 28.25.74.

New Zealand: 4 Boulevard Vauban, Noumea. Box 2219. Tel: 27.25.43. Cables: Kereru. Telex: 036 NM.

REPATRIATION: All facilities available for crew change and repatriation.

AIRPORT: Tontouta Airport situated 50 km. from Noumea. Several connections a week to all parts of the world.

TIME: GMT plus 11 hours. N.B. Daylight saving is sometimes introduced between December and February.

HOLIDAYS: 1st January, Easter Monday, 1st May, Pentecost Monday, Ascension Day, Whit Monday, 14th July, 15th August, 24th September, 1st November, 11th November, 25th December. Work may be arranged on Sundays and holidays.

POLICE/AMBULANCE/FIRE: Police, Tel: 17; Fire, Tel: 18; Ambulance, Tel: 27.21.21.

EMERGENCY CO-ORDINATION CENTRE: Call "Noumea Marine" on VHF Channel 11.

BANKS: Banque de l'Indochine et de Suez, Corner of Rue de l'Alma and Avenue du Marechal-Foch, Noumea. Box G5 Tel: 27.22.12. Cables: Indosuez. Telex: 023 NM.

STORING: See "Prelims" page viii.

1. By Truck.
2. None.
3. Yes.
4. Yes.
5. Duty Free.
6. Yes.

WEATHER: *Wind:* The prevailing wind is the South-Easterly Tradewind blowing regularly from June to October.

N.B.: The Tradewind freshens with the sun.

Close to shore: Maximum around 1400 hours.

Open Sea: Maximum around 1800 hours.

Cyclone Season: From November to April (variable winds, rain, gusty conditions).

Rainfall: Dry season: Minimum 50 mm./month.

From January to March: Heaviest rainfall owing to the Cyclone season.

Rainfall varies between coasts depending on their exposure to winds.

Temperature: Average temperature: 24°C.

The maximum temperatures are during the month of February: 34°C.

Tides: Semi-diurnal type affected by daily inequalities. The high and low April tides are on an average 0.40 m. higher/lower than the October tides.

SHORE LEAVE: Allowed.

SHIPMASTER'S REPORT:

Communications: Radio W/T. Short wave service and MF service very good. First message to state which passage used – Draft – Tonnage – and nature of dangerous cargo, this should be sent at least 24 hours before arrival, Agent and Harbour Master required this message.

Shore Telephone. Service available as receivers can be connected.

VHF. Available to Harbour Office and pilot station during office hours 0700 to 1100 hrs. and 1300 to 1700 hrs. Monday to Friday. Pilot vessel when at Havannah Passage keeps VHF watch 1 hour before the last given ETA. In our case we made contact with the pilot vessel when 12 miles from Havannah Passage. If at anchor VHF contact to Agents can be made via Harbour Office.

Pilotage: Boarding ground. Canal de Havannah. The Pilot boards the vessel when on the leads, but inside the reef, when the vessel is off Port Goro. The 3 leading lights stand out well at night time, each light is individually powered in case of failure, in our case they were seen 25 miles away. During strong S.W'ly winds the Pilot will board in the lee of Ioro Reef. As the leads do not stand out so well in day time, night time seems to be the best arrival time. This channel has been swept to a depth of 34 ft. Strong cross currents can be expected at the entrance to Havannah Passage.

Anchorages. See CHINPACS for area dangerous due to mines. Otherwise vessel anchors Grande Rade.

Quarantine. Pratique granted by Pilot, Health Signal not required unless notifiable sickness on board.

Controlling Factors: Berthing times. Vessels are now berthed at any time, the usual side to being Starboard side, a 1,200 h.p. tug being used to assist.

Length. No limit at berth.

Berthage. 700 m. at the New Wharves.

Stevedoring. Working time. 0700 to 1100 hrs. then 1300 to 1700 hrs. and overtime from 1800 to 2200 hrs. The labour will also clean out the hatches provided one gang is actually working cargo, otherwise they stop when cargo work is all finished. Saturday is not an overtime day. Only Sunday is an overtime day. Good Friday and Easter Saturday are considered normal working days. The Stevedoring is good, with a fast working rate, but I regret to state that some pillage took place. As regards unprotected cars, the most minor marks were claimed against the vessel, these were repudiated.

Loading Operations: Loading is carried out under supervision of the miner and his stevedore who embarks and lodges part of his personnel on board the vessel.

1. Lighter train towed by a tug, runs a shuttle between the loading wharf and the anchored vessel. Very few powered lighters.
2. Trucks empty their load into lighters.
3. Lighters are emptied by unloading apparatus on board vessel.
4. Ore estimations (richness and humidity) are carried out on shore by the miner and a Japanese representative of O.M.I.C., and a sample is placed on board for the smelter, another sample being reserved for the Department of Mines.
5. Non-stop loading, except in some bays where tide flow inhibits loading lighters at low tide.

Loading rate: From 1,500 to 9,000 tons per day.

Depending on:

1. Whether port is sheltered or not;
2. Distance between loading point and anchorage.
3. Tide flow at lighter loading point;
4. Number of lighters and tugs used by the stevedore.

OFF-LYING ISLANDS: (See Plan Book).

Art Island – Wala Wharf: Lat. 19° 43′ S., Long. 161° 19′ E. Wharf orientated N.N.E./S.S.W., parallel to shore. Length 30 m. framed by 2 dolphins each 15 m. Width 7 m. Wharf top 3.50 m. above low tide. Depth 4 m. Roadway: 85 m. long, 2.7 m. wide with 2 footpaths 80 cm. wide, supporting vehicles of up to 19 tons (axle 13 tons).

Ouvea Island – Wadrilla Wharf: Lat. 20° 35′ S., Long. 166° 33′ E. Wharf orientated W.N.W./S.S.W., perpendicular to shore. Length 40 m. with mooring buoy 35 m. from the end. Width 7 m. Wharf top 3.5 m. above low tide. Depth 4 m. Roadway: 220 m. long, 2.7 m. wide with 1 footpath 80 cm. wide, supporting vehicles of up to 19 tons (axle 13 tons).

Lifou Island – We Wharf: Lat. 20° 55′ S., Long. 167° 17′ E. Wharf orientated N.E./S.W., parallel to shore. Length 40 m. prolongated to the N.E. by a dolphin 15 m. away. Width 7 m. Wharf top 3.5 m. above low tide. Depth 5.5 m. Roadway: 90 m. long, 4 m. wide, supporting vehicles of up to 19 tons (axle 13 tons).

Mare Island – Tadine Wharf: Lat. 21° 33′ S., Long. 167° 53.5′ E. Wharf orientated N.N.E./S.S.W. Length 48 m. with an adjacent wharf 13 m. long (150 in. lower). Width 2 m. Wharf top 2.8 m. above low tide. Depth 3 m.

Isle of Pines – Kuto Wharf: Lat. 22° 39.7′ S., Long. 167° 26′ E. Wharf orientated W.N.W./E.S.E., parallel to shore. Length 30 m. framed by 2 dolphins 15 m. away. Width 11 m. Wharf top 3.35 m. above low tide. Depth 4 m. Roadway: 118 m. long, 2.70 m. wide with one footpath 80 cm. wide, supporting vehicles of up to 19 tons (axle 13 tons).

EQUIPMENT: Stevedore Company equipment:

Societe du Chalandage:

Fork Lift Trucks: 6×1.5 tons, 10×2.5 tons, 12×4.0 tons, 3×5.0 tons, 4×6.0 tons, 10×10.0 tons.

Forklift/Frames (for Ro-Ro/Spreaders): 1×30 tons, 1×25 tons, 2×22 tons, 1×12 tons.

Karry Crane: 5×3 tons (6 tons doubled).

Tractors for Vehicles: 2.

Cranes: Poclain P.P.M. automotive, 14 tons (4 – 5 tons useful load). Richier on carrier (jib 24 m.) 40 tons (at 3 m.).

Self-Loading Trailers for Container Vessels: 20 tons (1 container 20 ft.). 30 tons (containers 20 ft. – 40 ft.)

Spreaders for Containers: 3 automatic for 20 ft., 1 automatic for 40 ft.

Trucks with Crane: 2 with jib 6 m., 7.5 tons/m., 1 with jib 7 m., 9 tons/m.

Semi-Trailer: 10×12 m. long. 7 Espadon type.

SOFRAC:

Crane Belotti: 1×22 tons with directional spreader.

Forklifts: 2×22 tons with frontal frame.

Forklifts: 3×8.5 tons, 2×6.5 tons, 1×6 tons, 1×5 tons, 3×4 tons, 2×3 tons, 1×3 tons (lowered for unloading containers), 1×2.5 tons (lowered for unloading containers), 2×2 tons (lowered for unloading containers).

Karry Crane: 1×3 tons (6 tons doubled).

Semi-Trailers for Containers: 6 for 20 ft., 24 tons. 4 for 20 ft. – 40 ft., 24 tons.

Heavy Duty Tractors: 6 for loads from 38 tons to 60 tons.

Tank Trucks: 1×35 cu.m. (1 tank), 22 tons. 1×24 cu.m. (2 tanks), 22 tons.

Automatic Spreaders: 2 for containers 20 ft., 25 tons. 1 for containers 40 ft., 30 tons.

Suction Pumps for Grain: 1×140 t.p.h., nominal 40 – 45 t.p.h. 1×35 t.p.h., nominal 25 t.p.h. 1×200 t.p.h.

Semi-Trailer with Worm: 1 for unloading grain containers.

S.A.T.O.:

Forklift Trucks: 2×2.5 tons (on board), 4×4 tons, 3×6 tons, 1×8 tons, 1×12 tons, 1×25 tons.

Karry Crane: 1×3 tons (6 tons).

Automatic Spreader for Containers: 1×20 ft., 25 tons.

TANKERS:

SBM: (Societe le Nickel): In the entrance to Grande Rade (position: Lat. 22° 14′ 15″ S., Long. 166° 23.4′ E.). Mooring during daylight only. Max. LOA 300 m. Max. draft 14.80 m. Pumping rate for No. 2, heavy fuel oil 3,000 cu.m./h.

Baie des Dames: (Mobil Oil Australia). (Position: Lat. 22° 14′ S., Long. 166° 24′ E.).

1. 5 mooring buoys (max. distance between East and West Buoys 361 m.) 2×8 in. lines for clean and black oils (each marked by a Spar Buoy and a Marker Buoy). Max. LOA 200 m., max. draft 10 m. The buoy mooring is used to discharge Mobil/Total tankers and bunker cargo vessels, liners and ore carriers.

2. "T" shaped jetty, length 9 m. 4 mooring dolphins and 2 mooring buoys (110 m. apart). Max. LOA of tankers 100 m., max. draft 5 m. Berth used for discharge of tankers and liquid gas carriers, bunkering of vessels and loading of tankers.

Also see table below.

Pressure kg/sq.m.				
Clean oil	7	7	—	7
Black oil	7	7	10	—
	These two terminals are operated by Mobil Oil and are used for discharging and loading tankers as well as for bunkering all types of vessels.		Terminal owned by SLN who makes available its berthing Master. Follow instructions SLN/SIE 146, September 1979.	For tankers containing products for Shell.

LPG Terminal:

Gas carriers berth port side to wharf, against the jetty and the 4 dolphins which make up the Mobil Oil installations in Bay des Dames.

Limits: Overall length : 100 m. Draft: 5 m.

Capacity of reservoirs: 3,115 tons. Sphere No. 1: 330 tons; Sphere No. 2: 560 tons; Sphere No. 3: 2,225 tons.

All the spheres can be used for stocking butane.

Sphere No. 1 can also stock propane.

Average density of butane gas: 0.580.

Maximum pressure of liquid: 15 kg/sq.cm.

Normal delivery pressure: 7 kg/sq.cm.

Maximum vapour pressure: 5 kg/sq.cm.

Pumping speed: Maximum 70 t.p.h. Minimum speed: 10 t.p.h.

Hoses used by vessel: 1 hose for liquids 4 in. diameter; 1 hose for vapours 3 in. diameter.

Obligatory requirements for tankers carrying Hydrocarbons: Masters of all vessels carrying hydrocarbons and on the point of entering New Caledonian waters are under obligation to send to the Marine Commander in Noumea (F.U.J.), a message, indicating:

(1) Intended course.
(2) Navigation and manoeuvring possibilities.
6 hours before entering territorial waters.
6 hours before sailing.

Note: During sojourn or transit in New Caledonian waters, permanent radio contact is observed; international radotelephonic call frequency on the maritime metric band.

Tankers must use the following passes:

Havannah or Boulari: Tankers carrying less than 8,000 tons of petroleum products and less than 8 m. draft.

Pilot pick-up point 5 nautical miles off Boulari:

1. Entry via Boulari Pass if less than 20,000 tons of petroleum products and draft under 10 m. (night or day);
2. Entry via Dumbea Pass if more than 20,000 tons of petroleum products or more than 20 m. draft (daytime only).

Thio and Poro:

Tankers: Less than 20,000 tons of products and draft under 10 m.

Very Important:

Docking of tankers is in accordance with the possession of:

International Certificate for the Prevention of Pollution by Hydrocarbons; consequently:

This must be indicated to ship's Agent 48 hours prior to arrival.

Certificate must be shown to Pilot at the entrance, and to the Harbour Master or his representative upon docking.

MEDICAL: Clinique de Magenta, Rue du 18-Juin, Magenta, Box H5. Tel: 28.49.29.

Clinique Magnin: Route Territoriale No. 13, Vallee des Colons, Box 64. Tel: 27.26.01.

Hospital Gaston-Bourret, Avenue Paul-Doumer, Noumea, Box C5. Tel: 27.21.21.

Polyclinique de l'Anse-Vata, Route de l'Anse-Vata. Tel: 26.14.22.

Note: Numerous dispensaries located in villages and mining centres of the interior. If necessary, urgent medical evacuation possible by plane or helicopter.

DENSITY: 1026.

FRESH WATER: Supplied by pipe-line at the quays in the Commercial Port, S.L.N. and Numbo Private Cement Factory; rate, 40 t.p.h.

FUEL: Refuelling with marine diesel oil (M.D.O.) or bunkering fuel oil (B.F.O.) is possible.

Authorisation previously obtained by the shipowner from the Australian or French Head Offices of the 3 companies present in Noumea can aid local formalities:

Mobil Tel: 27.31.52
Shell Tel: 28.57.20
Total Tel: 27.52.91

"Light" fuels can be delivered by tanker, but "heavy" fuels must be loaded at the Mobil refuelling post, Bay des Dames.

Docking: LOA 100 m. draft 5 m.

Mooring to buoys: LOA 183 m. draft 10 m.

Note: When tying up to buoys: One must count 3/4 hours' lost time for the various operations. A derrick capable of lifting the hose (3 tons) is necessary.

GANGWAY/DECK WATCHMEN: Recommended, but not compulsory.

OPENING/CLOSING HATCHES: Can be performed by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes per man(400 cigarettes at Outports). Additional allowance can be made after 10 days. Maximum 2 bottles of spirits per man. Wines and beer not limited. Landing of cigarettes, wines and spirits prohibited.

SURVEYORS: *Marine Surveyors:*

Bureau Naval Serve, 32 Rue du General-Gallieni, Noumea. Tel: 28.25.02.

Bureau Veritas, 21-23 Rue de l'Alma, Noumea. Tel: 27.20.31.

Lloyd's Register of Shipping, 7 Rue Anatole-France, Noumea. Tel: 27.20.83.

For all problems relating to cargo and/or vessel damages.

Draft surveys for estimation of nickel ore loads per ship.

Classification Societies:

Lloyd's Register of Shipping, Societe W. A. Johnston, 7 Rue Anatole-France, Noumea, Box 445. Tel: 27.20.83. Cables: Johnston. Telex: 070 NM.

Bureau Veritas, Societe des Etablissements Ballande, 21-23 Rue de l'Alma, Noumea, Box C4. Tel: 27.20.31. Cables: Ballande. Telex: 025 NM.

Germanischer Lloyd and Nippon Kaiji Kyokai. Bureau Naval Serve, 32 Rue Gallieni, Noumea, Box 2387. Tel: 28.25.02. Cables: Surveyor. Telex: Gemar 065 NM.

REPAIRS: Many engine, hull and electronic repairs can be effected. Slipway for small vessels. One slipway, to lift vessels of 1,000 tonnes.

CARGO GEAR: Ship's gear normally used. Possibility of hiring cranes 10 ton – 104 tons.

IDENTIFICATION CARDS: Recommended that crew carry Seamen's Books.

CONSULS: Australia, 19-21 Avenue du Marechal-Foch, Noumea. B.P. 22. Tel: 27.24.14. Cables: Austcom. Telex: 087 NM.

Belgium, 13 Rue Jules-Ferry, Noumea. Box 2683. Tel: 28.46.46.

Indonesia, 4 Rue de Strasbourg, Noumea. Box 26. Tel: 28.25.74.

New Zealand: 4 Boulevard Vauban, Noumea. Box 2219. Tel: 27.25.43. Cables: Kereru. Telex: 036 NM.

REPATRIATION: All facilities available for crew change and repatriation.

AIRPORT: Tontouta Airport situated 50 km. from Noumea. Several connections a week to all parts of the world.

TIME: GMT plus 11 hours. N.B. Daylight saving is sometimes introduced between December and February.

HOLIDAYS: 1st January, Easter Monday, 1st May, Pentecost Monday, Ascension Day, Whit Monday, 14th July, 15th August, 24th September, 1st November, 11th November, 25th December. Work may be arranged on Sundays and holidays.

POLICE/AMBULANCE/FIRE: Police, Tel: 17; Fire, Tel: 18; Ambulance, Tel: 27.21.21.

EMERGENCY CO-ORDINATION CENTRE: Call "Noumea Marine" on VHF Channel 11.

BANKS: Banque de l'Indochine et de Suez, Corner of Rue de l'Alma and Avenue du Marechal-Foch, Noumea. Box G5 Tel: 27.22.12. Cables: Indosuez. Telex: 023 NM.

Banque Nationale de Paris/Nouvelle-Caledonie. 60 Avenue de la Victorie, Noumea. Box K3. Tel: 27.55.55. Cables: Natio Par. Telex: 022 NM.

Banque de Nouvelle-Caledonie Credit Lyonnais. 75 Rue de Sebastopol, Noumea. Box L3. Tel: 28.50.69. Cables: Calbank. Telex: 091 NM.

Banque de Paris et des Pays-Bas-Nouvelle-Caledonie. Corner Rue del'Alma et Rue Georges-Clemenceau, Noumea. Box J3. Tel: 27.51.81. Cables: Paribas. Telex: 086 NM.

Societe Generale Caledonienne de Banque. 56 Avenue de la Victorie, Noumea. Box G2. Tel: 27.22.64. Cables: Pacsoge. Telex: 067 NM.

STORING: See "Prelims" page viii.

1. By Truck.
2. None.
3. Yes.
4. Yes.
5. Duty Free.
6. Yes.

WEATHER: *Wind:* The prevailing wind is the South-Easterly Tradewind blowing regularly from June to October.

N.B.: The Tradewind freshens with the sun.

Close to shore: Maximum around 1400 hours.

Open Sea: Maximum around 1800 hours.

Cyclone Season: From November to April (variable winds, rain, gusty conditions).

Rainfall: Dry season: Minimum 50 mm./month.

From January to March: Heaviest rainfall owing to the Cyclone season.

Rainfall varies between coasts depending on their exposure to winds.

Temperature: Average temperature: 24°C.

The maximum temperatures are during the month of February: 34°C.

Tides: Semi-diurnal type affected by daily inequalities. The high and low April tides are on an average 0.40 m. higher/lower than the October tides.

SHORE LEAVE: Allowed.

SHIPMASTER'S REPORT:

Communications: Radio W/T. Short wave service and MF service very good. First message to state which passage used – Draft – Tonnage – and nature of dangerous cargo, this should be sent at least 24 hours before arrival, Agent and Harbour Master required this message.

Shore Telephone. Service available as receivers can be connected.

VHF. Available to Harbour Office and pilot station during office hours 0700 to 1100 hrs. and 1300 to 1700 hrs. Monday to Friday. Pilot vessel when at Havannah Passage keeps VHF watch 1 hour before the last given ETA. In our case we made contact with the pilot vessel when 12 miles from Havannah Passage. If at anchor VHF contact to Agents can be made via Harbour Office.

Pilotage: Boarding ground. Canal de Havannah. The Pilot boards the vessel when on the leads, but inside the reef, when the vessel is off Port Goro. The 3 leading lights stand out well at night time, each light is individually powered in case of failure, in our case they were seen 25 miles away. During strong S.W'ly winds the Pilot will board in the lee of Ioro Reef. As the leads do not stand out so well in day time, night time seems to be the best arrival time. This channel has been swept to a depth of 34 ft. Strong cross currents can be expected at the entrance to Havannah Passage.

Anchorages. See CHINPACS for area dangerous due to mines. Otherwise vessel anchors Grande Rade.

Quarantine. Pratique granted by Pilot, Health Signal not required unless notifiable sickness on board.

Controlling Factors: Berthing times. Vessels are now berthed at any time, the usual side to being Starboard side, a 1,200 h.p. tug being used to assist.

Length. No limit at berth.

Berthage. 700 m. at the New Wharves.

Stevedoring. Working time. 0700 to 1100 hrs. then 1300 to 1700 hrs. and overtime from 1800 to 2200 hrs. The labour will also clean out the hatches provided one gang is actually working cargo, otherwise they stop when cargo work is all finished. Saturday is not an overtime day. Only Sunday is an overtime day. Good Friday and Easter Saturday are considered normal working days. The Stevedoring is good, with a fast working rate, but I regret to state that some pillage took place. As regards unprotected cars, the most minor marks were claimed against the vessel, these were repudiated.

Documents:

1 Cargo Manifest.
1 List of Dangerous Cargo.
2 Crew Lists.
1 Crew Personal Effects List, this list to include currency held, (French Forms accepted).
1 Bonded Stores List.
1 Health Form.

OUTPORTS: (See Plan Book).

For Ore loading vessels:

Nepoui: Lat. 21° 20.1' S., Long. 164° 25.5' E.

LOA vessel 163 m. Draft 8.7 m. Telescopic shuttle clearance 12.5 m. Loading rate 1,250 t.p.h.

1 Launch available.

Tankers: 6 in. flexible hose, weight 2 tons, 8 in. pipe-line. Pumping rate 200 t.p.h. Pressure 7 kg/sq.cm.

Thio: Lat. 21° 37.5' S., Long. 166° 15.5'E.

LOA vessel 170 m. Draft 10.8 m. Telescopic shuttle clearance 11 m. Loading rate 686 t.p.h.

1 Launch available.

Tankers: 6 in. flexible hose weight 2 tons. 6 in. pipe-line. Pumping rate 130 t.p.h. Pressure 7 kg/sq.m.

Kouaoua: Lat. 21° 24' S., Long. 165° 49.8' E.

LOA vessel 150 m. Draft 8.5 m. Telescopic shuttle clearance 10.5 m. Loading rate 628 t.p.h.

2 Launches (1 shared with Poro) available.

Poro: Lat. 21° 19' S., Long. 165° 44' E.

LOA vessel 169 m. Draft 9 m. Telescopic shuttle clearance 11.05 m. Loading rate 900 t.p.h.

2 Launches (1 shared with Kouaoua) available.

Tankers: 8 in. flexible hose, weight 2 tons. Pipe-line 6 in. Pumping rate 130 – 150 t.p.h. Pressure 7kg/sq.cm.

Baie Ugue: Lat. 21° 09' S., Long. 165° 33' E.

LOA vessel 170 m. Draft 11 m. Telescopic shuttle clearance 12 m. Loading rate 600 t.p.h.

1 Launch and 1 tug 400 h.p. available.

Loading of Ore by Lighters:

Vessels anchored in bays, sheltered from the ocean swell by the barrier reef, but not sheltered from heavy seas caused by wind.

West Coast: Poum/Paagoumene, Karembe, Teoudie, Poya, Bourail (anchorage and mooring buoy), Bay N'Go (anchorage and mooring buoy).

East Coast: Moneo, Kouaoua, Nakety, N'Goye, Ouinne (anchorage and mooring buoy).

Loading Operations: Loading is carried out under supervision of the miner and his stevedore who embarks and lodges part of his personnel on board the vessel.

1. Lighter train towed by a tug, runs a shuttle between the loading wharf and the anchored vessel. Very few powered lighters.
2. Trucks empty their load into lighters.
3. Lighters are emptied by unloading apparatus on board vessel.
4. Ore estimations (richness and humidity) are carried out on shore by the miner and a Japanese representative of O.M.I.C., and a sample is placed on board for the smelter, another sample being reserved for the Department of Mines.
5. Non-stop loading, except in some bays where tide flow inhibits loading lighters at low tide.

Loading rate: From 1,500 to 9,000 tons per day.

Depending on:

1. Whether port is sheltered or not;
2. Distance between loading point and anchorage.
3. Tide flow at lighter loading point;
4. Number of lighters and tugs used by the stevedore.

OFF-LYING ISLANDS: (See Plan Book).

Art Island – Wala Wharf: Lat. 19° 43' S., Long. 161° 19' E. Wharf orientated N.N.E./S.S.W., parallel to shore. Length 30 m. framed by 2 dolphins each 15 m. Width 7 m. Wharf top 3.50 m. above low tide. Depth 4 m. Roadway: 85 m. long, 2.7 m. wide with 2 footpaths 80 cm. wide, supporting vehicles of up to 19 tons (axle 13 tons).

Ouvea Island – Wadrilla Wharf: Lat. 20° 35' S., Long. 166° 33' E. Wharf orientated W.N.W./S.S.W., perpendicular to shore. Length 40 m. with mooring buoy 35 m. from the end. Width 7 m. Wharf top 3.5 m. above low tide. Depth 4 m. Roadway: 220 m. long, 2.7 m. wide with 1 footpath 80 cm. wide, supporting vehicles of up to 19 tons (axle 13 tons).

Lifou Island – We Wharf: Lat. 20° 55' S., Long. 167° 17' E. Wharf orientated N.E./S.W., parallel to shore. Length 40 m. prolongated to the N.E. by a dolphin 15 m. away. Width 7 m. Wharf top 3.5 m. above low tide. Depth 5.5 m. Roadway: 90 m. long, 4 m. wide, supporting vehicles of up to 19 tons (axle 13 tons).

Mare Island – Tadine Wharf: Lat. 21° 33' S., Long. 167° 53.5' E. Wharf orientated N.N.E./S.S.W. Length 48 m. with an adjacent wharf 13 m. long (150 in. lower). Width 2 m. Wharf top 2.8 m. above low tide. Depth 3 m.

Isle of Pines – Kuto Wharf: Lat. 22° 39.7' S., Long. 167° 26' E. Wharf orientated W.N.W./E.S.E., parallel to shore. Length 30 m. framed by 2 dolphins 15 m. away. Width 11 m. Wharf top 3.35 m. above low tide. Depth 4 m. Roadway: 118 m. long, 2.70 m. wide with one footpath 80 cm. wide, supporting vehicles of up to 19 tons (axle 13 tons).

Touho Bay: Lat. 20° 46.5′ S., Long. 162° 55′ E. Wharf orientated E.N.E./W.S.W., parallel to shore – 4 bollards. Length 12.6 m. Width 6.7 m. Wharf top 4 m. above low tide. Deep water at 20 m. from end of wharf.

Paagoumene Wharf: Lat. 20° 29.2′ S., Long. 164° 10.5′ E. Wharf orientated N.E./S.W. Length 15.6 m. N.E. section: Length 30.5 m. S.W. section: Length 43 m. Overlapping landing stage, 2.14 m. Wharf top 3.83 m. above low tide.

AUTHORITY: Port Autonome de Noumea, Avenue Cook, P.O.Box 14, Noumea. *Tel:* 27.59.66. *Telex:* Care of "Comin" 045 NM. *Contact:* Andre Courtot, Port Director. Jean Louis Boglio, Port Captain.

NOTES

Please also advise Shipping Guides Ltd.

New Zealand

GENERAL: All ports.

AGRICULTURE:
The New Zealand Ministry of Agriculture and Fisheries requires a Shipmaster's Bond and Guarantee (Form Ag.L35) to be completed in triplicate if vessel is carrying animals, i.e. cats, dogs, fish, birds, etc.

In addition, the Masters of all overseas vessels are required to complete in duplicate a Ship's Meat Locker Certificate (Form Ag.L36). Ship's Meat Lockers (chambers) containing prohibited meat from overseas countries are sealed on arrival at the first port in New Zealand, and must remain sealed during the vessel's stay on the New Zealand coast.

All goods of an agricultural nature are held by Customs Department until they have been inspected and a Permit to Land (Form Ag.G.78) issued by the Ministry of Agriculture and Fisheries.

Crews signing off are required to check with the Agriculture Quarantine Officer and obtain Release/Treatment of any agriculture items which they wish to take ashore.

Authority: Ministry of Agriculture & Fisheries, DFI Building, 110 Featherston Street, Wellington. *Tel:* 720-367. *Contact:* Director, Agriculture Quarantine Service.

SHIPMASTER'S REPORT:
Health: Coming from an Australian port the clean bill of health was accepted.

Documents:
2 Poison Lists (if there is poison in the cargo).
2 Reports of Pillaged Cargo (marks and numbers).

Cargo Gear: When working general cargo with derricks "in union purchase" without preventer guys, ship (via Agent) must seek an exemption from Regulation 2 (a) of the General Harbour (Safe Working Load) Regulations 1935 Amendment No. 5 by applying for dispensation from the Chief Surveyor of Ships, Marine Department, Ministry of Transport, Private Bag, Wellington.

AUCKLAND: 36.51 S. 174.45 E. (See Plan Book)

PORT LIMITS: South of a line drawn from Toroa Point to the S.W. Point of Rakino Island.

DOCUMENTS:
3 Copies Passenger List.
3 Copies Crew List.
1 Copy Search List (Form 2).
1 Copy Stores List (Form 3).
1 Copy Prohibited and Restricted Immigrants.
1 Copy Poisons List.
1 Copy Animals and Birds List.
1 Copy List of Firearms (not cargo).
1 Copy Arrival Manifest (Form 1), plus 2 for other ports visited (Reg. Form 16 refers).
1 Copy of List showing the gross tonnage of cargo for discharge in New Zealand.
3 Copies Shipmaster's Bond and Guarantee (Form Ag.L35).
2 Copies Meat Locker Declaration (Form Ag.L36).
Ship's Register to be presented to the Harbour Master on first visit.

PILOTAGE: Vessel approaching port to give 24 hours' notice by radiotelegraphy and addressed "Harbourmaster Auckland". A second notice by radiotelephone confirming or amending first to be sent 4 hours before expected time. Signal Station on Mt. Victoria, call sign "Auckland Harbour Radio", calling frequency 2182 kHz, working frequency 2012 kHz. VHF, call sign "Auckland Harbour Radio", Channel 12 and 16. Continuous listening watch on Channel 16.

Pilot launch is 20.0 m. long, single mast, painted white. Name is *Akarana*. Standard flag and lights are shown. Word "Pilot" painted in black on white above cabin. Pilots board 1 mile North of Rangitoto Beacon, but will proceed farther when necessity arises. Good pilot ladder with manrope required to within 1.5 m. of water-line with proper lighting at night. Heaving lines will be needed for mail.

ANCHORAGES: For vessels waiting Pilot: (Bearings and distances from Rangitoto Beacon). Gulf Anchorage No. 1 bearing 000° distance 2 miles; No. 2 bearing 006° distance 2.5 miles; No. 3 bearing 012° distance 3 miles.

All inner anchorages in pilotage area can be indicated by Pilot. All anchorages are in 20 m. – 33 m. with good holding ground.

RESTRICTIONS: Ships may enter harbour at any time of day or night. Main channel has least depth of 11 m. chart datum. Vessels with greater draft must wait for tide to make and enter at Harbour Master's orders. Tankers not berthing immediately on arrival anchor as directed at one of Gulf Anchorages.

See "Bridges".

MAX. SIZE: No limits, within reason, on the length or breadth. Controlling depth at chart datum: entrance 11 m.; Rangitoto Channel 11 m.; anchorages 9.8 m. – 15.0 m.; berths 6.09 m. – 12.20 m.

RADIO: Station for routing traffic to the Auckland area is Auckland Radio. Call sign ZLD. Working both W/T and R/T on continuous watches.

VHF: See "Pilotage".

RADAR: Radar station with range of 72 km. located on Mt. Victoria Lat. 36° 49′ 42″ S., Long. 174° 47′ 57″ E. Masters may call on radio telephone and request particulars of their bearing and range as shown on radar screen. Responsibility for the use of this information rests entirely with Master of vessel.

HEALTH: 12 – 24 hours before arrival time, despatch message to Port Health, Auckland. Message to state ETA, last port, and date of departure therefrom, number of crew, number of passengers and state of health and indicate if there is a doctor amongst the crew. 12 hours before arrival confirm ETA.

Doctor boards by way of vessel's shipside gangway (not pilot ladder) when in harbour. This gangway to be ready immediately on arrival in order to avoid any delay. A responsible person should meet doctor at head of gangway and conduct him to appropriate person.

Papers Required:
Completed Maritime Declaration of Health.
Derat Certificate.
Complete Crew List with dates of last smallpox vaccination.
N.B. Crew and Passenger Lists to be certified as being correct by the Master.
List of Addresses of Disembarking Passengers.
List of Dangerous Cargo on board.

Pratique is granted initially, and covers all subsequent coastal movements in New Zealand for that voyage. Radio Pratique can be granted only after prior approval from New Zealand Health Department.

Vessels requesting Pratique should exhibit appropriate International Code Signals by day and night until Pratique is granted.

TUGS: 4 tugs available. Tugs join vessel East of Eastern Tide Wall. Tugs supply lines at no extra charge.

BERTHING: Tankers berthing at Eastern Tide Wall, BP Depot, must berth in accordance with weather and tidal conditions. Tankers must arrive at pilot station not later than 30 minutes before sunset, otherwise berthing will be postponed until following morning.

Depth of water: Bledisloe 10 m.; Captain Cook 8 m. – 10.5 m.; Eastern Tide Wall 10 m. – 10.5 m.; Hobson 4 m. – 6 m.; Jellicoe 10 m. – 11 m.; Marsden 3.5 m. – 8 m.; Princes 9 m. – 11 m.; Queens 9 m. – 10.5 m.; Wynyard 9 m. – 11 m.; Freyberg 10 m. – 11 m.; Fergusson 11 m. – 12.2 m.

CRANES: At Fergusson Container Terminal there is 1 twin lift container crane of 45.72 tonnes capacity and 2 single lift container cranes of 40.64 tonnes capacity. In the conventional cargo port quay-side cranes of 3 or 5 tonne capacity are provided at all except 2 berths. At the bulk fertiliser berth there are four 5 tonne capacity multi-wire grabbing cranes and at the bulk sugar berth there is a 5 tonne capacity gantry grabbing crane. Self propelled floating crane 101.6 tonnes capacity.

BULK CARGO FACILITIES: *Cement:* A special berth is provided where bulk cement is discharged pneumatically via pipe-line to privately owned silos. Depth at chart datum 6.0 m., quay length 94 m.

Sugar: Bulk sugar is discharged at Chelsea Wharf. This wharf is equipped with a 5 tonne capacity gantry grabbing crane and a conveyor system connected to the refinery store. Depth at chart datum 9.9 m. Quay length 91 m.

1 berth is set aside for the discharge of bulk fertiliser bases. 4×5 tonne capacity multi-wire grabbing cranes and 4 rail mounted hoppers of 10.7 cu.m. capacity are available. Depth at chart datum 11.0 m. Quay length 335 m.

4 other berths can also be made available for discharge of dry bulk cargo as required.

See "Bridges".

SPECIALISED CARGO HANDLING FACILITIES:
Tanker Terminals: 2 berths are at a continuous quay 486 m. long, depth at chart datum 9 m. – 11 m. The third is a dolphin berth, depth at chart datum 10.5 m. All the berths are connected by pipe-line to adjacent tank farms.

Container and Ro/Ro Facilities: Fergusson Wharf Container Terminal: Quay length 610 m. Depth at chart datum 12.2 m. The terminal is equipped with 3 Vickers Hoskins/Paceco gantry container cranes, 2 single lifts of 40.64 tonnes capacity and a twin lift of 45.72 tonnes capacity. Total back-up area of the terminal is 21.71 hectares of which 17.41 hectares is used for container handling and storage and 4.30 hectares is used for container repairs and LCL containers. Included in the latter area is the Monash Street Container Base which provides 7,432 sq.m. of covered transit storage for LCL cargo. Rail exchange sidings are located immediately adjacent to the terminal. There are power outlets for 1,424 refrigerated containers. Container terminal equipment includes 17 straddle carriers as well as various tractors, trailers and fork lift trucks. The terminal is operated by the Auckland Harbour Board.

Freyberg Wharf: A common user Ro/Ro berth for quarter ramp vessels up to 228 m. in length is provided at Freyberg Wharf.

Bledisloe Roll-on Terminal: Quay length No. 1 Berth 137 m., No. 2 Berth 224 m. Depth at chart datum 9.5 m. Each berth is equipped with a link span with a fork lift axle load capacity of 56.9 tonnes and a low loader capacity of 182.9 tonnes. No. 2 Berth can accept ships equipped with a port quarter ramp. A total back-up area of 4.8 hectares is provided including a cargo shelter of 4,000 sq.m. and rail exchange sidings. The terminal is operated by Union Steam Ship Company.

BRIDGES: Navigation in daylight hours only under Auckland Harbour Bridge. Navigation span is 45.2 m. – 43 m. above MHWS for 76 m. each side of centre. Only ships berthing at Chelsea Wharf sugar berth need pass under the bridge.

STEVEDORES: Labour commences at 0730 hrs. In order to ensure labour for this time ETA should be received at Agent's office before 1500 hrs. previous day, or before 1500 hrs. previous Friday for a Monday start. Delays on radio messages may be up to 3 hours.

MEDICAL: In case of urgent medical attention being required, Agents can arrange for doctor to board in stream at any notice. Hospital and ambulance services available 24 hours.

TANKERS: See "Special Cargo Handling Facilities".

Any size pipe-lines can be used, oil companies have all reducing pieces needed.

No facilities for slop discharge.

DENSITY: Always 1025.

FRESH WATER: Fresh water always available. Delivery rate 80 t.p.h., through canvas hoses. AHB supplies all equipment.

FUEL: Light fuel oil, diesel, gas oil and heavy fuel are available. To be ordered in ETA notice.

FIRE PRECAUTIONS: In addition to usual precautions, Class I tankers are under extra security with a nightwatchman from Harbour Master's staff in addition to the normal tanker guard.

CONSULS: (Consuls, Trade Commissioners, etc.): Australia, Belgium, Brazil, Great Britain, Costa Rica, Denmark, El Salvador, Fiji, Finland, France, Germany (West), Greece, Ireland, Italy, Japan, Korea (South), Nauru, Netherlands, Norway, Peru, Philippines, Portugal, Sweden, Switzerland, Tonga, Turkey, U.S.A., Venezuela, Western Samoa.

REPAIRS: Any ship repairs can be carried out. A slipway can take vessels of 600 tons displacement and up to 64 m. LOA.

DRY DOCKS: Max. size of vessel that can be accommodated in Calliope Dry Dock is 181.35 m. LOA and 19.6 m. beam. Water on sill at MHWS 10 m.

SURVEYORS: American Bureau of Shipping, Bureau Veritas (Paris), China Corporation Register of Shipping, Det Norske Veritas, Germanischer Lloyd, Lloyd's Register of Shipping, Nippon Kaiji Kyokai, Registro Italiano Navale, USSR Register of Shipping.

GANGWAY/DECK WATCHMEN: Watchmen are necessary. Best to use crew.

OPENING/CLOSING HATCHES: Crew open completely mechanical hatches only. All other hatches opened by waterside workers.

CERTIFICATES: Register, Derat, Load Line, Safety Equipment, Safety Radio, Articles of Agreement, are main Certificates required.

CUSTOMS ALLOWANCES: 1 bottle of spirit (in use) *or* 1 bottle of wine (in use) *and* 12 quart bottles (or the equivalent) of beer, 200 cigarettes *or* half a pound of tobacco *or* 50 cigars. For ship use only. To be declared on Search List. Also gifts up to a total value of $10.0 may be landed.

CARGO GEAR: Preventer guys must be entirely wire. All blocks and shackles must be moused. Safety strops on all heel blocks. All wires, ropes, chains and blocks to have Certificate of Test.

REPATRIATION: All facilities exist for repatriation.

AIRPORT: 23 km. from harbour to airport. Served by all major international airlines.

TIME: Local time is GMT plus 12 hours, add 1 hour for Summertime, October to March.

HOLIDAYS: Only the Container Terminal works during the following holidays. New Year's Day (1st January); Good Friday; Easter Monday; Anzac Day (25th April); Queen's Birthday (first Monday in June); Labour Day (fourth Monday in October); Christmas Day; Boxing Day; Waitangi Day early February. In addition, each Province has an Anniversary Day and a Waterside Workers' Picnic Day. In Auckland these are in last half January.

POLICE/AMBULANCE/FIRE: All emergency services are called through one telephone number. Dial 111 and state service required.

TELEPHONES: Telephones at all berths. Cost is $3.02 fee phone per day, plus the cost of any overtime incurred in connecting or disconnecting any such telephone. Telephones (coin operated) may be hired for use of crew on application to Post Office.

SERVICES: Services include tank cleaning, compass adjusting, all cargo surveying, average adjusting, etc. Tank washings may be pumped to road tankers.

GENERAL: *Refuse Disposal:*

It is important that no refuse be allowed to pass into tidal waters either directly or indirectly. This is covered by strict Government Regulation.

Masters should ensure that refuse is lowered into refuse boat "Manui" and not thrown into boat from any great height.

No refuse will be collected from stern of vessel as this is hazardous for collection craft. A suitable site in way of the flat side of the vessel on off shoreside should be chosen.

SHORE LEAVE: Crew members may go ashore.

IDENTIFICATION CARDS: Not required.

REGULATIONS: All guests aboard vessel in the evening must have passes signed by the Master. All visitors' passes expire at 2300 hrs. All ships in port are subject to the Rules and Regulations contained in the Harbours Act 1950, and the By-laws of the Auckland Harbour Board. On first visit to the Port copies of these and other relevant Regulations are supplied to ships.

DELAYS: Average delay 10 hours for container ships. Seldom any delays awaiting other berths.

DEVELOPMENTS: Kings Wharf – a heavy duty quay is under construction, depth 12.2 m. completion late 1985.

Rangitotd Channel to be dredged in 1985-87.

AUTHORITY: Auckland Harbour Board, 1 Queen Street, P.O.Box 1259, Auckland, New Zealand. *Tel:* 795-950. *Telex:* NZ 2705. *Cables:* Haboard, Auckland. *Contact:* J. M. Halling, Chief Administrative Officer and Secretary.

BLUFF: 46.37 S. 168.22 E. (See Plan Book)

DOCUMENTS: See "Auckland".

PILOTAGE: Pilotage is compulsory. Pilots board vessels from launch in position Lat. 46° 39′ S., Long. 168° 21′ E. Arrangements regarding boarding will be made by radio-telephony, wireless-telegraphy or visual signal from signal station at Stirling Point.

Vessels, other than those which are exempt from pilotage, must not proceed within the pilotage area without a Pilot.

A 24 hour pilotage service for tidal conditions. Vessels generally enter and leave the port at slack HW and slack LW.

Caution: Vessels stopping to pick up a Pilot are particularly warned not to approach entrance shoal too closely, especially during flood stream as stream sets strongly on to entrance shoal, North-Eastward.

Coastal Pilots: Coastal Pilots are available on 24 hours' notice for piloting service from Tairoa Head to Milford Sound.

ANCHORAGE:

Southward of Stirling Point: In fine weather, vessels missing tide ma anchor in 10 to 12 fathoms with Stirling Point lighthouse bearing abou 356° and Dog Island lighthouse bearing about 108°.

Eastward of Dog Island: Anchorage for vessels delayed longer tha 6 hours awaiting to enter Bluff is situated 5 miles East of Dog Island.

Safe anchorage in heavy Westerly weather may be found off the N.W coast of Stewart Island between Otaku Point and Gull Rocks, position Lat. 46° 47′ S., Long. 168° 02′ E.

RESTRICTIONS: The safest time to enter the harbour is at slack water Strict attention should be paid to signals passed from the signal station on Stirling Point. No vessel should attempt to enter without a Pilot unless possessing local knowledge.

Least depth in fairway is 8.53 m. on Northern edge of Channel Rocks also 7.62 m. (about 1 cable West North-Westward of the tidal beacon).

MAX. SIZE: Length 198 m., beam 29 m. Vessels of over 182 m. length and/or 28 m. beam are restricted to HW arrival and departure. Vessels up to Panamax size 225 m.×33 m. will be handled at a reduced draft a the Harbour Master's discretion.

Max. draft is 9.15 m. ordinary HW and up to 9.6 m. at HW Springs. LW max. draft is 6.7 m. up to 7.2 m. at Neap tides.

The Board has been carrying out extensive blasting and dredging in the entrance channel and it is anticipated that a further increase in the present port draft of 9.15 m. in the entrance channel will be made bu this will be publicised at the time when it can be confirmed.

HEALTH: Radio Pratique available at Berth.

RADIO: A signal station is situated on Stirling Point and is connected by telephone with harbour officials. A continuous watch is maintained and vessels can communicate by the International Code of Signals or the Morse Code. There is a radio-telephone at signal station. Call sign is "Bluff Harbour Radio", calling frequency is 2,182 kHz, and the working frequency is 2,012 kHz. VHF radio having Channels 16 and 12. A continuous watch is maintained on 2,182 kHz and VHF Channels 16 and 12.

TUGS: Two tugs are available. Both twin-propulsion Voith Schneider vessels of 1,200 i.h.p. and 15.3 tons static pull and 2,600 h.p. and 30 tons. Both vessels are equipped for fire fighting and salvage. Tugs supply towing lines.

BERTHING:

Wharves	*Length Wharf* (m.)	*Max. Length Vessel* (m.)	*Berth Depth MLWS* (m.)	*Max. Draft* (m.)	*Deck Above MLWS* (m.)
Island Harbour No. 1	160	150	8.0	7.7	4.37

Town Wharf No. 12	183	180	9.0	8.7	3.46
Town Wharf No. 14	157	140	8.3	8.0	3.46
Ferry Wharf	200	150	7.0	6.5	4.19
Tiwai Wharf – (273 m. including mooring dolphin)	200	250	11.0	10.5	5.68

All Island Harbour Berths except Nos. 6, 7 and 8 have rail access. Rail access to Nos. 12 and 14 limited. No rail at Tiwai Wharf.

Bulk phosphate or sulphur cargoes are discharged at Berth Nos. 11 or 12 into hoppers thence road trucks.

A Ro/Ro linkspan is situated at Berth No. 1.

A bulk grain facility serves Berth No. 2. Silo capacity 6,600 tonnes, loading rate 500 tonnes/p.h. Bulk tallow is loaded at Berth Nos. 3 and 3A. Ten storage tanks with total capacity of 4,775 tonnes are connected to ship's side by a 300 mm. diameter heated pipe-line giving a loading rate of 400 tonnes/p.h.

Four all weather meat-loaders are situated at Berth No. 5.

Berth No. 8 is a bulk woodchip loading facility (via conveyor) and also serves the log and sawn timber trade.

Bulk cargoes for Tiwai Aluminium Smelter are discharged at the Tiwai Wharf by a mobile twin unit pneumatic unloader with a capacity of 300 tonnes/p.h.

STEVEDORES: Agents require ETA in advance to arrange labour for cargo handling.

MEDICAL: Port doctor available through Agents. Nearest hospital is at Invercargill City, 16 miles from Bluff. Medical service whilst at sea through Awarua radio.

TANKERS: Tankers are berthed at Berth No. 11 only, Town wharf. Side connections are to be used. Only 1 pipe-line connection on wharf. Black products are handled through 250 mm. lines, white products through 200 mm. lines.

It is not permitted to commence the discharge of oil cargoes during the hours of darkness. No vessel carrying a cargo of motor spirit or having discharged such cargo will be handled during the hours of darkness.

Oil cargoes for Tiwai Point discharged at Tiwai Wharf via manifold and 300 mm. pipe-line.

DENSITY: 1025.

FUEL: Bunkering facilities are available. Boiler fuel is supplied by 8 in. diameter pipe-line located at Berth No. 11, Town wharf. Delivery rate 240 t.p.h. Limited quantities of coal, light diesel oil and lubricating oil can be arranged for delivery by road or rail to the wharves.

Gas oil available by pipe-line at Berth Nos. 11, 12 and 14 and by road tanker at all other berths.

FRESH WATER: Available alongside all berths, rate 20 tonnes/p.h.
GANGWAY/DECK WATCHMEN: Available.
OPENING/CLOSING HATCHES: Usually carried out by stevedores, by crew if automatic hatches.
CUSTOMS ALLOWANCES: See "Auckland".
IDENTIFICATION CARDS: Not required.
DRY DOCKS: The Board operates a "Syncrolift" docking facility capable of accommodating vessels with a displacement up to 1,000 tonnes on a platform 40.3 m. × 13.4 m. The installation is designed for future extension to a capacity of 1,700 tonnes on a platform 65.6 m. × 13.4 m.
REPAIRS: Major repair work can be undertaken by the following: 2 small machine shops at Bluff; a foundry at Invercargill; a slipway for vessels of up to 500 tons displacement at Bluff. A diver is available for underwater inspections through Agents.
REPATRIATION: Facilities exist.
AIRPORT: Internal air services from City Airport, Invercargill, 16 miles by road connecting with international airports of Christchurch, Wellington and Auckland.
TIME: GMT plus 12 hours. Summer Time GMT plus 13 hours from November to February inclusive.
HOLIDAYS: Christmas Day; Boxing Day; New Year's Day; Second of January; Watersiders' Picnic Day (4th Monday, January); Good Friday; Easter Saturday (except by special arrangement); Easter Monday; Easter Tuesday; Labour Day; Anzac Day; Reigning Sovereign's Birthday.
POLICE/AMBULANCE/FIRE:

	Tel. *(Emergency)*	*(Other)*
Ambulance	Bluff 111	Inv'gill 81-949
Police	Bluff 111	8844
Fire Brigade	Bluff 111	

TELEPHONES: By arrangement, all vessels can be connected with telephone system.
SERVICES: Compass adjusting, refuse collection daily.
SHORE LEAVE: Allowed.
AUTHORITY: Southland Harbour Board, P.O.Box 1, Bluff, New Zealand. *Tel:* Bluff 8159. *Telex:* 5206 Onebluf NZ. *Cables:* "Harbluff" for general messages or "Harbour Master Bluff" for arrival messages. *Contact:* Captain J. A. Henderson, Operations Manager. Captain L. Mounsey, Harbour Master.

GISBORNE: 38.42 S. 178.02 E. (See Plan Book)

PORT LIMITS: All of Poverty Bay within a line from the Northern point of Young Nick's Head to Tuaheni Point.
DOCUMENTS: See "Auckland".
PILOTAGE: Telegraphic address – Harbour Master, Gisborne. Advance notice – 24 hours before ETA and further confirmed at 4 hours before ETA. VHF Channel 16 and 12.

Pilot boat is painted white with word "Pilots" on both sides, 13.71 m. in length; exhibits pilot flag or lights. Pilot boards on line of leads (332°) 2 miles from breakwater light.
ANCHORAGE: Vessels awaiting Pilot and berth anchor with Tuaheni Light bearing 084° 3.2 miles in 18.29 m. of water.
RESTRICTIONS: Vessels may be berthed at night according to size, draft and weather conditions.
MAX. SIZE: Maximum length 173.72 m. Beam, no restriction. Draft, 8.23 m. at HW, 6.7 m. at LW. Contact Harbour Master for current situation as there can be slight variations according to heights of tide and weather conditions.
HEALTH: Same procedure as "Auckland".
RADIO: Auckland Radio ZLD, Wellington ZLW.
VHF: Signal station not permanently manned. Listening watch Monday–Friday 0800 – 0815 hrs.; 1130 – 1145 hrs.; 1330 – 1345 hrs.; 1600 – 1615 hrs. Signalman in attendance 1 hour before vessel's arrival. Call sign: "Gisborne Harbour Radio", Channel 16 and 12.
TUGS: Tug joins vessels in channel outside breakwater. Normally use tug's lines, no extra charge.

A twin screw Schottel Rudder/Propeller 22 m. steel tug is in service. Bollard pull 14 tonnes, 1,000 h.p.
BERTHING: 213.35 m. at 9.75 m. depth at LW; 426.7 m. at 5.49 m. – 6.1 m. depth at LW.
Moorings: Shore hawsers placed on vessels on arrival.
SPECIALISED CARGO FACILITIES: Two 1,000 tons silos for bulk grain, etc. behind No. 7 berth and a conveyor for loading grain, etc. in ships. Loading rate 400 t.p.h. There is also a fish unloader, rate 40 t.p.h.
STEVEDORES: Advice of ETA and particulars of stowage required in order that required number of gangs can be ordered. Hours of work, Monday to Friday, 0700 – 1200 hrs., 1300 – 1800 hrs.; Saturday, 0700 – 1200 hrs.
MEDICAL: No advance advice required for medical attention. Full hospital facilities available.
TANKERS: Tankers discharge fuel oil and bitumen.
DENSITY: 1025 at all stages of tide.
FRESH WATER: Available by 63 mm. (2.5 in.) hoses at approx. 20 t.p.h. per hose.
FUEL: Fuel is at present only available by rail tanker and should be ordered through ship's Agent in advance.
GANGWAY/DECK WATCHMEN: Ships provide own watchmen.
OPENING/CLOSING HATCHES: Stevedores normally carry this out.
CUSTOMS ALLOWANCES: See "Auckland".
IDENTIFICATION CARDS: Not required.
CONSULS: None.
REPAIRS: Normal maintenance repairs.
SURVEYORS: 1. Ministry of Transport Surveyors in Napier for grain cargo. Private surveyors available in Gisborne.
2. Lloyd's Register available on request, also A.B. Shipping.
DRY DOCKS: One 400 ton slipway.
REPATRIATION: Full facilities available for effecting crew changes and repatriation. However, no seaman's pool operating at Gisborne. Replacement crew must be obtained from either Auckland or Wellington.
AIRPORT: 3.5 miles. Regular internal service.
TIME: Standard Time is 12 hours ahead of GMT. Daylight time GMT plus 13 hours from last Sunday in October to first Sunday in March normally.
EMERGENCY CO-ORDINATION CENTRE: Local Police Station for minor emergency operations otherwise all Search and Rescue Co-ordinated from Wellington.

Local Police	Tel: 82119 or 111
Wellington S.A.R.	Tel: 721 – 253

STORING: See "Prelims" Page viii.
1. By truck or launch – only.
2. Not applicable.
3. Trucks can come alongside at berths, only restricted for Tankers.
4. Fork Lifts available and used.
5. Customs clearance required for bonded goods.
6. Yes.

AUTHORITY: Gisborne Harbour Board, P.O.Box 549, Gisborne, New Zealand. *Tel:* 85129. *Telex:* None. *Cables:* Harbour Board. *Contact:* Captain R. T. W. Dunn, Harbour Master. Mr. T. N. Gedye, Secretary/Manager.

LYTTELTON: 43.35 S. 172.42 E. (See Plan Book)

PORT LIMITS: All those tidal waters of the Port of Lyttelton comprised within the area enclosed by the arc of a circle having a radius of 3 nautical miles from the Northernmost point of Adderley Head.
DOCUMENTS: Customs procedure: Overseas vessels, on arrival in New Zealand, should have following papers ready to produce to Customs Officers:

Particulars of Ship's Certificates.
List of Persistent Oils (Tankers only).
Notification of Liability to pay entry tax (Fishing vessels only).
Register.
Names of Owners and Agents.
Crew List.
Passenger List.
List of Prohibited or Restricted Immigrants.
Search List.
Stores List.
List of any stock or birds on board.
List of Poisons.
List of Firearms.
Statement of excess Tonnage of Cargo.
Statement of quantity of Fuel Oil in double bottoms.
Declarations by Passengers arriving in New Zealand.
Baggage Declarations by Passengers for duty purposes.

On departure for overseas, Master or his Agent is required to produce:

Manifest of Cargo.
Stores List.
Crew List.
Passenger List (if any).
Clearance from the Marine Department (if a British ship).

A home trade vessel under *transire* is required to produce her cargo book to Collector of Customs and such particulars as to passengers, crew, and cargo as the Collector may at any time demand. Cargo book shall contain name and port of registry of ship, Name of Master, and date of arrival at, and departure from each port. Particulars as to dates of arrival and departure must be entered not later than 24 hours after time of such arrivals and departures.
PILOTAGE: Masters requiring services of a Pilot must notify Harbour Master of their estimated time of arrival and maximum draft not later than 1600 hrs. on day prior to arrival (Monday to Friday). If estimated time of arrival is on a Saturday, Sunday or any public holiday which falls on a Monday, notification must be given before 1600 hrs. on previous Friday. International Code of Signals or Morse Code used for communicating with signal station. Station also equipped with radio telephone. Call sign is "Lyttelton Harbour Radio", calling frequencies is 2182 kHz and working frequencies are 2012 kHz and 2162 kHz, a continuous listening watch being maintained. Radio telephone equipment also installed in the tug, pilot cutter and Harbour Master's office, and same call signs, frequencies and watches are employed. VHF in operation on International Channels 12, 14 and 16.

Pilot vessel is 16.46 m. in length. Equipped with radar, radio telephone and echo sounder. The pilot vessel is located at the tug wharf in inner harbour and any vessel awaiting arrival of the Pilot, should anchor about 1.5 miles to seaward of Godley Heads, in a depth of 16 m. to 18 m. and await instructions.

The limit of pilotage is a line joining Godley and Adderley Heads.

Every facility must be provided to ensure safe boarding of the Pilot.
ANCHORAGES: *Camp Bay:* Permission must be obtained from the Harbour Master before using this anchorage and draft of vessel is restricted to 8.5 m. All vessels drawing more than 8.5 m., whether awaiting a Pilot or not, must use the outside anchorage. Vessels using Camp Bay anchorage should anchor with the anchorage lighted leading beacons, situated on the Southern shore of Camp Bay, in transit, bearing 195.5°. Each beacon is painted white and exhibits a fixed red light. Vessels may anchor to the Westward of this bearing but must not proceed Westward of a line bearing 345° from the rear anchorage beacon.
Note: Anchoring in or near the dredged channel which extends 2 km. inside Heads is not permitted.

Also see "Pilotage".

RESTRICTIONS: Tankers are berthed during hours of daylight only. All vessels can depart from their berths during hours of darkness. Vessels holding pilotage exemptions may also enter or depart during the hours of darkness.

The following are the controlling depths at mean low water springs, mud bottom in each case;

Entrance to port 14.6 m.
Dredged channel 11.60 m.
Inside anchorage 11.0 m. (Camp Bay)
Approaches to berth 11.6 m. – 9.8 m.
Alongside berths 12.20 m. – 8.60 m.

MAX. SIZE: Max. draft permissible for entering or leaving: 11.60 m. at high water and 9.75 m. at low water. Vessels drawing less than 9.75 m. can enter at any state of the tide. Max. size permissible for entry: length 260 m. at Cashin Quay, any additional length contact Harbour Master, 230 m. at Inner Harbour. No limit on vessel's beam.

HEALTH: Master of every ship about to enter a New Zealand port shall, not later than 12 hours and not earlier than 24 hours before expected time of arrival at that port, inform Port Health Officer by radio of last port of call, date of departure therefrom, and state of health of vessel.

Arrival of vessels: On arrival, vessel showing International Code quarantine signal, should proceed to inspection area to await arrival of Port Health Officer. Inspections are normally carried out at berth.

Radio Pratique: Certain ships may be granted Pratique by radio and hence need not be visited by a Port Health Officer, provided that medical officer carried as part of ship's complement.

Maritime Declaration of Health: Masters of all vessels arriving in New Zealand from any port beyond New Zealand shall complete and deliver to Port Health's Officer a Maritime Declaration of Health countersigned by the ship's medical officer, if required.

Crew List and Passenger List: Master of every ship liable to quarantine should be prepared to furnish Port Health Officer a list of all passengers, showing in respect of each passenger, name, sex, race, age, and port of embarkation; and a list of crew giving the name, nationality, and rating of each member.

RADIO: Wellington Radio, call sign ZLW; Awarua, call sign ZLB; or Auckland, call sign ZLO.

TUGS: Normally join vessel at Parsons Rock Beacon. Tug lines are used, charge for which is included in the overall hire for tug. Number of tugs required depends on type of vessel and draft.

BERTHING: Requirements for berthing at Berths 2, 3, 4, 5, 6 and 7 for vessels over 1,000 tons net are; bow out, the anchor to be used and gangway turned in until vessel secured at berth.

STEVEDORES: Waterside labour can be ordered after arrival of ship at 0630 hrs. up to 0900 hrs. For work on Saturdays orders must be placed by 0900 hrs. Friday. Saturday afternoon work to be ordered by 1030 hrs. Saturday.

For supplementary hours labour must be requisitioned by 1500 hrs. previous Friday and confirmed by 0700 hrs. Monday and daily.

SPECIALISED CARGO HANDLING FACILITIES:

No. 1 Cashin Quay: Grain silos. 2,000 tons capacity, 400 t.p.h. loading rate for coastal and overseas shipments. Bulk Loading Facilities: Woodchips, grain and coal.

No. 2 East: Bulk cargo discharges: 6×5 ton electric cranes, 3×100 ton mobile bulk hoppers.

No. 3 Cashin Quay: Lo-Lo Container Terminal.

Gladstone Pier, West: Roll-on/Roll-off Coastal and Trans-Tasman Cargo Terminal.

No. 2 Jetty West, Inner Harbour: Roll-on/Roll-off, Passengers and Cargo Terminal.

Also see "Developments".

MEDICAL: Hospital facilities are available at Christchurch, 12 km. from port, and international regulations apply in regard to inoculations, vaccinations, etc. Agents can be notified at any time of medical allocation required, preferably with 24 hours' notice.

TANKERS: All tankers berth alongside oil wharf in Inner Harbour. One berth only is available with a max. draft of 11.60 m. A 10 in. line is used for discharging and loading with suitable fittings for reduction to 8 in. Slop or oily residue facilities are not available.

Oil hoses can be connected and disconnected during hours of darkness with Harbour Master's permission. Side connections are connected to discharging arms situated at the middle of the oil wharf.

Berthing is generally starboard to, head out.

DENSITY: 1025, salt water.

FRESH WATER: Available at all berths delivered by hose at a discharge rate of 20 t.p.h.

FUEL: Bunkering facilities available. Boiler fuel oil, supplied by 4 in. and 6 in. diameter bunker hose connected to an 8 in. diameter pipe-line, located on the oil wharf.

FIRE PRECAUTIONS: Tankers are not permitted to immobilise engines at the oil wharf. Repairs may be carried out at other wharves with Harbour Master's permission. Boiler and galley fires are not required to be extinguished when loading or discharging. All scuppers are to be plugged and cemented in case of spillages.

GANGWAY/DECK WATCHMEN: All ships must be provided with a watchman whilst at oil wharf; a shore watchman is also required. Watchmen can be ordered at any time by contacting Union Maritime Services, Lyttelton 7149.

OPENING/CLOSING HATCHES: This work is carried out by waterside labour.

CUSTOMS ALLOWANCES: 8 ounces and/or 200 cigarettes per man. 1 bottle of wine and/or 1 bottle of spirits per man.

IDENTIFICATION CARDS: Passes are necessary at oil wharf but not required otherwise.

CONSULS: At Christchurch.

France	60-085	Sweden	65-179
		U.S.A.	65-864

REPAIRS: Major work can be undertaken at Lyttelton where a machine shop and foundry are available.

DRY DOCK: A graving dock is available for vessels up to 6,500 gross tons and dimensions of dock are: Floor length 137.15 m., top length 146.75 m., top width 25 m., entrance width 18.90 m., width in way of ship's bilge 16.61 m., sill depth at MHWS 6.63 m. Max. draft entering drydock 5.0 m. A patent slip is available for vessels up to 231 tons.

REPATRIATION: Facilities available.

AIRPORT: Distance from Christchurch – 6 miles, served by regular airlines.

TIME: Local time is 12 hours ahead of GMT. N.Z. daylight time from 0200 hrs. (NZST) on last Sunday in October until 0200 hrs. (NZST) on the first Sunday in March – 13 hours ahead of GMT.

HOLIDAYS: Holidays throughout year shall be New Year's Day; Anzac Day; Provincial Anniversary Day; Waitangi Day; Good Friday; Easter Monday; Labour Day; Birthday of Reigning Sovereign; Christmas Day; Boxing Day; and the Harbour Board's employees picnic day (to be held on same day as the Waterside Workers' Union picnic day. No cargo work is carried out on these days.)

POLICE/AMBULANCE/FIRE: For emergency calls from ship's telephones, dial 111 and ask the operator for service required.

TELEPHONES: Arrangements can be made with Harbour Master for telephones to be placed on board.

SERVICES: Tank cleaning and tank washing facilities are available as well as a compass adjuster.

SHORE LEAVE: Crew members are allowed ashore.

DEVELOPMENTS: The container terminal at Cashin Quay No. 3 was first used by "ACT 2" in June 1977 and has the following facilities: Heavy duty berth 285 m., depth alongside 12.6 m., draft 11.6 m., terminal area 8ha, container slots 1600 stacked two high, 546 reefer electrical connections, one Paceco 40 tonne single-lift container crane, seven Clark No. 520 straddle carriers – forklifts, container washing and repairs, CFS – No. 2 transit shed 6680 sq.m., Operator – Lyttelton Harbour Board.

AUTHORITY: Lyttelton Harbour Board, P.O.Box 2108, 297 Madras Street, Christchurch, New Zealand. *Tel:* 793800. *Telex:* NZ 4141. *Cables:* Harbaboard. *Contact:* I. B. Brokenshire, General Manager. P. G. Morgan, Market Manager.

NAPIER: 39.29 S. 176.54 E. (See Plan Book)

DOCUMENTS: See "Auckland".

PILOTAGE: Pilotage is compulsory. Refer to New Zealand Port Information Manual Part I, Admiralty Pilot No. 51 (New Zealand Pilot), Chart NZ5713.

ANCHORAGES: No. 1 Anchorage – 2 miles East of breakwater with Southern Leading Beacons in line. 9.5 fathoms, sand, mud.

No. 2 Anchorage – 1 mile NE of North Pania Buoy with Northern Leading Beacons in line. 11 fathoms, sand.

RESTRICTIONS: Vessels are berthed between 0500 hrs. and sunset. Other times by arrangement. Vessels up to 8.6 m. draft may berth at any state of tide.

MAX. SIZE: Max. LOA 230 m.; beam, no limit; draft, 10.4 m.

HEALTH: Cable Port Health Napier 24 hours before arrival. Port Health will board on arrival.

RADIO: Radio telephone - Napier Watch tower listens on 2182 kHz for 15 minutes. Call sign "Napier Harbour Radio ZMH 75" at following times; 0400, 0800, 1200, 1600, 2000, 2400 hrs., and by arrangement. Working frequency is 2162 kHz. VHF listening watch as above for R/T and continuous during office hours.

TUGS: Two tugs available.

BERTHING: Vessels at max. draft limited to HW for arrival and/or departure. Vessel's ETA must be given to Harbour Master, Napier, 24 hours before arrival or on departure from previous port if less than 24 hours, and amended 4 hours prior to arrival. Max. draft arrival to be included.

Vessels arriving during a weekend, ETA to be given by 1500 hrs. Friday and at 1500 hrs. on a day preceding a public holiday.

SPECIALISED CARGO FACILITIES: *Woodpulp Storage:* Adjacent Higgins Wharf, Shed Nos. 7 and 9. Total capacity, 49,000 tons.

Bulk Fertiliser Storage: Adjacent Higgins Wharf, Shed No. 8 – rock phosphate, capacity 60,000 tons; Shed No. 10 – fertiliser bases, capacity 32,000 cu.m.

General Cargo Sheds: Adjacent Geddis, Herrick & Kirkpatrick Wharves, Shed Nos. 1, 2 and 3, size 5,300 sq.m.

Container Packing/Devanning: Adjacent Kirkpatrick Wharf, Shed No. 5, size 3,000 sq.m.

Electric power and storage for 240×20 ft. reefers. 4 acre paved dry box yard. Serviced cleaning yard for 20×20 ft. reefers.

Tanks for tallow and edible oils.

Cement Silos.

STEVEDORES: ETA required for discharging ships 24 hours before arrival. Loading ships 48 hours before arrival with proposed stowages and vacant spaces. Advise number of gangs able to work. All work done by ship's gear.

MEDICAL: No prior notice required for medical attention. Hospital facilities available. Advice would be needed of any contagious disease on board in advance, in accordance with Port Health Regulations.

TANKERS: Standard size discharge lines. All connections supplied by oil companies. 5 berths available: 2, max. length 200 m., draft 10.4 m.; 1, max. length 230 m., draft 10.0 m.; 2, max. length 180 m., draft 9.2 m.

DENSITY: Variable, generally 1020 – 1025.

FRESH WATER: Available all berths 20 t.p.h. per hose.

FUEL: 220 and 1,000 sec. Oil available ex-pipe-line at 110 t.p.h. Marine diesel and gas oil ex-road tanker. All at immediate notice. Lubricating oil available. 1 week's notice. Residue service available when tank vessels discharging/loading or having hazardous goods in transit.

FIRE PRECAUTIONS: Watchman supplied on wharf at ship's expense.
GANGWAY/DECK WATCHMEN: All ships must have gangway watchmen. Cargo and deck watchmen available on request.
OPENING/CLOSING HATCHES: Hatches normally opened and closed by stevedores unless automatic type.
CERTIFICATES:
Ship's Register.
Health Certificate.
Cargo Safety Certificate.
Radio Safety Certificate.
Load Line Certificate.
CUSTOMS ALLOWANCES: See "Auckland".
IDENTIFICATION CARDS: Not required.
REPAIRS: First class service available.
REPATRIATION: On arrangement with Customs and vessel's Agents.
AIRPORT: Hawke's Bay Airport, served by internal airline 3 miles from port.
TIME: Winter GMT plus 12 hours. Summer GMT plus 13 hours.
HOLIDAYS: New Year's Day; 2nd January; Picnic Day (last Monday in January); Anniversary Day (2nd to last Monday in January); Good Friday; Easter Monday; Anzac Day (25th April); Queen's Birthday (1st Monday in June); Labour Day (nearest Monday 25th October); Christmas Day; Boxing Day. Vessels berthed but cargo not worked on any of these holidays.
POLICE/AMBULANCE/FIRE: Emergency telephone 111.
TELEPHONES: Connections at all berths.
SHORE LEAVE: No restrictions.
AUTHORITY: Hawkes Bay Harbour Board, Private Bag, Napier, New Zealand. *Tel:* 58684. *Telex:* NZ3694 Napharb. *Cables:* Napharb. *Contact:* Captain G. Gunn, M.N.I., Harbour Master.

NELSON: 41.16 S. 173.17 E. (See Plan Book)

PORT LIMITS: Within 3 miles radius of Old Lighthouse on Boulder Bank.
DOCUMENTS: See "Auckland".
PILOTAGE: Compulsory for vessels of 100 g.r.t. and over. 24 hours' notice of ETA to Harbour Master. Confirm ETA before 1500 hrs. Friday if arriving during weekend or public holiday.

Radio telephone 2182 kHz and 2162 kHz, call sign "Nelson Harbour Radio". Listening watch 10 minutes every 4 hours commencing at 0000 hrs. After contact has been established a further listening schedule can be arranged.

VHF on Channel 16 listening and Channel 12 working. Pilots board inward-bound vessels 2 miles to seaward of main entrance.

Anchorage awaiting Pilot in depth about 30 ft., and with Old Boulder Bank Lighthouse (conspic.) bearing 180° distance 1.8 miles. By night landfall light (K 4224) bearing 160° distance 2 miles. Pilot vessel 40 ft. planing hull, speed 19 knots, painted orange.
ANCHORAGES: Anchorage as indicated in pilotage or further seaward according to weather conditions, draft and length of stay at anchor.
RESTRICTIONS: Vessels may enter, berth, unberth, or leave during hours of darkness. Overseas vessels (over approx. 116 m.) enter port on flood tide and usually swing and berth port side to.
MAX. SIZE: Max. permissible length 200 m. Beam 32.5 m. Draft limits 9.2 m. Max. draft at Main Wharf is 7.9 m.
Note: Max. draft of 9.2 m. may be exceeded at Harbour Master's discretion.
HEALTH: Radio Pratique usually granted. Pratique automatic after clearance at first port. If suspected disease or fever on board advise Medical Officer of Health, Nelson, by radio and await instructions.
RADIO: ZLW Wellington Radio; ZLB Awarua Radio; ZLD Auckland Radio.
TUGS: Two tugs available, join vessel inside harbour. Tug's own line used on berthing. Tugs are equipped for fire-fighting.

Also see "Ship Supply Service".
SPECIALISED CARGO-HANDLING FACILITIES: Facilities are available at one general cargo berth for discharging motor spirits and oil. Another berth is used for loading wood chips pneumatically (the loading equipment is owned by Nelson Pine Forest Limited, Nelson). Common user Roll-on/Roll-off Linkspan.
STEVEDORES: Labour ordered 0700 hrs. for weekday work; 0900 hrs. Friday for Saturday work. ETA should be received by Agents before these times.
MEDICAL: Advise Agents of any medical attention required, giving up to 24 hours' notice. Hospital facilities are obtainable.
TANKERS: Diameter of discharge pipe, 10 in. white products; 8 in. black oil. No slop discharge facilities. Oil tanker berth, one only. Max. draft at berth 7.9 m.
DENSITY: Average sea water, 1025.
FRESH WATER: Obtainable at any time. Approximately 20 t.p.h. delivery rate.
FUEL: Marine fuel oil, gas oil. Notice required, 24 hours.
GANGWAY/DECK WATCHMAN: Watchman necessary but usually provided by ship's crew. Shore watchman can be engaged if requested by vessel. Cost in accordance with national award.
OPENING/CLOSING HATCHES: By stevedores only.
CUSTOMS ALLOWANCES: See "Auckland".
IDENTIFICATION CARDS: Not required.
REPAIRS: Deck and engine repairs are possible. Limited underwater repairs available and hull cleaning service.
DRY DOCKS: Slipway available for up to 1,500 ton vessels.
REPATRIATION: Facilities exist.
AIRPORT: Distance 3 miles. Served by internal airline only.
TIME: GMT plus 12 hours. Daylight saving in Summer months, advance clocks 1 hour to GMT plus 13 hours.
HOLIDAYS: New Year's Day (1st January); 2nd January; Picnic Day (usually near end January); Anniversary Day (1st Monday in February); New Zealand Day (6th February); Good Friday; Easter Monday; Queen Elizabeth II Day (1st Monday in June); Labour Day (4th Monday in October); Christmas Day; Boxing Day. No cargo work on these days.
POLICE/AMBULANCE/FIRE: Police 88309; Ambulance 88299; Fire 81589; Emergency calls, dial 111.
EMERGENCY CO-ORDINATION CENTRE: S.A.R. Emergency Centre situated in Wellington covers the whole country.
TELEPHONES: Can be connected on board.
STORING: Vessels can be stored by truck (no barges available) which may proceed alongside (except tankers). Fork lift trucks available, however no riggers available.
SHORE LEAVE: Allowed.
SHORE POWER: 400 v., 3 h.p. 50 Hz, 60 amps maximum.
SHIP SUPPLY SERVICE: The Nelson Harbour Board operates 2 tugs and one pilot vessel. The larger tug, "Huria Matenga", is 3,000 h.p. Niigata Z pellar, the smaller tug, "W. H. Parr" is 1,500 h.p. Schottel, and the pilot vessel, "Waimea" is a 60 ft. planing hull vessel with a top speed of 19 knots.

Nelson also has a locally based helicopter firm of Helicopters (N.Z.) Ltd. based at Nelson Airport, who undertake contract work, as well as emergency work. Their helicopters also have marine VHF Channel 16.
AUTHORITY: Nelson Harbour Board, P.O.Box 844, Nelson, New Zealand. *Tel:* NN 82099. *Telex:* Nelharb NZ 31066. *Cables:* Nelharbour. *Contacts:* Harbour Master, Captain B. J. Westbrooke (after hours *Tel:* NN 86192).

Deputy Harbour Master, Captain J. G. Tregidga (after hours *Tel:* NN 521125).

NEW PLYMOUTH, Port Taranaki: 39.03 S. 174.03 E. (See Plan Book)

PORT LIMITS: All waters contained within the area of a circle with radius 2.5 nautical miles whose centre is the trig station on Mount Moturoa in position Lat. 39° 03′ 56.8″ S., Long. 174° 01′ 44.9″ E.
DOCUMENTS: *Customs:* See "Auckland".

Agriculture: Shipmaster's Bond List. Meal Locker Declaration Form AGL 36 (2 copies).

Health: Maritime Declaration of Health (issued by Port Health Officer).
PILOTAGE: Compulsory. Telegraphic address "Harbour Master, New Plymouth". 3 days' notice preferable with 1 day confirmation. VHF Channel 16. R/T 2182 kHz.

Pilot boat white with buff deckhouse, either "Rawinia" or "Pilot" in black on side. Pilot taken on board about 1.5 miles due North of Main Breakwater Head.
ANCHORAGE: Vessels can anchor to the West of a line due North from the Main Breakwater head seaward of the 10 fathom line. Good holding on sandy bottom. Not recommended in Northerly weather conditions.
RESTRICTIONS: Ships not berthed during hours of darkness although permitted to sail. Draft max. 30 ft. (9.15 m.) may be exceeded after prior consultation with Harbour Master. Ships under 21 ft. not affected by state of tide. In range 21 ft. to 30 ft. (9.15 m.) time of berthing relevant to high tide.
MAX. SIZE: Max. size 700 ft. (213.4 m.) overall, breadth no limit.
HEALTH: Port doctor boards on arrival at berth. In event of suspected disease on board, will board in pilotage area. Pratique automatic if vessel has already called at another New Zealand port.
RADIO: Radio telephone system operates watches for 15 minutes every 4 hours from midnight. Call sign New Plymouth Harbour Radio, call frequency 2182 kHz. Working frequency 2012 and 2162 kHz. 24 hour watch maintained on VHF Channel 16. ETA cables generally received through Wellington Radio. All outward messages routed through Wellington Radio.
TUGS: One 700 h.p. tug available. A second tug, 30 ton bollard pull, will be in service mid-1984.
BERTHING: In general all ships are swung in basin coming alongside berth stern first. Shore moorings are used.

Breakwater: Length, 122 m.; width, 10 m.; depth alongside LWOST, 6.5 m. For use by oil field barges, supply vessels and fishing vessels. Road transport only.

Moturoa Wharf: Length, 335 m.; width, 27.4 m.

East side of wharf: 1 berth 260 m. long, depth al ongside LWOST 10 m. Four 3 tonne portal cranes (5 tonne at reduced radius). 1 berth 76 m. long, depth alongside LWOST 6.5 m.

West side of wharf: 1 berth 137 m. long, depth alongside LWOST 7.9 m. Bunkerin point on No. 2 berth. Road and rail transport may be used to load and discharge dry cargo.

Newton King Wharf: Tanker use only. Max. LOA 192 m.Motor Spirit, Bitumen, Oils, Caustic, Chemicals. Exports: Condensate, Methanol and LPG, Synthetic Petrol (1985).

Blyde Wharf: West side of the wharf: length, 426 m., width of apron, 19 m.; width including open storage, 82 m.; depth alongside LWOST, 11 m. Rail and road transport may be used to load and discharge cargo. Limited open hard standings for transit cargo storage are available, a small container facility is provided handling approximately 20 self-sustaining vessels annually.

East side of the wharf: Length, 80 m.; width, 5.5 m. and 13.4 m.; depth alongside LWOST, 5.5 m. Road transport only. For use by oil field supply vessels.

One mobile Lima heavy lift crane capacity 70 tons at 12 ft. from wharf edge to 25 tons at 40 ft. from wharf edge available at No. 2 berth; with restricted loading may be used on Blyde No. 1 also.

Also see "Developments".

RESTRICTIONS: Tankers are berthed during hours of daylight only. All vessels can depart from their berths during hours of darkness. Vessels holding pilotage exemptions may also enter or depart during the hours of darkness.

The following are the controlling depths at mean low water springs, mud bottom in each case;

Entrance to port 14.6 m.
Dredged channel 11.60 m.
Inside anchorage 11.0 m. (Camp Bay)
Approaches to berth 11.6 m. – 9.8 m.
Alongside berths 12.20 m. – 8.60 m.

MAX. SIZE: Max. draft permissible for entering or leaving: 11.60 m. at high water and 9.75 m. at low water. Vessels drawing less than 9.75 m. can enter at any state of the tide. Max. size permissible for entry: length 260 m. at Cashin Quay, any additional length contact Harbour Master, 230 m. at Inner Harbour. No limit on vessel's beam.

HEALTH: Master of every ship about to enter a New Zealand port shall, not later than 12 hours and not earlier than 24 hours before expected time of arrival at that port, inform Port Health Officer by radio of last port of call, date of departure therefrom, and state of health of vessel.

Arrival of vessels: On arrival, vessel showing International Code quarantine signal, should proceed to inspection area to await arrival of Port Health Officer. Inspections are normally carried out at berth.

Radio Pratique: Certain ships may be granted Pratique by radio and hence need not be visited by a Port Health Officer, provided that medical officer carried as part of ship's complement.

Maritime Declaration of Health: Masters of all vessels arriving in New Zealand from any port beyond New Zealand shall complete and deliver to Port Health's Officer a Maritime Declaration of Health countersigned by the ship's medical officer, if required.

Crew List and Passenger List: Master of every ship liable to quarantine should be prepared to furnish Port Health Officer a list of all passengers, showing in respect of each passenger, name, sex, race, age, and port of embarkation; and a list of crew giving the name, nationality, and rating of each member.

RADIO: Wellington Radio, call sign ZLW; Awarua, call sign ZLB; or Auckland, call sign ZLO.

TUGS: Normally join vessel at Parsons Rock Beacon. Tug lines are used, charge for which is included in the overall hire for tug. Number of tugs required depends on type of vessel and draft.

BERTHING: Requirements for berthing at Berths 2, 3, 4, 5, 6 and 7 for vessels over 1,000 tons net are; bow out, the anchor to be used and gangway turned in until vessel secured at berth.

STEVEDORES: Waterside labour can be ordered after arrival of ship at 0630 hrs. up to 0900 hrs. For work on Saturdays orders must be placed by 0900 hrs. Friday. Saturday afternoon work to be ordered by 1030 hrs. Saturday.

For supplementary hours labour must be requisitioned by 1500 hrs. previous Friday and confirmed by 0700 hrs. Monday and daily.

SPECIALISED CARGO HANDLING FACILITIES:

No. 1 Cashin Quay: Grain silos. 2,000 tons capacity, 400 t.p.h. loading rate for coastal and overseas shipments. Bulk Loading Facilities: Woodchips, grain and coal.

VHF listening watch as above for R/T and continuous during office hours.

TUGS: Two tugs available.

BERTHING: Vessels at max. draft limited to HW for arrival and/or departure. Vessel's ETA must be given to Harbour Master, Napier, 24 hours before arrival or on departure from previous port if less than 24 hours, and amended 4 hours prior to arrival. Max. draft arrival to be included.

Vessels arriving during a weekend, ETA to be given by 1500 hrs. Friday and at 1500 hrs. on a day preceding a public holiday.

SPECIALISED CARGO FACILITIES: *Woodpulp Storage:* Adjacent Higgins Wharf, Shed Nos. 7 and 9. Total capacity, 49,000 tons.

Bulk Fertiliser Storage: Adjacent Higgins Wharf, Shed No. 8 – rock phosphate, capacity 60,000 tons; Shed No. 10 – fertiliser bases, capacity 32,000 cu.m.

General Cargo Sheds: Adjacent Geddis, Herrick & Kirkpatrick Wharves, Shed Nos. 1, 2 and 3, size 5,300 sq.m.

Container Packing/Devanning: Adjacent Kirkpatrick Wharf, Shed No. 5, size 3,000 sq.m.

Electric power and storage for 240×20 ft. reefers. 4 acre paved dry box yard. Serviced cleaning yard for 20×20 ft. reefers.

Tanks for tallow and edible oils.

Cement Silos.

STEVEDORES: ETA required for discharging ships 24 hours before arrival. Loading ships 48 hours before arrival with proposed stowages and vacant spaces. Advise number of gangs able to work. All work done by ship's gear.

MEDICAL: No prior notice required for medical attention. Hospital facilities available. Advice would be needed of any contagious disease on board in advance, in accordance with Port Health Regulations.

TANKERS: Standard size discharge lines. All connections supplied by oil companies. 5 berths available: 2, max. length 200 m., draft 10.4 m.; 1, max. length 230 m., draft 10.0 m.; 2, max. length 180 m., draft 9.2 m.

DENSITY: Variable, generally 1020 – 1025.

FRESH WATER: Available all berths 20 t.p.h. per hose.

FUEL: 220 and 1,000 sec. Oil available ex-pipe-line at 110 t.p.h. Marine diesel and gas oil ex-road tanker. All at immediate notice. Lubricating oil available. 1 week's notice. Residue service available when tank vessels discharging/loading or having hazardous goods in transit.

FIRE PRECAUTIONS: Watchman supplied on wharf at ship's expense.
GANGWAY/DECK WATCHMEN: All ships must have gangway watchmen. Cargo and deck watchmen available on request.
OPENING/CLOSING HATCHES: Hatches normally opened and closed by stevedores unless automatic type.
CERTIFICATES:

Ship's Register.
Health Certificate.
Cargo Safety Certificate.
Radio Safety Certificate.
Load Line Certificate.

CUSTOMS ALLOWANCES: See "Auckland".
IDENTIFICATION CARDS: Not required.
REPAIRS: First class service available.
REPATRIATION: On arrangement with Customs and vessel's Agents.
AIRPORT: Hawke's Bay Airport, served by internal airline 3 miles from port.
TIME: Winter GMT plus 12 hours. Summer GMT plus 13 hours.
HOLIDAYS: New Year's Day; 2nd January; Picnic Day (last Monday in January); Anniversary Day (2nd to last Monday in January); Good Friday; Easter Monday; Anzac Day (25th April); Queen's Birthday (1st Monday in June); Labour Day (nearest Monday 25th October); Christmas Day; Boxing Day. Vessels berthed but cargo not worked on any of these holidays.
POLICE/AMBULANCE/FIRE: Emergency telephone 111.
TELEPHONES: Connections at all berths.
SHORE LEAVE: No restrictions.
AUTHORITY: Hawkes Bay Harbour Board, Private Bag, Napier, New Zealand. *Tel:* 58684. *Telex:* NZ3694 Napharb. *Cables:* Napharb. *Contact:* Captain G. Gunn, M.N.I., Harbour Master.

NELSON: 41.16 S. 173.17 E. (See Plan Book)

PORT LIMITS: Within 3 miles radius of Old Lighthouse on Boulder Bank.
DOCUMENTS: See "Auckland".
PILOTAGE: Compulsory for vessels of 100 g.r.t. and over. 24 hours' notice of ETA to Harbour Master. Confirm ETA before 1500 hrs. Friday if arriving during weekend or public holiday.

Radio telephone 2182 kHz and 2162 kHz, call sign "Nelson Harbour Radio". Listening watch 10 minutes every 4 hours commencing at 0000 hrs. After contact has been established a further listening schedule can be arranged.

VHF on Channel 16 listening and Channel 12 working. Pilots board inward-bound vessels 2 miles to seaward of main entrance.

Anchorage awaiting Pilot in depth about 30 ft., and with Old Boulder Bank Lighthouse (conspic.) bearing 180° distance 1.8 miles. By night landfall light (K 4224) bearing 160° distance 2 miles. Pilot vessel 40 ft. planing hull, speed 19 knots, painted orange.

ANCHORAGES: Anchorage as indicated in pilotage or further seaward according to weather conditions, draft and length of stay at anchor.
RESTRICTIONS: Vessels may enter, berth, unberth, or leave during hours of darkness. Overseas vessels (over approx. 116 m.) enter port on flood tide and usually swing and berth port side to.
MAX. SIZE: Max. permissible length 200 m. Beam 32.5 m. Draft limits 9.2 m. Max. draft at Main Wharf is 7.9 m.
Note: Max. draft of 9.2 m. may be exceeded at Harbour Master's discretion.
HEALTH: Radio Pratique usually granted. Pratique automatic after clearance at first port. If suspected disease or fever on board advise Medical Officer of Health, Nelson, by radio and await instructions.
RADIO: ZLW Wellington Radio; ZLB Awarua Radio; ZLD Auckland Radio.
TUGS: Two tugs available, join vessel inside harbour. Tug's own line used on berthing. Tugs are equipped for fire-fighting.

Also see "Ship Supply Service".

SPECIALISED CARGO-HANDLING FACILITIES: Facilities are available at one general cargo berth for discharging motor spirits and oil. Another berth is used for loading wood chips pneumatically (the loading equipment is owned by Nelson Pine Forest Limited, Nelson). Common user Roll-on/Roll-off Linkspan.
STEVEDORES: Labour ordered 0700 hrs. for weekday work; 0900 hrs. Friday for Saturday work. ETA should be received by Agents before these times.
MEDICAL: Advise Agents of any medical attention required, giving up to 24 hours' notice. Hospital facilities are obtainable.
TANKERS: Diameter of discharge pipe, 10 in. white products; 8 in. black oil. No slop discharge facilities. Oil tanker berth, one only. Max. draft at berth 7.9 m.
DENSITY: Average sea water, 1025.
FRESH WATER: Obtainable at any time. Approximately 20 t.p.h. delivery rate.
FUEL: Marine fuel oil, gas oil. Notice required, 24 hours.
GANGWAY/DECK WATCHMAN: Watchman necessary but usually provided by ship's crew. Shore watchman can be engaged if requested by vessel. Cost in accordance with national award.
OPENING/CLOSING HATCHES: By stevedores only.
CUSTOMS ALLOWANCES: See "Auckland".
IDENTIFICATION CARDS: Not required.
REPAIRS: Deck and engine repairs are possible. Limited underwater repairs available and hull cleaning service.
DRY DOCKS: Slipway available for up to 1,500 ton vessels.
REPATRIATION: Facilities exist.
AIRPORT: Distance 3 miles. Served by internal airline only.
TIME: GMT plus 12 hours. Daylight saving in Summer months, advance clocks 1 hour to GMT plus 13 hours.
HOLIDAYS: New Year's Day (1st January); 2nd January; Picnic Day (usually near end January); Anniversary Day (1st Monday in February); New Zealand Day (6th February); Good Friday; Easter Monday; Queen Elizabeth II Day (1st Monday in June); Labour Day (4th Monday in October); Christmas Day; Boxing Day. No cargo work on these days.
POLICE/AMBULANCE/FIRE: Police 88309; Ambulance 88299; Fire 81589; Emergency calls, dial 111.
EMERGENCY CO-ORDINATION CENTRE: S.A.R. Emergency Centre situated in Wellington covers the whole country.
TELEPHONES: Can be connected on board.
STORING: Vessels can be stored by truck (no barges available) which may proceed alongside (except tankers). Fork lift trucks available, however no riggers available.
SHORE LEAVE: Allowed.
SHORE POWER: 400 v., 3 h.p. 50 Hz, 60 amps maximum.
SHIP SUPPLY SERVICE: The Nelson Harbour Board operates 2 tugs and one pilot vessel. The larger tug, "Huria Matenga", is 3,000 h.p. Niigata Z pellar, the smaller tug, "W. H. Parr" is 1,500 h.p. Schottel, and the pilot vessel, "Waimea" is a 60 ft. planing hull vessel with a top speed of 19 knots.

Nelson also has a locally based helicopter firm of Helicopters (N.Z.) Ltd. based at Nelson Airport, who undertake contract work, as well as emergency work. Their helicopters also have marine VHF Channel 16.

AUTHORITY: Nelson Harbour Board, P.O.Box 844, Nelson, New Zealand. *Tel:* NN 82099. *Telex:* Nelharb NZ 31066. *Cables:* Nelharbour. *Contacts:* Harbour Master, Captain B. J. Westbrooke (after hours *Tel:* NN 86192).

Deputy Harbour Master, Captain J. G. Tregidga (after hours *Tel:* NN 521125).

NEW PLYMOUTH, Port Taranaki: 39.03 S. 174.03 E. (See Plan Book)

PORT LIMITS: All waters contained within the area of a circle with radius 2.5 nautical miles whose centre is the trig station on Mount Moturoa in position Lat. 39° 03′ 56.8″ S., Long. 174° 01′ 44.9″ E.
DOCUMENTS: *Customs:* See "Auckland".

Agriculture: Shipmaster's Bond List. Meal Locker Declaration Form AGL 36 (2 copies).

Health: Maritime Declaration of Health (issued by Port Health Officer).

PILOTAGE: Compulsory. Telegraphic address "Harbour Master, New Plymouth". 3 days' notice preferable with 1 day confirmation. VHF Channel 16. R/T 2182 kHz.

Pilot boat white with buff deckhouse, either "Rawinia" or "Pilot" in black on side. Pilot taken on board about 1.5 miles due North of Main Breakwater Head.

ANCHORAGE: Vessels can anchor to the West of a line due North from the Main Breakwater head seaward of the 10 fathom line. Good holding on sandy bottom. Not recommended in Northerly weather conditions.
RESTRICTIONS: Ships not berthed during hours of darkness although permitted to sail. Draft max. 30 ft. (9.15 m.) may be exceeded after prior consultation with Harbour Master. Ships under 21 ft. not affected by state of tide. In range 21 ft. to 30 ft. (9.15 m.) time of berthing relevant to high tide.
MAX. SIZE: Max. size 700 ft. (213.4 m.) overall, breadth no limit.
HEALTH: Port doctor boards on arrival at berth. In event of suspected disease on board, will board in pilotage area. Pratique automatic if vessel has already called at another New Zealand port.
RADIO: Radio telephone system operates watches for 15 minutes every 4 hours from midnight. Call sign New Plymouth Harbour Radio, call frequency 2182 kHz. Working frequency 2012 and 2162 kHz. 24 hour watch maintained on VHF Channel 16. ETA cables generally received through Wellington Radio. All outward messages routed through Wellington Radio.
TUGS: One 700 h.p. tug available. A second tug, 30 ton bollard pull, will be in service mid-1984.
BERTHING: In general all ships are swung in basin coming alongside berth stern first. Shore moorings are used.

Breakwater: Length, 122 m.; width, 10 m.; depth alongside LWOST, 6.5 m. For use by oil field barges, supply vessels and fishing vessels. Road transport only.

Moturoa Wharf: Length, 335 m.; width, 27.4 m.

East side of wharf: 1 berth 260 m. long, depth al ongside LWOST 10 m. Four 3 tonne portal cranes (5 tonne at reduced radius). 1 berth 76 m. long, depth alongside LWOST 6.5 m.

West side of wharf: 1 berth 137 m. long, depth alongside LWOST 7.9 m. Bunkerin point on No. 2 berth. Road and rail transport may be used to load and discharge dry cargo.

Newton King Wharf: Tanker use only. Max. LOA 192 m.Motor Spirit, Bitumen, Oils, Caustic, Chemicals. Exports: Condensate, Methanol and LPG, Synthetic Petrol (1985).

Blyde Wharf: West side of the wharf: length, 426 m., width of apron, 19 m.; width including open storage, 82 m.; depth alongside LWOST, 11 m. Rail and road transport may be used to load and discharge cargo. Limited open hard standings for transit cargo storage are available, a small container facility is provided handling approximately 20 self-sustaining vessels annually.

East side of the wharf: Length, 80 m.; width, 5.5 m. and 13.4 m.; depth alongside LWOST, 5.5 m. Road transport only. For use by oil field supply vessels.

One mobile Lima heavy lift crane capacity 70 tons at 12 ft. from wharf edge to 25 tons at 40 ft. from wharf edge available at No. 2 berth; with restricted loading may be used on Blyde No. 1 also.

Also see "Developments".

STEVEDORES: Labour must be engaged between 0700 – 0900 hrs. Monday to Friday. Agents should be advised ETA at least 24 hours, preferably 72 hours, in order arrange cargo if vessel loading. Normal cargo working hours Monday – Friday 0700 – 1200 hrs., 1300 – 1700 hrs. Saturday 0700 – 1200 hrs. Supplementary hours may be worked Monday – Friday 1700 – 2300 hrs. if labour available. No work on Sundays.

MEDICAL: Hospital services available.

TANKERS: Black oils 10 in. pipe-line; white oils 8 in. pipe-line. 2 berths available for tankers, max. draft 30 ft. (9.15 m.). Private de-ballasting tank available 8,000 tonnes. Condensate S.G. 0.7738 Loading rate about 1,250 t.p.h.

DENSITY: Sea water.

FRESH WATER: Available all berths from main supply at about 100 t.p.h. Cost 56 cents per metric ton.

FUEL: Bunkers are obtainable at Moturoa and Newton King Wharves only. Gas oil line at Blyde No. 3 and Moturoa Berths.

FIRE PRECAUTIONS: Tanker berths closed to public with Harbour Board watchman in attendance.

GANGWAY/DECK WATCHMEN: Available but not necessary.

OPENING/CLOSING HATCHES: Stevedores must carry out this work.

CERTIFICATES:

Normal Safety Certificates.

Ship's Register.

CUSTOMS ALLOWANCES: See "Auckland".

IDENTIFICATION CARDS: Not required.

CONSULS: None available locally.

REPAIRS: All repairs except underwater work of a major nature.

SURVEYORS: Surveyors can be arranged.

REPATRIATION: Facilities exist.

AIRPORT: 7 miles from city, 10 miles from port. Served by domestic service only, 2 flights Northbound and Southbound each daily.

TIME: 12 hours ahead of GMT. N.Z. Daylight time observed.

HOLIDAYS: New Year's Day; 2nd January; Stevedores Picnic (4th Monday in January); Waitangi Day (6th February); Provincial Anniversary Day (2nd Monday in March); Good Friday; Easter Monday; Anzac Day (25th April); Queen's Birthday (1st Monday in June); Labour Day (4th Monday in October); Christmas Day; Boxing Day.

POLICE/FIRE/AMBULANCE: Telephone numbers respectively, 75449, 75505, 75439.

EMERGENCY CO-ORDINATION CENTRE: Police, Tel: 75449. Co-ordinate S.A.R. and emergencies other than fire.

TELEPHONES: Can be connected on board.

STORING: By road or rail truck to shipside. Tankers by road to wharf gate and hand truck to shipside approx. 400 ft. Customs available. Ship's crew to be used for stores.

SHORE LEAVE: No restriction.

GENERAL: Ship's garbage must be in covered containers supplied by Harbour Board and removed daily. Any meats on board vessel on arrival which have been supplied from other than Australia or New Zealand will be sealed off and fresh supplies obtained.

DEVELOPMENTS: New reclamation of 23 acres providing berths for 2 overseas vessels is now fully operational. These berths are suitable for handling heavy lifts. PAD type Roll-on/Roll-off vessels, limited container use and a container cleaning installation is provided.

Harbours Board is undertaking dredging of the entrance and fairway to Newton King Tanker Terminal. This project will provide a dredged depth of 11 m. below water in the fairways, 11.9 m. at the berths, and 13 m. at the entrance. The work, commenced in June 1984, is expected to be finished by June 1988.

AUTHORITY: Taranaki Harbours Board, P.O.Box 348, New Plymouth, New Zealand. *Tel:* 510-200. *Telex:* NZ 3500. *Cables:* Taragate. *Contact:* Harbour Master.

ONEHUNGA: 36.56 S. 174.47 E. (See Plan Book)

PORT LIMITS: All that area of water contained within an area bounded to seaward by an arc of a circle 4 miles radius from the Southern extremity of Paratutai Island.

DOCUMENTS: See "Auckland".

PILOTAGE: Not compulsory, but arrangements can be made with the Harbour Master at Auckland to supply the services of a Pilot if required. A Pilot will then board a vessel off Te Pirau, situated about 2 miles N.E. of South Head main light.

Pilotage District: All those waters of the Manukau Harbour contained within a line drawn 180° to the South shore from Jackie Hill on Kaiteke Point 015.5° – 2.85 miles approximately from the Southern extremity of Paratutai Island.

The signal station is equipped with both medium frequency and VHF radiotelephone. Call sign is "Manukau Harbour Radio" and VHF Channel, 10, 11, 12, 13, 14 and 16.

Listening watches are maintained as follows—

0800 to 0830 – Call 2182 kHz, work 2012 kHz.
0830 to 0900 – Calling and working 2012 kHz.
1800 to 1830 – Calling 2182 kHz, working 2012 kHz.
1830 to 1900 – Calling and working 2012 kHz.
0800 to 0900 – VHF Channel 16.
1800 to 1900 – VHF Channel 16.

Other times by arrangement.

Note: Should a vessel be crossing the bar during the scheduled watch periods, the signalman will be working on 2012 kHz with that vessel and not listening on 2182 kHz.

Vessels equipped with radiotelephone must maintain contact with the signal station while crossing the bar.

Weather conditions permitting, information concerning bar conditions will be supplied on request from the signal station. Such information can only be regarded as a guide, as observations are made from the signal station which is situated about 5 miles from the bar and elevated 243.84 m. (800 ft.).

Radiotelephone – Onehunga: A radiotelephone is installed at the office of the Officer-in-Charge at Onehunga. The call sign is "Onehunga Harbour Radio" and the working frequency 2012 kHz.

Vessels equipped with radiotelephone, when within Puponga Point, must maintain a listening watch on 2012 kHz for information relative to berthing, harbour traffic or other harbour conditions.

No regular watches are maintained.

ANCHORAGES: After crossing the bar it is not advisable to anchor until after rounding Puponga Point, if proceeding to Onehunga; or after rounding Kauri Point (situated about 15 miles S.E. of Puponga Point), if proceeding to the Southward.

Prohibited anchoring and fishing area: Within an area extending 2 miles from Destruction Gully front beacon in a 182° direction and having a width of 152 m. (500 ft.) on each side of the transit of Destruction Gully beacons.

Prohibited Anchorage: Within 91 m. (300 ft.) of a sewage submarine pipe-line laid in a 152° direction across Wairopa Channel about 1 mile Westward of Onehunga Wharf. On the Northern shore, 2 white triangular beacons, each bearing the word "Sewer" in black letters, mark the middle of the prohibited anchorage. The pipe-line lies approximately 3 m. (10 ft.) to the Eastward of the beacons when in transit.

Prohibited Anchoring and Fishing Area: Anchoring and fishing are prohibited within an area bounded by a line commencing at the South end of Renton Road (Lat. 37° 00.08′ S., Long. 174° 45.2′ E.); thence running 180° for 2,590 m.; thence 090° for 5,291 m.; thence 050° to the shore. The Northern boundary commences at Nganui Point (Lat. 37° 00′ S., Long. 174° 48.4′ E.); thence 090° to the opposite shore.

The above area, adjacent to Auckland International Airport, is marked by following lights and beacons, bearings and distances from Aero light (37° 00′ 48″ S., 174° 47′ 31″ E., approx.).

Light F. 058° 45′ – 1,936 m.
Beacon 259° 30′ – 3,185 m.
Beacon 220° 45′ – 2,848 m.
Beacon 183° 15′ – 1,890 m.
Beacon 143° – 2,317 m.
Light Beacon Qk.Fl. 239° – 3,642 m.
Light Beacon Fl.R.2 secs. 122° 45′ – 3,466 m.
Light Beacon Fl.R.2 secs. 112° 45′ – 3,261 m.
Light Beacon Fl.R.2 secs. 108° 30′ – 2,453 m.

RESTRICTIONS: Berthing and unberthing during the hours of darkness is not recommended.

	Controlling Depths Below Chart Datum	*Nature of Bottom*
Entrance to port (Southwest Channel)	5.48 m.	Sand.
Anchorages	5.486 m. – 7.62 m.	Mud, Shell, and Sand.
Channel	3.048 m.	
Approaches to berth	3.048 m.	
Berth (Onehunga)	3.3 m. – 4.7 m.	

MAX. SIZE: LOA, 95 m. Beam, No limit. Draft 4.7 m.

HEALTH: See "Auckland".

RADIO: See "Auckland".

VHF: See "Pilotage".

RADAR: A radar station having a maximum range of 72 miles is operated by the Auckland Harbour Board at South Head Signal Station Lat. 37° 03.2′ S., Long. 174° 32.6′ E. Masters may call on radio telephone and request particulars of their bearing and range as shown on the radar screen. Responsiblity for the use of this information rests entirely with the Master of the vessel.

TUGS: 1 twin screw *Manukau* is available. 52.5 tonnes gross, 400 b.h.p., static pull 3.5 tonnes. Tug is equipped with both medium and VHF Radiotelephone.

BERTHING: The principal wharf is situated at Onehunga and is a ferro-concrete structure 293 m. in length which includes a launch jetty of 17 m. at the Eastern end, and with a width of 49 m. A grid for the use of small craft has been constructed immediately North of the wharf. There is a small jetty at Cornwallis.

The deck level of the wharf is 6.401 m. above chart datum.

The wharf is connected to the railway system and the distance from the outside face of the wharf to the centre of the railway track is 3.73 m.

CRANES: No quay-side cranes. One 12.5 tonne capacity mobile crane available. For heavier loads cranes available for hire from outside port.

BULK CARGO FACILITIES: Eastern end of quay is equipped with a pipe-line for the discharge of bulk cement to adjacent privately owned silos.

SPECIALISED CARGO HANDLING FACILITIES: No facilities.

BRIDGES: None.

STEVEDORES: Arranged by Agents. See "Auckland".

MEDICAL: See "Auckland".

TANKERS: No facilities.

DENSITY: 1025.

FRESH WATER: Available.

FUEL: Boiler fuel oil, diesel oil, and lubricating oil are available from tank wagons; delivery at the rate of 13,500 litres per hour through a 50 mm. hose. Coal is not kept in stock but can be obtained.

CONSULS: See "Auckland".

REPAIRS: Outside firms are available to do machine shop and foundry work.

DRY DOCKS: No facilities.

SURVEYORS: See "Auckland".

GANGWAY/DECK WATCHMEN: See "Auckland".

HATCHES: See "Auckland".

CUSTOMS ALLOWANCES: See "Auckland".

CARGO GEAR: See "Auckland".

REPATRIATION: Full facilities exist.
AIRPORT: 8 km. from port. Served by major international airlines.
TIME: See "Auckland".
HOLIDAYS: See "Auckland".
POLICE/AMBULANCE/FIRE: All emergency services are called through one telephone number. Dial 111 and state service required.
SERVICES: No special services.
SHORE LEAVE: Crew members may go ashore.
REGULATIONS: See "Auckland".
IDENTIFICATION CARDS: Not required.
DELAYS: Seldom any delays.
DEVELOPMENTS: None currently in progress.
AUTHORITY: Auckland Harbour Board, 1 Queen Street, (P.O.Box 1259), Auckland, New Zealand. *Tel:* 795-950. *Telex:* NZ 2705. *Cables:* Haboard, Auckland. *Contact:* J. M. Halling, Chief Administrative Officer and Secretary.

OPUA: 35.19 S. 174.07 E. **(See Plan Book)**

PORT LIMITS: Commencing at Northern extremity of Cape Wiwiki, thence by a straight line to the Eastern extremity of the Nine Pins, thence by a straight line to the North Western extremity of Cape Brett.
DOCUMENTS: See "Whangarei".
PILOTAGE: Compulsory Southward of a line from the Western extremity of Kororareka Point following a true bearing of 253° towards the flagstaff at Waitangi Treaty House. Pilotage shall be optional within the waters contained Northward of the above mentioned line and Westward of a line commencing from the Eastern extremity of Tapeka following a 350° True bearing to the Eastern extremity of the Black Rocks, thence in 271° True direction to the mainland. Pilots are available all hours day and night subject to prior minimum notice of 24 hours being received during normal weekday working day. Second notice confirming or amending first to be sent 4 hours before expected arrival. The Pilot supplies Harbour By-laws. Pratique, Agriculture and Customs clearance is normally undertaken on arrival at berth. Pilot vessel under private contract. No VHF contact. Pilot from Whangarei.
ANCHORAGE: Renown Anchorage as per Bay of Islands Chart N.Z. 5122.
RESTRICTIONS: Veronica Channel dredged to 7 m. at Chart Datum. Max. draft is 8.53 m.
RADIO: See "Whangarei".
TUGS: Available by arrangement with Northland Harbour Board, Whangarei. At least 72 hours' notice required.
BERTHING: Total length 214 m., width 12.5 m., overseas berthage on Eastern side of wharf. Depth at berth is 9.45 m. at MLWS. Wharf is serviced by rail.
CARGO HANDLING: Ship's own gear. 2 permanent gangs available subject to Stevedore requirements as per Whangarei.
MEDICAL: Hospital and Ambulance at Kawakawa, 12.8 km. (8 miles) from Opua. Port Doctor at Paihia, 8 km. (5 miles) away.
DENSITY: 1025.
FRESH WATER: Fresh water available – 200 tonnes in storage. 40 cents per 1,000 litres.
FUEL: By arrangement with oil companies via road transport.
CUSTOMS ALLOWANCES: See "Whangarei".
CONSULS: See "Whangarei".
REPATRIATION: See "Whangarei".
TIME: See "Whangarei".
HOLIDAYS: See "Whangarei".
POLICE/AMBULANCE/FIRE: See "Whangarei".
TELEPHONES: Telephones available.
SHORE LEAVE: See "Whangarei".
SURVEYORS: See "Whangarei".
AIRPORT: See "Whangarei".
REGULATIONS: See "Whangarei".
DELAYS: See "Whangarei".
AUTHORITY: Northland Harbour Board, Private Bag, Whangarei, New Zealand. *Tel:* 87-099. *Telex:* NZ 2955. *Cables:* "Harbour". *Contact:* Harbour Superintendent.

OTAGO, (includes Dunedin, Port Chalmers and Ravensbourne): **(See Plan Book)**

PORT CHALMERS: 45.49 S. 170.38 E.
DUNEDIN: 45.53 S. 170.31 E.

PORT LIMITS: The harbour limits are defined by a line extending from Heyward Point Trig Station in an 020°T direction for 3 miles thence 126°T for 1.75 miles thence 200°T to the shore off Howlett Point.

The entrance to Otago Harbour is situated in the bay between Heyward Point and Taiaroa Head.

Within the entrance the harbour extends about 13 miles South-Westward and at its head stands the city and Port of Dunedin. The town and port of Port Chalmers is situated about 6 miles within the harbour entrance.

About 1 mile Southward of Port Chalmers, the Portobello Peninsula, with Quarantine Point at its head, together with the adjacent Quarantine and Goat Islands, form a natural barrier across the Otago Harbour inlet. That part of the harbour which lies North-Eastward of this barrier is the "Lower Harbour" and that which lies South-Westward is the "Upper Harbour".

DOCUMENTS: See "Auckland".
PILOTAGE: Address "Harbour Master, Dunedin." Through coastal radio stations ZLW (Wellington) or ZLB (Awarua) giving ship's name, draft, and ETA. First message 72 hours out, revise 24 hours out: if from another New Zealand port (coastwise) similar message as soon as possible after leaving that port. Subsequent contact with port private radio station Taiaroa Heads on 2182 kHz or VHF Channel 16. Pilot boat is 16.76 m., white launch, also fitted with VHF frequencies, which meets vessels as required but does not remain on station otherwise. Boarding position is with Taiaroa Head Lighthouse bearing 180° distant 2 miles; good anchorage with Taiaroa Head Lighthouse bearing 160° – 2 miles, depth 12 fathoms. Pilots can board in this vicinity provided Master has ship under way at slow speed and obeys Pilot's instructions. Vessels arriving to work general cargo should endeavour to embark Pilot by 0500 hrs. in order to be alongside berth ready to take labour on board at normal commencing hour of 0700 hrs.

ANCHORAGES: *Anchorage outside the Harbour entrance:* A recommended anchorage which is considered safe in all winds except rare Easterly gales is, in a least depth of 13 fathoms (23.8 m.), sand, with Taiaroa Head light house bearing 160°T and Heyward Point light tower bearing 220°T.
Note: There is no anchorage inside the Harbour entrance, but in a case of emergency, vessels up to 500 ft. (152.4 m.) long may be able to anchor in the swinging basin at Port Chalmers.
Prohibited Anchorage: Anchorage is prohibited in the vicinity of a submarine power cable laid between Battery Point, Port Chalmers, and Quarantine Point at the North-Western end of Portobello Peninsula.

The cable is marked on its North-Western end by 2 beacons situated approximately 1.5 cables South by West and approximately 2.25 cables South by East from Observation Point. Both beacons are rectangular in shape and painted in green and white horizontal stripes. The latter beacon also serves as No. 31 channel beacon, and exhibits a flashing green light – these beacons when in line bearing 139.5° T indicate the route of the power cable across the channel.

APPROACHES: *Harbour Entrance Channel:* A sand bank extends about 1.25 miles Northward of Taiaroa Head, and the dredged entrance channel effectively divides this into Eastern and Western banks. There is a least depth of 21 ft. (6.4 m.) on the Eastern bank, and the sea can break dangerously over it in heavy weather. The Western bank has a least depth of 28 ft. (8.5 m.).

The entrance channel extends from the seaward (Northern) edge of the bank to a gap between North Mole and Taiaroa Head. The channel is dredged to 45 ft. (13.7 m.), and is 600 ft. (183 m.) wide – it is unprotected and sea and swell can cause vessels to pitch, roll, and lift bodily in the approaches.

North Mole, an artificial rock breakwater, extends about 4,000 ft. (1,219 m.) N.E. from the low sand spit on the Western side of the entrance. The underwater toe extends about 400 ft. (122 m.) N.E. of the visible head.

The tidal range in the entrance channel is 6.5 ft. (2.0 m.) at Springs, and 4.3 ft. (1.3 m.) at Neaps. Tidal streams run generally along the axis of the channel at rates up to 2 knots on flood and ebb but, near the harbour entrance, vessels may be set to the Westward on the flood stream, and to the Eastward on the ebb stream.

RESTRICTIONS: Tankers proceeding to or from the oil jetty at Dunedin make passage of the upper harbour in daylight hours only. Otherwise ships are not boarded between 2000 hrs. and 0500 hrs. as no working time is gained by so doing, unless vessel requires HW for transit. Also see "Max. Size".
Entering and Leaving: Any vessel wishing to enter, leave, or move within the Port of Otago must first obtain permission to do so from the signal station at Taiaroa Head, or that at Dunedin, and this directive shall include any boat or yacht exceeding 11 m. in length wishing to enter the Upper Harbour.
Upper Harbour – Overhead Power Line: An overhead power line from Port Chalmers to Portobello crosses the channel via Goat and Quarantine Islands, supported by steel lattice-work towers painted in bands of orange and silver. The vertical clearance beneath the power line where it crosses the channel is 168 ft. (51.2 m.) at Mean High Water Springs.
Upper Harbour – Submarine Power Cables: A power cable buried 10 ft. (3.1 m.) below the sea bed runs across Victoria Channel between beacons No. 40 and 41. From beacon No. 41 the cable is laid on the sea bed in a 280°T direction to the shore. From beacon No. 40, 3 cables are laid on the sea bed in 115°T, 118°T, and 131°T directions to the shore. Anchoring is prohibited in this vicinity.

MAX. SIZE: *Lower Harbour to Port Chalmers:* Vessels up to 850 ft. (259 m.) length overall, and 38 ft. (11.6 m.) draft can transit the Lower Harbour to and from Port Chalmers by day and night. Longer vessels may be handled by prior arrangement with the Harbour Master.

The maximum draft permissible at LW is 36 ft. (11 m.) which may be further reduced to a minimum of 32.5 ft. (9.9 m.), if there is a heavy swell in the entrance channel.
Upper Harbour to Dunedin: Vessels up to a maximum of 604 ft. (184 m.) length overall, 90 ft. beam (27.4 m.) and 26 ft. (7.9 m.) draft can transit the Upper Harbour channel to Ravensbourne and Dunedin. Non gas-free tankers, and vessels over 550 ft. (167.6 m.) in length transit the Upper Harbour in daylight hours only, but all other vessels can be handled both day and night. The maximum draft permissible at LW is 21 ft. (6.4 m.).

HEALTH: Master to radio to Port Health Officer (entry port in N.Z. only) 24 hours before ETA requesting Free Pratique or declaring adverse state of health. Agents will advise Port Health Officer and Health Department inspectors who will board vessel on arrival, alongside actual wharf if Free Pratique requested. N.Z. regulations will require sealing of domestic meat chambers and purchase of local meats for use coastwise.

RADIO: Through Awarua Radio ZLB or Wellington Radio ZLW.

RADAR/VHF: A signal station is situated on Taiaroa Head about 1 cable Southward of the lighthouse. Vessels can communicate with the signal station by flashing lamp or radiotelephone.

VHF and MF radiotelephones are fitted in the signal station and continuous watch is maintained on VHF Channel 16 (156.8 MHz) and 2182 kHz. The call sign is "ZMH 32".

If using VHF, initial contact should be made on Channel 16 (156.8 MHz), and Channels 14 (156.7 MHz) or 12 (156.6 MHz) should be used for subsequent working.

If using MF, initial contact should be on 2182 kHz, 2162 or 2012 kHz should be used for subsequent working. In addition to these frequencies the MF radiotelephone is fitted with the following crystal tuned frequencies:

Transmitter: 2045, 2129, 4125 and 4419.4 kHz.

Receiver: 2045, 2129, 2444, 2638, 4125, 4419.4, 6215.5 and 6218.6 kHz.

Dunedin Signal Station: A radio station is situated in the Otago Harbour Board Office at the Western end of Birch Street Wharf. Continuous watch is maintained on VHF Channel 16 (156.8 MHz), and Channels 14 (156.7 MHz) and 12 (156.6 MHz) are fitted as working frequencies. The call sign is "Dunedin Harbour Radio".

Notice of Arrival: Estimated times of arrival together with maximum draft must be passed to the Harbour Master by radio 12 hours, and confirmed 4 hours, before reaching the Pilot station. This is in addition to any previously submitted notification. Radar operated at station on request has range in excess of 20 miles to North and East.

TUGS: 2 tugs, each 2,000 h.p. (30 ton bollard pull). Tugs used in vicinity of wharves turning, berthing and unberthing, etc. Tug's lines used without charge.

BERTHING:

Port Chalmers

Beach Street Wharf: 2 berths with a total length of 375 m., each with road and rail connections. 2×5 ton electric cranes and a large transit shed 152.4 m.×30.48 m. Half the shed is used as a container packing depot, the remainder being available for use by conventional cargo vessels. The outer berth is supported by 9 acres of reclaimed land used mainly for the storage of export logs and woodchips. Depths alongside are 10 m. LWOST.

Container Terminal: A 274.3 m. concrete container berth has been constructed at Port Chalmers capable of accommodating vessels up to 260 m. in length at a maximum draft of 11.58 m. LWOST. 2×46 tonne portainer cranes in operation and a 12.54 hectare storage area.

Dunedin:

Wharves with a total length of 950 m. Depths alongside being 8.53 m. at main berths and 7.62 m. to 6.10 m. at coastal berths. All berths have transit sheds with a total floor space of 3,600 sq.m. All berths have roads at sheds, Victoria and Birch Street wharves have rail connection. There are 6× 5 ton electric cranes, 16 fork lift trucks and 10 tractors available for use at wharves.

Roll-on/Roll-off Terminal: A special Roll-on/Roll-off ferry wharf 152 m. long with adjustable stern ramp is supported by 2.83 hectares of paved storage and sheltered shed. Depth alongside being 7.31 m. LWOST.

Ravensbourne Wharf: Situated 1 mile from Dunedin is available for the discharge of bulk phosphate and sulphur via hoppers and conveyor belt direct into works. Maximum size of ship for this jetty 184.1 m. overall. Depth alongside 8.53 m.

LPG Berth: A dedicated berth for coastal gas tankers has been constructed 300 ft. (91.5 m.)×106°T from end of Roll-on/Roll-off wharf.

All berths in the port have fresh water connections, ample floodlighting and telephone facilities.

STEVEDORES: Labour for Saturday work must be ordered by 0830 hrs. Fridays, otherwise by 1430 hrs. for following day. Advise Agents of firm ETA in time to judge this.

Wharf working hours are the same as for most other New Zealand ports: 0700 – 1200 hrs. and 1300 – 1700 hrs. Monday to Friday inclusive with option of additional work 1800 – 2100 hrs. to finish a vessel. 0700 – 1200 hrs. on Saturday, with option of additional work 1300 – 1700 hrs. to finish a vessel.

No wharf work on Sundays or public holidays, but ships are berthed or sailed as required.

Container Terminal shifts: 0700 – 1430 hrs. and 1430 – 2200 hrs. every day of the year.

CRANES: The Container terminal is equipped with 2 Vickers Hoskins Paceco 40 tonne Mach Container Gantry Cranes with an outreach of 33.22 m. and a backreach of 10.67 m.

Also see "Berthing".

MEDICAL: Emergency medical services and full hospital services always available at short notice. Emergency advice by radio available. Top priority given arrangements for landing urgent cases for medical treatment.

TANKERS: Diameter of lines 200 mm.; minor slop facilities only; one tanker discharge berth 220 m. long, 7.5 m. depth alongside at low water. Max. size 184 m. long.

DENSITY: Harbour density 1024 all states of tide.

FRESH WATER: Fresh water is available at all berths. Delivery rates are approximately 15 tonnes/p.h. at Dunedin wharves and 25 tonnes/p.h. at Port Chalmers.

FUEL: Marine diesel, heavy and light fuel oils, and lubricating oils are usually available. Small quantities can be delivered to any berth by tank trucks, and larger quantities can be loaded by pipe-line at the Oil Jetty at a rate of about 100 tonnes/p.h.

GANGWAY/DECK WATCHMEN: Shore watchman not normally required except at entry to oil jetty, such watchman arranged for by ship's Agents. Ships required to maintain own gangway surveillance.

OPENING/CLOSING HATCHES: Automatic hatch gear may be operated by ship's personnel. Manual hatches by shore labour only.

CERTIFICATES: Normal cargo gear and equipment certificates as required for British ports; also Fumigation (Derat) or Exemption Certificate.

CUSTOMS ALLOWANCES: See "Auckland".

IDENTIFICATION CARDS: Not required for British subjects. Alien identification cards to be retained on board in case of need.

CONSULS: Consular Agencies: Denmark, France, Germany, Italy, Netherlands, Norway, Portugal, Sweden.

REPAIRS: Private companies capable of undertaking all forms of repair work are established in Dunedin and Port Chalmers. There is no dry dock, but a 500 tonne slipway capable of accommodating vessels up to 120 ft. (36.6 m.) long is available.

DRY DOCKS: None.

REPATRIATION: Repatriation arrangements can be made.

AIRPORT: Dunedin is served by all internal main airlines with connections to overseas via Christchurch, Wellington and Auckland. Airport 35 minutes (25 km.) from Dunedin City by car.

TIME: N.Z. Standard Time throughout year is GMT plus 12 hours, except that Summer time now operates from last Sunday in October to first Sunday in March. (Add 1 hour).

POLICE/AMBULANCE/FIRE: Police 776011; Ambulance 777111; Fire Brigade 779111; Hospital 740999; Emergency (serious) dial 111 and ask for any service needed.

TELEPHONES: Slot telephones can be put on board with all local calls free, others by cash in slot.

HOLIDAYS: As for all N.Z. ports, i.e. January 1st and 2nd; Good Friday and Easter Monday; Anzac Day (April 25th); 1st Monday in June; Labour Day (Monday, nearest October 24th); Christmas Day and Boxing Day; Waterside Picnic day (Monday at end January). Where New Year and Christmas holidays coincide with Saturdays and/or Sundays, holidays are taken following Monday and/or Tuesday. General cargo not worked on these days nor on Sundays: tankers discharge 365 days: ships arrive and depart regardless of holidays. Container ships worked all days except Good Friday and Anzac Day.

GENERAL: No special moorings are required. Harbour, though tidal, is landlocked and there is no surge at any berth. Tide rise averages 6 ft. above datum (extremes 1.52 m. and 2.44 m.).

Harbour Chart: N.Z.6612 Otago Harbour.

Adjacent Coastal Charts: N.Z.64 Banks Peninsula to Otago Peninsula.
N.Z.66 Taiaroa Head to Nugget Point.

Sailing Directions: New Zealand Port Information Manual.
New Zealand Pilot.

Communications: Dunedin and Port Chalmers are connected with the post, telegraph, telephone, and telex systems.

State Highway No. 1 and the main trunk railway line both pass through Dunedin. Regular road and rail services operate to other South Island towns.

SERVICES: Radar and gyro compass technicians available. Good shop and providore facilities. Compass adjuster usually available. Divers employed by a private company are available for underwater inspections.

SHORE LEAVE: Crew members not restricted ashore.

REGULATIONS: No special local regulations, but all N.Z. ports have very strict rules for garbage collection and disposal, etc. and against oil spillage.

DELAYS: Ample berths normally available. Occasional delays for labour shortage or wet weather (rainfall average 762 mm. per year). Small quantities bunkers available ex-tank wagons at any berth. Larger quantities obtainable by shifting to oil jetty outside cargo work hours or as otherwise convenient.

DEVELOPMENTS: The depths at most berths are presently below standard due to siltation but it is intended that restorative dredging will be implemented to achieve the following objectives in due course:

Berth	*Intended Depth*	
George Street	12.2 m.	(40 ft.)
Beach Street	10.7 m.	(35 ft.)
T & U	8.5 m.	(28 ft.)
Ro-Ro	7.6 m.	(25 ft.)
Rattray Street	8.5 m.	(28 ft.)
X & Y	8.2 m.	(27 ft.)
Birch Street	7.6 m.	(25 ft.)
Cement Wharf	6.7 m.	(22 ft.)
Oil Jetty	8.5 m.	(28 ft.)
Ravensbourne	8.5 m.	(28 ft.)

AUTHORITY: Otago Harbour Board, P.O.Box 1, Dunedin, New Zealand. *Tel:* 024-740-881. *Telex:* Ohbterm NZ 5250. *Cables:* Koputai. *Contact:* K. D. MacLeod, Secretary.

PICTON: 41.17 S. 174.00 E. (See Plan Book)

PORT LIMITS: Inside straight lines from Cape Jackson to Cape Koamaru and from East Head to West Head at Tory Channel Entrance.

DOCUMENTS: See "Auckland".

PILOTAGE DISTRICT: *Queen Charlotte Sound:* Inside a straight line drawn in a 303° direction from Paparoa Point on Arapawa Island to the opposite shore, and the arc of a circle radius 1 mile centred on West Head Light.

Pelorus Sound: Inside a straight line drawn in a 121° direction from Paparoa Point (East of Harding Point) to Alligator Head.

PILOTAGE: Pilotage is compulsory inside a straight line drawn in a 180° direction from Snake Point to the opposite shore, including all the waters of Tory Channel. Pilotage in the Outer Reaches of Queen Charlotte Sound and in Pelorus Sound is optional. Unless otherwise requested, Pilot will board vessels in a position 090°T, 0.6 miles from Motuara Island Light Tower. By arrangement with the Harbour Master, Pilots will board vessels in a position 045°, distance 2.5 miles from Deiffenbach Point Light Tower, East of Snake Point, where a Pilot is not required in the optional pilotage area. By arrangement with the Harbour Master, vessels may enter and leave via Tory Channel, subject to weather, when Pilot will board and leave in a position 135°T, distance 1 mile from West Head Light Tower. Application for a Pilot must be made at least 4 hours before the estimated time of arrival. For vessels arriving at night or during the weekend, application should be made no later than 1530 hrs. on the last previous working day. Pilot boat 14.6 m. in length equipped with VHF radio Channel 16. Call sign "Picton Pilot Launch".

ANCHORAGES: Except during strong N.W. winds, there is a good anchorage Northward of Mabel Island in 16 fathoms for vessels of all sizes.

Quarantine Anchorage: Within the navigable area to Westward of Mabel Island enclosed between the foreshore and a line from Kaipupu Point 047° to the Western extremity of Mabel Island, thence 349° to Wedge Point. Vessels not in quarantine can use this anchorage.

RESTRICTIONS: Controlling depth in approaches to anchorage is 13 m. MLWOS.

MAX. SIZE: Max. length 201 m. Draft 11 m. aft, 8 m. – 10 m. forward depending on length. Vessels of this size can berth at any state of the tide. Longer vessels may be accommodated by arrangement with the Harbour Master.

HEALTH: First entry at a New Zealand port Pratique is granted after vessel berths provided she has a clean bill of health from her last port, otherwise vessel would anchor in the Quarantine Anchorage, where port Health Officer would board. Once clear at the first port in New Zealand no further Pratique is required.

RADIO: Port is equipped with medium frequency and VHF, call sign "Picton Harbour Radio", calling frequency 2182 kHz. Watch is maintained Monday to Friday, 0900 to 0933, 1140 to 1203, 1540 to 1603 hrs. daily and at other times by arrangement. In addition the following schedule is maintained for communication with the road/rail ferries: 0103, 1140, 1640, 2020, 2050 hrs. Sundays only: 1603 hrs.

TUGS: None.

BERTHING: One overseas wharf 240 m. length with accommodation for 2 vessels. Depth at wharf up to 11.58 m.

Two road/rail ferry berths 152 m. long with modern terminal facilities for Roll-on/Roll-off traffic.

STEVEDORES: Agents will provide gangs and other facilities provided Master gives prior notice of his requirements.

MEDICAL: It is necessary for Master to give his Agent as much advance notice as possible. Two doctors reside in the port. Hospital at the port and main hospital at Blenheim, 35 km. by road. Ambulance service available.

DENSITY: 1025.

FRESH WATER: Supplies available at 30 t.p.h. Cost 29 cents/tonne.

FUEL: By tank wagon only.

GANGWAY/DECK WATCHMEN: Required by general harbour regulations and is generally carried out by ship's deck hands.

OPENING/CLOSING HATCHES: Performed by stevedores.

CUSTOMS ALLOWANCES: See "Auckland".

CARGO GEAR: Marine Department control this and regulations are issued accordingly. These regulations are very similar to those in the United Kingdom.

IDENTIFICATION CARDS: Not required.

CONSULS: At Wellington.

REPAIRS: Small repairs undertaken by three companies.

SURVEYORS:

1. Cargo Surveyors available.
2. Lloyd's Register available. Other societies available from Wellington.

REPATRIATION: Crew changes can be made.

AIRPORT: Woodbourne – 36 km. by road from Picton, served by feeder services to Wellington – Christchurch. Local seaplane service from Picton Harbour.

TIME: GMT plus 12 hours. Daylight saving time, plus 1 hour, in force from October to March.

HOLIDAYS: New Year's Day, Anniversary Day, Good Friday, Easter Monday, Labour Day, Sovereign's Birthday, Christmas Day, Boxing Day, Anzac Day, Waterside Workers Picnic Day, New Zealand Day.

POLICE/AMBULANCE/FIRE: Police Tel: 439. Ambulance, through doctor or in case of emergency Tel: 207. Fire, ring exchange operator.

EMERGENCY CO-ORDINATION CENTRE: S.A.R. Co-ordination Centre, Wellington. Tel: 881035. If in port contact Harbour Master.

TELEPHONE: Facilities exist to place telephones on board.

BANKS: Bank of New Zealand, High Street, Picton.

SHORE LEAVE: Allowed.

SHIP SUPPLY SERVICE: No ship supply services operate in this area.

Notwithstanding the above, there are a number of commercial operators in the district who have the capability to provide a variety of supply services.

There are sheltered areas in the outer reaches of the Marlborough Sounds which would be ideal for vessels transiting Cork Strait to take advantage of a ship supply service, incurring a minimum of delays in the process.

The Customs Department have advised that by prior arrangement it would be possible for a vessel in transit to take aboard mail and/or goods from a launch without completing full Customs formalities.

Of the large number of commercial operators in the area, one in Pelorus Sound and one in Queen Charlotte Sound have been selected as examples, with both passenger and freight carrying capabilities, together with the major operator of tourist launches in Queen Charlotte Sound.

1. *Emergencies:*
   Contact: Marlborough Harbour Board, Picton.
   Telegrams: "Marlharb" Picton.
   Radio Call Sign: "Picton Harbour Radio".
   Radio frequencies: MF 2182 kHz or VHF Channel 16.
   Notice Required: 4 hours if possible.
   (NB: Helicopter available ex-Wellington).
2. *General Supply Services:*
   a. Pelorus Sound:
      Contact: Johnsons Barge Services, Cook Street, Havelock, Marlborough Sounds.
      Radio Call Sign: "Havelock Association Radio".
      Radio frequencies: MF 2182 kHz or VHF Channel 63.
      Facilities available: 100 tonne capacity Roll-on/Roll-off Barge, 39 passenger capacity launch.
      Operation Area: Pelorus Sound and approaches, D'Urville Island.
   b. Queen Charlotte Sound:
      Contact: Kenny Barging, Picton.
      Radio Call Sign: "Kenny Base".
      Radio Frequencies: VHF Channel 63.
      Facilities Available: 50 tonne capacity Roll-on/Roll-off Barge, 40 passenger capacity launch.
      Operation area: Queen Charlotte Sound and approaches.
3. *Tourist Launches:*
   Contact: Friendship Tourist Cruises, Picton.
   Radio Call Sign: "Picton Association Radio".
   Radio Frequencies: MF 2182 kHz or VHF Channel 63.
   Facilities Available: Passenger launches of varying capacities up to 91 passengers in restricted limits.
   Operation area: Queen Charlotte Sound and approaches.

Rendezvous points would depend on the needs of the vessel requiring the service, survey limits of the vessel providing the service and weather conditions prevailing at the time.

STORING: See "Prelims" page viii.
1. Storage from trucks only available.
2. No restrictions on storing.
3. Trucks can proceed alongside berth.
4. Forklift trucks can be used to handle stores.
5. Purchase of stores requires Customs Dept. approval.
6. Stevedores available for loading stores.

AUTHORITY: Marlborough Harbour Board, P.O.Box 84, Picton, New Zealand. *Tel:* Picton 270. *Cables:* Marlharb. *Contact:* The General Manager or D. I. Jamison, Harbour Master.

TAHAROA: 38.11 S. 174.42 E.

LOCATION: The Port of Taharoa is situated on the West Coast of the North Island of New Zealand, in Lat. 38° 10.7′ S., Long. 174° 42.4′ E. It is one of the few ports in the world where a solid cargo, ironsand, is pumped in a slurry form and loaded into ships moored at a single point mooring buoy.

Kawhia extended river limits: Taharoa harbour lies within the Kawhia extended river limits, which is delineated by a straight line commencing near Taranaki Point in a 270° direction to the East Point of Gannet Island, then 180°×15.5 miles, thence 090° to the shore.

PORT LIMITS: The port limits is the arc of a circle radius 2 miles centred on the pumping station, Lat. 38° 10.7′ S., Long. 174° 42.4′ E. and the pilotage district is the arc of a circle of radius 3 miles also centred on the pumping station.

There are no known dangers in the pilotage district, and the sea bed depth increases at a reasonably uniform gradient from the beach seaward.

The Motunau Beacons, which are unlit, are established some 4 miles South of the SBM in line bearing 158° (T). This line passes 835 m. inshore of the SBM, and from the North to the point where it crosses the Southern prohibited anchorage line gives a least depth of 22 m.

A 1.5 m. diameter wave rider buoy, which is difficult to see, is positioned some half mile E.S.E. of the SBM.

PILOTAGE: Pilotage is compulsory in the Pilotage District. Application for a Pilot should be made to New Zealand Steel Mining Limited, telegraphic address "Ironsands Taharoa", via Awarua Radio.

Pilots embark and disembark by helicopter. Ships awaiting the Pilot, should lie, head to wind, about 3 miles W.N.W. of the buoy.

Depending on weather conditions ships can be berthed by day or night though much better conditions are required for night berthing. As a general but not absolute rule, ships can be berthed with a significant wave height of up to 3.5 m. and a maximum wind gust of 40 knots. While at night the maximum wave height must be less than 2.0 m., and the wind gusts less than 15 knots.

Also see "General".

ANCHORAGE: Ships awaiting the berth are normally anchored about two miles W.N.W. of the buoy in good holding ground. The anchorage is exposedto the Westward, and in weather conditions in which it is not possible to moor, ships should head out to sea.

Prohibited Anchorage: All that area bounded by straight lines, commencing at the low water mark in position Lat. 38° 10.8′ S., Long. 174° 42.4′ E. Thence to Lat. 38° 11.1′ S., Long. 174° 40.1′ E. Thence to Lat. 38° 10.3′ S., Long. 174° 42.15′ E., thence to the point of commencement.

The Northern and Southern limits are marked by rectangular beacons painted in red and white vertical bands. The Northern Beacons are in line bearing 088° (T), and the Southern Beacons in line bearing 081° (T).

NAVIGATION: *Lights:* Taharoa main light, exhibited from a 16 m. high frame work tower painted in red and white bands, in position Lat. 38° 10.1′ S., Long. 174° 42.15′ E. has the characteristics group flash 2 white every 20 secs. A fixed red obstruction light is also exhibited on the tower.

The SBM has white light flashing every 5 secs.

The wave rider buoy light has the characteristics group flash 3 white every 15 secs.

The prohibited anchorage beacons each exhibit a fixed red vertical light.

RESTRICTIONS: Arrival draft should be: Forward – 3 per cent of the vessel's overall length and Aft – propellor submerged.

HEALTH: *Quarantine:* At least 24 hours before the expected time of arrival, ships must send to New Zealand Steel Mining Limited for onward transmission to the Department of Health in Hamilton, a message detailing the last port of call, the date of departure, and the state of health on the vessel.

Vessels calling regularly at Taharoa are usually given Pratique by radio, though Quarantine Officers reserve the right to inspect the vessel at any time.

RADIO/VHF: *Communications:* Ship loading at Taharoa must advise New Zealand Steel Mining Limited of their departure from the last port before arriving in Taharoa, and give their ETA.

The ETA must be updated 7 days, 3 days and 24 hours before arrival.

The ETA 3 days before arrival is particularly important, as special shift patterns have to be set for loading, which by agreement with the unions, are based on this arrival time.

The port operations centre, which is manned only when a ship is in port or expected, is equipped with radio. (Medium frequency 2182 kHz, single side band, and VHF Channels 9, 10 and 16).

Ships calling at Taharoa should maintain a listening watch on 2182 kHz, at 0833 and 1503 New Zealand standard time, the day before arrival, and call up the Port Operations Centre, call sign "Port Taharoa", on Channel 9 when 2 hours out.

Radio messages to New Zealand Steel Mining Limited should be addressed to "Ironsands Taharoa", via Awarua Radio, or alternatively Auckland Radio.

BERTHING: The berth is a single point mooring buoy, 11 m. in diameter designed by SBM Inc., using a catenary anchor leg mooring (CALM), to secure it to the sea bed. It is capable of mooring ships up to 150,000 tonnes deadweight.

There are 6 anchor legs, arranged radially 60° apart, each consisting of some 347 m. of 102 mm. chain, attached to a 9,000 kg. Bruce Mk II anchor. Each leg is pre-tensioned to 220 tonnes, and has a holding power of 400 tonnes.

The buoy is 1.64 miles offshore in position: Lat. 38° 10.6′ S., Long. 174° 40.25′ E. The depth of water at the buoy is 30 m. at MWL.

Loading: Loading rate 1,200 dry tonnes/p.h. on each line. Sand density 4.64 average.

MOORING: *Mooring Rope:* The mooring rope is a 52 m. endless grommet of 168 mm. diameter two-in-one braided nylon rope, which has a breaking strain of 1,000 tonnes. One end of the grommet is attached to the buoy, and the other end, when the ship is moored, is placed over the ship's single centreline mooring post.

The ship's end of the rope has a 5.5 m. soft eye protected with a chafing sleeve. An heaving eye, which is attached to a 60 m. heaving tail of 80 mm. two-in-one braided polypropylene rope, breaking strain 76 tonnes, is attached 1.5 m from the crown on one part of the ship end eye.

Ship's Equipment: To moor at Taharoa, a ship should be fitted with a mooring post (700 mm. diameter) on the centreline, between 2.0 m. and 3.5 m. from the fairlead. The post should be about 750 mm. in height and the top should slope forward.

The centreline fairlead should have minimum dimensions of 1,400 mm.×1,700 mm., and the bearing surface lined with stainless steel; if this lining is not fitted, all paint should be removed from the fairlead, and the bearing surface coated with tallow, before the ship arrives. Tallow will be supplied by New Zealand Steel Mining Limited, but the ship must provide a suitable bucket, so that it can be transported from the Operation Centre on the helicopter.

A roller on a stand, 1 m. in height, should be positioned about 2.0 m. abaft the mooring post, and set slightly off the centreline.

The ship should have a 300 m.×80 mm. strand polypropylene messenger line, either on a warping drum, or suitably flaked out. To one end of the messenger line a 16 mm. polypropylene heaving line should be attached. The heaving line is then passed through the centreline fairlead, and led down the ship's side, (usually the port side, though the Pilot will confirm this when he boards) to about the after end of No. 1 hatch, from where it will be passed to the service vessel.

MOORING PROCEDURE: The service vessel will have checked the buoy, mooring rope and hoses before the ship arrives, and when the Pilot boards will stand off and wait for the ship to close the buoy. The Pilot will manoeuvre the ship to approach the buoy usually along the line of the hoses, and when about 300 m. from the buoy will instruct the service vessel to pick up the heaving line. The service vessel will then manoeuvre close alongside abreast of where the heaving line is prepared. The heaving line should be thrown to the service vessel foredeck, from where the crew will pass it aft to their winch. When this is done, the service vessel will steam ahead, to a position about 100 m. ahead of the ship, winching in the mooring messenger until there is about 6 m. inboard.

As both the ship and the service vessel steam slowly towards the buoy, the line should be paid out so as to keep the rope slack at all times, but at no stage should the rope be allowed to run aft of the ship's stern.

When the service vessel is close enough, the messenger line will be connected to the heaving tail. As the ship will be moving ahead while this is being done, any slack should be picked up, but under no circumstances should the rope be lifted out of the water between the ship and the service vessel.

As soon as the connection between the messenger and the heaving tail is made, the service vessel will steam clear, and the rope should be heaved in at a steady rate. Normally, the mooring line is stored on a platform on the buoy, so that sufficient weight must be put on the messenger to heave the mooring line into the sea. Once the mooring rope is clear, it is important that as the ship closes the buoy, only the slack in the ropes is picked up.

When the ship is about 15 m. from the end of the main mooring rope, the ship's end eye and 2 flotation covers may be lifted out of the water. Gradually, as the ship moves closer to the buoy, a little more of the rope may be lifted out of the water, until with the ship end eye of the main rope at the bull nose, there is about 15 m. from the stem to the point where the rope touches the water. Should the bows pay off, or the ship move astern, the heaving tail should be slacked down immediately, so as to maintain a minimum distance of 15 m. from the stem to the point where the rope touches the water.

When the rope is actually being made fast, it should hang almost vertically from the centreline fairlead.

HOSES: *Equipment:* The ship's manifold should be on the starboard side, abreast No. 1 hatch, loading through either 1 or 2 lines. The flanges must be standard 150 lb. ASA 12 in. flange, with 12×1 in. holes, 1 hole at the exact top. The hose handling derrick should be capable of plumbing over the manifold with sufficient height to lift a 10.7 m. hose just clear of the deck, and have a SWL of 8 tonnes.

4×15 mm. wire pennants 3.0 m. long, and 4 chain blocks, or tackles, will be required to make fast the hose hang off chains.

Picking up the hose: As soon as the ship is fast, the service vessel will put a dinghy in the water, to bring the No. 1 hose pick-up line to the ship's side. An heaving line should be passed to the dinghy, so that the pick-up line can be brought on board. The pick-up line, which is a 55 m. length of 56 mm. square line polypropylene rope is then used to winch the first hose of the string to deck level where the derrick hook can be attached, and the hose lifted to its full extent.

In marginal weather conditions, a second heaving line should be passed to the dinghy, while the first is still being heaved in. This, when attached to the No. 2 hose pick-up line, is secured to the rail, and can be heaved in later. The dinghy can then be released, reducing the time it has to spend in the water.

When lifting the hose, the derrick should be plumbed about 1.5 m. inboard from the ship's side. This keeps the hose against the ship's side thus reducing the oscillating effect in marginal weather conditions.

With the first hose in the string lifted to its full extent, the hang-off chains can be grappled, brought on board and secured to a 15 mm. diameter wire pennant, attached to a chain block or tackle, so that the length of the unit can be adjusted if necessary.

Letting go the hose: A small wire strop is passed through one of the eyes on the hose nipple, and anchored by an 80 mm. long by 24 mm. diameter stainless steel bar, to which is attached a heaving line. The lifting wire is hooked into the strop, and when all the connecting bolts are removed, the hose is lifted to its full extent and wire pennants disconnected from the hang off chains. The hose is then lowered into the water and when the weight comes off the lifting wire, the bar can be pulled clear.

MEDICAL: There is no resident doctor or nurse. The nearest hospital is in Te Kuiti about 1 hour's drive away over a bad winding road.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: Not possible.

GENERAL: *Provisions:* Supply of provisions, which come from Hamilton, can be arranged if adequate notice is given.

Weather: The prevailing wind is Southwesterly. The winds are usually stronger in Winter and Spring than at other times of the year, though gales can occur at any time, from any direction.

The significant height of the combined sea and swell is above 1.5 m. for 50% of the time, and the maximum recorded sea height has been 12 m.

Customs and Agriculture: Officials from the Departments of Customs and Agriculture will clear the vessel on arrival, and before departure.

Regulations: The general harbour regulations for New Zealand are applicable.

Tidal Streams and Currents: The tidal stream sets Northward with a rising tide and Southward with a falling tide, but these are weak and generally do not affect mooring.

During Southwesterly weather an intermittent current sets Northward parallel to the coast, and can reach a velocity of 1.0 – 1.5 knots.

Agency: New Zealand Steel Mining acts as its own Agent, and will act for others when prior arrangements have been made.

Administration: The Port is under the jurisdiction of the Marine Division of The Ministry of Transport, but is leased to New Zealand Steel Mining Limited, who own the buoy and the loading equipment.

The Pilots are contracted to New Zealand Steel Mining Limited, and remain on board during the time the ship is moored, acting as Loading Masters. A change of Pilots usually takes place at 0630 hrs. and 1830 hrs.

OPERATOR: New Zealand Steel Mining Ltd., Taharoa, Te Anga, RD. 4, Te Kuiti, New Zealand. *Tel:* Te Anga 859. *Telex:* NZ 21172. *Cables:* Ironsands Taharoa. *Contact:* Captain C. F. Durham, Port Superintendent.

TAURANGA (Mount Maunganui): 37.39 S. 176.11 E. **(See Plan Book)**

PORT LIMITS: An arc of a circle of 2 nautical miles radius running from the landward boundary of the foreshore on Matakana Island, and thence into the Bay of Plenty to a position intersection of a straight line with North Rock Light, bearing 273°; thence to North Rock Light; thence in a 180° direction to the landward boundary of the foreshore, and having as its centre, trig. station A, Mount Maunganui, Block 6 Tauranga Survey District.

DOCUMENTS:

3 Crew Lists.
3 Passenger Lists.
1 Search List (on regulation form).
1 Bonded Store.
1 Gift List.
1 Inward Report Check List (C. Form 98).
1 Declaration by Master of Restricted Immigrants.
1 M.O.T. Declaration of Safety Certificate.
1 Maritime Declaration of Health.
1 Cargo Manifest (for each Port of discharge).
1 Derat Certificate.
1 Clearance, Last Port.
1 Poisons on Board.
1 Firearms on Board.
1 Ship's Papers.

ANCHORAGES: 3 sheltered anchorages are situated in the Western Channel of Tauranga Harbour, these include the Quarantine and Explosive Anchorage, and are available for vessels of 152 m., and a maximum draft of 6.00 m. (HW).

RESTRICTIONS: Vessels may enter, berth, unberth, or depart during hours of darkness in fine weather. Tankers are handled during daylight only, except tankers in ballast and gas free which may sail at night. Vessels over 95 m. generally enter or depart on HW or slack LW.

MAX. SIZE: Max. length permissible is 225 m. (229 m. at Harbour Master's discretion), no restrictions on beam. Max. arrival and departure draft at high water is 10.7 m. and at low water 9.20 m.

PILOTAGE: Pilotage is compulsory for merchant vessels of over 100 tons net tonnage; Pilot boards vessel about 2.5 miles N.E. of Mount Maunganui light structure. All vessels inward bound must give 24 hours' notice by radio of their ETA off the port limits. If bound from Auckland or near ports, vessels send their ETA immediately on departure from that port.

A second message confirming or amending the first is to be sent 4 hours before the ETA. Should, however, the vessel expect to arrive later than her 24-hour message, her 4-hour message shall be sent 4 hours before the ETA given in her original message.

All communications, which should be addressed to "Harbour Master, Tauranga", will be attended to at all hours of the day or night.

The pilot launch, which is 15 m. in length, is painted white and equipped with R/T 2182 kHz, 2162 kHz, and 2012 kHz, VHF Channels 16, 15, 14 and 12, and radar.

Vessels awaiting to enter Port may find suitable anchorage in 12 fathoms, 2 miles N.E. of Mount Maunganui. The holding in sand and shell is good in all but extreme conditions.

HEALTH: Radio notification to be sent to "Port Health Tauranga", regarding state of health of crew and ETA 24 hours before arrival.

Pratique is granted by Port Health Officer on arrival. Notification, should be made by radio to Port Health in case of suspected disease or fever on board.

Pratique is automatic if vessel has been previously cleared at another New Zealand port. Radio Pratique may be granted in case of passenger vessels or such vessels as carry a doctor on board.

RADIO: Nearest coastal radio station to Port of Tauranga is "Auckland Radio" – call sign ZLD.

The Harbour Board Watch Office, call sign "Tauranga Harbour Radio", is fitted with VHF and R/T; a continuous listening watch is maintained on Channel 16 and 2182 kHz.

RADAR/VHF: Radar is fitted to the pilot launch and 2 tugs. VHF is fitted to both tugs and pilot launch. Channels 16, 15, 14 and 12 available.

TUGS: 2 tugs are available, each with a bollard pull of approximately 28 and 15 tons. They usually join inward vessels in the vicinity of the Harbour entrance. Tug's lines are normally used, for which there is no extra charge. A third tug (bollard pull 15 tonnes) available if requested.

BERTHING: Berthing normally takes place 30 minutes after negotiating harbour entrance at HW or slack LW. The quay type concrete wharf 1,842 m. in length, (nominally eleven berths), is fitted with wooden spring piling and rubber buffers. A linkspan is situated in the centre of the wharf area.

A 40 tonne SWL multi-purpose crane is in operation on the Southernmost 100 m. of Mount Maunganui Wharf.

STEVEDORES: ETA to stevedoring companies is usually worked in conjunction with ETA to Harbour Master.

MEDICAL: Unless specifically required for arrival, Agents do not require advice. Local medical practitioners are consulted and services of one public and one private hospital are utilised.

TANKERS: Discharge of black and white products is carried out at a specially built tanker berth, permissible draft presently 10.7 m. Both products are discharged through 250 mm. pipe-lines. The flexible connection to ship is 200 mm.

Chemical tankers discharge and load at the same facility. There are no slop facilities available.

DENSITY: Salt water, 1025.

FRESH WATER: Fresh water is supplied by pipe-line at 20 tonnes/p.h., prior arrangements must be made with the Harbour Master for quantities in excess of 1,000 tonnes.

FUEL: Bunkering connections are placed at Nos. 1, 2, 3, 4, 5, 6, 9, 10 and 11 berths. Quantities of L.F.O., 200 secs, Redwood No. 1 and H.F.O. 1,000 secs, Redwood No. 1 can be supplied by prior arrangement with the Oil Companies.

FIRE PRECAUTIONS: The tanker berth is securely fenced and the gate is manned by the Board's Security Staff to prevent entry by unauthorised persons. A pass system operates. Normal precautions are taken. The berth is equipped with a remotely controlled foam monitor and 2 of the Board's tugs are equipped with foam.

GANGWAY/DECK WATCHMEN: Ship's watchmen are usually employed by overseas ships.

OPENING/CLOSING HATCHES: Usually performed by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes or 250 grams tobacco. 1 part bottle of spirits or wine.

IDENTIFICATION CARDS: Not required, but crew list should be handed to the Security Staff. At the Master's discretion temporary passes may be issued for crew guests to gain access to the berth.

REPAIRS: All types of engine and deck repairs are possible. A slipway can take vessels of 610 tonnes displacement and up to 56 m. length.

SURVEYORS: *Registered Cargo Surveyors:* Camping & Rutherford, P.O.Box 5001, Mount Maunganui. Tel: Tauranga 56-988.

Caleb Brett & Sons Ltd., New Zealand. Representatives: G. W. Dunsford & Associates Ltd., 42 Custom Street, Auckland. Tel: 797-171. Telex: NZ 2437. Cables: Dunship, Auckland.

Classification Societies – Surveyors: American Bureu of Shipping: Surveyor N. K. Farell, P.O.Box 1974, Auckland. Tel: 31284. Telex: 21638. Cables: "Record".

Bureau Veritas: Surveyor – J. C. Edwards, P.O.Box 1284, Auckland. Tel: 779-095. Telex: NZ 2531. Cables: "Randship".

Lloyd's Register of Shipping, Principal Surveyor: P. Betteridge, P.O.Box 2682, Auckland. Tel: 733-311. Telex: NZ 21157. Cables: "Lloydsreg".

United States Salvage Association Inc., Non-exclusive Representatives: G. W. Dunsford and Associates Ltd. P.O.Box 4076, Auckland.

REPATRIATION: All facilities exist.

AIRPORT: The airport is situated 1.6 km. from the wharf and is served with regular internal flights to other main centres where overseas flights may be connected with.

TIME: GMT plus 12 hours. GMT plus 13 hours in Summer.

HOLIDAYS: New Year's Day; 2nd January; Picnic Day and Anniversary Day, both in latter part of January; Waitangi Day, 6th February; Good Friday; Easter Monday; Anzac Day, 25th April; Queen's Birthday, 1st June; Labour Day, 26th October; Christmas Day and Boxing Day (12 days).

POLICE/AMBULANCE/FIRE: All connected through automatic exchange, Emergency No. 111.

EMERGENCY CO-ORDINATION CENTRE: When vessels are in port, any queries should be directed to the Harbour Board's Signal Station which is manned 24 hours per day. For specific emergencies (Fire, Police, Ambulance) dial 111.

TELEPHONES: Telephones are placed on board all ships when they arrive.

SERVICES: Local compass adjusters are available. Ship's stores can be provided by local Providore firms. Fumigation can be arranged. Ships' garbage is collected daily. No facilities for discharge of tank washings exist.

STORING: Vessels can be stored by truck – barges not used. Trucks can proceed alongside at the berth and remain close alongside if not interrupting cargo operations.

Forklift trucks may be used to handle stores but normally not necessary. Customs regulations in force when Bonded Stores are being loaded. Not customary for local riggers to be employed to assist with storing.

SHORE LEAVE: Crew are permitted ashore at Master's discretion.

SHIP SUPPLY SERVICE: A small scale launch service is available when required for the ship-to-shore transport of personnel and/or essential stores and/or sick crew members:

1. Harbour Transport Ltd., P.O.Box 260, Tauranga, New Zealand. Tel: 64-075-87276.
2. Faulkner Ferries Ltd, P.O.Box 445, Tauranga, New Zealand. Tel: 64-075-87709.

AUTHORITY: Bay of Plenty Harbour Board, Private Bag, Mount Maunganui. *Tel:* 53039 (Tauranga). *Telex:* Patga NZ 2378. *Cables:* "Harboard". *Contact:* F. M. Williams, General Manager. E. L. Hubbard, Harbour Master. A. J. Herbert, Secretary.

AGENT: Russell & Somers (Bay of Plenty) Limited, 194 Maunganui Road, POB 5087, Mount Maunganui. Tel. 53059. Telex: 2942 "Lumberco". Cables: "Rusticated" Mount Maunganui.

TIMARU: 44.24 S. 171.19 E. (See Plan Book)

PORT LIMITS: 1.5 miles radius with centre at Eastern Extension Light.

DOCUMENTS: See "Auckland".

PILOTAGE: Pilotage is compulsory, and Pilots are available day and night. A vessel requiring a Pilot should remain 1.5 miles seaward of Eastern Extension Mole, near and to South of Entrance Beacon. Vessels should not proceed Northward of line of leading lights on Benvenue Cliff.

Contact Pilot on VHF Channels 16 and 12 ("Timaru Harbour Control"). Pilot boards vessel at Fairway Buoy.

ANCHORAGES: A vessel should anchor in a depth of not less than 12.8 m., sand, and Eastward of harbour light structure, and not within 1.5 miles of Eastern Extension Mole.

RESTRICTIONS: Tidal conditions may affect time of entering harbour.

MAX. SIZE: Length, 198 m. (LOA 227 m. if fitted with bow and stern thrusters); Beam, no limit; Max. permissible draft 9.70 m. HWOST. Time of berthing vessels of over 6.4 m. draft will depend on tidal conditions and at Harbour Master's discretion.

HEALTH: Due to exposed nature of anchorage, incoming vessels are examined and Pratique is granted after a vessel berths. In event that vessel is quarantined, she will be required to return to anchorage without any contact being made with shore.

TUGS: 1 tug, 1100 h.p. and Pilot launch/tug, 460 h.p. available.

BERTHING: Berthing space available, 947 m. with 9.75 m. at LWOST, 197 m. with 9.29 m. at LWOST. and 365 m. with 8.53 m. at LWOST. Loading and unloading by ship's gear; railway lines on all wharves. Rail to Christchurch and Dunedin.

SPECIALISED CARGO HANDLING FACILITIES: *All Weather Mechanical Loaders:* 4 all-weather mechanical meat loaders. Each machine is capable of loading 720 units per hour, to a max. of 2,500 units per hour. Also butter, cheese, frozen vegetables can be handled. Can be used to unload suitable cargoes, e.g. fruit.

Ro-Ro facilities available for coastal vessels.

Roll-on-Roll-off Container Terminal: Terminal available for handling overseas Ro-Ro vessels. Port currently handles ScanCarrier Ro-Ro service to Continent, Gearbulk service to Japan/Korea and Jebsen Service to Near and Far East. Discharge and loading by ship's equipment. Containers handled by forklift, crane/ship's gear. Container cleaning and inspection facilities available.

BULK HANDLING FACILITIES: Two silos with total holding capacity of 2,200 tonnes. Loading rate, 300 tonnes/p.h. into vessel; into silo 120 tonnes/p.h. A modern bulk handling installation with 8 silos providing storage for 11,600 tonnes of lucerne or 13,000 tonnes of grain. Loading in rates by road and/or rail transport, up to 300 tonnes/p.h. Ship loading rates, lucerne 650 tonnes/p.h., grain 700 tonnes/p.h. Inert gas protection provided for lucerne. Wharf conveyor has maximum belt rate of 1,000 tonnes/p.h. Plant able to handle lucerne, all grains and certain types of minerals.

Fertilisers and Sulphurs discharged through 6 mobile hoppers 27 cu.m. capacity each.

CRANES: 1×20 tonne mobile crane, 1×48 tonne crawler crane, 1×30 ton crawler crane, 1×20 tonne crawler crane and 1×6.7 ton crawler crane.

STEVEDORES: Gangs must be ordered before 0700 hrs. weekdays, and before 0900 hrs. Friday for Saturday work.

RADIO/VHF: Timaru Harbour Board has a radio telephone station equipped with both medium frequency and VHF installations.

Call sign "Timaru Harbour Radio", calling frequency 2182 kHz, working frequency 2162 kHz. Fixed watches maintained for a period of 15 minutes every 4 hours, e.g.: 0345 – 0400, 0745 – 0800, 1145 – 1200, 1545 – 1600, 1945 – 2000, 2345 – 2400 hrs. (New Zealand Standard Time) and at other times mutually arranged. VHF call sign is "Timaru Harbour", Channels 6, 12, 16.

MEDICAL: Full medical facilities are available as required, including an excellent public hospital.

TANKERS: 1 tanker berth, discharge through 8 in. hoses.

DENSITY: Specific gravity 1025 at all states of tide.

FRESH WATER: Available at all berths, delivered at up to 25 t.p.h. (cost 48 cents per 1,000 litres).

FUEL: Bunkers available, heavy and medium fuel oil. 24 hours advance notice required.

FIRE PRECAUTIONS: When tankers are discharging, access to wharf is prohibited except to those holding passes. Fire-fighting equipment is placed in readiness on wharf.

GANGWAY/DECK WATCHMEN: Available if required.

OPENING/CLOSING HATCHES: Carried out by stevedores.

CUSTOMS ALLOWANCES: See "Auckland".

IDENTIFICATION CARDS: Not required.

SURVEYORS: Lloyd's Surveyor – Captain A. Grieve.

REPAIRS: Most deck and engine repairs can be undertaken.

REPATRIATION: Facilities exist for effecting crew changes and arranging necessary repatriations.

AIRPORT: Two flights each day to and from Wellington. Christchurch International Airport is 160 km. North of Timaru.

TIME: Approximately March-October New Zealand Standard Time (GMT plus 12 hours). Approximately November-February New Zealand Daylight Saving Time (GMT plus 13 hours). Actual dates of changeover to and from Daylight Saving Time decided annually.

HOLIDAYS: New Year's Day; 2nd January; Picnic Day (port holiday Monday of the week in which 29th January falls); New Zealand Day, (6th February); Good Friday; Easter Monday; Anzac Day (25th April); Queen's Birthday (first Monday in June); Dominion Day (third Monday in September); Labour Day (last Monday in October); Christmas Eve (work ceases midday); Christmas Day; Boxing Day. Work can be arranged only by private negotiation on a voluntary basis.

POLICE/AMBULANCE/FIRE: Emergency No. 111 and ask operator for service required. Other than emergency calls: Police, 84-199 Timaru; Ambulance, 47129 Timaru; Fire Brigade, 47089 Timaru.

EMERGENCY CO-ORDINATION CENTRE: If within the port area contact Harbour Master's Office, in Ritchie Street. Tel: 44199.

TELEPHONES: Can be supplied to vessels at all berths, rental N.Z.$10.80 per day.

STORING: See "Prelims", page viii.

1. Storing by truck only.
2. N/A.
3. Yes.
4. If necessary.
5. None.
6. If necessary.

SHORE LEAVE: Allowed.

SHIP SUPPLY SERVICE: Harbour Board craft will assist with transfer of sick crew.

DEVELOPMENTS: The depth in the entrance channel is being deepened to 10.0 m. HWOST.

Planning for heavy duty berth, reclamation areas and larger capacity tug.

AUTHORITY: Timaru Harbour Board, P.O.Box 76, Timaru, New Zealand. *Tel:* 44199. *Telex:* NZ 4773 Timport. *Cables:* Centreport. *Contact:* The General Manager.

WANGANUI: 39.57 S. 175.00 E. (See Plan Book)

PORT LIMITS: Arc of a circle of 3 nautical miles radius centred at the flagstaff at Castlecliff, sited Lat. 39° 56′ 49″ S., Long. 174° 59′ 23″ E.

DOCUMENTS: See "Auckland".

PILOTAGE: If Wanganui is first N.Z. port, initial application for Pilot and vessel's ETA should be passed to local Agent by radio through one of three Post Office radio stations. If not first N.Z. port, this information should be given to local Agent by Agent at previous port. Final details settled when R/T contact made between pilot station and ship.

Pilot launch "Karere", LOA 41 ft. painted white, high midship wheelhouse. Pilot boards at anchorage position. International signals for Pilot should be used if no R/T contact made.

ANCHORAGES: One anchorage for vessels awaiting to enter.

RESTRICTIONS: Port worked day or night at HW when bar conditions are suitable.

MAX. SIZE: Length 120 m., beam 20 m., draft dependent on bar depths at particular time but usually 5.0 m. max. at HWS. No installations outside main port area.

HEALTH: See "Auckland".

RADIO: Wellington Radio ZLW. R/T frequencies 2182, 2162, 2012.

VHF: Channels 16, 12, 9, 68 and 14.

TUGS: No tug available. Pilot launch used for swinging.

BERTHING: Berthing takes place at HW.

SPECIALISED CARGO HANDLING FACILITIES:

No. 6 Berth: Pipe-line for bulk cement connecting wharf with adjacent silos.

No. 1 Wharf: Direct handling into cool store for fruit.

Portable hoppers used for bulk cargoes to load directly into road trucks.

There are no facilities for containers, roll-on/roll-off traffic, liquid chemicals or LPG carriers.

CRANES: One mobile crane, capacity 4 tons. 3–20 ton from contractor.

STEVEDORES: Requirements for labour should be given with ETA and request for Pilot. At least 24 hours' notice required.
MEDICAL: 24 hours' notice required if possible. Hospital facilities available. Inoculations, certificates, etc.
DENSITY: 1020 at HW. 1005 at LW. These figures vary greatly according to amount of fresh water in river.
FRESH WATER: Plentiful supply through wharf hose connections. Rate of delivery depends on height of ship's filling pipe above wharf level.
FUEL: All grades available but ship has to pump out of road tankers. Amount of notice depends on grade required.
GANGWAY/DECK WATCHMEN: Watchman necessary, either crew member or shore watchman.
OPENING/CLOSING HATCHES: Carried out by stevedores.
CUSTOMS ALLOWANCES: See "Auckland".
IDENTIFICATION CARDS: Not required.
REPAIRS: Minor deck and engine repairs possible.
REPATRIATION: Facilities exist but more easily accomplished at a main port.
AIRPORT: About 4 miles. Airport caters for internal services only.
TIME: N.Z. Standard Time (12 hours in advance of GMT). N.Z. Daylight Time (13 hours in advance of GMT) is kept from last Sunday in October until first Sunday in March.
HOLIDAYS: As Auckland, except Anniversary Day holiday which is that held in Wellington Province. No cargo is worked on these days.
POLICE/AMBULANCE/FIRE: Ambulance, 53909; Police, 54488; Fire Brigade, Wanganui, 58505; Fire Brigade, Emergency 111.
TELEPHONES: Arrangements can be made for placing telephones on board.
SHORE LEAVE: Allowed.
DELAYS: Fresh onshore winds could make entrance unworkable for a vessel waiting to enter. Cargo work stops in rain and in unusually strong wind. Bunkering would be slow if large amount of bunkers required.
DEVELOPMENTS: Development plan in course of preparation but as yet no details of size of any possible new installations or draft increases.
AUTHORITY: Wanganui Harbour Board, P.O.Box 8001, Castlecliff, Wanganui, New Zealand. *Tel:* 46626. *Cables:* Harboard. *Contact:* R. A. King, Harbour Master. T. H. Gibson, Port Captain.

WAVERLEY HARBOUR: 39.51 S. 174.36 E.

LOCATION: Waverley Harbour is located on the West coast of the North Island of New Zealand in the Northern end of the South Taranaki Bight.
PORT LIMITS: Waverley harbour is defined as being all that area of water bounded by the line of mean high water spring tides, and having as its seaward limit the arc of a circle of 2 nautical miles radius centred at 39° 49.6′ S. 174° 36.5′ E, near the mouth of the Wairoa Stream.
DOCUMENTS: Besides the Port Health Doctor, other Government personnel boarding the vessel by helicopter for inward clearance are: 1 Port Health Officer, 1 Customs Department Officer, 1 Agriculture Department Officer.

Port Health Officer will inspect Derat Certificate and (possibly with Agriculture Officer) inspect food store rooms, refrigerated spaces, galley, pantry, etc.

Customs Officer: The Customs Boarding Officer acts for the Immigration Department and the Marine Department and will inspect the following ship's documents: Register, Load Line Certificates, Safety Equipment Certificates, Radio Certificates.

The following documentation is required on Inward Clearance:
1 copy Form 1A General Declaration
1 copy Form 1B Cargo Declaration
1 copy Form 1C Crew List
1 copy Form 1D Passenger List
1 copy Form 3A Ship's Stores List
1 copy Reg Form 2 Search List
1 copy Declaration re Safety Certificates
1 copy List of Poisons
1 copy List of Firearms
For Outward Clearance (Customs):
2 copies Form 1A General Declaration
2 copies Form 1B Cargo Declaration
2 copies Form 1C Crew List
2 copies Form 1D Passenger List
2 copies Form 3A Stores List
1 Passenger Arrival Card for any Crew or Passenger leaving vessel.
Agriculture Officer: on arrival:
2 copies of Ship's Meat Locker
Reg. 1966 Agl. 36.

The Boarding Officer will inspect the vessel's meat locker and inspect the garbage containers.

Australia, United States, Canada and New Zealand meat not loaded in the place of origin, and Japanese meat will be sealed up on vessel's arrival by the Agriculture Officer.

At sailing time, the Agriculture Officer may attend to check on garbage, sealed lockers, etc., together with the Customs Officer, who issues the Port Clearance, to check if all crew are aboard, and that the Bonded Stores Seal is intact.
NAVIGATION AIDS: SBM – radar reflector, white flashing light, one flash every 9 seconds, range 6 miles.
Leading Lights: In transit bearing 355° 33′.
Range Lights: In line bearing 312° 03′.

All four light towers are of louvred timber construction, painted white with vertical centre line painted red.

The pumphouse building immediately to the West of the two leading lights is prominent with a radar visibility of 15 miles.

PILOTAGE: Pilotage is compulsory for Waverley Harbour and under control of the Waverley Harbour Master.

It has become customary for vessels to await the Pilot in a position 2 miles South of the SBM. Vessels equipped with VHF will be contacted accordingly when within range. Information on weather conditions and time of Pilot boarding will be advised through this medium.

Due to the nature of the coastline adjacent to Waverley Harbour and the weather conditions experienced, the transportation of the Pilot (and other port official personnel) is effected by helicopter, from a pad adjacent to the Administration building. It must be ensured that radio antennas running respectively from foremast to bridge and bridge to aft, as the case may be, are lowered clear in good time prior to the arrival of the helicopter and the landing area cleared of loose gear and portable foam fire equipment properly charged, available for immediate use at the landing area.

Berthing to the S.B.M. is normally effected in daylight, dependent on weather conditions, visibility and flying conditions being acceptable to the helicopter pilot and in concurrence with the Master of the vessel.

For night flying a wind sock will be erected for the helicopter pilot's observation of wind direction, and vessel is to be floodlit overall.
ANCHORAGES: The recommended anchorage off the port is a rectangular area 0.75 miles East and West, and 1 mile North and South of a position 3 miles South of the SBM. The bottom is sandy in 11 to 12 fathoms and the holding ground is reported fair.

A safe anchorage for vessels having to leave the buoy and/or to await suitable weather to moor to the buoy is recommended in Golden Bay. Distance is approximately 90 miles S.W. of Waverley, the approaches are clear and lights on Farewell Spit and Separation Point, of 15 miles and 12 miles respectively, most reliable. The holding ground is good and depth of water 15 to 16 fathoms.
WEATHER: The Harbour and SBM is exposed to the West through South to South-east. The swell conditions caused by Westerly and South-westerly weather are considerably reduced by the shallow ground to the Westward, but Southerly swell rolls in unhindered. Very sudden changes of weather are experienced on this coast with the rapid movements Eastward of cold fronts over the Tasman Sea.
PRATIQUE: Vessels arriving at Waverley on consecutive voyages Japan/New Zealand should radio to "Health, Wanganui" 24 hours before arrival Waverley, advising number of passengers and crew, and "All Healthy" in which case Pratique is automatically granted without any acknowledgement to the vessel.

If a vessel has any suspected diseases on board this information should be stated in the radio message to "Health, Wanganui". The Port Health Doctor will then attend on board on arrival for inspection of all International Health Certificates, and carry out vaccinations as required.

The doctor will supply, on arrival, N.Z. Maritime Declaration of Health Form H-Q2 for completion by the vessel. It is customary to procure an additional form for the following voyage to facilitate easy inward health clearance thereafter.
RADIO: There is no Government Radio Station at Waverley. Vessels trading to Waverley use ZLD Auckland Radio, ZDB Awarua Radio, or ZLW Wellington Radio.

Advice of Arrival: Vessels to radio ETA to "Wavemarine" Waverley on departure from last port, and 48 hours and 24 hours prior to arrival.

In addition to the vessel's ETA to "Wavemarine", arrival draft and details of the hatch loading plans should be advised.

Vessels equipped with VHF should listen in on Channel 14 (156.7 MHz) when in range of Waverley Harbour.

Base Station is at the Shiploading Pump Station, on board the tender vessel *Otapiri* and a remote control unit is fitted in the main administration building. Mobile units are also employed during the loading operation.

Base Station Channels are:

Channel 6 – 156.3 MHz	Intership.
Channel 9 – 156.45 MHz	Private and Loading.
Channel 14 – 156.7 MHz	Port Operations/Docking.
Channel 16 – 156.8 MHz	Safety.

Meteorological information for shipping is broadcast by the Coast Radio Stations ZLW, ZLB and ZLD at frequent scheduled times. ZLW broadcast by radio telegraph on 417.5 kHz, ZLD 487.5 kHz.
BERTHING: Vessels will be secured to the S.B.M. by a single 21 in. nylon hawser with chafing chains at each end.

When the carrier approaches the buoy, the tender vessel "Otapiri" will receive a 3 in. messenger rope from the carrier. "Otapiri" will then shackle the messenger to a 10 in. polypropylene pick-up rope. The carrier heaves the messenger and pick-up rope inboard until the chafing chain passes through the bull nose.

Dedicated ships secure the chafing chain to a quick release hook fitted for this purpose.

Ships without a quick release hook should advise "Wavemarine" by radio on departure from last port.

It is essential that two or three good heaving lines be available with the messenger rope in the first instance to pass to the tender vessel, to avoid any delays in mooring.
HOSES: The floating loading hose string comprises eleven 35 ft. lengths of hose, with the shipboard end supported by a steel buoy. After mooring is completed the tender vessel will tow around the floating hose underneath the pick-up derrick, plumbed over the manifold connection on the port side of the foredeck abaft the forecastle head. The pick-up buoy of the hose-end will have shackled into it a 30 ft. length of polypropylene, of 7 in. circumference, to which is attached a 100 ft. length of 2.25 in. circumference for passing to the vessel. The 7 in. polyprop is hove up to the rail and hooked into the vessel's cargo hook. The flange elbow with attached camlock coupling is then hove up and connected to the vessel's deck hose manifold. The hose is presently supported on the ship's derrick and stayed fore and aft after coupling up has been completed.

It has been estimated that after the iron sand slurry has been loaded, and the excess water decanted from the surface of the cargo, that the bulk density of the iron sand should be 190 lb. to the cubic foot.

BERTH DESCRIPTION: The single point mooring buoy of 11 m. diameter is moored in 57 ft. at low water, 1.5 miles from the shore in position 39° 51′ 02.2″ S. 174° 35′ 52.14″ E.

LOADING: All compartments to be loaded should be clean with all drain sumps and double bottom butterworth hole filter places clear.

If weather conditions permit, the vessel should arrive with the after hatch lid of each hold open to facilitate visual inspections of the hold decanting eductors.

FRESH WATER/FUEL: Not available.

REPAIRS: Emergency repairs can be arranged, including radio.

MEDICAL: The Port Health Doctor is a qualified doctor of medicine and can be acquainted of any medical problems affecting any crew member; the necessary arrangements can then be made for treatment aboard or ashore, as convenient.

CUSTOMS ALLOWANCES: See "Auckland".

CONSULS: There are no consular representatives at the port of Waverley.

REPATRIATION: Lists of personal effects, accounts of wages, etc., of any vessels' personnel left ashore, hospitalised or deserted, should be available to Agent as early as possible.

A letter of authorisation is required if the Agent is to provide accommodation, meals, medical attention, transportation or travel expenses, and/or cash advances for account of vessel.

SHORE LEAVE: Shore leave for vessel's personnel is not practicable.

GENERAL: No Port Authority personnel remain on the vessel during the loading period at the SPM Buoy.

The Marine Department require that all vessels, while moored, "shall at all times be kept in readiness to proceed to sea".

The Pilot who is the loading master for Waipipi Iron Sands Limited will accept the Notice of Readiness for the vessel, and acts as Agent for all the vessel's requirements. It is customary for the Pilot/Loading Master/Agent to be accommodated on board the vessel during her period on the buoy.

Whistle signals in an emergency may be used for medical, police, etc., as required.

Storing is accomplished by helicopter, cost of which is borne by the ship.

No garbage is to be thrown over the side of the vessel whilst she is on the New Zealand coast and moored to the buoy. Garbage must be retained on board and not dumped until the vessel is one day's steaming clear of the Northern point of New Zealand.

AUTHORITY: Waipipi Iron Sands Limited, Beach Road, P.O. Box 137, Waverley, New Zealand. *Tel:* 390. *Telex:* NZ 3284. *Cables:* Wavemarine. *Contact:* V. S. Wein, General Manager. *Tel:* 386 (Private).

WELLINGTON: 41.17 S. 174.46 E. (See Plan Book)

PORT LIMITS: All the waters comprised within the harbour of Wellington having as their outward seaward limit the arc of a circle running from the landward boundary of the foreshore at Fitzroy Bay and thence into Cook Strait and thence to the landward boundary of the foreshore at Island Bay, such arc being an arc of a circle 3 nautical miles radius and having its centre at a point on the Outer Rock of Barrett Reef in the harbour of Wellington.

DOCUMENTS:

Port Health Authorities:

Maritime Declaration of Health (1 copy).

Crew List, stating name, rank, sex and nationality (1 copy).

Current International Derat Exemption Certificate.

Customs Authorities: See "Auckland".

Agent:

Crew List, stating name, rank-rating, sex and nationality (1 copy).

Freight Manifest (3 copies).

Note: Manifests should be airmailed by loading port to arrive in New Zealand at least 1 week prior to vessel's arrival.

Stowage Plan, airmailed same as Manifest (2 copies).

Agricultural Authorities:

Agriculture Quarantine Service – Ship's Meat Locker Regulations 1966. A Master's Certificate is required if there are pets on board.

PILOTAGE: The Pilotage District is the same as for Port Limits. Pilotage is compulsory within that area of the pilotage district being Northward of a line drawn 090° from Gordon Point through the rear leading light on Hope Shoal to the Eastern shore, for all merchant vessels over 100 n.r.t., except vessels whose Masters have Pilotage Exemption Certificates and to which exemption applies.

Pilot Boarding Place: Pilots will normally embark West of the line of the leads in a position 232° × 2.1 miles from Pencarrow Light. In heavy Southerly weather it may be necessary to embark or disembark the Pilot in smoother water at or near the compulsory limit. The Master will be advised by the Pilot if this is necessary.

Pilotage by Leading or Signalling: Extract Wellington Harbour Board Bylaws: No. 14(c):

"In that part and area of the Pilotage District in and for which pilotage is optional it is hereby determined and declared that leading of ships by or signalling to ships from a pilot boat under the conduct of a Pilot shall be pilotage which may be requested by a Master as a service for his ship either inwards or outwards if the circumstances are such that by reason of adverse sea or weather conditions the Pilot available to pilot the ship decides that in the optional pilotage area he is not or will not be able with safety to board or disembark from the vessel requesting his services".

Notice for Requiring Pilot: The pilot vessel is not normally on station outside the entrance, and all vessels requiring a Pilot are required to give 24 hours' notice by radio of their expected time of arrival at the pilot boarding place. A second notice confirming or amending the first is to be sent 4 hours before the expected time of arrival. In the event of a ship expecting to arrive earlier than the time given in her 24 hour message, the 4 hour message shall be sent 4 hours before the new expected time of arrival. Should, however, the vessel expect to arrive later than her 24 hour message, her 4 hour message shall be sent 4 hours before her expected time of arrival given in her original 24 hour message. All communications, which should be addressed "Harbour Master, Wellington", will be attended to at all hours of the day or night.

Should it not be possible to give previous notice of arrival it may be up to 1.5 hours after a vessel is sighted by the signal station on Beacon Hill before a Pilot may board the vessel.

ANCHORAGES: Depth in anchorages 15 m. to 22 m.

Fairway: Within portion of harbour lying inshore and to Westward of a line drawn from Post Point, the Easternmost point of Oriental Bay, in a 349° direction, to Kaiwharawhara Shore.

Inner Anchorage: Within portion of harbour lying between the Eastern boundary of Fairway Anchorage and a line drawn from Point Jerningham, in a 359° direction to Kaiwharawhara Shore.

Outer Anchorage: Within portion of harbour Eastward of Inner Anchorage.

Note: Vessels anchoring in Outer Anchorage should take up a position well up towards Kaiwharawhara.

Explosives Anchorage: Within that portion of the harbour contained in a circle with a radius of 0.3 nautical miles having as its centre a point bearing 000° true, distant 1.45 nautical miles from Point Halswell Light Beacon or in such other place within the Harbour of Wellington as may be specified by the Harbour Master on any occasion having regard to weather conditions.

Caution: It is advisable when anchoring (especially when in light draft) to drop 2 anchors in an Easterly and Westerly direction, veering from 75 to 90 fathoms of cable, as it frequently blows hard with heavy gusts of wind off the high land that surrounds the harbour, causing a vessel to sheer about. In very strong winds a ship will lie much easier by having both anchors down. A strict visual and radio watch should be kept.

Prohibited Anchorages: Anchorage is prohibited within 152 m. of the jetty situated on the N.E. side of Somes Island.

RESTRICTIONS: *Entering and Leaving:* All vessels may enter or depart during the hours of darkness. Berthing is carried out at any state of the tide.

Max. draft permissible: 9.75 m. (32 ft.) plus the height of the tide in moderate conditions. Also see "Berthing".

Max. length of vessel – No limit. Max. beam of vessel – No limit.

Tides: Tidal range: Neaps 0.92 m., Springs 1.04 m. Tidal stream in Entrance Channel: Neaps 0.5 knots, Springs 0.5 knots, average. Max. 0.8 knots.

Currents caused by wind may increase or decrease the effect of tidal streams, according to direction.

HEALTH: *Health Officer's Examination Ground:* Within that portion of the harbour contained in a circle with a radius of 0.2 nautical miles, having as its centre a point bearing 347° (true), distant 0.56 nautical miles from Point Jerningham Light Beacon or in such other place within the Harbour of Wellington as may be specified by the Harbour Master on any occasion having regard to weather conditions. Until Patique has been granted vessels arriving from ports beyond New Zealand must not proceed inwards beyond the limits of this area.

†Berths for tugs and pilot launches

¶Berths for fishing vessels

SPECIALISED CARGO HANDLING FACILITIES:

Container Facilities: The container handling complex at Thorndon comprises 2 berths each 292 m. in length and back-up area (including facilities) amounting to 24.3 hectares. 3 quayside container cranes are available.

Storage of containers: 5,500 (two high) with power outlets for up to 1,376 refrigerated containers.

The Harbour Board owns and operates the container handling cranes and the complex is operated by an independent operator (Container Terminals Ltd.) using straddle carriers.

Roll-on/Roll-off Facilities: There are Roll-on/Roll-off facilities at the Rail Road Ferry Terminal (2 berths) used exclusively by the N.Z. Railways Corporation, which operates a Cook Strait Ferry Service, and at the Taranaki Street Terminal where the Union Steam Ship Co. of N.Z. Ltd., operates a Trans-Tasman and Coastal Service.

Bulk Cargo Facilities: At Aotea Quay there are bulk cement handling facilities operated exclusively by the Golden Bay Cement Co. Ltd. Other bulk handling facilities include those for petroleum products at tanker terminals, bulk bitumen at Burnham Wharf, bulk molasses and wheat at Aotea Quay and bulk tallow at city wharves.

STEVEDORES: Available. No particular ETA advice required except as normally sent by Master.

RADIO:

Radio Telephone: Beacon Hill Signal Station is equipped with both medium frequency and VHF radiotelephones.

VHF: Call sign is "Wellington Harbour Radio". Calling, Channel 16. Working, Channel 12, 13 and 14. A continuous watch is maintained on Channel 16.

Medium Frequency: Call sign is "Wellington Harbour Radio", calling frequency only 2182 kHz, working frequency 2012 kHz. A continuous watch is maintained on 2182 kHz.

Port Operations: Vessels equipped with radiotelephone when within harbour limits must maintain a listening watch on 2182 kHz or Channel 16 to ensure immediate contact if required. Only calls for information on harbour conditions, berthing, or safety of navigation will be accepted.

Vessels are notified of their berth by radio telephone (VHF or MF) or morse lamp from Beacon Hill (viz Wellington Harbour Radio). On occasions this may be confirmed by Pipitea Tower.

Signal Stations: Beacon Hill: A signal station (Wellington Harbour Radio) is situated on Beacon Hill, about 2 miles N.N.W. of Pencarrow Head. A continuous visual watch is maintained.

Pipitea Tower: A yellow and black chequered signal tower is situated 355 m. Westward of the S.E. corner of the Thorndon Container Terminal. This tower is not manned continuously.

TUGS: The Harbour Master may direct the Master of any vessel to engage the services of a tug or tugs and also direct the manner in which the tug or tugs shall be used. 3×2,700 b.h.p. Voith Schneider tugs, guaranteed bollard pull 28 tons, speed 12 knots, all 3 tugs are equipped for fire fighting duties and 2 for salvage duties. The tugs are owned by Wellington Harbour Board.

MEDICAL: 4 hours' notice is sufficient for Agent to mobilise the service concerned. For minor attention it is sufficient that Master advises Agent on arrival. Hospital facilities are available.

TANKERS: Tankers can berth alongside Seaview, Point Howard, Aotea Quay, Burnham and Miramar Wharves. See also "Restrictions-Entering and Leaving".

Side hose connections are to be used at all wharves. Boiler and galley fires are not required to be extinguished.

Discharge of oil cargoes is permitted during hours of darkness. During the hours of darkness pipe-lines must not be disconnected without first obtaining permission of the Harbour Master. All precautions must be taken to avoid oil pollution of the harbour. Scuppers must be plugged and absorbent material kept at hand in case of spillage.

Point Howard Wharf and Seaview Wharf are exposed to the weather and in the event of a Southerly gale special attention must be paid to the vessel's moorings.

Details of industry pipe-lines serving these wharves are as follows:

Seaview Wharf:	1×150 mm. pipe 3×100 mm. pipes 2×350 mm. pipes 1×250 mm. pipe 1×200 mm. pipe
Miramar Wharf:	1×200 mm. pipe
Point Howard Wharf:	1×250 mm. pipe (chemical products)
Aotea Quay:	1×300 mm. pipe 1×200 mm. pipe
Burnham Wharf:	1×250 mm. pipe 1×250 mm. pipe (bitumen)

FRESH WATER: Available at all wharves.

DRY DOCKS: *Floating Dock:* A floating dock capable of lifting a vessel of 17,000 tons displacement is available. The principal dimensions of the dock are:

Length over platforms	178.00 m.
Length over keel blocks	162.46 m.
Overall width	35.81 m.
Clear width between fenders	26.52 m.
Depth of water over keel blocks	7.62 m.
Height of side walls	10.67 m.

The dock is fitted with fire and wash-down services, air compressors, telephone and electrical plant for lighting and power distribution. A 5 tonne electrical portal travelling crane of the mast type is installed on the Eastern wall of the dock.

Four guide dolphins are situated at the entrance of the floating dock to facilitate the working of vessels entering or leaving.

Slipway: Patent slipway available to accommodate vessels up to 250 tons.

Floating Crane: Harbour Board has an 80 ton revolving and self-propelling floating steam crane of sufficient radius and height to serve the largest vessels when floating in light draft conditions.

DENSITY: Water salinity varies but at approaches to berths it is between 32 and 36 parts per thousand.

FUEL: Lubricating oil: Available at all wharves.

Boiler fuel oil and diesel oil: Available at Burnham, Miramar, Aotea Quay, Seaview and Point Howard Wharves.

REPAIRS: Major repairs can be undertaken. There are machine shops and foundries. Diving equipment and the services of trained divers are available for underwater inspections and repairs. Marine Radio and Radar Services, licensed compass adjusters.

SURVEYORS: Marine surveyors from the Marine Division, Ministry of Transport and Lloyd's Surveyors are available.

GANGWAY/DECK WATCHMEN: Shore watchmen available.

OPENING/CLOSING HATCHES: Work normally carried out by stevedores. Only time crew are to open and close top hatches is when advised by stevedore. In case of hydraulic hatches in tweendecks, crew are to open and close, not stevedores.

CERTIFICATES: Customs Department require Ship's Register on arrival. Marine Department require:

- Load Line Certificate.
- Tonnage Certificate.
- Certificate of Registry.
- Convention Certificates, i.e.
  - Safety Equipment Certificate.
  - Safety Radio-telegraphy Certificate.
  - Safety Construction Certificate.
  - Exemption Certificate (if any).
  - If passenger ship, Passenger and Safety Certificate.
  - Cargo Gear Register.
  - Certificates for all Cargo Gear, i.e. runners, spans, shackles, swivels, etc.
  - Derat Certificate.
  - Oil Pollution Certificate.

CUSTOMS ALLOWANCES: See "Auckland".

IDENTIFICATION CARDS: Not required.

CONSULS: Argentina, Australia, Austria, Belgium, Great Britain, Canada, Chile, People's Republic of China, Czechoslovakia, Denmark, Ecuador, Egypt, Finland, Fiji, France, Federal Republic of Germany, Greece, Iceland, India, Indonesia, Ireland, Israel, Italy, Japan, Republic of Korea, Malaysia, Mexico, Netherlands, Norway, Papua New Guinea, Peru, Philippines, Poland, Portugal, Romania, Singapore, South Africa, Sweden, Switzerland, Thailand, U.S.A., U.S.S.R., Western Samoa, and Yugoslavia.

REPATRIATION: Facilities are available for crew changes and arranging any necessary repatriations.

AIRPORT: Situated 7 km. S.E. of City Wharves by road; regular internal and Australian services.

TIME: Local time is GMT plus 12 hours in Winter, (Daylight saving of one extra hour during Summer months).

HOLIDAYS: New Year's Day (1st January); 2nd January; Wellington Province Anniversary Day (22nd January); Waterside Workers Union Picnic Day (generally observed on Monday of the week 29th January falls); Waitangi Day, (6th February); Good Friday; Easter Monday; Anzac Day (25th April); Sovereign's Birthday Observance (first Monday in June); Labour Day (fourth Monday in October); Christmas Day (25th December); Boxing Day (26th December).

Note: Pilotage services available public holidays. Container vessels at container berths work on public holidays.

POLICE/AMBULANCE/FIRE:

	Routine	*Emergency*
Wharf Police	723-000	Dial 111 and ask operator for service required
Ambulance	722-999	
Fire Brigade	850-188	

TELEPHONES: Vessels may be connected to telephone system at city berths by application to the Harbour Master.

SHORE LEAVE: Crew members are allowed shore leave at all times.

SERVICES: *Shore Electricity:* Available at all berths. Type AC, voltage 230 or 400, 3 phase 60 amps (or more on request) 50 Hertz.

GENERAL: For nautical and more detailed information on New Zealand ports, refer to the following publications which are kept up to date by the issue of Notices to Mariners in respect of nautical matters:

New Zealand Port Information Manual
New Zealand Pilot
New Zealand Nautical Almanac

These publications and up to date charts are available from New Zealand Government Shipping Offices.

Garbage: Garbage may only be disposed of in accordance with strict Government regulations and must be arranged with the Harbour Board. Special cans will be supplied as required and collected regularly by truck. Cans must not be placed on the wharves.

DEVELOPMENTS:

Kaiwharawhara: Future reclamation planned.

AUTHORITY: Wellington Harbour Board, Queen's Wharf, Wellington. P.O.Box 893. *Tel:* 728-899. *Telex:* NZ 30504. *Cables:* "Harbord Wellington". *Contact:* T. J. Blewman, Secretary.

WESTPORT: 41.45 S. 171.40 E.

LOCATION: The port is situated at the mouth of the Buller River and has a bar at its entrance. Two breakwaters approximately 155.5 m. apart form the entrance and farther within are 3 tide training walls.

Passage over the bar is considered impracticable when the river is in flood or during a N.W.'ly gale. In bad weather the sea breaks heavily over the outer part of the bar.

The town of Westport and wharves are situated on the Eastern bank of the Buller River, about 1.5 miles within the entrance.

PILOTAGE: Pilotage is compulsory. All vessels should notify the Harbour Master of their intention to enter at least 12 hours before arrival. No vessel must attempt to enter the port until authority to do so is received from the signal station. In the event of a Pilot being unable to board, a vessel will be led through the bar.

Pilotage District: All the waters comprised within the harbour of Westport having as their outward seaward limit the arc of a circle running from the landward boundary of the foreshore Westward of the Western Breakwater and thence into the Tasman Sea and thence to the landward boundary of the foreshore Eastward of the Eastern Breakwater such arc being the arc of a circle 1.5 nautical miles radius having as its centre the signal station on the Western Breakwater.

Signal Station: The signal station is in a square concrete building with a white lattice signal mast and is situated about 1.5 cables within the head of the Western Breakwater. It has a large white diamond painted on the seaward wall and white horizontal bands on the East and West walls. Vessels can communicate by radiotelephone, VHF, or by morse signalling lamp. Call sign: "Westport Harbour Radio".

Visual watches are maintained for pilotage purposes and for all vessels entering and leaving harbour (at the Harbour Office situated at the lower end of the Crane Wharf).

APPROACHES: *Cape Foulwind:* A light flashing every 12 seconds, visible 21 miles (nominal range 14), is exhibited at an elevation of 70.40 m. (231 ft.) from a white concrete tower situated on Cape Foulwind, a headland about 6 miles Westward of the harbour entrance. The light is obscured when bearing more than 242°.

Main Harbour Light: A light flashing every 5 seconds (flash 1 sec.), visible 8 miles, is exhibited at an elevation of 19.8 m. (65 ft.) from a white lattice tower on the signal station situated about 1.5 cables from the head of the Western breakwater.

Caution: At night, care must be taken not to mistake the powerful electric lights of a coal industry situated about 9 miles Eastward of Westport, or the lights of cement works about 3 miles Westward of Westport, for the harbour lights.

Directional Light: A fixed red, white, and green directional light is exhibited from the same tower as the Main Harbour Light. This light is redirected to suit the best water over the bar. The arcs of the sectors from East to West are red 12°, white 2°, and green 6°, and their nominal ranges 12, 16, and 12 miles respectively.

Radio Masts: Red fixed obstruction lights are shown from radio masts situated about 8 cables S.S.W. and 5.5 miles Westward of the main harbour light.

Landmark: Three chimney stacks, each 60.7 m. (199 ft.) in height, close together with two adjacent silos, are situated about 4 miles Westward of Westport. They are of white appearance and are conspicuous from seaward.

Entering: When within 2 miles of the harbour entrance or on the Harbour Master's advice, steer to bring the main leading beacons on the Eastern Full-tide Wall in line. On entering between the breakwaters, the inner leads will be in line at approximately abeam of the signal station and course should be altered to starboard to maintain the inner leads in line. Pass the white flashing light on the Western Half-tide Wall on starboard hand. These inner leads direct ships between the Western Half-tide Wall and the Eastern Full-tide Wall. When abeam of the fixed light on the Eastern Full-tide Wall, this light will change colour to fixed green; on observing this change steer for the wharves.

Note: Wharf working lights close to the line of the outer leads will be extinguished as and when required for vessels which have notified their intention to enter.

Floodlights: Two powerful floodlights are exhibited from two lattice-work towers, 29 m. (95 ft.) in height, situated in the railway yards at Westport. These lights, about 3.75 cables apart, are in line bearing 163°. They must not be used for navigational purposes.

ANCHORAGES: Vessels can anchor in Buller Bay in depths of from 18.3 m. to 23.7 m. (10 to 13 fathoms). A recommended berth is in a position 2 miles Northward of the signal station.

Caution: There is poor holding ground Eastward of the entrance to the harbour and in the S.W. part of Buller Bay. Vessels should be prepared to proceed to sea directly there are signs of wind rising from the West to North quarter, as anchorage in Buller Bay is unsafe during N.W. gales. A falling barometer and lightning Westward and S.W. of Westport are almost certain indications of deteriorating weather conditions.

Quarantine Anchorage: In the open roadstead within the navigable area enclosed in a circle having a radius of 2 nautical miles from the signal station, or such other position within the aforesaid area as may be indicated by the Westport Harbour Authorities in accordance with existing local weather conditions.

RESTRICTIONS: All vessels, may, depending on weather, bar and draft conditions, enter, berth, unberth, and depart during the hours of darkness. Vessels berth and unberth at or near HW.

MAX. SIZE: LOA 131.7 m. Beam – no restriction.

Bar Depths: Depths over the sand and shingle bar vary between 1.8 m. (6 ft.) and 3.6 m. (12 ft.) at chart datum.

River Depths: There is ample depth in the river for all vessels which can cross the bar. Vessels up to 106.7 m. (350 ft.) in length can turn in the harbour at HW neaps provided they do not draw more than 4.9 m. (16 ft.) forward; vessels up to 131.7 m. (432 ft.) in length can use the port, but there is only swinging room if drawing not more than 3.2 m. (10 ft. 6 in.) forward.

VHF: Westport Harbour Radio and tug on VHF.

RADAR: A radar station, having a maximum range of 15 miles, operated from the signal station by the Westport Harbour Authoritie (Position of scanner Lat. 41° 43′ 54″ S., Long. 172° 35′ 15″ E.). Maste of vessels equipped with VHF or radiotelephone may request from th Harbour Master's Office, during conditions of restricted visibilit particulars of their bearing and range as shown on the radar screen. Th information given will be in the following form:

According to my observation you are bearing ………… degre ………… miles from the Westport Radar Station.

TUGS: A single-screw tug of 329 h.p., the "James O'Brien", is equippe with VHF and radiotelephone. The tug can be made available for use short notice. The radio call sign is ZMYT; watches are kept only whe the tug is in use.

BERTHING: *Crane Wharf:* A quay-type wharf 670.6 m. (2,200 ft.) length of wooden construction which has 243.8 m. (800 ft.) of useab berthage with depths of 5.8 m. (19 ft.) below chart datum alongside. Th bottom is shingle.

The deck level is 7.2 m. (23 ft. 6 in.) above chart datum.

Merchandise Wharf: A quay-type wharf of wooden construction situate about 243.8 m. (800 ft.) farther Southward to Crane Wharf. Maximu berthage is 152.4 m. (500 ft.) with depths alongside of from 4.3 m. 5.2 m. (14 ft. to 17 ft.) below chart datum. The bottom is shingle.

The deck level is 6.5 m. (21 ft. 3 in.) above chart datum.

In the inlet to the lagoon, from the seaward end of the Crane Wha there is a wharf used for Harbour Authority vessels.

CRANES: 3×15.2 tonne (15 ton) movable electric cranes with 18.3 (60 ft.) outreach are situated on Crane Wharf.

MEDICAL: Local hospital for minor ailments. Base hospital Greymouth. Dentist locally available.

FRESH WATER: Available.

FUEL: Diesel and lub oil available in limited quantities in drums.

REPAIRS: One foundry and one machine shop for minor repairs.

SURVEYORS: Stationed at Greymouth and Christchurch.

GENERAL: *Berthing Signals:* These are given from the signal statio Vessels drawing more than 2.4 m. (8 ft.) must inform the signal static on arrival of their draft.

Tidal and Bar Information: All information regarding bar conditions ar tides is communicated by radiotelephone, VHF, or morse signallir lamp.

Tides: Heights of tides above chart datum are:

MHWS	3.26 m. (10.7 ft.)	MHWN	2.53 m. (8.3 ft.)
MLWS	0.27 m. (0.9 ft.)	MLWN	0.88 m. (2.9 ft.)
Range	2.99 m. (9.8 ft.)	Range	1.65 m. (5.4 ft.)

A tidal gauge, situated in the Harbour Master's Office, show automatically the depth above chart datum.

For information concerning heights and times of high and low wat see New Zealand Nautical Almanac.

Tidal Streams and Currents: Outside the bar the flood stream se Westward and the ebb stream Eastward. The rate of the tidal stream least about the time of HW and during 1 to 2 hours before and after HW

During river freshes, which may occur at any time of the year, the rive current in the harbour attains a rate of from 8 to 10 knots.

The tides rise highest with Easterly winds and lowest with Wester winds.

Currents set across the bar according to the direction and force of th wind. Strong winds from the West and S.W. cause Easterly sets wi rates of up to 6 knots; Easterly winds cause sets to the Westward wi less effect.

Berthing Light: A small quick-flashing amber light is placed on the ber at night to indicate where the vessel's bridge should be place alongside.

Garbage: Refuse must be kept on board. No arrangement is made for i collection.

Communications: Westport is on the railway. There are connections Christchurch and Greymouth. There are also bus services to Greymout and Nelson daily (Sundays excepted). The domestic airport lies South the port.

Customs: Westport is a Customs sub-port controlled by the Collector Customs, Greymouth.

REGULATIONS: The Master of any vessel which touches the bar whe outward bound shall inform the Harbour Master by radiotelephone, VH or morse signalling lamp after he is clear of the bar. This will b acknowledged by the Harbour Master or the watchkeeper on duty at th Harbour Master's Office.

AUTHORITY: Ministry of Transport – Marine Division, P.O.Box 12 Palmerston Street, Westport, New Zealand. *Tel:* (0289) 7248. *Contac* Captain C. S. Baugh, Harbour Master.

WHANGAREI: 35.45 S. 174.21 E. (See Plan Book

PORT LIMITS: From a point due South of the summit of Sentinel Roc thence to a point 5 cables due East of Sentinel Rock, thence to a poi 5 cables due East of Bream Head, thence to a point 5 cables due East Tutukaka Head, thence to Tutukaka Head.

DOCUMENTS:

3 copies Passenger List.
3 copies Crew List.
1 copy Search List (Form 2).
1 copy Stores List (Form 3).
1 copy Prohibited and Restricted Immigrants.
1 copy Poisons List.
1 copy Animals and Birds List.
1 copy List of Firearms (not cargo).
1 copy Arrival Manifest (Form 1).
1 copy List showing the gross tonnage of cargo for discharge New Zealand.

PILOTAGE: Compulsory. Pilots embark on the line of leads 141°/321° at the seaward extremity of Pilotage District, i.e. up to 1.5 miles South-Eastward of the Fairway Buoy. In heavy Easterly weather, it may be necessary for pilot vessel to lead ship in through the Outer Channel and embark in the lee of Frenchman Island.

Pilots are available all hours day and night subject to prior minimum notice of 24 hours being received during normal week-day working hours. Second notice confirming or amending first to be sent 4 hours before expected arrival. The Pilot supplies a set of Harbour bylaws. Pratique, Agriculture and Customs clearance is normally undertaken on arrival at berth.

Pilot boat is equipped with VHF. Working frequency is Channel 11, but Channels 6, 8 and 16 are also fitted. Pilot vessel *Manaia* – call sign ZM3830; pilot vessel *Ngapuhi* – call sign ZM2146. Range approximately 20 miles. *Manaia* painted blue, varnished housing, yellow funnel: *Ngapuhi* painted blue, white housing, yellow capping rails.

Pilot ladder with manropes required.

ANCHORAGE: Is situated 5 to 10 cables Eastward of the Fairway Buoy in 12 to 20 fathoms (21.63 m. – 36.57 m.) of water in the section enclosed by the Fairway Buoy bearing 225° T to 315° T. Holding ground good in fine sand, but exposed to Easterly weather.

Harbour Anchorage. At Marsden Point, 2 cables West of Passage Island light, in 5 fathoms (9.14 m.) of water. Max. draft 7.31 m. (24 ft.). Good holding ground, sand and shell bottom.

RESTRICTIONS: Controlling depth in entrance channel 15.24 m. (50 ft.) MLWS. Depth in upper harbour channel maintained at 8.53 m. (28 ft.) MLWS.

MAX. SIZE: Marsden Point: Oil Refinery dolphin berths, LOA no restriction, draft 15.24 m. (50 ft.), Cargo berth LOA 182.88 m. (600 ft.), draft 8.52 m. (28 ft.)

Port Whangarei: LOA 182.88 m. (600 ft.), draft 9.44 m. (31 ft.).

HEALTH: All vessels examined by Health Officer on arrival.

RADIO/VHF: The station is Marsden Point, Whangarei. Call sign "Whangarei Harbour Radio" Continuous 24-hour watch is maintained on VHF Channels 16 and 11, range 40 miles. Medium frequency, call sign ZLKW, listening watch on 2182 KHz., working frequency range 200 miles. Station transmits on 2012, 2045, 2162 and 4139 kHz.

RADAR: Tugs and pilot boat *Manaia* fitted with radar.

TUGS: Available. Tugs equipped with VHF. Tugs usually secure to vessels entering in vicinity of Frenchman Island. Numbers of tugs normally used are: 1 tug for vessels up to 25,000 d.w.t., 2 tugs for vessels up to 45,000 d.w.t., 3 tugs for vessels up to 65,000 d.w.t. 4 tugs over 65,000 d.w.t. Unberthing: 1 tug is normally required for vessels under 25,000 d.w.t., and 2 tugs for all other vessels, subject weather conditions.

BERTHING: Marsden Point Oil Berths (2) – operated by the New Zealand Refining Company, Marsden Point. LOA no restriction. Max. draft 15.24 m. N.Z. Refining Co. places restrictions on vessels in excess of 125,000 tonnes displacement.

Marsden Point Cargo Berth (1), LOA 182.88 m., max. draft 8.53 m.

Port Whangarei berths (3), LOA 182.88 m., max. draft 9.44 m.

Portland berths (2), bulk cement berth; LOA 82.89 m., max. draft 5.63 m. cargo berth; LOA 106.68 m., max. draft 5.63 m.

SPECIALISED CARGO HANDLING FACILITIES: Portland bulk cement loading jetty.

Port Whangarei, 7 portable hoppers for use discharge of bulk cargoes. Cargon system of butter loading.

STEVEDORES: Confirmation of arrival time 4 hours before ETA or revised ETA, whichever is earlier is required. Notice of arrival during a week-end or public holiday must be given not later than 1400 hrs. on the last working day preceding arrival.

MEDICAL: Hospital and dental services available.

TANKERS: *ETA Advice:*

96 hours before arrival:

(a) ETA to Agent, and if more than one grade, state discharge preference.

Whether the vessel can discharge two grades simultaneously if required.

Best estimate of discharge and ballasting times including details of any mechanical defect which may hinder the discharge.

Quantity and origin of "slops" on board.

Amount of free water in the "slops" and stowage of same, i.e. in a special "slop" tank or commingled with the cargo. If the latter is the case, the total contents of the tank is also required.

Amount of water in the main cargo.

Also arrival draft fore and aft.

(b) Request for permission to lie alongside for repairs if so required.

(c) Bunker, fresh water, stores, medical, repairs, and all other requirements.

(d) If ship's first visit then advise full details of manifold connections.

24 hours before arrival:

Confirmation of ETA to Agents and Harbour Master. If ETA is Saturday, Sunday or a Monday Public Holiday, notice must be given before 1400 hrs. on previous Friday. Also, advise that vessel is oil tight.

4 hours before arrival:

Final ETA to Harbour Master, confirming or amending 24 hour advice. Also see "Radio/VHF".

Berthing: Marsden Point Oil Berths – Vessels up to approximately 30,000 d.w.t. are berthed at any state of the tide and swing bow to tide before berthing.

Vessels in excess of 30,000 d.w.t. are berthed at high and low slack water only. Max. draft LW 13.1 m.; max. draft HW 15.24 m. Ship's gangway should be positioned 6.09 m. upstream of hose connections prior to arrival.

The Pilot will board approximately 1.5 hours before high or low water for vessels in excess of 30,000 d.w.t.

Restrictions: Due to limited operating height of hose gantry at both berths, vessels must at all time restrict the vertical distance from top of manifold to waterline to 15 m. or less. Experience has shown that, as a general rule, vessels with a moulded depths of 17.4 m. (57 ft.) or less, can comply, whereas vessels over this moulded depth would have to work ballast and cargo concurrently, either permanent ballast only, or permanent ballast and cargo tank ballast. On some ships, the latter may necessitate suspension of discharge to avoid cargo contamination.

During the ballasting operation a safe trim must be maintained and every care must be taken to ensure that no oil escapes into the waters of the harbour.

Tankers over 100,000 tonnes/s.d.w. will be requested to stop discharging if the wind reaches 40 knots from any direction. Hoses will be disconnected and the Master will be requested to load additional ballast if safe and practical to do so. If the wind increases to 45 knots 2 tugs will be in attendance under jurisdiction of a Pilot if the vessel has less than 50 per cent of summer deadweight aboard.

When 60 knot winds are expected, 2 tugs will be used irrespective of deadweight.

Loading/Discharging: Slop reception facilities are available. Diameter of load/dischage line 10 in. ASA.

Regulations: Vessels must be oil tight. Prior to entering an inspection is made by the pilot boat to confirm this.

All deck scuppers must be plugged and made oil tight.

Masters must ensure that all doors, openings, etc. are kept closed during discharge/loading or ballasting operations.

All tank openings, sighting and ullage ports must at all times be fitted with antiflash gauze covers.

DENSITY: 1025.

FRESH WATER: At Northland Harbour Board wharves by hose 20 t.p.h. at 40 cents per 1,000 litres. Refinery jetties limited and arranged by Refinery.

FUEL: Available from berths (viscosities 3,500 secs. Red 1. 1,500 secs. Red 1 and MDO).

OPENING/CLOSING HATCHES: Usually carried out by stevedores.

CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes or 0.5 lb. tobacco or 50 cigars permitted each crew member. Wine/spirit: one opened bottle wine/spirits for each crew member.

A New Zealand flag ship arriving from overseas may have a concessionary allowance.

IDENTIFICATION CARDS: Refinery passes are required when berthed at the Refinery wharves. Passes are brought on board by Agent.

CONSULS: None.

REPAIRS: Most repairs undertaken.

DRY DOCKS: None. 1 slipway capable of receiving vessels up to 1,500 tonnes/d.w.

REPATRIATION: Facilities exist.

TIME: GMT plus 12 hours. Daylight saving time observed from early October to early March.

HOLIDAYS: The following are recognised holidays: New Year's Day; 2nd January; Anniversary Day (usually last week in January); Waitangi Day (6th February); Good Friday; Easter Monday; Anzac Day (25th April); Sovereign's Birthday (first Monday in June); Labour Day (fourth Monday in October); Christmas Day; Boxing Day; Waterside Workers Picnic Day.

POLICE/AMBULANCE/FIRE: Telephone 111 for emergency, and ask for service required.

EMERGENCY CO-ORDINATION CENTRE: Contact any harbour radio station or police station.

TELEPHONES: Available at wharves.

SHORE LEAVE: Allowed.

FIRE PRECAUTIONS: Fire fighting tug on duty 24 hours a day. Tankers to have fire wires fore and aft.

SURVEYORS: 1. Cargo Inspectors are readily available and are employed by ships' Agents, usually in the form of a reputable Master Mariner working for the Harbour Authority.

2. Surveyors for Lloyd's, American Bureau, Bureau Veritas etc., should be arranged through the offices of the surveyor required in Auckland.

AIRPORT: 12.8 km. (8 miles) from Port Whangarei; regular daily internal flights.

SERVICES: Tank cleaning, radio and radar repairs. Compass adjuster from Auckland.

SHIP SUPPLY SERVICE: Harbour Board craft will assist with transfer of crew and stores in an emergency.

REGULATIONS: Issued by Pilot on arrival.

DELAYS: Tidal delays and berth vacancies.

AUTHORITY: Northland Harbour Board, Private Bag, Whangarei, New Zealand. *Tel:* 87-099. *Telex:* NZ 2955. *Cables:* Harbour Whangarei. *Contact:* P. N. McKellar, Deputy General Manager and Harbour Superintendent.

Nicaragua

GENERAL

DOCUMENTS: *Consular Documents:*

The Consular Law of October 26, 1904, amended by a decree of September 5, 1952, provides that "Nicaraguan Consuls must, regardless of the flag of the vessel, visa, certify or draw up in conformity with the Master; the crew list and the passenger list, or the "no passengers" declaration, or changes in any of the lists, when for that voyage, the lists were visaed, certified or formulated by the Nicaraguan Consul, or where there is none, by the Consul of a friendly country".

There is much confusion in enforcing of the Consular Regulations, since often consular clearances in ports of loading that are not the last port of call before reaching Nicaragua are complete, that is with visa of all forms, not merely the manifest. Visa of the original bill of lading by the shipper is also required, a procedure that is later monitored by Customs through the import policy. The fine for failure to comply with this requirement is 100% of the FOB value of the goods.

Required Prior to Arrival:

Arrival Notice:

48 hours before the vessel's arrival in the Pilot Waiting Area, the Shipping Agency must submit to the Port Authority the form entitled "Arrival Notice" in 5 copies.

24 hours before, the ship's arrival is reported in writing to the Captain of the Port, Customs, Maritime Health and the Delegation of the Agricultural Ministry.

Information on Cargo for the Port:

The arrival notice is accompanied by a stowage plan, if any, plus a breakdown of the cargo to be unloaded. At least the total tonnage of cargo to be handled is to be reported.

Additional Requirements:

If the ship carries export cargo, that fact must be reported to the Port Authority 2 to 6 days in advance, according to the amount of cargo, so that the ship can tie-up at the pier most suitable for unloading its cargo.

On Arrival:

Type of Document	*Number and Distribution of Documents*						
Basic Forms	*Captain of Port*	*Customs*	*Security*	*Maritime Health*	*Agriculture*	*Port Authority*	*Total*
General Declaration	1	3	–	–	1	2	7
Cargo Manifest	2	2	–	–	1	2	7

Dangerous Cargo List	–	–	–	–	–	2	2
List of Cargo to be Loaded	–	–	–	–	–	–	1
Stowage Plan of Cargo to be Loaded	–	–	–	–	–	2	2
Tally Books	1	7	–	–	1	7	16

(a) This form is not required, but if it is available, carry 3 copies.
(b) Customs checks the clearance from the last port and remits it to the Captain of the Port.
(c) With consular visa.
(d) 3 visaed manifests for each port of loading are required, but 1 visaed and 2 without visa are acceptable.

Other Requirements:

In the port of Corinto, the following documents must be submitted:

Basic Forms: Cargo Manifest, 20 copies, 3 of which must be visaed. Crew List, 8 copies, 3 of which must be visaed. Passenger List, 8 copies, 3 of which must be visaed. Ship's Stores List, 8 copies, 3 of which must be visaed. Maritime Health Declaration, 2 copies.

Additional Documents: Clearance from the last port, certified. Ballast Manifest, 12 copies, 5 of which must be visaed. Voyage Memorandum, 10 copies. Bill of Lading, 3 sets for each port of loading. Stowage Plan, 3 copies. List of Cargo Distribution, 4 copies. Tally Books, 10 copies.

Prior to Departure:

Before clearance, a report is submitted to Customs on export cargo, so that it can be compared with the export policies.

The vessel's clearance permit is requested from the Captain of the Port, which requires payment of 84 cordobas for this service, and for the official visit.

Customs considers the ship cleared and countersigns the clearance permit when the following payment vouchers have been submitted to it:

Mayor's Fee	300.00 cordobas
Municipal Welfare Fund	300.00 cordobas
Maritime Health Official Visit	56.00 cordobas
Agriculture Official Visit	30.00 cordobas
Customs Administration Fees	14.00 cordobas for unloading 21.00 cordobas for loading and unloading or, loading only

Certification that the vessel's documents were approved by the Nicaraguan Consul at the last port of call before arrival in the country. If there is no consulate, the Port Captain's declaration is accepted. If the documents are visaed and stamped "fees to be collected in Nicaragua", the fees amount to 207 cordobas (US$31), which are divided as follows:

Clearance Permit	US$ 9.00
Manifest	US$10.00
Crew List	US$ 6.00
Passenger List	US$ 6.00

If consular visa is not obtained, Customs charges twice the rates mentioned.

If the cargo comes from other ports and is bound for Nicaragua, only a visaed manifest is required, which costs US$10. Failure to comply with this requirement is punishable by a fine of US$50 for each manifest.

PIRACY: Report dated 1982.

"Our vessel was off the East coast of Nicaragua at Lat. 14° 10′ N., Long. 83° 07′ W., on the morning of January 31st. The main engine was stopped for minor repairs when an armed motor boat with seven men and no identification attacked our ship putting hundreds of bullet holes in the bridge, funnel and elsewhere but not injuring any crew. The attack commenced at 1115 hrs. and was broken off at 1145 hrs., when the vessel got back under way".

CORINTO: 12.30 N. 87.11 W. (See Plan Book)

ARRIVED SHIP: Vessels are considered as arrived only after having negotiated the entrance channel and are safely inside the proper harbour; vessels at the Pilot station are not considered as having arrived.

DOCUMENTS: (Also see "General" before first port).

For the official clearance, the following authorities will board the vessel:

The Port Captain
The Public Health Delegate
The Delegate from the Ministry of Agriculture and Livestock
A representative of the Port Authority
Two Customs Officers
A representative of the steamship agency.

Each vessel must present documents legalised by the Nicaraguan Consul from the port of origin of the cargo as well as from the last port of call before Corinto. The documents required are the following:

	Legalised	Non-legalised
From the port of origin of the cargo:		
Cargo Manifest	3	18
Bills of Lading	—	2
Tally Books	—	14
From the last port of call:		
Manifest	3	18
Clearance	1	—
Crew List	—	6
Passenger List	3	6
Stores List	—	6
Health Declaration	—	6
Voyage Memorandum	3	10

In the cases where there is no Nicaraguan Consul at the port of origin of the cargo or at the last port of call, the documents may be legalised by the Consul of a friendly nation or can be certified by some competent authority of the port certifying that there is no Nicaraguan Consul in said port. When a vessel brings cargo for Corinto from the last port of call, then it must also bring both sets of documents mentioned above, the manifest in the second group being replaced by the Cargo Manifest.

Once these documents are satisfactorily received, the vessel is declared in "Free Pratique" or rather, officially cleared and numbered by the Port Authorities.

Vessels are cleared, numbered and attended in their successive order of arrival with the exception of vessels loading perishable cargo (bananas). In Corinto there is no preferential treatment given to these vessels since they operate on their own special berth.

To clear the vessel for sailing, the only requirement is the presentation of a Customs Solvency Certificate and the Clearance for the next port of call extended by the Port Captain.

Customs: Customs assigns 2 Customs Guards to each vessel docked or anchored, the vessel being under the obligation to provide these guards 3 meals daily. Besides meals, guards on anchored vessels must be given a cabin since watches are made in shifts.

PILOTAGE: The Port Authority must receive in writing from Agents advice regarding vessel's ETA 72 hours prior to vessel's arrival and a confirmation 12 hours prior to arrival. All advice must be sent through Agents by cable via Balboa or Limon Station. Pilotage is compulsory on all vessels exceeding 500 g.r.t or exceeding 7 ft. draft. Pilot boards 1 mile off Isla de El Cardon.

ANCHORAGES: The anchorage inside the harbour can accommodate 6 – 10 vessels, depending on size and draft.

RESTRICTIONS: The port is open 24 hours; however, entry is restricted in accordance with tide and vessel's draft. Access channel and turning basin dredged to 13.0 m. – 13.2 m. Due allowance should be made for heavy swell if necessary. Speed limit 8 knots in Corinto Bay, and 5 knots in the vicinity of berths or other craft.

MAX. SIZE: Maximum permissible length 650 ft., 80 ft. beam. Draft controlled by depth of water in approach channel and state of swell (typical draft 10 m.).

RADIO: ETA cables are generally routed via NBA Balboa Station or TIM Limon Station, and received through Tropical Radio & Telegraph or All America Cable.

VHF: The Port Authority has a VHF station to communicate directly with all vessels nearing the port.

HEALTH: After entry and vessel has berthed or anchored, 3 long blasts are given requesting Free Pratique; after these blasts the Authorities board the vessel together with the Agent's representative and proceed with distribution of the documentation. In the event of any suspected disease on board, the action to be taken will be given by the Representative of the Health Department. There is no automatic Pratique even though vessel is proceeding from another port in the same country.

Although the port is open 24 hours, vessels arriving after 2100 hrs. are not boarded by the Authorities until 0600 hrs. the following day, unless the vessel will berth and commence operations immediately. This being the case, Free Pratique is granted regardless of the hour. This arrangement is restricted to 0100 hrs. as gangs are not allowed to commence operations after that hour.

TUGS: Compulsory for berthing and unberthing. The tug joins vessel just after vessel passes Buoy No. 7. Tug's lines are generally used: however, at times ship's lines are used. There is no charge for use of tug's lines. 1 tug of 2,182 h.p. (30 ton bollard pull), 1 tug of 1,100 h.p. and one launch of 167 h.p. available.

BERTHING: There is no preferential berthing, and berthing is indicated by the Port Authority. Vessels are attended to in the manner "first come first served".

Berthing facilities are as follows:

1. Container Pier, length 240 m. Depth alongside 13 m. (Designed for 25,000 d.w.t. vessels).
2. Concrete Pier (Container Pier extension of this Pier). Length 370 m. (2 berths). Depth alongside 12.1 m.
3. A special berth with conveyor-belt system for loading of carton boxes such as bananas, frozen meat, as well as the handling of inbound and outbound cargoes such as fertiliser and cottonseed meal. Bananas can be loaded into 4 hatches at one time at a rate of 4,500 boxes per hatch per hour. Depth alongside at LW is 11.2 m.

Port Authority equipment includes fork-lift trucks with capacity up to 7,000 lb., 6 tractors with 5,000 lb. capacity, 95 trailers with 4,000 lb. capacity, 10 trailers of 40 tons for 20 ft. and 40 ft. containers, 3 front end loaders for 20 ft. and 40 ft. containers and 3 barges (2×60 ton and 1×80 ton capacity).

CRANES: Two mobile cranes, capacity 30 tons and 25 tons and 1×40 ton crane for containers.

STEVEDORES: *Working Hours:* The Port gives service 24 hours a day under the following schedule:

From 0700 to 1200
From 1300 to 1800
From 1900 to 2400
From 0001 to 0600

Each shift is of 8 hours. Meal hours are from 0600 to 0700; 1200 to 1300 and 1800 to 1900. The first shift commences at 0700 and is completed at 1600; the second shift is from 1600 to 2330. When a vessel announces with sufficient notice its intention to work during night-time continuously until the following day then a second shift does not work a full 8 hours but is relieved at 2200 hrs. and completely new gang takes over from 2200 until 0600 the following day.

When a vessel does not wish to work during the entire night, it may do two things: (1) Suspend all operations at 2330; (2) Work with the gangs of the second shift up until 0230 hrs. of the following day after which time the gangs of said second shift cannot continue working. Normally gangs are called at the following fixed official hours: 0630, 0930, 1230, 1530, 1830 and 2130, however on special occasions and with the approval of the syndicate, it is possible to integrate gangs at any hour of the day.

Average Cargo Handling Rates:

Exports:	Tonnes per gang hour
Cottonseed meal in bulk	48
Raw sugar in bulk-dumped by hand	48
Cottonseed in bags	45
Coffee in bags	45
Sesame seed in bags	45
Cotton in bales of 250 kilos each	40
Frozen meat	28
Lumber	12

Imports:	Tonnes per gang hour
Drums	40
Wire rolls	40
Bulk cargo (discharged by clam-shells)	35
Fertilisers – insecticides in bags	30
Vehicles (by weight)	30
Paper rolls	27
Wheat (by aspirators)	20
Oats (by aspirators)	15
General cargo	15

TANKERS: The only tankers which frequent this port are those of Esso Standard and Parcel Tankers. There is one tanker berth; depth alongside 12.2 m. and each of the above-mentioned companies have their particular load/discharge lines.

The Esso tankers only discharge oils, the Parcel tankers discharge solvents and occasionally others load cotton seed oil.

There are 9 lines belonging to the consignees ranging from 4 in. to 12 in.

Loading rates:		Tonnes per hour
Molasses	12 in. pipe	140
Bunker or asphalt	8 in. pipe	409
Aviation gasoline	6 in. pipe	237
Hexane	6 in. pipe	240
Aromatics	6 in. pipe	203
Chemical Products	6 in. pipe	210
Turpentine	6 in. pipe	125
Coconut oil	4 in. pipe	60
Lubricants	4 in. pipe	45
Tallow	4 in. pipe	35

MEDICAL: There are several doctors in the port and most of the Agents have a particular doctor to their service. Hospital facilities are also available. No particular inoculation is required.

DENSITY: (Average) Rainy season 1014, dry season 1020.

FRESH WATER: Fresh water is available and is supplied from connections on the pier, by gravity, at a rate of approximately 10 t.p.h.

FUEL: Corinto cannot supply bunkers. In emergencies small quantities of bunkers and/or diesel oil may be supplied by private firms.

GANGWAY/DECK WATCHMEN: After entering, 2 Custom Officers are placed on board all vessels and their meals must be furnished on board.

OPENING/CLOSING HATCHES: If vessel is equipped with regular hatch boards or pontoons, stevedores open and close hatches as well as swing out booms. However, if covers are of the McGregor type or mechanical, the crew has to do the job.

CERTIFICATES: Ship's Registry Certificate is required from ships making their first call at the port.

CUSTOMS ALLOWANCES: There is no limit on tobacco allowance to be held out of Bond but crew members are only permitted to take 2 packages of 20 cigarettes ashore. Crew not permitted to take any alcohol ashore. Anyone trying to do so will be subjected to heavy fine through Master of their vessel.

IDENTIFICATION CARDS: Crew members allowed ashore if they wish to do so after being previously identified by means of a seaman's book or a passport. This document is kept by the Customs Guard at the foot of the gangway and given back to the crew member when he returns to the vessel.

CONSULS: In Corinto:

Colombia
Costa Rica
Denmark
Ecuador
El Salvador
France
Honduras
Mexico
Sweden
Venezuela

REPAIRS: There are no shipyards; no large scale repairs available. Small motors and generators may be repaired in shops in Corinto and Chinandega.

AIRPORT: The airport at Managua is approximately 150 km. from the port and served by regular airlines with daily flights.

REPATRIATION: Can be effected.

SERVICES: *Provisions:* There are several ship chandlers operating in the port who are in position to supply vessels with provisions necessary and required by stewards, engine or deck departments.

Laundry: The same ship chandlers can take care of any amount of laundry. Drycleaning can be done by these suppliers in the nearby city of Chinandega.

Cleaning: There are special gangs of labourers in the port who work on vessels doing odd jobs such as cleaning, chipping, painting, etc.

Transportation: For anchored vessels, there is a very efficient ship-to-shore launch service.

There is taxi service available for transportation by day or night to any part of the country. There is an air-conditioned express bus service between Corinto and Managua under the following schedule:

From Corinto	0400 hrs.	arrive Managua	0645 hrs.
From Corinto	0600 hrs.	arrive Managua	0845 hrs.
From Managua	1445 hrs.	arrive Corinto	1800 hrs.
From Managua	1745 hrs.	arrive Corinto	2030 hrs.

Hotels: There is a small third-class hostel in the port, however in the city of Chinandega there is the Hotel Cosiguina with all the modern conveniences and facilities desired. Chinandega is connected to Corinto by a modern highway.

TIME: Local time is Central Standard Time, GMT minus 6 hours. There are no alterations during the year.

HOLIDAYS: Official holidays are: January 1st (New Year's Day); Holy Thursday; Good Friday; May 1st (Labour Day); May 3rd (Local Patron Saint's Day); July 14th (Annullment Chamorro-Bryan Treaty); September 14th (San Jacinto Independence Battle Day); September 15th (Independence Day); October 12th (Columbus Day); December 25th (Christmas Day).

In accordance with regulations, no work will be done on these days, however, from experience, with the only exception of May 1st (Labour Day), all other holidays are workable under special arrangement.

POLICE/AMBULANCE/FIRE: Police 269; Ambulance 313; Fire 421.

SHORE LEAVE: Allowed. See "Identification Cards".

DEVELOPMENTS: Projected installation of bulk handling plant, additional warehouses and extension of pier by 1,500 ft. with 2 transit sheds, new administration building, stevedores shed, equipment shed and repair shops; re-designing of range lights and buoys and increasing amount of same, also area for Industrial Park.

A 40 ton container handling crane, 70,000 lb. capacity front loader, tractors and trailers have been ordered for the container berth.

SHIPMASTER'S REPORT: August 1981.

Documents:

12 copies Ship's Particulars.
3 Legalised and 7 without Visa Ballast Manifests.
3 Legalised and 7 without Visa Passenger Lists.
10 copies Negative List.
3 Legalised and 7 without Visa Crew Lists.
3 copies Crew Declaration List.
3 Legalised and 7 without Visa Store Lists.
7 copies Mail List.
Vaccination List.
Health Declaration Form.

Pilotage: Compulsory. Pilot boards by No. 2 Buoy. Notice required 72 hours.

Anchorage: 3 miles West of Isla Cardon Lt. Depth at LW is 48 ft.

Max. Size: LOA 700 ft., max. draft 28 ft., mean tidal range 8 ft.

Restrictions: Vessels may enter and leave anytime, day or night.

Radio: Limon Radio.

VHF: Port Authority on Channel 16.

Tugs: None available at time of visit.

Nicaragua

GENERAL

DOCUMENTS: *Consular Documents:*

The Consular Law of October 26, 1904, amended by a decree of September 5, 1952, provides that "Nicaraguan Consuls must, regardless of the flag of the vessel, visa, certify or draw up in conformity with the Master; the crew list and the passenger list, or the "no passengers" declaration, or changes in any of the lists, when for that voyage, the lists were visaed, certified or formulated by the Nicaraguan Consul, or where there is none, by the Consul of a friendly country".

There is much confusion in enforcing of the Consular Regulations, since often consular clearances in ports of loading that are not the last port of call before reaching Nicaragua are complete, that is with visa of all forms, not merely the manifest. Visa of the original bill of lading by the shipper is also required, a procedure that is later monitored by Customs through the import policy. The fine for failure to comply with this requirement is 100% of the FOB value of the goods.

Required Prior to Arrival:

Arrival Notice:

48 hours before the vessel's arrival in the Pilot Waiting Area, the Shipping Agency must submit to the Port Authority the form entitled "Arrival Notice" in 5 copies.

24 hours before, the ship's arrival is reported in writing to the Captain of the Port, Customs, Maritime Health and the Delegation of the Agricultural Ministry.

Information on Cargo for the Port:

The arrival notice is accompanied by a stowage plan, if any, plus a breakdown of the cargo to be unloaded. At least the total tonnage of cargo to be handled is to be reported.

Additional Requirements:

If the ship carries export cargo, that fact must be reported to the Port Authority 2 to 6 days in advance, according to the amount of cargo, so that the ship can tie-up at the pier most suitable for unloading its cargo.

On Arrival:

Type of Document	*Number and Distribution of Documents*						
Basic Forms	*Captain of Port*	*Customs*	*Security*	*Maritime Health*	*Agriculture*	*Port Authority*	*Total*
General Declaration	1	3	–	–	1	2	7

Mail List	–	–	–	–	–	–	1
Additional Documents:							
Clearance from Last Port(b)(c)	1	1	–	–	–	–	2
Consular Manifests	–	3(d)	–	–	–	–	3(d)
Crew List(c)	–	1	–	–	–	–	1
"No Passenger" Declaration	1	2	–	–	1	1	5
List of Passengers or "No Passengers" Declaration(c)	–	1	–	–	–	–	1
Manifest of Missing or Extra Packages	5	–	–	–	–	2	7
Sets of Bills of Lading	–	–	–	–	–	1	1
Dangerous Cargo List	–	–	–	–	–	2	2
List of Cargo to be Loaded	–	–	–	–	–	–	1
Stowage Plan of Cargo to be Loaded	–	–	–	–	–	2	2
Tally Books	1	7	–	–	1	7	16

(a) This form is not required, but if it is available, carry 3 copies.
(b) Customs checks the clearance from the last port and remits it to the Captain of the Port.
(c) With consular visa.
(d) 3 visaed manifests for each port of loading are required, but 1 visaed and 2 without visa are acceptable.

Other Requirements:

In the port of Corinto, the following documents must be submitted:

Basic Forms: Cargo Manifest, 20 copies, 3 of which must be visaed. Crew List, 8 copies, 3 of which must be visaed. Passenger List, 8 copies, 3 of which must be visaed. Ship's Stores List, 8 copies, 3 of which must be visaed. Maritime Health Declaration, 2 copies.

Additional Documents: Clearance from the last port, certified. Ballast Manifest, 12 copies, 5 of which must be visaed. Voyage Memorandum, 10 copies. Bill of Lading, 3 sets for each port of loading. Stowage Plan, 3 copies. List of Cargo Distribution, 4 copies. Tally Books, 10 copies.

Prior to Departure:

Before clearance, a report is submitted to Customs on export cargo, so that it can be compared with the export policies.

The vessel's clearance permit is requested from the Captain of the Port, which requires payment of 84 cordobas for this service, and for the official visit.

Customs considers the ship cleared and countersigns the clearance permit when the following payment vouchers have been submitted to it:

Mayor's Fee	300.00 cordobas
Municipal Welfare Fund	300.00 cordobas
Maritime Health Official Visit	56.00 cordobas
Agriculture Official Visit	30.00 cordobas
Customs Administration Fees	14.00 cordobas for unloading 21.00 cordobas for loading and unloading or, loading only

Certification that the vessel's documents were approved by the Nicaraguan Consul at the last port of call before arrival in the country. If there is no consulate, the Port Captain's declaration is accepted. If the documents are visaed and stamped "fees to be collected in Nicaragua", the fees amount to 207 cordobas (US$31), which are divided as follows:

Clearance Permit	US$ 9.00
Manifest	US$10.00
Crew List	US$ 6.00
Passenger List	US$ 6.00

If consular visa is not obtained, Customs charges twice the rates mentioned.

If the cargo comes from other ports and is bound for Nicaragua, only a visaed manifest is required, which costs US$10. Failure to comply with this requirement is punishable by a fine of US$50 for each manifest.

PIRACY: Report dated 1982.

"Our vessel was off the East coast of Nicaragua at Lat. 14° 10′ N., Long. 83° 07′ W., on the morning of January 31st. The main engine was stopped for minor repairs when an armed motor boat with seven men and no identification attacked our ship putting hundreds of bullet holes in the bridge, funnel and elsewhere but not injuring any crew. The attack commenced at 1115 hrs. and was broken off at 1145 hrs., when the vessel got back under way".

CORINTO: 12.30 N. 87.11 W. (See Plan Book)

ARRIVED SHIP: Vessels are considered as arrived only after having negotiated the entrance channel and are safely inside the proper harbour; vessels at the Pilot station are not considered as having arrived.

DOCUMENTS: (Also see "General" before first port).

For the official clearance, the following authorities will board the vessel:

The Port Captain
The Public Health Delegate
The Delegate from the Ministry of Agriculture and Livestock
A representative of the Port Authority
Two Customs Officers
A representative of the steamship agency.

Each vessel must present documents legalised by the Nicaraguan Consul from the port of origin of the cargo as well as from the last port of call before Corinto. The documents required are the following:

	Legalised	Non-legalised
From the port of origin of the cargo:		
Cargo Manifest	3	18
Bills of Lading	—	2
Tally Books	—	14
From the last port of call:		
Manifest	3	18
Clearance	1	—
Crew List	—	6
Passenger List	3	6
Stores List	—	6
Health Declaration	1	—
Voyage Memorandum	3	10

In the cases where there is no Nicaraguan Consul at the port of origin of the cargo or at the last port of call, the documents may be legalised by the Consul of a friendly nation or can be certified by some competent authority of the port certifying that there is no Nicaraguan Consul in said port. When a vessel brings cargo for Corinto from the last port of call, then it must also bring both sets of documents mentioned above, the manifest in the second group being replaced by the Cargo Manifest.

Once these documents are satisfactorily received, the vessel is declared in "Free Pratique" or rather, officially cleared and numbered by the Port Authorities.

Vessels are cleared, numbered and attended in their successive order of arrival with the exception of vessels loading perishable cargo (bananas). In Corinto there is no preferential treatment given to these vessels since they operate on their own special berth.

To clear the vessel for sailing, the only requirement is the presentation of a Customs Solvency Certificate and the Clearance for the next port of call extended by the Port Captain.

Customs: Customs assigns 2 Customs Guards to each vessel docked or anchored, the vessel being under the obligation to provide these guards 3 meals daily. Besides meals, guards on anchored vessels must be given a cabin since watches are made in shifts.

PILOTAGE: The Port Authority must receive in writing from Agents advice regarding vessel's ETA 72 hours prior to vessel's arrival and a confirmation 12 hours prior to arrival. All advice must be sent through Agents by cable via Balboa or Limon Station. Pilotage is compulsory on all vessels exceeding 500 g.r.t or exceeding 7 ft. draft. Pilot boards 1 mile off Isla de El Cardon.

ANCHORAGES: The anchorage inside the harbour can accommodate 6 – 10 vessels, depending on size and draft.

RESTRICTIONS: The port is open 24 hours; however, entry is restricted in accordance with tide and vessel's draft. Access channel and turning basin dredged to 13.0 m. – 13.2 m. Due allowance should be made for heavy swell if necessary. Speed limit 8 knots in Corinto Bay, and 5 knots in the vicinity of berths or other craft.

MAX. SIZE: Maximum permissible length 650 ft., 80 ft. beam. Draft controlled by depth of water in approach channel and state of swell (typical draft 10 m.).

RADIO: ETA cables are generally routed via NBA Balboa Station or TIM Limon Station, and received through Tropical Radio & Telegraph or All America Cable.

VHF: The Port Authority has a VHF station to communicate directly with all vessels nearing the port.

HEALTH: After entry and vessel has berthed or anchored, 3 long blasts are given requesting Free Pratique; after these blasts the Authorities board the vessel together with the Agent's representative and proceed with distribution of the documentation. In the event of any suspected disease on board, the action to be taken will be given by the Representative of the Health Department. There is no automatic Pratique even though vessel is proceeding from another port in the same country.

Although the port is open 24 hours, vessels arriving after 2100 hrs. are not boarded by the Authorities until 0600 hrs. the following day, unless the vessel will berth and commence operations immediately. This being the case, Free Pratique is granted regardless of the hour. This arrangement is restricted to 0100 hrs. as gangs are not allowed to commence operations after that hour.

TUGS: Compulsory for berthing and unberthing. The tug joins vessel just after vessel passes Buoy No. 7. Tug's lines are generally used: however, at times ship's lines are used. There is no charge for use of tug's lines. 1 tug of 2,182 h.p. (30 ton bollard pull), 1 tug of 1,100 h.p. and one launch of 167 h.p. available.

BERTHING: There is no preferential berthing, and berthing is indicated by the Port Authority. Vessels are attended to in the manner "first come first served".

Berthing facilities are as follows:

1. Container Pier, length 240 m. Depth alongside 13 m. (Designed for 25,000 d.w.t. vessels).
2. Concrete Pier (Container Pier extension of this Pier). Length 370 m. (2 berths). Depth alongside 12.1 m.
3. A special berth with conveyor-belt system for loading of carton boxes such as bananas, frozen meat, as well as the handling of inbound and outbound cargoes such as fertiliser and cottonseed meal. Bananas can be loaded into 4 hatches at one time at a rate of 4,500 boxes per hatch per hour. Depth alongside at LW is 11.2 m.

Port Authority equipment includes fork-lift trucks with capacity up to 7,000 lb., 6 tractors with 5,000 lb. capacity, 95 trailers with 4,000 lb. capacity, 10 trailers of 40 tons for 20 ft. and 40 ft. containers, 3 front end loaders for 20 ft. and 40 ft. containers and 3 barges (2×60 ton and 1×80 ton capacity).

CRANES: Two mobile cranes, capacity 30 tons and 25 tons and 1×40 ton crane for containers.

STEVEDORES: *Working Hours:* The Port gives service 24 hours a day under the following schedule:

From 0700 to 1200
From 1300 to 1800
From 1900 to 2400
From 0001 to 0600

Each shift is of 8 hours. Meal hours are from 0600 to 0700; 1200 to 1300 and 1800 to 1900. The first shift commences at 0700 and is completed at 1600; the second shift is from 1600 to 2330. When a vessel announces with sufficient notice its intention to work during night-time continuously until the following day then a second shift does not work a full 8 hours but is relieved at 2200 hrs. and completely new gang takes over from 2200 until 0600 the following day.

When a vessel does not wish to work during the entire night, it may do two things: (1) Suspend all operations at 2330; (2) Work with the gangs of the second shift up until 0230 hrs. of the following day after which time the gangs of said second shift cannot continue working. Normally gangs are called at the following fixed official hours: 0630, 0930, 1230, 1530, 1830 and 2130, however on special occasions and with the approval of the syndicate, it is possible to integrate gangs at any hour of the day.

Average Cargo Handling Rates: Exports:	Tonnes per gang hour
Cottonseed meal in bulk	48
Raw sugar in bulk-dumped by hand	48
Cottonseed in bags	45
Coffee in bags	45
Sesame seed in bags	45
Cotton in bales of 250 kilos each	40
Frozen meat	28
Lumber	12

Imports:	Tonnes per gang hour
Drums	40
Wire rolls	40
Bulk cargo (discharged by clam-shells)	35
Fertilisers – insecticides in bags	30
Vehicles (by weight)	30
Paper rolls	27
Wheat (by aspirators)	20
Oats (by aspirators)	15
General cargo	15

TANKERS: The only tankers which frequent this port are those of Esso Standard and Parcel Tankers. There is one tanker berth; depth alongside 12.2 m. and each of the above-mentioned companies have their particular load/discharge lines.

The Esso tankers only discharge oils, the Parcel tankers discharge solvents and occasionally others load cotton seed oil.

There are 9 lines belonging to the consignees ranging from 4 in. to 12 in.

A 40 ton container handling crane, 70,000 lb. capacity front loader, tractors and trailers have been ordered for the container berth.

SHIPMASTER'S REPORT: August 1981.

Documents:

12 copies Ship's Particulars.
3 Legalised and 7 without Visa Ballast Manifests.
3 Legalised and 7 without Visa Passenger Lists.
10 copies Negative List.
3 Legalised and 7 without Visa Crew Lists.
3 copies Crew Declaration List.
3 Legalised and 7 without Visa Store Lists.
7 copies Mail List.
Vaccination List.
Health Declaration Form.

Pilotage: Compulsory. Pilot boards by No. 2 Buoy. Notice required 72 hours.

Anchorage: 3 miles West of Isla Cardon Lt. Depth at LW is 48 ft.

Max. Size: LOA 700 ft., max. draft 28 ft., mean tidal range 8 ft.

Restrictions: Vessels may enter and leave anytime, day or night.

Radio: Limon Radio.

VHF: Port Authority on Channel 16.

Tugs: None available at time of visit.

Berthing: Vessel berthed at Banana Pier (Lat. 12° 28.6′ N., Long. 87° 10.2′ W.). Distance from entrance to berth is 4 miles. Max. LOA 600 ft., max. draft 25 ft. Least depth in Channel to berth 26 ft. 6 in. Density 1016.

Services: The following are available: Fresh water ($2.00 per cu.m.), fresh provisions, Lloyd's Surveyor, telex, diesel oil (expensive), doctor and hospital.

General: On arrival at the Pilot Station the Pilot will board accompanied by a member of the Quarantine Department who will insist on going into every cabin, Store Room, etc., armed with a pressurised can of insecticide for fumigation purposes. This will take approximately 1 hour. The vessel is not allowed in the channel until the Quarantine fumigation formalities are over so it is advisable to approach the Pilotage Station No. 2 Buoy at right angles to the channel.

Once safely secured and if in convenient position to lower the accommodation ladder it must be lowered or B.O.T. gangway rigged to one of the dolphins. Ensure that the Board of Trade ladder is in good condition and the wheels running free as the vessel tends to roll a little at the Banana Pier if there is any swell outside. No official or stevedore labour will climb a pilot ladder so it is essential to have one of these access ready on arrival.

The Doctor will board and after medical clearance the Port Officials (Army) and Immigration Officer will board. They will browse through the various documents whilst Immigration Officer will check all Passports, I.D. Cards, etc., and eventually he will physically check that everyone is on board. These Officials and Immigration Officer do not speak a word of English, the Agent is conversant in English and is most helpful.

On completion of Immigration formalities 2 Ship's Officers are required to escort two groups of Port Authority Officials who will search every cabin except the Master's for drugs. On completion the Customs Officer will seal the bond and beer lockers. Beer is allowed out of the locker before it is sealed. There is no set allowance for cigarettes and spirits within reasonable bounds.

Shore leave; if anyone requires shore leave a form is furnished by the Immigration Official which must be filled in. Shore leave is allowed from 1700 hrs. to 2200 hrs. Anyone extending this period will be fined U.S.$25.

Time taken for clearance is approximately 2 hours.

Clearing vessel outwards most Immigration Officers want to physically check everyone on board, this takes 1½ hours.

It is essential that Rat Guards are fitted to *all* ropes, if not a heavy fine will be imposed.

Navigation: Pilots are satisfactory. The depths of water on the Chart are dubious. Have echo sounder on at all times. If docking or undocking between tides, both Ebb and Flood tides are very strong and there is no tug.

At the Banana Pier there is an unprotected dolphin (solid concrete) at the North end and one at the South end, the others are fendered.

AUTHORITY: Autoridad Portuaria de Corinto, Apartardo Postal No. 11, Corinto, Nicaragua. *Tel:* 211-214. *Telex:* 1294. *Contact:* The General Manager.

Empresa Nacional de Puertos, Apartado Postal No. 3570-2727, Managua, Nicaragua. *Tel:* 74452, 74430, 74383. *Telex:* 2422. *Contact:* Cesar Delgadillo Machado, Director General.

PUERTO CABEZAS: 14.01 N. 83.23 W.

DOCUMENTS: (Also see "General" before first port).
1 Clearance from Last Port.
10 Voyage Memorandums.
11 Crew Lists.
10 Passenger Lists.
10 Stores Lists.
1 Bill of Health.
12 Ballast Manifests.
13 Manifests of Cargo.
4 Bills of Lading.
10 sets Tally Books.

PILOTAGE: ETA required 24 hours before arrival at the port. The Pilot uses a boat with an outboard motor and boards about 1 mile off the port. Agent advises the Pilot the date of arrival, he goes out when he sees vessel.

ANCHORAGES: Vessels can anchor about 0.5 mile South of the wharf. Depths in anchorage 20 ft. – 22 ft.

MAX. SIZE: Max. length 400 ft. Draft 19 ft. 6in. Difference between high and low tide is 18 in.

HEALTH: The inspection takes place on arrival. It is not necessary when the vessel comes from another port in Nicaragua.

RADIO: The Nipco has a radiotelephone for personal use, but they make contacts with vessels. The frequency is 2738. It is better to use or send radiogram via Radio Tropical in Managua.

TUGS: There is no tug service.

BERTHING: One wooden quay, length 683 m. Width 8.4 m. and depth 6.7 m. at the seaward end. There is wreck in front of the wharf. The location is: Lat. 14° 0′ 57″ N., Long. 82° 22′ 4″ W., 1,200 yd. from wharf end.

STEVEDORES: The Agent advises stevedores of arrival of vessel. They discharge 8 tons of general cargo each hatch (one gang) per hour.

MEDICAL: Not necessary to advise the need of a doctor, only for emergencies. One hospital and two other doctors, apart from the official doctor of the port.

TANKERS: There are 2 pipes of 6 in. diameter on the wharf. There is no special berth for oil tankers.

DENSITY: 1025.

FRESH WATER: Fresh water is carried to the wharf by truck or from one pipe on the wharf. Boiler water is carried to the vessel by the pipe on the wharf.

FUEL: Gasoline, diesel oil and lubricants are supplied by Texaco. Arrangements are made when the vessel arrives.

GANGWAY/DECK WATCHMEN: It is not obligatory. It is customary to have two Customs guards on the gangway.

OPENING/CLOSING HATCHES: The opening and closing of hatches is done together by the crew of the vessel and the stevedores.

CUSTOMS ALLOWANCES: Each of the crew can have 2 packs of cigarettes with the seal broken, and one bottle of wine or liquor opened.

IDENTIFICATION CARDS: Not needed, just passport or seaman's book.

CONSULS: Only consul of Panama available locally.

REPAIRS: Minor repairs only can be effected.

REPATRIATION: It is possible and only a passport needed. Necessary to go to the capital by air, thence to any part of the world.

AIRPORT: Distance to airport from wharf is about 2 km. Service every day to the capital except Sundays and holidays. The name of the only airline is Lineas Aereas de Nicaragua (Lanica).

TIME: Local time is Central Standard Time, GMT minus 6 hours.

HOLIDAYS: Holidays are 1st January; Holy Thursday; Good Friday; 1st May; 14th July; 14th and 15th September; 12th October and the 25th December.

SHORE LEAVE: The crew is allowed to go ashore after the vessel is received by the Authorities.

DELAYS: Delays in berthing can be expected due to bad weather.

DEVELOPMENTS: A hydrographic survey has been completed in the port zone and surrounding area to establish the best place for future port facilities or whether expansion should be made to the existing port. This survey is being effected in view of projected installation of paper and pulp industry and forthcoming development of agricultural and mineral products which could be exported through the port.

The Port Authority is taking the necessary steps to get technical and financial help to make a general survey of the zone in order to find an adequate and/or protected site to place the new port installations. Port plans are combined with the paper and pulp industry, which is supposed to be installed in the next few years.

AUTHORITY: Empresa Nacional de Puertos, Apartado Postal No. 3570, Managua, Nicaragua. *Tel:* 74430, 74452, 74383. *Telex:* 2422. *Contact:* Cesar Delgadillo Machado, Director General.

PUERTO SANDINO: 12.12 N. 86.46 W.

DOCUMENTS: (Also see "General" before first port).
Clearance from previous Port.
6 copies Voyage Memorandum.
6 Stores Lists.
6 Passenger Lists or negative declaration, 3 to be visaed.
6 Crew Lists.
8 Cargo Manifests, 3 to be visaed.
8 Tally books.
6 Lists of Mail, Explosives or Drugs if carried.

9 crew lists and 6 store lists should be despatched by the Nicaragua Consul at loading port if possible, otherwise they are forwarded by Agents from the Panama Canal.

PILOTAGE: Optional; by local Pilots. Leading lights are installed, at the entrance to the port, prominently sited on a hill. Several buoys indicate exact anchorage positions.

Tankers: A Pilot is provided by the oil company in agreement with the Panama Canal Authority. Pilot boards about 0.5 mile West of the sea berth.

ANCHORAGES: About 1.75 miles off port entrance, depth is 30 ft. at low water, and about 45 ft. at high water.

RESTRICTIONS: Port is open day and night without exception.

MAX. SIZE: Tankers at Sea Line Terminal up to 850 ft. length and 41 ft. draft.

HEALTH: Port Health inspector boards all vessels on arrival.

RADIO: There is a radiotelephone installation at the Customs Office. No VHF.

TUGS: Not available for manoeuvring vessels. 5 small tugs employed for shifting lighters.

BERTHING: No quays for ocean-going vessels. Vessels work cargo to lighters at the anchorage.

2 lighters (100 ft. × 30 ft.) each with capacity of 400 tons.

STEVEDORES: Port has 4 gangs of 40 men each for boarding vessels.

TANKERS: *Sealine Terminal:* The sea berth is situated in approximate location Lat. 12° 10′ N., Long. 86° 49′ W., about 2 miles offshore in a depth of 47 ft. There are 5 mooring buoys, 2 at the bows and 3 at the stern of the vessel. The first lines to the buoys should each consist of 2 good ropes lashed end to end to effect the length required. 5 lines are normally used at each end of the vessel. Discharge rate 7,500 bbls. p.h.

Strong winds may delay berthing or cause vessel to vacate the berth once moored. Sailing at night is not recommended for safety reasons. The discharge hose is lifted on the port side by ship's crew.

MEDICAL: Doctor available in case of emergency. Nearest hospital at Leon, 35 km. away.

FRESH WATER: Not available for supply to ships.

FUEL: Not available for supply to ships.

OPENING/CLOSING HATCHES: Normally performed by stevedores. Mechanically operated hatches are opened by ship's crew.

CUSTOMS ALLOWANCES: Each crewman allowed two packets of cigarettes. No wine/spirits allowed to be taken ashore.

IDENTIFICATION CARDS: Seaman's Book required for going ashore.

CONSULS: Nearest at Leon, 35 km. distant.

REPAIRS: Small items for repair can be sent to Leon.

REPATRIATION: No facilities for crew changes. If crew member left behind, Agents are responsible for his repatriation at vessel's expense.

AIRPORT: Las Mercedes international airport at Managua, 75 km. away.

TIME: Central standard time, GMT minus 6 hours. No alterations.
HOLIDAYS: All holidays can be worked.
POLICE/FIRE/AMBULANCE: Police available locally. Nearest fire and ambulance stations are at Leon, 35 km. away.

SHIPMASTER'S REPORT: 1976.

Port authorities board the vessel at 0600 hrs., either at outer anchorage or at discharging anchorage. There is no night work performed unless the vessel reaches discharging anchorage with last daylight.

In general, stevedores are well acquainted with handling cars. Vessels carrying cars for Pto. Sandino should avoid loading No. 1 hatch for this port, as there is a permanent swell at anchorage, barges cannot lie safely under No. 1 hatch.

There is a Pilot available, on request, who also acts as stevedore-foreman.

SHIPMASTER'S REPORT: 1978.
Approach: Coastwise from the North, no difficulties being encountered.
Anchorage: Vessel anchored in position with the rear leading light bearing 088°(T) – 2.1 miles, starboard anchor used, 4 shackles in 8 fathoms of water.

It is advisable to run in to the anchorage slightly to the North of the leading line, thus avoiding the shoal patches on and to the Southward of the line. The anchor should, however, be let go right on the leads, otherwise the vessel will be required to shift anchorage, as happened in our case.

Buoyage was as per B.A. Chart 1960.
Point Penas del Tiscuco: Now has a large power station on it, not shown on the Chart. This is a good land mark when making the port. The shape of the point, as observed on Radar, appeared slightly different from the shape shown on the Chart.
Pilotage: Pilot is available if required, but was not used. I would advise a deep draft vessel to take a Pilot.
Communications: For long distance communications, it is best to maintain radio watches.

The Charterer's Agents have a VHF set in their Office at Corinto and contact can be maintained for day to day matters in this way.
Charterer's Agents: They have a resident water clerk at Pto. Sandino, who can be contacted on Channel 27, VHF. He is available from 0800 to 1200 hrs. and from 1400 to 1800 hrs.

Under normal circumstances, a representative from Corinto will meet the vessel on arrival and visit her prior to departure, but this was not possible on this occasion.
Documents required: As per "Guide to Port Entry".
Officials: Were helpful. 1 Customs guard is on duty at all times, but the Guards are regularly relieved from the shore and the ship is not required to provide accommodation for them.
Cargo Work: Continuous and fast. Large, modern lighters, towed by powerful tugs, were used. Due to the swell, these lighters ranged heavily alongside. Although the lighters were well fendered, several indentations were caused in the ship's side. Delays due to lack of lighters were minimal.

Rate of discharge, net of delays, was 60 tons per gang hour, steel coiled rod.
Pratique: Granted on arrival.
Provisions: Not purchased.
Fresh Water: Unobtainable.
Shore Leave: Under normal circumstances, can be arranged by using the lighters.

AUTHORITY: Empresa Nacional de Puertos, Apartado Postal No. 3570, Managua, Nicaragua. *Tel:* 74430, 74452, 74383. *Telex:* 2422.
Contact: Cesar Delgadillo Machado, Director General.

SAN JUAN DEL SUR: 11.15 N. 85.53 W.

SHIPMASTER'S REPORT: December 1984.

DOCUMENTS:

10 copies Passenger Declaration.
10 copies Ballast Declaration.
10 copies General Declaration (Ship's Particulars).
6 copies Provision and Store Lists.
6 copies Personal Declaration.
1 copy Ammunition List.
12 copies Crew List.
Clearance from last port.

Authorities: The following Authorities board after anchoring: Customs, Immigration, Port Captain, Doctor, Military.

A Customs search will probably be made. It takes 4 hours to clear vessel.
PILOTAGE: Pilot available. We arrived after dark and had to wait until 0600 hrs. the following day for the Pilot.
APPROACHES: Straight in from sea on an 067° (T) course to anchorage. At the time of the vessel's visit the light on the headland South of the bay (Fl. 6 secs.) and 1 red leading light were extinguished.
ANCHORAGES: Vessel anchored about 1.5 miles out in 15 fathoms to await Pilot.

Discharging anchorage is about 0.5 miles from the jetty in 5 fathoms. We anchored about 1 mile from the jetty in 10 fathoms as another vessel occupied the innermost anchorage. Walking back anchor to bottom and paying out cable as ship falls astern is recommended. When anchor was dropped in 15 fathoms area it took some time to hold.

The holding ground at the working anchorage was good, both vessels lying to 1 anchor in Force 6 – 7 winds and choppy seas.
TUGS: There is a small tug which is used to tow barges, also numerous launches.
EQUIPMENT: 4 barges of 150 tons – size about 24 m. × 5 m. 3 barges of 40 tons – size about 12 m. × 3 m.

Barges are open and are fitted with tyre fenders. Barges can also be obtained from nearby ports.

4 Fork lift trucks of 8 tons and 2 of 2.5 tons capacity. (Not all of these trucks were sighted).

3 mobile cranes for discharging barges ashore. There are also flatbed trucks and tractors ashore.
Storage: There is a large storage shed and an unsurfaced storage yard.
STEVEDORES: Port Authority stevedores. The port works 24 hours a day as follows:

From 0700 – 1200 hrs. Straight time.
From 1300 – 1800 hrs. Straight time.
From 1900 – 2200 hrs. Straight time.
From 2200 – 0600 hrs. Double time.
Sundays and holidays triple time.

Labour works 24 hours and are then replaced by other gangs.

Meal hours are from 0600 – 0700, 1200 – 1300 and 1800 – 1900 hrs., however, these hours are flexible often expanding to 2 hours. Labour go ashore for their meal hour.

The steel was discharged at about 35 tons per gang hour.
FRESH WATER: Not available.
FUEL: Not available.
GANGWAY/DECK WATCHMEN: One armed military guard, an Immigration Officer and 1 Customs Officer live on the vessel during vessel's stay.
OPENING/CLOSING HATCHES: McGregor hatches opened by the crew, we also used crew for pontoons.
CERTIFICATES: Certificates inspected on board, not taken ashore.
CUSTOMS ALLOWANCES: Not known. The Master of another vessel advised that the Customs were quite generous.
SHORE LEAVE: Passes are issued to the crew. 3 senior officers are given 24 hour passes, other officers and crew required to be on board by 2200 hrs.
CONSULS: None.
REPAIRS: Noted that barges were being constructed at San Juan and it is possible that steel work could be done in an emergency.
AIRPORT: At Managua some 2 hours by road.
TIME: GMT minus 6 hours.
DEVELOPMENTS: It is planned to build a pier in order that vessels may berth alongside.
GENERAL:
Charts and Publications: General Chart BA 1049 – Ellana bay to San Jose.

Harbour Chart BA 1960 – Plans on West Coast of Central America.

Port Information: Admiralty Sailing Directions Vol. 8, Eighth Edition, "Pacific Coasts of Central America" and United States Pilot.
Weather: Winds from N.E. Force 6 – 7 from December to February.

Winds from S.W. in July and August.
Squalls experienced in May and October.
Refer to Admiralty Sailing Directions.

Hotels: One small third class hotel and a number of boarding houses. A tourist hotel is being built but is not complete.
Communications: Post Office can place telephone calls internally and internationally, reception on international line bad.

The Post Office is equipped with an internal telex machine.
Operations: Good. The speed at which a vessel can be discharged depends on the availability of gangs and lighters. The turnaround time of barges is quite rapid and the gangs work well. We achieved 35 tons per gang hour and the other vessel, discharging bagged beans, did equally as well.

Nigeria

GENERAL

DOCUMENTS: The Port Authorities have to be provided with 7 copies of the Cargo Manifest 14 days before the vessel berths, otherwise berthing will not be possible.

In the near future 12 copies of the Cargo Manifest and 5 copies of the Freighted Manifest will be required.

SHIPMASTER'S REPORT: 1978.
No ship is to enter Nigerian waters unless issued with a Ship's Entry Number.

RADIO:
Accurate ETA Required:
The following circular has been received from the Nigerian Ports Authority (N.P.A.):
Quote:

It is observed with regret that ships arrive in our territorial waters/roads long before their published Expected Time of Arrival, thus building up unnecessary congestion which Decree 40 of 1975 (now Act 40) was promulgated to check. The effect of this phenomenon is that the control built into the 'Ship Entry Notice' is neutralised and abused.

To give the desired effect to the control of ships inflow as intended in the 'Ship Entry Notice' no ships arriving 7 days earlier or later than their Expected Time of Arrival will be treated as Arrived Vessels and therefore will not be accorded berthing facilities. Action will be taken to clear such ships from our roads to the high seas and such Owners or Agents will be blacklisted.

With the Federal Government's relaxation of import restrictions which is followed by a progressive rise in the number of ships calling, the need for rigid application of the provisions of Act 40 cannot be over-emphasised. It will therefore be in the best interest of all concerned to co-operate in this direction with a view to controlling a possible build-up of waiting vessels.

Shipping companies are invited to take advantage of other ports outside Lagos and Port Harcourt, where facilities are under-utilised, such as Calabar and the Delta ports.

Fines will be imposed if vessels arrive early.
Unquote.

ANCHORAGE:
Thefts from Vessels at Anchorage: There have been several recent reports of vessels being boarded and robbed of ship's stores (tarpaulins, paint, ropes, etc.) while the vessels were laying at anchor in the Lagos Roads and the Bonny River.

In some cases the thieves were seen to be armed.

We regret to have to caution Masters of the danger of theft, and to ensure attractive goods are kept under safe lock. Guards should be posted at night, whether in port or in the Roads. Alternatively, while in the roads, vessels could steam out a further few miles out of reach of small boats.

CARGO GEAR: N.P.A. inspect all cargo gear certificates on arrival.

SURVEYORS: If a Lloyd's Surveyor is required at any port other than Lagos at least 3 days' notice is required to make travel arrangements.

BONNY RIVER PORTS: *Compulsory Pilotage:*
Pilotage is now compulsory for all classes of vessels including service boats, fishing boats, etc. Harbour Master Bonny has been instructed that no vessel shall be allowed to enter Bonny town anchorage until all NPA dues are fully paid in advance and clearance for entry is received from the Chief Port Harbour Master, Port Harcourt.

All vessels will therefore be piloted to their various berths by Nigerian Ports Authority Pilots only and no exception will be granted and all genuine unexpired local pilotage licences are now revoked.

REPATRIATION/CREW CHANGES: Immigration Authorities now insist that expatriate crew members should obtain entry visa prior to coming into Nigeria to join any vessel trading within Nigerian Territorial Waters. The entry visa should be valid for 3 months and at the expiration can be extended for another 3 months and no more.

DOCUMENTS: From Port Manager – River Ports.
Central Planning and Information Centre: It will be mandatory on all Shipping Companies Agents and others intending to work their vessels in our ports to submit the underlisted documents to the Principal Traffic Officer in charge of C.P. & I.C. at the former office of the Deputy Dock Superintendent inside the wharf at least 7 days before the commencement of discharging operations of their vessels:

(a) Ship's Entry Notice (SEN).
(b) Ship's Manifest.
(c) Stowage Plan.
(d) Hatch List.
(e) Bulk Item List.
(f) Special/Valuable Cargo List.
(g) Hazardous/Dangerous Cargo List.

This stipulation came into effect as from 22nd August, 1983. It should be emphasised that as from that date preference is given to any ship which complies with the above stipulation.

FUEL: The following advice was received in March 1984.
Bunkering suppliers who were previously registered as official and recognised suppliers, have had their licences revoked. Some licences are said to have been reinstated but no official notification has been made regarding which companies, firms or persons may officially supply bunkers. Therefore until the situation is clarified, Owners should ensure that vessels have enough fuel oil, etc., on board to carry them through operations in Nigerian ports.

BOYCOTT: Any vessel which has called at any South African Port, cannot call at any Nigerian Port until a period of 6 months has elapsed between the time the vessel called a South Africa Port and her call to a Nigerian Port.

BONNY: 04.26 N. 07.09 E. (Inshore Terminal)
04.11 N. 07.14 E. (Offshore Terminal)

(See Plan Book)

IMPORTANT NOTICE: The Company, as Operator for the NNPC/SHELL Joint Venture, has been directed that the following vessels will not be permitted to enter Nigerian Waters to load Nigerian Crude Oil:

(A) Any vessel which is owned directly or through subsidiaries or chartered or managed by Companies or Persons in South Africa, Namibia or Israel, or is registered in any of these countries.

(B) Any vessel which has called at a port in South Africa, Namibia or Israel during a period of 6 weeks immediately preceding her arrival off any of the Company's Terminals. (A Port Call includes the calling off or near a port for the purpose of receiving services from the shore by helicopter or launch/boat.)

(C) Any vessel which has among its officers, crew, passengers or supernumeraries any person who is a national or resident of South Africa, Namibia or Israel or who has visited any of these countries as evidenced by an entry in that person's passport or other identity document.

Vessels arriving off the Company's Terminals are subject to check by Government Authorities to ensure that the above-mentioned provisions have been adhered to. Any infringement is liable to cause serious consequences for the Master, Manager, Charterer and/or Owner of the vessel.

Vessels lifting crude oil must in addition comply with any other restrictions that may be generally imposed by the Government of the Federal Republic of Nigeria on vessels entering Nigerian Waters for any purpose whatsoever.

DOCUMENTS:
3 Copies Stowaway List.
6 Crew Lists.
3 Vaccination Lists.
1 Maritime Declaration of Health.
4 Lists of Last Port of Call (6 weeks).
5 Lists of Birds & Animals.
5 Passenger Lists.
4 Stores List.
4 Personal Effects Lists.
5 Arms & Ammunition Lists.
3 Narcotics Lists.
3 Kroo Boy Lists.
1 Clearance Last Port.
Agent: Requires NPA Lights and Buoy Dues form.

ANCHORAGES: *Inner Berths:* Consult chart.
Outer Berths: 3 miles South of manifold platform in position Lat. 4° 11.2′ N., Long. 7° 14.2′ E.

Vessels must not proceed inshore of this position without a Pilot. When at anchor listening watch must be kept on VHF Channel 8 and this Channel must not be used for inter-ship communication.

RESTRICTIONS: *Inshore berths:* Tide, no night pilotage.
Offshore berths: Worst weather period June – September, when heavy swell may be encountered.

The maximum draft to which a vessel can load at Bonny is governed by three factors *viz.*
1. Datum Depth in Bonny Channel.
2. Height of the tide.
3. The underkeel clearance allowed.

Datum depth of the Bonny Channel is dependent on the amount of dredging; at present time (mid-1984) the Datum depth is 33 ft. 5 in. (10.2 m.)

Note: This depth can change and Operators and Charterers of vessels stemmed for the Inshore berths are reminded to ensure that they are in possession of the latest depths which can be obtained on application from their Agents.

Tide is variable but the relevant factor is the height of the tide at the time the vessel will transit the Channel. The underkeel clearance allowed is dependent on the time of the year and is related to the height of the swell expected to be encountered in the Bonny Channel.

The present allowances during the year are as follows:

1/1 to 15/2 = 2 ft. 6 in. – 0.76 m.
16/2 to 15/3 = 2 ft. 9 in. – 0.84 m.
16/3 to 31/3 = 3 ft. 0 in. – 0.91 m.
1/4 to 30/4 = 3 ft. 3 in. – 0.99 m.
1/5 to 15/5 = 3 ft. 6 in. – 1.07 m.
16/5 to 31/5 = 3 ft. 9 in. – 1.14 m.
1/6 to 31/8 = 4 ft. 0 in. – 1.22 m.
1/9 to 15/9 = 3 ft. 0 in. – 1.14 m.
16/9 to 30/9 = 3 ft. 6 in. – 1.07 m.
1/10 to 15/12 = 3 ft. 3 in. – 0.99 m.
16/10 to 31/10 = 3 ft. 0 in. – 0.91 m.
1/11 to 15/12 = 2 ft. 9 in. – 0.84 m.
16/12 to 31/12 = 2 ft. 6 in. – 0.76 m.

Thus it can be seen that the maximum draft at any particular time is equal to:

Datum Depth plus Height of Tide minus Underkeel Clearance Allowance.

A typical calculation would be as follows:

		ft.	in.
Datum Depth	=	33	5
Height of Tide	=	+ 7	0
Underkeel		40	5
Clearance Allowance	=	– 3	9
Max. Draft	=	36	8

PILOTAGE: *Inshore berths:* Pilotage is compulsory. Pilots board off Fairway Buoy; incoming ships must *not* enter Bonny Channel without a Pilot on board.

Offshore berths (SBMs): Berthing Master will board vessel on arrival or at anchorage, and remains on board throughout and acts as Loading Master. On arrival at anchorage contact Berthing Master on VHF Channel 10, call sign "Ocean Berthing Master".

N.B. Also contact Bonny Terminal on Channel 8 on arrival at Offshore anchorage to ensure vessel's arrival, etc. is recorded.

MAX. SIZE: *Inshore Terminal:* Min. size approximately 18,000 tonnes SDWT or 161 m. (530 ft.) LOA. Max. length 320 m. (1,050 ft.). Max. beam no restriction. Max. SDWT – 135,000 tonnes, subject to review during wet season, i.e. May to October. Max. draft, see "Restrictions", draft may be reduced due to silting (mud and sand shifting, caused by current).

Offshore Terminal: Min. SDWT 45,000 tonnes. Max. SDWT 320,000 tonnes. Max. length no restriction. Max. beam no restriction. Max. Draft 22.8 m. (75 ft.).

Also see "Port Harcourt" – "Report".

HEALTH: "Q" flag to be shown on arrival, except if from another Nigerian port, yellow fever inoculations compulsory. In case of suspected disease on board, advance notice to Agent advisable. Valid Yellow Fever and Smallpox Certificates to be produced for all crew members. Also Derat Exemption Certificate.

RADIO: Original ETA messages should be sent via Lagos Radio to the Lagos Agents at least 72 hours before arrival. 48 hours before arrival at the Fairway Buoy a further ETA message should be sent to Lagos Agents. When approaching or anchored at the Fairway Buoy vessels should contact Bonny Terminal on Channel 8 and Bonny Harbour Master on Channel 14 when bound for the Bonny Inshore Berths passing date and time of arrival, thereafter keeping watch on VHF Channels 8 and 16. Failure to comply with the requirements for ETA messages may result in delays in berthing the ship.

ETA by Radio for all Ships: In view of communication difficulties with our terminals at Bonny and Forcados and in order to avoid undue delays, in addition to normal W/T advices to Agents and Shell Lagos we wish to inform you about the possibility of passing to us your ETA via M.V. Oil Maintainer, call sign GYEU.

The Oil Maintainer (Golf Yankee Echo Uniform) keeps a daily listening watch on single side band R/T on following frequencies and times:

From 1600 to 1620 hrs. local time 16587.1 MHz (Tx/Rx)
From 1620 to 1640 hrs. local time 12435.4 MHz (Tx/Rx)
From 1640 to 1700 hrs. local time 8294.2 MHz (Tx/Rx)

Please advise 72 hours before arrival Bonny or Forcados:

1. Vessel's Name.
2. ETA.
3. To load .... tons .... grade.
4. Last Port.
5. First Nigerian port to load.
6. Any other Nigerian ports to load.
7. Name of Shipping Agency.
8. Next discharge port.

The GYEU will acknowledge only and further calls are not required unless ETA changes by 2 hours or more.

VHF: NPA Bonny Harbour Master and Pilots – Channels 14 and 16. Bonny Terminal – Channels 8, 16 and 10.

Special Regulations: It is essential for ships proceeding to inshore berths to pass time of arrival on Channel 14 VHF as soon as possible on arrival off Fairway Buoy.

Also see "Radio".

BERTHING: *Inshore Terminal:* There are 3 berths (CBMs) designated A, B and C, from upstream. A and C consisting of 5 buoys (1 astern, 1 on each quarter, 1 ahead and 1 on the inshore bow). A and C are flood tide berths. B is ebb and flood tide berth consisting of 6 buoys, the 6th buoy is on the offshore bow or quarter depending on which direction the ship is berthed.

Tankers berth on the flood tide (or ebb at berth B) using the offshore ship's anchor as an additional mooring point. Ships moor by means of 40 mm. wires (provided by the Terminal). One 40 mm. wire is picked up from each of the buoys and ship's ropes are not normally used. Mooring is carried out by ship's crew; and care must be taken to ensure that the mooring wires are laid out in a seamanlike manner to prevent the formation of runs and kinks. Mooring wires must not be kept on tension winches, but stoppered off by means of Carpenter's stoppers provided by the Terminal, and then "turned up" on the bitts. Two men from the Terminal are put on board the vessel to assist the ship's crew to position and set up the Carpenter's stoppers.

Vessels must be equipped with hose handling derricks with a SWL of not less than 5 tonnes.

Vessels must arrive with clean ballast.

Load-on-top system operates at Bonny. Slops cannot be accepted ashore. Maximum loading rate: 5,000 t.p.h.

Grades handled: both light and medium crudes.

Offshore Terminal: 2 SBMs fitted with 2 OCIMF standard 15 in. nylon moorings and 1 hose string terminating in 2×16 in. diameter end hoses.

No. 1 SBM is S.S.W. of the Platform. No. 2 SBM is S.S.E. of the Platform and they are designated Bonny West and Bonny East respectively.

Berthing effected under guidance of Berthing Master and assistant who both remain on board throughout loading operations. Accommodation for both to be provided. Whilst berthed a mooring rope must be ready on the poop deck so that the mooring launch (line boat) may, in the event of the vessel riding up on the SBM, make fast and tow to re-align vessel.

Vessels must be equipped with hose handling derricks with a capacity of not less than 10 tonnes.

Vessels must arrive with clean ballast.

Load-on-top system operates at Bonny. Slops cannot be accepted ashore. Max. loading rate: 6,000 t.p.h. Grades handled: Bonny light crude.

TUGS: None available.

HOSES: *Inshore Terminal:* (Amidships). Vessels should endeavour to present 2×12 in. diameter 150 ASA connections on the port side of the vessel when berthing at A and C berths. On B berth 2×12 in. 150 ASA connections should be provided on the port or starboard sides of the vessel – dependent on whether the vessel is berthing on ebb or flood tides. Vessel's hose handling derrick to be rigged and plumbed overside. Hoses will be connected by shore labour, but winchmen must be supplied to operate the ship's lifting gear. The derrick runner must be equipped with a suitable hook. The estimated weight of each hose string at berths A and C, when lifting with the ship in light condition is between 3 tonnes and 5 tonnes. Ships fitted with only 5 tonne derricks should exercise care when lifting to avoid shock loads. On "B" the estimated lifting weight is between 5 tons and 7 tons.

Weight of Hoses: The following table gives the approximate weights of hose strings in tonnes (including fittings, floats and pick-up buoy) with all hoses full of crude oil S.G. 0.850. The assumed total lift is 7.5 m. (25 ft.) above deck level, with the tanker on light draft.

d.w.t.	*12 in. I.D. Hoses* *tonnes*
100,000	5.1
70,000	4.9
50,000	4.7
35,000	4.5
18,000	4.2

Offshore Terminal: Port or starboard side amidships (dependent on which SBM is used). Vessels should endeavour to present 2×16 in. standard 150 ASA connections on arrival. Ship's crew are required to connect and disconnect the hoses under the advice of the Berthing Master and/or his assistant. A derrick SWL at least 10 tonnes must be rigged ready on both port and starboard sides and plumbed clear of this side. Derrick runner must be equipped with suitable hook.

Weight of Hoses: Indication only of approximate weights 16 in. I.D. hose strings in tonnes (including fittings, floats, and pick-up buoys with all hoses full of crude oil SG 0.850. Assumed lift is 7.6 m. (25 ft.) above deck level, with vessel in light draft condition.

Weight of Hoses: The following table gives the approximate weights of hose strings in tonnes (including fittings, floats and pick-up buoy) with all hoses full of crude oil S.G. 0.850. The assumed total lift is 7.5 m. (25 ft.) above deck level, with the tanker on light draft.

Size of Tanker d.w.t.	*16 in. I.D. Hoses* *tonnes*
500,000	11.4
330,000	9.4
270,000	9.1
200,000	8.7
100,000	7.5
70,000	7.1

SHORE LINE SYSTEM: *Inshore Terminal:* Crude oil is loaded at berths A and C via 32 in. submarine lines and 2 strings of flexible hoses consisting of 6 lengths of 12 in. hose and 5 lengths of 12 in. hose respectively.

At berth B, loading is via a 28 in. submarine line and 2 strings of 12 in. flexible hose, each consisting of 7 hose lengths. Reducers are made available by the Terminal on request.

Offshore Terminal: Vessels load through SBM from shore through a 48 in. diameter line, thence through a 24 in. diameter floating hose which is terminated by a "Y" piece and two 16 in. diameter hose tails which connect to the ship's manifold. Loading rates up to 6,000 t.p.h. may be expected. The 48 in. submarine loading line from the Terminal is some 20 miles in length, therefore great care must be exercised during loading when ship's valves are manipulated to avoid pressure surges. Pressure recorders are normally fitted at the spool piece between ship's manifold and tail end of the hose string to monitor pressure changes generated on board the vessel.

BALLAST: No facilities for dirty ballast, no tank cleaning facilities.

MEDICAL: Hospital at Bonny.

DENSITY: *Inshore Terminal:* 1020 at HW. 1015 at LW during rainy season.

Offshore Terminal: Salt.

FRESH WATER: Available by barge at rate of 15 t.p.h. 48 hours' advance notice required as barge comes from Port Harcourt.

FUEL: Available only by barge from Port Harcourt.

WATCHMEN: Whilst berthed at the SBM a security watch must be kept on the forecastle head by member(s) of the ship's crew throughout the hours of darkness, to raise the alarm and advise the Berthing Master on the approach of local small craft. Instances have occured at Nigerian offshore terminals where a nylon mooring rope has been cut and stolen with the vessel in the berth. The Berthing Master should also be advised in the event that the vessel rides up to the SBM.

CUSTOMS ALLOWANCES: 200 cigarettes per man per 7 days. 1 wine or 1 bottle of spirits per officer per 7 days.

IDENTIFICATION CARDS: Crew to carry passport or seaman's book whilst ashore.

CONSULS: Nil.

REPAIRS: Nil. See "General".

REPATRIATION: Possible via Port Harcourt and Lagos.

AIRPORT: 28 miles by river, to Port Harcourt, then 30 km. by road, flights twice daily to Lagos, 5 international flights per week to London, Rome and Amsterdam.

TIME: GMT plus 1 hour, no change.

POLICE/AMBULANCE/FIRE: Contact Via Harbour Master or Shell, VHF Channel 8.

SHORE LEAVE: Not permitted.

GENERAL: Accommodation ladder must be rigged – used in conjunction with pilot ladder at offshore terminal – and for direct access in inshore terminal.

Limited medical assistance available but in extreme emergencies only. Treatment of minor ailments and vaccinations, etc. is under no circumstances available. It may be possible in the event of an accident to obtain medical advice. Contact terminal VHF Channel 8 in first instance.

Pollution of the sea by dirty ballast, bilge discharge or any other means will result in heavy fines, or in severe cases, imprisonment.

Any attempt on the part of the boarding officers to persuade the Master to supply more than normal representation should be resisted. In the event of any problem arising over such a matter full details should be *reported to the Agent.*

Nigerian flag to be flown.

Air letter forms are not acceptable unless with Nigerian stamps.

Delays: Inshore berths: None if the channel buoys are lit. Otherwise, only daylight pilotage.

Offshore berths: Worst weather period June–September when heavy swell may be encountered.

Immobilisation of engines: Not permitted at the inshore berths. Not permitted at SBMs. Not advised at sea anchorage due to indifferent holding ground and the existence of obstructions and foul ground in the vicinity.

Loading: Ships are required to load cargo as rapidly as possible by day and night in accordance with the terms of their charter parties.

This means that ships are expected to load as fast as the Company can supply or they can safely receive. The question of how fast a ship can load is the responsibility of the Master having regard to his Owner's instructions, the charter party and the experience of ship's personnel. However, as further guidance and in absence of any instructions to the contrary, ships are accepted by the Company on the understanding that ships will be able to accept a bulk loading rate per hour of not less than ten per cent of the summer deadweight of the vessel.

At offshore berth the Berthing Master acts as Loading Master during loading operations and is provided with walkie-talkie radio to ensure adequate ship/shore communication.

Loading Masters visit each vessel, and Masters are requested to co-operate in the completion of the Company's Tanker Port Performance Time Sheet by ship and shore personnel. Only crude oil is handled at Company's terminals, loading temperatures and specific gravities of the two grades of crude, Bonny Light and Bonny Medium are reasonably constant and are approximately:

Bonny Light	0.8365 at loading temperature
Bonny Medium	0.9044 at loading temperature

Early Departure Procedure: Offshore Terminal: A modified early departure procedure is in operation at Bonny Offshore Terminal. Masters are requested to sign all documents in blank, retaining in their possession Masters' consignee copies. On completion of loading, the Berthing Master will supply Masters with figures required for the completion of the retained documents. Masters requested to complete these documents before the departure of the vessel. Customs and Agency representatives will normally board vessels before commencement of loading. Depending on other commitments of the offshore launch, it may be necessary to request Masters to provide temporary accommodation for these officials.

NOTICE: *Special Notice to all Masters:*

There have been recent cases of serious theft from vessels in the port of Bonny. It appears that the intruders who invariably gain access to the vessel via the anchor hawse pipe have on occasions been armed.

In your own interest we would advise you to arrange to have a strong jet of water running down the hawsepipe of the anchor in use. The other anchor should be stowed in the pipe and not left hanging off. In addition, you should implement the normal standard precautions of augmenting deck watches and arranging over-board floodlights where possible. Jets of water around the stern will also deter intruders from gaining access by other means.

All the assaults on ships have been made from canoes; therefore we suggest that traders and other persons in canoes be discouraged from coming close to your vessel.

Should unauthorised persons gain access to your vessel, instruct Shell Company Radio Operator to contact the terminal who in turn will contact the local police.

SHIPMASTER'S REPORT: January 1983.

Pilot on arrival and departure requires 4 copies NPA Master's Declaration.

Immigration liable to check all Discharge Books.

Health Doctor liable to check all vaccination dates in books.

Shore boat keeps a constant check on ballast discharge.

According to Customs no 'Ladies' are allowed to visit and if any found on board then Customs are liable to rummage vessel.

There was no night navigation in channel as buoys were unlit.

Vessels normally unberth at half tide and if waiting for daylight channel navigation, will anchor in the Prohibited Anchorage Area off berths.

SHIPMASTER'S REPORT: November 1983.

Documents: Also required:

3 copies Kroo Boy List (People under 18 years.)
3 copies Currency List.

Pilotage: Inshore Terminals: Pilot boards at buoy No. 29 (former Buoy "N") Nomination of buoys changed and now green buoys at starboard side with odd numbers and red buoys at port side with even numbers in white.

AUTHORITY: Nigerian Ports Authority.

Operator: The Shell Petroleum Development Company of Nigeria Ltd., Freeman House, 21-22 Marina, Private Mail Bag 2418, Lagos, Nigeria. *Tel:* 601600 (17 lines), 601820 (9 lines). *Telex:* 21235. *Cables:* "Shell, Lagos".

BRASS TERMINAL: 04.04 N. 06.17 E. (See Plan Book)

LOCATION: Brass Terminal is an open mooring located 13.5 miles off the South Nigerian coast at: Lat. 4° 04′ N., Long. 6° 17′ 10″ E.

Chart of the area is BA 1863.

Brass Terminal operates on a 24 hours, seven days a week basis, including public holidays.

FLAG: All vessels are required to fly the Nigerian Flag on the foremast during daylight hours.

GENERAL:

Description: Brass Terminal consists of 2 SBMs. These buoys serve as a single mooring point for a tanker and enables it to freely rotate a full 360° angle while handling cargo. Each ground mooring consists of 6 sets of radial chains, each set is attached to an anchor pile. The 6 mooring legs are made of 3.25 in. diameter chain. Water depth is approximately 90 ft. Two strings of floating hoses connect each buoy with the header at the end of the sea line. The system is built to provide a safe mooring for tankers up to 300,000 d.w.t. under the following environmental conditions:

(a) Max. wind speed of 30 knots and max. significant wave height of 9 ft.

(b) Max. wind speed of 20 knots and max. significant wave height of 10 ft.

(c) Max. wind speed of 10 knots and max. significant wave height of 11 ft.

However maximum overall length should be 1,200 ft., and the minimum 720 ft.

Signals: Each single buoy is equipped with:

Radio Beacon – Racon (the ship's radar must operate at X band 3 cm., 9300 to 9500 MHz and with horizontally polarized radiation. The controls for radar gain, sea clutter and differentiator FTC should be set at normal position).

NOTICE OF READINESS: Notice of Readiness will be tendered on arrival provided that vessel is ready to load in all respects and after Free Pratique has been granted. Lay time will commence six hours after acceptance of Notice of Readiness for vessels arriving within agreed ETA range or when loading commences whichever is earlier.

DOCUMENTS: To be submitted on arrival:

Maritime Declaration of Health
4 copies Vaccination List
8 copies Arrival Crew List
6 copies port of call list —for the past 6 weeks or 3 previous ports with dates of Arrivals/Departures)
6 copies Passenger List
6 copies Animal or Livestock List
6 copies Arms and Ammunitions List
4 copies Store List
4 copies Crew Declaration List signed by all crew members
Customs Clearance for last Port of Call.

The Naval Office in charge of the task force on crude oil liftings at Brass Terminal has advised that all tankers calling at Brass from other Nigerian Ports must obtain, in addition to the normal Customs Clearance, a Health Clearance Certificate from the first Port of Call.

PILOTAGE: The Mooring Master will board the tanker in the anchorage area and all manoeuvring of ships within the Terminal area shall be done only in accordance with advice of the Mooring Master subject to the understanding that in all cases and circumstances the Master of the vessel being manoeuvred shall remain solely responsible for the safety and proper manoeuvring of the vessel and possible damage to the Terminal or service boats.

The Berthing Master and 3 local assistants remain on board throughout loading operations and accommodation to be provided.

RADIO: VHF radio telephone Channel 16 (156.800 MHz) is in use 24 hours a day as a stand-by Channel. A not too busy Channel (6 – 8 – 10 – 12 – 14) will be used as work band by the Marine Office/Berthing Master acting as Loading Master during Mooring/Loading operations. They are provided with walkie talkie radios to ensure adequate ship/shore communications.

Cablegrammes: Cables to Brass Terminal may be sent to LAGOS RADIO and addressed to AGIPOIL LAGOS and FREIGHT LAGOS.

Acceptance Procedures: The following vessels are not permitted to enter Nigerian territorial waters:

(a) Any vessel which is owned directly or through subsidiaries or chartered or managed by companies or persons in South Africa, Namibia, Zimbabwe (Rhodesia) or Israel, or is registered in any of these countries.

(b) Any vessel which has called at a port in South Africa, Namibia or Israel during a period of 6 weeks immediately proceeding her arrival off any of the Nigerian Terminals (a port call includes the calling off or near a port for the purpose of receiving services from the shore by helicopter or launch boat).

(c) Any vessel which has as officers, crew, passengers or supernumeraries who are nationals or residents of South Africa, Namibia, Israel and Zimbabwe (Rhodesia).

All vessels must give the Company at least 5 days' notice of arrival at Brass; this ETA to be updated 72, 48 and 24 hours prior to arrival by cablegramme sent via Lagos Radio and addressed to: AGIPOIL LAGOS and FREIGHT LAGOS.

The messages should specify cargo requirement, ANSI diameter of flanges used for loading connections, safe working load of port derrick, advise whether a Smit's towing bracket is available, last port of call and final (discharging) port, sickness on board if any.

Vessels should contact the Brass Marine Office by VHF as soon as possible.

Upon arrival of vessel off the Terminal, Government Authorities shall check to ensure that the above mentioned provisions, set in points (a), (b) and (c), have been adhered to. Any infringement of said provisions may have serious consequences for the Master, Owner or Charterer of the vessel.

ANCHORAGE: Vessels awaiting the Mooring Master should anchor in a position approximately 2.5 miles N.E. of the terminal. Depth of anchorage area range from 15 fathoms to 16 fathoms. Holding ground is fairly good.

BERTHING:

Mooring: *Fore:* Each single buoy mooring is equipped with a mooring line system. The chain is fitted with a special open link which can be used if the vessel is equipped with Smit's bracket.

Aft: Whilst berthed, mooring rope must be ready on the poop deck so that the mooring launch (line boat) may in the event of the vessel riding up on the SBM make fast and tow to realign vessel. Whilst berthed at an SBM a security watch must be kept on the forecastle head by member(s) of the ship's crew throughout the hours of darkness to raise the alarm and advise the Berthing Master on the approach of any local small craft.

Instances have occurred at Nigerian offshore Terminals where a nylon mooring rope has been cut and stolen with the vessel in the berth.

LOADING: The line boat will tow the end of the floating hoses to the point below the tanker's port cargo manifold. The safe working load of the tanker's port derrick should be at least 7 tons.

Loading Operations can commence only after the Loading Permit is issued by the Custom Authorities, NNPC inspectorate and Navy Commander.

Ships are requested to load cargo as rapidly as possible by day and night in accordance with the terms of their Charter Party.

Ships are expected and nominations of vessels are accepted by NAOC on the understanding that ships will be able to accept a bulk loading rate per hour of not less than 10% of the summer d.w.t. of the vessel or at the optimum terminal loading rate, whichever is lower.

It is extremely dangerous to close ship's valves against the oil stream as such operation may create excessive pressure in terminal pipings and hoses.

Should damage result from failure to observe this precaution the Master of the vessel will be held responsible.

During the loading operations the following signals shall be displayed:

International Code Flag "B" during day-light.

A red light, visible all round the horizon at a distance of at least 2 miles.

Brass Blend crude oil loading temperature is reasonably constant as well as API gravity at approximately:

Brass Blend	85°F	40.00 API	R.V.P. 10.00 (approx.)

The approximate loading rate is 5,000 t.p.h.

POLLUTION: Pollution of rivers and beaches by oil is a serious matter. The Mooring Master shall inspect tanker's ballast so that there will be no chance of even a small amount of pollution when the ballast is pumped out, thereby lessening any possibility of infringement of the pollution restrictions envisaged by Nigerian law.

Pollution of the sea by dirty ballast bilge discharge or any other means will result in heavy fines or in severe cases, imprisonment.

MEDICAL: Although medical assistance is normally not available locally, Agency will provide medical assistance to the tankers' personnel when required in advance. In case of emergency the Terminal medical facilities will be at tanker's disposal.

FUEL: Not available.

FRESH WATER: Not available.

REPAIRS: There are no facilities available in the Terminal for vessel repairs. However, in case of necessity contact Agent.

REPATRIATION: Permitted only in cases of emergency and only if the person concerned holds the necessary documents, i.e. Yellow Fever Certificates.

SHORE LEAVE: Crew members cannot leave the vessel at Brass except in cases of emergency.

MAIL: Ship's mail and personnel mail will be handed through vessel's Agent.

SAFETY:

Smoking, lighters, matches: Smoking is prohibited on board during loading operations except those areas in the accommodation jointly agreed to by the Master and the Terminal Representative. Personnel on board the vessel other than in the accepted areas, must not carry lighters or matches.

Portable equipment: Any electrical equipment which is not wholly within an approved explosion proof container, an approved air pressurised container or any equipment which is not intrinsically safe, must be disconnected from the power supply.

Hand Torches: Only those hand torches provided with a Certificate of Approval delivered by a recognised authority are allowed.

Radio transmitters, radar: The main transmitting aerials must be grounded. VHF apparatus are allowed provided their output power is not higher than one watt.

Portable radio transmitter must be of approved type for safe operation in flammable gas areas.

Radar must be switched off.

Doors and portholes: Amidship doors and portholes are to be kept closed during loading operations except for entering or leaving accommodation.

Doors and portholes on the fore-end of the after accommodation must be kept closed.

Access to the after accommodation may be from the stern or from the side doors.

Air conditioning: Central air-conditioning is allowed but air intakes must be shut off and full circulation must be adopted.

All window type coolers must be disconnected unless the units are safe to operate in flammable gas areas (as certified by a recognized authority).

Ventilators: Should any doubt arise that flammable gases may enter the area, ventilators must be completely closed.

Galley: Gas, oil or coal fires are prohibited. Only approved flame-proof electrical equipment or steam heated galleys are permitted.

Lights: During loading operations vapour-proof electric lights only are allowed.

Moored vessels discharging ballast or loading cargo during period of darkness will brilliantly illuminate the sea around the ship so that any pollution can be readily observed.

Cargo and unused connections: A deck officer is also requested to inspect cargo connections and hoses to ensure that they are in good condition.

All unused connections must be blanked.

Cargo tanks: All tank lids are to be kept closed. The method of venting requested by the terminal is the closed system.

Should the ship not be equipped with the closed venting system, tank portholes will be opened for intermittent periods but such portholes will be protected with flame arresters.

Main engines: The ship's engines must remain ready for immediate use in case of emergency. Therefore no engine repairs or overhauling are allowed.

Boilers: Blowing of boiler tubes is forbidden whilst moored.

Vessel maintenance: During the time a vessel is moored at Brass Terminal, use of tools which may cause sparks or fire is forbidden in dangerous areas.

Fire fighting: The Master of the vessel must keep a continuous fire watch during loading operations. All fire equipment must remain ready for immediate use.

Unsafe operations: The Master of the vessel will remain solely responsible for damage of any sort that may occur and which is due in whole or in part to infringement of aforesaid safety regulations.

Lifebuoys: Lifebuoys should be available in loading manifold area and at the entry and exit from ship, e.g. at the pilot ladder.

Scuppers: All scuppers must be plugged with leak-proof plugs, and remain plugged until all hoses are disconnected.

WEATHER: *Climate:* The weather is generally fine from November to April, but it is unfavourable during the remaining period of the year owing to the high humidity degree. The temperature varies comparatively little from 70°F to 100°F and averages over 80°F.

Winds: Most winds are from South-Westerly direction with a normal speed range 5 to 18 knots.

Tides: The tidal mean range is 4.6 ft. Main values (referred to chart datum) are as follows:

Mean LW spring level	0.2 ft.
Mean HW spring level	6.1 ft.
Lowest LW level	−0.6 ft.
Highest HW level	7.1 ft.

Currents: Maximum total strength of the current (tidal + density + wind drift) is about three knots.

Direction: North-North Westerly for approximately 75% of the year, South-South Easterly for the remainder. The currents often reverse direction very quickly causing the tanker to swing heavily at the buoy.

SHIPMASTER'S REPORT: 1976.

Documents:

1 Maritime Declaration of Health.
2 Vaccinations Lists.
6 Crew Lists.
4 Passengers Lists.
2 Stores Lists.
2 Personal Effects Lists.
4 Arms and Ammunitions Declarations.
4 Lists of Animals and Birds.
4 Lists of Ports of Call (last 6 weeks).
Clearance last port.

Approaches: Coast line is well defined on high definition radar at a distance of 12 miles to 15 miles and sounding machine will assist efficiently while approaching.

Terminal consists of a central platform showing 2 flashing lights (one red and one white) – letter "U".

Two SBMs: No. 1 situated 1 mile East of the platform is equipped with a Racon (letter "A"). No. 2 situated 1 mile West of the platform.

Pilotage: Berthing Master will board the vessel 2.5 miles North East of the platform. Contact "Brass Terminal" on VHF Channel 16 for berthing instructions and immediately on anchoring to ensure that vessel's arrival is recorded.

Anchorage: 2.5 miles N.E. of the platform.

Restrictions: Vessels berth in daylight hours only.

Max. Size: About 250,000 d.w.t.

Pratique: Agent, Health and Customs Officers board at same time as Berthing Master.

Radio: ETA to be given via Lagos Radio, 120, 72, 48 and 24 hours before arrival at the Terminal anchorage.

Tugs: None available.

Berthing: Effected under the guidance of Berthing Master assisted by a party of 4 Nigerian people and ship's crew.

Whilst berthed a mooring rope must be ready on the poop deck so that the mooring launch, in the event of the vessel riding up on the SBM, may make fast and tow to realign the vessel.

Each SBM is fitted with 2 nylon mooring ropes connected on a single chain and two hose strings with 16 in. end hoses. Position of hoses connection: amidship port side. Vessel should endeavour to present on arrival 2×16 in. connections on port side. A derrick of 7 to 10 tons SWL with a suitable hook must be rigged ready on port side.

Medical: No facilities but assistance may be given on an emergency basis.

Fuel: Not available.

Fresh Water: Not available.

Density: About 1025.

Repatriation: No crew changes possible.

Shore Leave: Not permitted.

General: Crude oil handled is: Light Nigerian Crude API=44.0. Temperature about sea temperature, R.V.P.=10.5. Two of the four Nigerian crew stay on the forecastle head and maintain security watch throughout loading operations. Accommodation must be provided for Berthing Master and 2 men. Accommodation ladder is not required. Pilot ladder or pilot hoist are more suitable because of the swell. Immobilisation of engine is not permitted at SBMs.

Early Departure Procedure: Masters are required to sign all documents in blank. On completion of loading, seals are controlled by customs officer and Agents complete Master's and Consignee's copies of documents whilst ship is disconnecting and leaving berth.

SHIPMASTER'S REPORT: May 1980.
Documents: 5 each of Passengers or Nil passengers, Nil stowaways, Nil distressed seamen, Nil birds and animals, Narcotics List, Ports of Call, Clearance Last Port and 3 copies Deviation Cable.
Customs: All lengths of cloth to be placed under seal.

AUTHORITY: *Operator:* Nigerian AGIP Oil Co. Ltd. Head Office, 9/11 MacCarthy Street, Lagos. P.O.Box 1268, Lagos. *Tel:* 600880/9 (10 lines). *Cables:* Agipoil – Lagos. *Telex:* 21268.

District, New Base Mile 4 – Port Harcourt, P.O.Box 923. *Tel:* 300400/20 (21 lines). *Telex:* Agipoil – Port Harcourt.

AGENT: Alraine (Nigeria) Ltd., 26 Creek Road, Apapa. P.O.Box 265, Apapa and P.O.Box 2206, Lagos. Tel: 47770. Telex 21 244. Cables: "Freight Lagos".

BURUTU: 05.21 N. 05.31 E. (See Plan Book)

No commercial vessels are today using the port of Burutu. Future developments include the construction of a major ship repair facility with graving dock, capacity 150,000 d.w.t.

CALABAR: (See Plan Book)
Old Port 04.57 N. 08.27 E.
New Port 04.50 N. 08.17 E.

LOCATION: New Calabar Port (Lat. 04° 50′ 24″ N., Long. 08° 17′ 31″ E.) is situated about 93 km. from the Fairway Buoy in Calabar River going through a well marked channel by 58 buoys (IALA System). The channel is dredged to 7 m. charted datum with 150 m. in width. Old Port is 83 km. from Fairway Buoy.
DOCUMENTS:
Nigerian Ports Authority:
15 copies of Manifest.
1 SEN (Ship Entry Notice).
Agent to pay in advance for ship.
Clearing Agent to pay wharfage and wharfinger.
4 Stowage Plans.
4 Hatch Lists.
3 Hazardous Cargo Lists.
4 Container Lists.
5 Master's Declarations.
1 Passenger List.
Customs:
2 Crew Lists.
2 Stores List.
List of Ports of Call.
1 Animals List.
1 Arms and Ammunition List.
1 Passenger List.
1 Crew Personnel Effects List.
Quarantine:
2 Crew List.
1 Inoculation List.
2 Derat Certificates.
1 Clearance from Last Port of Call.
1 Stores List.
Vaccination Certificates.
PILOTAGE: Compulsory pilotage as from anchorage area which is between Buoys Nos. 24 and 25 (near Parrot Island). Ship calls Calabar Port Control on VHF Channel 16 asking for advice from 0600 – 1800 hrs. Ship will be advised when the Pilot will board her, normally it takes about 1.5 hours for the Pilot to reach the ship. There is no Pilot vessel but a pilot cutter flying "H" flag. The vessel is normally allowed to enter after the Agent books a Pilot, and dues are paid,.
ANCHORAGES: The area between Buoy Nos. 24 and 25 is a good area for anchorage. The depth is about 7 m. – 8 m., with 3 – 4 shackles the ship holds well. There is a deeper area called "Parrot Deep" which varies between 10 m. – 11 m. chart datum.
RESTRICTIONS: When a vessel arrives at the Fairway Buoy Lat. 04° 18′ 31.7″ N., Long. 08° 14′ 51.3″ E., which can be passed on either side, the vessel can call "Calabar Port Control" or "Harbour Master's Office" on VHF Channel 16 and if no contact made, vessel may proceed to Parrot Island. No night navigation in channel.
MAX. SIZE: Length 150 m. and draft 7 m. at HW. Old Port: LOA – 160 m. Also see "Developments".
RADIO/VHF: No radio service in Calabar at present. "Port Control" operate from 0600 – 1800 hrs. on VHF Channel 16. Steps are in hand to extend the service for 24 hours and to establish S.S.B. 2182 kHz.
RADAR: No radar service.
TUGS: 4 small tugs of 240 h.p. 1 manoeuvring tug of 2,400 h.p. Ship's lines to be used if towing, at a charge.
BERTHING: Old Port:
Ashland Oil Co. – Mellerio Wharf (Private): Length 51 m., max. draft 8 m. Can accommodate vessels up to 150 m. LOA.
Ashland Oil Co. – Jackson Wharf (Private): Length 27 m., max. draft 8 m. Can accommodate vessels up to 100 m. LOA.
Calcemco Wharf (Private): Jetty 75 m. but the depth is affected at the moment, and draft is restricted to 4 m. Can accommodate vessels up to 160 m. LOA.
Calabar Shipping Lines – MacIver Jetty (Private): 55 m. long, max. draft 5.5 m. Used by lighters.
New Port: Length of berth 860 m., can accommodate 4 – 5 vessels of 150 m. LOA with a depth alongside of 9 m. Distance between bollards 30 m.
Pool: 11 mooring buoys can accommodate 10 vessels, length between buoys varies from 220 m. to 130 m.
CARGO FACILITIES: 3 transit sheds, each 175 m. long by 40 m. wide. 2 warehouses of the same dimensions, fire station, fully equipped with up-to-date fire fighting appliances.
Cargo Equipment: 52 forklift trucks, 3 – 6 tons capacity. 7 mobile cranes, 25 tons capacity. 20 trailers of 40 – 60 tons capacity. 6 Mafi tractors. 3 freight lifters of 25 tonnes and 3 freight lifters of 13 tonnes. 9 Portal cranes 10 – 25 tons capacity. 2 tower cranes 36 tons capacity.

Modern Gear Store with new cargo handling gear including spreaders and wires for 20 ft. containers plus lorry and lifting gear. (Note: Shipping Companies should provide their own gear for heavy lifts and 40 ft. containers).
Barges and Pontoons: There are a number of barges and pontoons for seaward-side or mid-stream discharge – tonnages vary between 60 tons and 500 tons.
Container Areas:
A. Pack I 5,500 sq.m.
B. Pack II 4,000 sq.m.
C. Pack III 4,000 sq.m. for empty containers only.
STEVEDORES: Supplied on request of Agent round the clock if required.
MEDICAL: There is private clinic as well as Government Hospitals. Swiss Air Ambulance also available for repatriation. Ikpeme Clinic at 18/20 Ambo Street, Calabar is very modern.
FRESH WATER: Can be supplied in the New Harbour.
FUEL: Diesel oil can be supplied by motor tankers (30 tons each).
REPAIRS: Minor repairs only. Spares often in short supply.
WATCHMEN: Security men are compulsory and supplied by the Agent.
OPENING/CLOSING HATCHES: Crew.
REPATRIATION: A good air link from Calabar Airport to different places in the world via Port Harcourt, Lagos, Douala.
POLICE/AMBULANCE/FIRE: Contact Harbour Master and Agent.
CUSTOMS ALLOWANCES: See "Lagos".
IDENTIFICATION CARDS: See "Lagos".
SHORE LEAVE: See "Lagos".
DEVELOPMENTS: Steps in hand to bring the depth to 9 m. chart datum and to widen the channel.
AUTHORITY: Nigerian Ports Authority, Private Mail Bag: 1014, Calabar, Cross River State, Nigeria. *Managed By:* Port Manager – Tel: 221179, 220088 Office; 221192 House. Traffic Manager: Tel: 220189,220088 Office; 221561 House. Asst. Chief Port Harbour Master – Tel: 221562 220088 Office; 222480 House. *Cables:* "Genports" Calabar.

AGENT: Intertrans (Nigeria) Ltd. P.O.Box 10, Calabar. Tel: 087-222-554. Telex: Via Lagos 21244. Attn: Calabar.

DEGEMA (Including Abonnema): 04.44 N. 06.46 E.

LOCATION: Degema and Abonnema are very close to each other on the Sonbreiro River and are divided by a Creek through which launches and small craft sail to Port Harcourt.
PILOTAGE: Compulsory through Boler Creek. Pilots embark at Bonny.
BERTHING: The ports are approached from Bonny via Boler Creek, which has a depth of 4.88 m. at HW. Anchorages for 3 vessels in harbour to load/discharge, max. draft 16 ft. (limited by depth of Boler Creek). Cargo is handled by lighters.

Bulk Oil Plants of Nigeria Ltd. operate a berth for the loading of bulk palm oil onto main line vessels.
AUTHORITY: Harbour Master, Port Harcourt.

ESCRAVOS: 05.30 N. 05.00 E. (See Plan Book)

DOCUMENTS: Required and brought out by Pilot:

4 Nigerian Ports Authority/Master's Declaration.
2 Customs and Excise (Form C 13).
4 Ship's Report (Gulf). } on behalf of Agent.
2 Requests for Service } on behalf of Agent.

An extra set of documents is put aboard for the vessel's next visit.

The sailing clearance will be completed after B/L figure of cargo loaded is available, and will be delivered to the ship before sailing.

Shipmaster's Report: November, 1982.

Papers required:

1 Crew List.
2 Passenger or Nil Passenger Lists.
2 Animal Lists.
2 Narcotics Lists.
2 Arms & Ammunition Lists.
1 Stores List.
1 Crew Declaration.

Pilot gives Master a form for signing. This form is then sent ashore and Terminal will not start loading until they have received this form. It is advisable to obtain a receipt for this form from whoever takes it ashore.

In addition Master to sign two forms.

1. CERTIFICATE OF UNDERTAKING

As a result of excessive ship/shore difference of . . . . Long Tons, ship's figures higher, I, ... the Master of the above named vessel undertake to furnish you with out-turn figures at the port of discharge.

Signed . . . . Master.

2. In addition to the conditions of use of the Terminal Facilities (see Escravos Terminal Booklet – pp. 11 – 14 Loading Procedures and Responsibility of the Master) the tanker will be loaded under the direction and full responsibility of the ship's personnel with the co-operation of the Mooring Master acting as liaison for radio contacts between ships and Terminal.

Stoppage of loading at the completion of cargo will be ordered exclusively by the ship's Master or his delegate to the Mooring Master who will transmit the order to the Terminal.

Therefore it is understood that in no event the Gulf Oil Company (Nig.) Limited could be held liable for deadfreight incurred by the vessel and should the vessel require the Terminal to stop loading at the predetermined quantity, the vessel remains the sole responsibility for any difference occurring in cargo figures and subsequent deadfreight or overweight.

Please acknowledge receipt of this letter by signing the attached copies.

Signed . . . . Master.

PILOTAGE: Compulsory. Boarding area is in a position approximately 3 miles W.N.W. of the Berth Operations Platform. Also see "General".

Supervisor Pilot's Report: From my personal experience here at the Tank Farm, I can add that in poor visibility or when Tankers approaching this Terminal are having difficulties with their Radars, I am guiding them to proper anchorage using a small R.D.F. which is located at the local airport – Heliport in the Tank Farm and used by local aircraft traffic. The signal comes as "ES" (· · · ·) on 305 kc/s and gives a good bearing from a distance of 30 miles. This is not an official Navigational Aid, but I have used it successfully for many years and besides, when you have nothing else in the area, this is a great help to obtain a line-position.

NAVIGATION AIDS: *Berth Operations Platform:* This is a conspicuous steel structure 85 ft. high (Position 05° 30′ 32″ N., 05° 00′ 19.5″ E.), between the berth and the shore. On top of this structure is a heliport, which at night is surrounded by red lights. In the event of a power failure a green intermittent light will be shown from one corner of the seaward side of the platform.

A RACON reflector is mounted on this platform for easy identification of the Gulf sea loading area. Radar transmission from the incoming vessel triggers the RACON Unit which responds with the Morse Code letter "G" (– – ·), followed by a solid tail. This signal is observed visually on the ship's radar screen and appears very close to the point where the radar echo of the berth operations platform itself should appear.

Berth No. 2 – SBM: Light: White. Light 6.0 secs., Eclipse 4.0 secs. Range 5 miles. Radar Reflector.

Foghorn: Electric air oscillator. Range 0.5 miles, blast every 20 secs. Blast 2.0 secs., silence 18.0 secs.

Berth No. 3 – SBM: Light: White. Light Fl. 10 secs. Range 4.5 miles. Radar Reflector.

Foghorn: Range 2 miles, blast two secs. on and 18 secs. off.

Charts: B.A. 1862 and B.A. 3304.

RADIO: Vessels bound for Escravos must advise their ETA to Gocon, Lagos, 72 hours and 24 hours before arrival – the message to contain the vessel's name, ETA, Master's name. A 24 hour watch is maintained on VHF Channel 16, in the Senior Mooring Master's Office, and ships are usually able to make contact on this Channel at a distance of 20 miles to 40 miles on the seaward side of the Berth Operations Platform. Channels 10 and 10A used for internal traffic and ship berthing operations. Also see "Anchorage".

ANCHORAGE: Vessels required to anchor on arrival will anchor in position approx. 3 miles W.N.W. of the Berth Operations Platform, i.e. in a position Lat. 05° 31′ 00″ N., Long. 04° 57′ 30″ E., or as otherwise instructed.

On approaching the terminal, VHF contact can be established with the Mooring Master on Channel 10, 10A and 16 and the vessel will be advised of which berth has been nominated for her cargo. At the same time, the vessel will be advised where the Mooring Master will board. In cases where VHF contact is not made, the vessels will remain in the anchorage area until such time as contact is made by radio or the pilot boat. Vessels are advised to anchor only in the stated area due to the existence of submarine pipe-lines in other areas.

Anchorage is forbidden in the mooring area.

RESTRICTIONS: Mooring and unmooring operations will be undertaken by day and by night under normal weather conditions.

Notice of Readiness will be accepted by the Company representative on arrival providing that the ship is in all respects ready to load.

MAX. SIZE: The Escravos Terminal consists of two Single Buoy Mooring Berths Nos. 2 and 3 only, the conventional Sea Berth (Berth No. 1) having now been de-commissioned.

The location of the Sea Terminal Berth No. 2 (SBM) for vessels up to 120,000 d.w.t. is off the North of the Escravos River in a position Lat. 5° 30′ 37″ N., Long. 4° 59′ 25″ E., and has a minimum depth of water of 65 ft. at LWS.

Berth No. 3 (SBM) is situated 4.25 miles W.S.W. of No. 2 berth in a position Lat. 5° 29′ 29″ N., Long. 4° 55′ 54″ E., and will accommodate vessels up to 300,000 d.w.t. in a minimum depth of 100 ft. at LWS on a year round basis, but during the dry season, October to March, vessels up to 350,000 d.w.t. will be accommodated on receipt of their acceptability by the Terminal.

MOORING: Before arrival at the pilot boarding area, it will be necessary to ensure that the following moorings are ready for use on arrival at the berths:

Forward: 2 mooring ropes on forecastle – buoyant lines if possible, e.g. polypropylene, on the forecastle head.

When the vessel is within reasonable distance of the buoy, 1 ship's line will be carried by the mooring launch to the floating buoy lines and secured to same, this line will then be heaved aboard. As the buoy rope comes clear of the water it will be noted that a chain is attached to it. This chain is to be secured to either a bow stopper or a towing bracket if fitted on the vessel otherwise terminal provided Pelikan hooks will be used, the latter being secured to a set of bitts on the vessel. This chain is to be secured in such a manner that the mooring rope is outside of the extreme length of the vessel; i.e. so that the chain will absorb any chafing if the buoy line crosses the bow.

Power must be available at all times on deck winches and windlass while vessel is at the berth.

Aft: A mooring line must be available aft, secured to the bitts and of sufficient length to enable a tug-boat to pick up the eye and tow on it to realign the vessel if necessary. If available, a buoyant line is also preferred in this position.

There are no special arrangements for unmooring.

CARGO: Nigerian Light Crude - API 37° approx. Temperature 85° F. (fairly steady throughout the year).

HOSES: Lifting, connecting, disconnecting, lowering and other handling of hoses will be performed by the ship's crew, as advised by the Company representative, and where possible the Company will provide a pipe-line gang to assist the ship's crew. At all times a deck officer must be in attendance.

Both derricks must be rigged and ready for use on arrival and vessels are cautioned that the weight of each hose is at least 7 tons under favourable conditions. Where possible, it is requested that the derrick runner is on one winch and the topping lift on another, as this will make the hose-handling operation much smoother and faster. In any case, members of the ship's crew will be required to operate the winch or winches.

Particular care should be taken during the hose handling operations in order to avoid serious damage to the hoses, the plastic floats and buoys on the plate edges, rails, etc. The cargo hoses are fitted with Camlock connections, blank flanges and chafing plates.

As no equipment will be supplied from the shore; it is essential that all vessels nominated for this port have an adequate supply of gaskets, nuts, bolts, spanners, tools, etc. ASA reducers for use with the Camlock connections can be supplied in an emergency in the standard sizes. Failure to have these items will lead to delay in berthing and could even lead to a situation where the vessel may no longer be accepted by the terminal. Such delays would be for the ship's account.

Before hose handling operations begin, materials must be near the manifold and remain near the manifold to cope with any escape of oil, i.e. drip trays, sand, detergent, etc., and must in the event of a spill be utilized as rapidly as possible.

Berth No. 2: Loading is through an SBM which is approx. 40 ft. in diameter and held in position by 4 chains secured to piles sunk into the seabed. 1×24 in. floating hose is secured to buoy and has 2×12 in. tailing pieces attached to it with 12 bolt holes ASA 150 flanges; they are also fitted with Camlock connections.

Berth No. 3: Same as No. 2 but improved type and more heavily moored with 8 chains secured to piles sunk into the seabed. There is 1×24 in. floating hose with 2×16 in. tailing pieces. There are ASA flanges with Camlock connections, similar to those at Berth No. 2.

There are 2 SBM Berths only at this terminal – the conventional berth (No. 1) has been de-commissioned. The max. loading rate is 30,000 b.p.h. (approximately 4,000 t.p.h.).

LOADING/BALLAST: *Deballasting and Loading Procedures:* Vessels proceeding to Escravos to load must arrive with sufficient clean ballast for safe manoeuvring. A vessel arriving with dirty ballast will incur costly delays as it is not permitted to discharge dirty ballast to the sea. The "Load on top" system is accepted at this terminal and vessels are requested to arrive with the slop tank "settled out" as far as is possible and so avoid any chance of pollution of the Terminal waters from this particular tank.

The Nigerian Government has very strong views on pollution and vessels are warned that a very careful watch is kept at all times to ensure that pollution does not take place, or that if pollution should occur it is controlled as quickly as possible.

All vessels are cautioned to keep a close watch on the floating hose (or hoses) towards the end of deballasting, as it is possible, under certain conditions of weather and tide for the hose to become trapped under the fore-foot of the vessel. Should this situation appear likely to arise vessels are requested to attempt to keep the fore-foot submerged by transfer of water or bunkers, etc. If the hose becomes foul, it must be disconnected and towed clear causing considerable delay to the vessel.

During the hours of darkness it is requested that searchlights from bridge wings and approved floodlights be used to illuminate the surrounding water to facilitate detection of oil and assist generally in loading operations. Vessels are advised that failure to supply sufficient lighting could result in cargo operations not being allowed during the hours of darkness. Such delay would be for the ship's accounts.

After the ballast tanks have been inspected and found to be satisfactory, deballasting will commence on the advice of the Company Representative. When all the ballast has been discharged, the tanks will again be inspected and if ready for cargo a Dry Certificate, if presented, will be signed by the Company representative. In any case, cargo will be loaded when both ship and shore are ready to commence operations. In no circumstances will the vessel be expected to load at a faster rate than that requested by the Master. It is the ship's responsibility to check that the requested loading rate is not being exceeded. The Company for their part will make every effort to maintain the requested rate and will advise of any alteration of loading rate immediately; prior warning being given if circumstances permit.

Simultaneous Deballasting and Loading: In order to reduce the turn around time at this Terminal, but with close attention to safety, vessels will be permitted to load cargo and discharge ballast simultaneously, provided that no contamination of cargo or pollution of the Terminal waters can occur. Vessels desirous of adopting this method of loading can do so, but will be required to advise the Company in writing, stating that the vessel accepts full responsibility if this method of loading results in contamination of cargo and/or pollution of the Terminal waters.

Throughout the deballasting and cargo operations, a deck officer must be on deck with sufficient crew members to safely handle the operation. Company representatives will be on board throughout to co-ordinate terminal and marine operations and will be in constant communication with the terminal by portable and/or ship's VHF sets. Before loading commences the amount of cargo required must be given to the Company Representative in writing and the Terminal will, in conjunction with the vessel, arrange to stop the flow of cargo at this predetermined figure.

THERE ARE NO FACILITIES AVAILABLE TO DISCHARGE EXCESS CARGO SHOULD THE VESSEL OVERLOAD.

When requesting the tonnage required in writing, a statement should be included, and will be deemed to include, that Gulf Oil Company (Nigeria) Limited will not be held responsible for any errors or any costs or claims arising directly or indirectly from such errors. Such statement is a condition of loading. It is recommended that frequent checks are made on the loading speed and the quantities received and required so that, if possible, adjustments can be made.

The Company Representative will advise on the detailed procedure for shutting down and disconnecting, but briefly, after cargo is completed and oil has ceased to flow, loading valves on the shore and Berth Operation Platform (BOP) will be closed. Then and not before, the vessel's manifold valves may be closed.

Do not close ship's valves against incoming oil as such procedure creates excessive pressure which may damage hoses, terminal facilities, or ship's piping. Vessels will be held liable for damages resulting from failure to observe this precaution. In addition to the above, serious pollution could result which will involve the vessel in further claims and/or fines. Therefore, for the sake and safety of all parties concerned, please use the utmost care and vigilance when loading at this terminal.

Figures taken after completion will be passed to the shore by VHF and a ship/shore difference obtained. On request, full sets of cargo papers will be prepared and delivered to the Master as speedily as possible. However the briefer form of documentation is used at this terminal, and the remainder of the documents will be forwarded by airmail. At the same time the Company will arrange clearance for the vessel.

Loading signal to be displayed is the International Code flag "B" from a conspicuous halyard during the hours of daylight. During the hours of darkness a red light visible all around the horizon at a distance of at least one mile is to be exhibited.

REPAIRS: No facilities of any kind are available at this port.

Under no circumstances are engine repairs or the immobilisation of main engines permitted within the port limits.

REPATRIATION: Not permitted except in grave emergency and then only if the person concerned holds all the necessary valid certificates and documents, e.g. valid Cholera and Yellow Fever Certificates.

WEATHER AND CURRENTS: Wind and swell are mostly from a South-westerly direction. The weather is generally good from November to May, but is unfavourable during the wet season, i.e. May to November. For approximately 75% of the year the current sets in a N.N.W. direction and for the remainder of the year it is reversed, i.e. S.S.E. The strength of the current varies from 0.5 to 1.5 knots, and the currents frequently reverse direction very quickly causing the vessel to yaw (swing) heavily at the berth.

FRESH WATER: Not available.

FUEL: Not available.

MEDICAL: Not available except in an emergency.

STORES: Stores are not available at this Terminal and urgent spares/equipment forwarded by air can take up to 3 weeks to clear formalities. In view of this it is essential that Gulf be advised of the airwaybill number at the earliest opportunity to avoid further delays.

TIME: Local time is GMT plus one hour throughout the year.

SHORE LEAVE: In view of the isolated positions of the buoy moorings (approx. 15 and 19 miles from shore) Masters are strongly advised not to grant shore leave. The weather and swell conditions could result in persons being injured either embarking or disembarking from the vessel, and in addition the boat journey will take approx. 2 – 2.5 hours. Should the weather deteriorate, it could mean delay to the vessel as outward clearance would not be granted until all the crew were on board the vessel. As the terminal does not own any suitable boats, it would be necessary for the vessel to charter one for shore leave purposes.

In view of the foregoing, the terminal does not recommend shore leave being granted.

NATIONAL FLAG: Available from the Company.

GENERAL: In view of the exposed location of the berths, the Mooring Master and pipe-line gang will have to remain on board throughout the vessel's stay at the berth and, therefore, it will be necessary for the vessel to arrange food and accommodation for this period. A pipe-line gang will usually consist of four men, but this number may be varied at the discretion of the Company.

It is assumed that the Mooring Master will be accommodated in the Pilot Room; but where such a room does not exist on board, then accommodation equivalent to a minimum standard required for a Senior Officer is to be provided. In the case of meals, due allowance and provision is to be made for the fact that irregular hours of work by day and night may be involved.

AGENCY: The Gulf Oil Company (Nigeria) Ltd. will assist with the Agency work for vessels calling at the Terminal but does not perform a general Agency function. Owners of vessels calling at the Terminal can arrange for their own Agents, although due to the location of the Terminal there are no Agents' offices in the area. All payments to the Company while assisting the Agents should be sent to: Gulf Oil Company (Nigeria) Ltd., 19 Tinubu Square, Private Mail Bag No. 2469, Lagos, Nigeria. *Tel:* 650820. *Telex:* 21314. *Cables:* Gocon.

AUTHORITY: Gulf Oil Company (Nigeria) Limited (see "Agency" above).

FORCADOS (Offshore Terminal): 05.10 N. 05.10 E. (See Plan Book)

IMPORTANT NOTICE: The Company, as Operator for the NNPC/Shell Joint Venture, has been directed that the following vessels will not be permitted to enter Nigerian Waters to load Nigerian Crude Oil:

(A) Any vessel which is owned directly or through subsidiaries or chartered or managed by companies or persons in South Africa, Namibia or Israel, or is registered in any of these countries.

(B) Any vessel which has called at a port in South Africa, Namibia or Israel during a period of 6 weeks immediately preceding her arrival off any of the Company's Terminals. (A Port Call includes the calling off or near a port for the purpose of receiving services from the shore by helicopter or launch/boat.)

(C) Any vessel which has among its officers, crew, passengers or supernumeraries any person who is a national or resident of South Africa, Namibia or Israel or who has visited any of these countries as evidenced by an entry in that person's passport or other identity document.

Vessels arriving off the Company's Terminals are subject to check by Government Authorities to ensure that the above-mentioned provisions have been adhered to. Any infringement is liable to cause serious consequences for the Master, Manager, Charterer and/or Owner of the vessel.

Vessels lifting crude oil must in addition comply with any other restrictions that may be generally imposed by the Government of the Federal Republic of Nigeria on vessels entering Nigerian Waters for any purpose whatsoever.

DOCUMENTS:

	Customs	*Health*	*Agent*
Vaccination List	1	1	3
Maritime Declaration of Health	1	1	3
List of Last Port of Call (6 weeks)	1	1	3
List of Arms and Ammunition	2	–	3
List of Animals and Birds	2	1	3
Crew Labour List	–	–	3
Passenger List	1	1	3
Stowaway List	1	1	3
Personal Effects List	1	–	–
Clearance from Last Port of Call	1	–	–

Derat Exemption Certificate to be produced.

Vaccination Booklets for all crew to be sighted.

APPROACHES: An efficient sounding machine and a high definition radar will assist in making the terminal for the first time. A heavy cluster of radar echoes from the Escravos area may be recorded on passing the 100-fathom line. On making the 20 fathom line, it is reported that the coastline from North Point to Moore Point and from South Point to Ajamabri shows on the radar screen with good chart comparison.

Once the vessel's position is ascertained and the course for Forcados adopted, the first and most obvious sighting, at night, will be that of the platform, which is marked with numerous fixed lights at several levels. The platform, which also serves as a helicopter platform, is in close proximity to the two SBMs.

PILOTAGE: Berthing Master will board vessel on arrival or at anchorage, and remains on board throughout. Contact Berthing Master on VHF Channel 8. Call sign "Forcados Offshore Pilots". *N.B.:* Also contact "Forcados Terminal" on Channel 8 immediately on anchoring to ensure that vessel's arrival is recorded and that berthing turn will be in correct sequence.

Arriving tankers are to make a good lee for the embarking Pilot. Boarding facilities such as pilot ladders must not be made of nylon rope.

ANCHORAGES: 3 miles West of or 2 miles N.W. of Production Platform in position Lat. 5° 10′ 17″ N., Long. 5° 10′ 42″ E.

Vessels must not proceed inshore from these positions without a Pilot. When at anchor a listening watch is to be maintained on Channel 8 and this Channel must not be used for ship-to-ship exchanges.

Note: A 14 mile × 48 in. pipe-line extends from the coast at South Point near Forcados to the manifold Platform and thence to the SBMs. Vessels are warned not to anchor in the vicinity of the pipe-line.

RESTRICTIONS: Vessels berth at any state of tide, night or day.

Also see "Max. Size".

MAX. SIZE: Minimum size 45,000 tonnes Summer d.w.t. Max. size 320,000 tonnes Summer d.w.t. Vertical distance bow fairlead to water line not to exceed 60 ft. at any time. No restriction on length and beam. Max. draft 65 ft.

PRATIQUE: Health and Customs Officers board at a convenient hour and come from Forcados, 20 miles distant from the buoys. Normally travel by high-speed launch, but may occasionally use helicopter.

RADIO: All ships to radio their ETA via Lagos Radio to the Lagos Agents at least 72 hours before vessel's ETA at the terminal anchorage.

ETA also to be reconfirmed 48 hours prior to arrival.

ETA by Radio for all Ships: In view of communication difficulties with our terminals at Bonny and Forcados and in order to avoid undue delays, in addition to normal W/T advices to Agents and Shell Lagos as contained in Port Information Book, we wish to inform you about the possibility of passing to us your ETA via M.V. Oil Maintainer, call sign GYEU.

The Oil Maintainer (Golf Yankee Echo Uniform) keeps a daily listening watch on single side band R/T on following frequencies and times:

From 1600 to 1620 hrs. local time 16587.1 MHz (Tx/Rx)
From 1620 to 1640 hrs. local time 12435.4 MHz (Tx/Rx)
From 1640 to 1700 hrs. local time 8294.2 MHz (Tx/Rx)

Please advise 72 hours before arrival Bonny or Forcados:

1. Vessel's Name.
2. ETA.
3. To load ...... tons ...... grade.
4. Last Port.
5. First Nigerian port to load.
6. Any other Nigerian ports to load.
7. Name of Shipping Agency.
8. Next discharge port.

The GYEU will acknowledge only and further calls are not required unless ETA changes by 2 hours or more.

TUGS: No tugs required and none available.

BERTHING: Effected under guidance of Berthing Master and local assistant who both remain on board throughout loading operations. Accommodation for both to be provided. Whilst berthed a suitable buoyant mooring rope must be ready on the poop deck so that the mooring launch (line boat) may, in the event of the vessel riding up on the SBM, make fast and tow to realign vessel.

Two SBMs each fitted with 2 OCIMF standard 15 in. × 150 ft. nylon grommet ropes and 1 hose string some 870 ft. long with 2×16 in. end hoses. No. 1 SBM is South of platform and No. 2 is West.

Position of hose connections: Amidships on starboard side. Vessels should endeavour to present 2×16 in. (400 mm.) (150 ASA) connections on arrival. Ship's crew are required to connect and disconnect the hoses under the advice of the Berthing Master and/or his assistant. A derrick, SWL at least 10 tonnes, must be rigged ready on both sides and plumbed clear of ship's side. Derrick runner must be equipped with suitable hook.

In the case of vessels with a heavy multisheaved block a short wire strop of adequate strength with a hook should be provided.

Weight of Hoses: The following table gives the approximate weights of hose strings in tonnes (including fittings, floats and pick-up buoy) with all hoses full of crude oil of SG 0.850. The assumed total lift is 7.5 m. (25 ft.) above deck level, with the tanker on light draft.

Size of Tanker	*16 in. Inside Diameter Hoses*
500,000 d.w.t.	11.4
330,000 d.w.t.	9.4
270,000 d.w.t.	9.1
200,000 d.w.t.	8.7
100,000 d.w.t.	7.5
70,000 d.w.t.	7.1

Loading: Load-on-top system operates at Forcados. Slops cannot be accepted ashore. Vessels must arrive with clean ballast. Maximum loading rates 11,000 t.p.h.

A single grade of crude oil is handled which is known as "Forcados Blend".

Shore Line System: Vessels load through SBM from shore through 48 in. line to SBM. The 48 in. submarine line to the SBM is some 14 miles in length, therefore great care must be exercised during loading when ship's valves are manipulated to avoid pressure surges. Pressure recorders are normally fitted at the spool piece between ship's manifold and tail end of the hose string to monitor pressure changes generated on board the vessel.

MEDICAL: Limited medical assistance available but in extreme emergencies only. Treatment of minor ailments and vaccinations, etc. is under no circumstances available. It may be possible in the event of an accident to obtain medical advice. Contact Terminal VHF Channel 8 in first instance.

DENSITY: 1025.

FUEL: Not available.

FRESH WATER: Not available.

REPATRIATION: No crew changes possible.

SHORE LEAVE: Not permitted.

GENERAL: Nigerian flag to be flown.

Air letter forms are not acceptable unless used with Nigerian stamps.

Freeboard: The maximum forward freeboard is 60 ft. while vessel is moored to the SBM. Masters are requested to comply with this limitation.

Loading: Ships are required to load cargo as rapidly as possible by day and night in accordance with the terms of their charter parties.

This means that ships are expected to load as fast as the Company can supply or they can safely receive. The question of how fast a ship can load is the responsibility of the Master having regard to his Owner's instructions, the charter party and the experience of ships' personnel. However, as further guidance, and in absence of any instructions to the contrary, ships are accepted by the Company on the understanding that ships will be able to accept a bulk loading rate per hour of not less than 10% of the summer deadweight of the vessel.

At offshore berth the Berthing Master acts as Loading Master during Loading Operations and is provided with "walkie-talkie" radios to ensure adequate ship/shore communication.

Loading Masters visit each vessel, and Masters are requested to co-operate in the completion of the Company's Tanker Port Performance Time Sheet by ship and shore personnel. Only crude oil is handled at the Company's terminal, loading temperature and specific gravity of the grade of crude, Forcados Blend is reasonably constant and is approximately: 0.8837 at loading temperature.

Immobilisation of Engines: Not permitted at SBMs. Not advisable at sea anchorages as there are many obstructions if vessel drags anchor.

Restrictions Which may Cause Delays: Weather. Worst period June–September when heavy swell may be encountered.

Early Departure Procedure: A modified early departure procedure is in operation at Forcados offshore terminal. Masters are requested to sign all documents in blank, retaining in their possession Master's consignees copies. On completion of loading, the Berthing Master will supply Masters with the figures required for the completion of the retained documents. Masters are requested to complete these before the departure of the vessel. Customs and Agency representatives will normally board vessels during daylight hours. Government regulations require that all vessels are cleared inwards before commencement of loading. Depending on other commitments of the offshore launch, it may be necessary to request Masters to provide temporary accommodation for these officials. Any attempt on the part of the boarding officers to persuade the Master to supply more than normal representation should be resisted. In the event of any problem arising over such a matter full details should be reported to the Agent.

WATCHMEN: Whilst berthed at an SBM, a security watch must be kept on the forecastle head by member(s) of the ship's crew throughout the hours of darkness to raise the alarm and advise Berthing Master on the approach of local small craft. Instances have occurred at Nigerian Offshore Terminals where nylon mooring ropes have been cut and stolen with the vessel in the berth. The Berthing Master should also be advised in the event that the vessel rides up to the SBM.

SHIPMASTER'S REPORT: The SBMs are situated about 11 miles offshore.

Moorings: Starboard derrick topped and doubled up. If accommodation ladder rigged, then on port-side. Not necessary for vessels up to 50,000 d.w.t.

Hoses: All sizes of reducers available.

SHIPMASTER'S REPORT: 1979.

Documents: Ship's stamp to be on all documents.

5 lists ports of call; 5 arms and ammunition (3 for Agent, 2 for Customs); 4 each of vaccinations; nil passengers; nil stowaways; crew labour list (presumably DBS); 1 copy of diversion cable; 4 lists "Nil" animals or birds.

Pilotage: Require accommodation ladder with pilot ladder for large vessels due to swell.

VHF: Channel 8 for all communications with Pilot, Loading Terminal, and Cargo Operations.

Berthing: Line required aft should preferably be polypropylene or one that floats.

Tankers: Loading temperature about 99°F, will vary slightly depending on loading rate.

OPERATOR: The Shell Petroleum Development Co. of Nigeria Ltd., Freeman House, 21-22 Marina, Private Mail Bag 2418, Lagos, Nigeria. *Tel:* 601600 (17 lines), 601820 (9 lines). *Telex:* 21235. *Cables:* Shell, Lagos. *Contact:* Port Captain, Forcados Terminal.

KOKO: 06.01 N. 05.29 E. (See Plan Book)

DOCUMENTS: See "Lagos".

APPROACH: Escravos Fairway Buoy 05.30 N. 05.04 E. for entry to Escravos River. Present draft limit 6.4 m. Dredging of channel from Escravos down to 10 m. expected to be completed by end of 1984.

PILOTAGE: On arrival at Escravos Fairway buoy the Master should call Delta Pilots Union on VHF Channel 16 to send a River Pilot onboard to pilot vessel to the mid-stream of Koko for further pilotage alongside the port by the NPA Harbour Pilot. Daylight pilotage only.

The mouth of Escravos River (05° 35′ N., 05° 10′ E.). is the main entrance for the Delta Creek ports of Warri, Koko, Burutu and Sapele. Before entering any of the creeks, rivers or channels from Escravos to the above mentioned ports, vessels are required to broadcast their intentions and to keep constant VHF radio watch. Positions and movements must be exchanged with other vessels in the vicinity.

The Pilot Station at Escravos is located 0.5 miles North of the Escravos Beacon. The boarding position of the Pilot is 1.0 miles West of buoy No. 5 (close to the breakwater) when vessel is ready for proceeding inward. Vessel will always drop anchor at Escravos inner breakwater anchorage until further instruction is received from the Port Authority.

In addition; On arrival of vessels at Escravos the Pilot normally boards with one helmsman and remains onboard until vessel's departure.

RADIO: See "Lagos" for ETA advices to Agent. Assistant Harbour Master at Sapele, or Beach Master at Koko to be contacted on VHF Channel 16.

VHF: Contact Pilot VHF Channel 16. Contact Agent in Sapele on VHF Channel 16.

BERTHING: Two hard quay berths giving a total quay length of 137 m. and max. draft of 7.32 m. Berthing during daylight hours only.

MEDICAL: Facilities available.
FRESH WATER: Available and delivered by barge.
FUEL: Diesel oil available locally and delivered by barge. Fuel oil available by barge from Warri and arranged through Agent, both products in limited supply.
FIRE PRECAUTIONS: No local facilities.
REPAIRS: No local facilities. See "Warri".
GANGWAY/DECK WATCHMEN: Compulsory during the night while in port.
REPATRIATION: By road to Benin or Warri, both connected with Lagos by regular air service.
TIDE: Range approx. 2 m., and velocity up to 3.5 knots.
DENSITY: Salt.
SHORE LEAVE: See "Lagos".
IDENTIFICATION CARDS: See "Lagos".
TELEPHONES: Not available for placing on board. Available in Post and Telegrams office in Sapele, and at Agent's office at Warri.

SHIPMASTER'S REPORT: 1977.
Documents: Livestock List also required.
Pilotage: Request Creek Pilots through Escravos Pilot on VHF Channel 16. The Pilots are local fishermen and race each other to the vessel to offer their services. They will not proceed beyond the breakwater. Special care must be taken when entering, as many of the buoys are out of position.

A strong N.W. current runs by the breakwater, also there is a heavy swell which makes steering difficult.

Draft varies but seems to be not less than 18 ft. at LW to 24 ft. at HW. In Escravos not only a Pilot boards the ship but a helmsman too. The latter is quite useful especially in the narrow part of Nanacreek.

Koko has a VHF station Channel 16 for port operations.

Cargo shed capacity is insufficient, so more often than not this shed is full and cargo is discharged into "direct delivery". But because of the bad infrastructure of this port and the frequent lack of lorries, this discharge is a slow operation (sometimes less than 100 tons per day).

Ships waiting for berthing at Koko can anchor downstream or upstream of the berth. The anchorage is good and the "Creekpilots" stay onboard, i.e. they stay till the ship's return to Escravos, where they boarded.

Repatriation: By road to Warri and there by small plane to Port Harcourt or Lagos.

AGENT: See "Sapele".

LAGOS (including Apapa and Tin Can Island):
06.27 N. 03.24 E. **(See Plan Book)**

DOCUMENTS:
Documentation Procedures:

1) By Federal Decree 2 months prior to vessel's arrival the Agent requires certain information from Principals in order to register the vessel with NPA for obtaining the Ship Entry Notice (SEN). Not applicable to vessels carrying petroleum products in bulk, or in ballast.

Without SEN the vessel cannot enter Nigerian territorial waters (30 nautical miles).

Information required is as follows: Name of ship, nationality, g.r.t., n.r.t., draft, LOA, Port of Registry, Certificate of Registry Number, Owners and/or Agents in Nigeria, Port of Origin, Port(s) desired in Nigeria, ETA, Total Tonnage of Cargo to be Carried (Outward and Inward), Description of Landings and Loadings for which permission is sought, e.g. General Cargo, Containers (in container vessel or mixed cargo vessel). Cement, Bulk Liquid, etc.

In addition, for preparation of preliminary Manifest, the following are required: Shipper, name and address, Consignee, name and address, Cargo Marks, Cargo Quantities (numbers), Cargo Description, whether Freight Prepaid or Collect, Estimated Time of Departure from Port of Loading.

2) 14 days prior to arrival Agent requires:
  10 Manifests.
  3 Stowage Lists.
  3 Hatch Lists.

3) On arrival at Lagos, Master must be prepared to present:
  5 Ports of Call Lists (last voyage).
  5 Crew Lists.
  4 Kroo Boy Lists.
  4 Animal Lists.
  *4 Arms and Ammunition Lists (if none on board only 2).
  1 Extra Manifest for transhipment (if applicable).
  1 Stores List.
  1 Crew Declaration List (personal effects).
  1 Declaration of Health.
  1 Vaccination List.
  1 Narcotics List
  1 Parcel List.
  5 Passengers Lists.
  1 Stowaway List.
  1 Declaration – fuel in double bottom tanks.

Currency List (for National Safety Organisation). Foreign currency may have to be deposited ashore.

*Ship's Master allowed 1 gun and 100/150 rounds of ammunition.

Where not applicable all documents still to be prepared bearing the marking "Nil".

Other forms prepared by the Agent and furnished on arrival.

4) For departure all documentation prepared by the Agent.

Berthing Procedures:

1) Master to cable Agent via Lagos Radio ETA 7, 4, 2 and 1 day prior to arrival enabling Agent to declare vessel at the Berthing Committee Meeting well in advance.

2) Master to contact Agent on VHF Channel 16 prior to arrival at anchorage (range approximately 30 miles).

3) On arrival at anchorage Master to contact Lagos Port, Call Sign "East Mole Station" giving all vessel and cargo particulars, Agent's name, SEN No. and date of issue. Vessel also to cable Harbour Master's Office for identical information. Thereafter watch on VHF as per Agent's instructions.

4) Only on arrival and strictly after declaration can Agent book Pilot and time for boarding will be advised.

5) The pilot station (Call sign "Chief Pilot's Office") will contact vessel well in advance to allow her to proceed to the Fairway Buoy for boarding of Pilot.

6) The Agent with the Health, Immigration and Customs and Excise Authorities board the vessel after berthing.

Unberthing Procedures:

1) Agent prepares (outward) Customs clearance and delivers a copy to Master.

2) Agent books Pilot and advises time for boarding.

3) Vessel keeps continuous watch on VHF for instructions from the Chief Pilot's Office.

PILOTAGE: Compulsory. Hoist "G" flag. Contact Pilot by VHF Channel 16. No pilot boat stationed outside. Daylight service only (until 1600 hrs.).

Only on arrival, and strictly after declaration, can Agent book Pilot; time for boarding will be advised.

The Pilot station (call sign "Chief Pilot's Office") will contact vessel well in advance to allow her to proceed to the Fairway Buoy for boarding of Pilot.

ANCHORAGES:

	Length	*Draft*
Pool 1	480 ft.	24 ft.
Pool 2	600 ft.	28 ft.
Pool 3	450 ft.	26 ft.
Pool 4	450 ft.	26 ft.
Badagry Creek	380 ft.	22 ft.

Vessels not permitted to remain at anchor at Pool 1 during hours of darkness due to poor holding ground.

4 vessels, maximum length 380 ft. can anchor at Badagry Creek Anchorage. Max. draft 22 ft.

RESTRICTIONS: Max. draft Pool Anchorage 8.23 m., Bruce Mooring Buoys 8.23 m., Marina Mooring Buoys 8.23 m., Apapa Hard Quay Nos. 1 – 14, 8.23 m., Apapa Hard Quay Nos. 15 – 20 10.50 m. and Tin Can Island Berth Nos. 1 – 10, 9.50 m.
MAX. SIZE: Max. draft 10.0 m. (salt water)
HEALTH: Port Health Officer boards vessel on arrival. ETA's must be advised by ship or Agent direct to Port Health. Pratique automatic when from Nigerian port. Also see "General".
RADIO: Master to cable Agent via Lagos Radio ETA 7, 4, 2 and 1 day prior to arrival, enabling Agent to declare vessel at the Berthing Committee Meeting well in advance.

Master to contact Agent on VHF Channel 16 prior to arrival at anchorage (range approx. 30 miles).

On arrival at anchorage, Master to contact Lagos Port, call sign "Signal Station" giving all vessel and cargo particulars, Agent's name, SEN No. and date of issue. Vessel also to cable Harbour Master's Office identical information. Thereafter watch on VHF as per Agent's instructions.

TUGS: No specific joining position, depending on tide and on Pilot's request, otherwise close to berth. Normally ship's line used. 1 tug 1,800 h.p., 1 tug 1,226 h.p., 1 tug 825 h.p. and several smaller for towing lighters. 24 hour service available. Also see "General".
BERTHING: Daylight hours only.

No specific arrival time is required for berths, except for Petroleum Wharf where tankers need high water. Berthing on ebb tide required for Fish Wharf and Ijora Wharf.

Unberthing: See "Documents".

Apapa Berths: 19 general cargo berths, 1 bulk cargo berth at Ijora. 6 container berths including 1 Ro/Ro ramp. Also 3 petroleum berths, 1 gas oil, 3 bulk oil and 1 grain berth, 5 storage sheds, although no cold storage available. Quay cranes not operative. The third Apapa Wharf extension is now completed and in full use. Container Quay 1,005 m. 2 gantry cranes with 40 tons lifting capacity have been installed and are in use with stacking area for Ro/Ro and containers. General cargo quay 525 m. Depth alongside 10.5 m. Vessel's Agent to make arrangements for discharge of 40 ft. containers due to lack of equipment.

Tin Can Island Berths: Tin Can Island Port (TCIP) is situated N.W. of Apapa, North of Badagry Creek.

Draft Restrictions: Berths 1 – 10, 9.50 m.
Tugs: 2 of 1,400 h.p.
Accommodation: Area 73 hectares, quay length of 3.5 km. Extensive quay apron 40 m. wide with berthing capacity for 10 – 15 vessels, of which 3 for Ro/Ro, depending on size of vessels and one of which has fixed stern ramp. Bulk berth for handling bulk commodities. Two service berths for tugs and light craft.

Dredged Channel is 200 m. wide with turning basin.

Two fresh water wells (250 m. deep) with purification plant.

Ten quayside cranes – 8 of 6 tonnes at 28 m. radius, 2 of 10 tonnes at 25 m. radius, transit sheds and warehouse each of 7,000 sq. m. area.

No cold storage.

Midstream Berth: 8 Marina Buoys and 1 Bruce Buoy.
CRANES: 1 floating crane of 100 metric tonnes and 1 of 250 metric tonnes. Apapa and Tin Can Island equipped with mobile cranes, forklift trucks, tractors, freight lifters, conveyors, trailers and container handlers.

250 ton crane:	50 ton lift at 31 m.
	100 ton lift at 28 m.
	150 ton lift at 21 m.
	250 ton lift at 10 m.

STEVEDORES: Available. First shift: 0730 – 1530 hrs.; 2nd shift: 1530 – 2230 hrs.; 3rd shift: 2230 – 0730 hrs. Overtime is paid for 2nd and 3rd shifts. Saturdays 0730 – 1530 hrs.

Overtime, Sunday and third shift not always worked as NPA making cutbacks.

MEDICAL: Agents to be given advance notice of medical attention required as early as possible. Hospital facilities available. International Certificates of yellow fever required.

TANKERS: 3 berths operated by the Port Authority. Length 177 m. Max. draft 7.62 m. No night berthing. Water and bunkers available. (Subject to tidal restriction).

Atlas Cove Berth: The Atlas Cove Jetty has 2 berths of LOA 180 m. and 80 m. and draft of 10.7 m. and 6.3 m. respectively.

Report: October 1981

Facilities for tankers discharging clean products.

(a) No ship entry is required for tankers coming into Nigeria to load/discharge cargo.

(b) There are three main oil tanker jetties available in Lagos namely PWA, NOJ and BOP each with max. LOA of 175 m. and max. draft. 7.6 m. There is also another jetty called "Ijora Wharf" from which Mobil Oil mostly take delivery of their cargo. This jetty has max. LOA of 115 m. and 18ft. 6 in. draft.

(c) Bunkers are supplied to vessels at these jetties by pipe-line as well as by barges.

(d) Fresh water is also available from both NPA and private barges but difficult in most cases.

DENSITY: 1012.

FRESH WATER: Delivery by barges at between 20 to 40 t.p.h. Advance notification needed. Available by pipe-line at Tin Can Island.

Notice: February 1984.

It is hereby notified to Owners/shipping companies including their Agents that owing largely to the limited quantity of available fresh water in the port, the maximum quantity of fresh water to be approved to any vessel for one request is 50 tons only.

Other new requests for the same vessel will not be approved until all requests previously recorded before them are supplied. The Assistant Harbour Masters will not allow any request for more than 50 tons of fresh water to be paid for. Please ensure strict compliance.

FUEL: Fuel oil available by barge only, coal bunkers obtained from Ijora Wharf. A guarantee of sufficient bunkers to last the period of stay on a berth will be one of the conditions to be satisfied before a vessel is allocated a berth.

SEN also required for vessels taking bunkers only.

Also see "General – Notice No. 2/83".

FIRE PRECAUTIONS: Tankers and vessels with explosives: fire-boat always in attendance with fire-control depot ashore working in conjunction with the Harbour Master on VHF Channel 16. Port area tugboats also equipped for fire fighting.

GANGWAY/DECK WATCHMEN: Compulsory during night while in port. Recommended at night also for vessels anchored Lagos roads unless at least 20 miles offshore.

OPENING/CLOSING HATCHES: Stevedores/crew.

CUSTOMS ALLOWANCES: Tobacco allowance: 200 cigarettes per person, re-issue after 7 days. Wine/Spirit: 1 part bottle, re-issue to officers after 7 days.

IDENTIFICATION CARDS: Passports or identity cards.

CONSULS: Most countries maintain Embassies/High Commissions or Consuls.

REPAIRS: Major repairs available. Spares often in short supply.

DRY DOCKS: Authority maintains large, well-equipped dockyard, which, while primarily for maintenance of Authority's own fleet, provides facilities to commercial interests. There is a modern floating dock which has lifting capacity of 4,000 tons. Max. draft 18 ft. Synchro-lift available lifting capacity 100 tons max.

In addition to facilities offered by Authority's dockyard, major shipping agencies in port maintain dockyard installations, including slipways for taking smaller vessels and lighters; can provide first-aid repair for main line vessels.

Bull Nose – No. 1 – can accommodate a vessel of 380 ft. in length and max. draft 16 ft. 6 in.

Bull Nose – No. 2 – can accommodate a vessel of 250 ft. in length and max. draft 16 ft. 6 in.

REPATRIATION: Facilities available for effecting crew changes and arranging any necessary repatriations.

AIRPORT: Ikeja 14.4 km. from port, served by regular airlines.

TIME: GMT plus 1 hour.

HOLIDAYS: Fixed: New Year's Day (1st January); National Day (1st October); Christmas Day (25th December); Boxing Day (26th December). Variable: Good Friday; Easter Monday; Eid-El-Fitir Festival; Eid-El-Kebir Festival; Maolud Nabiyyi (Mohammed's Birthday). Port closed on National Day, Good Friday and Christmas Day.

POLICE/AMBULANCE/FIRE: Police Apapa 45798, Lagos Custom 20030; Ambulance Apapa 41341/227; Fire Apapa 41741, Lagos Custom 20777, General Emergencies 199.

TELEPHONES: No arrangements for telephones on board.

SHORE LEAVE: Crew members allowed ashore after clearance by Port Health and Immigration Authorities.

GENERAL: Notice issued by the Harbour Master in May, 1976:

Will all ships' Agencies note that from the date of this circular letter, Lagos Radio has been instructed to reject any telex messages from any ship addressed to the Harbour Authority unless the itemised particulars are included:

(a) Ship's name.
(b) Ship's call sign.
(c) Ship's Agent's name.
(d) Ship's length overall.
(e) Ship's tonnage loaded.
(f) Ship's draft.
(g) Nature of cargo (i.e. cement, general cargo, etc.).
(h) Last port of call.

Notice issued by the Nigerian Federal Ministry of Health in May, 1976:

Please communicate to all Masters that request for Radio Pratique either by international sanitary codes or otherwise must state clearly the following:

(a) Last port of call.
(b) Number of crew.
(c) Vaccination and inoculation of crew.
(d) Date and time of arrival.
(e) Condition of ship.
(f) Number of passengers onboard.
(g) Name of Agent.

Notice dated 1982 issued by NPA.

The following documents must be despatched with manifest from the last loading port in order to report vessel in advance to the Department of Customs and submit advance manifest to facilitate payment of NPA dues to berth vessel on arrival.

1. Crew Declaration.
2. Crew List.
3. List of Arms and Ammunition.
4. Passenger List.
5. Animals List.
6. List of Ports of Call.
7. Mail List.
8. Authority to Act as Agents.

Two copies of each of the documents are necessary.

NPA Harbour Master's Notice No. 2/83:

"BUNKERING IN PORT

Further to my previous circulars concerning bunkering in port, it is still observed that Masters/Agents of vessels calling at port of Lagos are not advising the Harbour Master before bunkering the vessel about their intention to bunker the vessel.

It is imperative that Masters/Owners of vessels/Agents should, before 'repeat' before bunkering the vessel, forward to the Harbour Master, the N.N.P.C. document showing that the supplier is an authorised one and the NPA Licence permitting the barge to supply vessels with bunkers.

This notice should also be in good time before bunkering the vessel to enable the Harbour Master to advise the Chief Fire Officer about the operation. This instruction should be carried out whenever a vessel is getting bunker to ensure that N.N.P.C. instructions and NPA regulations are complied with, failing which heavy fines must be imposed."

SERVICES: Small services available.

AUTHORITY: Nigerian Ports Authority.

AGENT: Alraine (Nigeria) Ltd., 26 Creek Road, Apapa, Lagos. P.O.Box 2206, Lagos. Tel: 803470/1/2/3/4. Cables: "Freight Lagos". Telex: 21244.

PENNINGTON OFFSHORE TERMINAL:

04.15 N. 05.36 E. **(See Plan Book)**

COURTESY FLAG: All vessels must exhibit the Nigerian National Ensign from their foremast or as appropriate while in the vicinity of the moorings.

LOCATION: The floating storage vessel, is the VLCC m.v. "Oloibiri" (272,535 d.w.t.) moored to SPM–A, one of two single point mooring berths.

1. SPM-A is located approximately 20 miles off the mouth of Fishtown River in a position

Lat. 4° 14′ 35.2″ N.
Long. 5° 36′ 53.2″ E.

2. The Export Tanker Buoy (SPM-B) is capable of accommodating vessels up to 250,000 d.w.t. and is located at

Lat. 4° 15′ 0.0″ N.
Long. 5° 36′ 10.5″ E.

on a bearing of North 60° West and a distance of approximately 5,000 ft. from SPM-A. The minimum water depth at SPM-B is approximately 88 ft.

APPROACHES: Incoming tankers should make their terminal approach from a Westerly direction to a point not less than 2 miles Westward of the Export Tanker Berth. At this location the Mooring Master will board the vessel, or will direct the vessel to the Anchorage (2.5 miles S.W. of the terminal).

DOCUMENTS: Following documents required by Customs and Health Officials.

Last Port Clearance.
Ship's Register.
3 copies Vaccination List.
1 copy Stores List.
1 copy Crew Declaration.
4 copies Crew List.
4 copies Passenger List.
5 copies Animal List.
4 copies Ports of Call (last 6 weeks).
5 Arms and Ammunition List.
3 copies Stowaway List.
3 Crew Labour Lists.
20 Copies Dry Tank Certificate.

Also on arrival, 20 copies of Readiness Letters.

Before sailing and immediately upon completion of loading, vessel must provide 20 copies of Ullage Report.

Government Officials representing various departments may, at their discretion, board the vessels in the Terminal area.

PILOTAGE: (See "Approaches"). The Company Mooring Master, together with Customs Officials will board incoming vessel about 2 miles Southwestward of the Terminal Export buoy. Vessel's Master will be advised on approach to the berth details in respect of mooring, unmooring, connecting and disconnecting hoses, loading operations and departure from the berth.

Vessels are requested to have a combination ladder safely and securely rigged for immediate use, and long enough to reach the Mooring Master's launch. A light line should be ready to take on board the Mooring Master's radio and/or briefcase.

The Mooring Master will remain on board during loading operations and he will be in direct control of all ship communications while in Terminal area.

RESTRICTIONS: Operation of the terminal is on a 24 hour, seven days a week basis, weather and other circumstances permitting.

MAX. SIZE: Max. d.w.t. 250,000 tons.

RADIO: Vessels proceeding to be loaded at the Terminal must cable their ETA to the Company (Cable Address: "Topcon – Lagos") 96 hours and again 24 hours prior to arrival. The Company in Lagos will then notify the Chief Mooring Master on board the Special Purpose Vessel. Also as early as possible prior to arrival, vessels should establish direct communication with the Terminal. The Terminal radio station watch keeping is for 5 minutes at 0700 – 1100 – 1500 – 1900 hrs. GMT.

Call Letters: 5 NDF (Oloibiri)
On A1 Listen on 8362 – 8365 kHz
On A2 Listen on 500 kHz.

Ship to Terminal communication while vessels are in the export tanker berth will be by portable VHF radio-telephone units, provided by Terminal.

The Company Mooring Master will advise ship's Master regarding emergency whistle signals set up for use in event radio-telephone units become inoperative. Use of ship's radio station and/or battery charging is prohibited while loading is in progress.

VHF: When in VHF range vessels shall contact the Terminal on VHF Channel 16 (156.8 MHz).

TUGS: *SPM Vessels:* The Terminal will have available 2 line handling vessels and one SPM-Hose maintenance vessel. These 3 vessels are under the control of the Mooring Master and are used to assist the mooring of the Tanker as required. These service vessels are not available to the Tanker for any other work.

READINESS: The Company will make every effort to load vessels upon arrival, or as promptly as berth is available, weather permitting.

"Notice of Readiness" will be accepted as at time of arrival, provided vessel is in all respects ready to load.

Arrival time will be considered as at the time Mooring Master boards vessel, or at the time vessel anchors off the terminal, which ever occurs first.

The Mooring Master may reject a vessel if in his judgment she is not properly equipped or suitably manned, or if, upon inspection, he deems her to have dirty ballast or tanks unsuitable for cargo. However, Company will not issue any certificate or representation purporting to state that vessel's tanks, pipes and pumps and appurtenances are clean or acceptable for receiving cargo nor will the Company assume any responsibility for "contamination of cargo aboard ship caused by condition of ship's tanks, pipes, pumps or appurtenances".

The vessel shall have in readiness 2 nylon ropes with a minimum diameter of 2 in., each approximately 200 ft. long and each terminated with 2×2.25 in. joining shackles to attach and retrieve the SPM mooring lines.

Vessels must be adequately equipped with blocks, tackle and booms to hoist the floating hose string in a safe, efficient and expeditious manner. Vessels must also have an adequate supply of nuts, bolts, gaskets and wrenches to connect cargo hoses system.

BALLAST: Absolutely no provision is made for dirty ballast. Vessels with dirty ballast will be rejected and all costs therefrom will be to the vessel's account.

It is the Ship Master's responsibility to see that no oil or oily ballast is pumped or spilled overboard. Drip pans must be used at all times and all scuppers must be plugged. The waters in and adjacent to the Terminal must not be polluted, and only clean oil-free ballast and/or clean bilge water may be discharged at the Terminal.

As soon as practicable after arrival, and prior to acceptance for loading, all vessel's tanks will be inspected for evidence of oil in ballast, and during discharge of ballast, similar inspections will continue. If evidence of oil appears at these inspections, the vessel may have to vacate berth. Upon her return, vessel will be obliged to tender new "Notice of Readiness".

If, during the first inspection or during process of loading it is revealed that vessel's tanks are not oil-tight, she will be rejected, or refused further loading.

In addition to lights usually displayed, vessels discharging ballast or loading cargo during darkness will illuminate the area around the ship to satisfaction of the Mooring Master, in order that any oil on the surface of the sea may readily be detected and appropriate action taken. Vessels unable to illuminate sea satisfactorily may not discharge ballast during darkness. Vessels should provide suitable floodlights for working on deck during night operations.

In the event any vessel should accidently discharge dirty ballast or spill oil in the vicinity of the Terminal, the Company shall have the right to take any action that may be necessary to clean up or remove any contamination or pollution resulting from such discharge of dirty ballast or spillage. In addition, the Company shall have the right to settle any claims of third parties arising from such contamination or pollution. All costs and expenses incurred by the Company to carry out the cleaning up of such contamination or pollution or the settlement of third party claims, shall be the joint and several liability of the Vessel, its Owners and Managers, and the Company shall be entitled to claim reimbursement accordingly in any jurisdiction.

Vessels properly equipped will be encouraged to discharge clean ballast and load simultaneously.

BERTHING: All manoeuvring of vessels within the loading berth area is to be done only in accordance with advice of the Company's Mooring Master, subject to the understanding that in all cases and circumstances the Master of the vessel being manoeuvred shall remain solely responsible for the safety and manoeuvring of the vessel. Vessel's Master or a qualified Deck Officer must be on bridge at all times during manoeuvring.

EXPORT TANKER BERTH FACILITIES: The Export Tanker Buoy is a conventional SBM which is 10 m. in diameter and held in position by 6 chains secured to piles sunk in the seabed. Two mooring hawsers with one chain and a single floating hose string extend from the buoy.

CONNECTING MOORING LINES: When the vessel is within reasonable distance of the SPM-B, ship's line will be carried by a line handling launch to the floating buoy line and secured. This line will then be heaved aboard. As the buoy ropes come clear of the water it will be noted that chains are attached to them. This chain is to be secured to the bits in such a manner that the nylon is outside of the extreme length of the ship; i.e. so that the chain will absorb any chafing if the buoy line crosses the bow. Power must be available at all times on all winches and windlass while vessel is at the berth.

HOSES: The hose system is 910 ft. long (26 sections) terminating in a 12 in. hose.

LOADING: During loading, the International Code Flag "B" shall be displayed from top-mast signal halyard during daylight hours. During hours of darkness, a red light shall be displayed, visible at a distance of at least 1 mile, and showing unbroken light all around the horizon.

Raising, connecting, disconnecting and lowering of the floating hose system will be performed by vessel's crew under direction and supervision of an appropriate vessel's Officer as advised by the Mooring Master, who will remain on board while the vessel is in moorings.

After the vessel is securely moored the floating hose will be lifted to the rail on the starboard side amidships. The weight of the lift is approximately 5 tons and is lifted with the vessel's gear. The Mooring Master advises the vessel's personnel in the lifting, connecting, disconnecting and lowering of the hose system. A vessel's Deck Officer must be present, and direct the crew in all hose handling. There must be sufficient crew on deck to perform this work.

The vessel's Master is responsible for own vessel at all times. The max. loading rate is about 15,000 b.p.h. and the Company Mooring Master will advise in respect to loading pressures and hazards, but will not direct the loading except as may be necessary to protect the Terminal facilities. Manipulation of the vessel's valves is the direct responsibility of vessel's personnel.

Prior to commencement of loading, the Chief Officer will assure the Mooring Master that sea suction valves are *closed* and he will make note to that effect in Mooring Master's log before cargo loading is started. Final ullaging and computation of cargo will be done by an Officer of the vessel who will hand this information to the Mooring Master for transmittal to the Terminal for use in comparing metered-out cargo.

Caution: The incoming oil stream is controlled by the Terminal and it is extremely dangerous to close a cargo valve against the incoming stream. Such a procedure creates excessive pressure, which may damage hoses, piping or Terminal facilities. Vessels will be held liable for damages resulting from failure to observe this precaution.

Emergency Signal: When normal ship-to-Terminal communications fail, the emergency signal to stop the flow of oil will be a continuous blast on the whistle until oil ceases to flow. Steam or air should never be shut off from the whistle during loading. Whenever emergency whistle is used, all loading operations will be shut down until communications can be re-established.

Fire on Board of Export Tanker: The emergency signal must be given immediately to the Terminal. A vessel's Deck Officer with sufficient crew members must be ready and when so ordered by Mooring Master, close the manifold, disconnect the hose and standby on fo'castle ready to let go of the mooring line.

Terminal Stops: Request for the Terminal to stop the flow of cargo at a predetermined tonnage must be made in writing. Requests must include the statements that the Company will not be held responsible for any error and in case of overloading, the excess cargo cannot be pumped back to the Terminal. Some delays are always incurred when such a Terminal stop request is made.

SAFETY: The vessel's personnel are responsible for the safety of the vessel, and must take all necessary precautions whether or not so advised by the Mooring Master. Any safety precautions imposed by the Company Mooring Master and disregarded by ship's Officers or Crew, will be considered just cause for rejection of the vessel and all expenses and liabilities related thereto will be for account of the tanker.

Not less than 1 Deck Officer and 3 seamen shall be available on deck at all times while vessel is in the moorings.

One of those to be kept always on look-out on the bow to avoid contact with the SBM.

Power must be available at all times on deck winches and windlass while vessel is in the moorings.

The presence of unauthorized craft alongside is extremely hazardous and Masters are requested to require all unauthorized craft to clear the vessel's side prior to ballast pumping and cargo loading.

Mooring Masters are authorized to shut down loading operations during severe electrical storms, if another vessel or craft of any description comes alongside the loading vessel, and under any other circumstances which imperil loading operations.

MEDICAL: Medical assistance on an emergency basis only.

REPAIRS: No facilities of any kind are available. Pennington Offshore Terminal is considered an open roadstead and under no circumstances may engines be shut down for repairs while a vessel is moored in the Export Tanker Berth. The vessel must be able to depart from the berth immediately on instructions to do so.

FUEL: Not available.

STORES: Not available.

REPATRIATION: Not permitted except in grave emergencies.

SHORE LEAVE: Not permitted.

WEATHER/CURRENTS: Wind and swell are mostly from a S.W'ly direction. The weather is generally good from November to May but is unfavourable during the wet season months of May to November. The currents are irregular and at times strong. The Mooring Master will provide the Master with this information when boarding the vessel.
FRESH WATER: Not available.
GENERAL: Cargo inspection services are available from E. W. Saybolt and Co. S.A. who have offices in Lagos. The use of this service will be for account of vessel or Consignee.

Cash and laundry service not available.

SHIPMASTER'S REPORT: December 1983.
Radio: Export tanker radio transmits on 8385 kHz and receives on Channels 5/6. Advisable to give tanker a 2 day ETA.
Berthing: During vessel's stay 1 Berthing Master, 1 Cargo Surveyor and 2 Nigerians stay on board and require food and accommodation.

The 2 Nigerians keep a buoy watch together with the vessel's own watchman.
Loading: API is usually 36.9 at 60°F. Loading rate approx. 2,000 t.p.h at 84°F.

After loading there is no EDP and it is necessary to leave the berth, anchor and wait about 5 hours for paperwork.
Customs: Customs inspect store rooms.
Developments: Existing (12 in.) pipe-line is being replaced by a 16 in. pipe-line, which will increase loading rate.

AGENCY: The Company does not perform general agency functions. Owners of vessels calling at the Terminal may arrange for their own Agents, although due to the location of the Terminal there are no Agent's offices in the area. For this reason the Company will arrange for the minimum agency service necessary to document and clear vessel and export cargo through Nigerian Customs. Costs of this Agency service will be charged back to appropriate parties.
NOTE: Should any vessel or craft sink or become an obstruction in the vicinity of the Terminal or at the Terminal, the Terminal Operator shall be empowered and shall have the right to take any steps it may deem necessary to remove the obstruction without notice to the owners. All expenses of such removal shall be borne by the vessel or craft or by those owning it at the time of the accident causing the obstruction, and the Terminal Operator shall be entitled to reimbursement by them for any such expenses incurred by it.
OPERATORS: Texaco Overseas (Nigeria) Petroleum Company.

PORT HARCOURT (incl. Okrika Refinery): 04.46 N. 07.00 E.

DOCUMENTS: Ship Entry Notice, See "Lagos".
14 days prior arrival Agent requires:
- 10 Manifests.
- 3 Stowage Plans.
- 3 Hatch Lists.

On arrival at Port Harcourt, Master to present:
- 7 Ports of Call Lists.
- 7 Crew Lists.
- 2 Kroo Boy Lists.
- 3 Animal Lists.
- 5 Arms and Ammunition Lists.
- 1 extra Manifest for transhipment is applicable.
- 4 Stores Lists.
- 3 Crew Declaration Lists (belongings).
- 1 Declaration of Health List.
- 4 Vaccination Lists.
- 3 Narcotics Lists.
- 2 Parcel Lists.
- 6 Passenger Lists.
- 2 Stowaway Lists.

Where not applicable, forms to be marked "nil". All other forms including departure documentation prepared by Agent.
PILOTAGE: Compulsory from Bonny Fairway buoy. The pilot station for Port Harcourt is at Bonny, 15 miles from Fairway Buoy, 28 miles from Port Harcourt. The Harbour Master keeps watch on VHF Channels 16 and 14 and on 2182 kHz from 0700 hrs. to 1800 hrs. Pilot boards at Fairway Buoy from pilot-cutter green hull, stone colour superstructure.

Position of Fairway Buoy: Lat. 4° 12′ 56″ N., Long. 7° 00′ 28″ E.

It should be noted that Bonny is an Oil Terminal and as such heavy traffic of tankers is continuous. In extreme circumstances vessels may be requested by Harbour Master to pass the channel from Fairway Buoy at Bonny, and anchor at Bonny without a Pilot, in which case latest Notices to Mariners should be studied in order not to damage oil pipelines in prohibited anchorage areas.
ANCHORAGES: Position West of Fairway Buoy, depths 8–9 fathoms. Also on Bonny River at Bonny Town.
RESTRICTIONS: Vessels for Okrika and Port Harcourt can only navigate during daylight.
MAX. SIZE: Also see "Berthing" and "Report". Max. draft is 7.32 m. at HW. Max. length 600 ft., no restrictions on beam. Ebb tide reaches a max. of 3 knots off the berths and 2.5 knots in the river, flood tide 2.5 knots off berths and in the river.
RADIO: Master to cable "Agent" Lagos via Lagos Radio ETA 7, 4, 2 and 1 day prior arrival. Master to contact Bonny Harbour Master on VHF Channel 14 on arrival at anchorage giving all vessel and cargo particulars, Agent's name, SEN No., and date of issue.

Master also required to advise Port Harcourt Harbour Master identical information through Lagos Radio and to contact Port Harcourt Agent on VHF Channel 14, keeping watch on this Channel per Agent's instructions.

HEALTH: Q-flag to be shown on arrival, except if from another Nigerian port. Yellow fever inoculations compulsory.
TUGS: 3 N.P.A. tugs of about 1,000 h.p.
BERTHING: *Port Harcourt:* 8 berths for general cargo at hard quays. Maximum practical draft 7.32 m.

8 dry cargo berths depth 33 ft. – 35 ft.

Mooring buoys, Dockyard Creek with 5 buoys, max. draft 7.62 m.; Dawes Island anchorage discharging for about 12 vessels, max. draft 8.23 m.; Pool 4 buoy berths max. draft 6.01 m.; Tanker buoy 1 berth.

B.O.P. Berth. This berth lies outside the Quay area, and is for the loading of palm oil by means of a direct pipe-line from the installation of Bulk Oil Plants (Nigeria) Limited. It consists of a central "T" jetty with dolphins and is capable of berthing vessels up to 480 ft. in length. It is also used for the discharge of explosives as such cargo is not permitted to be handled across the general cargo Quay.

Oil is supplied by a 6 in. diameter pipe at a maximum rate of 250 t.p.h.

Coal Handling Facilities: Facilities for loading coal have been completed and a conveyor capable of loading about 60 t.p.h. is working. Max. draft at the coal berth is 7.62 m. This berth is situated at the Northern end of the port, berth No 8.
Okrika Oil Refinery: (Lat. 04° 44′ N., Long. 07° 05′ E.). Okrika lies on the Bonny River, 56 km. from the sea. The approach over the bar is by a channel 12.8 km. in length. Depth in channel: See "Bonny". The river from Bonny to Okrika has been dredged as necessary to a depth of 8.84 m. Chart Datum. The bar channel and river are well buoyed with light buoys, port and starboard. There are also beacons in the river. Jetty at the oil refinery suitable for berthing coastal and ocean tankers up to 33,000 d.w.t. The jetty is "L" shaped with a square dolphin at the end of the arm. Ocean tankers secure on the outside of the jetty making fast to two sets of mooring dolphins each end. The coastal vessels and barges are berthed on the inside of the jetty. Oil is supplied via gantry hoses on either side.

Max. draft limit for tankers sailing from port 9.67 m., draft for berthing 7.92 m.

Fresh water available from the jetty.

The tugs based at Port Harcourt are available if required.

Pilotage is compulsory from the Fairway Buoy to the Refinery Jetty except for Naval vessels and vessels of less than 1,000 tonnes whose Master holds a licence issued by the Nigerian Ports Authority. All vessels using the Refinery Jetty will berth and unberth on the flood tide only during daylight hours until further notice.

Also see "Report".
STEVEDORES: Gang requirements and hatch distribution should be included in 48 hours ETA cable to Agent. Discharging general cargo 8 tons per gang/hour, cement 15 tons per gang/hour, bagged cargo 20 tons per gang/hour, loading produce 15–20 tons per gang/hour.
MEDICAL: Doctors available 24 hours, but limited supply of medicines available. Yellow fever vaccination required.
TANKERS: See "Berthing" and "Shipmaster's Report" – May 1981.
DENSITY: Approx. 1015.
FRESH WATER: Limited supply by barge.
FUEL: Most standard lubricants available, fuel and gas oil available by barge or road tanker. Requirements by 48 hours ETA cable.
GANGWAY/DECK WATCHMEN: Compulsory during hours of darkness.
OPENING/CLOSING HATCHES: Normally by crew.
CUSTOMS ALLOWANCES: 200 cigarettes per man per 7 days. 1 wine or 1 bottle spirits per officer per 7 days.
IDENTIFICATION CARDS: Crew to carry passport or seaman's book whilst ashore.
REPAIRS: Only very minor repairs available, no spares.
REPATRIATION: Possible via Lagos or Port Harcourt.
AIRPORT: Port Harcourt International Airport 30 km. from port. International and domestic flights.
TIME: GMT plus 1 hour, no changes during the year.
HOLIDAYS: See "Lagos".
POLICE/AMBULANCE/FIRE: All can be contacted by telephoning 999.
SHORE LEAVE: Allowed provided crew carry passport or seaman's book.

REPORT: September 1984.
- (a) Okrika sailing draft now 31 ft. 9 in.
- (b) Compulsory pilotage for all classes of vessels including service boats is now in force.
- (c) All vessels are to direct radio messages/cables advising ETA's to the port of destination and not to N.P.A. headquarters in Lagos to avoid delays.
- (d) Station Tanker "Maryland" – 152,035 d.w.t., LOA 915.34 ft. Summer draft, 58 ft. and operating on max. draft of about 40 ft. with which she is capable of lifting 85,000 tonnes of product. Vessel's position is approximately Lat. 4° 25′ N., Long. 7° 08′ E. at Bonny Inner Anchorage.

SHIPMASTER'S REPORT: 1977.
The ETA for this port should be sent via Lagos Radio, but much earlier than 48 hours. Better as soon as possible, for communication between Lagos and the out-ports is poor.

The normal practice at the moment is that the Master enters the Bonny River himself after permission from Bonny Harbour Master. The anchorage position on Bonny roads is given by Harbour Master and vessel can proceed as far as buoy 1A. (A few miles up Bonny River).

Discharging at Port Harcourt not only occurs alongside, but from Dawes Island upwards to Port Harcourt. Ships are discharged while laying at anchor. No buoys available. The cement cargo ships especially are discharged this way.

At Dawes Island the Bonny River Pilot leaves the ship and is replaced by a Port Harcourt Pilot.

Tugs are not available for mooring.

SHIPMASTER'S REPORT: May 1982.
Documents: 6 Crew Lists, 5 Passenger Lists (or negative), 8 Arms and Ammunition Lists (or negative), 6 Livestock Lists (or negative), 7 Ports of Call Lists, 2 Bonded Store Lists, 5 Vaccination Lists, 2 Crew Declarations.

As we were a tanker in ballast we did not present any Manifests and Bills of Lading. However, the Immigration Officer asked for a declaration from Master that there were no stowaways on board. No special form used.

Pilotage: Pilot keeps watch on Channel 14 and all traffic passed from this Channel to others (12, 13). As there is a shortage of Pilots, sometimes one Pilot comes out at Fairway Buoy and boards the first vessel to enter. The two or three other vessels entering at same time are directed to follow the vessel with the Pilot on board through the entrance channel to Bonny. When no Pilot waits at "N" buoy, the Pilot on board the first vessel will direct the others to the anchorages at Bonny as far as Buoy 1A.

During our stay it was observed that sailing out was performed at any hour but sailing in was only performed during daylight hours.

As the channel from Fairway Buoy and Bonny is a one-way channel all traffic is controlled by Bonny Signal Station who keep watch on VHF Channel 14 continuously and gives permission to vessels who intend to use the channel regarding the other vessels who are using it.

The Pilot from Port Harcourt to Bonny will normally disembark at Bonny outward bound. However, if another vessel is waiting at the fairway buoy to proceed inward or if requested by Master, Pilot will take vessel to the fairway buoy.

Our Pilot left at Bonny Pilot Station and vessel can proceed to sea after getting permission from Bonny Signal Station to do so. If outward channel is not clear from inbound vessels you are requested to wait until the last vessel reaches "N" buoy. In some circumstances they will allow vessels to cross each other near "M" buoy but no further than that.

On this occasion it was noted that "L" buoy (starboard) was missing.

Tankers between Bonny and Port Harcourt can only proceed with Pilot and during daylight hours. When proceeding to Okrika the Pilot boards at Bonny Pilot Station or at Bonny Anchorage and conducts vessel up river to Okrika and berths vessel. If possible he starts from Bonny when tide begins flooding up river, it takes about two hours for tide to reach Okrika and vessels take about same time in steaming, so when we reached Okrika the tide begins flooding.

Tankers berth port side to and use starboard anchor to make the turn. Pass a line to a mooring buoy so that it will be on starboard bow when the vessel is berthed to assist the berthing. After completion of berthing this line is taken in, as it has no more use and on account of thieves. Vessels remain secured by 3 breast lines to dolphins forward and aft and 1 spring line to jetty forward and aft.

When sailing, after taking in all lines, the last ones being one breast line forward and aft, the starboard anchor will assist the vessel to leave the jetty and reach the middle of the channel.

Maximum draft for sailing out of Okrika Terminal is 32 ft. (9.75 m.), when berthed port side to the jetty. If berthed starboard side to the jetty the maximum sailing draft is 25 ft. (7.60 m.). It is convenient when sailing at maximum draft to go to the jetty always port side as if going starboard side to when loaded to 25 ft., vessel has to stop loading, unberth, turn and berth one more time and all these operations must be performed only during daylight hours and at special stages of tide.

Sailing out from Okrika with 32 ft. will be performed in daylight and vessels must leave jetty two hours before high tide at Bonny.

The channel from Okrika to Bonny has been kept dredged to the Chart Datum, it was well buoyed and was made by the vessel loaded without any difficulties. Our sailing draft was 32 ft.

Health: "Q" flag to be shown on arrival, on river and on berth, till the Health Authorities board the vessel and give clearance.

Okrika Jetty: Further to the information above there is a new jetty, down river, close S.E. of the former, which is ready as a normal quay, but will have to have oil loading facilities and pipe-lines, connected to the existing ones at the middle of the connection to shore of the former jetty. The new jetty is provided with six buoy fenders (cylindrical type), four of them in the middle, (the small type) and two (large type) near the extremities of jetty. It is expected that the mounting of pipe-lines, oil loading facilities and other facilities will take about 2–3 years.

Density: During our stay, May 6th – 9th, we experienced the following: at LW 1018; at HW 1019; water temperature 30° C.

Fuel: Fuel oil, diesel oil and gas oil are available. We took gas oil without difficulty but fuel oil takes a long time as occasionally they need to flush all lines and this takes a long time. Orders must be placed well in advance as it takes a long time to get confirmation from Lagos about the supply.

Shore Leave: No difficulties, but recommended in daylight hours.

Communications: Between Lagos and Port Harcourt are very poor. Telex lines were inoperative at time of our stay and all messages between Lagos and Port Harcourt Agency Offices were passed by radio or telephone with delays.

AUTHORITY: Nigerian Ports Authority.

AGENT: Alraine (Nigeria) Limited, P.M.Bag 622, Port Harcourt. Tel: 084 222.531. Telex: Freight Lagos 21244 attention – Port Harcourt.

QUA IBOE: 04.20 N. 07.59 E. (See Plan Book)

LOCATION: The Terminal is located on the Eastern side of the estuary of the Qua Iboe River in approximate position Lat. 4° 33′ 00″ N., Long. 7° 59′ 30″ E.

The crude oil storage facilities consist of seven tanks each of 500,000 barrels capacity.

At the present time considerable work is being carried out in the area.

ESSENTIAL REQUIREMENTS:

1. No dirty ballast.
2. Advise arrival time.
3. Vessel to have ready prior to arrival:

(a) Two ships' ropes on the bow, or long nylon messenger 1.5 in. diameter. One floating ship's rope (polypropylene) on the stern for the mooring boat to tie-up.

(b) Port side derrick, and gear rigged to lift floating hoses.

4. Mooring Master meets vessel in the suggested safe anchorage area.
5. Have pilot accommodation ladder combined ready, *or air hoist.*
6. Make a lee for the Mooring Master to board the vessel.
7. The Master of the vessel is responsible for the safety of his ship at all times.
8. Ship's crews perform all operations of mooring, unmooring, connecting and disconnecting hoses on board ship.
9. No shore leave.
10. Whilst arriving fly the Nigerian Ensign (Green-White-Green, vertically arranged). By day: Fly flag "Q" for quarantine service. By night: Display red over white light.
11. Nigerian time is GMT plus 1 hour.
12. No supplies of any kind, no medical services (except in cases of emergency) or other services are to be expected at Qua Iboe Terminal.
13. No Agency.

All vessels loading at Qua Iboe must have 2 bow anchors and a minimum of 10 working shots of chain attached to each anchor.

DOCUMENTS:

The following documents are required by the Nigerian Government Customs Representative at Qua Iboe Terminal:

4 Copies Crew List.
4 Copies Ports of call within the last three months.
2 Copies List of Birds and Animals.
1 Copy Passenger List.
1 Copy Stores List.
2 Copies List of Arms and Ammunitions.
1 Copy Crew Personnel Effects List.
3 Copies Vaccination List.

Attached to the store list, should be a list of Narcotics.

If the vessel has a clearance for another port the deviation cable has to be shown to the Customs Officer.

PILOTAGE: Vessels loading at Qua Iboe will be boarded by a Company Mooring Master either at the anchorage or where directed.

The Mooring Master will advise the ship's Master in regard to the approaches to the berth; and the mooring, unmooring, connecting, disconnection of hoses, departure from the berth and loading operations.

All vessels must have upon arrival a pilot ladder in good, clean condition safely and securely rigged. A vessel arriving with freeboard of 30 ft. or more must use its accommodation ladder in conjunction with the pilot ladder unless a "pilot hoist" or similar arrangement is available.

In the event that a vessel is deemed by the Mooring Master to be improperly or insufficiently equipped with adequate mooring facilities, lines or gear, then he shall so inform the ship's Master. In such an event the vessel will not be brought into the mooring until satisfactory gear or equipment is provided.

ANCHORAGE: Numerous submarine pipe-lines and structures exist in the approaches and close vicinity of the loading berths.

Under no circumstances whatsoever should vessels anchor except in the approved anchorage described below.

The safe Anchorage Area is located 2 miles S.E. of the Berth Operation Platform (BOP) and clear of the SPMs between the parallels of Latitude 4° 10′ North and 4° 13′ North and meridian 8° 03′ East and 8° 07′ East.

Vessels bound for the Qua Iboe Terminal should proceed with extreme caution from the S.E. to the safe Anchorage Area. If uncertain of the vessel's position because of poor visibility stay S.E. and clear of the safe Anchorage Area until visibility has improved.

HEALTH: Pratique may be granted by radio (Lagos Radio).

The vessel should have a clean Bill of Health or an equivalent document from the last port of call. The vessel's Master and all members of the crew shall possess International Certificates of Health showing valid Cholera and Yellow Fever Vaccination Certificates.

MAX. SIZE:

Berth	*Length*	*Beam*	*Draft*
No. 2 (SPM1)	No restriction	No Limit	72 ft.
No. 3 (SPM2)	No restriction	No Limit	72 ft.

RADIO: Cable address: Mobil Oil Lagos. Telex: 21228.

Vessels proceeding to load at Qua Iboe must radio:

1. Mobil Oil, Lagos indicating their cargo requirements, last port of call and ETA 7 days prior to arrival. When their passage time is such as to not permit a 7 day ETA then the maximum possible advance notice must be given.
2. Mobil Oil, Lagos, confirming or amending the ETA given in (1) above at 72 hours and 24 hours prior to arrival.
3. The Nigerian Government Port Health Officer at Lagos at least 72 hours before arrival advising the following:
    - (a) Vessel's name and call sign.
    - (b) ETA Qua Iboe Terminal.
    - (c) Last port of call.
    - (d) Cargo requirements.
    - (e) Number of crew and whether healthy or not.
    - (f) Whether or not a doctor on board.
    - (g) Requesting Free Pratique.

If the request for Free Pratique is granted, the Port Health Officer will o advise by radio. If the request has not been radioed to the vessel, the ellow flag "Q" by day or red over white lights by night must be displayed n arrival at Qua Iboe.

In addition, as soon as possible prior to arrival vessels should stablish direct communication with the Terminal ("Qua Iboe Control") n VHF international calling Channel 16 (156.8 MHz).

Vessels not equipped with VHF or whose equipment is not fully nctional should advise Mobil Oil, Lagos, at the time of their ETA essages previously referred to.

The (BOP) Berth Operation Platform is fitted with a racon and ansmits the Morse signal "K" (– · –). All vessels equipped with 3 cm. dar will be able to pick this up on their radar screen at a distance of pproximately 17 miles – 20 miles. The B.O.P. is located in position: at. 04° 14′ 11″ N., Long. 08° 02′ 25″ E.

After direct contact has been established with the vessel, Qua Iboe ontrol will transmit preliminary requirements and berthing instructions.

HF: The primary system of communication with the terminal while in erth shall be through the Mooring Master by means of a portable VHF nit provided by the company.

UGS: None. Terminal launches assist in berthing.

ERTHING: The tanker loading facilities consist of 2 berths:

No. 2 Berth: A Single Point Mooring (SPM) Buoy located in a position at. 04° 13′ 05″ N., Long. 08° 02′ 45″ E., approximately 19.4 nautical iles 170° from the terminal tank farm. Depth of water at manifold 85 ft. lax. draft 72 ft.

No. 3 Berth: A Single Point Mooring (SPM) Buoy located in a position at. 4° 13′ 30″ N., Long. 08° 03′ E., approximately 18.8 nautical miles 65° from the terminal tank farm. Depth of water at the manifold 85 ft. lax. draft 72 ft.

All vessels must be equipped with adequate on-deck and overside ghting. A spotlight should be rigged on the bridge when berthing during e hours of darkness.

To assist in the vessel's turnaround, tankers should have all booms nd cargo gear rigged on the port side before the ship is boarded by the looring Master.

Berthing Requirements: Berth Nos. 2 and 3: All vessels proceeding to e SPM must secure their anchors with chain stoppers or compressors. loating hoses taken aboard on the port side.

The moorings have been designed in general accordance with the ecommendations of the SPM Forum. The mooring lines consist of ×18 in. braided nylon ropes each 160 ft. long with floats attached.

In order to heave the mooring lines aboard, the vessel should have eady on the forecastle a ship's rope or a rope messenger not less than .5 in. in diameter and a minimum length of 120 fathoms. The rope essenger is led through a fairlead, large enough to permit the entry of 3.25 in. diameter chafing chain, on port side or centre line (Panama ead) down to the water clear of the ship's bulbous bow. This rope must ave a good lashing attached to the eye.

The terminal line boat assisting in mooring, will proceed to the vessel, s soon as she is within her reach, to pick up the ship's rope and to ake the connection with the terminal provided 12 in. circ. polyropylene rope. The ship will then heave steadily on the rope until the hafing chain lies across the fairlead of the vessel.

Tenders by vessels to load crude oil cargo at Qua Iboe, will be ormally accepted and berths assigned to vessels in chronological order f arrival providing such vessels have current nomination for cargo valid t the time of tender, carry clean ballast, if any, and have cargo tanks in fit condition to receive cargo. Also they must be in all respects properly quipped and ready to moor. Should berthing be delayed on account of ad weather, vessels will keep their position in line.

OSES: Berth Nos. 2 and 3 SPMs are equipped with 2 floating hose trings. 29 hoses on the left hand and 28 hoses on the right hand facing e buoys. The over-the-rail hoses have a 12 in. ASA connection rovided with a butterfly-valve at the end.

anker on Light Draft: Weights of Hose strings for SPM: Indication of ose strings approximate weights of hose strings in *long tons* (including ttings and floats) with all hoses full of crude oil S.G. 0.850. Assumed otal lift 25 ft. above deck level.

	Inside Diameter of Hoses
Size of Tanker	12 in. – 16 in.×30 ft.
285,000 d.w.t.	6.8 tons
200,000 d.w.t.	6.0 tons
100,000 d.w.t.	5.2 tons
80,000 d.w.t.	5.0 tons
50,000 d.w.t.	4.5 tons

LOADING: All vessels must be adequately provided with bollards or cruciforms and suitable leads to facilitate the hanging off of the hoses during the lifting operation.

The Mooring Master will inspect the vessel's cargo tanks and will sign the Dry Certificate prior to the commencement of loading.

The Mooring Master may reject a vessel if it is not upon inspection properly equipped or if it is not suitably manned or if deemed to have dirty ballast or tanks unsuitable to receive cargo. Any vessel rejected because of being insufficiently equipped, will automatically nullify her (NOR) "Notice of Readiness" and will not be accepted until satisfactory evidence is produced, that the vessel's gear is in good working condition.

The ship's Master or a suitable Qualified Officer must be on duty on the bridge at all times while the ship is manoeuvring, mooring and unmooring or whenever requested by the Mooring Master.

All mooring, unmooring and hose connection and disconnection must be carried out by the ship's crew under the supervision of a suitable Qualified Officer acting on the advice of the Mooring Master.

Ship's loading manifolds should be prepared for 2×12 in. hose connections prior to arrival at the Qua Iboe Terminal. Sundry equipment should include tools to connect the hoses, nuts, bolts, gaskets and rope strops as none of these items are supplied by the Terminal. All 12 in. hoses have ASA flanges.

The Notice of Readiness will be signed by the Mooring Master on behalf of the Company. The time for giving the Notice of Readiness is the time of the vessel's arrival at the usual anchorage, or the time of boarding of the Mooring Master, whichever is the earlier. Notice of Readiness will not be accepted unless the vessel is ready to load.

Loading rates will vary according to conditions but can be expected to be up to 62,000 bbls.p.h. at the SPMs.

Information as to the anticipated loading rate should be obtained from the Mooring Master who will also advise the expected specific gravity and loading temperature.

The maximum possible notice in regard to slowing the loading rate for "topping off", etc. should be given to the Mooring Master.

Pressure Surges: Because of the long lengths and large diameters of the pipe-lines, ships' loading valves must not be closed against the flow of oil.

Vessels provided with mechanically or hydraulically operated valves whose closing time is less than 30 seconds must advise the Mooring Master accordingly. In such circumstances the loading rate may have to be reduced.

EARLY DEPARTURE PROCEDURE: The Early Departure Procedure will be used at the Qua Iboe Terminal. The procedure is as follows:

(All vessels are advised in advance of EDP)

1. Official declaration indicating Acceptance will be signed by Master on arrival.
2. Bill of Lading and Cargo Manifest will be prepared in advance except for cargo figures and be presented to Master for signature. Master will authorise MPN as Agent to sign all documents on his behalf.
3. Copies of the above documents will be retained on board as indicated by Documentation Instructions.
4. On completion of loading it is the Mooring Master's responsibility to ensure that all data is correctly recorded on the proper form, and that all EDP documents are filled out in full, before sailing, he then will sign all cargo documents on behalf of the company.

BALLAST: There are no facilities for the shore reception of ship's ballast. Vessels are accepted for loading on the express understanding that only clean ballast will be discharged into the sea.

Masters are required to sign oil pollution advice form letters on arrival. If a vessel is observed to be discharging dirty ballast, then it may be liable to prosecution or penalty and all further discharge will cease. The discharge of oil from bilges or other spaces is similarly strictly prohibited.

A vessel must have sufficient ballast for safe manoeuvring into the berth.

Vessels equipped with a separate system of ballast tanks will be allowed to discharge ballast and load simultaneously; providing approval is first obtained from the Company Operations Superintendent.

DENSITY: 1018.
FRESH WATER: Not available.
FUEL: Not available.
STORES: Not available.
MEDICAL: Only emergency medical facilities.
TIME: Nigerian local time is GMT plus 1 hour throughout the year.

CUSTOMS ALLOWANCES: Nigerian Government Customs Officials will board the vessel as soon as possible after arrival to give inward clearance and "Free Pratique" service. Nigerian Government Regulations are strictly enforced.

Cigarettes, cigars, tobacco, matches, spirits, wines, perfumes, arms, ammunition and possible other items have to be locked under Customs seal from time of arrival of ship in port until time of leaving territorial waters.

Each person is allowed 200 cigarettes per week of stay or equivalent amount of tobacco or cigars in lieu thereto. Each person is allowed 1 bottle of spirit and 1 case of beer. Special allowances are made for Masters under special circumstances. If the slop chest items and the bonded store items are not combined in one locker, the Customs Officer has to be informed.
REPATRIATION: Crew changes not possible.
SHORE LEAVE: Not possible.

GENERAL: *Agency:* The Company will handle documentation requirements for vessels loading at the Terminal. It does not carry out general vessel agency functions. Ship's mail and personal mail will be handled through the Mooring Master.

Courtesy Ensign: All vessels must exhibit the Nigerian National Ensign from the foremast or as appropriate while in the vicinity of the moorings.

"B" Flag: During loading, the International Code Flag "B" must be displayed from a topmast signal halyard during daylight hours. During hours of darkness a red all around light must be displayed where it can best be seen.

Charts: The following charts and nautical publications may be used to assist vessels bound for Qua Iboe.

British Admiralty Chart: No. 1860
British Admiralty Sailing Direction: Africa Pilot Vol. I
U.S. Naval Oceanographic Chart: No. 2352, 2353
U.S. Naval Oceanographic Sailing Directions No. 50-S. West Coast
Also appropriate tide and tidal stream tables.

Weather: Throughout the year a long low Southwesterly swell is prevalent. During the wet season, June to November, this swell together with a rough sea becomes very high, especially during heavy squalls.

Local winds have on rare occasions been recorded at 55 – 60 knots in the vicinity of the berths. Heavy rain, thunder and lightning may accompany these winds. They are unpredictable in direction and force and precautions are necessary to avoid difficulties.

Tidal currents prevailing in Easterly/Westerly direction of some 3 knots to 4 knots can be experienced. At times, the direction of these currents is variable.

SHIPMASTER'S REPORT: December 1984.

1 Pilot and 1 cargo surveyor live on board.

Immigration and Customs Officials board for usual formalities and store room inspection.

Lineboat tows astern most of time using ship's line.

Although EDP is supposedly used, vessel does not obtain clearance until ship's figures checked against shore figures, after which, Customs Clearance is received. This can involve a wait of several hours. Vessel has to complete consignees' papers after sailing. Supernumeraries may cause difficulties with Immigration, it is best to have everyone signed on.

For vessels waiting, a good anchorage can be obtained in position 03° 55′ N., 05° 46′ E., taking care to avoid the 120 fathom hole in position 03° 55.5′ N., 05° 42.9′ E. When hove up, the cable was very clean with only a little mud on the anchor.

AUTHORITY: Mobil Producing Nigeria – Qua Iboe Terminal, Marine Office, c/o Bookshop House, 50 Broad Street, Private Mail Bag 12054, Lagos Nigeria. *Tel:* 630216. *Telex:* 21228. *Cables:* Mobiloil Lagos. *Contact:* Captain P. F. Obersteller, Senior Mooring Master; Captain N. A. M. Austwick, Mooring Master, Qua Iboe Terminal. A. K. Koch, General Manager, Lagos. A. Agbim, Area Operations Manager, Lagos.

SAPELE: 05.55 N. 05.42 E. (See Plan Book)

PORT LIMITS: Escravos Fairway Buoy.

DOCUMENTS: See "Warri".

APPROACHES: Escravos fairway buoy Lat. 05° 30′ N., Long. 05° 04′ E. for entry to Escravos River. Present draft limit 6.4 m. Dredging of channel 100 m. from Escravos down to 10 m. expected to be completed by the end of 1984.

PILOTAGE: River Pilot takes vessel all the way to Koko Anchorage during daylight only. NPA Pilot takes vessels from Koko Anchorage to Sapele Port with a tug. Contact Pilot on VHF Channel 16.

The mouth of Escravos River (05° 35′ N., 05° 10′ E.) is the main entrance for the Delta Creek ports of Warri, Koko, Burutu and Sapele. Before entering any of the creeks, rivers or channels from Escravos to the above mentioned ports, vessels are required to broadcast their intentions and to keep constant VHF radio watch. Positions and movements must be exchanged with other vessels in the vicinity.

The Pilot Station at Escravos is located 0.5 miles North of the Escravos Beacon. The boarding position of the Pilot is 1.0 miles West of buoy No. 5 (close to the breakwater) when vessel is ready for proceeding inward. Vessel will always drop anchor at Escravos inner breakwater anchorage until further instruction is received from the Port Authority.

In addition; on arrival of vessels at Escravos the Pilot normally boards with one helmsman and remains onboard until vessel's departure.

ANCHORAGES: At Koko with max. LOA 170 m. and max. draft 6.4 m.

MAX. SIZE: Max. permissible length 170 m., draft 6.4 m., alongside berths 10.0 m.

HEALTH: See "Lagos".

RADIO: See "Lagos" for ETA advices to Agent. Port Authority Sapele to be contacted on VHF Channel 16.

TUGS: A tug is available as Koko to Sapele is a compulsory pilotage district.

BERTHING: Six berths (incl. one Ro-Ro) at new port. Mooring during daylight hours only.

MEDICAL: NPA Port Clinic with a doctor and a number of para-medical staff available Monday to Saturday.

FRESH WATER: Available in Sapele and supplied by water hydrant and by barge.

FUEL: Fuel oil available by barge from Warri. Diesel available locally. Both products in limited supply.

GANGWAY/DECK WATCHMAN: Compulsory during hours of darkness while in port or at Koko Anchorage.

CLOSING/OPENING HATCHES: Either by crew or stevedores.

CUSTOMS ALLOWANCES: See "Lagos".

IDENTIFICATION CARDS: See "Lagos".

REPAIRS: No facilities.

DRY DOCKS: None.

REPATRIATION: By road to Benin, or Warri, both connected with Lagos by regular air service.

TIME: GMT plus 1 hour.

POLICE/FIRE: Police/fire services are available in the port every day throughout the year.

TELEPHONES: External (P. & T.) and internal telephones are available in the port.

SHORE LEAVE: See "Lagos".

DEVELOPMENTS: New road connections to FCT (Abuja).

AUTHORITY: Nigerian Ports Authority, Sapele Port Complex, Private Mail Bag 4024, Sapele, Nigeria. *Cables:* Genports. *Contact:* The Port Manager.

AGENT: Alraine (Nigeria) Ltd., P.O.Box 4030, Sapele.
Tel. 177. Telex: Lagos 21244.
N.B. Correspondence should be addressed to Warri office.

WARRI: 05.30 N. 05.44 E. (See Plan Book

DOCUMENTS:

(a) Ship Entry Notice, SEN. (See "Lagos").

(b) 14 days prior arrival Agent requires:
- 12 Copies of Manifest.
- 5 Stowage Plans.
- 5 Hatch Lists.

(c) On arrival Master to present:
- 7 Ports of Call Lists.
- 8 Crew Lists.
- 5 Kroo Boy Lists.
- 2 Vaccination Lists.
- 5 Animal Lists.
- 4 Arms and Ammunition Lists.
- 1 Extra Manifest for Transhipment (if applicable).
- 1 Store List.
- 1 Crew Declaration List (crew belongings).
- 1 Maritime Declaration of Health.
- 1 Narcotics List.
- 2 Parcel Lists.
- 5 Passenger Lists.
- 1 Stowaway List.

All above to be prepared and if not applicable to be marked nil. Othe forms prepared by Agent and furnished on arrival.

(d) Warri Ro/Ro Terminal Company require:
- 12 Copies of Manifest.
- 4 Copies of Dangerous/Hazardous Cargo List.
- 4 Copies of Discharge Plan.
- 2 Copies General Arrangement Plan for each vessel.

PILOTAGE: Compulsory. Berthing in daylight only. Whenever ships ar bound for Warri Port, on arrival at Escravos fairway buoy the Maste should call Delta Pilot Union Escravos on VHF Channel 16. A local Rive Pilot will then be sent aboard before the breakwater to Pilot vessel t Bennet Island where the NPA Harbour Pilots normally come aboard t take vessel alongside.

The mouth of Escravos River (05° 35′ N., 05° 10′ E.) is the mai entrance for the Delta Creek ports of Warri, Koko, Burutu and Sapele Before entering any of the creeks, rivers or channels from Escravos t the above mentioned ports, vessels are required to broadcast the intentions and to keep constant VHF radio watch. Positions an movements must be exchanged with other vessels in the vicinity.

The Pilot Station at Escravos is located 0.5 miles North of th Escravos Beacon. The boarding position of the Pilot is 1.0 miles West o buoy No. 5 (close to the breakwater) when vessel is ready fo proceeding inward. Vessel will always drop anchor at Escravos inne breakwater anchorage until further instruction is received from the Po Authority.

In addition; on arrival of vessels at Escravos the Pilot normally board with one helmsman and remains onboard until vessel's departure.

ANCHORAGES: 1 anchorage known as "the pool", opposite Okorodud Town; max. draft for pool anchorage 14 ft. MLWS. Further anchorage a Forcados for vessels waiting to proceed to Burutu or Warri.

APPROACHES: Escravos Fairway Buoy Lat. 5° 30′ N., Long. 5° 04′ E for entry to Escravos River. Present draft limit 6.4 m. Dredging c channel from Escravos down to 10 m. expected to be completed by en of 1984.

MAX. SIZE: LOA 156 m., and due to Escravos bar max. draft 6.4 m.

HEALTH: International Pratique Regulations prevail. Pratique *no* necessary when coming from another port in Nigeria.

RADIO: See "Lagos" for ETA advices to Agent. Contact Port Authorit and Agent via VHF Channel 16.

TUGS: NPA's 2,100 h.p. tug with fire fighting equipment on board.

BERTHING:

Warri: The new Warri Port facilities now include:

11 hard quay berths of which 1 equipped with ramp for Ro/Ro.

10 buoy berths. Berthing daylight hours only. New Warri Port qua length 1,600 m. and depth alongside 11.50 m. 4 new sheds with tota 28,800 sq. m.

Warri Refinery: 2 oil loading jetties and 2 cargo jetties specially fo refined products. Berthing only during daylight hours. Refinery jettie total quay length 121.2 m. and depth alongside 7 m. Products availabl for lifting: AGO, HPFO, LPFO, DPK, PMS, LPGO Butane and Propane Fresh Water available.

Private Jetty: Delta Steel Corporation at Aladja can accommodat vessels with max. draft 6.4 m.

CRANES: NPA Warri has got one 250 metric tonne floating crane an portal cranes of 10 metric tonnes and 6 metric tonnes. Mobile crane also available.

UNBERTHING: Agent prepares outward Customs Clearance Certificat and delivers copy to Master. Agent books Pilot and advises Master time of boarding. Vessel to keep continuous watch on VHF Channel 16 fo instructions from Harbour Master and Agent.

STEVEDORES: See "Lagos".

TANKERS: See "Berthing".

MEDICAL: Facilities available.

DENSITY: Brackish.

FRESH WATER: Available; delivered by barge or via hydrant.

FUEL: See "Lagos".

FIRE PRECAUTIONS: NPA provides modern fire-fighting equipment

GANGWAY/DECK WATCHMAN: Compulsory in port and at anchorag Bennet Island during darkness.

OPENING/CLOSING HATCHES: By crew.

CUSTOMS ALLOWANCES: See "Lagos".

IDENTIFICATION CARDS: See "Lagos".

REPAIRS: Minor repairs only. *N.B.* Spare parts in short supply.

REPATRIATION: Regular airline services between Warri and Lagos

TIME: GMT plus 1 hour.

POLICE/AMBULANCE/FIRE: All these services available in port area

TELEPHONES: Not available – see Agent.

SHORE LEAVE: See "Lagos".

NOTES

Please also advise Shipping Guides Ltd.

SHIPMASTER'S REPORT: January 1983.

The vessel departed from Apapa, Nigeria, on the 13th January, 1983, drawing 8 ft. 6 in. forward and 13 ft. 1 in. aft, arriving at Escravos, the entrance of Warri River, on the morning of the 14th January, 1983.

The approach to the Fairway Buoy (Escravos Pilot Station) was impaired by very limited visibility (Harmattan) and the presence of numerous oil platforms and tanker buoys, their positions being unreliable. The coast near the breakwaters has extended by about 1.5 miles, whilst the position was impossible to fix through the lack of a clear picture on the radar screen (Raytheon – 10 cm.), which was in an optimum condition. The Satnav provided the best aid and navigating prudently the Fairway Buoy with "Escravos" painted on it, was sighted. To double check, course was set to Buoy No. 1, which verified our position.

The Agency at Apapa had advised us to engage a Pilot named Bob Gula, but on approach, when calling him over the VHF, numerous rival Pilots tried to contact us. A pilot launch, near us and carrying a placard "Delta Pilots" and flying "U.P." was contacted and a Pilot engaged, there being no sign or word from Bob Gula. The Pilot proved to be a very capable navigator. Fully informed about all aspects concerning the directions to Warri and keeping in close contact with Warri Harbour Control about shipping movements, most essential in these narrow waters.

The Delta Pilots Union is a branch of the Nigerian Union of Seamen and Transport Workers which has a roster of 35 Pilots. Their aim is, and they are succeeding, to provide an efficient and reliable service to vessels and to eliminate the so-called "Pirate" Pilots, who refuse to join the Union and who create chaos on the VHF.

The entrance to Warri River, near the breakwaters, which on departure disappeared from our radar screen at 1.5 miles, very low, is now marked by a pylon, Qk. Fl. (unlit) Nauto, and a pair of buoys, red and green, Nos. 5 and 6. The next ones are numbered 7 and 8, etc. B.A. Charts 3304 and 3305 were used, albeit positions and numbers were incorrect. Except for a few buoys all are unlit, hence only daylight pilotage. At some parts buoys are in pairs, at some parts only single buoys. Least depth sounded was 28 ft., reduced to mean level 24 ft. We were told that 24 ft. vessels are being berthed.

At Bennett Island a Harbour Pilot boards the vessel for berthing. One large and several small tugs are available.

The River Pilot remains on board for the return trip. Accommodation plus food has to be provided.

If anchoring is required, 3 anchorages are available in the vicinity of :

a. Excravos Lighthouse.
b. Warri Point.
c. Bennett Island.

AUTHORITY: Nigerian Ports Authority, Burutu.

AGENT: Intertrans (Nigeria) Ltd., 4 Khalil Road, POB 374, Warri. Tel. Warri 341. Telex: Via Lagos 21.244. Attention "Warri".

Norway

GENERAL: Also see "Appendix".

REGULATIONS FOR USING THE COMMON SEA-LINE APPROACH TO THE PORT AREAS IN GRENLAND:

Pursuant to the second paragraph of Section 18 of the Act of 24th June 1933 relating to the Harbour Administration, cf. Royal Decree of December 1977, the Ministry of Fisheries lays down the following provisional regulations:

1. Introductory Provisions (Also see "Appendix" – Articles No. 1 and 2).

1.1 *Aim:* The aim of these regulations is to ensure the safety of shipping and the local environment in the Grenland area.

1.2 *Definitions:* For the purpose of these regulations the following shall mean:

Vessel: any vessel of 50 g.r.t. and above, including vessels without displacement and seaplanes used or usable as a means of transport by water, as well as all vessels which tow or push other vessels or objects.

Dangerous Cargo: — cargo classified under the International Maritime Dangerous Goods Code when the quantity carried is 5 tons or more (IMDG Code).

— cargo classified under the IMO code for the Construction and Equipment of Ships Carrying Dangerous Chemicals in Bulk (Chemicals Code).

— cargo classified under the IMO code for the Construction and Equipment of Ships Carrying Liquefied Gases in Bulk (Gas Code).

— cargo carried in bulk with a flash point lower than 61°C.

1.3 *Application:* These regulations shall be applicable to vessels navigating the waters North of a line through the North point Molen — North point Sasteinen.

Vessels which have been carrying dangerous cargo, and which in ballast are not gas-free, shall be regarded as vessels with dangerous cargo. In addition, for the transportation of chlorine, special rules laid down by the Maritime Directorate shall apply.

2. Specific Provisions (Also see "Appendix" – Articles No. 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, and 15).

2.1 *Sea-Traffic Co-ordination Centre:* The function of the Sea-Traffic Centre will be to co-ordinate sea traffic within the area for which the Centre is responsible, and at the same time to contribute to ensuring that all traffic proceeds safely and effectively.

With the help of communication equipment and other technical aids, the Sea-Traffic Centre shall pass on information to the vessels, thus providing them with a surer basis for decisions regarding the vessels' passage and navigation.

The Sea-Traffic Centre may initiate such safety measures as are deemed necessary to ensure sea traffic the maximum degree of safety at all times.

The Sea-Traffic Centre may not interfere actively with the individual vessel's passage and navigation. The Shipmaster has sole responsibility for all aspects of the vessels passage, navigation and manoeuvring.

It is the responsibility of the Sea-Traffic Centre to see that these regulations, as well as instructions issued pursuant thereto, are observed.

Inward vessels or vessels already in the waters shall direct all reports and questions connected with the vessel's passage and navigation to the Sea-Traffic Centre over the VHF radio-telephone Channel 11, or by telephone or telex. Other radio messages concerning the vessel's business operations shall be transmitted via the nearest coastal radio station.

2.2 *Clearance:* Vessels intending to use these waters must obtain permission from the Sea-Traffic Centre before the vessel may enter the waters or leave the quay or anchorage.

Clearance must be obtained in good time and at least one hour before the vessel arrives at or shall enter the waters concerned. Vessels carrying dangerous cargo moreover required to give at least 24 hours' notice of their port of arrival.

Requests made to the Sea-Traffic Centre for clearance must contain the following information:

(a) Name of vessel.
(b) Call sign.
(c) Nationality.
(d) Length.
(e) Breadth.
(f) Draft.
(g) g.r.t.
(h) Port of destination.
(i) Type of cargo.
(j) Amount (in tons) of dangerous cargo.
(k) Expected time of arrival.
(l) Expected time of departure.
(m) Name of Ship's Master.

Furthermore, the vessels may be required to give the Sea-Traffic Centre such information as may be deemed necessary to ensure that all traffic proceeds safely and effectively.

In addition, attention is drawn to the reporting requirements in connection with notification of position and the ordering of Pilots.

2.3 *Notification of position and VHF radio-telephone listening duty:* Vessels intending to use the waters defined under item 1.3 must have maritime VHF radio-telephone equipment in proper working order.

Notification of Position: Vessels shall report their position when:

(a) passing the line through North point Molen — North point Sasteinen
(b) leaving quay or anchorage
(c) arriving at quay or anchorage.
(d) passing any other position determined by the authorities.

Such notification shall contain the following information, dependent on whether the vessel is inward or outward bound.

Inward:

— name of vessel
— time of passing the line through North point Molen — North point Sasteinen
— expected time of arrival at quay or anchorage
— time of arrival at quay or anchorage

Outward:

— name of vessel
— time of departure from quay or anchorage
— expected time of passing the line North point Molen — North point Sasteinen
— time of passing the abovementioned line.

Notification of position shall be addressed to the Sea-Traffic Centre (Trafikksentralen), Brevik, via VHF Channel 11.

If the notification of position cannot be delivered direct to the addressees VHF station, it must be sent without delay by other means, in port by ordinary telephone/telex or at sea via Tjome Radio.

Listening Duty: While underway in the area, all vessels passing through the stated waters must listen to VHF Channel 11.

This provision regarding listening duty also applies to pleasure craft equipped with a VHF radio-telephone.

2.4 *Use of Norwegian State Pilot:* Pursuant to Section 5 in the Pilot Service Act, on 21st June 1978; the Ministry of Fisheries laid down regulations regarding the compulsory use of Pilots for vessels passing through the waters North of a line between North point Molen — North point Sasteinen.

2.5 *Ordering of Pilots:* Vessels for which it is compulsory or which wish to use a Pilot must as far as possible comply with the 'Provisions for prior notification in regard to ordering of Pilots' included in the Pilotage Book (Losboken) and in Information to Seafarers No. 1. In addition, the following provisions apply to the ordering of Pilots for vessels which are arriving in or leaving ports in the waters described under item 1.3:

— Vessels approaching from the sea and desiring a Pilot shall as far as possible order a Pilot 24 hours in advance and thereafter confirm arrival at pilot station 2 hours in advance.

— Vessels lying in port and desiring a Pilot shall as far as possible order a Pilot 4 hours in advance and thereafter confirm departure from the port 2 hours in advance.

Orders for Pilots shall be addressed to the Sea-Traffic Centre in Brevik.

2.6 *Limited visibility:* If due to fog, rain, snow, air pollution or other factors, visibility is reduced to less than 1 nautical mile (1,852 m.) in these waters or parts thereof, the Sea-Traffic Centre shall stop or detain all vessels with dangerous cargo.

2.7 *Capacity Restrictions:* Below follow the maximum permitted length, breadth and draft for vessels intending to pass respectively Dypingen, Kalven and Brevikstrommen.

Dypingen	
Length	600 ft.
Breadth of vessel with dangerous cargo	80 ft.
Breadth of vessel otherwise	85 ft.
Draft	34 ft.
Kalven	
Length	600 ft.
Breadth	95 ft.
Draft	34 ft.
Brevikstrommen	
Length	600 ft.
Breadth of vessel with dangerous cargo	80 ft.
Breadth of vessel otherwise	85 ft.
Draft	32 ft 6 in.

2.8 *Traffic Separation:* Between Langesundbukta and Brevik, two separate marked fairways have been established. The Sea-Traffic Centre shall indicate, after consultation with the Shipmaster and Pilot, which fairway is to be used when the vessel obtains the clearance signal to proceed into these waters.

2.9 *Safety Zones:* Off the quays at Rafnes and Heroya, safety zones have been established as indicated in Chart Nos. 5, 473 and 474. Only vessels proceeding to or from quays and installations or on fully documented assignments within these zones may cross the boundaries of the zones.

2.10 *Anchorages:* Two anchorages have been set aside in these waters which must be used if it is necessary for the vessel to anchor.

Helgeroafjorden: South of a line through Fugloyskjaer light beacon —Amlirogna light beacon.

Frierflaket: East side of Frierfjorden, between Versvikbukta and the Hydro plant, but not within 300 m. of the quays.

Anchoring outside these two areas should be avoided.

Before anchoring, the vessel must have obtained clearance from the Sea-Traffic Centre.

For reasons of safety the Sea-Traffic Centre may order a vessel to proceed to the designated anchorage if the situation so requires.

2.11 *Use of Tugs:* The Sea-Traffic Centre may, after consultation with the Shipmaster and Pilot, require vessels with dangerous cargo to use tugs in manoeuvring in to and away from the quay and during passage in these waters, if this is deemed necessary for reasons of safety.

2.12 *Towlines:* During inward and outward passage, vessel with dangerous cargo shall have made fast and lowered to the water fore and aft a non-sparking non-flammable towline with eyelet.

2.13 *Pleasure-craft traffic:* Pleasure-craft and open boats shall as far as possible keep out of the way of larger vessels and commercial vessels. Insofar as feasible they shall keep close to shore within a maximum distance of 100 m.

Pleasure-craft — including open boats — shall not cross the shipping lane or fairway in such a way that this might disturb the passage of vessels which can only proceed with safety in such lanes or fairways. Attention is drawn to Sections 9 and 44 in the International Regulations for Preventing Collisions at Sea.

3.0 *Exemption:* In exceptional cases the Coast Directorate may grant exemption from these regulations. Requests for exemption must be submitted in writing to the Coast Directorate, preferably one month prior to the arrival of the vessel.

4.0 *Penal provisions:* Anyone wilfully or negligently violating these regulations shall be punished in accordance with Section 418 in the Penal Code, unless stricter penal provisions are applicable.

5.0 *Entry into force:* These regulations shall enter into force on 1st August 1978.

APPENDIX: Following has been translated by Shipping Guides Ltd.

Appendix to State Law No. 2/1984 comprises:

Laid down by the Fisheries Department on 1st March, 1984 in support of the law covering port matters of 24th June, 1933 Art. 18,2, and Royal Resolution of 16th December, 1977.

ART. 1.

Geographical and pertinent scope:

This regulation covers vessels which use marine lanes to the North of a straight line through the Northern point on Molen and the Northern point on Sasteinen.

The regulations cover vessels over 50 g.r.t., those without displacement and seaplanes, which are used or can be used as transport means on water, and vessels which tow or push another vessel or object.

Vessels carrying hazardous cargo are defined also as those transporting highly inflammable condensed gases with a flashpoint lower than 23° C, and which in ballast are not gas-free.

For the transport of chlorine in bulk the corresponding rules of the sea are additionally valid.

ART. 2.

Definitions:

In these regulations:

Vessel: = boat, barge, lighter and craft of any kind.

The Fisheries Department shall have the final decision as to what shall be understood to be a vessel.

G.r.t. = gross registered tonnage as is stated in the vessel's certificate. If the certificate shows two tonnages, the highest shall be used for the purpose of this regulation.

Dangerous Cargo:

(a) Materials which are packed are classified in accordance with the IMO General Index in the International Maritime Dangerous Goods Code – IMDG (Packed goods code) with subsequent amendments, the quantity of which is 10 tonnes or more. This makes exception for cargoes with a flashpoint between 23°C and 61°C, class 3.3, according to IMDG codes, provided that the cargoes are specified in the code without secondary hazards (poisonous, corrosive, etc.).

(b) Materials in accordance with Chapter VI in the IMO Code for the Construction and equipment of ships carrying gases in bulk (gas code) with subsequent amendments.

(c) Materials in accordance with Chapter XIX in the IMO Code for the Construction and equipment of ships carrying liquefied gases in bulk (gas code) with subsequent amendments.

(d) Materials which do not come under points (b) or (c), but which carried in bulk and have a flashpoint below 23°C.

The following substances are, nevertheless, not considered to be hazardous cargo:

Product designation	*Chemical formula*	*UN No.*	*UN Class*
Ammonium nitrate	NH_4NO_3	1942	5.1
Amm. nitrate fertiliser		2067	5.1
Amm. nitrate fertiliser		2068	5.1
Amm. nitrate fertiliser		2069	5.1
Amm. nitrate fertiliser		2070	5.1
Amm. nitrate fertiliser		2072	5.1
Amm. nitrate fertiliser		2071	9.0
Argon	Ar	1006/1951	2.0
Caustic potash	KOH	1814	8.0
Carbon dioxide	CO_2	1013/2187	2.0

Caustic soda	NaOH	1824	8.0
Spent caustic			8.0
Ammonium hydroxide	NH_4OH	2672	8.0
Nitrogen	N_2	1066/1977	2.0
Nitric acid	HNO_3	2031	8.0
Hydrochloric acid	HCl	1789	8.0
Sulphuric acid	H_2SO_4	1830	8.0
Titanium trichloride	$TiCl_3$	2441	4.2

The Coastal Directorate may determine that new materials shall be considered as hazardous cargoes. In arriving at their decision, emphasis will be placed on possible damage arising from such materials which might effect the environment in the event of leakage due to grounding, collision, or similar.

ART. 3.

Traffic Centres:

The Traffic Centres can set in motion safety measures shown to be necessary for providing maritime traffic with the highest degree of safety at any time.

The Traffic Centres cannot take an active part in the sailing and navigation of vessels. These regulations in no way detract from the responsibility of Masters for all circumstances connected with the forward movement, navigation and manoeuvring of their vessels.

Vessels requiring to enter channels or are already in such channels must address all reports and enquiries concerning their sailing and navigation to the Traffic Centre via VHF radio telephone Channel 11, or by telephone or telex. Other radio traffic concerning the operation of the vessel should be transmitted via the nearest coastal radio station.

ART. 4.

Clearance:

Vessels wishing to enter the channel must obtain permission in advance from the Traffic Centre. Permission must be sought in good time and at least 1 hour prior to the vessel arriving at the channel, or before she leaves the quay, anchorage or any other mooring location.

The Traffic Centre, when it sees fit, may, in the interest of safe traffic movement, withdraw permission or set special conditions for permission.

The Traffic Centre may in individual cases give a vessel permission to use only a specific part of the channel.

Vessels with hazardous cargo must, however, report their impending arrival in port 24 hours in advance.

When applying for permission, the following details must be given to the Traffic Centre.

(a) Name of Vessel.
(b) Call Sign.
(c) Nationality.
(d) Length.
(e) Beam.
(f) Draft.
(g) G.r.t.
(h) Port of Destination.
(i) Type of Cargo.
(j) Quantity in tonnes of Hazardous Cargo.
(k) ETA.
(l) Expected Sailing Time.
(m) Name of Master.

It is incumbent upon vessels to give the foregoing data, as Traffic Centres consider it essential for ensuring a safe and effective control of traffic.

ART. 5.

Position Reporting and Listening-out:

Vessels requiring to enter channels must be equipped with fully operative maritime VHF radio-telephone.

Where the VHF radio installation is operated from the vessel's own mains, it must be possible to disconnect it rapidly and changeover to battery operation, or the vessel must be equipped with transportable VHF with battery charger. The transportable VHF must have adequate range of function.

All communications with the Traffic Centre on VHF Channels 16, 14, 13, 12 and 11 are automatically recorded on tape.

Vessels must send position reports when:

(a) Passing the channel limit to the South.
(b) Leaving the quay, anchorage or mooring point.
(c) Arrival at the quay, anchorage or mooring point.
(d) Passing of other positions which may be determined by the Traffic Centre.
(e) In the event of accident.
(f) At the request of the Traffic Centre.

Reports must contain the following details:–

On entry

- vessel's name
- time for passing line between the Northernmost point on Molen and the Northernmost point on Sasteinen
- ETA at the quay, anchorage or mooring point.

On sailing

- vessel's name
- departure time from quay, anchorage or mooring point
- estimated time for passing the line through the Northernmost point on Molen and the Northernmost point on Sasteinen.
- actual time for passing this line

On sailing inside the channel

- vessel's name
- departure time from quay, anchorage or mooring point
- ETA at quay, anchorage or mooring point
- actual time of arrival at quay, anchorage or mooring point.

Position reports must be addressed to the Traffic Centre, Brevik, on VHF Channel 11. Where the position report cannot be delivered directly to the addressed VHF station, it must without delay be sent in another manner, in port by telephone or telex, and at sea via Tjome Radio.

Vessels under way in the channel, must listen out continuously on VHF Channel 16 and 11. This requirement applies to all vessels equipped with VHF radio telephone, irrespective of the vessel's movement.

ART. 6.

Limited Visibility:

When visibility is less than 1 nautical mile (1852 m.) in the channel or a part of it, the Traffic Centre will hold back all vessels with hazardous cargo.

ART. 7.

Capacity Restrictions:

When passing Dybingen, Kalven and Brevikstrommen, no vessel must have greater length, beam and draft than the following limits:

Dybingen		
	Length	600 ft.
	Beam of vessel with hazardous cargo	80 ft.
	Beam of other ships	85 ft.
	Draft	34 ft.
Kalven		
	Length	900 ft.
	Beam	150 ft.
	Draft	44 ft.

Brevikstrommen

Length	650 ft.
Beam of vessel with hazardous cargo	90 ft.
Beam of other ships	100 ft.
Draft	32 ft. 6 in.

The Traffic Centre can in special circumstances permit vessel without hazardous cargo to pass Brevikstommen in daylight with draft up to 34 ft.

ART. 8.
Traffic Separation:

The Traffic Centre will indicate which marked course shall be used between Langesundbukta and Brevik when the vessel receives permission to enter the channel.

ART. 9.
Anchorages:

Vessel may only anchor when this is necessary. Before a vessel proceeds to anchor, she must obtain permission from the Traffic Centre. The Traffic Centre can, on grounds of safety, decree that the vessel must go to a specific anchorage. Ships may only anchor at any time in the following areas:

Helgeroa Fjord
South of a line through Fugloskjaer Lighthouse and Amlivogna Lighthouse.
Eidanger Fjord
North of a line running East – West through the Southernmost point of Orviktangen.
Frierflaket
East side of Frier Fjord, between Versvik-bay and Hydros, but not nearer to the quay than 300 m.

The Traffic Centre can, after obtaining a decision from the Coast Directorate, indicate other anchorages.

Nevertheless, a vessel can anchor outside these areas when it is necessary to obviate danger. The Traffic Centre must be informed accordingly.

The Traffic Centre may refrain from giving a vessel permission to leave its anchorage, or may instruct an already cleared vessel to vacate the anchorage.

ART. 10.
Use of Tugs:

Vessels over 500 g.r.t. carrying liquid condensed gases, and those over 2,000 g.r.t. carrying bulk hazardous cargo, as defined in these regulations, must use a tug during entry and departure and manoeuvring to and from the quay or anchorage. The Traffic Centre can compel vessels, which are below the aforementioned tonnage limits, and which carry gases and other hazardous cargo in bulk, to use tugs. The towing connection, on entry, must be established immediately after the Pilot comes on board, provided that wind and sea conditions permit this.

On departure, the tug must be attached to the vessel before she leaves the quay or anchorage until she has passed Dypingen or Helgeroa Fjord. The Traffic Centre can on the grounds of safety, require more than one tug to be used.

Vessels without hazardous cargo, but which exceed one or more of the following measurements:

Length	600 ft.
Beam	86 ft.
Draft	32 ft. 6 in.

must have a tug attached on passing Brevikstrommen between Gjermesholmen and Saltbua Light.

Tugs used must have the capacity to restrain the movement of vessels under control at any time. Also, they must have adequate fire fighting equipment.

ART. 11.
Towlines:

During entry and departure, vessels with hazardous cargo must have a towing cable attached and lower than water level at the stern and at the bow, which is spark-free and fire resistant, and fitted with eyes.

ART. 12.
Pleasure Craft Traffic:

Pleasure craft and open boats must as far as possible leave paths free for large vessels and those of a work and utility nature. They must, wherever possible, sail along the coast within a distance of 100 m.

Pleasure vessels, and open boats, must not cross the path or channel being followed by a vessel which can only follow the said path or channel. Also Maritime Navigation Regulations 44 and 9 refer.

ART. 13.
Exemptions:

In any special situation, the Coastal Directorate may give dispensation from the observance of these stipulations. Requests for dispensation must be submitted in writing to the Coastal Directorate, where possible, 1 month prior to the arrival of the vessel.

Traffic Centres can in very special circumstances give dispensation from the determinations and permissions in Art. 4.

ART. 14.
Determination of Penalties:

Any contravention or non-observation of these Regulations is subject to the provisions of law 418, unless more stringent penalties are seen fit to be applied.

ART. 15.
Entry into Force:

These Regulations enter into force on 1st April, 1984. From that date onwards, existing regulations for the use of the common channels for the port district in the coastal area issued by the Fishery Department on 21st June, 1978 are cancelled.

(Coastal Directorate/Pilotage Department, Oslo, 20th March, 1984).

AGOTNES: 60.25 N. 05.01 E. (See Plan Book

DOCUMENTS:

1 General Declaration.
2 Cargo Declarations.
1 Stores List.
1 Health Declaration.
1 Personnel Effects.
2 Manifests.

PILOTAGE: Usual entrances to port at Korsfjord and Fedje.

Provisions for Advance Reports in connection with the ordering o Pilots. Issued by the Director of Pilotage.

1. Vessels approaching from the sea and desiring a Pilot should orde the Pilot at 24 hours notice insofar as possible and confirm arrival at pilo station at 2 hours notice.

The advance order can be sent in the following manner:

a. From ships at sea over radio direct to the sea pilot watc (calling frequency 2182 kHz from 2 minutes past unti 10 minutes past each full hour, or over VHF-radio telephone calling frequency 156.80 MHz, Channel 16).
b. From ships at sea over coastal radio station to pilot station o pilot office.
c. From broker or shipowner over telephone to sea pilot station o to any pilot office which will immediately convey the report t the sea pilot station.

2. Vessels lying in port and desiring Pilot will order the Pilot from the nearest pilot office during its office hours and if possible at 4 hours notice.

3. Vessels approaching from the sea as well as vessels lying in por shall, when making an advance order state the name and destination o the vessel and whether 1 or 2 Pilots are desired.

4. The Pilots will on the whole be despatched to the ships in accordance with the advance orders, and vessels are therefore requested to comply with the foregoing rules as far as possible in order to avoid having to wait for Pilot.

5. The international provisions for summoning Pilots by signal flags o blue lights, etc., are still in force, but should in future be used as a supplement to the radio communications or as the sole communicatio in emergencies.

ANCHORAGE: About 1,600 ft. North of CCB quay, depths 29 m. - 74 m.

RESTRICTIONS: No special restrictions upon entry to the port.

MAX. SIZE: Water depths up to 60 ft. at quayside.

HEALTH: No Certificates required. In event of any disease or fever, contact Agents.

RADIO: All messages to Agents via Bergen Radio or Rogaland Radio.

VHF: Bergen Radio on Channel 16 or direct on Channel 10 (24 hou service).

TUGS: Available upon request. Vessel's lines usually used. No extra charge for tug's line.

BERTHING:

West side, quay of 100 m. long. Depth of water 60 ft.
East side, quay of 105 m. long, Depth of water 14 m.
North West side, quay of 120 m. long. Depth of water 7.2 m.
South side, 2 berths, each 60 m. long. Depth of water 10 m.

CRANES: 1 Mobile crane 280 tons lifting capacity. 6 Mobile cranes 50 tons lifting capacity. 4 Mobile cranes 35 tons lifting capacity.

BULK CARGO FACILITIES: For drilling mud and cement only.

SPECIALISED CARGO HANDLING FACILITIES: Loading/unloading carried out by mobile cranes and trucks.

BRIDGES: Bridge between Knarrevik and Drotningsvik. Height at mean level 50 m.

STEVEDORES: Provided by Coast Centre Base.

MEDICAL: 4 hospitals available (Bergen). No advance notice except serious illness.

TANKERS: Bunker line 6 in. No slop facilities.

DENSITY: About 1024.

FRESH WATER: Can be supplied alongside the quay, rate 70 t.p.h.

FUEL: New tank of 5,000 cu.m. 3 ships may take bunkers at the same time at a rate of 120 cu.m./hr.

No advance notice required.

CONSULS: (in Bergen). Belgian, Brazilian, British, Danish, Finnish, French, Greek, Islandic, Netherlands, Panama, Peruvian, Portuguese, Spanish, Swiss, Swedish, Turkish, German, Uruguay, Austrian.

REPAIRS: All repairs possible.

DRY DOCKS: Available in Bergen. 3 Dry docks 365 ft. long with 12.5 ft. – 21 ft. depth on blocks.

1 floating dock for vessels up to 10,000 g.r.t. and 2 smaller floating docks. Largest vessel 51,839 g.r.t. Draft 34 ft. 4 in.

Drafts up to 35 ft. can be accommodated.

SURVEYORS: Lloyd's, A.B.S. and Norske Veritas.

GANGWAY/DECK WATCHMAN: Not necessary.

OPENING/CLOSING HATCHES: Normally carried out by crew.

CUSTOMS ALLOWANCES: 0.75 litres of spirit and 200 cigarettes for each member of the crew.

REPATRIATION: All facilities available for crew changes.

AIRPORT: 35 km. from Bergen Airport served by regular airlines.

TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.

HOLIDAYS: New Years Day (January 1st); Maundy Thursday; Good Friday; Easter Monday; May 1st; May 17th; Ascension Day; Whit Monday.

Cargo work can be arranged with special agreement.

POLICE/AMBULANCE/FIRE: Bergen 002; Bergen 003; Bergen 001 respectively.

EMERGENCY CO-ORDINATION CENTRE: Tel: Bergen 002.

TELEPHONES: No arrangements for connection on board ships. Telephone box on quayside.

SERVICES: Compass adjuster, Radio/Radar service. Also calibration of the Direction Finder, Ships laundries.

BANKS: Bergen Bank, 5363 Agotnes.

STORING: See "Prelims", page viii.
1. Vessel can be stored by barge or truck.
2. No special regulations regarding storing.
3. Trucks can proceed alongside at the berth.
4. Forklift trucks are available.
5. No special regulations regarding customs.
6. Local riggers can be employed on request.

SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.
IDENTIFICATION CARDS: Not required.
REGULATIONS: No particular or unusual regulations.
DELAYS: No particular reason for delays.
DEVELOPMENT: A new Ro/Ro berth is planned at Dock No. 1.
AUTHORITY: Coast Center Base A.S. & Co., P.O.Box 55-22B, 5363 Agotnes. *Tel:* (05) 33 40 00. *Telex:* 42 835 ccb n. *Cables:* Ceeceebee. *Contact:* Knut Aas, Managing Director.

ALESUND: 62.27 N. 06.09 E. (See Plan Book)

DOCUMENTS:
1 Crew List.
1 Passenger List.
1 Customs Documents.
1 Health Documents.
3 Manifests.
3 Bills of Lading.
1 Ship's Papers.
1 Stores Lists (provisions).

PILOTAGE: From open sea, Pilot is taken on board at Rundo pilot station. Watch 24 hours a day. To be called 3-4 hours before ETA by VHF 16, or radio.
ANCHORAGE: On the North side of the town in Valderhaugfjorden in depths of 20 m. – 60 m.; bottom, sand and mud.
On the South side of the town in Aspovagen in depths of 20 m. – 40 m., bottom mud.
RADIO: Alesund Radio 2182 kc/s and VHF Channel 16. Harbour Office (VHF Channels 16 and 12) is manned 24 hours. Tel: 21425.
TUGS: Meet vessel normally before entering the harbour, or by order.
BERTHING: *Storneskaia:* East side, length 85 m., depth 6 m. – 14 m. On this side Ro/Ro berth available ramp width 22 ft. South side, length 153 m., depth 10 m. – 14 m. West side length 60 m. depth 5.0 m. Warehouse capacity 1,600 sq.m.
Prestekaia: South side, length 220 m., depth 13 m. – 16 m. West side, length 40 m., depth 5 m. – 13 m. North side length 41 m. Depth 5 m. – 13 m. Warehouse capacity 4,100 sq. m.
Skutvika: Special quay for fishing vessels, length 330 m., depth 4 – 6 m. Only mooring on N.E. side. Quay, length 80 m., depth 4 – 7 m.
Sjogata: Mooring quay, length 180 m., depth 8 m. At Northern Harbour there is one commercial quay.
Skansekaia: North side, length 195 m., depth 10 m. – 13 m. West Side, length 60 m. Depth 4 m. – 8 m. South side, length 130 m., depth 4 m. – 5 m. This quay forms protection for a small inner harbour with several smaller quays.
Flatholmen: Length 50 m. Depth 7.0 m. Dirty ballast facilities available.
Brunholmkaia: Length 100 m., depth 4.0 m.
Skansegata: Length 200 m., depth 6.0 m.
Spjelkavik Kai: Length 50 m., depth 7.0 m.
STEVEDORES: Obtained by Agent who requires ETA 12 hours before ships arrival.
CRANES: Mobile crane to lift 18 tons available. Floating crane to lift max. 100 tons available.
CONTAINERS: Depot for *C.T.I.* containers.
FRESH WATER: Available. Tel: 071-21424.
FUEL: Bunkering facilities from all major oil companies. Loading by barge or pipeline at berth.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: This work is normally carried out by crew.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes. Wine/Spirit: 1 bottle of spirits.
IDENTIFICATION CARDS: Not required.
REPAIRS: Available.
DRY DOCKS: 2 dry docks, lifting capacities 2,750 tons and 8,000 tons.
SURVEYORS: Det Norske Veritas. Tel: 071-25290.
AIRPORT: Alesund airport, Vigra. Passenger flights (3 times a day) to and from Oslo. Trondheim, Bergen.
TIME: GMT plus 1 hour, GMT plus 2 hours in Summer.
HOLIDAYS: 1st May; 17th May.
POLICE/AMBULANCE/FIRE: Police 21321; Ambulance 25560; Fire 22000.
TELEPHONES: No arrangements for placing telephones on board.
DEVELOPMENTS: The quays at Spjelkavik to be extended to 200 m.
AUTHORITY: Alesund Havnevesen, Skansekaia, 6000 Aalesund, Norway. *Tel:* 071-21832 or 21425. *Contact:* K.M. Bardsen, Harbour Master. Tel: 071 21-586 (Private).

ALVIK: 60.26 N. 06.24 E.

Alvik located in inner part of Hardangerfiord. Ferrosilisium works. Vessels from abroad may call Haugesund for inward Customs' clearance.
DOCUMENTS: See "Bergen".
PILOTAGE: Compulsory. Belonging to Bergen Customs' district.
BERTHING: Quay No.1, length 80 m. 2 cranes, 7.5 and 9.5 tons. Quay No. 2, length 90 m. 1 crane 7.5 tons.
AUTHORITY: Alvik Port Authority, A/S Bjolvefossen, 5614 Aalvik, Norway. *Tel:* 055 57200. *Telex:* 42146. *Cables:* Ferro Aalvik. *Contact:* Helge Amdahl, General Manager.

ARDALSTANGEN: 61.14 N. 07.42 E. (See Plan Book)

LOCATION: Ardalstangen Aluminium works located in innermost part of Sognefiord. Lat. 61° 14′ 03″ N., Long. 7° 42′ 28″ E.
DOCUMENTS:
Receivers: Bills of Lading.
Manifests.
Crew List.
Customs: Bills of Lading.
Manifests.
Health Documents.
Ship's Certificates.
Ship's Papers.
Ship's Stores Declaration.
General Declaration.
3 Crew Lists.
Crews Personal Effects Declaration.
Inward and Outward Clearance.

PILOTAGE: Compulsory. Pilots belong to Bergen Customs District.
ANCHORAGE: Depth 500 ft.
RESTRICTIONS: No berthing after 2100 hrs. or before 0600 hrs.
VHF: Channel 16.
TUGS: None available. Local lineboat available if required.
BERTHING: One quay, length 600 ft., depth alongside 31 ft. 06 in. 1×14 ton crane, 1×5 ton crane and 1×25 ton crane.
One quay, length 300 ft., depth alongside 36 ft. 1×30 ton crane.
The berths are ice free.
STEVEDORES: No work Saturdays, Sundays and holidays.
DENSITY: 1026.
FRESH WATER: Available, cost 3.50 NK per ton.
OPENING/CLOSING HATCHES: By crew.
CARGO GEAR: Loading/discharging by shore gear.
TELEPHONES: Available if required.
AIRPORT: 1 hour 20 minutes by ferry to airport at Sogndal.
AUTHORITY: Ardal og Sunndal Verk A/S, P.O. Box 175, 5875 Ardalstangen, Norway. *Tel:* 056-61164. *Telex:* 42610 ARAL N. *Cables:* Ardalverk, Ardalstangen. *Contact:* K. Ulvestad, Harbour Master (056-61011).

ARENDAL: 58.28 N. 08.46 E. (See Plan Book)

DOCUMENTS: See "Bergen".
PILOTAGE: The Pilot boat *Arendal* is stationed at Arendal. Contact may be made on VHF/RT or telephone 21347–23668 or out of office hours via Kristiandsand Radio or Tjome Radio.
ANCHORAGE: Safe anchorage ground is readily available and there are numerous mooring places for vessels not docking alongside the quays.
MAX. SIZE:

	Depth (ft.)	*Length (m.)*
Nye Tollbodkaien	33	230
Batterrikaien	33	110
Hotellbryggen	30	77

Fryselagerkaien	22	76
Jaktekaien	20	50
Gamle Tollbodkaien	20	45
Kallevigs Brygge	20	43
Langbryggen	15	120
Ferjekaien	26	30

No tide even in exceptional weather conditions, increase in water level never exceeds 3 ft.
TUGS: 2 small tugs. 500 h.p. and 300 h.p.
RADAR/VHF: Radar at Pilot station. VHF see "Pilotage".
CRANES: 1 × 3 ton crane and 1 × 20 ton mobile crane at Nye Tollbodkaien. At Vindholmen, 1 crane 100 tons capacity and 1 crane 60 tons capacity.
MEDICAL: Advance notice required for medical attention.
FRESH WATER: Available all quays.
FUEL: Advance notice required.
GANGWAY/DECK WATCHMEN: Recommended.
OPENING/CLOSING HATCHES: Crew or stevedores.
CERTIFICATES: Normal International Certificates required.
CUSTOMS ALLOWANCES: 200 cigarettes, 1 bottle spirits.
IDENTIFICATION CARDS: Not required.
CONSULS: Sweden, Denmark, Finland.
REPAIRS: Port has well-equipped workshop to carry out engine repairs as well as hull work above water line.
AIRPORT: Kjevik 60 km.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Police 22030; Fire Station 22255.
TELEPHONES: Can be placed aboard.
AUTHORITY: Arendal Havnekontor, P.O.Box 33, 4801 Arendal, Norway. *Tel*: (041) 21071, 23668. *Contact*: Harbour Master.

BATSFJORD: 70.38 N. 29.44 E. (See Plan Book)

PORT LIMITS: Straight line from the light at 'Skrovneset' to the 'Prestelv' defines the port limits.

DOCUMENTS:
3 copies Maritime Declaration of Health.
4 copies Cargo Declaration.
3 copies Ship's Store Declaration.
3 copies Crew Effects Declaration.
3 copies Crew List.
2 copies General Declaration.
Clearance from last port.
3 copies Passenger List.

PILOTAGE: Not necessary. Harbour pilotage is optional, but if required, 24 hours' notice should be given.

ETAs to be reported 24 hours and 3 hours prior to arrival. Information given should include:
a) Name/call sign of vessel.
b) Nationality.
c) Length, draft and g.r.t.

Pilot boarding ground 2 miles off entrance.

ANCHORAGES: Unlimited anchoring available at the Outer Harbour. Very good anchor conditions for fishing vessels in bad weather.

RESTRICTIONS: No restrictions other than maximum draft.

HEALTH: Cable Agent with following information: Ports of call during voyage, nature of cargo, number of crew and passengers, port of destination and Agent, condition of health of all on board with details of any sickness.

RADIO: Vardoe Radio, VHF and MF.

VHF: Pilot and pilot boat use Channels 16 and 12. All communications with Harbour Authorities should be conducted on Channel 12.

TUGS: One tug available. Will be ordered by Pilot on request.

BERTHING: Pilotage optional. Berths are arranged by Harbour Master. Linesmen and boatmen are arranged through Harbour Office.

Berth Number	*Wharf Length* (m.)	*Depth at LW* (m.)

15	90	6	

CRANES: Mobile cranes available on request. Stationary cranes on most private piers.

STEVEDORES: Arranged through Harbour Authorities.

MEDICAL: No advance notice required except in case of serious illness which is to be included in arrival cable. Doctor and dental facilities available.

TANKERS: Discharge lines: 6 in. Slop removal possible.

DENSITY: 1025.

FRESH WATER: Available at all berths.

FUEL: Fuel delivered by pipe-line at 4 berths, and by tank trucks at all other berths. Major grades of bunker fuel and diesel as well as marine lubricants can be obtained through suppliers.

REPAIRS: Most deck and engine repairs can be carried out.

DRY DOCKS: To be established in 1984. Size: 70 m. × 25 m.

SURVEYORS: Norwegian Ship Control Office.

GANGWAY/DECK WATCHMEN: Usually carried out by ship's crew, but watchmen available. Ship's gangway used, but shore gangway available.

HATCHES: Opening/closing by ship's crew.

CUSTOMS ALLOWANCES: Check with Agent.

REPATRIATION: Crew changes and repatriation can be carried out without difficulty.

AIRPORT: Distance 5 km. Served by 3 flights daily.

TIME: GMT plus 1 hour. Summertime kept.

HOLIDAYS: New Year's Day, "Skjaertorsdag" and Good Friday, Easter Monday, 1st May, 17th May, Whit Monday, Christmas (2 days).

POLICE/AMBULANCE/FIRE: Police: 83131. Ambulance: 83116. Fire: 51122. Area Code: 085.

EMERGENCY CO-ORDINATION CENTRE: Bodo Rescue Centre: Tel: 081-25000. Rescue Vessel Station in Batsfjord: 83498 or VHF Channel 16.

TELEPHONES: No arrangements for telephone on board.

SHORE LEAVE: No restrictions.

SHIP SUPPLY SERVICE: The port renders full service for transport of passengers and goods.

For transport of sick and injured people from ships, the port is equipped with the rescue vessel m.v. "Sjofareren" all the year round.

Telephone numbers for these services are as follows:

Passenger/goods transportation: 085-83385 or 085-83607 also VHF Channels 16 and 12.

Sickness/injuries: 085-83498 also VHF Channel 16.

For helicopter services, this will be covered by the Rescue Station in Bodo, Tel: 081-21267.

Tug services will be carried out by the "Sjofareren" – see above.

SERVICES: Compass adjusting, radar repairs, R/T repairs, gy compass repairs, all types of electronic equipment repaired.

Divers available for surveys and underwater repairs. Several sh chandlers, ice delivery, freezing plant, Forwarding Agent, weekly arriv of UK-Continent liner.

BANKS: A/S Fiskernes Bank, P.O. Box 56, 9991 Batsfjor
Tel: 085-83451. Telex: 64378.

Ost-Finnmark Sparebank, P.O. Box 310, 9991 Batsfjor
Tel: 085-83369.

AUTHORITY: Port of Batsfjord, P.O. Box 68, N-9991 Batsfjor

REGULATIONS: *Regulations requiring the use of Pilot Services in the Grenland Area.*

In pursuance of Section 5 of Act No. 2 of 9th April 1948 relating to the Pilot Service, cf. Royal Decrees of 29th April 1977, the Ministry of Fisheries lays down the following regulations:

Section 1

State Pilots shall be used by vessels of 100 g.r.t. and above navigating the waters North of a line through the North point Molen – North point Sasteinen.

Section 2

The Coast Directorate or anyone it so empowers may grant exemption from the provisions in Section 1 in respect of vessels of under 500 g.r.t. which are not carrying dangerous cargo, provided that the Shipmaster is able to satisfy the authorities that he has obtained, through regular calls at ports in the area, a comprehensive knowledge of these waters and is conversant with the rules and regulations currently applicable with respect to passage and navigation in these waters. Requests for exemption shall be addressed to the Coast Directorate and forwarded via the Pilot Master in Porsgrunn.

Exemption thus granted may be revoked at any time.

Section 3

Anyone wilfully or negligently violating these regulations shall be punished in accordance with Section 418 in the Penal Code, unless stricter penal provisions are applicable.

Section 4

These regulations do not entail any changes to the rules concerning the use of State pilots for foreign non-military vessels of 50 g.r.t. and above laid down by Royal Decree of 9th February 1968 concerning provisions on prohibited zones in Norwegian territorial waters.

Section 5

These regulations shall enter into force on 1st September 1978.

Also see "General" before first port.

SHORE LEAVE: Crew members allowed ashore.

AUTHORITY: Porsgrunn Havnevesen, P.O.Box 20, 3951, Brevik, Norway. *Tel:* 035-71080/71088. *Cables:* Porsgrunn Havnevesen. *Contact:* Hans Roe Edvardsen, Harbour Master.

Roll-on/Roll-off Kattegatkaia	10	—	Cars, Trailers, Containers, Tankers

*Special arrangement for stern and bow ramps

†Size of vessels decided by max. draft 30 ft.

Container and Ro-Ro Facilities: Three Ro-Ro quays for containers, vehicles and trailers.

1. Holmen South Ro-Ro:
   Max. Depth 25 ft.
   Length (Approx.) 300 ft.
   Beam 33 ft.
   Height of working ramp 3 ft.
   Mooring boat advisable when berthing.
2. Holmen East Ro-Ro:
   Max. Depth 18 ft.
   Length (Approx.) 350 ft.
   (i) Inside ramp: Beam 30 ft., Height 5 ft.
   (ii) Outside ramp: Beam 30 ft., Height 1 ft. 6 in.
3. Risgarden Ro-Ro:
   Max. Depth 30 ft.
   Beam 105 ft.

Length of vessels berthing is dependable of max. draft.
Height of working ramp 6 ft.

Fruit Storage 21,600 sq. ft. Air conditioned fruit-storage.
Also see "Tankers".

CRANES: 2×50 ton mobile cranes (50 ton at 35 m. – 10 ton at 40 m.) when combined are able to lift 90 tons.

2×23 ton mobile cranes. One each situated at Holmen South Quay and Langbrygga Quay.

STEVEDORES: Labour must be ordered latest 1530 hrs. day before arrival. Saturdays before 1230 hrs. Working hours: Monday to Friday from 0700 to 1600 hrs. with breaks from 0900 to 0930 hrs. and 1300 to 1330 hrs.

Saturday from 0700 to 1230 hrs. with break from 0900 to 0930 hrs.
Overtime can be arranged through Agent.

MEDICAL: In case of emergency, notice regarding required medical treatment must be given as soon as possible. First class hospital facilities available. No special inoculation or fever certificates necessary, except those according to international health regulations.

TANKERS:

Kattegatkaia: See "Berthing". Fresh water available.

Pipe-line connections: Gas oil 8 in.; light fuel oils 9 in.; asphalt 8 in.

Holmen South Berth

Concrete quay, max. draft 29.53 ft. (9 m.). Fresh water available.

Pipe-line connections: Gas oil 8 in.; light fuel oils 8 in.; paraffin 6 in. heavy fuel oil 4 in.

B.P. Berth, Solumstrand

9 m. wide quay at end of pier, max. draft 16.4 ft. (5 m.).,

Pipe-line connections: Light gas oil 6 in.; petroleum 4 in.; white spirit 3 in.; propane 2 in.

Bakketomta Berth, Lierstranda

Concrete quay, 23 m. long, max. draft 16 ft. (4.88 m.).

Pipe-line connections: Super petroleum 8 in.; petroleum 8 in.; light fuel oil 8 in.; gas oil-paraffin 6 in.; white spirit 4 in.

Esso Berth, Solumstrand

Concrete quay, 23 m. long, max. draft 16 ft. (4.88 m.).

Pipeline connections: Light fuel oil 6 in. and 4 in.; gas oil 6 in.; petroleum 6 in. and 4 in.

Folakroken Quay: New Berth: Gullaug explosives factory. Situated 6 nautical miles North of Svelvik Narrows on East side of Dramsfjorden

Length	114 ft. (35 m.)
Depth alongside	19 ft. (6 m.)

DEPTHS: Chart depths vary only slightly owing tidal fluctuations. Exceptional conditions, such as snow melting in Spring, heavy rainfall and prevailing strong Southerly or Northerly winds will cause stronger currents and a variation in water levels.

FRESH WATER: Delivery by hose, available anywhere.

FUEL: Tronstad berth: gas oil 200 sec. Holmen S.: fuel 2000 sec., marine diesel 200 sec. Bakketomta Lierstrand: Bunkering by tanklorry possible if necessary. Esso Solumstrand: gas oil visc. 1,2 at 20 degrees cel.; diesel visc. 1,7 at 20 degrees cel. Lubricating greases and oils available.

FIRE PRECAUTIONS: International danger signals and precautions practised. Wires for towing must be ready for immediate use. In case of fire on board or in vicinity, vessel must leave quay and harbour as soon as possible.

GANGWAY/DECK WATCHMEN: Watchmen recommended, through Agent.

OPENING/CLOSING HATCHES: If necessary hatches can be opened or closed by stevedores, but usually by crew.

CERTIFICATES: Usual ship's certificates according to international regulations.

Confirmation of ETA is required 2 hours before arrival at Grip Lighthouse.

Channel 16 VHF is continuously watched by Kristiansund Radio and Pilot boat.

The usual pilot boarding point is inside Grip Lighthouse Lat. 63° 16′ N., Long. 07° 36′ E.

Pilot boat has orange upper works, white hull with the word "LOS" on each side.

The usual international signals may be employed by vessel requiring a Pilot.

In case of bad weather the pilot boat will lead ahead to sheltered waters. There is no anchorage for vessel awaiting a Pilot.

ANCHORAGES: At the bay North and N.E. of the wharf in about 20 m. of water, bottom sand, good holding ground.

Electric power cables cross from Valoya – Hestoya, anchorage in this area is prohibited.

MAX. SIZE: Vessels up to 160 m. LOA (vessels with LOA 214 m. have berthed) and 11.50 m. draft can be accepted at the North side of the wharf. On the East side 150 m. LOA, 8 m. draft.

HEALTH: Vessels will be cleared alongside.

RADIO: Kristiansund Radio is the long range area station.

VHF: Kristiansund Radio and Orland Radio. Continuous watch. All calling should be on Channel 16. Pilot boat also monitors Channel 16.

TUGS: Can be ordered by the local Agents.

BERTHING: The wharf is made of concrete. The North berth is 141 m. long, depth 12 m. The East berth is 141 m. long, depth 8 m. Permissible wheel loading for standard type vehicles is 12 tonnes.

STEVEDORES: *Working hours:*

Monday – Tuesday	0700 – 2400
Wednesday	0700 – 1930
Thursday	0700 – 2400
Friday	0700 – 2030

MEDICAL: Full hospital facilities available without prior notice.

FRESH WATER: Good quality water is available in unlimited quantities at about 20 tonnes per hour per connection.

FUEL: Not available, but can be ordered from Trondheim.

GANGWAY/DECK WATCHMEN: Can be ordered by the local Agents.

OPENING/CLOSING HATCHES: Normally handled by ship's crew.

CARGO GEAR: Discharging and loading is by ship's gear, however, some mobile cranes up to 30 tonnes capacity are available for extended hire at short notice.

REPATRIATION: Scheduled aircraft connected with direct overseas flights leaves from Trondheim Airport several times a day.

TIME: Local time is GMT plus 1 hour. Summertime is used.

POLICE/AMBULANCE/FIRE: All emergency services are available through the gate watchman.

Automatic fire alarms are installed at the wharf.

SHORE LEAVE: When Immigration and Customs have been satisfied, there is no restriction on crew's shore leave as long as they rejoin the vessel before departure.

BANKS: Bondernes Bank. Tel: 076-85163. Telex: 55219. Levanger Sparebank. Tel: 076-85137.

STORING: Vessel can be stored by truck during loading or discharging. Fork lift trucks can be used on the jetty to handle stores. Local Riggers cannot be employed to assist with storing.

SURVEYORS: Cargo Inspectors: Can be ordered by local Agents.

Bureau Veritas	Tel: 07-525030
Norsk Veritas	Tel: 07-917500
Lloyd's Register	Tel: 07-520124

EMERGENCY CO-ORDINATION CENTRE: Call nearest radio station.

AUTHORITY: Norske Skogindustrier A.S., 7620 Skogn. *Tel:* 076-85406. *Telex:* 55216 Skogn N. *Contact:* Charles Lillevik, Transport Engineer.

FLORO: 61.31 N. 05.02 E. (See Plan Book)

DOCUMENTS:

2 Manifests.
Crew List.
Provisions List.
Health Document.
Passenger List.

PILOTAGE: Nearest station Fedje (Lat. 60° 51′ N., Long. 04° 37′ E.). Distance to Floro harbour about 52 nautical miles. Pilot boat a white-painted cruiser-type marked "OS" on both sides of bow.

Fixed watch on Fedje island covers both Holmengra and Hellesoy. VHF Channels 8, 12 and 16. Listening first 10 minutes of every hour. ETA 24 hours before arrival. Telegram "Feielos". If bad weather, Pilot to be picked up on Eastern side of Fedje Island.

ANCHORAGE: No anchorages close to pilot station. Floro harbour: space of about 1 sq. km., depths from 15 fathoms to 30 fathoms.

RESTRICTIONS: Tide difference about 1.5 m. Max. draft entering Floro harbour 40 ft.

MAX. SIZE: Entering Floro harbour: No restrictions in main harbour concerning length and breadth. Max. draft berthing: "Gunhildvagen" (Bunkering – Offshore industry) 25 ft. and length of 120 m.

NB. – "Gunhildvagen" lies outside main harbour, and has narrow entrance. Weather permitting, ships of 100 m. length and breadth 20 m. can pass.

BERTHING: *Vestlandske Kjopelag:* A bulk grain/molasses terminal for vessels up to 6,000 d.w.t. Berth length, 100 m. Depth alongside 7.0 m. Storage capacity 20,000 tons of Grain/Molasses.

Fugleskjaerskaia: The deep-sea pier to the West of Fugleskjaerskaia is in operation. Fugleskjaerskaia now offers 500 m. of pier frontage, depth from 16 ft. to 43 ft. New section: 36 m., 18 ft. depth; 140 m., 33 ft. depth; and 1 berth 43 ft. depth.

The extension of Fugleskjaerskaia provided 21,000 sq.m. new cargo handling space. A Ro-Ro facility is also provided, max. axle load 60 tons.

STEVEDORES: ETA before 1600 hrs. for gangs required next morning.

MEDICAL: Hospital close to harbour, and available any time.

TANKERS: Harbour is only used by small tankers, about 500 to 1,000 reg. tons.

FRESH WATER: Only available alongside berth. Delivery about 30 t.p.h., possibility of 60 t.p.h. At Fugleskjaerskaia fresh water available at a rate of 200 t.p.h.

FUEL: Ordinary fuel. Diesel and gas oil delivered by truck. Ships up to about 1,000 g.r.t. receive oil bunkers directly by berthing bunker station.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Mostly done by crew.

CREW IDENTIFICATION CARDS: Not required.

CONSULS: None.

REPAIRS: Most repairs possible.

DRY DOCKS: None. There is a new berth at Ankerlokken Shipyard. Length 100 m. Depth alongside 9 m. – 10 m.

AIRPORT: Regular service with DeHaviland Twin Otters, 5 flights to Bergen and 2 to Aalesund each day. (Runway 860 m.).

TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.

HOLIDAYS: Cargo work can be arranged any time, holidays included.

POLICE/AMBULANCE/FIRE: Police 42101; Ambulance 41011; Fire 41000.

TELEPHONES: Can be arranged on board alongside wharf.

SHORE LEAVE: Permitted.

SERVICES: Servicing for all kinds of ships navigation instruments can be arranged, except adjusting radio bearings.

SHIP SUPPLY SERVICE: The port has 6 small passenger vessels (50 ft. – 60 ft.), all capable of 20-27 kts., one or more are vacant at any time, and willing to take on assignments.

Services can be ordered through K. Jansen, 6900 FLORØ. Tel. (057) 41010.

Helicopters can obtained from Helicopterservice, Bergen.

GENERAL: The nature of the traffic in the harbour has changed, currently 3 offshore drill rigs are supplied from Fugleskjaerskaia. Bulk tanks for cement and baryte have been erected on the quay.

DEVELOPMENTS: A new mole has been constructed on the S.W. side of entrance to Floro harbour.

North berth at Ankerlokken now blasted down to 14 m.

Botnaneset: The new offshore base is coming into operation. One quay, 80 m. long, 10 m. depth, completed. Also a deepwater quay, 50 m. long, 19 m. depth alongside. Construction started on quay for STATOIL, 60 m. depth of water. Construction of tank farm for bunker oil in progress.

Offshore supply trade will gradually transfer from Fugleskjaerskaia to Botnaneset. (Fjord Base)

AUTHORITY: Floro Havnevesen, P.O.Box 17, 6901 Floro, Norway. *Tel:* 41428. *Contact:* N. A. Hovland, Assistant Harbour Master.

AGENT: K. Jansen, Shipping Agent, Stevedore, Shipbroker. P.O.Box 15, N–6901 Floro. Tel: 057–41010, 057–42303. After office hours: 057–42277 or 057–41131. Telex: 40214 jans.

FRAFJORD: 58.51 N. 06.17 E. (See Plan Book)

SHIPMASTER'S REPORT: May 1979. Also see "Agents Report" below.

Vessel loading stones.

The berth at Frafjord is situated at the Eastern end of the Fjord leading to Frafjordsoyr (Lat. 58° 50′ 40″ N., Long. 06° 17′ E.) and consists of an angled quay 15 m. in length.

The Pilot is embarked at Kvitsoy pilot station and vessel then proceeds to Stavanger for customs clearance and agency work due to the remoteness of the loading berth. Pilots are changed at Stavanger and this Pilot remains on board until Kvitsoy outwards.

Approach to the berth is made at right angles with three shackles out on the starboard anchor until the headline and forward spring can be passed to the quay, the vessel is then turned on the anchor.

The quay is made of wood and is in poor condition with one end and bollard damaged. On the quay a single fixed conveyor is situated with a mobile extending arm and this is fed from a bin filled by tip-up lorries. The approximate lorry load is 13 tonnes. The extending arm can be remotely controlled in and out but is not quite long enough to adequately fill the outboard side. If loading mixed stones the lighter stones can be projected outboard. The loading foreman tended to be inexperienced and care has to be taken not to let the height of the stow build up too much and also along the inboard side as a slight starboard list is preferable due to the shallow areas of water on the inboard side and slack ropes aft will facilitate a general movement to the deeper water, (by sliding off the bottom).

No. 2 hold is loaded completely and then the stern is canted deeper water in order to load in No. 1. The sequence that was ado by this vessel was to load 750 tonnes in the after end of No. 1 follo by 750 tonnes in the forward end of No. 2 and then 700 tonnes in after end of No. 2. This increased the after draft to approximately 6. The stern was then canted out into deep water and the final 800 to was loaded forward. The vessel has to be constantly moved along quay in order to get an even stow height approximately one-third way up the hatch coaming.

The bollards on the beach are very badly positioned and the one the quay which were used for the springs were on the verge of b ripped out, one already having done so on the damaged end of the q

Loading commenced at 1600 hrs. on 11th May and cease 2215 hrs. that day, resumed at 0720 hrs. on 12th May and complete 1000 hrs. on 12th May. 3010 tonnes of stone chippings were loa final draft being, forward 5.32 m., aft 5.66 m. No gangway can be u only pilot ladder.

Little wind was experienced during our stay but I would consider any adverse weather conditions during berthing, loading or unbert must make this a dangerous operation.

AGENT'S REPORT: August 1984.

The Pilot can be embarked at Kvitsoy, Tananger or Skudesnes station.

Vessel proceeds direct from pilot station to loading berth (Pilot s on board during loading), which normally takes 6 hours for a vess 3,000 tons. Agency/Customs clearance is now performed at Frafjo

The loading berth is now of concrete and extended – mooring p are new, and there is no need to use anchor when approaching berth. Official draft limitation is 18 ft.

The max. length allowed at the berth is 95 m.

The loading foreman is now well experienced and is conducting loading/shifting with professional skill.

AGENT: Odd H. Torjusen A.S., P.O.Box 336, N-4371 Egers Norway. Tel: (04) 491322. Telex: 33357. Cables: Torjusen.

3 Manifests for each port of discharge.

PILOTAGE: Compulsory. Pilot boarding at Faerder Lighthouse, 59. 10.32 E. Agents report vessel's ETA to pilot station and vessel to 2 hours' notice by R/T 2182 kHz or VHF Channel 16 to Faerder Coast station Tjome Radio LGT or Farsund Radio LGZ can als used. Harbour Pilot and tugs, when necessary, will be arrange Agents to meet at Belgen.

ANCHORAGES: Safe anchorage for larger vessels Belgen, entrance. For smaller vessels anchorage to be pointed out by Pil Harbour Master.

RESTRICTIONS: Max. draft, East entrance 36 ft.; West entrance, 1 Otherwise no restrictions.

HEALTH: See "Documents".

If vessel carries Quarantine Flag for contagious diseases, communication should be sent to Agent for instructions, otherwis special regulations.

RADIO: Communication to Agent through Tjome Radio or Roga Radio.

TUGS: Three tugs, 750 h.p., 1,200 h.p. and 2,700 h.p. Stronger tugs be ordered from Oslo if necessary.

BERTHING: As instructed by Harbour Master through Agent, depen on vessel's draft and size.

East River Berths:

Oera Quay:

Southern part, max. draft 34 ft.
Northern part, max. draft 28 ft. – 33 ft.

Denofa Lilleborg Quay:

Max. draft 33 ft. (5 m. off the quay).

Additional Facilities:

4 warehouses, each at 2,000 sq.m. with 300 sq.m. of cool stora
4 ordinary cranes up to 3 – 6 tons (radius 8 m. – 26 m.).
1 mobile harbour crane up to 36 tons at 18 m. radius.
2 × 30 ton fork lifts.
30 × 2 ton – 12 ton fork lifts, 6 equipped to handle bales and re
5 Tugmasters, capacity 120 tons.
2 Ro-Ro terminals with an open area of about 40,000 sq.m.

STEVEDORES: To be arranged by Agent subject to requireme 24 hours notice important to obtain in good time accurate ETA.

Ordinary working hours 0700 to 1500 hrs.; Saturday until 1230 Bulk cargoes are usually discharged in shifts until Saturday 2200 h

MEDICAL: Master to advise by radio prior arrival if medical attenda required on board. Hospital facilities available.

TANKERS: Discharge pipe-lines usually 6 in. and 8 in. No (residues) discharge facilities. Tanker berths are at BP Denofa/Lilleborg.

Sulphuric Acid is loaded at Oera Quay.

DENSITY: Brackish water, 2.7% salt water.

FRESH WATER: From shore or by barge.

FUEL: All grades available. For larger quantities, delivery arrange barge.

GANGWAY/DECK WATCHMEN: Obtainable.

OPENING/CLOSING HATCHES: Crew members allowed to open and close hatches.
SHIP'S CERTIFICATES: To be produced to Customs Authorities on arrival.
CUSTOMS ALLOWANCES: *Tobacco:* 20 cigarettes or 20 gms. tobacco per man, per day. *Wines/Spirits:* 1 bottle of spirits or wine for consumption on board per crew member.
IDENTIFICATION CARDS: Not required, except at the quay of Defona/Leborg, when Master, upon arrival, will receive a sufficient number of cards for filling-in for each crew member, to be shown when passing the gate.
CONSULS: Danish, French, Finnish, Netherlands, Swedish.
REPAIRS: All repairs possible.
DRY/FLOATING DOCKS:
A/s Fredrikstad mek Verksted: Dry dock 945 ft. length, 126 ft. breadth, 25 ft. draft when docking. Floating dock, 900 tons, 181.6 ft. length, 52.6 ft. breadth, 14 ft. draft when docking.
Sarpsborg mek Verksted: Floating dock, 3,000 tons, 380 ft. length, 55 ft. breadth, 18 ft. draft when docking.
REPATRIATION: All facilities available.
AIRPORT: Fornebo, Oslo, 110 km. from Fredrikstad. Frequent connection by train.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.

GLOMFJORD: 66.50 N. 13.57 E.

DOCUMENTS:
3 Crew Lists.
Customs List.
Shipping Manifest.
Health Statement.
Bill of Lading.
Ship's Certificate of tonnage.
PILOTAGE: Pilot station, approach from South, is Aasvaer, 66° 17′ N., 12° 18′ E., VHF/radio telephone, frequency 2182.
Pilot station, approach from North, is Fleinvaer, 67° 13′ N., 13° 42′ E. Order Pilot over Bodo Radio, Tel: Bodo 22115.
ANCHORAGE: No berth for anchoring in Glomfjord but possible anchor at Sandaabukten close to Glomfjord.
HEALTH: Health certificate – only for first port in Norway.
RADIO: Sandnessjoen or Bodo Radio station.
VHF: On quay. Call: Hydro Glomfjord Port station on Channel 16.
TUGS: None.
BERTHING: No specific requirements relating to berthing. Quay length 317 m. and depth 8 m.
STEVEDORES: In accordance with Charter Party.
MEDICAL: Medical aid in Glomfjord, and hospital in Bodo.
TIDE: Difference between high and low water about 3 m.
FRESH WATER: Alongside quay.
FUEL: None.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally carried out by crew.
CERTIFICATES: Usual certificates.
CUSTOMS ALLOWANCES: 200 gm. tobacco or 200 cigarettes per man. 0.75 litre spirits or 0.75 litre wine per man.
CARGO GEAR: Discharging by cranes on quay. Loading by conveyor.
IDENTIFICATION CARDS: Usual passport necessary.
CONSULS/REPAIRS/REPATRIATION: None.
AIRPORT: Airport in Bodo.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: See "Drammen".
POLICE/AMBULANCE/FIRE: Police station 52100 Meloy.
TELEPHONES: On quay.
REGULATIONS: No particular or unusual regulations. Control by passing gate between dock area and surrounding fifield.

SHIPMASTER'S REPORT: 1976
Anchorage: The nearest anchorage to the berth, which is part of Norsk Hydro's chemical plant is Sandabukta, about 6 miles away. It is safe and sheltered and the Agent will board there. Communication with Glomfjord is by VHF Channel 16 or via the local boatman with whom private arrangements for shore leave are possible.
Clearance: Ship is boarded on arrival at the anchorage by the Glomfjord Customs officer who also acts as Immigration and Port Health.
Weather: This vessel called at Glomfjord in April but weather conditions were not attractive. Frequent snow squalls reduced visibility to zero but were usually short-lived.
Pilotage: There are no harbour Pilots at Glomfjord. If proceeding direct to berth, Sea Pilot will put ship alongside. If awaiting berth at Sandabukta anchorage, Pilot leaves there and it is normal for ships to complete the passage unaided. A Pilot can be obtained from Bodo but is not always available. If another ship is arriving at the anchorage, Pilot will transfer.

AUTHORITY: Norsk Hydro a.s. Glomfjord Fabrikker, 8160 Glomfjord, Norway. *Tel:* (081) 52 321. *Telex:* 64061 HYDRO N. *Cables:* Norskhydro *Contact:* Finn Nordmo.

HALDEN: 59.08 N. 11.25 E. (See Plan Book)

DOCUMENTS: See "Bergen".
PILOTAGE: Pilot boat at Faerder light station. Pilot boat at Herfol Losstation-Hvaler. Ordering usually over Radio Land Station. Tjome Radio = LGT (also VHF). Signals according to ordinary international requirements. Exact area for Pilot boat: Faerder light station (Store Faerder); Herfol pilot station; Hvasser pilot station.
ANCHORAGE: At Faerder light station in Oslofiord-Singlefiorden West side.
RESTRICTIONS: No special restrictions but larger vessels have to take necessary care with passing Svinesund. The tide current altering according to high and low water time.
MAX. SIZE: For the harbour inside Svinesund (Main Harbour) length 560 ft., beam 70 ft., draft. 25 ft.
HEALTH: Pratique, ordinary.
TUGS: If required tugs join outside Sponviksskansen Light at the entrance to Svinesund. Usually ship's lines.
RADIO: All radio services over Tjome Radio-Land Station (use the ordinary international frequency — (600-705-800 m.).
VHF: Port Authority on Channels 16 and 12.
BERTHING:

MEDICAL: Hospital facilities available at Hammerfest.
TANKERS: Discharge line 8 in.
DENSITY: Salt water.
FRESH WATER: Capacity 300 t.p.h. at Harbour Board Quay. No water barge available.
FUEL: All grades except heavy fuel oil available.
CUSTOMS ALLOWANCES: See "Stavanger".
IDENTIFICATION CARDS: Not required.
CONSULS: French, Danish, Finnish, Icelandic, Netherlands and Swedish Vice-Consuls.
REPAIRS: Slipway for smaller ships, up to 200 ft. Only minor repairs and radar repairs available.
DRY DOCKS: None.
REPATRIATION: Daily connection by ship and air.
AIRPORT: Hammerfest Airport. Regular service several times a day.
AUTHORITY: Hammerfest Havnevesen, P.O.Box 123, 9601 Hammerfest, Norway. *Tel:* 084-11201/11202. *Contact:* Arvid J. Solstas, Harbour Master.

HARSTAD: 68.48 N. 16.39 E. (See Plan Book)

PORT LIMITS: Inside a straight line from Trondenes Church to Stangnes Light.
DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
Derat Certificate.
PILOTAGE: If entering via Andenes, 12 hours' advance notice of ETA in order to arrange Pilot. If entering via Lodingen, 2 hours' notice. VHF Channel 16 both at Lodingen and on pilot-cutter at Andenes. 24 hour watch maintained.
ANCHORAGE: Inside harbour limits, fairly good anchorages available, Pilot will assist.
RESTRICTIONS: No restrictions, except all foreign ships must have a Coast Pilot on board in inland waters.
MAX. SIZE: Any size vessel can anchor in harbour.
HEALTH: In case of suspected disease doctor has to be called by radio before entering. After calling at another Norwegian port and no disease, Pratique is not necessary.
RADIO: Routing of ETA cables to Agents at Harstad is best over Harstad Radio. VHF installed at Harbour Office.
TUGS: Two small tugs available.
BERTHING: Public quays of 680 m. Private quays of 1,200 m.
MEDICAL: No advance notice required. Hospital facilities available. No medical information required if no suspected disease on board.
SPECIALISED CARGO-HANDLING FACILITIES: One coal bunkering station; draft about 24 ft.; equipped with crane.
Two mobile cranes, capacity 30 tons each.
Trucks: 1×20 tons, 1×10 tons. Also fork lift trucks between 1 ton and 6 tons.
TANKERS: Two berths. Esso 33 ft. Norol 36 ft.
TIDE: Rise in tide about 6 ft.
FRESH WATER: Available at most quays day and night.
FUEL: All grades available. In the Winter 3–4 hours' notice required.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: By crew.
CERTIFICATES: Usual international certificates.
CUSTOMS ALLOWANCES: Tobacco: 200 cigarettes or equal amount of tobacco. Wine and/or Spirits: Spirit half a bottle per person.
IDENTIFICATION CARDS: Not needed.
CONSULS:
Danish Vice-Consulate:
Samasjovn 22, 9400 Harstad. Tel: 0 82 64560 or 64219.

Customs Officer will accept tobacco and curio lists, also provision lists filled in on foreign forms, if all goods correctly stated.
PILOTAGE:
1. Vessels approaching from the sea and desiring a Pilot shall order the Pilot at 24 hours' notice insofar as possible and confirm arrival at pilot station at 2 hours' notice:
   (a) by telephone or telegram from ship to the pilot office concerned or sea pilot station over an official coastal radio station.
   (b) by telephone or telegram from broker/shipowner to the pilot office concerned or sea pilot station.
2. For direct connection between ships desiring Pilot and the pilot service, VHF-radio telephone Channel 16 (156.8 MHz) shall be used for calling and reply, and a VHF-radio telephone ship-to-ship Channel or harbour Channel shall be used for conversations. Ships not equipped with VHF-radio telephone may use the distress and calling frequency 2182 kHz for calling pilot vessel, but both the ship desiring Pilot and the pilot vessel shall in such cases immediately turn to ship-to-ship frequency. At such connections minimum transmission effect shall be used.
3. Vessels lying in port and desiring Pilot will order the Pilot from the nearest pilot office during its office hours and if possible at 4 hours' notice.
4. Vessels approaching from the sea as well as vessels lying in port shall, when making an advance order, state the name and destination of the vessel and whether 1 or 2 Pilots are desired.
5. The Pilots will on the whole be despatched to the ships in accordance with the advance orders, and vessels are therefore requested to comply with the foregoing rules as far as possible in order to avoid having to wait for Pilot.
6. The international provisions for summoning Pilots by signal flags or blue lights, etc., are still in force but should in future be used as a supplement to the radio communications or as the sole communication in emergencies.
7. These provisions came into force on the 1st April, 1984.

Description of pilot boat: White painted, orange wheelhouse, 2 masts, "Los" on both sides of bow. The pilot vessel is situated in Langesund Harbour on watch 24 hours every day. Pilot boards ships S.E. of Langoytangen lighthouse 58° 59.4′ N., 9° 45.8′ E.

The Agent must in general order Pilot before 1200 hrs. and before 1530 hrs. Friday when Pilot is required before Monday morning.
ANCHORAGES: Safe anchorages at end of fjord, West side. Masters should consult Pilots and/or charts before anchoring. Ample water and good holding ground for all sizes of vessels.
MAX.SIZE: Largest vessel berthed at Larvik Canal Quay, LOA 644 ft. 8 in., breadth 83 ft. 3 in., max. draft 32 ft. 6 in.
HEALTH: Advise Agents of any suspected disease or fever on board by radio or telephone before entering. Vessel will then anchor in anchorage and be boarded by state doctor. When vessel is healthy, Customs Officer will grant Pratique.
RADIO: Tjome Radio LGT, Rogaland Radio LGQ.
TUGS: No tugs at Larvik. Tugs to be ordered via ship's Agents from Fredrikstad or Porsgrunn. If tugs required Agents should be given 12 to 24 hours' notice. Tugs join vessel in fjord off harbour breakwater. Extra charges for use of tug's lines.
BERTHING:
Revquay West (Vester Revkai): Length 118 m. Depth alongside 9 m. Newest quay for general and miscellaneous cargo. New warehouse, measuring 1600 sq.m. Asphalted area outside measuring 10,000 sq.m. Railway track.

Adjacent to this quay is the Roll-on/Roll-off berth. Max. length vessels 170 m. Depth alongside 8 m.

Kanalquay (Kanalkaia): Kanalquay North – length 335 m. Depth. 10 m. Kanalquay West – length 120 m. Depth 6 m. Kanalquay South – length 90 m. Depth 5 m.

Facilities available at Kanalquay and Revquay West: Railway tracks, 3 portable electric cranes, capacity 6 tons – 23 tons. Portable pneumatic grain discharging plant, capacity 85,000 tons. Warehouses measuring 4,000 sq.m.

Outdoor storage area: 20,000 sq.m.

East Pier (Ostre Brygge): Length 130 m. Depth 8 m. New Ferry quay with Roll-on/Roll-off facilities. Car park for 560 cars or 52 lorries/trailers 18 m. Passenger terminal. Customs.

West Pier (Vestre Brygge): Depth – East side 6 m. West side 7 m. Ferry quay with Roll-on/Roll-off facilities on West side. Good parking.

Private Wharves: Treschow-Fitzoe Pulp Quays – West side: Length 50 m. Depth alongside 5 m. East side: Length 90 m. Depth alongside 6.3 m. 1 portable electric crane capacity 5 tons.

B.T. Transport A/S: Length 50 m. Depth 3 m. – 11 m.
STEVEDORES: Gangs to be ordered before 1600 hrs. and cranes before 1500 hrs. for following day. During office hours 2 hours' notice required.
MEDICAL: No advance notice required, unless in urgent medical cases and when ambulance needed. No particular inoculations required.
DENSITY: Salt water, brackish at times.
FRESH WATER: Delivered by hose from wharf.

MEDICAL: Medical attention available. Hospital facilities at Bergen.
DENSITY: Salt water.
FRESH WATER: Available from the jetties. Cost per ton Nkr. 2.50.
FUEL: All grades available.
FIRE PRECAUTIONS: Special safety regulation forms given when berthed.
CONSULS: Consuls available at Bergen from the following countries: Austria; Belgium, Brazil, Denmark, Finland, France, Great Britain, Greece, Iceland, Italy, The Netherlands, Panama, Peru, Portugal, Spain, Sweden, Switzerland, Turkey, Uruguay, West Germany.
REPAIRS: Repair shop facilities available. Repair work must not be commenced without the agreement of the Port Captain.
SURVEYORS: The following Classification Societies represented by Surveyor at Bergen: American Bureau of Shipping, Bureau Veritas, Det Norske Veritas, Germanisher Lloyd and Lloyd's Register of Shipping.
GANGWAY/DECK WATCHMEN: Available.
CUSTOMS ALLOWANCES: 200 cigarettes or 200 gm. tobacco and 1 bottle spirit or 2 bottles of wine, each man.
REPATRIATION: All facilities. Bus or Taxi transport to international airport.
AIRPORT: Flesland Airport, approx. 86 km. (54 miles) distance from Mongstad. Distance Bergen to Mongstad approx. 45 km.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Police, Tel: Knarvik 350504 and 350505. Ambulance and Fire fighting brigade available at the refinery.
TELEPHONES: No telephones on board. Long distance calls to be arranged via Agent. Local calls from Gatehouse.
SHORE LEAVE: Allowed.
IDENTIFICATION CARDS: Shore passes delivered on board on arrival.
PORT REGULATIONS: *Moorings:* Mixed moorings in the same direction are not allowed. Wire ropes shall have nylon "tails" not longer than 12 m. Nylon "tails" are available for purchase. Due to occasionally heavy swell in the fjord, particular attention is paid to the moorings.
AUTHORITY: Rafinor A/S & Co., N-5154 Monstad, Norway. *Tel:* 05-360300. *Telex:* 42266 A Olje N. *Contact:* Captain O. Dyblie, Port Captain.

MOSJOEN: 65.51 N. 13.11 E. (See Plan Book)

DOCUMENTS:
Health Certificate.
Crew List.
Passenger List.
Ship's Register.
Cargo List.
Bonded Store List.
PILOTAGE: Pilot station at Asvaer, location 66° 15′ 9″ N., 12° 18′ 03″ E. Telegraphic address: Pilot Station, Asvaer. VHF Channel 16. Telegraph ETA 24 hours prior to arrival. Piloting around clock.
ANCHORAGES: Hellesvik. Location 66° 01′ 30″ N., 12° 54′ 20″ E.
RESTRICTIONS: No restrictions on night entry. If draft above 33 ft. enter on high tide and commence discharging immediately.
HEALTH: Free Pratique given automatically when "Q" flag not to be flown.
RADIO: Rorvik Radio LGD.
TUGS: Stationed at Sandnessjoen. Have to be ordered through Agents 24 hours prior to arrival. Normally used by vessels above 20,000 d.w.t.
BERTHING: Drafts over 33 ft. berthed only on high tide and commence discharging immediately. No restrictions on length and breadth.

Crane for bulk cargo (alumina), capacity 300 t.p.h. Mosjoen Aluminiumverk, private berth. Maximum outreach from quay – 15 m.

No other special facilities (Roll-on/Roll-off facilities may be constructed).
STEVEDORES: Ordered through Agents. No ETA to stevedores necessary.
MEDICAL: Master to advise prior to arrival if medical attention required. Hospital facilities available.
DENSITY: Brackish in port.
FRESH WATER: Supplied from installations at berth.
FUEL: Gas oil, delivered by lorries.
GANGWAY/DECK WATCHMEN: Available, but not compulsory.
OPENING/CLOSING HATCHES: Performed by vessel's crew.
CUSTOMS ALLOWANCES: 1 bottle spirits, 200 cigarettes, 200 gm. tobacco.
IDENTIFICATION CARDS: Not required.
CONSULS: None.
REPAIRS: Minor repairs possible.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: New Year's Day; Good Friday; Maunday Thursday; Easter Monday; Workers' Day (1st May); 17th May; Ascension Day; Whit Monday; Christmas Day; Boxing Day.
POLICE/AMBULANCE/FIRE: Fire Tel: 70222; First Aid Tel: 70800; Police Tel: 71611.
AUTHORITY: Mosjoen Havnevesen, 8650 Mosjoen, Norway. *Tel:* (78) 70265. *Cables:* Harbour Master. *Contact:* Arne Lund, Harbour Master.

NAMSOS: 64.28 N. 11.30 E. (See Plan Book)

DOCUMENTS:
Crew list.
2 Passenger lists.
2 Health Certificates.
Manifests.
Ship's papers.
PILOTAGE: Pilot can be ordered by ship's Agent from Trondheim.
ANCHORAGE: Good anchorage inside harbour.
MAX. SIZE: Vessels up to 15,000 d.w.t. have entered harbour. 3 small oil berths with depth 5 m. LW.
HEALTH: Normal Norwegian regulations.
RADIO: Rorvik Radio. No radar.
VHF: Channels 12 and 14.
TUGS: No tugs in Namsos. 1 tug stationed at Bangsund and can be hired.

Berth	*Length (m.)*	*Depth (m.)*
Tiendeholmen	55	8
S.T.K.	120	6

CRANES: 50 ton mobile crane.
STEVEDORES: Notify day before arrival to arrange gangs.
TANKERS: 3 tanker berths with 5 m. alongside LW.
DENSITY: Average density 1020 in Spring, and in Summer 1015.
FRESH WATER: Available by hose. Capacity 10-15 t.p.h.
FUEL: Light grades available.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Stevedores operate hatches.
CERTIFICATES: Usual international certificates.
IDENTIFICATION CARDS: Not needed.
CONSULS: None.
REPAIRS: Small repairs available.
SURVEYORS: None.
REPATRIATION: Organised by seamen's office.
AIRPORT: 4 km. from town. Regular service twice a day South and North.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
POLICE/AMBULANCE/FIRE: Police 72151; Ambulance 72500; Fire 72000.
TELEPHONES: Can be placed on board.
SHORE LEAVE: Crew allowed ashore.
STORING: Vessels may be stored by truck. Trucks may proceed alongside the berth. Fork-lift trucks and riggers available.
DELAYS: None expected.
AUTHORITY: Namsos Havnevesen, Postboks 107, 7801 Namsos, Norway. *Tel:* Office: 077-72400, Private 077-72401. *Contact:* John Holm, Harbour Master.

NARVIK: 68.25 N. 17.24 E. (See Plan Book)

The following information applies mainly to vessels arriving to load ore cargoes.

LOCATION: The Port of Narvik is located in position: Lat. 68° 25′ 30″ N., Long. 17° 24′ 00″ E.
DOCUMENTS: All ships arriving from a foreign port will be boarded by Customs.

The following documents should be completed prior to arrival:
Maritime Declaration of Health Form 1 – 1012.
General Declaration IMO Form 1 in quadruplicate.
Ship's Stores Declaration IMO Form 3 in triplicate.
Crew's Effect Declaration IMO Form 4 in triplicate.
Crew List in triplicate.
The above forms will be supplied by mail on request.
PILOTAGE: *Sea Pilot:* Sea Pilot will embark off Tranoy Pilot Station. Location: Lat. 68° 11° N., Long. 15° 34′ E.

Distance from Tranoy to Narvik 46 nautical miles.

Note: Vessels bound for Narvik will have to pass through Restricted Area. It is compulsory for all foreign non-military vessels of not more than 50 g.r.t. to have a Norwegian State Pilot on board when approaching Restricted Areas in Norwegian Waters.

The Sea Pilot will assist during undocking and leave the vessel off Tranoy Pilot Station.

Harbour Pilot: The use of Harbour Pilot is compulsory during docking. When docking on arrival, the Harbour Pilot will board the vessel inside the harbour limits.

Ordering of Pilots: Vessels approaching from the sea shall order the Pilot at 24 hours' notice in so far as possible and confirm arrival at pilot station at 2 hours' notice.

Provisions for Advance Reports in Connection with the Ordering of Pilots:

Issued by the Director of Pilotage, 10th May, 1963, amended 1st January, 1971.

1. Vessels approaching from the sea and desiring a Pilot shall order the Pilot at 24 hours' notice in so far as possible and confirm arrival at pilot station at 2 hours' notice:
   (a) By telephone or telegram from ship to the pilot office concerned or sea pilot station over an official coastal radio station.
   (b) By telephone or telegram from Broker/Shipowner to the pilot office concerned or sea pilot station.
2. For direct connection between ships desiring Pilot and the Pilot Service, VHF radio-telephone Channel 16 (156.8 MHz) shall be used for calling and reply, and a VHF radio-telephone ship-to-ship channel or harbour channel shall be used for conversations. Ships not equipped with VHF radio-telephone may use the distress and calling frequency 2182 kHz for calling pilot vessel, but both the ship desiring Pilot and the pilot vessel shall in such cases immediately turn to ship-to-ship frequency. At such connections minimum transmission effect shall be used.
3. Vessels lying in port and desiring Pilot will order the Pilot from the nearest pilot office during its office hours and if possible at 4 hours' notice.
4. Vessels approaching from the sea as well as vessels lying in port shall, when making an advance order, state the name and destination of the vessel and whether 1 or 2 Pilots are desired.
5. The Pilots will on the whole be despatched to the ships in accordance with the advance orders, and vessels are therefore requested to comply with the foregoing rules as far as possible in order to avoid having to wait for Pilot.
6. The international provisions for summoning Pilots by signal flags or blue lights, etc. are still in force, but should in future be used as a supplement to the radio communications or as the sole communication in emergencies.
7. These provisions come into force on 1st January, 1971.

Vessels in Port: Luossavaara-Kiirunavaara AB will notify the Sea Pilot in due time before completion of loading. LKAB will also arrange for Harbour Pilot to assist during docking or when otherwise required by vessel's Master.

ANCHORAGES: Anchoring must take place in the recommended areas as advised by the Pilot, i.e. inside the harbour basin or to the South West and West of "Framnesodden".

Warning: The bottom usually gives good anchorage but vessels are requested to keep continuous watch while at anchor. Frequent anchor bearings must be taken during adverse weather conditions.

Vessels at anchor inside the harbour basin are especially exposed to gusting winds from S.E. (locally named "Beisfjord-winds").

HEALTH: The Master of a ship arriving from a foreign port, must hand to the Customs Officers a Maritime Declaration of Health form signed by the Master. If there is a ship's Surgeon on board, the declaration to be countersigned by this person.

A valid Derat Certificate to be presented to the Customs on request.

RADIO: *ETA Notices:*

1. Please cable ETA to Malmexport Stockholm 6 days prior to arrival at loading port and to MALMEXPORT NARVIK as follows:

Sailing from last port and 48 hours and 24 hours before arrival.

If any change in ETA of more than 1 hour occurs after transmission of the 24 hour ETA, the vessel must send a corrected ETA.

2. Following should be included in the 48 hours ETA notice:
   a. Tonnage of cargo required and quantity in each hold.
   b. Cash advance requirement.
   c. Order for repairs, bunkers, stores, charts etc.
   d. In case of repatriation, please state name of crew member(s) to be repatriated, destination and date of departure preferred.
3. Docking instructions – prospects.

Request for docking instructions, loading time etc. should preferably be included in the 48 hours ETA.

Docking instructions will also be advised by Pilot on arrival Tranoy Pilot Station.

4. Estimated time for ballast pumping after arrival should be advised with the 24 hours ETA.

Other Vessels: Cable Agents giving ETA, draft and cash required. Radio station: Rogaland Radio/LGB but other stations can be used.

VHF: Contact with LKAB can be obtained by VHF (Channel 14) on a 24 hour basis. Vessels at anchor are requested to keep continuous VHF watch. It is also advisable for vessels alongside to have the VHF switched on. Messages to the Agent should be given by VHF.

Local and long distance calls can be ordered via Bodo Radio on VHF Channel 28.

Other Vessels: Local and long-distance calls may be ordered through Harstad Radio on Channel 16.

Port frequency is Channel 14, on which vessels may communicate with the port ferry launch and Agent (ore-loading vessels).

FUEL: Bunkers are available on an emergency basis only. Orders for fuel and diesel should preferably be given in due time directly to the supplier. Fuel oil can only be supplied from coastal-tankers.

Diesel oil can be delivered by the tug M.V. "Rombak" at the daily market rate and from the supplier used by the tugboat company.

Capacity per delivery about 100 cu.m.

An extra fee will be charged for the tug per delivery.

It is also possible to supply diesel oil by tank wagons. Capacity per delivery about 10 cu.m. – 12 cu.m.

Lubricants: Can be procured, but due notice must be given as all types are not kept in stock.

TUGS: Tug service is compulsory at LKAB's Ore Berths.

Luossavaara-Kiirunavaara AB reserve the right to order the number of tugs (maximum 3) which they consider necessary to ensure safe mooring and unmooring of a vessel.

Vessels above approximately 70,000 d.w.t. will normally be assisted by 3 tugs.

Main particulars of tugs available: M/V "Svarta Bjorn", g.r.t. 277, b.h.p. 1,640, bollard pull 23 tons, 11 knots. Fluid couplings and single reduction gearing. Reverse gear to screwshaft.

M/V "Rallaren", g.r.t. 435, b.h.p. 3,800, bollard pull 43 tons, 12.4 knots. Two Voith-Schneider directional propellers.

M/V "Rombak" g.r.t. 440, b.h.p. 4,000, bollard pull 47 tons, 12.5 knots. Two Voith-Schneider directional propellers.

Tugowners: A/S Bukserbater, Narvik.

Towing lines will be provided from the tugs.

Normal communication between tugs and Pilot is by VHF. Operating Channel 6 (156.3 mHz.).

Bilge Pumps: The tugs M/V "Rallaren" and M/V "Rombak" are equipped with 2 transportable bilge pumps. Average pumping capacity of each pump: 2,000 litres per minute.

Fire Fighting: Tugs M/V "Rallaren" and M/V "Rombak" are equipped with foam/water guns for fire fighting.

Other Vessels: Must be employed for tankers, 3 tugs available, capable of assisting vessels up to 250,000 d.w.t.

BERTHING:

General Description: The Ore Berths, hereinafter described as Berth Nos. 3, 4 and 5, allow 3 ships to be berthed simultaneously.

The ore is transported from the stockyards to the shiploaders on conveyor belts. Both stockpiling and loading is automatically directed from a central control station. On the way to the pier belts, the ore is transferred via sampling stations which also include computer controlled screen analysis for pellets.

After having passed the sampling station, the ore is weighed by electronic belt scales with a very high degree of accuracy.

Mooring: Ships usually berth:

Starboard side to Berth No. 3.

Port side to Berth No. 4.

Starboard side to Berth No. 5.

It is the responsibility of the Ship's Master to provide for and make sure that his ship has sufficient mooring ropes and wires ashore at all times, and that the moorings are properly and evenly tightened.

Ships berthing at No. 5 Berth should preferably use floating mooring ropes (nylon, polypropylene or similar) for head- and sternlines.

Berth Nos. 3 and 4: Consists of a slender reinforced concrete pier, supported by 13 heavy concrete pillars resting on steel piles which are rammed through clay and silt to solid rock some 30 m. – 35 m. below the pier deck, above which the superstructure, carrying the conveyor belts, rises about another 15 m.

The outer end of the concrete pier deck is based on a caisson, placed on a reinforced concrete foundation slab, resting on steel piles driven to rock base.

The caisson as well as the pier itself is equipped with heavy rubber fenders of Seibu type and with heavy rubber tyre fenders.

Shiploaders: There are 2 travelling boom loaders on each side of the pier with a working area of approximately 150 m.

If 2 ships are loaded simultaneously, only 1 shiploader can be used on each side.

Designed capacity of each shiploader is 4,500 tonnes/p.h., but the average capacity should be calculated between 3,000 tonnes/p.h. and 2,000 tonnes/p.h. depending on the kind of ore being loaded.

Berth No. 5: Is a concrete caisson berth, parallel to the shoreline.

The basement of the berth consists of 5 cylindric caissons resting on foundations connected to solid rock.

The face of the berth is fitted with heavy Seibu fenders, dimensioned to obtain pressure of a 40% ballasted ship of about 350,000 d.w.t., approaching at a speed of 0.15 m. per second.

The Shiploader: Is of a linear slewing type, turnable around a fixed point in the rear. The loader travels on rails along the berth in a length of 140 m. The shiploader boom can be elevated to any suitable height over a vessel's hatch coamings. Maximum horizontal loading range is 220 m.

Designed capacity is maximum 11,000 tonnes/p.h. for lumpy ore and fines, and approximately 7,500 tonnes of pellets per hour.

Apatite Berth: The berth is located between Berth No. 5 (East side) and shore. Minimum depth 12 m. Vessels up to approx. 10,000 d.w.t. can load Apatite in bulk at this berth. One shiploader with designed capacity 800 metric t.p.h. The cargo is stored in a silo of 7,035 cu.m., containing about 11,000 tonnes apatite.

Loading takes place via a closed and dustfree system through special openings in vessel's hatchcovers.

Fagerneskaien: There is a deepwater quay, "Fagerneskaien", located to the South of the harbour.

Length of quay 280 m.

Depth alongside on LW 15 m.

The quay has easy access from the shore side and suitable for ships taking onboard heavy goods and provisions as well as for ships carrying out repairs.

There is a workshop with structural, plate and welding factory situated at the quay.

The quay is directly connected to the main railway.

Fresh water is available with connections conveniently located.

LOADING:

Docking Data for Ore Berths: (Measurements in metres, unless otherwise stated).

	Berth No. 3	*Berth No. 4*	*Berth No. 5*
Building completed (year)	1950 (Caisson in 1967)		1977
Type	Concrete Pier		Concrete Caisson Berth
Length	214.00	214.00	208.00
Breadth	13.50	13.50	Min. 8.25, Max. 18.00
Depth alongside at LWOST	*13.50	13.00	27.50
Height under shiploader (Airdraft) on HWOST	13.00	11.00	26.00
Max. outreach of shiploader from fender line	15.00	11.00	43.00 When perpendicular to wharf
Number of shiploaders	2	2	1
Suitable ship's size in d.w.t. (approx.)	40-75,000	5-45,000	70-250,000
Max. ship's size in d.w.t. depending on type and construction	90-100,000	45-50,000	over 300,000
Limitation of ship's length from bow (bulb) to aftermost loadpoint	200.00	175.00	No limitation
Max. length between ship's foremost and aftermost loadpoint loadable without warping	152.00	152.00	220.00

*Note: Maximum guaranteed draft at Berth No. 3 is 13 m. on LWOST (minimum 0.5 m. under-keel clearance required).

Loading to draft exceeding 13 m. may take place during favourable tide and weather conditions.

Iron Ore Qualities/Average Stowage Factors:

Ore Qualities	*tons/ cu.m.*	*cu.m./ tons*	*tons/ cu.ft.*	*cu.ft./ tons*
KBZ (Kiruna BZ)	3.30	0.30	0.093	10.8

PF (Pellets Fines)	2.50	0.40	0.071	14.1

Weighing: The ore is weighed continuously during loading by electronic belt scales.

Margin of error maximum ±0.25%.

All weights as well as quantities issued in the Bills of Lading are expressed in metric tonnes (1,000 kg.).

Loadline Zones:

Winter: 1st November – 31st March.
Summer: 1st April – 31st October.

STEVEDORES: Ordered by Agent. Not necessary to contact stevedores.

Working Hours: Ordinary working hours 24 running hours, except Saturday 2200 hrs. to Sunday 0600 hrs.

CRANES: Fixed crane, SWL 5 tons, is available at Fagerneskaien (deep-sea wharf), and mobile cranes can be hired from local companies.

DENSITY: 1022.

FRESH WATER: Can be supplied from all berths. Connections are conveniently located with hoses available on the dock.

Fresh water can also be delivered by tugs. An extra fee will then be charged.

Capacity per delivery: M.V. "Rallaren" 93 cu.m.
M.V. "Rombak" 112 cu.m.

GANGWAY/DECK WATCHMAN: Available but not compulsory.

OPENING/CLOSING HATCHES: May be handled by ship's crew.

CUSTOMS ALLOWANCES: 200 cigarettes or 250 gm. tobacco and 0.75 litre spirit or 2 bottles of wine. Must be declared on Customs List together with radios, tape recorders, binoculars, etc.

IDENTIFICATION CARDS: Not required.

CONSULS: See "Telephone Numbers".

REPAIRS: Minor repairs can be effected by local repair firms.

SURVEYORS: Lloyd's representative and surveyor are available at the port.

DRY DOCKS: None.

AIRPORT: Narvik Airport, 5 minutes by taxi from the port. Local commuter service with connection to the nearest major airports.

Evenes Airport, 1.5 hours by bus from Narvik. Regular service to Oslo (Fornebu Airport) and other major Norwegian airports.

REPATRIATION: Facilities exist for crew change and necessary repatriation.

TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Day; May 1st; May 17th; Easter; Christmas Day; December 26th. Also see "Customs of the Port".

POLICE/AMBULANCE/FIRE: Police 41060; Hospital 44044; immediate help 4300 (only at night time); Ambulance 43600; Fire 41122.

LAUNCHES: The Agent will supply a time table and tickets on arrival. If a launch is required, the "B" flag or red light should be displayed from the signal mast.

SERVICES: Compass adjusting can be arranged when necessary.

SHORE LEAVE: Allowed.

TELEPHONES: Vessels at berth may hire a telephone. A telephone watch should then be kept on board.

CUSTOMS OF THE PORT:

1. The ships will generally be loaded in regular turn, providing they present with starting hatches opened and holds properly cleaned and do not have ballast pumping which will exceed expected loading time.

2. For establishing turn of vessels a ship will be considered "Arrived" at the time of passing a line between the S.W. point of "Framnesodden" and "Batberget", or if anchored outside the Harbour limit, at the time of anchoring.

3. The time of arrival stated in the Notice of Readiness shall be the time when a ship has moored alongside loading berth, (finished with engines) or when loading berth is not available, at the time of anchoring.

4. Notice of Readiness shall be given by the Master on arrival whether in berth or not any time SHINC with the exception of certain holidays.

5. Loading plans, duly dated and signed, stating quantity in each hatch and rotation of loading, must be presented to the Agent on arrival and to the loading foreman as soon as the ship has moored.

6. All weights shown on the Bill of Lading will be the same as recorded on the weighing facilities of Luossavaara – Kiirunavaara AB. The weights will be given in tonnes of 1,000 kilogrammes (metric tonnes).

7. Pilots and tugs will be ordered in due time before loading is finished. The ship must leave the pier upon completion of loading when the cargo documents have been received. If any delays occur in preparing the cargo documents, or on occasion of missing crew members, or in case of any dispute or otherwise, the ship must leave the pier immediately when so ordered by the shippers, and matters will be settled while the ship is waiting in the roads.

8. Ore – Oil and OBO vessels will not be accepted for loading unless gas-free certificate has been obtained.

9. *Working Hours:*

Ordinary working hours 24 running hours.

Loading does not take place on the following holidays:

December 24th 1300 hrs. – December 26th 2200 hrs.
December 31st 1300 hrs. – January 1st 2200 hrs.
Maundy Thursday 1400 hrs. – Easter Monday 2200 hrs.
Whitsun Eve 1400 hrs. – Whitmonday 2200 hrs.
April 30th 2200 hrs. – May 1st 2200 hrs.
May 16th 2200 hrs. – May 17th 2200 hrs.

Note: The above stipulated working hours are subject to alteration without notice.

GENERAL:

Tide: Range of tide: Maximum approximately 3.30 m.
Minimum approximately 0.50 m.
Average 1.75 m.

Currents: The existing currents are mainly caused by tide water. The average speed of the current varies from 1 knot – 3 knots.

During May – June there is a constant Northwesterly flood-current setting out from "Beisfjorden" (a narrow fjord to the South of the harbour).

This current reaches an estimated speed of 4 knots – 5 knots when it coincides with the fall of the tide.

The direction of the current in the harbour basin is exposed to seasonal and local variations owing to snow-melting and changes in water temperature.

It is important that the Ship's Masters are aware of the fact that the existence of variable currents in the harbour may affect the manoeuvrability and bring vessels at anchorage in the bay to turn in dissimilar directions.

Winds: The local fall winds from Southeast occur suddenly and unexpectedly but are most frequent and strongest during the Winter season, when winds force 30 sec./m. have been measured.

Harbour Charts: Norwegian Chart No. 461 and British Admiralty Chart No. 3753.

Garbage: Trucks will remove garbage from vessels at berth on request. Garbage can also be removed by lighter if necessary from ships at anchor.

Launch Service: A regular launch service is operated and administrated by the Harbour Authorities.

Port Passenger Ferry Service: Until further notice is given, the Narvik Port Authority's passenger ferry service to/from all vessels anchored on the inner/outer roads is scheduled as follows:

INNER ROADS

Weekdays: Departure Ferryquay: 0715 – 0800 – 0900 – 1000 – 1200 – 1300 – 1400 – 1600 – 1800 – 2000 – 2200 – 2400.

Saturdays, Sundays and Holidays: Departure Ferryquay: 0800 – 1000 – 1200 – 1400 – 1600 – 1800 – 2000 – 2200 – 2400.

OUTER ROADS (outside Framnesodden)

Every day: Departure Ferryquay: 0800 – 1000 – 1200 – 1400 – 1600 – 1800 – 2000 – 2200 – 2400.

The ferryboat will call at your vessel *only* if passengers are to be put on board, *or* if the ship by means of proper signals indicates that ferry service is required.

The proper "ferryboat requested" signals are:

In daylight: A red flag hoisted at the yardarm.
In darkness: A well visible red light.

Pilot Ladders/Gangways: For safe embarkation/disembarkation of passengers to/from any vessel anchored on the roads, the following regulations should be observed:

1. Either pilot ladder or gangway to be rigged on the leeward side of the vessel. In rough weather, both a pilot ladder and a gangway must be arranged on the leeward side in such a way that the ladder can be reached from the embarking/disembarking platform of the gangway when lowered to the sea surface.

2. The pilot ladder is – when rigged – to be safely secured on the main deck, and extend to the sea surface. In order to prevent capsizing, every 4th rung of the ladder should be extended.

3. Properly secured on deck, 2 strong holding ropes should be arranged close to the pilot ladder, 1 on each side, and extend to the sea surface.

During darkness, proper lights to be rigged above ladder/gangway, so that embarkation/disembarkation may be carried out in a safe way.

4. The vessel's watchman should stand by the ladder/gangway during embarkation/disembarkation, in order to assist the passengers when necessary.

General: During unfavourable weather conditions, when the sea is rough, the captain of the ferryboat may have to cancel one or more scheduled calls at your vessel, until conditions have improved.

You may communicate with the ferryboat on VHF Channel 14.

With reference to the above regarding Ferryboat service, we regret that the last ferry from shore leaves at 2400 hrs.

Transport to the ship in the Roads between 2400 hrs. and 0715 hrs., respectively 0800 hrs. on Saturdays, Sundays and Holidays, can only be arranged in case of absolute emergency.

Officers and crew members on ordinary shore leave who miss the last ferry at 2400 hrs., will have to wait until the first ferry the following morning.

Provisions and Stores Available: Advance notice preferred.

Ship's Laundry: Can be taken care of.

Agency: Luossavaara-Kiirunavaara AB (LKAB) will handle the Agency and perform all normal service functions at this port. Tel: 082-41020. Cable address: "Malmexport Narvik". Telex: 64022. Answerback code: lkabn N. VHF (24 hour basis) calling Channel 14, Working Channels 12 and 14. Call sign: LKAB.

Advance funds sufficient to cover estimated compulsory port expenses and additional outlays, such as cash to Master, must be remitted prior to vessel's arrival.

Bank remittances should be sent to LKAB's account No. 6370.05.01045 with Christiania Bank og Kreditkasse Narvik. Cable address: "Kreditkassen Narvik". Telex: 64081. Answerback code: Cbknk n.

AUTHORITY: Narvik Havnevesen, P.O.Box 627, 8501 Narvik, Norway. *Tel:* 42142. *Contact:* G. Berntsen, Port Manager.

OSLO: 59.54 N. 10.43 E. (See Plan Book)

DOCUMENTS:

Maritime Declaration of Health.
Sealing Certificate.
2 Crew Lists.
2 Passenger Lists.
2 Lists Crew Personal Effects.
Provisions List.
3 Cargo Manifests.
Certificate of Tonnage.
Dangerous Cargo List.

PILOTAGE: Compulsory. Pilot boards at Faerder Lighthouse, 50 miles from docks. Give 24 hours notice "Faerder Pilot". Pilot station on VHF Channel 13.

ANCHORAGE: Good sheltered anchorage in Western Harbour Basin, depths up to 20 m.

RESTRICTIONS: Vessels may enter at any time. No tide or current.

MAX. SIZE: Vessels up to 34 ft. draft may berth at Filipstad Quay and Sjursoya Quay.

Tankers: Up to 36 ft. draft at Oslo, or 38 ft. draft at Fagerstrand.

HEALTH: International procedure followed to obtain Pratique. In case of suspected disease or fever on board, inform the Harbour Master's Office in advance. When arriving from a Norwegian port, Pratique is automatic.

RADIO: Communicate through Tjome Radio, call sign LGO. Harbour Master's Office equipped with VHF, Channel 16.

TUGS: Sufficient tugs available for all requirements.

BERTHING: Instructions given from Harbour Master. Masters of ships are requested to send their ETA to the Harbour Master's Office through Oslo Havne Radio, VHF Channel 12.

Filipstad Quay: Up to 11 m. depth alongside.
Sjursoya Quays: Up to 11 m. depth alongside.
Vippetangen: Up to 8 m. depth at Pier No. 2.
Pipervika: Up to 12 m. depth at Akershus Pier.
Bjorvika: Up to 7 m. depth at Lang Quay.
Bispevika: Up to 9 m. depth at Sorenga Pier.
Gronlia: Up to 8 m. depth alongside.
Kongshavn Quays: Up to 7 m. depth alongside.
Bekkelaget: Up to 11 m. depth alongside.
Ormsund: Up to 8.0 m. depth alongside.

BULK CARGO FACILITIES: Container traffic handled at Filipstad, Bekkelaget and Sjursoya North.

Sorenga Pier equipped for palletised cargo handling and containers, Ro/Ro.

15 berths for Roll-on/Roll-off traffic. 2 Container cranes for 20 ft., 30 ft. and 40 ft. units, up to 35 tons (net) and container handling equipment, quay cranes and mobile cranes and floating Ro-Ro ramp.

Sjursoya North: Cement, phosphate, grains, molasses and containers.
Sjursoya South: Gasoline and oil and propane gas.
Bekkelaget North: Molasses, general cargo and oil.
Sorenga: General cargo and containers.
Kongshavn: Building material.
Ormsund: Containers.

STEVEDORES: Arranged by Agents. Working hours 0700-1600 hrs., Saturdays overtime is voluntary.

TANKERS: Also see "Slagen".

Oslo: Oil pier at Sjursoya, depth alongside 12 m. A tug required to stand by during discharge.

Fagerstrand: Terminal operated by Norske Braendselolje A/S situated in Oslo fjord, 12 miles S. of Oslo. 1 berth for tankers up to 30 ft. draft. 1 berth for tankers up to 38 ft. draft.

MEDICAL: All facilities available. Masters to advise by radio prior to arrival if medical attendance required on board.

DENSITY: Salt water, 1025.

FRESH WATER Available by pipeline from all quays.

FUEL: All grades available, ex-wharf at many quays. Can be delivered by barge.

FIRE PRECAUTIONS: 2 boats fully equipped with fire-fighting equipment.

CUSTOMS ALLOWANCES: 200 cigarettes allowed weekly, 1 litre of wine and 1 litre of spirit weekly, for each man.

CARGO GEAR: International Safety Regulations to be observed.

IDENTIFICATION CARDS: Not required.

CONSULS: Following countries are represented at Oslo:

SARPSBORG: 59.17 N. 11.07 E.

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
1 Health Certificate.
3 Manifests.
1 Bill of Lading.
2 Tobacco/spirit Lists.
PILOTAGE: Pilot ordered by Faerder Losstasjon or Herfol Losstasjon via Tjome Radio. Harbour Office can be contacted by VHF.
Pilotage compulsory for all vessels of 100 g.r.t. and over.
ANCHORAGE: Between Struten Light and Stromtangen Light.
MAX. SIZE: 24 ft. draft.
HEALTH: No particular action necessary, but Agent to be informed.
RADIO: Tjome Radio.
VHF: Harbour Master's Office, Channels 16 and 12. Day and night service.
TUGS: Small harbour tug available.
BERTHING: A Roll-on/Roll-off berth has been built to handle vessels of up to 6,000 tons gross. Depth alongside 28 ft. Vessels will moor alongside the old Alvim Pier enabling them to work through the side doors and stern doors.
STEVEDORES: Ordered through Agent.
MEDICAL: If medical attention necessary Agent must be informed in advance.
FRESH WATER: Only at Alvim Kai, average 15 t.p.h.
FUEL: Fuel obtained only with tank cars.
GANGWAY/DECK WATCHMEN: No gangways from shore. Watchman can be obtained.
OPENING/CLOSING HATCHES: Carried out by crew.
CUSTOMS ALLOWANCES: 100 gm. tobacco or 200 cigarettes per crew member. Wine 1 litre per member or 1 bottle of spirit.
IDENTIFICATION CARDS: Have to be used for Melloes Quai only.
CONSULS: Denmark, Finland, Iceland, Sweden and Greece have vice-consulates.
REPAIRS: Deck and engine repairs possible.
DRY DOCKS: One for 3,100 tons d.w.t.
REPATRIATION: No facilities.
AIRPORT: Fornebu Airport 110 km. from Sarpsborg. Served by regular airlines.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: 1st January; 1st May; 17th May; 25th/26th December. No work on these days.
POLICE/AMBULANCE/FIRE: Police 52000; Ambulance 52040; Fire 51234.
TELEPHONES: No arrangements exist for placing telephones on board.
SHORE LEAVE: No restriction.
AUTHORITY: Sarpsborg Havnevesen, Strandgaten 2, 1700 Sarpsborg, Norway. *Tel:* 031-52073. *Contact:* Harbour Master.

SAUDA: 59.40 N. 06.22 E. (See Plan Book)

DOCUMENTS:
Health Certificate.
Crew List.
Derat Certificate.
Ship's Register.
PILOTAGE: Skudefjorden Pilot Station, Tel: 047-58337 (or pilot boat "Skudefjord" on VHF). Kvitsoy, position Lat. 59° 05′ N., Long. 05° 20′ E.
ANCHORAGES: Safe anchorages everywhere in Sauda Harbour area.
RESTRICTIONS: No restrictions on night entry – but Sea Pilots usually refuse to take in vessels over 10,000 d.w.t. between 1800 hrs. and 0600 hrs. during Winter time, October-March.
MAX. SIZE: *Sauda Smelteverk A/S* (Private Quays): Draft 30 ft. – but vessels over 30 ft. are allowed to get alongside at owner's own risk. Length no restriction. Breadth, 75 ft.
Official Quays: Length of quays – 230 ft. and 200 ft. Max. draft 13 ft.
RADIO: Cable Agents giving ETA, draft and cash requirement via Rogaland Radio.
VHF: VHF installed in Agents office, Channels 16 and 9.
TUGS: Not necessary.
BERTHING: May take place at any time provided quay available.
(1) Import Quay: 250 m. long. 2 unloading towers with a capacity of about 3,500 tons ore per day.
(2) Export Quay: 115 m. long. 2 loading cranes with a capacity of about 1,600 tons ferro alloys per day. One loading machine with capacity 400 t.p.h.
STEVEDORES: Ordered by Agents. Normal working hours 0700 – 2300. Saturdays and Sundays – No work.
MEDICAL: Masters to advise by radio prior arrival if medical attendance required aboard. Modern hospital.
DENSITY: Brackish in port area, average salinity 2.39%.
FRESH WATER: Good fresh water available, delivery irrespective of quantity.
FUEL: No fuel available at Sauda, must be ordered from Stavanger.
GANGWAY/DECK WATCHMEN: Available, but not compulsory.
OPENING/CLOSING HATCHES: Crew allowed to open and close.
CERTIFICATES: Registered Tonnage Certificate required.
CUSTOMS ALLOWANCES: Master: 400 cigarettes or 400 gm. tobacco, 2 litres spirits/wine.
Crew: 200 cigarettes or 250 gm. tobacco, 1 litre spirits and 1 litre wine.
CARGO GEAR: No additional requirement.
IDENTIFICATION CARDS: Not necessary. Crew list at gate.
CONSULS: No consulates at Sauda. Nearest in Stavanger.
REPAIRS: Minor repairs possible.
DRY DOCKS: No dry dock at Sauda. Nearest in Stavanger and Haugesund.
REPATRIATION: Repatriation may take place.
AIRPORT: Stavanger and Haugesund.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: New Year's Day; Maundy Thursday; Good Friday; Easter Monday; Labour Day (May 1st); National Day (May 17th); Ascension Day; Whit Monday; Christmas Day; Second Christmas Day (December 26th) (no work on these days).
POLICE/AMBULANCE/FIRE: Police 93266; Ambulance 92811 or 92511; Fire 93222
TELEPHONE: Not available to vessels.
REGULATIONS: Strictly prohibited throw wastes or garbage into sea within port area, fjords and on Norwegian coast.
DELAYS: All vessels loaded/unloaded in turn, very seldom any congestion in port.
AUTHORITY: Sauda Havnevesen, Raadhusgaten, N-4201 Sauda, Norway. *Tel:* 047-92585. *Contact:* Henning Hansen, Harbour Master.
AGENT: Sauda Skipsekspedisjon A/S, P.O.Box 111, N-4201 Sauda. Cables: Saudex. Telex: 40947 Agent N. Tel: 047-92415, 047-92260 or 047-92586. Office hours: 0830 – 1600 local time. Telephone after office hours: 047-93019 (Capt. Aaker). VHF Channels 16 and 9.

SKIEN (incl. Menstad and Vollsfjorden): 59.12 N. 09.38 E.

DOCUMENTS:
Clearance documents, forms obtainable from Customs Officers on arrival.
Derat Certificate.
Bill of Lading.
Manifests.
2 Crew lists.
Ship's Register.
PILOTAGE: Ship's Agent gives ETA pilot station 24 hours before arrival and direct to Pilots 2 hours before arrival. Telegraphic address: Pilot station, Langesund. VHF Channel 16 to be used when contacting Pilots. Pilot boards at Steingrunnen light buoy, Langesund Bay, (58° 55′ N., 09° 44′ E.). Flag, sound and morse signal "G". Pilotage compulsory for all foreign vessels but dispensation can be obtained for smaller Scandinavian vessels.
MAX. SIZE: Between Porsgrunn and Skien, Norsk Hydro have loading place, Menstad, for vessels up to 425 ft. length and max. draft 18.5 ft. Between Menstad and Skien Grain Silo for vessels with max. length 425 ft. and max. draft 18 ft. 06 in. At Skien vessel's length must not exceed 335 ft. and max. draft 18 ft. 06 in.
RESTRICTIONS: No restrictions on night entry for vessels of above mentioned sizes.
BRIDGES: On passage from sea, vessels pass Porsgrunn where there is a lifting bridge with breadth 30 m. Signals for passing bridge inward: 1 long and 2 short sound signals. Outward signals, 1 long and 1 short sound. There is also a bridge at Brevik: Max. height 45 m.
RADIO: Tjome Radio/LGT or Farsund Radio/LGZ.
TUGS: Modern tugs available.
BERTHING: Also see "Max. Size".
Vollsforden:
Bridges: From sea vessels pass Brevik Bridge, max. height 45 m.
Overhead Cable: At Kjeoya there is an overhead cable which permits an airdraft of max. 37 m.
Tugs: A number of modern tugs are available.
Berthing: 2 quays, No.1; length 135 m. (Ro-Ro facilities with ramp of 20 m. breadth in operation) depth from 8.5 m. to 11 m. No.2; length of quay 125 m. but open to sea with mooring pillar at 250 m. from ro-ro ramp. This quay has Ro-Ro facilities with ramp of 30 m. breadth, and depth of 11 m. for full length.
Cranes and Ro-Ro Materials: No stationary cranes, any size of mobile crane and floating cranes up to 250 tons available. Container truck of 30 tons and 22 tons lift/capacity, 2 Tugmasters of 21 tons towing power. Forklifts from 3 – 6 tons, Warehouse 6,000 sq.m. Unlimited open space.
Density: Practically fresh water.

DENSITY: At Menstad and Skien practically fresh water.
STEVEDORES: Ordered by Agents.
FRESH WATER: Obtainable.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: By crew or stevedores.
CUSTOMS ALLOWANCES: 400 cigarettes and 4 bottles spirit for the Master. 200 cigarettes and half a bottle spirit for each crew member.
CONSULS: Belgium, Netherlands, Sweden, Germany, Finland.
REPAIRS: All repairs possible. Dry dock: Lifting capacity: 2,000 tons. Radar/radio services can be arranged through Agents.
MEDICAL: All medical assistance to be arranged via Agents.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: New Year's Day; Maundy Thursday; Good Friday; Easter Eve (half day); Easter Monday; Labour Day (1st May); Ascension Day; National Holiday (17th May); Whit Monday; Christmas Eve (half day); Christmas Day; (26th December), New Year's Eve (half day).
REPATRIATION: Facilities exist for effecting crew changes and repatriation.
AIRPORT: International at Oslo and Skien airport.
AUTHORITY: Skien Havnevesen, Postboks 1234, 3701 Skien, Norway. *Tel:* 035-95435. *Mobile telephone:* (094) 50439. *Telex:* 21160 Sterm-N. *Contact:* P. Hagen, Harbour Master.

SLAGEN: 59.20 N. 10.31 E. (See Plan Book)

LOCATION: A/S Norske Esso's Slagen Refinery is located on the West coast of the Oslo Fjord near Tonsberg, about 20 miles from the Ferder Light House. The Marine Terminal, a finger pier, is located at Slagentangen, near the refinery.

DOCUMENTS:

Ship's Register (Certificate)	(For Customs examination)
Derat Certificate	(For Customs examination)
Health Declaration	(For Customs examination)
Cargo Manifest	(For Consignee)
3 Copies Provision List	(For Customs information)
3 Copies Crew List	(For Customs and terminal information)
1 Copy Personal Effects List	(For customs information)

NOTE: Crew list to show date and place of birth for each crew member.

PILOTAGE: Pilotage is compulsory for all foreign flag ships. The pilot boats lay in a harbour on Hvasser Island from where a radar and VHF watch is kept. The pilot station listens out on Maritime Channel 16 and when your ship is about 10 miles from Ferder Island (Store Faerder) contact should be made. You will be given instructions as to where and how the Pilot will board. The Pilot boards East of Ferder Island from a 20 m. long white boat marked LOS and capable of doing 18 knots. In bad weather, ships of less than 10,000 d.w.t. may have to proceed in as far as Fulehuk before a Pilot can board.

The pilotage service is provided by the Norwegian Government. There are about 50 Pilots all recruited from the Norwegian Merchant Navy after they have obtained a 1st Mate's licence. Only Pilots with at least 10 years service pilot large tankers.

Berthing Pilot: A Berthing Pilot will board off Lysboye from one of the berthing tugs. He will come equipped with a portable VHF set with which to talk to the tugs and will also advise mooring procedures.

The Berthing Pilots are also Norwegian Government Pilots from the Horten Pilotge District. There are only 3 Pilots, all senior men recruited from other pilotage districts and their experience factor is high.

APPROACHES: The approaches to the Oslo Fjord via the Skagerrak are free of any particular navigational dangers and there is deep water close to the Norwegian coast.

Tankers of 40,000 d.w.t. or larger are requested to keep a minimum distance of 15 nautical miles off the Norwegian coast until entrance to the Oslo Fjord, where traffic separation scheme is in force inside territorial waters.

There are no particular navigational difficulties in the Oslo Fjord, all depths of less than 35 m. (115 ft.) can be easily avoided.

Deep draft vessels (40,000 d.w.t. and larger) in fully loaded condition, should exhibit the internationally recognised 3 red vertical lights at night and a black cylinder by day, indicating that the vessel is hampered in her ability to comply with the Steering and Sailing Rules and that other vessels should not impede her safe navigation in the Fjord.

Navigation Aids:
Norske Esso has provided two leading light/marks, one on the jetty itself and one on shore at Stubrekk. These lights when in line bear 309° true and mark a deep approach (least depth 25 m., 82 ft.) between Lysboye and the Slagen Terminal jetty.

ANCHORAGE: North of pier head. Particulars regarding anchorage will be given by Pilot.

MAX. SIZE: Tankers up to 350 m. length and 66 ft. draft can be berthed. Berth No.1 designed for vessels 250,000 d.w.t. Depth of water alongside 69 ft.

HEALTH: Clearance is effected on arrival. International procedure followed to obtain Pratique. In case suspected disease or fever on board inform port authorities in advance.

RADIO: 72 hours prior to arrival at pilot station, radio Agent ETA, cash, bunkers, personnel, bonded stores, or other special requirements. ETA should be repeated 48, 24 and 12 hours prior arrival pilot station. All radio messages should be transmitted via Rogaland Radio, and when within closer range via Tjome Radio. When Pilot has embarked, contact should be established with Slagen Harbour Office via VHF Channel 16 or 14 for exchange of information prior to berthing, such as berth availability, current, wind, draft, ballast to be discharged, etc.

TUGS: A total of 8 tugs ranging from 1,100 to 5,200 b.p.h. can be made available to shipping at Slagen. However, none of the tugs are normally stationed at the terminal, except when a vessel of 20,000 d.w.t. or larger is discharging or loading. On such occasions one or two tugs will be kept on stand by at the terminal. If additional tugs are required they must be ordered from Horten or Oslo.

The number of tugs required for berthing are ordered by the Agent in accordance with the berthing Pilot's advice. All tugs are diesel powered, single screw, single rudder and suitable for towing on the hook or alongside. When on the hook, ship's towlines are used.

The tugs are normally made fast enroute between the Slagentangen light buoy and the terminal.

Communications: All communications between Pilot and tugs will be made over the Pilots' portable VHF. Should there be any breakdown, ship's whistle will be used. It is very important that communications within the ship between bridge, forecastle head and poop be good, particularly on the larger ships.

BERTHING: The main effect on ship handling in the berth approaches comes from the current, which for most of the time sets S.E. across the jetty which is aligned N-S. Ships berthing on the West side of the jetty (Berths 2 and 3) will tend to set down onto the berth. The marine terminal has a current speed and direction meter and advises the Pilot.

A submersible oil boom enclosing the pier is anchored on the sea bed, and the boom and its system of anchorage will be damaged if vessel's anchors are dropped in the shaded area on plan. *Except in emergency situations anchors should not be used within the shaded area.* Manoeuvres to and from the berths should be discussed with the Harbour Office which will give you information on currents.

Ice affects navigation at the terminal about every 6 years, and Pilots use special manoeuvres to deal with ice situations.

The Terminal: The terminal consists of a finger pier. On the East side (Berth No.1) the water depth is 21 m. (69 ft.) and vessels with max. length 365 m. (1200 ft.) and max. draft 20.1 m. (66 ft.) can be accommodated. On the West side (Berth Nos. 2 & 3) there is a water depth of 11.5 m. (37 ft. 9 in.). The West side is mainly used for coasters and barges, but vessels up to a max. length of 192 m. (630 ft.) with max. draft 10.6 m. (34 ft. 9 in.) can also be accommodated on this side of the pier.

Fendering: On Berth No.1, the breasting face is protected with timber-faced gravity fenders and timber-faced panels backed by laminated rubber units. Berths Nos. 2 & 3 are fendered with timber-faced panels backed by rubber tubing.

Limitation on Berthing Speeds/Angles: On Berth No. 1, the *maximum* speed of approach ranges from 8.15 m. (26.5 ft.) per minute for a fully loaded 100,000 d.w.t. tanker to 5.19 m. (17 ft.) per minute for a fully loaded 250,000 d.w.t. tanker. (See Plan). For the larger tankers, the target should be 1 m. (3 ft.) per minute. The speed of approach is monitored by Doppler Radar and the Pilot is kept frequently informed of the speed. The angle of approach should be as small as possible, a parallel landing being the target.

Berthing: Tankers for Berth No. 1 are usually berthed port side to, by paying off the bow to starboard and having tugs push the ship bodily, against the prevailing current, on to the berth. Headlines are usually run out first to the Northern-most dolphin.

The larger ships berthing on Berths Nos. 2 and 3 usually go port side to berth with tugs on the hook holding the ship off against the current. The approach to Berths Nos. 2 and 3 is normally facilitated by the fendered sliding front.

Moorings: Moorings are taken ashore by mooring boats and lifted onto dolphin/jetty by power capstans.

Shore Moorings Used: On Berth No. 1 a 48 mm. (1.875 in.) diameter shore-based mooring wire is placed on board large tankers as an extra aft back spring. The wire has an eye which is put over the bitts after being taken on board by rope messenger. No shore moorings are used on Berths Nos. 2 and 3.

Gangway: At Berth No. 1, near the Southern end of the breasting island, there is a telescopic hydraulic operated gangway reaching a deck height of about 22 m. above sea level. Also a portable gangway is available to accommodate handy size vessels. Whenever the latter one or when the vessel's own gangway is used, the vessel shall provide a safety net under the gangway, and a lifebuoy with not less than 15 fathoms of line attached should be positioned near the gangway for use in an emergency.

Cautionary Advice, Mooring Supervision: Breast moorings at the jetty have a scope of only 25 m. (82 ft.). The offsetting current at Berth No. 1 makes the tending of moorings during the discharge of a tanker with large light freeboard a very important operation and should only be done under the supervision of a ship's officer.

The area dredged to 21 m. is limited, and a VLCC needs to take care that it does not get too far to the South. When in position, there is 25 m. (82 ft.) clearance between the stern and the edge of the dredged area. It is for this reason a shore wire backspring is provided.

It is of the utmost importance that large vessels, in particular, are moored adequately and that moorings are carefully tended.

Before hard arms are connected, the ship's moorings and the mooring equipment are checked by the terminal personnel.

Special Regulations: If the wind speed reaches 20 knots or offsetting current reaches 0.6 knots, the discharge of a VLCC is stopped and the arms drained. All tank lids and ullage plugs must be closed and a tug will be ordered to stand by.

If the wind speed reaches 25 knots or offsetting current reaches 0.7 knots, the arms will be disconnected and the ship ordered to stand by for possible departure.

Weather forecasts in addition to actual current and wind velocity readings are available from the terminal office.

Preparation of Manifold Area: All crude ships should arrive with manifold stripped to the outboard 12 in. flange. All derricks, stays, radio aerials, etc. should be removed from the vicinity of the manifold to be used.

Ullaging, temperatures, water finding, etc.: On arrival ullages, temperatures and water dips should be taken by ship's personnel in co-operation with terminal representative. Vessel equipped with an inert gas system will be requested to depressurize tanks sufficiently to allow for sampling, ullaging, temperature and water dipping on arrival, and for checking of oil and residues left on board after completion of discharge.

Deballasting Facilities: All ballast must be pumped ashore unless from segregated tanks. Maximum quantity receivable, if advanced notice given, is 12,000 cu.m.; any quantity greater than this will cause delays.

Restriction on concurrent loading, discharging, ballasting, deballasting. Max. back pressure at ship's manifold:

No concurrent loading, discharging, ballasting, deballasting is allowed unless the two systems are entirely separate. Should a discharging ship require to reduce her freeboard due to weather or hard arm/hose limitation, she will be required to stop all cargo operations while ballast is taken on. The responsibility for ensuring remaining cargo is not contaminated by water rests with the ship. Maximum back pressure at ship's manifold is 10.55 kg./sq.cm. (150 p.s.i.).

HOSES:

Grades of Cargo, Bunkers Handled, Connections and Lines:

Crude oil and most grades of clean and dirty products and pressurized LPG are handled at the terminal.

Berth No. 1: Crude oil is received/shipped via 4×12 in. fully counterbalanced hard arms with 12 in. ASA flanges. Maximum pressure at ship's rail 12 kg./sq. cm. (170 p.s.i.).

Clean products are handled through 2×10 in., dirty products through 1×10 in. and bunkers through 1×8 in. all fully counterbalanced hard arms. The 8 in. bunker arm can also be used for loading dirty products. LPG is handled through 1×3 in. hose or through 1×4 in. half hose half metal arm.

Berth No. 2: Dirty products are handled through 1×10 in. and 1×6 in., clean products through 2×8 in. all half hose half metal arms. Also 1×12 in. fully counterbalanced hard arm for clean products.

Berth No. 3: (Coaster berth). Dirty products are handled through 1×6 in., clean products through 1×6 in. and LPG through 1×4 in. all half hose half metal arms.

All flanges are to ASA Standard.

There are no check (non-return) valves in the import lines; and, therefore, the contents of shore tanks which are situated on high ground will flow back into ship if allowed to do so.

The crude oil discharge rate is up to 10,000 t.p.h., 1 booster pump of 400 cu.m./hr. capacity is used on steam cracked naphtha imports.

BALLAST: Shore ballast capacity 100,000 bbls. All ballast to be discharged ashore.

MEDICAL: Medical attention and hospital facilities available.

DENSITY: 1017 – 1020.

FRESH WATER: Fresh water is available ex-jetty at a rate of 30 cu.m. an hour. Water is supplied by 2 in. hose and is metered. Cost is $1 per ton. Quality is good. Quantity required must be included in arrival cable.

Distilled Water: Distilled water is not normally available and can only be supplied with great difficulty. Maximum notice must be given. It is expensive.

FUEL: All main grades of bunkers, lubricants and hydraulic oils are available. Quantities and specification required must be included in the cable of advice of ETA. Lubricants and hydraulic oil are available in bulk as well as barrels.

FIRE PRECAUTIONS: Special safety regulation forms given when berthed.

GANGWAY/DECK WATCHMEN: Oil Pollution/Safety Inspector placed on board all vessels over 20,000 d.w.t.

CUSTOMS ALLOWANCES: 200 cigarettes/or 200 gm. tobacco and 1 bottle spirits for each man.

IDENTIFICATION CARDS: Gate pass delivered to ship when berthed.

CONSULS: Denmark, Finland, France, Great Britain, Netherlands, Spain, and Sweden have representatives in Tonsberg. W. German Consul in Sandefjord. All countries represented in Oslo.

REPAIRS: All kind of ship repairs can be undertaken by nearby ship yards. Service for radio, gyro, radar, echo sounder, data bridge, etc. available. Also classification surveyors representing NV, LR or AB can be called upon.

No ship may immobilise its engines, steering gear, etc. while alongside the Slagen jetty.

DRY DOCKS: Available at Sandefjord about 35 miles from Slagen.

REPATRIATION: Changes of crew are available. Transportation by train and plane from Oslo (about 100 km. from Slagen), passenger lines from Oslo. Hotel accommodation available at Tonsberg (10 km. from Slagen).

TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.

HOLIDAYS: New Year's Day; Maundy Thursday; Good Friday; Easter Monday; Labour Day (1st May) 17th May; Ascension Day; Whit Sunday and Whit Monday; Christmas 25th and 26th: Discharging/loading all days.

POLICE/AMBULANCE/FIRE: Ambulance/Fire local at the refinery. Police Tonsberg 13355.

TELEPHONES: Available at berth.

SERVICES: Tanker cleaning services available at Horten, about 15 miles from Slagen.

GENERAL: *Safety:* A safety inspector will attend the vessel upon arrival, complete a safety check-list and remain on board during cargo and bunkering operations.

Oil Pollution, Clean-Up Facilities: A very serious view is taken of oil pollution of Norwegian coastal waters and every effort must be made to prevent it.

Should oil pollution occur, it must be reported and tackled at once.

The terminal has supplies of oil dispersant, spill booms, sawdust and two mechanical removal devices. These will be used to combat any oil pollution and costs will be billed to the ship if the ship is responsible for the pollution.

Firefighting Facilities: The terminal is equipped with comprehensive fire fighting facilities including an 800 cu. m./hour fire pump, a supply of foam compound, remote-controlled elevated foam cannons and other fire hydrants, hoses, etc. A tug which stands by the terminal has fire fighting facilities and other fire fighting tugs can be summoned in an emergency.

Shore Steam, Shore Electricity: Normally not available.

Stores: All regular ship's stores, laundry and other similar facilities can be supplied by local ship's chandlers.

Tank Cleaning: Tank cleaning and gas freeing are not allowed alongside.

SHORE LEAVE: Shore passes are issued on board on arrival and each crew member must be in possession of a shore pass before he goes ashore.

AUTHORITY: A.S. Norske Esso, P.O.Box 388, N-3101 Toensberg, Norway. *Tel:* 033 – 30080. *Telex:* 21558 ERAFF N. *Cables:* Essoship. *Contact:* Thor Gran, Harbour Master.

AGENCY: Several shipbroker firms are established in Tonsberg and may be called upon as acting Agents for owners and/or charterers. A/S Norske Esso, S & T Dept. act as general Agent for all Exxon owned tonnage, cable address "Essoship" Tonsberg.

STAVANGER: 58.58 N. 05.44 E. (See Plan Book)

DOCUMENTS:

Declaration of Health, 1 copy.

List of Goods, including stores, 1 copy.

Crews Lists of Goods liable to duty, 1 copy.

List of Goods, 2 copies for each port of discharge. All Bills of Lading to be entered with marks, numbers, weight and quantity.

General List of Goods, one copy.

A form for entering ports of call where discharging will take place.

PILOTAGE: Vessels approaching from sea and desiring a Pilot should order at least 24 hours' notice in so far as possible and confirm arrival at Pilot station at 2 hours' notice. Advance order can be sent in following manners:

(a) From ships at sea over radio direct to Sea Pilot watch (calling frequency 2182 kHz, from 2 minutes past until 10 minutes past each full hour, or over VHF radio-telephone calling, frequency 156.80 MHz; Channel 16).

(b) From ships at sea over coastal radio station to pilot station or pilot office.

(c) From broker or shipowner over telephone to sea pilot station or to any pilot office which will immediately convey report to sea pilot station.

Vessels lying in port and desiring Pilot will order Pilot from nearest pilot office during its office hours and if possible at 4 hours notice.

Vessels approaching from sea as well as vessels lying in port shall when making an advance order state name and destination of vessel and whether 1 or 2 Pilots are desired.

Pilot will be despatched to ships in accordance with advance orders, and vessels are therefore requested to comply with foregoing rules as far as possible in order to avoid having to wait for Pilot.

International provisions for summoning Pilots by signal flags or blue lights, etc., are still in force, but should in future be used as a supplement to radio communications or as sole communication in emergencies.

Pilots are taken on board at:

A. Feistein Lighthouse, 19 miles South of Stavanger, or in bad weather 6 miles North of lighthouse under the lee of Rott.

B. Skudefjorden, 18 miles N.W. of Stavanger. In bad weather under the lee of Karmoy or Kvitsoy, as weather permits.

Pilot boats are stationed at Tananger and Skudesneshavn. No boats are out cruising.

ANCHORAGE: Found in the Byfjord, 3 nautical miles North of Stavanger. Pilots recommended when anchoring.

MAX. SIZE: Largest depth alongside goods and passenger quays is 30 ft. Depth alongside oil refinery 16.5 m. Max. draft for tankers, 48 ft.

BERTHING: The port has a total quay length of approximately 3,400 m. The coasting and the foreign trade is located in the East and West harbour, comprising the 3 main quays namely the Bekhus Quay, the Skagen Quay and the Strand Quay. These quays measure 2,000 m. with depth alongside 24 ft. – 30 ft. The quays are equipped with 1×60 tons portable crane and 4×3 tons travelling cranes. A floating crane with a lifting capacity of 100 tons available.

Grain: Rogaland Felleskjop: Capacity for storing 72,000 tons quay length 190 m., depth alongside 48 ft. Discharging capacity 200 t.p.h. Stavanger Havnesilo: Storing capacity 140,000 tons, quay length 170 m., depth alongside 51 ft. Discharging capacity 500 t.p.h.

Roll-on/Roll-off: Traffic is offered by a ferry berth constructed for ships up to 10,000 g.r.t., depth alongside 30 ft.

Containers: Sandvika Container Quay. Length 170 m., depth alongside 40 ft., also fitted with Ro/Ro facilities for vessels up to 20,000 g.r.t.

Offshore oil-exploration bases: Aker-Norsco A/S at Risavik, Tananger, North Sea Exploration Services A/S, Dusavik, Stavanger.

TANKERS: Discharge at Sola refinery terminal where there are 3 berths, depth alongside up to 16.5 m. It is intended to enlarge these facilities to accommodate 200,000 d.w.t. vessels with restricted draft.

Esso Norske: 3 nautical miles South of central harbour, depth alongside 45 ft.

Norske Shell A/S: 14 nautical miles S.W. of central harbour, depth alongside 38 ft.

Norske Braendselolje A/S: 7 nautical miles South of the central harbour.

Texaco Oil: 1 nautical mile from central harbour, depth alongside 25 ft.

A/S Kulimport: Coal and coke. Length of wharf 116 m., depth alongside 27 ft.

RADAR/VHF: Radar service for inner harbour.
TUGS: Normally used.
STEVEDORES: No particular ETA advices required.
MEDICAL: Agents should get advance notice to secure speedy service. Hospital facilities available.
DENSITY: 1025, no change in relation to state of tide.
FRESH WATER: Delivered from quay or from water boat.
FUEL: Normal grades available without advance notice.
GANGWAY/DECK WATCHMEN: Not required.
OPENING/CLOSING HATCHES: Usually carried out by crew.
CUSTOMS ALLOWANCES: Tobacco: 20 cigarettes per day. Wine and/or Spirit: 2 bottles of wine or 1 bottle of brandy.
CONSULS:

	Tel. No.		*Tel. No.*
Belgium	555334	Greece	525030
Denmark	57001	Iceland	532025
Finland	532030	Netherlands	520080
France	527500	Sweden	527500
West Germany	522594	United Kingdom	525801

REPAIRS: All kinds of repairs available.
DRY DOCKS: One, 545 by 75 by 24 ft. Marine slipway up to 1,500 d.w.t.
AIRPORT: 10 km. from port. Airlines to Continent, U.S.A. and U.K.
TIME: GMT plus 1 hour in Winter. Summertime GMT plus 2 hours from 6th April 1980 – 15th September 1980.
HOLIDAYS: 1st January; Maundy Thursday; Good Friday; Easter Monday; 1st May; 17th May; Whit Monday; Christmas Day and Boxing Day.
POLICE/AMBULANCE/FIRE: Police Tel. 534000; Ambulance 531000; Fire 522111.
TELEPHONES: There are arrangements for placing telephones on board.
SHORE LEAVE: No restrictions.
AUTHORITY: Stavanger Havnevesen, Nedre Strandtg. 51, 4000 Stavanger, Norway. *Tel:* 04532045. *Cables:* Stavanger Havnevesen. *Contact:* Bergsvik Edgard, Harbour Master.

SUNNDALSORA: 62.41 N. 08.36 E.

DOCUMENTS:
2 Crew Lists
2 Passenger Lists
Declaration of Health
General Declaration
Cargo List
Cargo Manifest
Personal Effects List

PILOTAGE: Telegraphic address of Pilot Station: "Grip Pilot". Description of Pilot Boat: White hull, orange wheelhouse, length 43 ft., speed 18 knots. The Pilot has to be taken on board 1 nautical mile East of Grip Lighthouse (Lat. 63° 14′ N., and Long. 07° 37′ E.), no alternative area. No anchorage for vessel awaiting Pilot.
ANCHORAGE: Poor conditions in the Sunndalsfjord. Possible to anchor at Freifjord and Bolgsvaet West of Kristiansund.
RESTRICTIONS: No restrictions.
MAX. SIZE: Max. draft 31 ft. 06 in.
HEALTH: "Declaration of Health" to be issued before arrival.
RADIO: Rogaland Radio and (20–30 hrs. before arrival) Alesund Radio.
VHF: For inner harbour on Channel 16 (normally in use when mooring).
RADAR: No Port Radar Service.
TUGS: Not available in Sunndalsora. Nearest Alesund, steaming time about 12 hours. Tugs only required when Pilot/Master find it necessary.
BERTHING: Length of quay: 1,007 ft. Max. draft 31 ft. 06 in. Load/discharge normally by shore equipment.
CRANES: 1×10 tons, 1×15 tons, 1×25 tons and 1×50 tons.
BULK CARGO FACILITIES: 1 grab crane 280 t.p.h.
SPECIALISED CARGO HANDLING FACILITIES: None.
BRIDGES: None.
STEVEDORES: No notice required.
MEDICAL: Doctors available in Sunndalsora. Nearest hospital: Kristiansund or Molde (60 miles from Sunndalsora).
TANKERS: The usual rules for tankers to be complied with.
DENSITY: Average density of the port 1019 – 1020.
FRESH WATER: Available.
FUEL: Available in smaller quantities (from Mobil and BP).
FIRE PRECAUTIONS: No specific precautions.
CONSULS: None. Nearest at Kristiansund: Great Britain, Denmark, Finland, France, Netherlands, Portugal, Sweden, West Germany.
REPAIRS: Only small repairs can be carried out.
DRY DOCKS: None.
SURVEYORS: Nearest Kristiansund (Norske Veritas) and Bergen (Lloyd's).
GANGWAY/DECK WATCHMEN: Not required.
HATCHES: Opening/closing to be carried out by crew.
CUSTOMS ALLOWANCES: Quantity permitted for each Crew member to be held out of bond: 200 cigarettes or 200 gm. tobacco, 1 bottle spirit and 1 bottle of wine.
CARGO GEAR: Load /discharge effected by shore gear.
REPATRIATION: Crew changes and repatriation possible.
AIRPORT: Kvernberget (Kristiansund) and Aro (Molde), both at 60 miles distance and with regular air service.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: May 1st and May 17th. No cargo work can be arranged on those days.
POLICE/AMBULANCE/FIRE: Police Tel.: 91166, Ambulance (doctor) 91479, Fire 91122, Lifeguard 91933.
TELEPHONE: On request, telephone may be rented from Ardal og Sunndal Verk a.s.
SERVICES: Not available. Nearest Kristiansund or Molde.
SHORE LEAVE: Crew members allowed ashore.
IDENTIFICATION CARDS: Ardal og Sunndal Verk a.s. demands identification cards, obtained from Dock Master.
REGULATIONS: Forbidden to take photographs within boundaries of Ardal og Sunndal Verk a.s.
DELAYS: Usually no delay if notice of arrival given to Agent in good time.
GENERAL: No cargo on Saturday and Sunday.
DEVELOPMENTS: No developments expected in foreseeable future.
AUTHORITY: Sunndal Verk A/S, 6600 Sunndalsora, Norway. *Tel:* (073) 91011. *Telex:* 55222 Sual N. *Cables:* Ardalverk, Sunndalsora. *Contact:* Eilif Gran, Tel: (073) 91011, ext. 330.

SVOLVAER: 68.14 N. 14.35 E.

DOCUMENTS:
2 Crew Lists.
2 Passenger Lists.
Custom Documents.
Stores List.
Manifest.
Bill of Lading.
Ship's Papers.
Valid Derat Exemption Certificate.

Ships arriving from Finland, Denmark, and Sweden need Customs permit from last port.
PILOTAGE: Vessel approaching Svolvaer may call Bodo Radio, 2182 kHz. by radio asking for Svolvaer harbour pilot. Telegraph ETA Svolvaer 24 hours before arrival. All communication with harbour pilot boat on VHF Channels 16 and 12. Exact position for pilot boat is Lat. 68° 11′ 13″ N., Long. 14° 36′ 00″ E. Different types of pilot boats are used, but usually the pilot boat flies pilot flag. No special requirements for boarding, except usual pilot ladder.
ANCHORAGES: Boundaries for safe anchorage Lat. 68° 13′ 36″ N., Long. 14° 37′ 00″ E.; Lat. 68° 13′ 48″ N., Long. 14° 36′ 12″ E. Depth in area about 25 fathoms.
MAX. SIZE: Max. permissible length 520 ft., draft 30 ft.
HEALTH: Pratique is automatic, given by radio. Vessel only required fly yellow flag. In event of any suspected disease or fever on board call Svolvaer Harbour Master by telephone via Bodo Radio (2182 kHz).
RADIO: Call Bodo Radio by R/T 2182 kHz or VHF-Channel 16. Svolvaer Harbour office VHF-Channel 16/12.
TUGS: Small tugs available.
STEVEDORES: All information regarding gangs, loading and discharging rates can be obtained by calling ship's Agent in Svolvaer via Bodo Radio.
MEDICAL: Hospital facilities available.
TANKERS: There are 2 discharging berths for oil carriers in Svolvaer. Diameter of lines at B.P. berth 6 in. and 8 in., at Shell 8 in. At the Shell berth tankers moor stern to and discharge through stern lines.
DENSITY: Density in port is 1025.
FRESH WATER: Delivered from piers by hose with a rate of about 20 t.p.h. Water is also available at B.P. berth.
FUEL: All kinds of fuel oil are available.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally done by ship's crew but can also be done by stevedores.
CERTIFICATES: Ship's Register.
CUSTOMS ALLOWANCES: Tobacco: Quantity for each crew member is 20 cigarettes or 20 gm. tobacco and 20 leaves cigarette papers per day. Wine and/or Spirit: For crew members 1 bottle spirit or wine (0.75 litre) for each passenger 0.25 litre.
IDENTIFICATION CARDS: Not required.
CONSULS: Swedish and Italian consulates.
REPAIRS: Nearly all types of engine and deck repairs. Both for internal combustion and turbine engines.
DRY DOCKS: No dry docks in port, only slipways for ships up to 240 ft.
REPATRIATION: Facilities for effecting crew changes are available.
AIRPORT: 4 km. from town. Nearest main airport is Bodo.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: Official holidays stated by Norwegian Government.
POLICE/AMBULANCE/FIRE: Tel. 70177.
TELEPHONES: Telephones on pier.
SERVICES: Compass adjusting.
GENERAL: Svolvaer is the main port in Lofoten Island, and a typical fishing harbour. Radar, Decca, Radio and VHF service, and all other electrical services can be executed.
AUTHORITY: Svolvaer Havnevesen, P.O.Box 121, 8301 Svolvaer, Norway. *Tel:* 088-71011. *Cables:* Harbourmaster. *Contact:* Eilif Mosand, Harbour Master.

THAMSHAVN (Thamshamn): 63.20 N. 09.52 E.

DOCUMENTS:
Health Certificate.
Crew List.
Passenger List.
Store list.
Bill of Lading.
3 Manifests.

PILOTAGE: 24 hours prior arrival Grip, Pilots can be ordered by cable to "Loskontoret, Kristiansund N." or by telephoning Kristiansund Pilot Office, tel. 74333 during office hours, and 74595 private. Pilots can also be ordered by radio through Kristiansund Radio or through Agents. Use Channel 16 for VHF., contact to Kristiansund Pilot Office, or pilot boat. Pilot boat equipped with radio telephone 2182, carries red and white flag during day and white and red light during night.

ANCHORAGES: Vessels should anchor 150 m. off piers where depth between 26 m. and 30 m. Anchoring between piers and buoys is not permitted.
MAX. SIZE: Depth at Import Quay 24 ft. MLW. Ships of 28 ft. draft can load at Pyrites Quay.
RADIO: Vessel should route ETA cables to Agent through Rogaland Radio or Aalesund Radio.
TUGS: No tugs needed or available.
BERTHING: Berthing only between 0700 and 2400 hrs.
CARGO HANDLING: 1 berth is specially equipped for handling of concentrates in bulk. Ships of 28 ft. draft can load at the pyrites quay. Loading by conveyor. There are no berths equipped for containers or Ro-Ro traffic, nor berths handling liquid chemicals or LPG carriers.
STEVEDORES: Arranged by Agent. No ETA to stevedores necessary.
MEDICAL: Hospital facilities available.
FRESH WATER: Available, delivered at berth.
FUEL: No fuel supplies available. Nearest port for such supplies is Trondheim.
GANGWAY/DECK WATCHMEN: Not compulsory, and this service is left to the discretion of the Master.
OPENING/CLOSING HATCHES: By crew.
CERTIFICATES: Ship's Register.
CUSTOMS ALLOWANCES: Each crew member allowed 20 cigarettes on shore. When leaving ship, 200 cigarettes and 1 bottle of wine and 1 bottle of spirit permitted.
IDENTIFICATION CARDS: Not required.
CONSULS: Nearest consul available in Trondheim.
REPAIRS: Only small repairs can be carried out.
DRY DOCKS: None.
AIRPORT: Nearest airport, Vaernes, 62 miles N.E. Served by regular airlines with several flights per day.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: January 1st; Easter Holidays; Ascension Day; Whit Monday; 1st and 17th of May; December 25th and 26th.
POLICE/AMBULANCE/FIRE: All mentioned services obtained through Agent or by contacting local telephone exchange.
TELEPHONES: No facilities for placing telephones onboard ships.
BANKS: Forretningsbanken A/S, 7300 Orkanger, Norway.
SERVICES: Provisions available.
SHORE LEAVE: Permitted.
AUTHORITY: (Private Wharves): Orkla Metal A/S and Co., P.O.Box 10, 7301 Orkanger, Norway. *Tel:* (074) 80400. *Telex:* 55628. *Cables:* Orkla, Orkanger. *Contact:* Mr. A Lauritzsen, Shipping Manager.

TONSBERG: 59.16 N. 10.25 E.

DOCUMENTS:
Ship's Register.
Crew Lists.
Customs Manifest for each crew member (cigarettes, spirits, etc.).
Store List. Cargo Papers. Health Certificate.
PILOTAGE: Sea Pilots obtainable from Ferder Pilot Station. Pilots normally take vessels to berth.
ANCHORAGES: Good anchorages at Byfjorden and Traela; anchorages for large vessels are found in Narverodbukten and Husoyflaker.
MAX. SIZE: 18 ft. draft for East entrance and 24 ft. draft for West entrance. Up to 30,000 tons in ballast.
RADIO: Cable ETA via Tjome Radio prior arrival.
TUGS: Available.
BRIDGE: 1 bascule bridge over East entrance. Working days open 0600 to 2100 hrs., holidays 0900 to 1700 hrs. Signal 1 long and 2 short to open bridge. Opening can also be arranged by VHF during night-time. Horizontal clearance 88 ft., depth 22 ft.
Pleasure craft have to pay dues before bridge opens.
MEDICAL: Medical, dental and hospital facilities available.
DENSITY: Occasionally brackish.
FRESH WATER: Available from hydrants at quays.
FUEL: Delivered by lorry.
GANGWAY/DECK WATCHMEN: Available on request.
CUSTOMS ALLOWANCES: 200 cigarettes or tobacco and 1 bottle spirits, for each man.
CONSULS: (Vice-Consuls) France, Netherlands, Finland, Denmark, Sweden and Spain.
REPAIRS: All types of repairs available.
DRY DOCKS: At Kaldnesmek, a shipyard for total length of 515 ft. The shipyard is building ships up to about 50,000 d.w.t.
REPATRIATION: Available by train from Tonsberg, plane and passenger lines from Oslo (about 100 km. from Tonsberg). Fairly good hotel accommodation in Tonsberg.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: New Year's Day; Maundy Thursday; Good Friday; Easter Monday; Labour Day (1st May); 17th May; Ascension Day; Whit Monday, Christmas (25th and 26th December). Mostly no working.
POLICE/AMBULANCE/FIRE: Police 13355; Ambulance 13370; Fire 11656.
TELEPHONE: Lines available on board vessel.
SERVICE: Mostly all services or equipment available from Tonsberg or Oslo. Inform prior arrival.
SHORE LEAVE: Crew members allowed to go ashore.
DELAYS: Ice during January and February, but port kept open by ice breakers.
AUTHORITY: Tonsberg Havnekontor, 3100 Tonsberg, Norway. *Tel:* 033-11278. *Cables:* Tonsberg Havnekontor. *Contact:* Reidar Sturod, Harbour Master.

TROMSO: 69.39 N. 18.58 E.

DOCUMENTS:
Trade Certificate.
Tonnage Certificate.
Certificate of Nationality.
Number of Crew and Passenger Lists.
Customs and Health Documents.
Manifest and Bills of Lading.
PILOTAGE: Telegraphic address of pilot station is "Tromso Pilot Station". Order latest 12 hours before arrival.
ANCHORAGES: Depth at anchorage is 15 m. – 35 m.
RESTRICTIONS: No restrictions on night entry.
RADIO: Harstad Radio, all VHF Channels.
VHF: Harbour Office Channel 16 and 12. 20 miles from town.
TUGS: If necessary, join vessel North or South end of harbour.
BERTHING: Ships can berth at quay, depths up to 34 ft., lengths of quay 100 m. – 300 m. (New harbour, Breivika), equipped for container handling, truck 20 tons.
BRIDGES: Tromso Bridge, 60 m. wide, 36.5 m. high.
Sandnessundet Bridge, 120 m. wide, 41 m. high, min. dredged depth 10.4 m.
STEVEDORES: Ordered by Agent. No ETA to stevedores necessary.
MEDICAL: Master to advise by Radio prior to arrival if medical attention required aboard. Hospitals in town (University).
TANKERS: There are 4 oil berths:
Norol – 20 ft. depth.
Mobil Oil – 21 ft. depth.
Esso – 31 ft. depth.
Shell – 39 ft. depth.
FRESH WATER: Most berths supplied by pipe-line.
FUEL: All grades available.
FIRE PRECAUTIONS: Ordinary restrictions.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: Crew allowed to open and close.
CUSTOMS ALLOWANCES: Crew members 200 cigarettes or 20 cigars or 100 gm. tobacco, and 1 bottle spirits.
IDENTIFICATION CARDS: Not required. Seaman's book.
CONSULS:

Belgium	81074–82417	Sweden	85090–81336
Denmark	81148–82310	Germany	81088–85665
France	81144–85663	Italy	85040–82604
Great Britain	84050–82395	Netherlands	85040–82604

REPAIRS: All engine and instrument repairs. Shipbuilders' Yard.
DRY DOCKS: 4 slipways 80 ft. – 222 ft. 1 small dock.
AIRPORT: 5 km. from town.
TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.
HOLIDAYS: No work on New Year's Day and Christmas Day.
POLICE/AMBULANCE/FIRE: Police 85080; Ambulance 81113; Fire 004. Port Pilot Station 81191–82537.
SURVEYORS: Lloyd's, N.V.
SHORE LEAVE: Permitted.
REGULATIONS: Harbour Pilot compulsory. Max. speed in port waters 6 knots. Ships size passing Tromso Bridge max. 7,000 tons displacement.
DELAYS: Minor delays only.
SERVICES: Compass adjusting, stores, etc.
AUTHORITY: Tromso Havnevesen, P.O.Box 392, Kirkegt. 1, 9001 Tromso, Norway. *Tel:* (083) 81191. *Contact:* Captain Knut A. Mortensen, Harbour Master.

TRONDHEIM: 63.25 N. 10.24 E.

DOCUMENTS: See "Bergen".
PILOTAGE: Harbour Pilot: Havne Kontoret, Tel: 20233 and 28015 or VHF Channel 16.
RESTRICTIONS: The fjord is very deep and easy to enter. The channel is clear and ice-free throughout the year.
MAX. SIZE: Controlled by depth at berth.
HEALTH: Call "Havne Kontoret" by radio for Free Pratique.
RADIO: Orlandet Radio (also VHF).
TUGS: Arranged by Agent.
BERTHING:
Pier 1, Ro/Ro berth length 442 ft., depth 26 ft.

River Harbour	Quays	1–10	Depth alongside up to	26 ft.
Outer Harbour	,,	12–18	,, ,, ,, ,,	18 ,,

REPAIRS: All types of deck and engine repairs are possible.

DRY DOCKS: 1 available with capacity of 3,600 d.w.t. and a floating dock for vessels of 8,000 d.w.t.

REPATRIATION: Can be arranged.

AIRPORT: 35 km. away from port. Regular airlines.

TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.

HOLIDAYS: Christmas (2 days); Easter, (4 days); 17th May; Ascension Day; Whitsun, (2 days).

POLICE/AMBULANCE/FIRE: Police 27500; Ambulance 21-510; Fire 21-505.

SHORE LEAVE: Allowed.

DEVELOPMENTS: Plans for reconstruction of outer Basin with new bridges planned.

AUTHORITY: Trondheim Havnevesen, Havnekontoret, Havnegt 15, 7000 Trondheim, Norway. *Tel:* 28015. *Contact:* Einar Kjolsrod, Harbour Master.

VADSO: 70.04 N. 29.45 E. (See Plan Book)

DOCUMENTS:

Trade Certificate.
Tonnage Certificate.
Certificate of Nationality.
Number of Crew and Passenger Lists.
Customs and Health Documents.
Manifests and Bills of Lading.

PILOTAGE: Vessels approaching from sea and desiring Pilot should order at 24 hours' notice and confirm arrival at Pilot Office, Vadso, a 2 hours' notice. The advance order can be sent over coastal radio station to Pilot Office, the Harbour Master, Vadso, Tel: Vadso 51235 or 51143. Harbour Pilot has to be taken on board in position Lat. 70° 45′ N., Long. 29° 41′ E. VHF Channel 16.

ANCHORAGES: Anchorage for vessels up to 400 tons in basin, with depths varying between 14 ft. and 21 ft. Larger vessels anchor West of the mole in 16 m. to 20 m. Outer harbour inside breakwater, inner harbour, further to East. Entrance to inner harbour is by buoyed and lighted channel 1,560 ft. long and 115 ft. wide, this has been extended by the addition of a fishery basin 750 ft. long 800 ft. wide. Outer harbour is 1,000 ft. long, 700 ft. wide, depths 15 to 30 ft.

MAX. SIZE: Max. length of vessel 300 ft. and breadth 45 ft. Draft 16 ft. Ship about 3,000 g.r.t.

HEALTH: Health documents necessary.

RADIO: Call Vadso Coastal Radio Station, through which contact by telephone Agent or Harbour Master or Vadso Harbour on VHF Channel 16.

STEVEDORES: Stevedores arranged. Agent Tel: 51395 Vadso.

TANKERS: Only small tankers can discharge. Discharging berth only for 500 g.r.t. tankers, draft 13 ft.

FUEL: Gas and diesel oil.

FRESH WATER: Water available on all quays.

GANGWAY/DECK WATCHMEN: Watchmen necessary. Master can use ship's crew as gangway and deck watchmen. Not necessary to use watchmen from the Watchmen Service.

CUSTOMS ALLOWANCES: Tobacco: Wine/Spirit: For 10 days, each crew 200 cigarettes, or 200 gm. tobacco. 0.25 litre spirit, for each crew member.

CONSULS: Finland, Tel: 51225 Vadso.

REPAIRS: Only smaller types of deck and engine repairs are possible.

AIRPORT: Vadso Airport 4 km. from port. Flights 4 times per day.

TIME: GMT plus 1 hour. GMT plus 2 hours in Summer.

POLICE/AMBULANCE/FIRE: Police 51271 or 51593 Vadso; Ambulance 51845 or 51691 Vadso; Fire 51122 or 51554 Vadso.

AUTHORITY: Vadso Havnevesen.

NOTES

Please also advise Shipping Guides Ltd.

Sultanate of Oman

GENERAL:

ANCHORING:

Notice to Mariners No. 1/84:

All vessels anchoring South of Latitude 24° parallel and within the territorial waters of Sultanate of Oman (12 miles), for the purpose of waiting for orders or in order to carry out engine repairs, should anchor within Lat. 23° 40′ N., and Long. 58° 10′ E. and Long. 58° 27′ E.

No vessel shall anchor in any other part of Mina Al Fahal except when actually loading/discharging on SBM buoys. All cargo ships should call at Mina Qaboos when handling cargo or at anchorage West of Fahal.

Signed: Superintendent General Maritime and Ports Affairs.

Notice: Received from ship's Agent.

Vessels can anchor within Lat. 23° 53′ N. and the coastline of Oman and between the meridians of Long. 58° 10′ E. and Long. 58° 28.5′ E., which is West of Fahal Island. On arrival contact Mina Qaboos Port Control on VHF Channel 16 or 14 for reporting arrival and request anchoring position giving vessel's particulars. Vessel not permitted to lower life-boat or unauthorised boats to lie alongside. Agent requires 5 copies Crew List, 1 Stores List, 1 Crew Declaration List and 1 Vaccination List. Distance to anchorage being such we have to commute by tugboat hired at O.R. 55/– per hour or part thereof. Launch service possible only during daylight hours and weather permitting. Following particulars of vessel should be furnished in advance:

1. Flag/port of registry.
2. D.w.t./g.r.t./n.r.t./call sign.
3. Ports of call including last port and next port.
4. Nationality of Master and Crew.
5. Whether any dangerous/hazardous cargo on board.

Vessels on arrival should be cleared through Immigration, Customs and Health by an Agent.

MINA-AL-FAHAL: 23.39 N. 58.32 E. (See Plan Book)

DOCUMENTS: Required on arrival (provided by vessel):

6 copies Crew List (2 copies required by Pilot).
2 copies of Vaccination List.
2 copies Stores List.
1 copy Bonded Stores List.
1 copy Personal Effects List.

All other necessary papers will be supplied on arrival by the Berthing Master.

PILOTAGE: The Berthing Master will board incoming tankers off Fahal Fairway Buoy, or as directed by VHF. Tanker should arrive at this position, make a good port lee, and take way off.

Harbour steaming is deemed to start at this point. The port side derrick should be rigged and crew standing by at the derrick ready to lift the mooring equipment from the launch when the Berthing Master comes on board.

The pilot access should be in good condition, clean and ready on the port side. Tankers of 70,000 tons Summer deadweight and above in ballast or partly loaded condition should have either a pilot hoist or a combination of accommodation ladder and pilot ladder rigged.

Also see "Ship Supply Service".

ANCHORAGES: *Tankers:* Before anchoring tankers should contact Fahal Control on VHF Channel 12 for a designated anchoring position.

In all cases tankers are required to anchor at least 2 miles West of Fahal Island and at least 2 miles clear of the Omani coastline.

Cargo ships:

i. Fahal Is. Lt. Brg. 340° × 2.0′
ii. Fahal Is. Lt. Brg. 345° × 1.6′
iii. Fahal Is. Lt. Brg. 000° × 1.7′
iv. Fahal Is. Lt. Brg. 015° × 1.6′

Ships proceeding to an anchorage within the Port Area should pass North of Fahal Island and under no circumstances enter the prohibited area unless instructed to or accompanied by a Mina al Fahal Berthing Master.

RESTRICTIONS: Open sea approaches.

All tankers calling at Mina-al-Fahal must be equipped with inert gas system in good working order.

MAX. SIZE: No length limitation. Draft up to 96 ft. Tankers up to 550,000 d.w.t. can be accommodated.

HEALTH: When advising ETA, include in message whether any sickness on board.

Port Health Officer, Immigration and Customs board with Berthing Master; Port Officer will carry out any necessary vaccinations. 'Q' flag to be flown until Pratique granted.

RADIO/VHF: ETA messages should be sent to "Petromar Muscat" via Muscat Radio (call sign A4M). If no contact can be established with Muscat Radio, the message should be sent through an alternative coast station such as Bahrain Radio.

The message should contain the following information.

(*a*) ETA in local time and date in plain language to avoid multilation.
(*b*) Whether there is any sickness on board.
(*c*) Whether any crew require medical treatment and very briefly the nature of the complaint.
(*d*) Last port of call.

VHF communications should be established as soon as possible calling Fahal Control on Channel 12. The range is about 80 miles to the Northward but only 20 miles to Eastwards because of screening by mountains. Working Channel is Channel 12 and is manned 24 hours a day by either Fahal Control or Fahal Pilots. The station may call vessels on Channel 16, although a permanent watch on Channel 16 will *not* be maintained. The mooring launches are also equipped with Channels 16 and 12 but mooring operations are carried out using UHF radio sets.

TUGS: None available and not required.

BERTH DESCRIPTION: 3 single buoy moorings with floating hose strings. SBM lights are Iso.W.

SBM No. I: Crude export and marine fuel oil import and export.

This buoy is served by 2 × 30 in. submarine crude lines and 2 × 10 in. submarine fuel lines each 10,300 ft. long.

The floating crude hoses are 2 × 810 ft. long × 20 in. reduced to 16 in. for manifold connection. Same hoses are used for fuel oil imports, these lines having a displacement connection ashore for emptying the crude content. Bunkering is by a single 12 in. hose 820 ft. long.

This buoy is capable of handling any vessel up to 554,000 tonnes d.w. and max. sailing draft allowed at this SBM is 64 ft.

SBM No II: For crude and bunker export and is served by 1 × 40 in. submarine crude line and 2 × 10 in. submarine fuel oil lines each 13,980 ft. long. The floating crude hoses are approx. 2 × 1,100 ft. long x 20 in. reduced to 16 in. at manifold connection. Bunkering is by a single 12 in. floating hose. Maximum size ship 550,000 tonnes d.w. and max. draft of 96 ft.

SBM No. III: Products imports only (Gas Oil, Mogas, Jet-A1) served by 2 × 10 in. submarine hoses, length 8,003 ft. Floating hoses are 660 ft. in length with 8 in. manifold connections. Max. size of ship is 100,000 tons and max. sailing draft allowed at this SBM is 46 ft.

Loading crude is by gravity and rates vary. If loading from upper tank farm 9,000 t.p.h. but only 5,500 t.p.h. if loading from lower tank farm.

Bunker rate is approx. 450 t.p.h., bunker discharge at SBM-I maximum 3,000 t.p.h., maximum back pressure 150 p.s.i.

BERTHING: Vessels berth head to buoy and are provided with 2 x 4.5 in. mooring snotters picked up from the mooring launch when the Pilot boards. Vessels over 230,000 tonnes d.w. are provided with two 15 in. × 80 ft. nylon braidline snotters. Connection at SBM-III is to two 12 in. plaited nylon lines 150 ft. long; at SBM-I and SBM-II to two 15 in. plaited nylon lines 150 ft. long. A suitable messenger rope should be provided by ship. An Assistant Berthing/Loading Master will advise in all mooring and hose connection operations which are carried out by ship's staff.

HOSE CONNECTIONS: Ship's port side derrick must plumb over relevant manifold. This derrick should be ready on arrival at the pilot boarding area to pick up the mooring gear and reducers (if necessary), safety chains, etc. for hose connection. Derrick to be in good condition and be rigged for a SWL of a minimum of 10 tons for SBM-I and II and 5 tons for SBM-III.

LOADING: Every 2 hours ship-shore check has to be made via the Loading Master.

BALLAST: No facilities for reception of dirty ballast.

Tankers should arrive with clean ballast, lines and pumps and no oil should be released into the sea.

MEDICAL: Medical treatment can be given by Petroleum Development Oman L.L.C.'s medical staff to crews of ships on Time Charter to Shell International Marine and on ships using P.D.O.L.L.C.'s tanker agency facilities. A charge of R.O.24 is made per hour for launch hire and transport facilities. Dental treatment available but at least 24 hours' notice required.

REPAIRS: It is not permitted to immobilise main engines whilst moored to the SBMs; under no circumstances should the propeller be turned in the ahead direction.

DENSITY: Approximately 1026.

FRESH WATER: Not available.

FUEL: Fuel oil only available. Limited store facilities and at least 24 hours' notice is required.

A wide range of marine lubricants is available and is supplied in drums. At least 24 hours' notice is required for supplying lubricants.

REPATRIATION: Crew changes are possible at Mina-al-Fahal provided the Agent receives at least 6 days' notice giving full particulars of embarking/disembarking crew, such as full name, nationality, place and date of birth, passport/seaman's book number with date and place of issue and expiry date, and also destination for repatriation of disembarking crew members, to enable Agents to obtain necessary permits and arrange air passages.

Notice for crew change to be given as soon as possible as the issue of N.O.C's. (Non Objection Certificates) can take up to 7 days.

N.B. If the information required as above is received on a Thursday or a day preceding a holiday, the time mentioned of 72 hours will not be sufficient as no permits can be obtained from the Authorities during holidays.

TIME: GMT plus 4 hours all year round.

SHORE LEAVE: Not possible.

SHIP SUPPLY SERVICE: The port of Mina al Fahal is operated by Petroleum Development Oman, and they have 3 launches, 2 of which are on 24 hours' duty every day. These launches would assist in a marine emergency, but are normally used for ships loading at Mina al Fahal, or for ships using their agency, Petromar Muscat. Mina al Fahal Pilots keep watch on VHF Channel 12.

GENERAL: *Liquor.* Trading in liquor strictly prohibited and no alcoholic drink should be offered to Arab nationals.

AUTHORITY: Petroleum Development Oman L.L.C., P.O.Box 81, Muscat, Sultanate of Oman. *Tel:* 607230, 607231, 607232. *Telex:* 3212 ON Muscat. *Cables:* Petro Muscat. *Contact:* Captain P. Branton, Port Captain, or Duty Berthing Master.

AGENT: See "Port Qaboos" (Mutrah).

Petroleum Development Oman L.L.C. can also act as Agent. Petromar Muscat are on VHF Channel 12.

PORT QABOOS (Mutrah): 23.37 N. 58.34 E.

(See Plan Book)

Muscat has ceased to be a commercial port and instead vessels now call at Port Qaboos.

PORT LIMITS: From the level of HWS at a point near Ras Kab at Long. 58° 33′ 12″ East on a line due North to Lat. 23° 41′ North;

Thence due East to Long. 58° 35′ 36″ East;

Thence due South to Jazirat Muscat;

Thence in a generally Southerly direction by the line of HW on the Western side of Jazirat Muscat to Pinnacle Rock;

Thence S.W. to the Easternmost point of Siraz al Gharbiyah;

Thence by the line of HWS to the point of commencement.

DOCUMENTS:

Required on Arrival:

Clearance from Last Port.
4 Copies Crew List.
1 Copy Maritime Health Declaration form with ports of call from commencement of voyage.
3 Copies of Crew Personal Declaration List.
3 Copies of Ship's Bonded Stores List.
2 Copies Vaccination List.
6 Copies Passenger List.
3 Copies In-Transit Passenger List.

To be Airmailed in Advance:

3 Copies Hatch List, and other details of vessel (Flag, Draft, LOA, Last Port, Next Port, G.R.T., etc.).
3 Hazardous Cargo Lists.
3 Heavy Lift Lists.
5 Copies Cargo Stowage Plans.
9 Copies Cargo Manifest.
1 Copy Freight Manifest.
2 Copies Bills of Lading.

Customs and Immigration Requirements for Vessels Entering and Leaving Ports: 24 hours' advance notice, cargo manifest and passenger list, crew personal declaration. Cargo vessel is allowed to enter and complete Immigration formalities alongside except if ordered otherwise.

PILOTAGE: Compulsory for vessels other than exempted vessels as defined in Port Rules and Regulations and Port Tariff.

Arrival notice requirements: ETA, LOA, draft 72 hours, 48 hours, 24 hours before arrival. Berthing and unberthing – 24 hours a day.

MAX. SIZE: Depth of entrance channel 34 ft. at LAT. Also see "Berthing".

Circular: Issued by the Harbour Master.

As you are aware in the past the Port has limited the length of vessels to 750 ft. in order to maintain its high standard of safety.

Recently we have been approached by some Shipping Agents requesting us to admit ships considerably over 750 ft. with a draft of 30 ft.

The port is keen to attract more ships, if possible with greater lengths and drafts than currently permitted. Upgrading of facilities is underway although will take some time to complete.

Meanwhile, on an experimental basis, ships up to 785 ft., after suitability clearance from Harbour Master's Department, will be permitted to use the Port. Agents must apply for initial suitability clearance for every vessel over 750 ft. and up to 785 ft. (240 m.) in length, under their Agency.

Every vessel found suitable will have to give an undertaking indemnifying the Port against all losses before such berthings are undertaken.

For your guidance only, vessels with good engines and extra manoeuvrability powers of bow thrust and stern thrust will be given clearance.

If the Principals agree we look forward to berthing such vessels up to 785 ft. (240 m.) in length.

This experiment will be carried out for a period of 6 months during daylight hours only commencing from 1st January, 1985.

APPROACH: Port Qaboos has a very open approach with a deep water anchorage. The hilly coast is radar conspicuous. Lights on Fahal Is., Jazirat Muscat and the Breakwater make night navigation fairly simple. There is no appreciable current once inside the bay.

Ship Masters calling at Mina Qaboos are advised that vessels navigating under their charge and approaching Mina Qaboos whether from East or West must first pass 5 cables Eastwards of Mina Al-Fahal Fairway Buoy before making final approach to Mina Qaboos Anchorage or Breakwater Head for picking up Pilot.

In no case should they keep close-in to Khawr Muscat Entrance or remain waiting in the Prohibited Anchorage Area.

ANCHORAGES: Vessels should anchor Northwest of the breakwater within the area enclosed by the following perimeters:

1. A line extending 060° (T) from Port Qaboos Breakwater.
2. The Westernmost extremity of Port Qaboos.
3. A line extending 325° (T) from Muscat Forward Leading Light after crossing perimeter (1).

All areas described above are clearly defined in the current edition Admiralty Chart No. 2869.

Prohibited Anchorage Area: The area enclosed by the following perimeters is a Prohibited Anchorage Area:

North Boundary: The parallel of Lat. 23° 41′ 00″ N.
East Boundary: The meridian of Long. 58° 36′ 00″ E.
South Boundary: Sultanate of Oman coastline.
West Boundary: Muscat Forward Leading Light bearing 145° (T) from seaward and Port Qaboos Breakwater Light bearing 240° (T) from seaward.

Severe penalties are imposed for vessels infringing the above prohibited area.

TUGS: Four twin screw tugs, 1,400 h.p., 1,600 h.p., 1,900 h.p. and 2,400 h.p. Tugs normally join vessel 1 mile N.N.W. off breakwater light.

HEALTH: International Health Regulations apply. Pratique may be granted by the Port Health on receipt of following information:

1. All Cholera vaccinations valid.
2. Valid Derat Certificate.
3. No sickness on board.
4. No sickness at last Port.
5. Country of origin and date of departure.

Port Health normally board alongside and issue Health Form. They require:

1 Crew List.
1 Vaccination List.
Valid Derat Certificate.
Last Port Clearance.

RADIO: Port Control can be contacted on VHF Channel 16 or Channel 14 or on R/T via Muscat Radio. 24 hour operation except Friday when hours of operation depends on actual movement in the Port.

Notice of Arrival: Vessels should advise their Agents of their ETA, LOA and draft. The Agents will in turn inform Port Services Corporation Ltd. ETA from Masters of vessels should also be cabled direct to Harbour Master, Port Services Corporation Ltd. (Telex No. 5233 ON) 72, 48 and 24 hours in advance of arrival.

Three hours prior to arrival off the port, vessels should contact Mina Qaboos Signal Station on VHF Channel 16 and working Channel 14 and request berthing instructions, etc.

BERTHING: There are 9 deep water berths: 3 coaster berths and 1 berth for launches. The berths vary in length from 76 m. to 228 m. and are sheltered by a breakwater on one side and cliffs on the other.

Supporting the berths are 9 modern transit sheds facing broad uncluttered aprons, providing both covered and open storage space. Two berths front directly on to large open areas ideally suited for rapid discharge of containers and oversized units requiring direct delivery.

Berth	*Length*		*Depth at LAT*		*Max. draft*
No.	(ft.)	(m.)	(ft.)	(m.)	(ft.)
1	600	183	41	12.5	34
2	600	183	41	12.5	34
3	750	228	32	9.8	31.5
4	600	183	30	9.1	30
5	600	183	30	9.1	30
6	650	198	30	9.1	30
7	600	183	30	9.1	29.5
8	600	183	30	9.1	28
9	450	137	13	4.0	13
10	500	152	13	4.0	13
11	600	183	30	9.1	30
12	250	76	10	3.1	10
13	500	152	7	2.2	7

Nos. 1 and 2, 4, and 5, 7 and 8 Berths are "in line", therefore larger vessels can occupy part of a second berth when necessary.

Transit Sheds and Cold Storage Facilities: 9 transit sheds and 1 cold store adjacent to the port, capacity of cold store 3,000 tonnes plus cool rooms, blasting facility and ice making plant. Facilities for electrical connection of refrigerated containers with Kheops and Wilco Plugs.

SPECIAL HANDLING FACILITIES: Bulk Cement Silos: Capacity 6,000 tons, supplied by underground pipe line from the berth. Vessels carrying bagged cement can only be accepted for discharge providing their LOA does not exceed 500 ft. (152.4 m.) and draft 29 ft. (8.84 m.).

Grain Silos: Capacity 60,000 tons supplied by quayside underground conveyor from the berth. In conjunction, 2 km. from the port, a highly automated mill produces various flour and animal feed products for local consumption and export.

The port has modern container and Ro/Ro handling equipment, including a Mafi-type roll trailer system, backed up by mobile cranage of up to 150 tons capacity and heavy fork-lifts.

The container terminal is equipped with 2 highly sophisticated 35 ton gantry cranes supported by 5 heavy duty forklifts. The terminal has a large storage yard to accommodate about 2,200 TEUs.

Containers are also accepted from self-sufficient vessels. Containers are transported by trailers and handled in stacking area by mobile crane or forklift truck. Reliance Mercury Tractors of 160 b.h.p. with Mafi-type trailers are available for Ro/Ro vessels. LASH and BACAT service.

CRANES: 12 mobile cranes 3 tons – 150 tons including 1 mobile crane 70 tons and 1 mobile crane 150 tons, 57 fork lift trucks 3,000 lb. – 10,000 lb., 5 fork lifts 35 tons, 10 tractors and 36 trailers available.

There are no fixed quay cranes.

STEVEDORES: The labour position is fair, except in the date-picking season (June to August).

Landing rates: bagged cargo 4/600 tons per day; general 200 tons per day; timber 100 – 150 tons per day during fair weather provided no congestion on jetty and if cargo stowed in more than 3 hatches.

Working Hours:

Saturdays/Wednesdays	Day Shift	0700 — 1300	
		1300 — 1500	Lunch Break
		1500 — 1700	
		1700 — 1900	On overtime
	Night Shift	2000 — 2300	
		2300 — 2400	Tea break
		2400 — 0600	
Thursdays	Day Shift	0700 — 1400	
	Night Shift	2000 — 2300	
		2300 — 2400	Tea break
		2400 — 0600	
Fridays	No Day Shift		
	Night Shift	2000 — 2300	
		2300 — 2400	Tea break
		2400 — 0600	

MEDICAL: Port Clinic and Government hospitals available.

CONSULS: Republic of China, Denmark, Egypt, France, Germany, India, Iran, Iraq, Japan, Jordan, Korea, Kuwait, Norway, Pakistan, Qatar, Somali Democratic Republic, Sudan, U.A.E., U.K., U.S.A.

FRESH WATER: Available at all berths and at the anchorage, 72 hours' notice required for barge supply.

FUEL: Gas oil available at Berth Nos. 4, 5, 6 and 8 and at the anchorage by bunker barge owned by the port, 72 hours' notice required. Other fuels can be supplied by arrangement with Owner's Agent. Marine lubricating oils available.

SERVICES: Fresh and dry provisions from chandler. Limited availability of ship and engine room stores. Radio, radar and electrical repairs possible.

GANGWAY/DECK WATCHMEN: To be provided by vessel.

REPATRIATION: Is now possible if Masters give full particulars of the seamen to be repatriated by telegram at least 72 hours earlier. This also applies to embarking crew members. The 72 hours' notice is not enough in the case of a Friday, or any other holiday which falls in between.

Also see "Laying-Up".

CUSTOMS ALLOWANCES: Vessels will no longer be permitted to have free use of their stores (Tobacco goods, Alcohol, etc.) whilst in the confines of the port.

On arrival in port, an allowance will be given by the Customs Boarding Officer and the surplus stores will then be placed under Customs Seal. The allowance will be:

200 cigarettes or 50 cigars or 250 gm. tobacco.
One bottle (1 litre) alcoholic spirit.
One bottle (1 litre) wine.
24 cans beer.
Various used personal effects such as radios, cameras, etc.

Should a vessel remain in port for more than 4 days, an issue of stores will be given upon request being made to the Customs Authorities.

These Regulations also apply to ships at the Anchorage.

SHORE LEAVE: Crews are only allowed ashore between the hours of 0700 – 1900.

GENERAL:

Ships Arriving at Port Qaboos:

Ships may approach Port Qaboos without a Pilot as far as the perimeter of the limits of the port. No ship shall proceed through the entrance to or from the port without the permission of the General Manager or the Harbour Master.

All ships, other than expected ships, shall be under the pilotage of a Pilot appointed by the Port Authority when underway within the limits of the port. The ship shall have rigged and ready for use a pilot ladder of modern pattern, in good repair and provided with reliable manropes. Such pilot ladder shall be well illuminated between dusk and daybreak. The ship shall have a boat-rope ready rigged from the break of the forecastle to abaft the pilot ladder.

No ship shall enter or leave Port Qaboos unless her draft marks are correctly shown and clearly visible.

Every ship shall at all times when entering, navigating in or leaving the port have both anchors ready for immediate use.

Ships proceeding to berth at the port premises shall have no list and shall be trimmed upright.

Before entering Port Qaboos every ship shall hoist the following flags: The ship's signal letters. The "Q" flag, International Code, unless the Port Health Officer has previously given Pratique. The "H" flag, International Code, denoting that a Pilot is on board. The "I" flag, International Code, if the ship is carrying passengers.

Until Pratique has been granted communication between ship and shore shall be made by: Flag hoist, using the International Code of Signals, Morse Code, by signal light, or radio-telephone on approved frequencies, which will be promulgated for use for such purpose.

Conduct: The Master or Owner of every ship shall be held directly responsible for the proper conduct and behaviour of the crew of such ship while in the port and for strict observance of the laws of the Sultanate of Oman, particularly those laws concerning the sale, transference or consumption of any narcotic or alcoholic or intoxicating drink of any kind.

Flags: Every merchant ship within Port Qaboos between the hours of sunrise and sunset shall fly her national flag and the national flag of the Sultanate of Oman.

Repairs: The Master of any ship wishing to carry out major engine repairs or adjustments, which will affect the mobility of the ship whilst in the port shall make written application to the Harbour Master to do so. The Harbour Master shall give his permission or otherwise in writing.

Safety of Ships and Persons: The Master of every ship anchored or moored in the port or berthed at the port premises shall, unless the Harbour Master concede some relaxation in this port rule, at all times retain on board sufficient crew to work or move the ship.

Ships Berthed or Anchored Within Port Limits: No person shall swim from any ship berthed at the port premises.

No person shall make fast or anchor any country craft or boat of any kind at any quay, wharf, pier or landing place or at any steps provided thereat in the port premises except with the prior permission of the Harbour Master.

Pollution: It shall be unlawful for any person, or corporation to deposit, place, or discharge into the waterways of Port Qaboos, either directly or through private or public sewers, any sanitary sewage, butcher's offal, garbage, dead animals, gaseous liquid or solid matter, oil, gasoline, residium of gas, calcium chloride, trade waste, tar or refuse or any other matter, which is capable of producing floating matter or scum on the surface of the water, sediment in the bottom of the waterways, or the odours and gases of putrefaction.

Vessels discharging ballast, oil from bilges or tanks or solid matter into the waters of Port Qaboos will be reported to the Pollution Control Officer and be subject to a fine of R.O. 500.00 for each offence, imposed by and payable to Port Qaboos. Such fine shall be in addition to any other fines, which may be levied for the same offence by the Sultanate of Oman.

Hygiene: The port provides garbage bins at various points for use by vessels. The use of these bins is compulsory and a charge for this facility will be made whilst the vessel is alongside.

Rat Guards: The use of rat guards on all mooring ropes and wires is compulsory whilst vessels are alongside. Vessels without their own rat guards will be required to hire from the Corporation.

Ships Leaving Port Qaboos: Port Rules applying to ships arriving at Port Qaboos apply equally, in so far as they are relevant, to ships leaving the port.

Merchant ships shall fly the "P" flag International Code, for 24 hours before sailing from the port.

The Port Authority may refuse to grant the Master of any ship outward clearance, unless and until all charges due in respect of the ship and any penalties, to which the ship or her Master are due, have been paid or secured to the satisfaction of the Port Authority.

Working of Cargo at Port Qaboos: Ships may be permitted to discharge or load cargo in the anchorage if a berth is not available at the port premises or if in the opinion of the Port Authority the ship's cargo is more suitable for handling to or from barges or lighters.

The Master or Owner of any ship shall be held responsible for any loss or damage arising from careless or improper slinging of cargo onboard such ship.

Any cargo, cargo-handling equipment or ship's gear, which may be dropped overboard shall at once be reported by the Master or appointed Officer to the Port Authority and shall be immediately recovered by the ship's personnel if it is reasonably possible so to do. Failing this, it may be recovered by the Port Authority at the ship's expense. The Port Authority shall not be responsible for any damage to or loss of cargo, equipment or gear so recovered.

The Master of every ship discharging or loading cargo in the port, whether at anchor or berthed alongside shall provide drinking water for all cargo handling labour and all other persons appointed and directed to be on board such ship in connection with the discharge or loading of cargo.

If the labour or transport allocated or engaged for the purpose of landing, loading or transhipping cargo from or to any ship is not fully continuously employed by reason of a fault or action attributable to such ship, the expenses incurred thereby shall be paid by such ship.

In the event of any accumulation of cargo or goods upon the quay or jetty or in a lighter for any cause that may appear reasonable to them, the Port Authority may require the ship discharging such cargo or goods to suspend or reduce the rate of discharge of such cargo or goods.

The Port Authority may refuse to permit cargo to be landed from any ship until suitable shed or open storage space or other accommodation is or becomes available for such cargo.

Delivery of cargo or goods shall not be deemed to have been made to the Port Authority until such cargo or goods have been brought into the port premises and until the Port Authority accepted delivery of such cargo or goods and have issued an official receipt therefor to the Master of the ship discharging such cargo or goods or to the ship's Agent or to any other person duly authorised so to do, conveying such cargo or goods to the port premises.

LAYING-UP: Vessels can anchor within the limit Lat. 23° 53′ N. and the coastline of Oman and between the parallels of Long. 58° 10′ E. and 58° 28.5′ E.

Port dues per g.r.t. for each period of 7 days or part thereof is payable. Vessels on arrival should be cleared through Immigration, Customs and Health by an appointed Agent. Distance being such that Agents have to commute by hired tugboat (minimum 4 hours required for a trip and back). Launch service permitted only during daylight hours and weather permitting.

No vessel shall temporarily lay-up in the "Waiting Anchorage" for more than 3 months without the permission of the Harbour Master, Mina Qaboos.

No vessel shall temporarily lay-up without its full complement of crew and sufficient power to handle any emergency.

Crew Change: While anchored within Omani Territorial Waters crew changes can be effected through Mina Qaboos only and not from any other neighbouring country. Vessels are also not permitted to lower lifeboat or allow unauthorised boats to lie alongside.

For purpose of effecting crew changes Passport or Seaman Book particulars should be furnished in advance for obtaining Visas for crew to join/leave vessel. Issuance of Visas will take minimum 7-10 days. Particulars required are as follows:

Full Name.
Nationality.
Passport or Seaman Book Number.
Date of Issue.
Date of Expiry.

And only after obtaining confirmation that Visas are obtained can crew be sent to Muscat failing which they will not be permitted to land and will be deported at Owner's expense.

Mail/spare parts/provisions, etc. can be delivered to vessels at anchorage. Invoices should be attached along with spare parts arriving by air and consigned to: Master (vessel's name), c/o Agent, "Ship's Spares in Transit".

AUTHORITY: Port Services Corporation Ltd., P.O.Box 133, Muscat, Sultanate of Oman. *Tel:* 734001-6. *Telex:* ON 5233 M Qaboos. *Contact:* The President or Captain K. B. Trilokeker, Harbour Master.

AGENT: Gulf Agency Co. (Oman) L.L.C., P.O.Box 3740, Ruwi, Sultanate of Oman. Tel: Mutrah 714888, 714779, 713603. After Hours 702249 or 701712. Telex: 5284/5284B ("Gacship ON"). Cables: "Confidence", Muscat. VHF Channel 16. Call sign "Confidence Muscat".

PORT RAYSUT (Salalah): 16.56 N. 54.01 E.

(See Plan Book)

PORT LIMITS: Going on the level of HW the water limits of the port are bounded by:

1. Crossing of coastline with Long. 54° 04′ E.
2. Then in the True South direction to Lat. 16° 55′ N.
3. And to the West the limits, follows the coastline interception with Lat. 16° 55′ N., and along the coast to the starting point (subject to approval).

DOCUMENTS:
4 copies of Crew Lists and Passenger List (if any).
Valid Vaccination Certificate.
Valid Derat Certificate.
Last Port of Clearance.
Customs Documents.
8 copies of Manifest.
Ship's Papers and Ship's Certificates.
2 copies of Stowage Plans.
2 copies of Hatch List.

PILOTAGE: Compulsory for vessels of more than 150 n.r.t., except Port Authority craft and naval ships of Oman. Pilots wait near the East breakwater, vessels are to proceed to the entrance of the harbour on request either from Pilot or harbour control. Pilot boat has a black hull with white superstructure and an Oman National flag on the mast. Boats keep VHF radio watch on Channel 12. The entrance of the harbour is marked with a Buoy-Flashing Green light for a duration of 1 second in every 5 seconds.

On an experimental basis, (May 1982), Pilot available inward (0730 hrs. – 2000 hrs.) and outward (0730 – 2200 hrs.), including Fridays and Holidays. This is on a trial basis and if satisfactory results are attained, efforts will be made to introduce port working on round-the-clock basis for Pilotage.

ANCHORAGES: The Roads of Raysut offer an open sea anchorage with a sandy bottom. The depth at the entrance of the Buoy is 13 m. and North-Eastward it increases, however anchorage position at present is given to all vessels upon reporting by VHF radio. Anchorage positions are set with 0.5 miles between each ship in a minimum of 10 m. of water for large vessels, less depth of water as required for coasters.

Anchorage Area:

1. Lat. 16° 57′ N., Long. 54° 04′ E.
2. Lat. 16° 55′ N., Long. 54° 04′ E.
3. Lat. 16° 55′ N., Long. 54° 02′ E.
4. Lat. 16° 57′ N., Long. 54° 02′ E.

RESTRICTIONS: None.

MAX. SIZE: Max. draft for cargo vessels is 9.5 m. and tankers about 12 m. Vessels will be brought to the berths regardless of the tide conditions since the port operates as a year round all weather port.

HEALTH: Quarantine procedures are followed and all ships upon arriving must fly flag "Q" until completion of quarantine procedures. Public health requires certificates of vaccination for cholera and yellow fever. Derat certificate also required.

RADIO/VHF: For advance ETA data the harbour control listens on 2182 kHz and works on 2023.5 kHz. VHF watch is kept on Channel 16 and other Channels available are 12, 10 and 6. The service is available around the clock. Area weather available on request.

RADAR: None available at present.

TUGS: Join vessels with the Pilots. 2 powerful tug boats (1,700 h.p. and 2,250 h.p.) of harbour/ocean going type, fitted with fire fighting and salvage facility, are available in addition to the 2 small mooring tugs equipped with 2 engines: 120 h.p and 220 h.p. respectively.

BERTHING: The new harbour provides a quay of 522 m. with a depth of water 10 m. Also available: 200 m. length with 8 m. depth and 510 m. length with 4 m. depth. An oil terminal, dolphin type, 130 m. length with 12 m. depth. 1 ramp for small landing craft.

Berth No.	*Depth* (m.)	*Permissible Draft* (m.)
1	10.0	9.5
2	10.0	9.5
3	10.0	9.5
4	8.0	7.5

CRANES: *(a)* There are 9 mobile cranes in the port operating in the range of 2 to 5.5 tons. There is 1 mobile crane rated at 100 tons.

(b) 4 luffiing quay-side electric cranes. 2 rated at 6 tons and 2 at 15 tons.

(c) 1 Container gantry crane at 35 tons at Berth No. 1. Height of spreader above quay – 22 m. Travelling range 280 m.

BARGES: 350 ton barge will be acquired by the port very shortly.

SPECIALISED FACILITIES: There are no special facilities. Ro/Ro services are carried out in the existing port at present. However such vessels must meet the standard requirements for entry to the berth. There are no bulk handling facilities.

BRIDGES: None.

STEVEDORES: Arrangements must be made through the Agent for maximum notification of arrival to arrange gangs. Minimum notification 24 hours. Normal working hours from Saturday to Wednesday 0700 to 1500 hrs. Thursday from 0700 to 1300 hrs. with no lunch break.

Working hours are subject to change during the month of Ramadan.

Overtime can be worked from 1500 – 2300 hrs. and would be charged as hours worked outside normal working hours. Overtime will be worked at the request of the Agent and will be worked on Fridays and public holidays at special request.

On an experimental basis, the Port Authority, with existing facilities and manpower, has decided to introduce the following with immediate effect:

Discharging: 2 shifts (0700 – 1500 hrs., and 1500 – 2300 hrs.) provided maximum 2 vessels in port with 2 to 3 workable hatches. If only 1 or 2 workable hatches, up to 3 vessels can receive 2 shifts.

This is on a trial basis and if satisfactory results are attained efforts will be made to introduce port working on round-the-clock basis, for discharge operations.

MEDICAL: Agents handle all medical matters. A hospital is available in the town of Salalah (17 miles away). Also see "Health".

TANKERS: Tankers up to 35,000 d.w.t. are accommodated at the Oil Pier which is 130 m. in length and about 12 m. in depth.

FRESH WATER: For vessels at berths fresh water is available ex-pipeline.

FUEL: Available to ships at the berth by tank truck, must be arranged by the Agent.

FIRE PRECAUTIONS: Fire hydrants available alongside berths.

CONSULS: None available.

REPAIRS: No facilities.

DRY DOCKS: None available.

SURVEYORS: Lloyd's representative is Oman United Agencies in Salalah.

GANGWAY/DECK WATCHMEN: Not required except as deemed necessary by the Master of the vessel and then he must supply his own.

HATCHES: Opening and closing hatches is normally done by the crew but arrangements may be made with the port for provision of this service. Agents can advise.

CUSTOMS ALLOWANCES: 200 cigarettes or 50 cigars or 250 gm. of tobacco. 1 bottle (1 litre) alcoholic spirit. 1 bottle (1 litre) wine. 24 cans of beer and various used personal effects such as radios, cameras, etc.

CARGO GEAR: Normally handled by shore equipment and shore gear. Any special lifting equipment required must be provided by the vessel. Ships in the anchorage are normally expected to supply all gear required. The port has rental gear for those vessels requiring same.

REPATRIATION: Permitted, arrangements may be made by the Agent for this service. Crew changes may be effected at this port.

AIRPORT: Salalah International Airport. Distance 25 km.

TIME: Time local is GMT plus 4 hours.

HOLIDAYS: All Muslim holidays are observed. Working hours are reduced during the period of Ramadan. Special National days celebration is held from 17th to 21st November each year. Working of overtime may be arranged during most of the holiday periods, Agents can advise.

POLICE/AMBULANCE/FIRE: The port has police available at the port at all times. Ambulance service must come from Salalah. The port has the only telephone service and the police located within the port also maintain telephone service. Required numbers are familiar to all persons in these two areas.

A complete fire fighting system is installed in the Port with 20 fire hydrants (4 in.) distributed through the jetty capable of handling all kinds of fire. The new tug boats are fitted with fire fighting facilities.

TELEPHONES: For any long distance calls Omantel maintains office in Salalah where calls may be placed and paid for. For local calls the port will permit the use of port phone on a limited basis.

SERVICES: None available.

SHORE LEAVE: Master, First Officer and Chief Engineer are permitted restricted shore leave but all other members of the crew are restricted to the ship or port area.

IDENTIFICATION CARDS: Seaman's book or passport are sufficient for those persons going ashore.

REGULATIONS: No vessel shall enter the port area unless authorised by the Harbour Master. The Harbour Master may at his discretion refuse to allow vessels, with the exception of vessels in distress, to enter the port, and may order from the port any vessel with the exception of vessels unfit for sea, which does not have business within the port, or is in breach of these Regulations.

No vessel shall anchor, or weigh anchor or move within the port area except when and where required by the Harbour Master.

No unclean water ballast which is not free from oil or other harmful contaminants, shall be discharged into the waters of the port area. In case of the pumping of bilges or pollution by oil or harmful contaminants into the waters of the port area, the vessel will be responsible for any fines imposed by the Port Authority and any compensation or other damages according to Port Rules and Regulations.

Should fire break out aboard any vessel the Master should make an immediate signal either by a continuous sounding of long or short blasts on the ship's whistle or siren or by ringing of a fire bell.

In cases of adverse weather it is the sole responsibility of the Harbour Master to decide whether the sea conditions are suitable for handling cargo with barges in the Anchorage or whether the day will be declared a "Weather non-working day".

Masters shall be responsible for the adequate provisions of safety equipment and lights on board whilst cargo is being handled.

Conveyance of alcoholic liquor, other than manifested cargo under Customs supervision, from any vessel to the shore or from one vessel to another is prohibited.

No unauthorised person may enter the port area. Visitors to vessels are prohibited except by permission of the Harbour Master.

Ship's personnel and passengers are not permitted ashore except by permission of the Immigration Authorities and the Harbour Master.

Every merchant vessel in port shall fly her national flag, and the national flag of Sultanate of Oman, between sunrise and sunset.

GENERAL: The port operates on a year round basis today with the exception of vessels requiring barging. All barging is closed from mid-June to late September depending on the sea state.

DEVELOPMENTS: Bulk cement and grain facilities, slipway for repairs and maintenance and facilities for vessels of 22,000 d.w.t. are planned.

SHIPMASTER'S REPORT: 1978.
Radio: Send ETA, draft, LOA, g.r.t., n.r.t., cargo to discharge, last port, to: General Manager, Port Raysut, Salalah, Sultanate of Oman, giving 48 hours', 36 hours', 24 hours' notice.
Labour: A gang consists of 10+1 men.
Fresh water: Available only on berth and supplied by trucks for the time being. NOT available at anchorage.
Provisions: Supplied by Agent.
Airport: Daily flight to Muscat.
Telex-Telephone-Cable-Posts: Available by "Cable & Wireless" offices.
Hospital: Very good.
Workshop: Nil.
Fuel Oil: Not available.

AUTHORITY: Directorate General of Communications, P.O.Box 8369, Salalah, Sultanate of Oman. *Contact:* Mohd. Ahmed T. Rawas, Manager, Port Raysut.

AGENT: Gulf Agency Co. (Oman) L.L.C., P.O.Box 19346, Salalah, Sultanate of Oman. Tel: 290405, after hours 292003. Telex: 7647 ("GAC SAL ON"). Cables: "Confidence", Muscat or Salalah.

Pakistan

KARACHI: 24.49 N. 66.59 E.

DOCUMENTS: *Required before vessel's arrival:*
2 copies Freight Manifest.
2 sets Bills of Lading.
3 copies Stowage Plan.
2 copies Passenger Manifest.
3 copies Cargo Manifest.
3 copies Hatch Lists.
1 copy Exception Lists.
6 copies Passenger Lists.

With vessel:
2 copies Cargo Manifest.
Last Port Clearance Certificate.
6 copies each Passenger List, disembarking and transit.
2 copies List of favour parcels.

The following special Pakistan forms are brought on board by Agent for completion on arrival:
2 Customs Arrival Reports.
2 Opium and Dangerous Cargo Certificates.
2 Ship's Currency Lists.
6 Deck Cargo Certificates.
1 Company's Arrival Report.
1 Ship's Crew Advance (if required).
1 Expiry date of Ship's Certificate.
1 Same Bottom or In Transit Cargo.
1 Water Indent.
10 Crew Lists.
3 Stores Lists.
3 Crew Effects Lists (including cameras, radios, etc.)
7 Cargo Gear Information Forms.

Metric weights and measures to be used on Particulars of Cargo, Tonnage Certificates, Stevedoring Bills, Manifests and Bills of Lading.

Immigration:
(i) Masters should ensure that all crew in possession of valid health documents.
(ii) All nationals, other than those holding British Passports, require visas for entry into Pakistan. Ship's crew can enter and leave Pakistan on Seaman's documents for purposes of joining vessel and/or on repatriation.
(iii) Seaman books/Passports are required to be collected from Immigration authorities prior to sailing of vessel on surrender of the shore passes.
(iv) Taiwan and Israel nationals are not allowed shore leave facilities.

PILOTAGE: Pilotage is compulsory for ship of 200 n.r.t. and upwards. Pilot boards at the Outer Anchorage.

Vessels are piloted day and night, subject to tides, length and draft, to berths lying on the East and West of the fairway, which is 4.27 miles long. Pilotage distance is about 5 to 6 miles.

ANCHORAGES: Outer Anchorage where ships await berth safe except during the S.W. monsoon from mid-May to September. During monsoon no anchorage is recommended. Vessels should anchor a safe distance outside the breakwater within Lighthouse bearings 045° and 025°. Depth of water at the anchorage is about 9 fathoms.

RESTRICTIONS: Datum depth is 27 ft. Dry cargo vessels with a draft in excess of 32 ft. are not permitted to enter Karachi due to dredged depths at berths.

Berthing at any time, except vessels with bridge aft which permitted daylight only.

Sailings permitted during flood tide only. Tankers with LOA over 525 ft. permitted to sail on flood tide during daylight hours only. Vessels with bridge aft permitted to sail on flood tide during daylight hours only.

Vessels coming alongside another ship (double bank) are handled during daylight only and therefore abreast berthing during the night not permissible.

MAX. SIZE:

	Length	*Draft*
Bulk carriers and general cargo (dry cargo)	945 ft.	32 ft.
Bulk oil tankers, white oil product	750 ft.	35 ft.
Bulk oil tankers, black oils	750 ft.	35 ft.
New oil pier No. 4, crude oil	850 ft.	39 ft.

HEALTH: The Port Health Authorities give automatic clearance on receipt of a "clean" standard quarantine message and this will be conveyed by the Pilot. However, ships from Yellow Fever areas must be cleared during daylight hours by the Port Health Officer on arrival alongside. On sailing to ports outside India and Pakistan, a medical inspection takes place on the day before sailing. It is, in theory, necessary for a member of the crew to be present at this inspection, although usually the inspection is only a formality. All vessels required obtain Immigration Clearance on arrival.

All vessels which have touched any port or ports between Port Sudan and Durban, on the East Coast of Africa, including these ports, are considered "suspected" vessels on account of Yellow Fever and Jigger and may not have communication with the shore till cleared at berth by the Port Health Officer, who attends only between sunrise and sunset, except in special circumstances. The incubation period for Yellow Fever under the rules is given as 9 days, but vessels arriving later than 9 days are still not free from quarantine because there is no incubation period for Jigger.

TUGS: There are 6 diesel tugs owned by Port Trust. Four tugs have bollard pull varying from 10 to 18 tons and 2 tugs have 27 tons bollard pull.

Towage inside the harbour is rendered by Port Trust on signal from Pilot. Towage is not provided outside the breakwater except in very special circumstances at the discretion of the Deputy Conservator, subject to weather permitting and availability of tugs on special terms and conditions.

RADIO/VHF: Port Authorities equipped with VHF radio-telephone, calling Channel 16, working Channel 12. Control Station call sign "Manora Pilot Control".

Vessels should establish radio contact with control station as soon as they are within VHF range.

Use of Channel 12 is restricted to the following: Ships while entering harbour are to maintain watch on Channel 12 as soon as Pilot boards. Ships in harbour scheduled to sail are to keep a listening watch half an hour before sailing till their clearance from the port.

"Intercommunication with the ships, other than Pilot Control, at outer anchorage or ships in harbour on Channel Nos. 12 and 16 is strictly prohibited. The Manora Pilot Control Station is equipped with multi-channel VHF Radio Telephone sets which are operating on International Maritime Channels 8, 9, 11, 12 and 16 subject to above restrictions."

Vessel's Registration: All vessels calling at Karachi Port, upon arrival at anchorage are required to make immediate contact with Port Control (Manora Station) by Aldis Lamp and notify arrival time, vessel's name, flag, cargo, and position. Also vessel is to make contact on VHF repeating all of the above information, declaring readiness of vessel to berth, and the time noted by Port Control by light is taken as the time of arrival off the Port, both for berthing turn and also serving NOR (in case of Charter Vessel) to receivers/charterers.

BERTHING: There are 17 berths at East Wharves, total quayage 8,622 ft. Berth Nos. 1 to 17 are on a concrete quay wall of the latest type. All berths are rail-served. Berth lengths vary from 470 ft. to 550 ft. Available depths vary from 26 ft. to 31 ft. There are 13 berths at West Wharf and their length varies from 550 ft. to 700 ft. Depths available vary from 29 ft. to 31 ft.

There are 4 Bulk Oil Piers having length of 425 ft., 644 ft., 750 ft. and 850 ft., which can accommodate tankers of overall length between 525 ft. and 850 ft. Also see "Tankers".

Moorings: Three moorings of 700 ft. each and one LASH Mooring of 1,000 ft. have been laid and are commissioned for accommodating the vessels of sizes between 600 ft. and 850 ft. respectively.

Bulk Wheat: Discharged by bulk evacuators at Berth No. 17.

Passenger Vessels: Berth No. 24.

Fertiliser: Discharge at Berth No. 22. Bagging machines installed.

Vessels with LOA 900 ft. and over berth at No. 16 and 17.

CRANES: All berths except Nos. 5, 6, 7 and 17 are equipped with electric cranes.

STEVEDORES: Working Hours: Monday through Thursday and Saturday, day shift: 0730 – 1130 and 1230 – 1630 hrs. On Fridays day shift: 0730 – 1230 and 1400 – 1630 hrs. Mondays through Saturday, night shift: 1900 – 2300 and 2330 – 0330 hrs. next day.

Overtime periods: 0330 – 0630, 1130 – 1230, 1630 – 1830 hrs.

TANKERS: Mineral oils discharged at the Bulk Oil Pier, 4 berths, and at West Wharf Berth 20. Heavy grades may be discharged at the steamer wharves but dangerous petroleum only at the Oil Piers.

Vegetable oils are handled at both the terminals mentioned above, and at East Wharf Berth 9.

New Oil Pier No. 4: Max. LOA 850 ft., max. beam 130 ft., max. loaded draft 39 ft., max. size 75,000 d.w.t. and 95,000 tons, max. gross displacement.

Slop reception facilities: Available at Oil Pier No. 4 only.

Also see "Berthing".

FRESH WATER: Available alongside by pipe-line at all shipping berths. Also available alongside and at outer anchorage by private barges.

At times due to water shortage vessels are required to arrive with sufficient water for duration of stay.

FUEL: In addition to coal, 3 grades of petroleum are available – furnace oil, light diesel oil and high speed diesel oil. Furnace oil can be supplied by pipe-line at all berths. Light diesel only at Berths 1 to 4. Large quantities can be supplied by pipe-line at the Bulk Oil Pier only.

DRY DOCKS: The Karachi Shipyard and Engineering Works Ltd. have 2 dry docks. One of 609 ft.×90 ft.×18 ft. above keel blocks which can accommodate vessels up to 25,000 d.w.t. and the second dry dock measuring 560 ft.×80 ft.×16 ft. above keel blocks and can dock vessels up to 18,000 d.w.t. Prior booking of the dry dock is essential.

REPAIRS: Repairs can be carried out at the anchorage except in the monsoon season. 2 ship repair jetties are available in the port. In addition, Karachi Shipyard and Engineering Works Ltd. provide all kinds of repair and ship-building facilities.

Immobilisation of Main Engine: Requests for immobilisation must be included by the Master of the vessel in their arrival messages so that the permission of the Deputy Conservator, Karachi Port Trust may be obtained for the period required to carry out maintenance and necessary repairs. Oil Tankers are not permitted to immobilise engines, particularly at oil pier berths.

CARGO GEAR: *Cargo Gear Certificate:* The Dock Labour Safety Officer (Government Department) is very strict and requires all gear/derricks/winches and accessories to have valid certificates. In the event their certificates are out of date, delays will be incurred before cargo discharge operations are allowed to commence.

HOLIDAYS: Eid-ul-Azha; Muharram; Republic Day (23rd March); Eid e Miland un Nabi; Independence Day (14th August) Defence of Pakistan Day (6th September); Jamat-ul-Wida; Eid-ul-Fitr; Anniversary of Death of Quaid-e-Azam; Christmas Day and Birthday of Qaid-e-Azam (25th December).

TIME: GMT plus 5 hours all year round.

AIRPORT: Karachi Airport, 7 miles from city. International connections to all parts of the world.

SHORE LEAVE: Shore passes are granted by Immigration Authorities when they first go on board and must be returned on departure of the vessel. These passes permit entry/exit to the docks until 2200 hrs.

Indian crew are not allowed ashore except in emergency. An Immigration policeman will remain on board in port where Indian crew are carried. This policeman will ask for some sort of accommodation. This need only be given if it does not cause inconvenience to the ship.

SHIP SUPPLY SERVICE: There are privately operated services for transportation of personnel and some essential stores, etc., for ships lying at Outer Anchorage to inside the port. These services are of a small scale and carried out by small launches, only during good weather. In bad weather such as monsoon season these services are suspended.

GENERAL: The Karachi Port Authorities advise that in order to avoid delays to ships requiring abreast berths for working cargo, it has been decided not to berth more than 1 vessel for receiving supplies of fresh water and bunkers. Ships due to call at Karachi are therefore *recommended to arrive with sufficient fresh water and bunkers to last for two or three weeks from the date of arrival at the outer anchorage.*

DEVELOPMENTS:

Modern integrated container terminal for third generation vessels to be built and be ready in 1989 (1st phase). One container crane already commissioned at Berth No. 23.

4 general cargo berths completed and commissioned for operations 1984.

New oil products terminal to be built and ready by 1987 for 75,000 d.w.t. tankers.

2 new Voith-Schneider tugs with 35 tons bollard pull and 2 modern seagoing pilot boats under construction and ready for operations in 1985.

SHIPMASTER'S REPORT: January 1980: Survey Vessel.

Approaches/Pilotage: There were a large number of ships anchored in the approaches – even in the "Prohibited Anchorage Zone".

Port Control system: Contact must first be made by Aldis lamp, and a vessel's arrival is not acknowledged until this has been done. On our first visit we had some trouble as the actual Signal Station is not at the position marked "Signal Station" but at 24° 48.8′ N., 66° 57.0′ E. marked F.S. on the Chart. I was politely informed on the VHF that unless I contacted them by Morse lamp, they would not be able to speak to me on the VHF.

The Pilot boards 2 miles S.W. of the breakwater – if vessel comes closer it will be sent out again. Manropes are required for the ladder.

Quarantine: The normal message should be sent 24 hours before arrival. A doctor boarded on arrival alongside, and required Vaccination Lists, together with the Maritime Declaration.

Port Officials: Immigration/Docks/Customs: A vessel bound for Karachi would do well to get a set of local forms from the Agent in advance.

The main Customs Declaration is very detailed.

Ship's own Personal Effect Declaration lists showing, in addition, beer, watches, cameras, and foreign currency, were accepted.

At least 12 copies of the Crew List on arrival are required, plus 2 Sailing Crew Lists.

When all other Officials have finished, the Customs seal up the Bond.

Special Warning: Pakistan is a Muslim country. Notices should be displayed warning that it is prohibited:

1. To use cameras.
2. Give alcohol to locals.
3. Change money without obtaining a proper receipt.

Berths: We called at Karachi twice, and each time, in spite of a very full port, Agent managed to obtain a berth alongside.

Explosives: Loaded ex-barge, whilst alongside. No problems. Shore stevedore gang used.

Bunkers: Ex-road wagon, well organised and quick.

Water: Ex-quay. Good rate. Good quality.

Lub Oils: Received two drums of Stern Tube Oil, which we had not been able to obtain elsewhere.

Divers: The services of a diver were used to clear fouling from engine cooling water intakes.

Ship Chandler: Only fresh vegetables and some chickens were purchased, but these were good quality.

Laundry: Good and fast.

Watchmen: Supplied by Shipwrights. With the rise and fall of tide in Karachi, the gangway needed constant attention. Nothing was reported stolen.

Repatriation: Possible.

AUTHORITY: Karachi Port Trust, Head Office, Mereweather Tower, Bunder Road, Karachi 2. *Tel:* 202740/49. *Telex:* 2739 Kpt Pk. *Cables:* Portrust, Karachi. *Contact:* S. F. Rab, General Manager – Operations.

PORT MUHAMMAD BIN QASIM: 24.46 N. 67.21 E. (See Plan Book)

PORT LIMITS: Seaward Boundaries: Area enclosed within the following geographical co-ordinates:

(a)	Lat. 24° 42′ N.	Long. 66° 56′ E.
(b)	Lat. 24° 47′ N.	Long. 67° 07′ E.
(c)	Lat. 24° 28′ N.	Long. 67° 05′ E.
(d)	Lat. 24° 32′ N.	Long. 67° 13′ E.

DOCUMENTS: 3 Stowage Plans, 2 Bills of Lading, 2 Freight Manifests, 3 Cargo Manifests, 3 Hatch Lists, 10 Crew Lists, Ship's Certificates, Deck Cargo Certificates, Dangerous Cargo Certificates, 2 Customs Arrival Reports, 3 Stores Lists, Last Port Clearance, Property Declaration.

PILOTAGE: Compulsory. Licensed Pilots are available. Pilots embark one nautical mile off Fairway Buoy (Lat. 24° 33′ N., Long. 67° 03′ E.). Pilot boats carry "H" flag when carrying Pilots. Usual safety measures to be taken during boarding and disembarkation of Pilots.

Give 48 hours' and 24 hours' notice to Manager – Harbour Operations by cable/Telex and later contact by VHF on Channel 16 about 12 hours before arrival.

Caution: During S.W. monsoon buoys are liable to shift, shoals exist outside the marked Navigation Channel.

ANCHORAGES: Geographical position:

(a)	Lat. 24° 35′ N.	Long. 67° 00′ E.
(b)	Lat. 24° 35′ N.	Long. 67° 02′ E.
(c)	Lat. 24° 32′ N.	Long. 67° 00′ E.
(d)	Lat. 24° 32′ N.	Long. 67° 02′ E.

Holding ground is good (medium sand) but during S.W. monsoon heavy swell persists and it is advisable to anchor near Western proximity of the anchorage and pay out extra cable.

RESTRICTIONS: Night pilotage likely to commence October, 1984. Presently night pilotage available in emergencies only.

MAX. SIZE:

Periods	*Berths*	*Max. Draft* (m.)	*Max. LOA* (m.)	*Max. Beam* (m.)
(i) Monsoon				
16th May to 15th September	IOC Berth	10.5	201.0	25.3
	MW Berths			
	1 to 4	10.0	183.0	25.0
	5 to 7	10.5	183.0	25.0
(ii) Non-Monsoon				
16th September to 15th May	IOC Berth	12.0	225.0	25.3
	MW Berths			
	1 to 4	10.0	183.0	25.0
	5 to 7	11.0	183.0	25.0

Note: 1. Draft is subject to change monthly and without any notice.
2. Minor deviation permissible at the discretion of Port Qasim Authority on submission of Indemnity.

HEALTH: Pratique normally granted only after berthing. If the vessel is not coming from yellow fever area then Pratique usually automatic.

RADIO/VHF: Send all messages via Karachi Radio, call sign ASK, MF 500 kHz, 466 kHz, 484 kHz, HF 8644 kHz, 1302 kHz, 3024 kHz, 8361.2 kHz, 12541.8 kHz and 8658 kHz.

Karachi Radio can also be contacted on Radio telephony on following frequencies:

Channel	*MHz*
16	158.80 VHF
10	156.50 VHF
07	160.95 VHF
02	160.70 VHF
05	160.85 VHF

Contact should be made with Port Qasim Control as soon as within VHF range and ETA transmitted. Berthing and boarding of Pilot instructions are given on VHF by Port Qasim Control on following Channel/Frequencies:

Channel	*MHz*
16	156.800 VHF
10	156.500 VHF

Round the clock watch on above Channels is maintained.

RADAR: No shore based radar at present.

TUGS: 3 tugs namely "Chara", "Gharo" and "Kadiro" assist vessels and they join the vessel about 1.5 miles off the jetty. Each tug 3,500 b.h.p., bollard pull approximately 40 tons. In addition two light tugs each 1,000 b.h.p. are available. Ship's lines are usually used.

BERTHING: 7 multi-purpose berths along a marginal wharf for general cargo handling and one special berth for bulk handling of iron ore and coal for steel mills.

Lengths of the berths at Marginal Wharf, 200 m. each, and at IOC Berth is 279 m.

Loading and discharging is normally carried out by ship's gear at Marginal Wharf.

CRANES/EQUIPMENT: No rail mounted shore based cranes are available, however, mobile cranes and other cargo handling equipment as mentioned below are available for hire.

10 mobile cranes	: Capacity ranging from 1 ton to 35 tons
39 forklift trucks	: Capacity ranging from 3.2 tons to 9.0 tons
37 tractor towing units	: Capacity ranging from 1 ton to 4.5 tons-bar pull
73 trailers	: 20 tons

BULK CARGO FACILITIES: For iron ore, coal and manganese ore; length of berth: 279 m.; depth alongside 13.0 m. Two gantry cranes with grabs each weighing about 12 tonnes; together they discharge 15,000 to 18,000 tonnes (approx.) per day of 24 hours. Cargo is directly carried to steel mills by means ofconveyor belt 4.5 km. long. Maximum height of discharging grab above jetty level is 20 m.

SPECIALISED CARGO HANDLING FACILITIES: None at present.

BRIDGES: None.

STEVEDORES: Integrated terminal operation carried out by cargo handling companies appointed by Port Authority. Average handling rate per hook hour for following commodities is:

Rice	: 43.0 tonnes
Pig Iron	: 38.0 tonnes
Cotton	: 12.0 tonnes
General Cargo	: 10.0 tonnes

12 hours' advance notice to be served in order to arrange gangs.

Working Hours: 0800 – 1600, 1600 – 2400, 2400 – 0800.

MEDICAL: Services available through local Agents; presently hospital facilities are available at Karachi.

TANKERS: No facilities available at present.

DENSITY: Average density of water is 1025.

FRESH WATER: Available through shore connection and by barge.

FUEL: Available through local oil companies, delivered by oil barge or road tankers.

FIRE PRECAUTIONS: Normal fire precautions, fire hydrants are located at Marginal Wharf and I.O.C. Berth. Port has two fire tenders (water and foam) plus 5 fire trailers (heavy duty) with water and foam to fight fires.

CONSULS: Available at Karachi.

REPAIRS: All types of repairs can be carried out through private contractors of which prior notice, with details, must be given to Agents in good time.

DRY DOCKS: None at Port Qasim, however, available at Karachi Port.
SURVEYORS: Cargo Surveyors available, services if required can be arranged through local Agents; also Classification Surveyors of various societies such as Lloyd's Register, American Bureau, Bureau Veritas, etc., have local offices in Karachi.
GANGWAY/DECK WATCHMEN: Provided by ship.
HATCHES: Opening and closing by ship's crew.
CUSTOMS ALLOWANCES: 200 cigarettes and 6 ozs. of spirits (for non-Muslims only) per week.
CARGO GEAR: Heavy lift cargo and normal loading/discharging carried out by ship's gear. Mobile cranes available on hire on request.
REPATRIATION: Possible. Advisable to give prior notice to Agents to complete formalities.
AIRPORT: Karachi International Airport is approximately 30 km. from Port Qasim and is served by regular national and international airlines.
TIME: GMT plus 5 hours throughout the year.
HOLIDAYS: Fridays and Government of Pakistan gazetted holidays.
POLICE/FIRE/AMBULANCE: Bin Qasim Police Station Tel. No. 419811-12, extension 2224. Fire brigade service phone: dial 03. Tugs equipped with fire fighting equipment available. Ambulance: Stationed in port – services may be requested via Port Control on VHF or by dialling 21.
EMERGENCY CO-ORDINATION CENTRE: Pakistan Navy frequencies – 500 and 8364 kHz. on HF and 282 and 243 MHz. on VHF.
TELEPHONES: Facilities for installing telephones on board not available, however, telephone calls can be made by telephones in the C.H.C. offices, located on jetties.
SERVICES: All facilities such as compass adjusting, radio and radar repairs, tank cleaning, etc., can be arranged through respective shipping Agents.
BANKS: National Bank of Pakistan, Tel. No. 719700 – 09 extension 93.
STORING: Stores supplied by trucks only. Trucks can proceed alongside ships on berths. Forklifts can be used to handle stores. Customs regulations require shipping bills, IGM/EGM, Bill of Entry, etc., regarding permission to bring stores on board.
SHORE LEAVE: Shore passes issued by Immigration Authority to ship's crew.
IDENTIFICATION CARDS: Only valid shore passes used as identification.
REGULATIONS: As per Gazette of Pakistan notification No. S.R.O. 42 (KE)/81 dated: 17th October, 1981.
DELAYS: None.
DEVELOPMENTS: Establishment of Container Terminal and Oil Tanker Terminal are in future development plans.

SHIPMASTER'S REPORT: September 1982.
Port Limits: A vessel is considered to be an arrived ship when she is in the anchorage marked on the chart West of fairway buoy. Vessel must register with Port Bin Qasim Control as an arrived ship and only when same confirmed by the port can the Master tender notice of readiness. Pilot boards about 1 nautical mile off fairway buoy.
Documents: Same as for Karachi. Keep extra Crew Lists at hand. Private property declaration must contain serial numbers, make, etc., wherever possible. All currency must be declared.
Pilotage: Give 48 hours' and 24 hours' notice to Bin Qasim Pilot Control by cable and later contact them by VHF Channel 16, about 12 hours before arrival.
Anchorage: Outer anchorage is in area bounded by position A, B, C, D with following co-ordinates.

(A)	Lat. 24° 35′ 00″ N. Long. 67° 00′ 00″ E.	(B)	Lat. 24° 35′ 00″ N. Long. 67° 02′ 00″ E.
(C)	Lat. 24° 32′ 00″ N. Long. 67° 00′ 00″ E.	(D)	Lat. 24° 00′ 00″ N. Long. 67° 02′ 00″ E.

Holding ground is good but during S.W. monsoons heavy swell persists and it is advisable to anchor near Western proximity and pay out extra cable.
Restrictions: No night pilotage. Vessel must dock before dark and similarly must sail out in sufficient time to clear the channel before dark. Draft restrictions as per tide. Heavy swell/tide runs across the channel at S.W. monsoons.
Max. Size: Presently max. size is 50,000 d.w.t. but main limiting factor is the depth of water in the channel which varies with the tide.
Health: Pratique granted only after berthing. Radio Pratique not possible.
Radio: Send all messages via Karachi Radio. Contact should be made with Bin Qasim Port Control as soon as within VHF range on Channel 16 and ETA given. Berthing instructions are given on VHF.
Tugs: Port has two tugs and they join the vessel about 1.5 miles from the jetty. Usually ship's lines are used for tugs.
Berthing: Iron ore and coal jetty owned by Pakistan Steel Mills for importing coal and iron ore for the steel plant. Jetty is 900 ft. long, 12.80 m. depth alongside.
Cranes: Two cranes with grabs each weighing about 11 tons. Together they can discharge bulk coal at approximately 15,000 tonnes per day of 24 hours. Cargo is carried directly to the steel mill by conveyor belt – about 2 miles long.
Bridges: None.
Stevedores: Pakistan Steel Mills personnel.
Medical: No facilities exist in Bin Qasim. All medical facilities in Karachi.
Density: Salt water.
Fresh Water: Available by shore connection. Costs about Pak. Rs.45/– per ton.
Fuel: Not available.
Consuls: At Karachi.
Repairs: Only very minor repairs possible by workshops from Karachi. Prior notice with details must be given to Agents in good time.
Dry Docks: None.
Surveyors: Available from Karachi.
Gangway/Deck Watchmen: Not necessary.
Hatches: Opening/closing carried out by crew.
Customs Allowances: One bottle spirits and 200 cigarettes per week. Before arrival Master must collect all cameras to be placed under seal by Customs.
Cargo Gear: Shore gear is used.
Repatriation: Possible. Advisable to give prior notice to Agents to complete all formalities prior arrival.
Airport: Karachi International airport is about 35 miles from Port Bin Qasim.
Time: GMT plus 5 hours throughout the year.
Telephone: Available on jetty only.
Shore Leave: Shore passes issued by Immigration and crew allowed ashore.
Delays: Usually none.
General: All the information above is for Iron Ore and Coal Jetty at Port Bin Qasim only.

I called at this port on 25th with 27,100 tonnes of coal in bulk from Newcastle (N.S.W.) and sailed out on 27th.

I was asked to arrive at a maximum draft of 10.00 m. For deep drafted vessels Pilot normally boards about 2.5 hours before HW so that vessel docks alongside at HW. The channel (about 25 miles) is dredged to 11.30 m., while alongside berth and in the turning basin off the berth the depth is 12.80 m. However, in my case the Pilot boarded about 2 hours after HW and by the time vessel tied up alongside it was almost LW. All along the channel I noticed that there was at least 2 m. clearance under the keel at all times.

AUTHORITY: Port Muhammad Bin Qasim Authority, P.O. Port Qasim, Karachi-48, Pakistan. *Tel:* 719700-09. *Telex:* 2633 Qasim Pk. *Cables:* Port Qaty. *Contact:* Rear Admiral A. Waliulla, Chairman. Captain W. M. Ansari, Operations. Captain Khalid Ali Khan, General Manager – Operations.

NOTES

Please also advise Shipping Guides Ltd.

Republic of Panama

AGUADULCE: 08.14 N. 80.30 W. (See Plan Book)

LOCATION: The port of Aguadulce is located 7 km. from the coast on the Palo Blanco inlet in the Bay of Parita, Pacific coast of Panama.

The port consists of a single quay 70 m. long used mainly for shipment of bulk sugar and molasses to ports in the U.S.A.

DOCUMENTS: The same documents are required and the same procedures are followed as for Almirante, Puerto Armuelles and Bahia Las Minas. See "Almirante".

PILOTAGE: There is an official pilotage service with Pilots available 24 hours a day. Pilotage is compulsory for all vessels greater than 150 g.r.t., wishing to enter and leave the port. To request the Pilot, the vessel's Agent must make arrangements with the National Port Authority. The pilot station is in Aguadulce. Vessels can also ask for Pilot by calling the National Port Authority on Channel 12 VHF.

ANCHORAGE: Vessels must await the Pilot at the anchorage located near the sea buoy which is painted white with a white light flashing every 2 seconds. Position of the buoy is Lat. 08° 13′ N., Long. 80° 25′ W. Depth of water at the buoy's location is 7.4 m. (22 ft.), average low tide, and in places 1 mile to the N.E. it increases to 10.14 m. (30 ft.).

RESTRICTIONS: The port is on an inlet. It has an access channel 13 km. long from the sea buoy. The width of the channel varies from 200 m. in its widest part down to 75 m. at its narrowest.

The channel is marked by buoys which are lit and coming from the sea the buoys on the starboard side are red with even numbers and red lights and those on the port side are green with odd numbers and green lights.

The port is tidal and vessels may only enter and leave on the high tide. At low water the access channel has depths of less than 1 m. (3 ft.) for which reason the maximum draft permitted in the port is 6.4 m. (19 ft.) with 6.1 m. (18 ft.) high tides. Furthermore, inside the inlet there are fairly sharp curves which do not permit entry of vessels greater than 100 m. overall length and 2,500 g.r.t. In the future it is planned to dredge the access channel to provide minimum depths of 3.3 m. (10 ft.) at low tide.

HEALTH: As with other Panamanian ports, the doctor boards the vessel with the other officials of the reception commission. If there is any infectious illness on board, the Master must communicate this to the Port Authority by VHF Channel 12.

VHF: The Port Authority has VHF equipment. Call on Channel 12. It operates throughout the day.

TUGS: None available.

BERTHING: There is a main quay 70 m. long with an average low water depth of 3.3 m. (10 ft.) There is also a small quay 30 m. long which is not used. The quay has a fender system. There is also a dolphin type quay for shipment of molasses with depth 2.7 m., and a 50 m. berth for sugar carriers, which has automatic sugar loaders, depth 2.7 m.

No loading equipment available. Unloading must be by ship's gear. There are belt type sugar loaders. Mobile cranes can be contracted in Aguadulce.

There are two storage tanks for molasses of 1,000,000 and 500,000 gallons capacity respectively.

There are also open air facilities for storage of general cargo.

STEVEDORES: Loading and unloading work is carried out by a gang of local workmen contracted by the ship's Agent, via their representative.

FRESH WATER: Available via tanker lorries. No supply via pipes.

FUEL: None available.

POLICE/AMBULANCE/FIRE: Available in Aguadulce 5 km. from the port.

REPAIRS: No facilities.

PROVISIONS: Supplies available in Aguadulce.

TIME: GMT minus 5 hours.

CONSULS: None; the nearest are in Panama City 193 km. from the port by road.

MEDICAL: Hospital in Aguadulce.

CUSTOMS ALLOWANCES: See "Almirante".

TELEPHONES: Telephone communication from the port by public telephone by micro-wave to any part of the world. No facilities for phones on board vessels.

DENSITY: Approximately 0.9971 gm./c.c. at 85° F.

SHORE LEAVE: No restrictions.

REPATRIATION: There are Immigration Officials on the quay. Repatriation presents no difficulty.

COMMUNICATIONS: The port is connected to the town of Aguadulce by an asphalt highway 5 km. long.

Aguadulce is connected to Panama City by road, the capital being 193 km. distant.

AIRPORT: At Aguadulce there is a small airstrip. There is an airport at Chitre 60 km. from Aguadulce and where a local airline effects two trips between this town and the airport of Paitilla in Panama.

AUTHORITY: National Port Authority, Apartado 8062, Panama 7, Panama. *Tel:* 69-5444. *Telex:* 2765. *Contact:* Lic. Nander A. Pitty V., Director General; Ing. Carlos Urriola, Director of Operations.

National Ports Authority – Aguadulce, Carretera del Puerto, Aguadulce, Provincia de Cocle, Panama. *Tel:* 97-4264. *Contact:* The Port Administrator.

ALMIRANTE (Bocas del Toro): 09.18 N. 82.23 W. (See Plan Book)

LOCATION: Located in Almirante (Bocas del Toro) Bay, on the N.E. end of the Atlantic coast of Panama.

The Port of Almirante consists of a pier 204.5 m. long used for loading bananas. The port is used principally by reefer vessels coming from Europe and bound for European ports.

The port was built by the United Brands Company and later transferred to the Government. Currently, it is rented by United Brands but is administered by the National Port Authority.

DOCUMENTS:

2 General Declarations.
1 Clearance from last port.
5 Cargo manifests or declaration that no cargo is carried.
2 Crew lists.
4 Passenger lists or declaration that no passengers are carried.
2 Supplies declarations for crew or declaration that there are no supplies.
2 Crew personal effects declarations.
1 Maritime Health Declaration.
2 Mail lists.
1 Bill of lading (1 copy of each).

The above documents must be presented by the Master of the vessel when the Reception Commission boards the ship, this Commission comprising the following: National Port Authority, Customs, Immigration, Health (Doctor), Vegetable Health and National Guard.

Once the Reception Commission finds the documents to be correct, Free Pratique is given enabling the vessel to commence operations.

PILOTAGE: Pilotage is compulsory for vessels entering Almirante.

The service is provided by a private Pilot who has his station in the town of Bocas del Toro. To request his services, the Agent must make arrangements with the Port Administration. Vessels using Almirante frequently take the Pilot on board in the Bay of Almirante, in front of the town of Bocas del Toro. The pilot cutter is blue with white superstructure, and has VHF radio. To communicate with the cutter, call up on VHF Channel 12 and Channel 16, with SSB fitment.

The Port Authority has established an official pilotage service, and all arrangements for the services of the Pilot must be made with the Port Authority. For vessels arriving for the first time in Almirante, they must anchor outside the entrance of Bocas del Toro aligned at 150° to 180° to Toro Point and 8 cables off. At this point, they must await the Pilot.

ANCHORAGES: Within the Bay of Almirante there are good locations with depths up to 27.4 m.

In front of the quay there is space to anchor with depths of 15.2 m. – 18.3 m.

RESTRICTIONS: The entrance channel has a minimum depth of 9.2 m. and is marked by buoys and light floats as indicated on the Port Nautical Charts. Also see "Developments".

Shipmaster's Report: The water depths on passing Bocas del Toro are greater than 9.2 m. as you follow the charted course lines.

Proceeding at a reduced speed consisting of "dead slow" and "stop", with enough manoeuvrability, to minimise the vessel's pitching, you can enter or leave the Bocas del Toro with a draft of 7.9 m. without any difficulties.

On entering and leaving I was forced by cargo circumstances to berth with a 7.9 m. deepest draft, and never had less than 3.05 m. below my vessel's keel (deepest section), at low water.

MAX. SIZE: There are no restrictions as to beam and size of vessel; but as far as draft is concerned this must not exceed 9.2 m.

Bocas del Toro can be entered and left with drafts of 8.84 m. without difficulty.

HEALTH: The doctor on boarding the vessel with the Reception Commission receives his documents and declares Free Pratique.

In the event of illness on board, Agent must be advised by VHF radio and this will be passed on to the doctor.

RADIO: Cables for and from the Agent are sent by radio operated by Tropical Radio Telegraph Co. The Port Authority has VHF and SSB equipment. The SSB equipment operates on the call-up frequency of 7447.5 kHz.

VHF: VHF communications can be made on Channel 12 at a distance of 30 miles from the port. Furthermore, United Brands Co. has VHF equipment which receives calls on Channel 16.

TUGS: None available.

BERTHING: A banana quay 204.5 m. long with a single mooring frontage and with 4 automatic banana loaders. It is recommended that vessels moor on the starboard side. Also there is a general cargo quay 103.05 m. long which has pipes for discharge of refined oil. The depth at the quay is 7.3 m. – 9.7 m.

Equipment: 4×4 tonne forklift trucks, 1×5 tonne mobile crane.

STEVEDORES: Loading work is carried out by the local Workers Union. The Agent must make contact with United Brands Co. for these workers.

TANKERS: Quay No. 2 fitted with pipes for discharge of refined products.

FRESH WATER: Available throughout the year. The pumping capacity is 2–3 t.p.h.

FUEL: Not available.

REPAIRS: No facilities for repairs to vessels.

PROVISIONS: Obtainable in the local market; but it is preferable for provisions to be obtained in Colon.

TIME: GMT minus 5 hours.

CONSULS: Costa Rica, El Salvador, Honduras, Nicaragua.

MEDICAL: A modern hospital is available in Changuinola 20 km. from Almirante. Almirante also has a small hospital.

CUSTOMS ALLOWANCES: The Customs offices are in the port vicinity. Permitted quantities are 2 packs of cigarettes of 20 packets each per crew member and 2 bottles of whisky or other alcoholic drink per crew member for consumption on board.

TELEPHONE: There is a micro-wave telephone service to Panama and other places in America. The Port Authority has telephones in their offices, but there are none available for installation on vessels.
OPENING/CLOSING HATCHES: Carried out by stevedores.
DENSITY: 1.022 gm./cu.cm.
SHORE LEAVE: No restrictions.
POLICE/AMBULANCE/FIRE: Available in Almirante.
REPATRIATION: Can be effected without difficulty.
AIRPORT: There is a small airport at Changuinola 21 km. from Almirante, which connects the province of Bocas del Toro with the rest of the Republic. There are 2 flights a day between the airport of Changuinola and General Omar Torrijos Herrera in Panama City. Changuinola is connected with Almirante by railway.
DEVELOPMENTS: It is planned to reposition the buoys marking the port entrance channel for the purpose of obtaining a minimum depth of 9.7 m. along the whole of the port access channel.
AUTHORITY: National Port Authority, Apartado 8062, Panama 7, Panama. *Tel:* 69-5444. *Telex:* 2765. *Contact:* Lic. Nander A. Pitty V., Director General; Ing. Carlos Urriola, Director of Operations.

Port Administrator-Almirante, *Tel:* 78-9301.

BAHIA LAS MINAS (Colon): 09.24 N. 79.49 W. (See Plan Book)

LOCATION: Situated 11 km. to the East of the entrance of the Panama Canal on the North Coast.
DOCUMENTS:

2 General Declarations.
1 Clearance certificate from last port of call.
5 Cargo manifests, or declaration to the effect that no cargo is carried.
4 Passenger lists, or declaration that no passengers are onboard.
2 Supply lists, or declaration that no supplies are carried.
2 Lists of Crew's personal effects, or declaration that none carried.
1 Maritime Health Declaration.
2 Mail lists or declaration that no mail is carried.
2 Crew lists.

PILOTAGE: Compulsory for all vessels entering the port and is offered by the Pilots of the Marine Department of the Refineria Panama S.A.

Vessels must await the Pilot beyond buoy No. 1 painted white, with a flashing white light every 3 seconds. The best position for anchoring is near buoy No. 1 in position Lat. 09° 25′ 30″ N. Long. 79° 40′ 35″ W. where there is a depth of 63 ft. to 66 ft.

Vessels wishing to enter the port may call up the Port Authority on VHF Channel 12 or Refineria Panama on VHF Channel 16.

The Pilot craft has a black hull and white superstructure. When weather conditions are bad, a tug is used for boarding vessels.

The boarding ladder is placed in accordance with conditions of the sea.

Vessels may also ask for a Pilot via their Agents who will communicate the request to Refineria Panama. In this case, they must give an ETA 12 hours in advance.

RESTRICTIONS: The port of Bahia Las Minas is mainly an oil port, specialised in importing crude oil and exporting refined products, being operated from an oil aspect by Refineria Panama S.A., and administered by the National Port Authority.

Apart from the tanker quays, there is a small quay for handling general cargo, length 90 m. This quay is administered and operated by the National Port Authority. The access channel to the port has a width varying from 300 m. in its widest part to 100 m. in its narrowest part, and a minimum depth of 40 ft. at the tanker quays. However, the general cargo quay can only take vessels of up to 23 draft. Tidal variation in this port is less than 1 ft., and so there are no restrictions for entry and leaving relating to tides.

MAX. SIZE: The port can be used by vessels up to 240 m. LOA at its tanker installations and their draft may not exceed 40 ft.

The general cargo quay can be used by vessels up to 152 m. LOA and 23 ft. draft. However, restrictions in vessels' lengths vary when the quay is used by Ro/Ro vessels which tie up by the bow or the stern, and in this case vessels up to 600 ft. length are permitted.

HEALTH: When a vessel arrives it must hoist the yellow flag of the International Signalling Code. Free Pratique will be granted by the Reception Commission after handing over of documents (See "Documents".) In the case of illness on board, this must be communicated to the vessel's Agent so that he may pass on the information to the Authorities. The vessel may not moor or carry out any operations until the doctor has come on board and verified that the illness does not constitute any danger.

RADIO: Vessels may communicate via the coastal station of the Panama Canal. Generally speaking, the same ships' agencies operating in the Canal are those who represent vessels arriving at Bahia Las Minas.

VHF: The Port Authority has VHF equipment at Colon which operates 24 hours a day on Channels 12 and 16.

For calls to the Port Authority, Channel 12 must be used. Refineria Panama also has VHF radio equipment and calls must be made via Channel 16.

RADAR: There is no radar service.

TUGS: Refineria Panama S.A. supplies this service to vessels which may require it. There are 4 tugs available. Generally, tugs work at the bow and stern of the ship, and lines must be fixed by the vessel's crew.

BERTHING:

Quay	*Length*	*Depth (Average low tide)*
Tanker quay	140 m.	40 ft.
2 lighter quays (refined products)	75 m. each	20 ft.
General cargo quay	90 m.	23 ft.

CRANES: There is no cargo handling equipment on the general cargo quay. All unloading must be by ship's gear.

SPECIAL CARGO FACILITIES: The dry cargo quay is used by Ro/Ro vessels making regular trips between Miami and Panama. The port offers unloading and loading services to these vessels.

The oil quays have special equipment for unloading and loading oil and its derivates.

STEVEDORES: These are provided by the Colon Port Workers' union, and must be contracted by the ship's Agent. Working hours: 0700 – 1500 hrs. and 1700 – 0100 hrs.

MEDICAL: Hospital available in the town of Colon 15 minutes from the port.
FRESH WATER: Available.
FUEL: Pipe-lines are available at all oil quays, but no such facility is available at the general cargo quay.
PROVISIONS: These can be obtained in the town of Colon via local suppliers, the Agent making the necessary arrangements.
DENSITY: 1.0212 grams per cu.cm. at 85° F.
TIME: Local time is GMT minus 5 hours.
CONSULS: Denmark, Finland. Norway, South Africa, Sweden, U.K.,
REPAIRS: Refineria Panama S.A. has a machine shop for minor repairs.
TELEPHONE: None available for connection to vessels. Available in the Port Authority offices. Tel: 42-1658.
AIRPORT: There is a small runway at Colon. At Panama, 90 km. from Colon, is the airport General Omar Torrijos Herrera, which is an international airport, served by the main world airlines.
HOLIDAYS: 1st January, 9th January, Mardi Gras, 1st May, 11th October, 2nd and 3rd November, 4th November, 8th and 25th December.
POLICE/AMBULANCE/FIRE: Available in Colon. Refineria Panama has a small fire brigade, and also in the town of Colon, 15 km. away, there is a fire brigade.
REPATRIATION: This can be done without difficulty via the Immigration offices.
SHORE LEAVE: No restrictions; but due to the distance between the port and Colon, a taxi service must be used. The tariff in a Refineria Panama taxi to Colon is approximately 5 U.S. dollars.
SERVICES: No special services offered. In the ports of the Canal it is possible to have compass adjustments, laundry, chemicals, etc.
AUTHORITY: National Port Authority, P.O.Box 8062, Panama 7, Republic of Panama. *Tel:* 69-5444. *Telex:* 2765. *Contact:* Lic. Nander A. Pitty V., Director General; Ing. Carlos Urriola, Director of Operations.

National Port Authority, Bahia Las Minas, Colon, Republic of Panama. *Tel:* 42-1658, 47-9181. *Contact:* Port Administrator.

BALBOA: 08.58 N. 79.34 W. (See Plan Book)

(N.B. For items not listed below, see "Panama Canal".)
DOCUMENTS: See "Panama Canal".
PILOTAGE: Pilotage in the port of Balboa is compulsory, and is effected by Pilots of the Canal Commission.

Vessels arriving for the purpose of using the port area in order to make use of a port facility must also pay for the pilotage service, which will be requested by the Agent.

Vessels of 150 g.r.t. or less do not require a Pilot.

When due to "force majeure" a vessel may have to enter the waters of the port area, this may be done without using a Pilot.

With regard to pilotage, furthermore, the vessel must comply with the 4 points in the Notice to Shipping which appear under the heading "Pilotage" in the port of Cristobal.

Also see "Cristobal".

ANCHORAGES: Vessels must anchor in the various allocated areas for the port.

a) *Anchorage for Merchant Vessels:*
This area is limited by the following co-ordinates:

Lat. 8° 51′ 50″ North,	Long. 79° 30′ 00″ West
Lat. 8° 54′ 30″ North,	Long. 79° 30′ 46″ West
Lat. 8° 54′ 46″ North,	Long. 79° 30′ 00″ West
Lat. 8° 53′ 26″ North,	Long. 79° 31′ 22″ West

and continuing out to sea.

b) *Prohibited Anchorage Area:*
This is limited by the following co-ordinates:

Lat. 8° 51′ 50″ North,	Long. 79° 30′ 00″ West
Lat. 8° 52′ 47″ North,	Long. 79° 31′ 38″ West
Lat. 8° 52′ 58″ North,	Long. 79° 32′ 31″ West
Lat. 8° 54′ 15″ North,	Long. 79° 33′ 36″ West
Lat. 8° 55′ 12″ North,	Long. 79° 32′ 25″ West
Lat. 8° 54′ 17″ North,	Long. 79° 30′ 52″ West
Lat. 8° 53′ 26″ North,	Long. 79° 31′ 22″ West

and from here to the initial point.

c) *Anchorage Area for Vessels Carrying Explosives:*
This area is defined by the following co-ordinates:

Lat. 8° 52′ 47″ North,	Long. 79° 31′ 38″ West
Lat. 8° 51′ 52″ North,	Long. 79° 31′ 38″ West
Lat. 8° 51′ 52″ North,	Long. 79° 33′ 00″ West
Lat. 8° 52′ 36″ North,	Long. 79° 32′ 31″ West

and from here to the initial point.

RESTRICTIONS: Port open throughout 24 hours.

MAX. SIZE: Harbour limitations generally unrestricted as to length and beam. Depth about 40 ft. low water. Vessels in excess of 38 ft. 6 in. draft not handled during period 2.5 hours before and 2 hours after low water. Average tide 3.97 m. (13 ft.).

Tankers working cargo restricted to 700 ft. length and 36 ft. salt water draft.

TUGS: Available and assigned for berthing by Pilot. Tug's lines used at no extra charge.

VHF: Vessels must make contact with the port via VHF Channel 12. Commercial telephone calls and messages to Agents must be made via Panama Radio, VHF Channel 16.

BERTHING: No specific requirements as to arrival times. Nine berths available.

(Pleasure yachts, under 65 ft. length, may be permitted to dock at Panama Canal Yacht Club or Balboa Yacht Club after clearance by Boarding Officer and after Master has received permission from Port Captain, Customs Authorities and Yacht Club Officials concerned. Chief Customs Inspector shall have authority to grant or deny such permission at his discretion.)

Rodman Naval Station: Piers can accommodate vessels of 700 ft. length and up to 39 ft. draft for oil discharge, bunkers or stores.

NPA Dock:

Dock	*Usable length*	*Maximum S.W. draft*	*Remarks*
4	492 ft.	30 ft.	Tankers
6	742 ft.	36 ft.	Bunkering/Tankers
7	1,058 ft.	34 ft.	Containers
8	470 ft.	26 ft.	Repairs/Containers
14	775 ft.	36 ft.	Containers, Bunkering and Bulk Cargoes
15	1,146 ft.	40 ft.	
16	742 ft.	38 ft.	
18–A	500 ft.	39 ft.	General Cargo and Bunkering
18–B	500 ft.	35 ft.	
18–C, D	1,000 ft.	40 ft.	

STEVEDORES: In Balboa there are 7 ship gangs and 4 shore gangs, who are available every day of the year, 24 hours a day.

Endeavour to arrange arrival to avoid cost of "stand by" as Agent arranges gangs for 0700 hrs. or 1700 hrs. commencement. Working Hours: 0700 –1500 hrs., 1700 – 0100 hrs. Overtime possible between 1500 – 1700 hrs. and 0100 – 0700 hrs.

CARGO HANDLING EQUIPMENT: The port of Balboa has different equipment for handling cargo. To handle general cargo and containers, there are cranes with capacities of 2, 4, 10, 15, 30 and 40 tons, chassis, internal lorries, tractors of the agricultural towing type, roller platforms. Bulk cargo handling is by conveyors and suction pumps.

CRANES: Docks 14 and 15 each have a container crane with 32.5 and 40 ton capacity. These cranes are owned by Evergreen and U.S. Lines respectively, one unit moving on rail. Mobile cranes of 10 tonnes and 18 tonnes available.

The Dry Dock Department has 4 cranes: A "D-4", steam crane, with max. capacity of 50 tons, and a "D-19" diesel electric crane with max. capacity of 30 tons. These 2 cranes run on rails alongside Dry Dock No. 1, and along Docks 8 and 13, also providing service to Docks 2 and 3.

Apart from cranes "D-4" and "D-19", the Dry Dock Department has two petrol-electric portable cranes with max. 5 ton capacity.

MEDICAL: Medical attention on arrival at the port of Balboa can be immediate, since there is a First Aid Clinic with a doctor and nurse on duty by day. At night there is a nurse on duty.

DENSITY: The density of the water in the anchorages in the Port of Balboa is 1.01219 gm./cu.m., at a temperature of 85°F (63.87 lbs./cu.ft. at 85°F).

TANKERS: Max. draft 36 ft. (Under certain conditions 40 ft. draft can be accommodated). Tankers receive preferential treatment at Docks 4 and 6, and at Quays 1, 2 and 3 of the Rodman Naval Station.

FRESH WATER: Available at Docks 14, 15, 16 and 18.

FUEL: Bunker "C", marine diesel, petrol, light diesel, paraffin, HDO, LDO and FO are available at Quays 4, 6, 7, 14, 15, 16 and 18. At some of these quays, only certain of the mentioned products are available.

Rate of discharge of fuel is 2,000 – 4,000 bbls./p.h. Crew members are required to connect and disconnect fuel lines on board vessels. The vessel provides the accessories for necessary coupling adjustment to U.S. standard of 4 in. and 6 in. 150 lb. flanges.

A bunkering area has been established in the Pacific Anchorage.

REPAIRS: Emergency repairs possible. The most current repairs are: Machinery in general, welding, different kinds of painting, hull cleaning and sand blasting.

DRY DOCK: There are 3 docks, of which the main one is Dry Dock No. 1 (60,000 d.w.t.). Characteristics of Dock Nos. 1, 2 and 3 are:

Dry Dock	*Total Length* (m.)	*Width* (m.)	*Depth Max.* (m.)	*Depth Av.* (m.)	*Depth Min.* (m.)
No. 1	318.21	43.59	12.77	8.88	8.35
No. 2	111.56	28.04	8.05	4.09	3.62
No. 3	71.73	14.94	5.76	1.87	1.31

POLICE/AMBULANCE/FIRE: All quays have special connections for water to be used in fire-fighting.

The telephone numbers of the departments of police, ambulance and fire brigade which are nearest to the port are:

	Tel.
Police	104
Ambulance	64-3871 (Social Security)
Hospital	
Santo Tomas	25-1436
Red Cross	28-2786 and 28-2787
Fire Brigade	52-2592 (Balboa)

AIRPORT: The international airport of General Omar Torrijos Herrera is located 32 km. (approx.) by road. This airport has flights to different parts of the world.

TELEPHONES: Telephone services can be installed on board by arrangement between the Master and the Port Administrator.

SHORE LEAVE: Generally permitted, landing card required.

CUSTOMS: Customs and Immigration Inspection Service available Monday to Saturday from 0700 to 1700 hrs. Charges for such service after hours and on Sundays and holidays. Number of Inspectors required will be determined by Chief Customs and Immigration Inspector of port.

DELAYS: Delays in berthing, load or discharge or bunkering are minimal and infrequent. Eight hours is considered excessive.

AUTHORITY: National Port Authority, Apartado 8062, Panama 7, Panama. *Tel:* 69-5444. *Telex:* 2765. *Contact:* Lic. Nander A. Pitty V., Director General; Ing. Carlos Urriola, Director of Operations.

Balboa Port Administrator. *Tel:* 32-5844 (Ext. 103).

AGENT: C. Fernie & Co., S.A. Apartado 212. Cable Address: "Fernie-Balboa". Also VHF. Telephone Nos.: 52 5657-5371. After office hours telephone number: Panama City 26-3872.

All communications should be directed to Cristobal, Republic of Panama.

CHIRIQUI GRANDE: 08.56 N. 82.07 W. (See Plan Book)

LOCATION: The Petroterminal Transhipment Terminal is located in the Laguna de Chiriqui on the Western side of the village of Chiriqui Grande in approximate position Lat. 8° 56′ N., Long. 82° 07′ W.

The Terminal is linked by pipe-line to Puerto Armuelles Oil Terminal in the Pacific. Oil flow is one way only from the Pacific to the Atlantic Terminus.

PILOTAGE: *Pilotage for Canal del Tigre:* Pilotage for the channel leading into the Laguna de Chiriqui is optional.

Masters requesting a Pilot for the passage into the lagoon should follow the procedure outlined under "Anchorage".

The Master will act as Pilot for those vessels wishing to proceed directly to the inner (lagoon) anchorage, without taking a Pilot, and will observe all applicable Navigation Rules.

Vessels arriving and intending to proceed through the Canal del Tigre to anchor are requested to give outbound vessels priority in the use of the buoyed channel.

In sending arrival times, it should be remembered that the pilot boat requires about 1 hour to travel from the base at Chiriqui Grande to the pilot station (see "Pilot Station" below).

Pilotage/mooring/unmooring to the SBMs is available on a 24 hour basis and supplied by the Terminal on terms set out in the Terminal's Pilotage/Towage contract, which must be signed by all Masters.

Pilot Station: For arriving vessels which require a Pilot, the pilot station is in position Lat. 9° 12′ N., Long. 81° 59′ W. For ships arriving, the ladder will normally be rigged on port side (heading S.W.) approximately 4 ft. from the water and for ships departing, on starboard side approximately 4 ft. from water. Pilot ladders to be in good condition and conform to international standards.

Vessels with a freeboard of 30 ft. or more shall provide a suitable accommodation ladder in addition to pilot ladder. This ladder must be rigged on the starboard side to avoid interference with the cargo hose connection. Vessels rigged in this manner may have to turn N.E. to make a proper lee for boarding the Pilot.

The Master remains responsible for the proper navigation of his vessel, Pilot aboard or not, throughout the time his vessel is attending this facility.

Pilot Boats: Pilot boats are 36 ft. in length, with blue hull, white deckhouse with "Pilots" on either side. The boats are equipped with VHF Channels 16, 14, 13, 12, 11 and radar.

Also see "Mooring".

DOCUMENTS: The following documents are required:

2 General Declarations.
1 Clearance from Previous Port.
5 Cargo Manifests or Declaration that no cargo is carried.
3 Crew Lists.
4 Passenger Lists or Declaration that no passengers are carried.
2 Supplies Declarations (Stores Lists) for Crew or Declaration that there are no supplies.
2 Crew Personal Effects Declarations.
1 Maritime Health Declaration.
2 Mail Lists.
1 Bill of Lading.

Also see "Health".

ANCHORAGES: All vessels at anchor awaiting turn at the SBMs should maintain a radio watch with the terminal ("Rambala Control") on Channel 16 VHF calling (working Channel 14).

Vessels Not Berthing on Arrival: Pilot will be available to bring vessel into lagoon anchorage, if requested by the Master (call on Channel 16 or 14).

If Pilot is not available, vessel should anchor outside the lagoon and maintain a listening watch on VHF Channel 16. The terminal will advise vessel of docking time sufficiently in advance to make necessary preparations.

Outside: Vessels may anchor on the coastal shelf outside the lagoon. Suggested anchorage location in area Lat. 9° 12′ N., Long. 82° 00′ W. where the mud bottom provides good holding ground.

At the Master's option, the vessel may proceed to the lagoon anchorage. Vessels inbound are requested to make a VHF traffic call before entering the channel, and give priority to vessels outbound.

In Lagoon: The area to the East of the SBMs is probably the most convenient area for anchoring. The bottom of the lagoon is reported to be soft mud. Vessels should keep at least 2 miles clear of SBM if at anchorage. Suggested anchorage location between Latitudes 8° 59′ N. and 9° 00′ N. and Longitudes 82° 00′ W. and 82° 04′ W.

RESTRICTIONS: Depth at SBM 72 ft. Depth in approach channel 120 ft.
MAX. SIZE: 150,000 d.w.t.
HEALTH: *Quarantine/Pratique/Documentation:* The Port Officials will board the vessel after mooring or at the anchorage within the lagoon as the case may be.

The ship's Agent will advise the Master of the anticipated boarding time sufficiently in advance.

APPROACHES:

Laguna de Chiriqui: Laguna de Chiriqui deep-water bay, about 30 miles long, in an East/West direction, and about 10 miles wide, is bound on the East by Peninsula Valiente, on the South and West by the mainland, and on the North by Isla Popa, Cayo Agua, and the adjacent islands and reefs. Canal del Tigre, which lies between Peninsula Valiente and Cayo Agua, is the main access channel into the lagoon.

The North side of the lagoon, including the entrance is fringed by detached shoals. These lie up to about 5 miles South of the entrance and along the East shore of the lagoon. The West end of the lagoon South of the fringing reefs is almost entirely clear of dangers.

The low shores of the lagoon are indented by numerous small bays and rivers and marked by several villages.

Canal del Tigre (Tiger Channel): the North approach to Canal del Tigre lies between Roca Tigre and the S.E. side of Cayos Zapatilla to the West.

Punta Valiente (Lat. 9° 11′ N., Long. 81° 55′ W.) a bold densely wooded point, rises to an elevation of 152.4 m. to 182.9 m. (500 ft. to 600 ft.) on the East side of the East entrance to Laguna de Chiriqui. Foul ground extends about 1.25 miles West from the point and continues South about 1.75 miles to the entrance to Bluefield Creek. Cayos Valiente, a group of islets extending about 0.25 miles in an East and West direction lie on the North part of this reef. Virginia Rocks lie on the West edge of the reef about 1.25 miles W.S.W. of Punta Valiente, and Bluefield Rock, 9.8 m. (32 ft.) high, stands on the South edge about 1.5 miles South of the point.

Valiente Peak (Lat. 9° 10′ N., Long. 81° 55′ W.), a conspicuous 231 m. (758 ft.) hill, stands about 1 mile south of Punta Valiente.

Cayos Tigres (Tiger Cays), several islets lying in an East and West direction for about 1 mile, stand about 1.75 miles North of Punta Valiente. Roca Tigre, a detached 8.5 m. (28 ft.) rock marked by a white beacon, stands about 2.5 miles N.N.W. of the same point. Tiger Breakers, over which the sea breaks heavily, together with several shoal patches, lie on a bank within about 0.75 miles N.W. of Roca Tigre.

Canal del Tigre leads into Laguna de Chiriqui, this channel is buoyed (see "Navigation").

NAVIGATION: Approach to the Terminal is from approximately N.E.

The controlling depth for the port is 72 ft. (at the SBMs). There is deeper water in the approach.

The are 4 principal navigation aids available to mariners:

1. Roca Tigre Light.
2. Roca Tigre Racon.
3. Canal del Tigre buoys.
4. Terminal leading lights and daymarks.

SBMs: The SBMs are fitted with flashing white lights, and the hoses with white winker lights (Fl.W. ev. 1 sec.).

SBM No. 1 (North) Lat. 8° 58′ 04″ N., Long. 82° 06′ 27″ W.
SBM No. 2 (South) Lat. 8° 57′ 28″ N., Long. 82° 06′ 06″ W.

Terminal Leading Lights and Daymarks: Lights in line 212° – 032° (T).
Front Lat. 8° 56′ 29.8″ N., Long. 82° 06′ 47.9″ W. Fl.W. ev. 1 sec. (0.3 sec. on, 0.7 sec. off)
Rear Lat. 8° 56′ 28.9″ N., Long. 82° 06′ 48.5″ W. Oc.W. ev. 4 sec. (3.7 sec. on, 0.3 sec. off)

These lights are cylinder lights visible approximately 10° each side of transit line.

Daymarks: White panels 24 ft. in height, 12 ft. wide with 4 ft. vertical black stripe in centre.

Canal del Tigre – Channel Marking Buoys

Buoy	*Position*	*Characteristic*
No. 1	Lat. 9° 08′ 34″ N. Long. 81° 58′ 56″ W.	Fl.G. 4 sec.
No. 2	Lat. 9° 08′ 40″ N. Long. 81° 59′ 56″ W.	Fl.R. 4 sec.
No. 3	Lat. 9° 08′ 00″ N. Long. 81° 59′ 13″ W.	Fl.G. 4 sec.
No. 4	Lat. 9° 07′ 59″ N. Long. 82° 00′ 9″ W.	Fl.R. 4 sec.
No. 5	Lat. 9° 06′ 16″ N. Long. 82° 00′ 11″ W.	Fl.G. 4 sec.
No. 6	Lat. 9° 06′ 11″ N. Long. 82° 01′ 01″ W.	Fl.R. 4 sec.
No. 8	Lat. 9° 05′ 35″ N. Long. 82° 01′ 20″ W.	Fl.R. 4 sec.
No. 9	Lat. 9° 04′ 33″ N. Long. 82° 00′ 16″ W.	Fl.G. 4 sec.

All buoys are equipped with a solar panel and radar reflector built into the tower structure of the buoy.

Roca Tigre: Light exhibited from steel tower 50 m. above sea level. (Beacon on chart). Lat. 9° 13′ 02″ N., Long. 82° 56′ 28″ W. Flash ev. 5 sec. (1.5 sec. on, 3.5 sec. off). Visible 35 miles on a clear night.

Racon: Frequency range – 9500 MHz (3 cm.) swept frequency type.
Azimuth coverage 360°
Nominal range 18 miles.
Sweep period – 70 sec.
Transmission – 24 hours.

This racon operates in the marine radar band, being actuated by the ship's radar in the course of normal operation. It gives the observer his range and bearing from the position of the beacon.

The racon signal appears as narrow flash/letter "P" (· — — ·) or lengthened echo superimposed on the radar screen on the bearing of the racon, commencing at a point just beyond the racon position and continuing radially outwards, away from the vessel.

The racon sweeps the frequency band 9300/9500 MHz once every 70 seconds approximately, and the flash will appear on the screen for a few radar trace revolutions.

The number of successive flashes seen will depend on the distance of the ship from the racon site and will be fewest at maximum distance.

Range measured to the point where the flash begins will be about 60 m. greater than the range of the racon.

If interference with the normal radar display is experienced from the racon signal, it may be reduced by suitable adjustment of the differentiator or anti-clutter controls on the ship's radar set.

Terminal Lights: It is reported that the yellow lights on the crude oil tanks, located at Lat. 8° 56.6′ N., Long. 82° 08.3′ W., elevation 200 m., can be seen at a great distance on a clear night.

The red communications tower light, located 200 m. East of the crude oil tanks, and elevation of 250 m. can be similarly observed.

The white working lights within the terminal are also reported to be conspicuous.

RADIO: Notices/Time of Arrival:

A. ETAs:

ETAs may be sent via ship's Agents who will notify the Terminal. All communications with Chiriqui Grande should be in local time (ZD+5).

ETAs at the pilot station should be received by the Terminal at least 72 hours prior to the vessel's arrival and any variation of more than 4 hours advised.

B. ETAs should include:

1. Vessel's name.
2. ETA pilot station (local time).
3. Quantity of oil required.
4. Any condition that will affect loading operations, including estimated quantity of ballast to be discharged ashore.
5. Deviations from the recommended fittings.

In practice the Terminal is notified by the customer what cargo is required and the Terminal has the data on all vessels that have already visited Petroterminal.

In giving arrival times, it should be noted that the Terminal is interested in the time the vessel will arrive at the pilot station (not when the ship made "end of passage").

Notice of Readiness: Notice of Readiness is considered to be received by the Terminal when the vessel arrives at the pilot station or, if going to anchorage, when the vessel anchors.

VHF: *Radio Communications:*

Frequency Allocation

Channel	*Use*
13	Cargo handling only.
11	Alternative cargo frequency. (Use only on instruction from "Rambala Control").
14	Pilots' and boats' working Channel.
16	Calling. All vessels at anchor maintain a listening watch on this Channel.

General: Vessels at anchor within the lagoon are requested to refrain from using VHF Channel 13; since a persistent FM "Duct" causes interference with cargo operations at the other PTP Terminal at Puerto Armuelles. Channel 14 use should be minimised for the same reason.

Always identify calling vessel and vessel being called.

Vessels approaching the Terminal should establish VHF communications as soon as they are within range (about 50 miles).

The Terminal maintains a continuous listening watch on Channel 16.

Call sign for the Terminal is "Rambala Control".

Call sign for the Pilots is "Chiriqui Grande Pilots".

Vessels at anchor should maintain a listening watch on Channel 16.

Most Terminal radios are equipped with Channels 11, 13, 14 and 16.

Communications while at SBM: All communications while at the SBM will be conducted in the English language.

Deballasting and loading operations will be controlled by VHF radio communication between the vessels at the SBM and "Rambala Control" on VHF Channel 13.

The Berthing Master will bring 2 portable VHF radio units on board at the time the ship begins its approach to the SBM. One of these radios will be assigned to the person in charge of ballast and cargo operations. The person in charge must maintain this radio in his possession *at all times*. This radio must not be changed to any other channel unless instructed to do so by "Rambala Control".

All cargo communications will be identified by ship name.

Communications Failure: In the event of a complete communications failure, vessels at the SBM will indicate their inability to make VHF contact by sounding 5 long blasts on the ship's whistle or siren. At night, the vessel's signal searchlight or Aldis lamp may be used to alert control room personnel (at the base of the pier).

(It may not be possible for a vessel at the North SBM to see the Control Room while lying West of the buoy).

Agency Communications: Agents wishing to contact ships will call "Rambala Control" on VHF Channel 16 and request the operator on duty to so advise the ship.

Ships may call their Agent on Channel 16. Ship/agency business cannot be communicated on Channel 13.

Ships must use their bridge VHF, on LOW POWER, when communicating with Agents, to avoid interference with cargo communications.

The cargo operations radio must not be used for agency traffic, or changed from Channel 13 unless so directed by "Rambala Control".

TUGS: *Floating Equipment:* 2×36 ft. Mon Ark Pilot Boats, equipped with radar and echo sounder. 2×6V-71 GM engines.

2×42 ft. Mooring Launches (DAMEN). 1×8V-71 GM engine.

1×1,000 h.p. 85 ft. tug "Carey".

1 Work Barge equipped with 40 ton crane, accommodation and workshops, 140 ft.×40 ft.

1×30 ft. Marco Oil Skimmer Boat.

Various small boats powered by outboard engines.

SBMs: The catenary anchor leg mooring buoys are designated "South SBM" and "North SBM". A double channel rotating head on the turntable allows two completely segregated flow streams to be routed through the buoy. The rotating head can be connected with the tanker through 2×20 in. hose strings. For initial operation only one string will be used. 2×20 in. manually operated ball valves act as block valves between the rotating head and each 20 in. hose with a third 20 in. manually operated ball valve mounted in a by-pass between the two. This allows interchangeability of the hose strings when both strings are in use or allows diversion of the ballast water into its respective channel in the rotating head when only one hose string is installed.

Battery driven navigation lights and fog horn are installed in accordance with marine regulations. The fog horn is remotely operated by radio from Chiriqui Grande Control Room.

EQUIPMENT: Strops and shackles will be held by the Terminal for use in the event a vessel does not have this equipment.

The vessel to have the following equipment:

On Forecastle Head:

1. 2 Ship's mooring ropes with 12 ft. tails of 3.5 in. – 4 in. circumference lashings to make fast to pick-up rope. These two mooring ropes must be married together using one of the 12 in. tails before approaching the buoy.
2. 3 stoppers of 3.5 in. – 4 in. circumference and 12 ft. long.
3. Fire axe.
4. 100 ft.×3.5 in. – 4 in. messenger rope.

Anchors to be ready for use but in *stowed* position in hawsepipe.

Bow Chocks of Vessel: Should be of suitable size (approx. 24 in.×18 in.) to take the 3 in. chafe chain approximately 16 in. × 8 in. for the rope rig (13 in. circumference rope eye).

If Smit or other type brackets are fitted, they should be in accordance with OCIMF publication "Standards for Equipment Employed in the Mooring of Vessels at SBM".

Manifold Area:

1. 2×12 in. reducers in place on the manifolds to be used for discharging ballast and loading cargo.
2. Cargo boom – SWL 5 tons. Plumbed 2 – 3ft. inboard and mid-way between two manifolds.
3. 1 handy-billy (small 2 and 1 block and tackle).
4. 2 nylon hose slings (wide).
5. 1 small come-along (approx. 1.5 tons).
6. 1 heaving line.
7. 3 bolts long enough to bolt hose/manifold flange.
8. 2×3.5 in. – 4 in. circumference rope slings approximately 8 ft. length.
9. 2×3.5 in. – 4 in. circumference rope approximately 60 ft. length (eye in one end).
10. 1 boat hook or chain hook.
11. 4×12 in. gaskets.

At Stern of Vessel: One mooring rope – eye lowered to water level and made fast on bitts.This will enable launch to pull vessel away from buoy.

Note: It may be requested that the vessel leave steam cracked open on astern turbine to avoid vessel riding up on buoy.

Petroterminal Launch Will Carry:

1. Sufficient bolts to bolt hoses.
2. Suitable ring spanners.
3. 2×6 ft. chain stoppers with 3 in. circumference nylon tails 8 ft. long.
4. Spare keys to camlocks.
5. Spare rope slings.

MOORING: *Mooring Gang/Hose Gang:* As the vessel approaches the SBM the Terminal Mooring Gang of approximately 5 persons will board the vessel by pilot ladder and/or accommodation ladder. The same ladder used by the Pilot will suffice.

If there is additional gear to be put aboard the vessel, the boom at the port side manifold should be manned and the hook lowered to lift the bucket of gear.

Winch/Capstan/Windlass Operators: The ship will provide personnel to operate all deck machinery and assist the Petroterminal Mooring Gang. On completion of hose connection the gang will leave the vessel.

The Pilot/Berthing Master: Remains aboard the vessel whilst the ship is at the SBM. A cabin should be provided for his use.

A Berthing Master will assist and advise in the connection and disconnection of hoses/moorings, etc. During deballasting and loading operations he will be available to assist and advise on procedures. In cases of oil spill or other emergencies, he will advise the Master.

The Berthing Master will be the Terminal's Representative on board the vessel and will have the authority to stop all operations if regulations or required procedures are not observed.

Where any disagreement arises between the vessel personnel and the Berthing Master regarding some aspect of the SBM procedure, the procedure to be followed will be that which provides closest compliance with guidelines established by the latest edition of International Safety Guide for Oil Tankers and Terminals, published by the International Chamber of Shipping, Oil Companies International Marine Forum.

Mooring to SBM: The ship will approach the buoy from downwind maintaining the wind exactly ahead. (Adequate ballast should be retained to maintain manoeuvrability).

From the stem chock, or a port bow chock close to the stem, lead a mooring rope (eye-end) and lower the eye to the waiting launch.

(For the Smit Bracket, a chock approximately 24 in. × 18 in. will be required.)

The launch will take the ship's mooring rope and secure it to the buoy approach rope. This approach rope (480 ft.×10 in. plaited polypropylene) is hove aboard with the ship's windlass, heaving the vessel toward the buoy. Made fast to the end of the buoy approach rope is a 45 ft. × 13 in. circumference stable braid strop with a 5 ft. eye. The eye of this strop should either be placed on the bitts or made fast by means of a short strop and shackle.

Vessels equipped with a Smit bracket will secure the buoy rig to the bracket using a pear link and shackle.

ALTERNATIVE RIG: See "Plan Book".

From the port bow or centre chock, a mooring rope (with eye in end) is lowered through a fairlead sufficiently large to permit the entry of chain chafing cable and steel triangular plate 9 in. × 7 in.

The launch will take this rope and secure it to the buoy approach rope. This approach rope (480 ft. of 10 in. plaited polypropylene) is hove aboard first, heaving the vessel toward the buoy.

Prior to heaving the buoy rope aboard, a heavy wire strop will have been placed on the port side of the forecastle, onto suitably placed bitts, with 50 ton shackles in readiness.

This shackle is secured both to the wire strop and the triangular plate. Once the shackle is fast, the weight is released from the approach rope and allowed to come onto the wire strop. The chafing chain tail and buoy rope are then cast off the windlass.

Strops and shackles will be available from the terminal for use in the event a ship does not have this equipment.

The approach rope is made fast to the bitts.

If required additional back-up is needed, ropes can be made fast to the other links in the chafing chain. This should not be necessary with the good weather conditions of Chiriqui lagoon.

HOSES: *Connection of Hoses:* Once the vessel is safely secured at the buoy, the launch which had been holding the hoses clear during this operation will tow them to the port side of the vessel and they will be connected.

The hoses will be 2×12 in. and will be fitted with short spool camlock couplings. Forward 12 in. hose will be lifted first.

1. The vessel's boom will be plumbed so that it is approximately 2 ft. – 3 ft. inboard of port side and midway between the manifolds to be used.
2. The forward hose will be lifted first by the eye attached to the hose blank.
3. Hose will be lifted clear of water and level with ship's deck. Snubbing chain will then be brought on deck before hoisting hose any higher.
4. Once hose is at correct height above deck, snubbing chain will be made fast to bitts, hose lowered so weight is taken by snubbing chain. Hose will bend over to face ship's manifold. After the hose end blank has been removed, the hose will be connected to the ship's manifold with camlock couplings. "Come alongs" or handy billies may be used for positioning hoses. After securing the connection, check each camlock fitting to ensure that the ratchets are engaged.
5. The same procedure is followed for second hose.
6. When both hoses have been connected, the boom will be plumbed over the hoses and bar and webbing straps used to support hose, throughout transfer operations.
7. If camlocks alone will not provide a leak-free connection it may be necessary to use bolts to tighten the connection.

Camlock couplings at hose end: Pipe size, 12 in.; flange OD, 19 in.; flange thickness, 1.25 in.; seal ID, 13.375 in.; number of cams, 4; minimum locking range, 1 in.; maximum, 1.5 in.

Disconnection of Hoses: Once cargo operations have been completed, a reverse of the connection procedure is followed and the hoses lowered over the side, but made fast to the ship's side until the ship slips from the buoy or are towed clear by the launch – the reason for not immediately releasing the hoses is to keep them clear of the vessel's propeller.

Weight of Hose Strings for Single Buoy Moorings: The following table gives the approximate weights of hose strings in tonnes (including fittings, floats and pick-up buoy) with all hoses full of crude oil of S.G. 0.850. The assumed total lift is 7.5 m. (25 ft.) above deck level, with the tanker on light draft.

Size of Tanker	*12 in. I.D. Hose*
270,000	6.5
200,000	6.2
100,000	5.4
70,000	5.1
50,000	4.9
35,000	4.7
18,000	4.3

Information taken from International Safety Guide for Oil Tankers and Terminals manual.

Hose Information – Petroterminal:

	Tanker Rail Hose 12 in. (Barbel type)	Floating Hose 12 in.
Length	9.25 m.	12.19 m.
Weight	890 kilograms	1,940 kilograms
Electrically	Discontinuous	Continuous
Built-in fitting type	ASA 150	ASA 150
Ancillary equipment weight (flanges)	317 kilograms	—
Bend radius	1.85 m.	—

Hose make: Kleber (France).

BALLAST: Within the lagoon, ballast should be handled by type, as per international convention, as follows:

Segregated: All ballast in segregated ballast tanks should be visually inspected prior to discharge. After inspection, segregated ballast may be discharged overboard according to standard shipboard procedure.

Dedicated Clean: All ballast in dedicated clean ballast tanks should be visually inspected prior to discharge. After inspection, dedicated clean ballast tanks may be discharged overboard in accordance with IMO Regulations.

Treated: Ballast water which has been chemically treated (with detergents, emulsifiers, etc.) must be retained on board.

Others: All other ballast water will be pumped ashore prior to loading. The Terminal has 3×120,000 barrel tanks for the reception of dirty ballast. The ship will advise the Terminal of the quantity of ballast to be discharged ashore prior to commencing discharge.

Crude Oil Washing (C.O.W.): As vessels will be loading only, we do not anticipate any crude oil washing requests. Should the necessity arise, the Terminal should be advised.

LOADING: *Safety Check List:* Prior to start of operations, the Berthing Master and responsible Officer will complete the Safety Check List and also agree:

(A) Designated Smoking Areas.
(B) Galley and Appliance Limitations.
(C) Emergency Assistance.
(D) Vessel will be ready to move under her own power at all times whilst moored to SBM.

Pre-Transfer Conference: A Pre-Transfer Conference will be held between Berthing Master and responsible Officer prior to commencement of operations. (IOTTSG Chapter 5) to agree on procedures for deballasting and loading, including:

1. Communications between ship/shore/Berthing Master.
2. Deballasting procedures.
3. Cargo start-up procedure.
4. Any deviations from normal procedures.
5. Loading rates, initial, maximum and topping off.
6. Notice times required to change rates and shutdown procedure.
7. Emergency shutdown, moorings failure, oil spill, etc.
8. Any ship's deficiencies to be made known.
9. Any Terminal deficiencies to be made known.
10. Completion of loading.
11. Designated smoking areas.
12. Galley and appliance limitations.
13. Emergency assistance.
14. Vessel will be ready to move under her own power at all times while moored at the SBM.

Prior to the start of operations, the Berthing Master and responsible officer will complete the Safety Checklist.

Flow Rates: The tanker loading system is designed to be able to load a tanker at each SBM simultaneously. Each system has a maximum loading capacity of 50,000 bbls.p.h. using 2 × 12 in. hoses or 60,000 bbls.p.h. using 3×12 in. hoses. The third 12 in. hose is not currently fitted.

Deballasting of tankers is also handled through the same hose as used for loading, at a designed rate of 30,000 bbls.p.h.

Pressures:

Maximum crude oil static pressure on shoreside manifold 339 p.s.i.g.

Maximum allowed static pressure on buoy system 275 p.s.i.g.

Maximum allowable static pressure at ship's manifold to be determined by the ship's Master and communicated to the Berthing Master.

All vessel operations in connection with deballasting/loading, switching of tanks, topping off, must be directly supervised by a responsible officer.

Deballasting/Loading: Upon being informed by the responsible officer that the vessel is ready in all respects to commence operations, the Berthing Master will request that deballasting or loading operations proceed according to previously agreed plans as discussed at the pre-transfer conference.

Deballasting procedures are conducted in the following sequence:

1. After the 2×12 in. hoses are connected, Terminal personnel will line-up the buoy valves, prior to vessel opening manifold valves.
2. Vessel will be notified when Terminal is ready to receive ballast.
3. Vessel will be instructed to commence deballasting at approximately 11,000 bbls.p.h.

   Rambala Control will advise when the discharge rate can be increased to the required tanker rail pressure to attain a 30,000 bbls.p.h. deballasting rate (111 – 120 p.s.i.g.).
4. The vessel will advise when deballasting is completed and shut down at manifolds.
5. The terminal will secure ballast system ashore.

Loading Operations:

Loading procedure will follow the sequence below:

1. The Terminal will change from ballast to cargo piping alignment at buoy (because of piping arrangement, ship can expect to receive about 400 barrels of dirty ballast at start of cargo loading).
2. The vessel aligns its piping to load cargo.
3. The vessel opens manifold and advises "Rambala Control".
4. The shore valves will be slowly opened to pressurise the system.
5. The vessel confirms that cargo is being received into tanks.
6. The Terminal will advise vessel hourly of loading rate. This routine also provides a radio check. If the ship does not receive its hourly rate check at the expected time, it should attempt to contact "Rambala Control".

Topping off/Completing: When topping off, the following procedures will be observed:

1. The vessel advises shore prior to start, topping off, and requests desired flow rate.
2. Using shoreside flow/pressure control valves, give vessel loading rate required.
3. When vessel indicates "Stop" the flow/pressure shoreside valve will be closed.
4. When flow has stopped ashore, "Rambala Control" will notify the ship to secure its manifold valves.
5. The vessel closes ship's manifold valves.

Stripping:

1. Shoreside stripping pumps will be started to clear the hose ends of crude oil. (Vent valves at ship's manifold should be opened.)
2. SBM and shore tank valves will be shut. Close vent valves.

Disconnection of Hoses: Once cargo operations have been completed, the procedure for disconnecting hoses is a reverse of the connection procedure. Hoses are then lowered over the side, but made fast to the ship's side until the ship slips from the buoy or the hoses are towed clear by the launch.

The reason for not immediately releasing the hoses is to keep them clear of the vessel's propeller.

Emergency Shutdown: In the event of an oil spill, line rupture or other cause which requires immediate shutdown, the vessel will advise the control to "Stop Stop Stop" and the flow/pressure control valves will be immediately shut. Simultaneously the vessel will close its manifold valves.

The ship will be advised immediately these valves have closed.

Oil Type:

Alaskan North – Slope Crude.
API Gravity 26.7° – 26.9°.
Sulphur 1.05.
Flash Point 0°F.
Reid Vapour Pressure 3.8 at 100°F.
Viscosity 60°F, 68 centistoke seconds.
Viscosity 100°F, 22 centistoke seconds.
Approximate loading temperature 80°F to 90°F.

EMERGENCY PROCEDURES:

Oil Spillages: Should an oil spillage occur from a vessel, from SBM, or from sea lines, "Rambala Control" is to be advised immediately and all shore and ship valves closed in the shutdown sequence.

The Berthing Master will be informed and will initiate action to counter oil spill following procedures as outlined in terminal oil spill manual.

Ship's crew will recover spilled oil from ship's deck.

Fire: In case of fire aboard a vessel, in addition to the internal ship board alarms, Masters are requested to sound a prolonged blast on the main siren or whistle.

If deballasting or loading, the vessel should:

1. Immediately cease all operations. If loading, call Control Room for emergency shutdown.
2. Initiate fire fighting procedures.
3. Be prepared to disconnect hoses and unberth.

Any other vessel at SBM should also shut down operation and be prepared to unberth.

Loss of Communication: Vessel to sound 5 long blasts on whistle or siren. All operations will be shut down immediately and remain so until communications have been restored.

UNMOORING:

Unmooring from the SBM: To unmoor from the buoy, the approach rope is taken to the windlass and the weight taken whilst the shackle is released from the Triangular Plate or Open Link.

The rope is slacked into the water as the ship goes slowly astern.

At this time, the hoses are also slipped from the ship's rails if they have not previously been slipped and towed clear by the launch.

EARLY DEPARTURE PROCEDURE: All loading vessels are requested to use an early departure procedure (E.D.P.).

(A) If the Master of vessel consents to use the E.D.P. it will be implemented in the following manner:

1. The Master will sign a letter agreeing the use of E.D.P.
2. The cargo documents and other relevant forms will be put aboard the vessel.
3. On completion of loading, the vessel's tanks will be gauged by the Cargo Inspector.
4. The vessel will sail.
5. The terminal will transmit Bill of Lading figures to the vessel by VHF radio. The cargo documents are to be completed by the Master.
6. Written confirmation of these figures will be provided by the vessel's Agent.

(B) If the Master of a vessel does not agree to use E.D.P. the vessel will be unberthed immediately after loading. Terminal's representative will bring completed cargo papers by launch.

MEDICAL: There are no medical or dental services available. Emergency medical requests will be handled by the vessel's Agent.

DENSITY: 1018 (approx.).

FRESH WATER: Not available.

FUEL: Not available.

SURVEYORS: *Petroleum Inspection:* Vessels will be inspected by inspectors from Caleb Brett or Saybolt Inspection Companies.

These inspectors will follow the procedures laid down by Sohio, Exxon, Arco, etc. as the case may be.

REPATRIATION: Possible using daylight airstrip (length 1,120 m.).

TIME: GMT minus 5 hours.

SHORE LEAVE: See "General".

WEATHER:

Wind: The normal seasonal wind regime occurring at the lagoon is as follows:

November – March: Wind speeds greater than 19 m.p.h. occur 20.4% of the time in February. The predominant directions are from N. and N.E. (72.2%, occurrence in February). This is the primary windy season. February is the windiest month.

April – June: Wind speeds exceed 19 m.p.h. 3.3% of the time in June. The predominant directions are N., N.E., and E. (58.3% occurrence in June). This season is the secondary calm season.

July – August: Wind speeds exceed 19 m.p.h. 8.8% of the time in July. The predominant directions are N., N.E., and E. (71.2% occurrence in July). This season is the secondary windy season.

September – October: Wind speeds exceed 19 m.p.h. 2.3% of the time in October. Predominant wind directions are N. and N.E. (28.4% occurrence in October), and S. and S.W. (27.6% occurrence in October). This season is the primary calm season.

Waves: The seasonal wave height is:

November – March: Significant wave height exceeds 1.9 ft. 36.2% of the time in February N. and N.E. wave directions predominate, occurring 72.2% of the time in February. This is the roughest season. February is the roughest month.

April – June: Significant wave height exceeds 1.9 ft. 7.8% of the time in June. N., N.E. and E. wave directions predominate, occurring 58.3% of the time in June. This is the secondary calm season.

July – August: Significant wave height exceeds 1.9 ft. 19.7% of the time in July. N., N.E. and E. wave directions predominate, occurring 71.2% of the time in July. This is the secondary rough season.

September – October: Significant wave height exceeds 1.9 ft. 3.9% of the time in October. N. and N.E. wave directions, occur 28.4% of the time, and S. wave directions occur 14.6% of the time in October. This is the primary calm season.

Rain: Rain squalls with strong winds of short duration may be expected from time to time, being more prevalent from November through March.

GENERAL:

Charts: U.S.H.O. (Defence Mapping Agency) 28042 and 28041. British Admiralty 1793.

Sailing Directions: U.S.H.O. Publication – Pub. 144 – Sailing directions for Caribbean Sea and British Admiralty Pilot No. 7A.

Tides: The maximum tidal range is 2.1 ft. The Mean Range is 0.8 ft. The tidal flow in the Lagoon is weak.

Currents: Cross currents of varying velocity have been observed entering Canal del Tigre.

At the offshore anchorage prevailing currents are predicted to be from the E.N.E.

Launch Service: The terminal launches are for terminal use only. Crew members are not permitted aboard these launches.

The launch attending the vessel will be available to the cargo officer of a vessel loading/discharging for the purpose of reading the vessel's draft.

Shore Leave: The terminal will not provide a launch service for shore leave and crew members may not use the launches.

Smoking Regulations: Smoking is Prohibited in the following locations:

1. Entire terminal crude tank area.
2. Aboard launches within 0.5 miles of the vessel.
3. In motor vehicles in crude tank area, also in area of ballast tanks except inside designated buildings.
4. On ships except in places designated by the Master and agreed by the terminal's representative.

In accordance with IOTTSG; 2 locations only will be established in the after end of the vessel.

N.B. If an oil spill occurs on jetty or ship, all smoking will be prohibited until the spill has been removed.

SERVICES:

Chandlers: None.

SHIP SUPPLY SERVICE: The terminal has 1 small tug which is able to assist with stores, etc. Launches also available and helicopters are easily hired.

OPERATOR: Petroterminal de Panama, S.A., P.O.Box 8-179, Panama 8, Republic of Panama. *Tel:* 69-7777. *Telex:* 3792527. *Contact:* Captain G. Moss, Marine Manager.

AGENT: See "Puerto Armuelles".

COLON: 09.21 N. 79.55 W. (See Plan Book)

LOCATION: Located in the Bay of Limon, the port of Colon constitutes Quay No. 3 in the area of Fort Lesseps.

DOCUMENTS: The same documents are required and the same procedures are followed as at Bahia Las Minas.

PILOTAGE: No pilotage service at Colon. Vessels berth and unmoor under the orders of their Masters.

RESTRICTIONS: The port is restricted to vessels of length not greater than 100 m. due to the size of the quays. Draft at the berths varies from 2.6 m. to 6.1 m., which also restricts the size of vessels.

Aids to Navigation: The port entrance channel has no aids of its own for navigation. Maritime accesses are however marked clearly by the Panama Canal Commission.

HEALTH: Same as Bahia Las Minas.

RADIO: Vessels can communicate with the Port Administration on Channel 12 VHF.

TUGS: None at Quay No. 3, but they may be contracted in the Canal.

BERTHING:

Berth	*Length*	*Depth (average low tide)*
Quay 2	75 m.	4.9 m.
Quay 3	58 m.	2.05 m.

STEVEDORES: All loading and unloading operations are carried out by the Union of Port Workers of Colon. The ship's Agent must make the necessary arrangements.

CRANES: None.

FRESH WATER: Available.

FUEL: Available at the quay by pipe-line. Also Refineria Panama supplies fuel in the Bay of Colon by means of lighters.

PROVISIONS: Available in Colon.

DENSITY: 1.0212 grams cu.cm. at 85°F.

TIME: GMT minus 5 hours.

CONSULS: Denmark, Finland, Norway, Sweden, UK.

MEDICAL: In the town of Colon.

TELEPHONE: Available in the offices of the National Port Authority. Tel: 47-9181.

POLICE/AMBULANCE/FIRE: Available in Colon.

GENERAL:

Shelter: All the quays are protected from the sea by the breakwater which protects the canal entrance in the Atlantic sector.

General Description: The port of Colon (Quay No. 3) is used by small vessels of length not greater than 100 m. engaged in coasting trade between Colon and Bocas del Toro, and international trade between Colombia and Panama.

Port Maritime Access: The Colon port access is the same as that which leads to the port of Cristobal in the Canal.

Nature of Bottom: Soft mud and clay.

AUTHORITY: National Port Authority, Apartado 8062, Panama 7, Panama. *Tel:* 69-5444. *Telex:* 2765. *Contact:* Lic. Nander A. Pitty V., Director General; Ing. Carlos Urriola, Director of Operations.

CRISTOBAL: 09.21 N. 79.55 W. (See Plan Book)

(N.B. For items not listed below, see "Panama Canal".)

PORT LIMITS: Ship's arrival time is normally determined by their passage between the breakwater lights. Those that anchor outside the breakwater by arrangement with the Port Captain are timed as arrived when they drop anchor.

DOCUMENTS:

(a) Documents are to be presented by vessels in transit; who do not embark or disembark passengers; or handle cargo, to the Canal Commission.

General Declaration Form: 2 copies
Crew List: 2 copies
List of Passengers: 2 copies
Local Cargo Manifest: 1 copy
Stores or Supply List: 1 copy
Mail List: 1 copy
Clearance Outwards Certificate from last port visited: 2 copies

(b) Documents which vessels must present when they embark or disembark passengers, or handle cargo, to the National Port Authority.

General Declaration Form: 2 copies
Local Cargo Manifest: 4 copies
Crew List: 3 Copies
List of Passengers: 4 copies
Stores or Supply List: 2 copies
Crew Effects List: 2 copies
Maritime Health Declaration: 1 copy
Mail List: 1 copy

PILOTAGE (Also see "Panama Canal"): Pilotage into Cristobal not compulsory, although services of Pilot outside breakwater are available on request.

Vessels arriving outside Cristobal Breakwater who have requested an outside Pilot are required to *heave to and make a good lee.*

A pilot ladder rigged with appropriate spreaders and well illuminated at night to be provided by vessel. Accommodation ladders not acceptable for embarking Pilots outside breakwater.

Notice to Shipping:

1. A vessel shall, weather permitting, have both an accommodation ladder and a pilot ladder rigged and ready for use upon arrival in Canal Waters.
2. The pilot ladder shall conform to Regulations of the International Convention for the Safety of Life at Sea (SOLAS) and to all additional recommendations of the International Maritime Organisation (IMO).
3. The accommodation ladder may be turned in and secured after the Pilot has boarded the vessel in the anchorage, provided the freeboard does not exceed 9 m. (30 ft.). If the freeboard exceeds 9 m., the accommodation ladder may not be turned in until the last Panama Canal employee boards prior to arrival at the locks.
4. A pilot hoist may be used provided the design and construction of the hoist and ancillary equipment are of such a standard as to ensure an effective and safe means of embarkation and disembarkation. The pilot hoist should only be used when:
    - *(a)* A conventional pilot ladder is rigged and ready for immediate use but triced up well clear of the hoist;
    - *(b)* A lifeline attached to a safety stop and a lifebuoy fitted with a self-igniting light are ready for immediate use.

ANCHORAGES: Vessels will ordinarily proceed to anchorage area according to length and draft unless otherwise directed. Arriving vessels expected to anchor as far to South and inward from main channel in their anchorage area as is consistent with safety. Vessels anchoring in non-designated areas may be required to move.

Anchorage Area "A". For all ships with a deep salt-water draft of not less than 10.4 m.(34 ft.) and not in excess of 11.9 m. (39 ft.). Minimum charted depth is 12.2 m. (40 ft.).

This area starting at	Lat. 9° 23′ 21″ N.,	Long. 79° 55′ 21″ W.,
thence to	Lat. 9° 22′ 48″ N.,	Long. 79° 56′ 15″ W.,
thence to	Lat. 9° 22′ 14″ N.,	Long. 79° 56′ 15″ W.,
thence to	Lat. 9° 21′ 56″ N.,	Long. 79° 55′ 48″ W.,
thence to	Lat. 9° 21′ 25″ N.,	Long. 79° 55′ 48″ W.,
thence to	Lat. 9° 21′ 25″ N.,	Long. 79° 55′ 21″ W.,

thence due North to starting-point. However, restricted area North and West of Buoy 2, as charted, must be observed. Explosive sector charted in this area to be avoided whenever possible.

Anchorage Area "B". For all ships with salt-water draft under 9.7 m. (32 ft.) Minimum depth is 8.8 m. (29 ft.). Explosive sector restricted to vessels carrying explosives or specially designated vessels. All ships of such length are under no circumstances swing into Anchorage Area "A".

This area starting at	Lat. 9° 22′ 48″ N.,	Long. 79° 56′ 15″ W.,
thence to	Lat. 9° 22′ 32″ N.,	Long. 79° 56′ 41″ W.,
thence to	Lat. 9° 21′ 42″ N.,	Long. 79° 56′ 41″ W.,
thence to	Lat. 9° 21′ 52″ N.,	Long. 79° 56′ 00″ W.,
thence to	Lat. 9° 21′ 25″ N.,	Long. 79° 56′ 00″ W.,
thence to	Lat. 9° 21′ 25″ N.,	Long. 79° 55′ 48″ W.,
thence to	Lat. 9° 21′ 56″ N.,	Long. 79° 55′ 48″ W.,
thence to	Lat. 9° 22′ 14″ N.,	Long. 79° 56′ 15″ W.,

thence due North to starting-point.

Anchorage Area "C". Required pilotage waters for inbound vessels.

This area starting at	Lat. 9° 21′ 25″ N.,	Long. 79° 55′ 21″ W.,
thence to	Lat. 9° 21′ 25″ N.,	Long. 79° 56′ 00″ W.,
thence to	Lat. 9° 20′ 48″ N.,	Long. 79° 55′ 57″ W.,
thence to	Lat. 9° 20′ 27″ N.,	Long. 79° 55′ 27″ W.,

thence due North to starting-point. Restricted area East and South of Buoy 2, as charted, must be observed.

Anchorage Area "D". For all ships of over 106.7 m. (350 ft.) in length and a deep salt-water draft of less than 10.7 m. (35 ft.) except where minimum charted depth is 9.7 m. (32 ft.).

This area starting at	Lat. 9° 23′ 19″ N.,	Long. 79° 55′ 15″ W.,
thence to	Lat. 9° 22′ 55″ N.,	Long. 79° 54′ 21″ W.,
thence to	Lat. 9° 22′ 22″ N.,	Long. 79° 54′ 21″ W.,
thence to	Lat. 9° 22′ 02″ N.,	Long. 79° 54′ 55″ W.,
thence to	Lat. 9° 22′ 02″ N.,	Long. 79° 55′ 15″ W.,

thence due North to starting-point.

Anchorage Area "E". For all ships less than 106 .7 m. (350 ft.) and small craft. Minimum charted depth of water is 7.3 m. (24 ft.)

This area starting at	Lat. 9° 22′ 55″ N.,	Long. 79° 54′ 21″ W.,
thence to	Lat. 9° 22′ 27″ N.,	Long. 79° 53′ 54″ W.,
thence to	Lat. 9° 22′ 22″ N.,	Long. 79° 53′ 54″ W.,
thence to	Lat. 9° 22′ 22″ N.,	Long. 79° 54′ 21″ W.,

thence due North to starting-point.

Anchorage Area "F". For small craft and yachts. Pilotage for this area will be decided by Cristobal Port Captain, based on merit of each individual case. Under no circumstances may a vessel proceed to this area prior to being cleared by Boarding Officials. (Bounded by Channel Buoy "3" by a direct line through Buoys "A," "B," "C," "L4," "L2" and return to Buoy "3".)

Outer Anchorage Area. Established N.W. of Cristobal breakwater has the following co-ordinates: Commencing at Lat. 09° 23′ 14″ N., Long. 79° 55′ 21″ W. (West breakwater light); thence to Lat. 09° 24′ 40″ N., Long. 79° 56′ 00″ W. (buoy "A", whistle sea buoy); thence to Lat. 09° 24′ 40″ N., Long. 79° 57′ 00″ W.; thence to Lat. 09° 23′ 14″ N., Long. 79° 57′ 00″ W.; thence due East to starting point.

During periods of harbour congestion, large, deep-draft vessels and/or any vessel so directed may anchor outside the breakwater in the approved area. Such vessels must advise Cristobal Signal Station, by VHF Channel 12, the time of passing sea buoy, in order to establish order of transit. Masters will be given a definite time to enter the breakwater, where the vessel will be met by transit Pilot(s) and Boarding Officials.

Vessels must strictly adhere to the breakwater entry times as given, in order that transit schedule can be maintained.

Prohibited Anchorage. Eastern side of channel, Canal waters South of Lat. 9° 22′ 02″ N. to Mole Buoy in order to give clear access to Colon Harbour. Also, no vessel or craft may proceed South of Lat. 9° 21′ 25″ N. prior to being cleared by Boarding Officials. No vessel may anchor with any part of the vessel in the main channel or closer than 274 m. (900 ft.) to either East or West breakwater lights.

In cases due to harbour congestion, any vessel may be directed to anchor to Westward outside breakwater entrance and given an order as to the time it is to pass through the breakwater entrance.

RESTRICTIONS: Port open throughout 24 hours.

MAX. SIZE: Harbour limitations generally unrestricted as to length and beam. Draft 12.2 m. (40 ft.).

HEALTH: The Official who comes on board has to verify that the vessel complies with the requirements of the Republic of Panama as far as International Health, Animal and Agricultural Health, Migration and Customs are concerned. If there is any violation, non-fulfilment or omission in respect of any of the International or National requirements concerning human, agricultural health and Customs, the granting of Free Pratique will be suspended until the Competent Authority has been informed and has finally decided as to whether or not Free Pratique can be granted. Also, the respective Authority has to inform the competent authorities of the circumstances, evidence or a reasonable indication that on board the vessel there is danger to human, animal and vegetable life.

RADIO: The Port Captain may be contacted via VHF Channel 12. Commercial telephone calls and messages to Agents may be made via Panama Radio, VHF Channel 16.

TUGS: Available and assigned for berthing by Pilot. Tug's lines used at no extra charge.

BERTHING: No specific requirements as to arrival times. Fifteen cargo and bunkering berths.

Cristobal Harbour Controlling Depths:

Dock	Berth	Usable Length (m.)	Max. S.W. Draft (m.)	Max. Lgth. of Ship at Max. Draft (m.)	Beam Limit (m.)	Total Lgth. Avail. of Dock Face (m.)	Remarks
6	AB	314.0	10.90		None	314.0	FO, HDO, Water, General Cargo, 20 ft. Containers
6	B		10.90		None		
6	CD	314.0	12.20		None	314.0	FO, HDO, Water, General Cargo, 20 ft. Containers
7	AB	298.0	11.98		None	298.0	FO, HDO, Water, General Cargo, 20 ft./40 ft. Containers
7	B		10.90		None		
7	CD	304.8	11.90		None	304.8	FO, HDO, Water
7	E	76	10.10		None	73.2	Water
8	AB	302.0	11.60		None	301.7	FO, HDO, Water, General Cargo

16	CD	326.0	12.20		None	326.1	FO, HDO, LDO, Water, Gasoil, Gasoline (no Gasoil at 16D)
16	E	140.0	8.84	91.4	None	139.6	Water, Gasoil, Gasoline, Diesel

Also see "Developments".

STEVEDORES: Endeavour arrange arrival to avoid cost of "stand by" as Agent arranges gangs for 0700 hrs. or 1700 hrs. commencement.

CARGO HANDLING EQUIPMENT: The Port has all kinds of equipment for handling cargo arriving at the quays.

To handle container and other types of cargo, there are dock lorries, chassis, fork lift trucks of varying capacities (2,4,10,15,30,40 tons), agricultural type towing tractors, rolling platforms, and other smaller aids.

CRANES: The only crane in the port is at the pier end of Quay No.8 at Berth A. It has a steel arm capable of lifting 40 tons to a height of 27.45 metres (90 ft.)

MEDICAL: Medical attention on arriving in the port of Cristobal can be immediate, since the port contains a first aid clinic in which a doctor and a nurse are present during the day, and a nurse at night. In the town of Colon there are hospitals and private clinics.

TANKERS: Four berths available.

FRESH WATER: Available from piers.

FUEL: Bunker "C", diesel, light fuel and light diesel available at Government wharves from commercial companies. Rate of delivery 2,000 bbls. per hour.

The Southern part of Anchorage C, Cristobal Harbour, has been designated a limited bunkering area for vessels whose draft is too great to use the East breakwater bunkering area.

Pilotage is compulsory out and into this area for vessels and bunkering barges.

Also see "Balboa".

REPAIRS: Emergency repairs possible.

DRY DOCK: (Not available for commercial activities). Length 117.6 m. (386 ft.), breadth 18.3 m. (60 ft.), depth over blocks 6.2 m. (20 ft. 6 in.) MLW.

POLICE/AMBULANCE/FIRE: Police 104, Fire 103.

TELEPHONES: May be placed aboard through arrangement with Agent.

SHORE LEAVE: Generally permitted.

CUSTOMS: Customs and Immigration Inspection Service available Monday to Saturday from 0700 hrs. to 1700 hrs. Charges for such service after hours and on Sundays and holidays. Number of inspectors required will be determined by Chief Customs and Immigration Inspector of port.

DELAYS: Delays in berthing, load or discharge or bunkering are minimal and infrequent. 8 hours is considered excessive.

DEVELOPMENTS: Amongst the plans for future developments in the port of Cristobal are:

a) Improvements to existing installations.

b) *Containers:* Amongst the facilities available at this terminal for containers, is the open area for handling and storage of containers covering 7.5 hectares, and a capacity up to 3,000 TEUs. It includes 8 points for reefer containers, a loading and consolidation building for containers, with an area in all of 6279.20 sq.m., a control building with a weighbridge of 60 tonne capacity, an entry point, handling equipment, a workshop for repair and maintenance.

Furthermore, the port of Cristobal has other facilities to complement the services of the Container Terminal, such as: a mooring length of 428 m., with depth of water of 40 ft. It also has drinking water supply, bunkers, collection of pollutants, victualling, electricity supply and all communication services, i.e. radio, telex and telephone.

The Container Terminal has been operational since 1983, and will have 40 tonne gantry cranes. The first will be installed after June 1985, and the other in December, 1985.

SHIPMASTER'S REPORT: July 1979.

Bottom Cleaning: Following a recent bottom clean of this vessel in Cristobal by 'Subservices, Inc.' I now forward two items of information which may prove useful to other Shipmasters.

a) Because of the nature of the sea bottom in Cristobal, 'Subservice' required approximately 3.0 m. (10 ft.) beneath the keel. In anything less, the water displaced by the machine disturbed the mud sea bottom reducing underwater visibility.

b) Contrary to advice received from the local signal station the deepest water was found in a position where the West Breakwater light bore 000° True at 3 cables. Due to the proximity of vessel to fairway a running moor was used. Average depth was 15.2 m. (50 ft.).

AUTHORITY: National Port Authority, Apartado. 8062 Panama 7, Panama. *Tel:* 69-5444. *Telex:* 2765. *Contact:* Lic. Nander A. Pitty V., Director General; Ing. Carlos Urriola, Director of Operations. Cristobal Port Administrator: *Tel:* 41-4848 (Ext. 112).

AGENT: C. Fernie & Co., S.A. Apartado 5042, Cable address: "Fernie-Cristobal". Telephone Nos.: 45-1133 (5 lines). Telex Nos.: 8814 or 8520. Also VHF. After office hours telephone numbers: 42-1424 or 45-2495 or 45-2278.

PANAMA CANAL (entering **Cristobal** or **Balboa**) (See Plan Book)

§ Indicates Panama Canal – Code of Federal Regulations Number.

REGULATIONS: The following are some of the important Canal Regulations.

§101.2 Boarding of arriving vessels:

(a) Unless otherwise directed, all arriving vessels will anchor in designated anchorages to await Boarding Officers. No person other than Boarding Officers of the Panama Canal Commission and the Republic of Panama may go on board or leave any vessel until such vessel has been entered by the Commission and, where applicable, by the Republic of Panama.

(b) Arriving vessels that are subject to inspection for compliance with Panama Canal shipping and navigation regulations will be boarded upon arrival. The boarding will occur inside the breakwater at the Atlantic entrance of the Canal or off the seaward end of the dredged, marked channel at the Pacific entrance. It will be performed by a Commission Boarding Officer in accordance with the procedures established under this Part. When such vessels are not boarded immediately upon arrival, they shall anchor in a designated anchorage area and await the Boarding Officer.

(c) Admeasurement functions shall be performed on arriving vessels either while at anchor or during transit.

§101.3 Definitions and functions of the Boarding Officer:

(a) Boarding Officer means any official or employee of the Panama Canal Commission who is duly assigned the functions of a Boarding Officer, including admeasurement and sanitation.

(b) The Commission Boarding Officer shall perform the functions of admeasurer for the purpose of determining Panama Canal tolls and shall make inspection for the purpose of insuring compliance with Panama Canal shipping, navigation and sanitation regulations.

§101.4 Measurement of vessel making maiden transit:

A vessel that arrives after 2000 hrs. and is to make her maiden transit will normally be admeasured on the following day.

§101.1 Signal stations at the Canal entrances:

The Panama Canal Commission maintains established signal stations at both the Atlantic and Pacific entrances of the Canal. A vessel arriving at the Canal must communicate with the signal station which is located at the entrance of the Canal at which that vessel arrives. Vessels required to be equipped with a radiotelephone pursuant to Part 123 of this subchapter must, upon arrival, communicate with the appropriate signal station on Channel 12, 156.000 MHz. All other vessels may use International Code and flashing light. Such stations are also utilised to assist in control of traffic within Panama Canal waters.

5. The cross reference which follows §101.1 is revised as follows:

Cross Reference: See Part 123 for provisions respecting radio communication by vessels prior to arrival and while they are in Panama Canal waters.

§103.7 Temporary holding of vessels:

The Canal authorities may hold a vessel for the purpose of investigating a marine accident under Parts 115 or 117. A vessel may also be held until, in the opinion of the Canal Authorities, its tenderness, trim, list, cargo, hull, machinery, and equipment have been put into such condition as will make the vessel reasonably safe for her passage through the Canal. No claim for damages shall be allowed or considered because of any such temporary holding of vessels.

§103.8 Order of transiting of vessels:

The Canal authorities may dispatch vessels through the Canal in any order and at any time they may see fit. Priority of arrival at a terminal does not give any vessel the right to pass through the Canal ahead of another that may arrive later, although order of arrival will be consideration in determining the order of passage.

§103.4 Load and trim:

(a) A vessel shall not be permitted to transit the Canal if she:

(1) Has a list of more than 10 degrees; (2) Is so tender or otherwise so loaded as to dangerously affect her stability or manoeuvrability; or (3) Is so trimmed as to dangerously affect her manoeuvrability.

(b) A vessel having a list of between 3 degrees and 10 degrees, or which is so loaded or so trimmed as to adversely affect her manoeuvrability, may be permitted to transit at the discretion of the Chief, Navigation Division or his designee. If such vessel is allowed to transit, however, it may do so only at its own risk and, to the extent and in the proportion that such failure to meet the requirements of this section proximately causes or contributes to a casualty and resulting damages, the Master of such vessel on behalf of said vessel, her Owners, Operators, or any other persons having any interest in her, and for himself, will be considered to have released the Panama Canal Commission and the United States from, and to have indemnified them against, any loss, damage, or liability incurred by the Commission, or the United States under or in respect to:

(1) Sections 1411 through 1416, inclusive, of Pub. L. 96 – 70, 93 Stat. 485 – 87.

(2) Property of the Panama Canal Commission or the United States; and

(3) Panama Canal Commission employees under the Federal Employees' Compensation Act, 5 U.S.C. 8101, *et seq.*, or any other employee compensation system.

The Master of the vessel that fails to meet the requirements of this section may be required to execute, in the presence of a Commission official, a form undertaking to release the Panama Canal Commission and the United States from liability in case of an accident and to indemnify the Commission and the United States for any damages sustained. The failure of the Master of a vessel to sign such a form, however, will not relieve the vessel, her Owners, or any other person having an interest in her from liability incurred as a result of the vessel's failure to meet the requirements of this section.

(c) Nothing shall be done, or permitted to be done, by the Master or any member of the crew, which would alter the trim or draft of a vessel while it is transiting the Canal, without the prior, express approval of the Pilot.

§103.10 Vessels required to be equipped with certain indicators:

(a) All vessels in excess of 150 ft. in length shall be equipped with properly operating rudder-angle and engine-revolution indicators in the wheelhouse so located and illuminated as to be readily visible to a Pilot.

(b) All vessels with beams in excess of 80 ft. shall be equipped with properly operating rudder-angle and engine-revolution indicators in the wheelhouse and on each bridge wing so located and illuminated as to be readily visible to a Pilot.

(c) All vessels in excess of 150 ft. in length which are equipped with variable pitch propellers shall have properly operating pitch indicators in the wheelhouse so located and illuminated as to be readily visible to a Pilot.

(d) All vessels with beams in excess of 80 ft. which are equipped with variable pitch propellers shall have properly operating pitch indicators in the wheelhouse and on each bridge wing so located and illuminated as to be readily visible to a Pilot.

(e) Any vessel which fails to meet the requirements of this section may be denied transit. If the Canal authorities decide that a vessel can be handled without undue danger to equipment or to personnel, notwithstanding her failure to comply with other requirements of this section, and permit her to transit, such vessel may do so only at its own risk and, to the extent and in the proportion that such failure to meet the requirements of this section proximately causes or contributes to a casualty and resulting damages, the Master of such vessel, on behalf of said vessel, her Owners, Operators or any other persons having any interest in her, and for himself, will be considered to have released the Panama Canal Commission and the United States from, and to have indemnified them against any loss, damage or liability incurred by Panama Canal Commission or the United States under, or in respect to:

(1) Sections 1411 through 1416, inclusive, of Pub. L. 96 – 70, 93 Stat. 485 – 87;

(2) Property of the Panama Canal Commission or the United States; and

(3) Panama Canal Commission employees under the Federal Employees' Compensation Act, 5 U.S.C. 8101, *et seq.*, or any other employee compensation system.

The Master of the vessel that fails to meet the requirements of this section may be required to execute, in the presence of a Commission official, a form undertaking to release the Panama Canal Commission and the United States from liability in case of an accident and to indemnify the Commission and the United States for damages sustained. The failure of the Master of a vessel to sign such a form, however, will not relieve the vessel, her Owners, or any other person having an interest in her from liability incurred as a result of vessel's failure to meet the requirements of this section.

§103.27 Clear view forward from the bridge and steering light requirement for certain vessels:

(a) A vessel may not be navigated in Canal waters unless there is a clear, unobstructed view forward from the bridge.

(b) Vessels having a distance from the bridge to the stern of 250 ft. or more shall have installed, at or near the stem, a steering range equipped with a fixed blue light which shall be clearly visible from the bridge along the centreline. If said range and light so placed would be partially or completely obstructed, then two such ranges and lights must be installed at an equal distance from the centreline and shall be clearly visible from the bridge along lines parallel to the keel.

(c) Naval or military vessels exempted from the requirements of Part 111 of this chapter shall also be exempt from the requirements of paragraphs (b), (d), and (e) of this section.

(e) The use of this steering light shall be at the discretion of the Panama Canal Pilot who has control of the navigation and movement of the vessel.

§109.5 Ship's gear to be ready during transit; test:

Before beginning transit of the Canal, a vessel shall have hawsers, lines and fenders ready for passing through the locks, for warping, towing, or mooring as the case may be; and shall have both anchors ready for letting go. The Master shall assure himself, by actual test, of the readiness of the vessel's main engines, steering gear, engine room telegraphs, whistle, rudder-angle and engine-revolution indicators, and anchors. During the transit, at all times while a vessel is underway or moored against the lock walls, her deck winches, capstans, and other power equipment for handling lines, as well as her mooring bitts, chocks, cleats, hawse pipes, etc., shall be ready for handling the vessel, to the exclusion of all other work.

OIL POLLUTION: Every vessel subject to the Federal Maritime Commission's oil pollution financial responsibility requirements, must maintain on board and make available to Panama Canal Commission boarding inspectors the original or copy of its certificate. Any vessel that does not have the necessary certificate on board will not be permitted to transit the Panama Canal. The 1969 CLC Certificate is also required where applicable.

If pollution occurs the Master's appearance in court may be required with possible heavy fine and attendant delays.

DOCUMENTS: (a) *Documents for Commission Boarding Officer:* All documents listed below shall be ready for immediate delivery to the Boarding Officer when he boards the vessel upon each arrival of the vessel at the Canal.

Documents Required and Number of Sets:

	Number of Sets
1. Ship's Information (Panama Canal Form 4398).	1
2. Clearance from Last Port.	1[1]
3. All certificates of sanitary nature.	1[1]
4. Stores List.	1
5. Cargo Declaration (Panama Canal Form 4363).	1[2]
6. Panama Canal Tonnage Certificate.	1
7. National Register.	1[1]
8. General Arrangement and Engine Room Plans.	1[3]
9. Declaration of all Arms and Munitions of War aboard other than explosives declared separately.	2[2, 4]
10. Crew List (Panama Canal Form 1509).	2
11. Passenger Lists, Transiting and Landing (Panama Canal Forms 18 and 20)	2

[1] For examination and possible retention.

[2] Not required of vessels of war or auxiliary vessels as those terms are defined in the Treaty Concerning the Permanent Neutrality and Operation of the Panama Canal (September 7, 1977).

[3] Not required unless ship transits Canal.

[4] Not required unless such cargo is carried.

(b) *Crew List:* For purposes of additional identification of crew members, all copies of the crew list required by this section shall include for each seaman the serial number of his certificate of identification, continuous discharge book, passport or other satisfactory identifying documentation. In addition, the given name and middle initial, as well as the family name, shall be shown for all seamen.

(c) *Passenger List:* All copies of the passenger list required by this section shall be accurate and legible and shall be delivered to the Boarding Officer. The list shall show passengers in alphabetical order.

PILOTAGE: *§105.4 Pilotage Charges:* Pilotage for vessels in transit through the Canal is free, but whenever any vessel requires a Pilot for other than transit, it is liable for the applicable pilotage charge.

§105.5 Pilotage Beyond Atlantic Breakwater

Should a vessel desire a Pilot to meet it outside the Atlantic breakwaters, such vessel shall remain there and make signal to that effect.

§105.6 Status and Function of Pilot

The Pilot assigned to a vessel shall have control of the navigation and movement of such vessel.

§105.1 Pilots Required

(a) Except as provided by §105.2 and §105.3, or by paragraph (c) of this section, no vessel shall pass through, enter or leave the Canal or manoeuvre in the Canal or waters adjacent thereto, including the ports of Cristobal and Balboa, without having a Panama Canal Pilot on board.

(b) Normally, a vessel will, unless advised to the contrary by the Chief, Navigation Division or his designee, be boarded by the Panama Canal Pilot inside the breakwater at a point North of the Mole Beacon at the Atlantic entrance and in the Merchant Vessel Anchorage to seaward of Buoys 1 and 2 at the Pacific entrance.

(c) In conformity with past practice, vessels anchored in Anchorage Area C and Anchorage Area F, as shown in the Pilot Handbook, Limon Bay Chart, may proceed to sea without a Panama Canal Pilot on board. All such vessels, prior to getting underway, must obtain permission to depart from the Cristobal Signal Station.

(d) Whenever the Administrator finds there is a critical shortage of Certified Panama Canal Pilots available for movement of vessels in Canal waters, he may suspend the rule on compulsory pilotage set out in paragraph (a) of this section. The Administrator shall impose such conditions upon the suspension of the rule, with respect to any given vessel, as are reasonable and appropriate to protect human life and property and to safeguard the facilities of the Panama Canal.

§103.19 Requirements for Pilot Platforms

(a) Any vessel that, in accordance with Panama Canal operation standards, is required to have 4 Pilots aboard, shall provide suitable pilot platforms for the assisting Pilots. The purpose of the pilot platforms is to provide shelters from sun and rain for Pilots working near the bow or the stern of a vessel and to provide adequate visibility around the Locks in order to reduce the danger of damage.

(b) See sketch of platform in "Plan Book".

(c) Each platform is to be erected over the furthest forward point of the extreme beam at the waterline and not more than 6 in. from the vertical plane of shell plating. For vessels of unorthodox design requiring aft platforms, they shall be erected at a position which is approximately over the aftermost point of extreme beam at the waterline and not more than 6 in. inboard from the vertical plane of shell plating.

(d) The awning indicated in the sketch in paragraph (b) of this section is to be made of suitable material to provide shelter from sun and rain. The deck of the pilot's platform is to be made of wood or other material with non-skid surface.

§103.18 Pilot Ladders, Hoists and Side Ports

(a) A vessel shall, weather permitting, have both an accommodation ladder and a pilot ladder rigged and ready for use upon arrival in Canal waters.

(b) The pilot ladder shall be constructed and rigged in accordance with Regulation 17, Chapter V, International Convention for Safety of Life at Sea, 1974, TIAS 9700, except that;

(c) When the distance from the water line to the point of access of the vessel exceeds 9 m. or 30 ft., a combination pilot ladder and short brow accommodation ladder must be provided for boarding purposes.

(d) A mechanical pilot hoist may be used for Boarding Officials and Pilots only at their discretion, and provided that the design and construction of the hoist and ancillary equipment are in accordance with Regulation 17, Chapter V, International Convention for Safety of Life at Sea, 1974.

(e) When a mechanical pilot hoist is used, a ring buoy fitted with a lifeline and self-igniting light shall be available and ready for immediate use. The pilot ladder required by §103.18 (a) shall be in close proximity to the pilot hoist, ready for immediate use but lashed up so as not to interfere with the pilot hoist.

(f) When the side ports are used for boarding, the minimum vertical distance between the waterline and the bottom of the side port at any draft shall be 6 ft.

ANCHORAGES: No vessel shall anchor within the navigable waters of the Canal in other than a designated anchorage, except in an emergency, and no craft shall tie up to any aid-to-navigation in Canal waters.

1. *Merchant Vessel Anchorages:* (a) *Atlantic Entrance Merchant Vessel Anchorage:* An area to the West of the Canal channel bounded as follows: Starting at a point "A", located in position Lat. 9° 21′ 25″ N., Long. 79° 55′ 31″ W., and marked by Gas Buoy No. 2, thence 900 yards 270° true to a point "B" located in position Lat. 9° 21′ 25″ N., Long. 79° 55′ 58″ W., thence to lighted Buoy "1", thence to lighted Buoy "H", thence due North to a point "C" located in position Lat. 9° 22′ 07″ N., Long. 79° 56′ 41″ W., thence 2,800 yards 59° true to a point "D" located in position Lat. 9° 22′ 50″ N., Long. 79° 55′ 29″ W., and thence to the starting-point. The line extending due West from the Cristobal Mole through lighted Beacon No. 1 and lighted Buoy No. 2 (Lat. 9° 21′ 25″ N.) marks the Southern limit of the anchorage area. No vessel shall pass this line without having been passed by the Boarding Officer and without having a Canal Pilot on board.

(b) *Gatun Lake Anchorage Basin:* An area immediately East of th Canal channel line, bounded by a line extending to a point 450 yard 120° true from the East wing-wall at the South end of Gatun Lock thence 690 yards, 148° true to flashing white lighted Buoy "A" thenc 700 yards, 070° true to flashing white lighted Buoy "1" thence 1,13 yards, 148° true to quick flashing white lighted Buoy "3" thence 2,80 yards, 224° true through fixed white lighted Buoy "5" and black can Buo "7" to the Canal channel line at flashing white lighted Buoy "9"; th channel prism being the Westerly boundary line of the anchorage area

(c) *Pacific Entrance Merchant Vessel Anchorage:* An area bounde as follows: beginning at a point in position Lat. 8° 51′ 50″ N., Long. 79 30′ 00″ W., marked by a lighted whistle buoy which is painted wit alternating black and white vertical stripes and which shows short-lon flashing white light every 8 seconds, i.e. light 0.4 seconds, eclipse 0. seconds, light 1.6 seconds, eclipse 5.6 seconds; thence due East t Long. 79° 28′ 00″ W.; thence due North to Lat. 8° 54′ 31″ N., thence du West toward Flamenco Island Light to a point Lat. 8° 54′ 31″ N., Long 79° 30′ 46″ W.; thence S.W. touching the N.W. corner of San Jose Roc to position Lat. 8° 53′ 27″ N., Long. 79° 31′ 23″ W., marked by cana entrance lighted Buoy No. 2, thence S.E. to the point of beginning.

§113.2 Anchorage Areas for Ships Loaded with Dangerous Cargoes

The anchorage areas for ships loaded with explosives or with high volatile products are designated as follows:

(a) *Atlantic End:* 1. Inside area included in rectangle 1,000 yards wid immediately South of West Breakwater starting at a point on Wes Breakwater 1,000 yards from West Breakwater Light and thenc extending Westward 2,000 yards along breakwater.

2. Outside area bounded by a line from Point A at position Lat. 9° 23 53″ N., Long. 79° 56′ 29″ W. then to Point B at position Lat. 9° 24′ 40″ N Long. 79° 56′ 29″ W. thence to Point C at position Lat. 9° 24′ 40″ N Long. 79° 57′ 00″ W. thence to Point D at position Lat. 9° 23′ 53″ N Long. 79° 57′ 00″ W. thence to Point A.

(b) *Pacific End:* Area South of Naos Island bounded on the East by line drawn South (True) from entrance Gas Buoy No. 1; on the South b a line drawn East (True) from Tortolita Island, and in the North and Wes by the curve of 30 ft. depth.

§113.3 Vessels to Anchor and Wait Instructions

(a) Vessels carrying dangerous cargoes in bulk or more than 5 ton of explosives as defined by §113.1 (a) or tankers in ballast which are no gas free shall anchor in the outside explosive anchorage on the Atlant end or the explosive anchorage on the Pacific end, as described i §113.2 (a) (2) and §113.2 (b) respectively. Such vessels will be allowe alongside Commission Wharves in Canal waters only as prescribed i §113.5 and each case will be handled individually by the Chie Navigation Division, or his designee.

(b) Vessels arriving on the Atlantic side and carrying dangerou cargo in bulk will anchor in the outside anchorage. These vessels sha not enter the breakwater until given orders to do so. Such orders will b issued through the appropriate Commission signal station by the Cana Authorities. Orders will be given only after the Pilot is standing by t board and has received the assurance from the signal station that ther are no outbound vessels.

When weather and boarding conditions permit, the Pilot may boar outside the breakwater. On Northbound vessels carrying dangerou cargo bound for sea, the Pilot must remain on the bridge until the vesse passes the Mole Buoy. The Pilot shall not leave the bridge until he ha arranged with Marine Traffic Control and the signal station for one-wa traffic outbound through the breakwater.

MAX. SIZE: *Note:* Max. draft in August 1984 was 39 ft. 06 in. (tropica fresh water). However this subject to change.

§103.6 Size and Draft Limitations of Vessels

(a) *Definitions as Used in This Section:*

1. "TFW" means Tropical Fresh Water of Gatun Lake, density 0.995 gm./c.c. at 85°F. (Transition to fresh water frequently alters the trim o large vessels 3 in. to 4 in. by the head.)

2. "Published TFW Maximum Draft" means the deepest point o immersion in Gatun Lake waters as promulgated by the Marine Directo taking into account the water level of Gatun Lake and other limitation deemed necessary because of restrictions in the Canal.

3. "Maximum Authorised Transit Draft" means the deepest point o immersion in TFW of a particular vessel authorised at anytime, Gatu Lake level and Canal restrictions permitting.

4. "Commercial Vessel" means a self-propelled vessel other than a naval, military or other public vessel.

5. "Integrated Tug-Barge Combination" means a barge that i specifically configured to receive a tugboat and with the tug, becomes, i effect, a single self-propelled unit.

6. "Non-Self-Propelled Vessel" means a vessel which either does no have an installed means of propulsion, or has an installed means o propulsion which is not functioning during transit.

7. "Barge" means a flat-bottomed vessel of full body and heav construction without installed means of propulsion.

(b) Maximum authorised transit draft of vessels with draft in excess o 35 ft. 6 in.

1. Prior to the initial transit of a vessel whose transit draft will excee 35 ft. 6 in., Owners, Operators, or Agents must supply in full th information required in sub-paragraph (b)(2) of this section and reque the maximum authorised transit draft for the vessel (deepest point o immersion TFW) from the Chief, Navigation Division or his designee, no later than 2 weeks prior to loading of the vessel. This request will b returned with the approved maximum authorised transit draft stampe thereon.

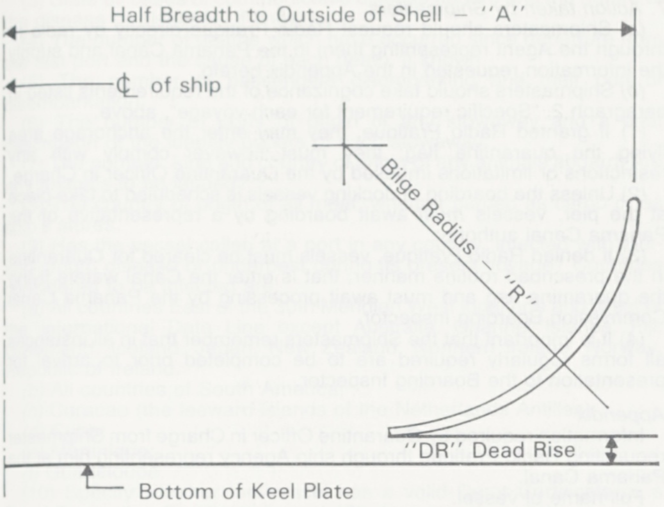
2. The information required by sub-paragraph (b)(1) of this sectio shall be submitted in the following format:

Information Needed Prior to Initial Transit Through the Panama Cana

Bilge Information

Name of Vessel .... Date..........
Authorised Tropical Fresh Water Load Line ....
Admeasurer .... Certified as Correct..........
(Master/Owner/Agents

1. "A" – Half breadth of vessel to the outside of shell ....
2. "R" – Radius of turn of bilge (feet and inches) ....
3. "DR" – Dead rise at side of vessel (inches) ....



Notes:

1. The Panama Canal Commission is not responsible for damage to bilge keels resulting from transit through the locks.

2. On an off centre lockage with the vessel touching the lock wall, the turn of the bilge will clear the lock-wall batters at the most critical point as shown in (d) No. 3 below.

(c) *Draft During Initial Transit*

The initial transit is permitted at the maximum authorised transit draft. After the initial transit, unless the vessel's Agent or Owner is notified of any restrictions imposed by Canal Authorities, this maximum authorised transit draft will remain in effect.

(d) *Minimum Transit Drafts, Measured in Salt Water*

1. All vessels transiting the Canal must have sufficient ballast to permit safe handling during transit. The following are minimum salt water drafts (TSW) for ships anticipating transit.

Length	*Minimum Drafts*
Up to 425 ft. –	Trimmed so Pilot can see the ranges over the forecastle from centre of navigation bridge
Over 425 ft. –	8 ft. forward, 14 ft. aft, TSW
Over 475 ft. –	18 ft. forward, 20 ft. aft, TSW
Over 525 ft. –	20 ft. forward, 22 ft. aft, TSW
Over 580 ft. –	22 ft. forward, 24 ft. aft, TSW
Over 625 ft. –	24 ft. forward, 26 ft. aft, TSW

2. The vessel's drag must not adversely affect manoeuvrability.

3. The following table provides the limiting drafts due to bilge radius:

Table of Limiting Drafts due to Bilge Radius
Contacting Chamber Batters
(Allows for 6 in. thick rubber fenders on lock walls at batter locations.)

	Radius of Turn of Bilge (ft.)				
in.	1 ft.	2 ft.	3 ft.	4 ft.	5 ft.
0	35 ft. 08 in.	36 ft. 06 in.	37 ft. 04 in.	38 ft. 02 in.	39 ft. 00 in.
1	35 ft. 09 in.	36 ft. 07 in.	37 ft. 05 in.	38 ft. 03 in.	39 ft. 01 in.
2	35 ft. 10 in.	36 ft. 08 in.	37 ft. 06 in.	38 ft. 04 in.	39 ft. 02 in.
3	35 ft. 10 in.	36 ft. 08 in.	37 ft. 06 in.	38 ft. 05 in.	39 ft. 03 in.
4	35 ft. 11 in.	36 ft. 09 in.	37 ft. 07 in.	38 ft. 05 in.	39 ft. 03 in.
5	36 ft. 00 in.	36 ft. 10 in.	37 ft. 08 in.	38 ft. 06 in.	39 ft. 04 in.
6	36 ft. 01 in.	36 ft. 11 in.	37 ft. 09 in.	38 ft. 07 in.	39 ft. 05 in.
7	36 ft. 02 in.	37 ft. 00 in.	37 ft. 10 in.	38 ft. 08 in.	39 ft. 06 in.
8	36 ft. 03 in.	37 ft. 01 in.	37 ft. 11 in.	38 ft. 10 in.	
9	36 ft. 03 in.	37 ft. 01 in.	38 ft. 00 in.	38 ft. 10 in.	
10	36 ft. 04 in.	37 ft. 02 in.	38 ft. 00 in.	38 ft. 10 in.	
11	36 ft. 05 in.	37 ft. 03 in.	38 ft. 01 in.	38 ft. 11 in.	

Example: To find draft of ship having a radius-of-turn-of-bilge of 4 ft. 4 in. read across top of table to column headed 4 ft. thence down column opposite 4 in. – read 38 ft. 5 in.

Note: Dead Rise not included in above tabulations and must be added to above readings.

4. A vessel whose ballast draft does not meet the minimum draft requirements established by this section may be accepted for transit on a regular basis, provided the vessel operator requests permission and submits the following information to the Marine Bureau of the Panama Canal Commission: (i) principal dimensions of the vessel; (ii) deepest attainable minimum draft (fore and aft); (iii) limitations on visibility fore and aft from the navigation bridge; (iv) necessary excerpts from the vessel's plans, drawings and manoeuvring data that relate to the vessel's suitability for transit.

5. The vessel will be inspected by the Canal Authorities upon its first visit after such a request is made. If the vessel is acceptable for transit at less than the prescribed minimum draft, the Operator will be notified that transit on a regular basis is authorised provided the vessel meets the special minimum draft that is specified in the notice.

6. If the vessel is found not to be acceptable for transit on a regular basis, a single transit may be authorised, at the discretion of the Canal Authorities, subject to the imposition of any special conditions that may be required for reasons of safety or continuance of regular Canal operations.

(e) *Maximum Length*

1. The maximum length overall including bulbous bow, for a commercial vessel acceptable for regular transit is 900 ft., except passenger and container ships may be 950 ft. in overall length.

2. The maximum length for integrated tug-barge combination acceptable for regular transit is 900 ft. overall, including the tug. A tug-barge combination must transit together as one unit, with the tug supplying the propelling power.

3. The maximum aggregate overall length for non-self-propelled vessels acceptable for transit is 850 ft., including accompanying tugs. Accompanying tugs must lock through with the non-self-propelled vessel.

(f) *Maximum Beam*

1. The maximum extreme beam for a commercial vessel and the integrated tug-barge combination acceptable for regular transit is 106 ft.

2. At the discretion of the Chief, Navigation Division or his designee, commercial vessels, including integrated tug-barge combinations, having an extreme beam of between 106 ft. and 107 ft. may be permitted to transit on a one-time basis only if the deepest point of immersion does not exceed 37 ft. TFW.

3. The maximum extreme beam for non-self-propelled vessels (other than integrated tug-barge combinations) acceptable for transit is 100 ft.

(g) *Previous Approvals and One-Time Transits.*

Vessels approved for regular transit prior to December 20, 1976, whose maximum length or beam slightly exceed the limits set forth in paragraphs (e) and (f) may continue to transit on a regular basis. After that date, approval will not be given for transit of other commercial vessels whose extreme beam exceeds 106 ft. by any amount, except for vessels transiting on a one-time delivery basis.

(h) *Release from Liability*

If a vessel having a beam in excess of 106 ft. is permitted to transit on a one-time basis, such vessel may do so only at its own risk and, to the extent and in proportion that such failure to meet the requirements of this section proximately causes or contributes to a casualty and resulting damages, the Master of such vessel, on behalf of said vessel, her Owners, Operators, or any other person having an interest in her, and for himself, will be considered to have released the Panama Canal Commission and the United States from, and to have indemnified them against, any loss, damage or liability incurred by the Panama Canal Commission or the United States under, or in respect to:

1. Sections 1411 through 1416, inclusive, of Pub. L. 96-70, 93 Stat. 485-7;

2. Property of the Panama Canal Commission or the United States; and

3. Panama Canal Commission employees under the Federal Employees' Compensation Act 5 U.S.C. 8101, *et seq.*, or any other employee compensation system.

The Master of the vessel that fails to meet the requirements of this section may be required to execute, in the presence of a Commission Official, a form undertaking to release the Panama Canal Commission and the United States from liability in case of an accident and to indemnify the Commission and the United States for any damages sustained. The failure of the Master of a vessel to sign such a form, however, will not relieve the vessel, her Owners, or any other person having an interest in her from liability incurred as a result of the vessel's failure to meet the requirements of this section.

(i) *Denial of Transit*

A Vessel shall not be permitted to transit the Canal under the following circumstances:

1. When the vessel's maximum point of immersion exceeds its maximum authorised draft.

2. When the vessel's maximum point of immersion exceeds the published TFW maximum draft then in effect;

3. When the length overall, including bulbous bow, exceeds that stated in paragraph (e) of this section, unless the vessel was approved for regular transit prior to March 16, 1981; or

4. When the extreme beam exceeds that stated in paragraph (f) of this section by any amount, unless the vessel was approved for regular transit prior to March 10, 1981.

(j) *General*

1. Vessels of 100 ft. beam and over whose list, trim or handling characteristics are such as to endanger themselves, Panama Canal appurtenances or a third party, may have such further limitations placed on them as Canal Authorities deem necessary to ensure reasonable safety.

2. The draft of non-self-propelled barges of 550 ft. or more in length may be limited when, in the opinion of Canal Authorities, such a limit is necessary to ensure reasonable safety.

3. Non-self-propelled vessels, other than integrated tug-barge combinations, will be accepted only on an individual basis; advance permission for initial transit as a non-self-propelled vessel is required. Displacement of these vessels is limited to 35,000 tons and the draft requirements of paragraph (d) of this section are applicable. Riding crews must be provided in sufficient numbers, as required by the Chief, Navigation Division, to safely handle towboat lines and boarding ladders, and to assist in mooring.

4. The numerous constraints affecting the transit schedules of vessels and tows make it important that information provided in advance of the initial transit of a vessel include a capacity plan, general arrangement plans, engine room plans, and whenever possible, a photostatic copy of National Register, Load Line Certificate and Panama Canal Tonnage Certificate. This advance information will minimise the time spent aboard the vessel by Panama Canal Officials before commencement of the initial transit.

HEALTH: Application for Radio Pratique is available to all vessels arriving in Panama Canal waters. Radio Pratique is a quarantine clearance by radio, based upon information from the vessel prior to its arrival at Balboa or Cristobal and past experience with the vessel and its personnel. A limited number of vessels will be sampled for compliance with the required standards of health and sanitation on board. The sampling will generally be done on a random basis and will provide a measure of the success of the programme.

It should be emphasised that Radio Pratique applies only to the quarantine section of the required forms and documents for the Panama Canal. All vessels must still complete the required boarding forms, and in most cases, be prepared to receive the Panama Canal Boarding Inspector on arrival in Canal waters. Such forms as crew and passenger lists, ship's information forms, and the cargo declaration must always be completed for presentation to the Panama Canal officials.

Attached is a listing of the items to be reported prior to arrival in the Canal waters. The information is similar to that now required of vessels requesting Radio Pratique in U.S. ports. In addition, there are some special circumstances that make additional information necessary.

The manner of reporting the information required should be clear and orderly as specified in 35 CFR, section 123.4, listing information required in advance. The request for Radio Pratique should originate from the Master and can be submitted directly by radio or through the vessel's local Agent. The local Agent should submit his request with all the required information to the Admeasurement Office at the port of arrival of the vessel. The local Agent will be notified when Radio Pratique is granted or refused and the Agent will communicate this information to the ship.

It is hoped that vessels will take advantage of Radio Pratique when arriving for transit and that in as many instances as possible it may be able to grant this time saving privilege.

Radio Pratique Programme

1. *General*

(a) The granting of Radio Pratique is an Office of Health and Safety responsibility designated to the Industry and Health Division. (35 CFR 61.264) see below.

§61.264 Radio Pratique; vessels only.

The Quarantine Officer in charge may grant Pratique by radio to a vessel upon the basis of information regarding the vessel, its cargo and persons aboard, received prior to arrival of the vessel, when in his judgement, and in accordance with instructions by the Chief, Industrial and Health Division, the entry of the vessel will not result in the introduction, transmission or spread of communicable diseases.

(b) In order to process the details of this programme more expeditiously, communication may be held between the quarantine offices and the ship's Steamship Agent representing the vessel hereinafter called local Agent.

(c) All vessels coming to the Panama Canal may request Radio Pratique by means of the ETA radio message or through the ship's local Agent.

(d) Requests for Radio Pratique may be submitted to the Admeasurement Office at the port of arrival at least 24 hours and not more than 48 hours before vessel is scheduled to arrive.

2. *Specific Requirement for Each Voyage*

(a) The vessel will be maintained free from rats and vermin.

(b) The Derat Certificate or Derat Exemption Certificate must be valid (i.e. date of issue not more than 180 days prior to date of arrival at the Panama Canal).

(c) Vessels arriving within 15 days from the ports designated in the Aedes Aegypti Indices Bulletins must be disinfected with the aerosol described in the Aedes Aegypti Indices Bulletin No. 8, 1970.

(d) The restrictions imposed in 61.281 through 61.302, "Importation of Certain Things", Title 35 CFR, must be strictly adhered to and followed.

3. *Action taken by the Quarantine Officer in Charge**

(a) Radio Pratique *may* be granted by the Admeasurement Office upon request from the vessel or through the ship's local Agent representing the vessel provided it is documented by ship's radio.

(1) If the information requested in the Appendix hereto is complete; *and,*

(2) If the Quarantine Officer in charge* is of the opinion that the vessel is reasonably free from any condition either from a health or sanitation standpoint that might introduce illness into the Canal.

(b) Radio Pratique may be denied by the Quarantine Officer in charge:

(1) If the requested information is incomplete; or,

(2) If the Quarantine Officer in charge* feels that medical or sanitary reasons prevail requiring careful inspection upon arrival of the vessel.

*Or designated representative.

4. *For Sampling and Surveillance of Compliance Purposes*

After the information supplied by the Shipmaster has been reviewed the Quarantine Officer in charge* will advise the ship's local Agent concerned whether Radio Pratique has been granted or denied and if any restrictions or limitations have been imposed. He will also inform the Marine Traffic Controller, and the Immigration and Customs office whether Radio Pratique has been granted or denied.

*Or designated representative.

5. *Action taken by Ship's Local Agent*

(a) The ship's local Agent may submit requests for Radio Pratique to the Admeasurement Office if the vessel has not done so by radio. The information required is listed in the Appendix hereto. Such requests should be submitted, properly documented by ship's radio, not later than 24 hours before the vessel is scheduled to arrive nor earlier than 48 hours before the expected arrival of the vessel.

(b) The ship's local Agent will advise the vessel which he represents whether Radio Pratique has been granted or denied; and any restrictions or limitation imposed.

6. *Action taken by Panama Canal Commission Boarding Inspectors*

On vessels that have been granted Radio Pratique, the Panama Canal Commission Boarding Inspector will:

(a) Ascertain that the Ship's Master has completed the Ship's Information and Quarantine Declaration (Form 4398) *except* the "quarantine data" portion at the bottom of the form; and,

(b) Otherwise process the vessel (e.g. for Admeasurement, and any other non-quarantine requirements) without any further questioning on quarantine matters. This processing may be either in the bay or at the dockside at the discretion of the Admeasurer Watch Supervisor. Passengers that are disembarking from vessels may be processed by the Immigration Service at the docks.

(c) Vessels that are denied Radio Pratique or have failed to request Radio Pratique, will be cleared through Quarantine by the Panama Canal Commission Boarding Inspector in the prescribed routine manner.

7. *Action taken by Shipmasters*

(a) Shipmasters should request Radio Pratique directly by radio or through the Agent representing them in the Panama Canal and supply the information requested in the Appendix hereto.

(b) Shipmasters should take cognizance of the requirements listed in paragraph 2, "Specific requirement for each voyage", above.

(1) If granted Radio Pratique, they may enter the anchorage area flying the quarantine flag; they must however comply with any restrictions or limitations imposed by the Quarantine Officer in Charge.

(2) Unless the boarding of docking vessels is scheduled to take place at the pier, vessels *must* await boarding by a representative of the Panama Canal authority.

(3) If denied Radio Pratique, vessels must be cleared for Quarantine in the prescribed routine manner; that is enter the Canal waters flying the quarantine flag and must await processing by the Panama Canal Commission Boarding Inspector.

(4) It is important that the Shipmasters remember that in all instances all forms regularly required are to be completed prior to arrival for presentation to the Boarding Inspector.

Appendix

Information required by Quarantine Officer in Charge from Shipmaster requesting Radio Pratique through ship Agency representing him at the Panama Canal.

Full name of vessel.
Country of registry.
International radio call letters.
Estimated date of arrival and port.
Whether docking at Balboa or Cristobal and reason therefor.
List of ports of call within past *15* days prior arrival.
Report any illness or communicable diseases on board.

Report any death occurring on board since departure from last port and cause, if known or suspected.

Report the number of passengers to be disembarked and port of disembarking (e.g. Cristobal or Balboa).

Report the date of the Derat Certificate or Derat Exemption Certificate.

Record the number, kind, and origin of all animals aboard and if any are scheduled for disembarking.

Report the origin or source of the meat in the ship's stores.

Only vessels in the following categories need still be subject to "on board" public health clearance upon arrival:

A. Vessels which, during the 15 days prior to arrival in the Canal ports, have or have had on board passenger or crews with any of the following conditions or symptoms of illness:

1. Temperature of 100° F (38° C) or greater *(a)* which persisted for 2 days or more: or *(b)* which was accompanied or followed by any one or all of the following: rash, jaundice, glandular swelling; *or*
2. *Prolonged diarrhoea* (lasting 1 full day or more).

B. Occurrence of death on board for any reason.

C. Vessels which have been in a country infected with plague in the 60 days prior to arrival in the Canal.

RADIO: Balboa Naval Radio NBA.

Signal Stations: (a) Visual-signal stations established for communication on arrival Canal approaches by International Code and/or flashing light, at seaward end of Pier 6 Cristobal, and on Flamenco Island at Pacific entrance.

(b) Flamenco Island and Cristobal Signal Station also contactable on VHF Channel 12 frequency 156.6 MHz, and R/T 2182, 2638 and 2846 kHz – call letters WHC.

(c) Vessels of 85 ft. beam and above awaiting transit at Balboa anchorage should keep VHF radio watch on Channel 12 for transit orders.

(d) Arriving ships may communicate with Port Captain's Office, Cristobal through Cristobal Signal Station. Radio communication is maintained on international maritime VHF Channel 12 (156.6 MHz) through "Cristobal Radio".

§123.4 Advance information required by radio from vessels approaching Canal: (a) Vessels approaching the Panama Canal shall communicate by radio to the Navigation Division not less than 48 hours in advance of arrival at the Canal (or earlier if radio communication is practicable at an earlier time), the information required by this section unless this information has been previously communicated to the Canal Authorities by other means. Symbols of the phonetic alphabet shall be used to identify each item and the word "NEGAT" shall be used after the items that can be answered "no", "none", or "not applicable". The following items of information shall be provided:

ALFA – The Panama Canal Identification Number of the vessel.

BRAVO – Estimated date and time of arrival, port of arrival and request for Canal transit if desired.

CHARLIE – Estimated draft upon arrival, in feet and inches (fore and aft).

DELTA – Any changes in the vessel's name, country of registry, structure, or use of tanks that have occurred since the vessel last called in Panama Canal waters.

ECHO – Will the vessel dock at Balboa or Cristobal? What is the reason for docking? If it is for cargo operations, fuel or water, give the tonnage involved in each case. Is there any other reason the vessel will not be ready to transit upon arrival? What is the reason?

FOXTROT – The nature and tonnage of any deck cargo.

GOLF – If the vessel is a tanker, state names and grades of cargo carried. State names and grades of the cargo last carried in each empty tank which is not gas free.

HOTEL – If the vessel is carrying explosives as cargo, state the grade of each explosive and the amount, in tons of each grade.

INDIA – Quarantine and Immigration information:

(1) Is Radio Pratique desired?

(2) State the ports at which the vessel has called within 15 days preceding its arrival at the Canal.

(3) State all cases of communicable disease aboard and the nature of the disease or diseases, if known.

(4) The number of deaths which have occurred since departure from the last port and the cause of each death, if known.

(5) The number of passengers disembarking and their port of disembarkation.

(6) The number of ports of origin of any stowaway and a brief description of the identity papers of each stowaway.

(7) The number, kind and country of origin of any animals aboard. Are any animals to be landed?

(8) The country of origin of all meat, whether carried as cargo or as ship's stores.

(9) Has the vessel called at a port in any country, infected with foot-and-mouth disease or rinderpest during its present voyage? Countries considered to be infected are:

(a) All countries East of the 30th Meridian West longitude and West of the International Date Line except Australia, Channel Islands, Fiji, Greenland, Iceland, Japan, New Zealand, Northern Ireland, Norway, Republic of Ireland.

(b) All countries of South America;

(c) Curacao (the leeward islands of the Netherlands Antilles);

(d) Cuba;

(e) Martinique;

(f) Guadeloupe.

(10) Specify whether the vessel has a valid Derat Certificate or a Derat Exemption Certificate issued 180 days prior to arrival.

The following additional information shall be transmitted via radio to the Port Captain from all vessels as applicable:

(1) Vessels approaching from the Pacific shall report actual time of passing Cape Mala, or the latitude of Cape Mala, and the vessel's speed.

(2) Vessels approaching from the Atlantic shall report 12 hours prior to arrival at Cristobal any change of 1 hour or more in the expected time of arrival.

(3) Any other matters of importance and interest.

Timely receipt of the above information will facilitate the transit or docking of arriving vessels. Failure to comply with these reporting requirements may subject a vessel to delay since vessels which do comply will receive priority of service and handling over those which do not.

VHF: *§123.3 Radiotelephones required.*

(a) Except for vessels operated by the Panama Canal Commission or another agency of the United States, the following vessels shall comply with the requirements of this section:

(b) A vessel of a type described in paragraph (a) of this section shall be equipped with a radiotelephone which can be operated from the navigation bridge and which can be used to communicate on the following Channels in the 156 – 162 MHz frequency band:

(1) Channel 12, 156.600 MHz;
(2) Channel 13, 156.650 MHz;
(3) Channel 16, 156.800 MHz.

(c) A vessel of a type described in paragraph (a) of this section, which has notified the Chief, Navigation Division or his designee that it is ready to transit or otherwise navigate in Panama Canal waters and requires a Panama Canal Pilot, shall, until a Pilot boards the vessel, maintain a continuous watch on Channel 12. Channel 12 will be used for notification to vessels of their transit time and for advisory harbour control communication in Limon Bay.

(d) A vessel of a type described in paragraph (a) of this section shall maintain a continuous watch on Channel 13 when underway in Panama Canal waters without a Panama Canal Pilot aboard, and shall use Channel 13 only for ship-to-ship or ship-to-coast navigational communications. When such vessels have a Panama Canal Pilot aboard, Channel 13 may be used only by the Pilot or at his direction for navigational communications.

(e) The signal stations on Flamenco Island and in Cristobal may be called on Channels 12 and 16. Channel 16 may also be used by all vessels for ship-to-coast communications with steamship Agents or other commercial businesses.

TANKERS: *Transit Restrictions:* Vessels carrying petroleum products having a flashpoint greater than 80°F and classified lower than Grade C under the U.S. system, or having a flashpoint greater than 23°C and classified higher than 3.2 under the IMO system are not considered to be carrying dangerous cargo for purposes of these restrictions.

Special rules apply to vessels carrying dangerous cargo or not gas free. These rules concern the conduct of navigation in the Canal and in the approaches to the locks. Generally it may be assumed that vessels carrying a dangerous cargo shall:

(a) Not overtake.

(b) Not be overtaken.

(c) Meet oncoming vessels at a safe speed.

(d) Avoid meeting oncoming traffic at turns.

(e) If required to anchor, anchor well clear of the channel and other vessels.

(f) Take a tug at locks and Gaillard Cut if required by the Pilot.

DENSITY: On several occasions vessels arriving for transit have been found to be over authorised draft after entering Gatun Lake. Overdrafts in these instances have been caused, it is believed, by assuming fresh water densities different from what actually exists in Canal.

Using distilled water as 1.000 at 3.98° C, water densities have been determined to be as follows:

	Density	
Location	*Gm./cc. 85° F*	*Lbs./ft³ 85° F*
(a) Gatun Lake	0.9954	62.21
(b) Miraflores Lake	0.9971	62.32
(c) Balboa Anchorage	1.0219	63.87
(d) Cristobal	1.0212	63.76

BOILER WATER: May be taken without charge from Gatun Lake subject Pilot's permission and draft.

FRESH WATER: Available at Balboa or Cristobal.

CERTIFICATES: See "Documents". *(a)* If a valid Derat Certificate or Derat Exemption Certificate is not produced with respect to any arriving vessel the quarantine officer shall:

(1) If he is satisfied that vessel is free of rodents or is kept in such a condition that number of rodents on board is negligible, issue a Derat Exemption Certificate; or

(2) If he is satisfied that a Derat Exemption Certificate should not be issued with respect to such vessel, require derat of vessel.

(b) When, pursuant to paragraph *(a)* (2) of this section, derat has been completed to satisfaction of quarantine officer, he shall issue a Derat Certificate.

CUSTOMS: Hours: The regular hours for the Customs inspection of baggage of landing passengers and for the Customs supervision of landing passengers are from 0700 to 1700 hrs. daily, excluding Sundays, and holidays. Such Customs services may be furnished during other hours, or on Sundays and holidays, only upon the request of the Master or authorised Agent.

Allowances: Tobacco, Wine and/or Spirits at Master's discretion sufficient for immediate consumption. Alcohol not permitted to be taken ashore.

CONSULS:

Norway: Royal Norwegian Consulate General: Consul General for Panama, R. P., Terence O. Ford, Office: 28–25–2347.
Residence: 28–24–1884.
Norwegian Consul, Cristobal, G. R. Morland, Fenton Bldg. 45–1155.
Norwegian Consul for Balboa, Arne Hauge, Office 52–5053.

Republic of South Africa: Consul for the Republic of South Africa, Henry I. Darlington, Office: 28–23–0834.
Residence: 28–23–6779.

Sweden: Royal Swedish Consulate General, Edificio Melinda, Via Argentina, Panama 28–23–9694.

Denmark: Royal Danish Consulate General, Consul General for Panama.
Residence: 45–1155.
Royal Danish Consulate for Colon and Cristobal.
Residence: 3–2361.

REPATRIATION: Crew members may be discharged only with consent of the Immigration Service. Before such consent may be given, the Chief Immigration Inspector at port concerned shall be furnished a memorandum in triplicate showing name, age, nationality, and rating of the crew members proposed to be discharged.

When crew members are signed on a vessel, a memorandum in triplicate showing name, age, nationality, and rating of crew members signed on shall be furnished to Chief Immigration Inspector at the port concerned.

Arriving crew members and particularly visiting Superintendents should if possible possess Panamanian visas.

AIRPORT: General Omar Torrijos Herrera International Airport located outside Panama City, 18 miles from Balboa; 48 miles from Cristobal, served by all major scheduled international airlines operating in Southern hemisphere.

HOLIDAYS: January 1st; January 9th; Good Friday; Carnival Tuesday (day before Ash Wednesday); May 1st; August 15th (Pacific side only); October 11th; November 3rd; November 5th (Atlantic side only); December 8th; December 25th.

TIME: EST. No alterations to clocks necessary throughout the year.

LOCKS: Gatun Locks (Atlantic side) raise and lower vessels 85 ft., Miraflores (nearest to Pacific) 54 ft. and Pedro Miguel (Pacific side) 31 ft.

AUTHORITY: Panama Canal Commission.

AGENT: See "Cristobal".

PEDREGAL: 08.23 N. 82.26 W. (See Plan Book)

LOCATION: The Port of Pedregal is 7 km. to the South of the City of David, Chiriqui Province, in the West part of the Pacific coast of the Republic of Panama. The port is at the head of an estuary of the River Garibaldo.

DOCUMENTS:

General Declaration, 2 copies.
Cargo Manifest, 5 copies.
Crew List, 3 copies.
Passenger or Negative Passenger Declaration, 4 copies.
Stores or Supplies List, 4 copies.
Crew Personal Effects, 3 copies.
Health Documents, 1 copy.
Maritime Health Declaration.
Derat Certificate.
Crew Vaccination Cards.

PILOTAGE: There is no official Pilot in the port. The pilotage service is covered by persons who are duly licensed and who have much experience, since they work full time on ships in this area. When their services are requested, they ask permission of their employers if it is during normal working hours (private undertakings). They obtain a launch which has no means of communication at all with the port.

ANCHORAGE: Vessels intending to enter the port must anchor near the Fairway Buoy installed at the Port Entrance at San Pedro Mouth. Around this buoy are depths of 70 ft. and 80 ft.

RESTRICTIONS: All vessels entering port must do so on high tide. Vessels are not allowed to enter or leave the port area at night. Entry and departure is only allowed if a Pilot is on board. Vessels must advise their local Agents 48 hours in advance of their intended arrival.
MAX. SIZE: The length of the quay is 86 m. and the width is 6 m. at the part where there is a buoy, with 4.2 m. along the rest of it. The max. depth of water for a vessel entering the port is 18 ft.; but the draft of the vessel must not exceed 15 ft.
HEALTH: The vessel is boarded by a Quarantine Inspector, who will inspect the entire vessel, and if there is no suspicion of illness or contamination, and all health stipulations as covered by Panamanian Laws are met, Free Pratique is granted. If there is any suspicion of illness or contamination, the vessel is immediately fumigated far from the quay, with the crew being forbidden to come ashore.
VHF: There is a radio unit for VHF communication and calls are made on Channel 16, passing then to another available channel. This equipment receives calls on frequency 156.8 MHz.
TUGS: None available.
BERTHING: The port consists of a single marginal quay 86 m. long, made of reinforced concrete (both surface and uprights).

The quay has depths of 3.35 m. (11 ft.) and 4.27 m. (14 ft.) at its ends, and in the centre 5.18 m. (17 ft.).

To one side of the quay is a building of reinforced steel covered with sheets of corrugated zinc with an area of 360 cu.m. and a free internal height of 6 m.
CARGO HANDLING: For handling purposes, there are only a few hand trucks, and vessels are obliged to utilise their own resources.
Cranes: Loading and discharge is by the ship's own gear, excluding shipment of sugar which ish done by land-based equipment.
STEVEDORES: There is a stevedores' syndicate which is independent of the National Port Authority.
MEDICAL: There is no doctor in the port; but there is a medical centre not far away.
FUEL: There are no pipe-lines. Oil is supplied by road tankers.
FRESH WATER: There are water installations available for supplies to ships.
FIRE PRECAUTIONS: None.
REPAIRS: No repairs are carried out on ships.
AIRPORT: The National Airport of David is some 5 km. away on the road between Pedregal and David. It has commercial flights only at national level.
POLICE/AMBULANCE/FIRE: In the port there are no services; 5 km. away in the City of David there are services, and their telephone numbers are: Police 75-1446 or 75-2210. Fire Brigade and Ambulance 75-4216.
SHORE LEAVE: Allowed.
DELAYS: Any delays are caused by the tides, another vessel occupying the quay or arrival at night.
GENERAL:
Observations: The quay of the Port of Pedregal is in a bad state in every respect, both the top surface and the water side supports, and some of the piles need to be repaired.
Shelter: The Port of Pedregal, being at the head of an estuary, is not affected by the sea or swell.
Tides: The average tidal difference (average tide) in the port is 2.5 m. (8.2 ft.) and the average Spring tide is 3.05 m. (10 ft.).
Common Operations in the Port: Pedregal is a port whose operations are on a small scale, handling cargo such as fertilisers, general cargo, bulk commodities, and local fishing. International vessels arrive at the port very sporadically, due to the reduced depth of water and the poor state of the quay.
AUTHORITY: National Port Authority, Apartado 8062, Panama 7, Panama. *Tel:* 69-5444. *Telex:* 2765. *Contact:* Lic. Nander A. Pitty V., Director General; Ing. Carlos Urriola, Director of Operations.

PUERTO ARMUELLES: 08.17 N. 82.52 W.

(See Plan Book)

SECTION A: GENERAL CARGO PORT.
SECTION B: OIL TERMINAL.

SECTION A: GENERAL CARGO PORT.

LOCATION: Puerto Armuelles is located on the Pacific coast of the Republic of Panama.

Puerto Armuelles is a port solely used for the export of bananas, it is operated by United Brands Co., and administered by the National Port Authority of Panama.
DOCUMENTS: Same documents and the same procedure as Almirante.
PILOTAGE: United Brands Company has a Pilot who is available 24 hours of the day. Pilotage consists in mooring the vessel at the quay from the anchorage, for which the vessel must position a ladder on the port side. The pilot launch is white and has no VHF radio. The mooring operation is fairly complicated and United Brands provide a gang of men who board the vessel and manipulate the cables used in the mooring process. Mooring at the quay is always done on the starboard side of the vessel and the bow must be pointing out to sea.

The Pilot must be contacted by the ship's Agent and requested by the vessel by VHF radio on Channel 12 to the Port Authority or Channel 16 to United Brands Co.
ANCHORAGE: Vessels may anchor half a mile from the pier, where there are depths of 36.6 m. (120 ft.). However, due to the great depth of water in front of the quay, care must be taken in letting out the anchor, it being necessary to find places where the water is not so deep.

It is recommended that for Masters of vessels arriving for the first time in the port ask for the Pilot when anchoring.

There are no aids to navigation indicating the best place to anchor.
RESTRICTIONS: Puerto Armuelles is located in the Bay of Charco Azul, where there are great depths making it unnecessary to have aids to navigation. Access to the port is free of sandbanks or any other obstruction to navigation. There are therefore no restrictions for vessels wishing to enter the port, except on the quay itself.

On the quay proper, restrictions are as follows: Ships are not to be moored during bad weather and mooring is permitted in daytime only, unless there is an emergency. Bad weather usually prevents securing and mooring cannot be performed.
HEALTH: The vessel is boarded by the doctor in the operation of clearance. In the event of illness on board, the Port Authority must be advised on VHF Channel 12 and the vessel must wait at the anchorage for the doctor's visit.
RADIO: A radio service exists via telegraphic cables operated by Tropical Radio Telegraph Co. The Port Authority has VHF/FM equipment which receives calls on Channel 12. United Brands Co. also has VHF and receives calls on Channel 16. The range of these stations is 50 nautical miles. The Port Authority also has SSB equipment which takes calls on frequency 7447.5 kHz.
TUGS: None available.
BERTHING: The quay consists of a pier with a single berth 137 m. long and 12.2 m. (40 ft.) minimum depth. Vessels must moor on the starboard side.

The quay has 4 banana loaders with a loading capacity of 42 boxes of bananas per minute, each weighing 42 pounds. There is no other type of loading equipment.

Since the quay is located in a position open to the sea a set of 3 mooring buoys is used to keep vessels away from the N.E. side of the pier.
CRANES: 1×5 ton rail mounted crane.
STEVEDORES: Loading and discharging work is carried out by the Union of Port Workers. The vessel's Agent must contract the services of the workers via United Brands Co.
FRESH WATER: Supplied at the rate of 2 t.p.h.
FUEL: Not available.
REPAIRS: Facilities for painting, cleaning, ship and machinery repairs are available.
PROVISIONS: Shipchandler facilities available. Can be obtained locally or in the town of David 100 km. away.
TIME: GMT minus 5 hours.
CONSULS: Colombia, Costa Rica, Nicaragua.
MEDICAL: There is a modern hospital in Armuelles.
POLICE/AMBULANCE/FIRE: Available in Armuelles.
CUSTOMS ALLOWANCES: See "Almirante".
TELEPHONE: Micro-wave connects Armuelles with any country in America or Europe. No facilities for telephones on board vessels.
OPENING/CLOSING HATCHES: Carried out by port workers.
DENSITY: 1.0219 gm/c.c. at 85°F.
SHORE LEAVE: No restrictions.
REPATRIATION: Can be effected without difficulty.
AIRPORT: Armuelles has a small airstrip for light aircraft. However, the town of David 100 km. away by road from Armuelles has a larger airport. There are 2 daily flights by local commercial lines between David and the airport of General Omar Torrijos Herrera in Panama; thus repatriation can be effected without difficulties.

SHIPMASTER'S REPORT: 1979.
Documents: Same as for "Almirante", and if no cargo to land at this port, 6 copies of a "Nil" declaration.
Pilotage: Arranged through Agent. Pilot and mooring gang board 0.75 miles East of pierhead by port accommodation ladder, from an old ship's lifeboat painted white.
Anchorage: 1 mile East of pierhead in depths of 45 m. or more. Bottom is very steep-to, in less depth vessel can be too close to shallow water. Recommend U.S. Chart 21581, 'Ports and Anchorages S. Coast of Panama' be obtained.
Restrictions: Almost none, depth alongside over 12.2 m. (40 ft.), breadth is no restriction, berthing face is about 167.6 m. (550 ft.) long, but vessels up to about 207.3 m. (680 ft.) long could be berthed, bows projecting from pier.
Health: Pratique given by doctor on arrival. If any suspected disease, vessel should advise Agent by radio beforehand. Meat products which are not usually acceptable to U.S.D.A., are generally sealed up as in U.S. Ports.
Radio: Balbao Radio.
VHF: Channel 16 for Pilot.
Tugs: None.
Berthing: Pier about 609.6 m. (2,000 ft.) long, lies in South-easterly direction from the shore line, vessel berths starboard side alongside on the N.E. face, seaward end.

Three buoys are moored 76.2 m./91.4 m. (250/300 ft.) off the berth and are used to hold off the pier, the vessel being moored about 3.05 m. (10 ft.) off at all times due to swell. Port anchor is let go approaching the berth and ship's lines used to position vessel, then very heavy mooring springs are secured, 4 at each end. Ship's lines remain on buoys for holding off. On sailing Pilot does not board, only berthing gang who leave by accommodation ladder to boat after vessel is off the berth.
Fuel: Not available.
Fresh Water: Piped to pier, ample hydrants, charge U.S. $150.00 irrespective of amount taken.
Repairs: Workshop and electrical repairs can be undertaken by arrangement.

Fresh Provisions: Available.
Time: GMT minus 5 hours.
Medical: All facilities available.
Customs Allowances: No restrictions as long as nothing landed, bond is sealed on arrival.
Opening/Closing Hatches: Ship's crew. For banana loading starboard side elevator hatches only.
Shore Leave: No restrictions.
Operators: Chiriqui Land Company.

AUTHORITY: National Port Authority, Apartado 8062, Panama 7, Panama. *Tel:* 69-5444. *Telex:* 2765. *Contact:* Lic. Nander A. Pitty V., Director-General; Ing. Carlos Urriola, Director of Operations.

Puerto Armuelles Port Administrator: *Tel:* 75-1230.

SECTION B: OIL TERMINAL.

LOCATION: The PTP transhipment Terminal is located on the Western side of Bahia de Charco Azul in position 8° 12.5′ North, 82° 53′ West, on the Eastern side of the Burica Peninsula, approximately 8.5 miles North of Punta Balsa and 3.5 miles South of Puerto Armuelles.

DOCUMENTS: The following documents are required for entry and clearance:

2 copies General Declaration.
1 copy Clearance from Previous Port.
5 copies Cargo Manifests or declaration that no cargo is carried.
3 copies Crew List.
4 copies Passenger List or declaration that no passengers are carried.
2 copies Stores List or declaration that there are no supplies.
2 copies Crew Personal Effects Declaration.
1 copy Maritime Health Declaration.
2 copies Mail List.
1 copy Bill of Lading.

PILOTAGE: Pilotage to and from the Terminal Jetties is compulsory and is available on a 24 hour basis.

Vessels should not approach the immediate vicinity of the Terminal without being authorised.

The outgoing or unberthing vessel will have priority over the incoming vessel providing the normal rules of navigation are not infringed.

For discharging vessels, pilot station is 3.5 miles S.E. of Jetty No. 2. For loading vessels, pilot station is 3 miles East of Jetty No. 1.

Ships should make a lee for the Pilot and the ladder should conform to normal international standards. Discharging vessels should place the ladder on the port side when on Northerly heading. Loading vessels should place ladder on the starboard side when on a Westerly heading.

Vessels with a freeboard of 30 ft. or more shall provide suitable accommodation ladder, in addition to pilot ladder.

Vessels shall have both anchors ready for use.

Masters will advise Terminal, before berthing, of any damage or disability to his vessel.

APPROACHES: Approaches to the Terminal are from the South to the S.E. (See Plans).

Lights:

1. Isla Burica 08° 01.5′ N., 82° 52.5′ W., flashing every 10 seconds, 12 miles, white light exhibited from a metal framework tower which is 34 m. high and solar powered.
2. Puerto Armuelles (Banana Pier) 08° 16′ N., 82° 52′ W. An occulting light is exhibited from the head of the pier in combination with a fixed red light.
3. At the Terminal, flashing lights are exhibited from the extremities of the berths.

No. 1 Berth: Flashing red every second.
No. 2 Berth: Flashing red every second.
No. 3 Berth: Flashing white every second.

There are no leading lights.

ANCHORAGE: The area immediately to the East of the Terminal is very deep.

The North East area of the Bahia Charco Azul is believed to be the appropriate area to anchor. The holding ground is reported to be good.

Radio contact should be maintained with the Terminal via VHF Channel 16.

MAX. SIZE: 265,000 d.w.t.

HEALTH: In accordance with standard international practice, ships are required to display International Code Signals for vessels requiring Free Pratique and these should be displayed until Pratique has been granted.

N.B. The Autoridad Portuario Nacional (A.P.N.) permits employees of P.T.P. to board vessels (before the ship receives Free Pratique) for the purposes of setting loading arms. Discharge of ballast may commence in case of a vessel with ballast. Discharge of cargo *is not* permitted. Employees of P.T.P. are not permitted in ship's accommodation areas before clearance.

RADIO: *Notices/Time of Arrival:*

ETAs:

All communications should be in local time. ETAs should be received by the Terminal at least 72 hours prior to arrival and any variation of more than 4 hours should be advised.

ETAs should be sent via ship's Agents who will notify the Terminal. The ETA cables should include the following:

1. Name of vessel.
2. ETA Puerto Armuelles.
3. Draft on arrival, fore and aft.
4. For discharging vessels: B/L, gross and net barrels of oil to nearest barrel.
   For loading vessels: ballast for discharge ashore to nearest 1,000 barrels.
5. Any conditions which will affect loading or unloading operations.
6. Deviations from the recommended deck fittings. (See "Berthing/Loading").
7. Water request, if any.

Notice of Readiness: Notice of Readiness is considered to be received by the Terminal if either:

1. Vessel tenders the Notice of Readiness to load or discharge upon arrival at the Pilot Station.
2. When a berth is not available and a vessel elects not to close the port, it may tender its Notice of Readiness at a distance of 15 miles from the Terminal. In this case notice is considered received at this time *plus 2 hours.*

Nothing in these rules will interfere with any business arrangements made by P.T.P. and the user in respect of lay-time, demurrage, and other contractual obligations.

VHF: Vessels approaching the Terminal should establish VHF communication as soon as they are within range (about 50 miles).

The Terminal keeps a listening watch on Channel 16; call sign "Petroterminal Control". Vessels which have to lay-off the Terminal should maintain a listening watch on Channel 16.

The Terminal also uses Channels 11, 12, 13, 14.

The Terminal tug boats and line handling boats are also equipped with Channels 11, 12, 13 and 14.

The Terminal radio monitors Channels 11, 13, 14, 16 at all times.

Also see "Chiriqui Grande" – re-skip.

Frequency Allocation:

Channel	*Use*
13	Cargo handling ONLY.
14	Tugs and berthing.
(11)	(Alternate channel for cargo).
16	Call-up channel. Vessels at anchor maintain listening watch.

Always identify calling vessel and station being called.

Communication with Agents: Vessels may contact their Agents by using Channel No. 16 (using the bridge set) and shifting to a working channel other than Nos. 11, 13 or 14.

Do not use the cargo radio for any ship's business except cargo operations.

Communications While at Dock: The Terminal will provide a portable radio for the use of the vessel's Person-in-Charge of petroleum and ballast transfer operations.

The Person-in-Charge must maintain the radio in his possession at all times, and it must not be changed to any other channel unless instructed to do so by "Petroterminal Control".

The dock-hand is equipped with a portable radio on the cargo working channel.

A third radio is permanently installed in the dock shed.

All communications are conducted in English.

BERTHING/LOADING:

The Terminal Representative will direct where and when a vessel is to berth.

A. Mooring & Connecting

1. *Mooring Pattern:* At both Berth No. 1 and No. 2 the normal mooring pattern will be:

FORWARD	AFT
3 Headlines	3 Stern Lines
3 Breast Lines	3 Breast Lines
2 Spring Lines	2 Spring Lines

Discharging vessels will normally berth with port side to Berth No. 1. Loading vessels will normally berth port side to No. 1 or No. 3, and starboard side to No. 2 Berth. Any variation will be advised by the Berthing Master and Masters should advise any preference prior to arrival.

Mixed moorings are undesirable, e.g. a wire and fibre rope in parallel service is undesirable due to unequal elasticity. All moorings must be arranged so that loss of effect cannot occur when slacking off or heaving in on one line, as required, due to the rise or fall of the vessel during loading or discharge operations.

It is imperative that spring lines be adequate to maintain a minimum fore and aft movement of the vessel to remain within the limitation of movement of the loading arms.

Wire ropes may be used and are preferred for spring lines.

Marine Manager's Notice to Mariners: Our experience has shown that vessels using synthetic tails on the end of their wire mooring lines have considerably reduced their mooring time at this Terminal.

If your vessel's wires are not already fitted with tails we request they be fitted for your next visit to our Terminal.

Some vessels fitted with 'End Less' tails at the end of their wires do not have the two parts lashed together at the shackle, the tail is then free to pull through the shackle, this also causes difficulties with mooring.

The diagram (see "Plan Book") shows type of shackle we have found most suitable, also length of synthetic tail required.

Your attention to this matter would be appreciated.

Pre-Transfer Conference: The Pre-Transfer Conference will be held between the Control Room/Supervisor and responsible Officer prior to commencement of operations. (IOTTSG Chapter No. 5) to agree on procedures for deballasting and loading, including:

1. Communications between ship/shore/Control Room/Supervisor.
2. Deballasting procedures.
3. Cargo start-up procedures.
4. Any deviations from normal procedures.
5. Loading rates, initial, maximum, and topping off.
6. Notice times required to change rates and shutdown procedure.
7. Emergency shutdown, moorings failure, oil spill, etc.
8. Any ship's deficiencies to be made known.
9. Any Terminal deficiencies to be made known.
10. Completion of loading.
11. Designated smoking area.
12. Galley and appliance limitations.
13. Emergency assistance.
14. Vessel will be ready to move under her own power at all times while moored at the SBM.

Prior to the start of operations, the Supervisor and responsible Officer will complete the Safety Checklist.

Where any disagreement arises between the vessel personnel and the Berthing Master regarding some aspect of Terminal procedure, the procedure to be followed will be that which provides closest compliance with guidelines established by the latest edition of International Safety Guide for Oil Tankers and Terminal, published by the International Chamber of Shipping, Oil Companies International Marine Forum.

Flow Rates: Terminal can receive crude oil at 100,000 b.p.h. or more. Berth No. 1, individually, can receive approximately 60,000 b.p.h. Terminal can receive ballast water at 30,000 b.p.h. or more. Discharge pressure of 125 p.s.i.g. at ship's rail is permitted. The crude oil loading rate is 48,000 b.p.h. by pumping. Higher rates can be given on request.

Cargo operations shall not commence until the Master or Mate has informed the Port Representative that all necessary valves are opened and the vessel is ready to discharge or receive cargo and regulations being complied with.

In the event of a vessel requesting a shore-stop, Masters should understand that Petroterminal accepts no responsibility for any errors in quantity.

Loading Arm Connections: (See also Section B and C below).

Bonding cable shall be secured to a clean surface before loading arm connection.

Ship's crew must be available to assist in connection and disconnecting loading arms to the manifold of the ship.

a. Preferred connections for discharging vessels are 4 each 16 in. ANSI 150# Weldneck flanges on the port side. *Standard flanges are required.*

(1) Non-standard flange thicknesses and/or non-standard outside diameters may prevent loading arm couplings from functioning.

(2) At least 8 in. of straight pipe (free of supports, lugs, or reducer) is required behind the flange for coupling clearance.

(3) The preferred flange spacing fore and aft is 3.0 m. – 3.0 m. – 3.0 m. (10 ft. – 10 ft. – 10 ft.), or less between centres. In no case can the distance be less than 1.6 m. (5 ft 3 in.), 1.1 m. (3 ft. 7 in.), 1.6 m. (5 ft. 3 in.).

b. Preferred connections for loading vessels are 4 each 12 in. ANSI 150# Weldneck flanges on the starboard side. *Standard flanges are required.*

(1) Non-standard flanges thicknesses and/or non-standard outside diameters may prevent loading arm couplings from functioning.

(2) At least 8 in. of straight pipe (free of supports, lugs, or reducers) is required behind the flange for coupling clearance.

(3) The preferred flange spacing fore and aft is 3.0 m. – 3.0 m. – 3.0 m. (10 ft. – 10 ft. – 10 ft.), or less between centres. In no case can the distance be less than 1.6 m. (5 ft 3 in.), 1.1 m. (3 ft. 7 in.), 1.6 m. (5 ft. 3 in.).

(4) Disconnection of loading arms: Once cargo transfer is complete the loading arms will be drained and then disconnected by shore personnel.

B. Berth No. 1 (See Plan). Berth No. 1 is designed for discharging or loading vessels of 28,000 to 265,000 d.w.t., without draft restrictions. Least depth alongside is 80 ft. Jetty head is connected to shore by trestle.

Gangway: Hydraulically operated telescoping gangway from loading platform to ship's deck is provided.

Loading Arms: 4 Mannesmann 16 in. size fully powered loading arms are installed. They are fitted with positive locking hydraulic couplers for 16 in., 14 in. and 12 in. standard flanges. All arms are capable of transfer of crude oil and ballast water.

Crane: A 1 ton capacity crane for handling of supplies, etc., is installed.

Breasting Dolphins: Four single steel tube breasting dolphins equipped with pivoting timber-faced fenders are installed. The two outer dolphins are spaced approximately 380 ft. apart and are equipped with double quick release hooks and power capstans. The two inner dolphins are spaced approximately 260 ft. apart and are similarly equipped.

Mooring Dolphins: There are four mooring dolphins. All are equipped with 3 quick release hooks and power capstans.

C. Berth No. 2 (See Plan). Berth No. 2 is designed for discharging or loading vessels of 28,000-270,000 d.w.t. without draft restriction. Least depth alongside is 77 ft. Jetty head is connected to shore by a trestle.

Gangway: A hydraulically operated telescoping gangway from loading platform to ship's deck is installed.

Loading Arms: 3 Mannesmann 16 in. size fully powered loading arms are installed. They are fitted with positive locking hydraulic couplers for 16 in., 12 in. and 10 in. standard flanges.

Crane: A 1 ton hydraulic crane for supplies, etc., is installed.

Breasting Dolphins: 4 each single steel tube breasting dolphins equipped with pivoting timber faced fenders are installed. The distance between dolphins is 375 ft. Each dolphin is equipped with two quick release hooks and a powered capstan.

Mooring Dolphins: There are four mooring dolphins, all are equipped with 3 quick release hooks and power capstans.

D. Berth No. 3 Platform (See Plan). See "General" – Berth No. 3. Designed for loading vessels up to 60,000 d.w.t. without draft restriction. Least depth alongside 50 ft. Jetty is connected to shore by submarine line only.

Loading Arms: 3 Mannesmann 12 in. size fully powered loading arms are installed. They are fitted with positive locking hydraulic couplers for 12 in., 10 in. and 8 in. standard flanges.

Gangway: A hydraulic gangway is provided.

Crane: A 1 ton capacity crane for handling supplies is fitted.

Breasting Dolphins: Two breasting dolphins are spaced 200 ft. apart fitted with pivoting timber faced fenders.

Mooring Dolphins: Four mooring dolphins equipped with two quick release hooks remotely controlled from the loading platform

Inert Gas: Per User's (Sohio) request: Inert gas vessels will not be requested to depressure for ullaging or sampling unless there is reason to suspect an error.

THERE ARE NO CHECK VALVES IN THE TERMINAL PIPELINES AT THIS TIME – PLEASE CHECK PROCEDURES PRIOR TO COMMENCEMENT OF OPERATIONS.

Petroterminal – Berth Description:

	Berth No. 1	*Berth No. 2*	*Berth No. 3*
Vessel size (design)	28,000 – 270,000 d.w.t.	28,000 – 275,000 d.w.t.	28,000 – 60,000 d.w.t.
Type of berth	Fixed loading platform	Fixed loading platform	Fixed loading platform
Deck level of berth	40 ft. MLLW	40 ft. MLLW	38 ft. MLLW
Depth alongside at MLLW	80 ft.	77 ft.	50 ft.
Loading arms (number and size)	4×16 in. also 14 in. and 12 in. adapters	3×16 in. also 14 in. and 12 in. adapters	3×12 in. also 10 in. and 8 in. adapters
Max. rate loading	48,000 b.p.h. plus	48,000 b.p.h. plus	48,000 b.p.h.
Max. design flow rate (per berth)	100,000 b.p.h.	90,000 b.p.h.	40,000 b.p.h.
Loading arm spacing on operating dock/minimum ship manifold spacing	9 ft. 4 in. (4)	9 ft. 4 in. (3)	9 ft. 6 in. (3)
Quick disconnect coupling size (QDC)	16 in.	16 in.	12 in.
Manifold size range acceptable to QDC (#1)	16 in., 14 in. and 12 in.	16 in., 14 in. and 12 in.	12 in., 10 in. and 8 in.
Maximum ship manifold pressure	PSIG – not to exceed 125	PSIG – not to exceed 125	PSIG – not to exceed 125
Emergency shutdown	Can be initiated by berth operator or by Control Room. Shutdown complete within 6 seconds after initiation	Can be initiated by berth operator or by Control Room. Shutdown complete within 6 seconds after initiation	Can be initiated by berth operator or by Control Room. Shutdown complete within 6 seconds after initiation
Access to ship	69 ft. aluminium gangway	69 ft. aluminium gangway	43 ft. aluminium gangway
No. of mooring dolphins	4	4	4
No. of breasting dolphins	4	4	2
Mooring/breasting hooks	1 triple hook per mooring dolphin/4 double hooks per breasting dolphin	1 triple hook per mooring dolphin/1 double hook per breasting dolphin	1 double hook per mooring dolphin/1 hook per breasting dolphin
Potable water	Limited	Limited	Limited
Bunker facilities	None	None	None
Public telephone	None available	None available	None available

Notes:

1. Although all berths are designed to handle vessels in the 25,000 d.w.t. size, loading arm size requires ship's manifolds to be a minimum of 12 in. in diameter for Dock Nos. 1 and 2, and 8 in. diameter for Berth No. 3.

2. Vessels in the 250,000 d.w.t. range will be acceptable only if dock/deck machinery and mooring leads allow an efficient bow and stern mooring line pattern plus bow to manifold distance.

3. Preferred flange spacing fore and aft is 10 ft. – 10 ft. – 10 ft. (or less) between centres, however, in no case can the distance be less than 5 ft. 3 in. – 3 ft. 7 in. – 5 ft. 3 in.

ANSI No. 150 Weldneck Flanges.

TUGS: 3 tugs of more than 4,200 h.p. are available and usually will make fast alongside. Tug's lines are used for making fast to vessel.

When working tugs alongside, ullage plugs shall be closed.

Tugs available throughout 24 hours.

BALLAST: When alongside, ballast should be handled by type, as per international convention, as follows:

1. *Segregated:* All ballast in segregated ballast tanks should be visually inspected prior to discharge. After inspection, segregated ballast may be discharged overboard according to standard shipboard procedure.

2. *Dedicated Clean:* All ballast in dedicated clean ballast tanks should be visually inspected prior to discharge. After inspection, dedicated clean ballast tanks may be discharged overboard in accordance with IMO Regulations.

3. *Treated:* Ballast water which has been chemically treated (with detergents, emulsifiers, etc.) must be retained on board.

4. *Others:* All other ballast water will be pumped ashore prior to loading. The Terminal has 3×120,000 barrel tanks for the reception of dirty ballast. The ship will advise the Terminal of the quantity of ballast to be discharged ashore prior to commencing discharge.

Ballasting: Before ballasting, the cargo lines shall be drained back into cargo tank. Ballast pumps shall be started before sea valves are opened.

CRUDE OIL WASHING: Crude oil washing may be done during discharge if this does not cause delay to other vessels awaiting berth.

The Terminal should be kept fully advised of any extra time required in order to comply with IMO Regulations.

MEDICAL: Doctor will only board vessel in cases of emergency. There are limited medical and dental services available. Treatment should, when possible, be arranged via Ship's Agent in advance.

DENSITY: Offshore salinity is 1.025. Salinity (Specific Gravity), due to river run-off, is about 1.010 close to the shore during the rainy season (July-November/December). During this period, substantial changes may occur.

Sea temperature varies between 80° and 83°F.

FUEL: There are no bunkers available.

EARLY DEPARTURE PROCEDURE: All loading vessels are requested to use an Early Departure Procedure. (E.D.P.).

(A) If the Master of a vessel consents to use the E.D.P. it will be implemented in the following manner:

1. The Master will sign a letter agreeing to the use of E.D.P.

2. The cargo documents and other relevant forms will be placed aboard the vessel.

3. On completion of loading, the vessel's tanks will be gauged by the vessel's appointed cargo inspector, whose inspection is expected to be completed prior to sailing.

4. The vessel will sail.

5. The Terminal will transmit Bill of Lading figures to the vessel by VHF radio. The cargo documents are to be completed by the Master.

6. Written confirmation of these figures will be provided by the vessel's Agent in the Canal Zone.

(B) If the Master of a vessel does not agree to use E.D.P. the vessel will be unberthed immediately after loading and should proceed to the pilot station. Terminal's Representative will bring papers by launch or tug.

(C) Vessels will be requested to unberth once loading arms have been disconnected regardless of the time set on the sailing board. A terminal launch will be available for returning crew to vessel.

(D) If a vessel fails to vacate its berth upon completion of operations or causes delay to cargo operations because of mechanical breakdown, inadequate loading/discharging rates, lack of adequate crew, non-compliance with these rules, the vessel will be responsible for:

1. Jetty demurrage at the applicable rates.

2. Hold P.T.P. harmless against demurrage detention or loss of any nature incurred as a result of other vessels awaiting berth.

3. Cost of tugs requested to stand-by the vessel by the Terminal Representative if, in his opinion, he considers it necessary.

TIME: GMT minus 5 hours.

INSPECTION: *Petroleum/Tank Inspection (Caleb-Brett):* This will be carried out by Inspectors appointed by the User.

Valdez – Crude Oil Characteristics:

Specific Gravity	0.888 @ 60°F
API Gravity @ 60°F	26.6° API
Pour Point	+15°F
Viscosity	7.3 SSU @ 100°F (22 centistoke) 160 SSU @ 60°F (68 centistoke)
Reid Vapour Pressure	3.8 at 100°F
Sulphur Content	0.99% by weight
Waxing	85 – 117°F (begins to precipitate) 50 – 55°F (bulk of wax begins to come out of solution)
Mercaptan Sulphur	Approximately 20 p.p.m.

SAFETY: No dangerous cargo shall be permitted to be shipped or landed at the jetties. Whilst petroleum loading/discharging operations are being carried out, no other cargo will be handled without permission of the Terminal Representative.

No welding, cutting, etc., is permitted on any vessel in the Terminal.

Blowing or cleaning of boiler tubes in vicinity of the Terminal is prohibited.

Smoking Regulations: Smoking is PROHIBITED in the following locations:

1. Entire Terminal area.

2. Aboard Launches.

3. On Jetties and in motor vehicles inside the Terminal, except inside designated buildings.

4. On ships except in places designated by the Master and agreed by the Terminal's Representative. In accordance with IOTTSG, two locations only will be established in the after end of the vessel.

N.B. If an oil spill occurs on Jetty or ship, all smoking will be PROHIBITED until the spill has been removed.

Emergency Procedure: For cases of fire on vessel, in addition to the normal ship's alarms, Masters are requested to sound a prolonged blast on the main whistle of not less than 10 seconds duration. If the vessel is discharging or deballasting it should:

1. Immediately cease operations.

2. Initiate fire fighting procedures.

3. Be prepared to unberth at short notice.

If loading cargo, the Terminal will, on hearing the signal, immediately stop all operations and:

(I.) Initiate fire fighting procedures from Jetty.

(II.) Put Terminal emergency plan into effect.

(III.) Disconnect loading arms.

(IV.) Order tugs to vessel and make preparations for unberthing.

Vessels at other berths should also cease operations and be prepared to put to sea.

Fire Protection System: Each Jetty is equipped with:

1. Water spray system underneath.

2. Hydrant system on platform.

3. Two 500 g.p.m. remote operated monitors. These are connected to discharge with either water or foam.

The plant water supply is by diesel driven pumps at two locations and the total water flow is 7,000 g.p.m.

SHORE LEAVE: *Launch Service:* The launches at the Terminal are intended for Terminal use only. They may be hired by prior notice, depending on operational requirements. Crew members and visitors use the launches at their own risk.

Berth No. 3: A launch service may be provided depending on Terminal requirements. Masters should inquire about this service upon arrival (also see "General").

Shore Leave: Shore leave is permitted by the local authorities. Crew members should check in at the Customs Gatehouse leaving and returning to the Terminal area. Masters should take reasonable steps to ensure no alcoholic drinks, drugs, etc. are supplied or conveyed to any unauthorised person.

GENERAL: *Charts and Publications:* Charts Ref. USHO 21580, 21581, 21584 and 1018 and BA 1928.

Sailing Directions: USHO PUB 153. B.A.N.P. No. 8 Pacific Coasts of Central America and United States Pilot.

Tides: The maximum tidal range is 12 ft. The mean range is 7.6 ft. The tidal flow in this area is, at present, ill defined.

Strong tides in North-South direction have been experienced close to the docks. At times these are unpredictable.

Currents: Currents in the area are not well defined.

Weather Conditions in Bahia de Charco Azul:

(A) Wind: The seasonal normal wind regime occurring in the Bahia de Charco Azul is:

1. December-March: Wind speeds greater than 14 m.p.h. occur approximately 8% of the time in January. The predominant directions are from W., N.W., N. and N.E. Winds are W., N.W., N. and N.E. approximately 70% of the time in January.

2. December-April: Is considered to be dry season.

3. April-May: Winds exceed 14 m.p.h. 6% of the time in April. The predominant wind directions are S. and S.W., and N. and N.W. Winds are S. and S.W., and N. and N.W. approximately 60% of the time in April.

4. June-August: Wind speeds exceed 14 m.p.h. approximately 13% of the time in July. The predominant directions are S., S.W., and W. (approximately 60% occurrence) in July.

5. June-November: Is considered to be the rainy season.

6. September-November: Winds exceed 14 m.p.h. approximately 22% of the time in October. Predominant wind directions are S., S.W., W. and N.W. Winds are S., S.W., and W. and N.W. approximately 86% of the time in October.

(B) Waves: The seasonal wave height is:

1. December-March: Significant wave height exceeds 3.9 ft. 1% of the time in January N.E., E. and S.E. wave directions predominate, occurring 84.9% of the time in December.

2. April-May: Significant wave height exceeds 3.9 ft. 1.6% of the time in April. N.E., E. and S.E. wave directions predominate, occurring 85.5% of the time in April.

3. June-August: Significant wave height exceeds 3.9 ft. 6.4% of the time in July. N.E., E. and S.E. wave directions predominate, occurring 82.9% of the time in July.

4. September-November: Significant wave height exceeds 3.9 ft. 11.3% of the time in October. N.E., E. and S.E. wave directions predominate, occurring 81.0% of the time in October.

Flag: Every vessel shall fly her national flag and the flag of the Republic of Panama between sunrise and sunset.

Rubbish: The dumping of trash and other garbage is prohibited. Any trash or garbage so dumped will be removed and the expenses involved for the vessel's account.

Berth No. 3: Petroterminal will, under normal circumstances, be able to provide a boat service for vessels berthed at No. 3.

This boat service will be available on demand but subject to the operational requirements of the Terminal (e.g. when other vessels are mooring/unmooring, the launch service will be withdrawn for an unspecified period).

Masters requiring this launch service may indicate their requirement to the Pilot/Berthing Master and the appropriate charges will be added to the pilotage/towage. Bill will be sent to the Agent for payment.

Masters should advise their Officers and crew that construction work is still progressing in the Terminal Area and care must be exercised in passing over these areas. Smoking regulations should be observed.

Petroterminal's launch operators are under strict instructions that they are not to carry any persons whom in their opinion, are under the influence of alcohol or drugs. The carrying of liquor is forbidden.

Whilst every effort will be made to ensure the safety of personnel, Petroterminal will not be held liable for any accident sustained whilst on Petroterminal's craft or property.

Persons use these facilities entirely at their own risk.

FRESH WATER: Fresh water can be supplied, as available, via the jetty connections. Prior notice is requested. Maximum delivery is 200 tons.

SHIP SUPPLY SERVICE: 3 large tugs and launches available to assist with transportation of stores and crew, on an emergency basis only.

Helicopter can easily be hired.

AUTHORITY: Petroterminal de Panama, S.A., Apartado 8-179, Panama 8, Republic of Panama. *Tel:* 64-2655, 64-2246. *Telex:* 3792527. *Contact:* Captain Geoffrey Moss, Marine Manager.

Puerto Armuelles: P.O.Box 26. *Tel:* 70-7246, 70-7261, 69-6377. *Telex:* 3797500, 3797548.

AGENT: Fernie (Puerto Armuelles), S.A., Apartado 22, Puerto Armuelles, Chiriqui, Republic of Panama. VHF: Call on Channel 16. Working 6, 8, 10, 11, 14. Telephone: 70-7301 or 70-7200. Cables: "Fernie". Telex: 368-7508.

With the exception of times vessels are actually in or approaching Puerto Armuelles (i.e. within V.H.F. range) all other communications should be directed to "Fernie Cristobal".

VACAMONTE: 08.51 N. 79.40 W. (See Plan Book)

LOCATION: The fishing port of Vacamonte is located 27 km. S.W. of Panama City, in Arraijan District, Province of Panama.

DOCUMENTS:

Voyage Documents:
General Declaration (1 original and 5 copies)
Cargo Manifest (4 copies)
Crew List (4 copies)
Passenger List (4 copies)
Stores/Supplies List (4 copies)
Crew Effects List (2 copies)
Maritime Health Declaration (Derat) (1 copy)
Mail List (1 copy)

Ship's Documents:
Certificate of Registration
Certificate of Civil Security
Certificate of Radio Safety
Oil Record Book
Safety Construction Certificate
Civil Responsibility Insurance Certificate
Radio Licence Certificate (date of expiry)

Documents Requested from Tuna Vessels:
General Declaration (obligatory)
Crew List (obligatory)
Cargo List (if available)
Clearance from Last Port (obligatory)
List of Stores/Supplies (if available)
Derat Certificate (obligatory)

Documents Required from National Shrimp Vessels:
Clearance from Last Port of Call
Consular and Vessel Clearance Certificate
Monthly Invoice or Last Invoice for Marine Resources
Clearance Documents from the main Treasury Office

PILOTAGE: Pilot is compulsory for any vessel greater than 150 g.r.t. that enters or leaves the Port. Pilot can be contacted on VHF Channel 15.

ANCHORAGE: Located in Lat. 08° 50′ 14″ N., Long. 79° 38′ 45″ W. in the area of the Fairway Buoy near Melones Island.

MAX. SIZE: The Port can receive vessels up to 3,000 tons with maximum length of the vessel of 120 m. and with draft of 7 m. Average tide variation 3.96 m. Also see "General".

HEALTH: When vessels arrive in port, they are received by a Health Official who comes on board to examine documents. The Quarantine Officials inspect stores and store rooms and these are sealed in the event of any anomaly (foodstuffs in poor condition, meats which originate in countries with outbreaks of aphthous fever, etc.).

In the event of illness on board, this must be communicated to the Ship's Agent, who will transmit the information to the Authorities. The vessel must not be moved until the doctor determines whether or not the illness represents a danger for persons on land.

RADIO: S.S.B. with the following frequencies:
2182.00 – Channel 1
2638.00 – Channel 2
2738.00 – Channel 3
4139.50 – Channel 4
4358.80 – Channel 5
7447.50 – Channel 6

For calling use Channel 1.

VHF: Station has 55 channels. Calling use Channel 15 (156.750 MHz). Station in operation throughout 24 hours.

TUGS: 2 tugs of 700 h.p. each.

BERTHING:

Tuna Fleet Facilities: Pier: Head-length 132 m. Width of pier 12.5 m. 2 inside berths each 60 m. The "T" head pier can accommodate 4 tuna vessels at the same time. The area surrounding the pier has a depth of 9 m. at MLWS.

Potable water and fuel obtainable at the pier.

Shrimp Fleet Facilities: 2 piers which are able to receive 8 vessels at any one time, depth 4 m. Fuel and potable water available.

There are 2 additional piers where vessels are able to undertake repair operations.

Fresh Fish Market: 1 marginal pier which is able to accommodate 8 vessels at one time, depth 4 m. Adjacent to the pier is a fish cleaning station and 2 cold rooms.

Freight Elevators: 1 freight elevator of 10 tons capacity. 10 freight elevators of 2 tons capacity.

EQUIPMENT: 4 fixed cranes (shrimp quays) × 1.5 tons. 12 × 2 ton fork lift trucks. Cold storage for 3,000 tons of tuna.

STEVEDORES: The National Port Authority does not offer a stevedoring service in the port. In case of need, the Ship's Agent is able to contract one or more private gangs to carry out the work.

MEDICAL: There is a doctor in the port for first aid treatment. There is also an ambulance to transport urgent cases to the nearest medical centre.

FUEL: For supplies to vessels, the port has a modern fuel pumping system and two tanks of good capacity.

FRESH WATER: The NPA offers a service of water supply to vessels requiring it. The port has a water tank with a capacity of 600,000 gallons which meets all the needs of the port.

FIRE PRECAUTIONS: The port has its own corps of fire fighters and a modern fire engine. The aqueduct system for drinking water has numerous hydrants spread throughout the port area.

REPAIRS: Vacamonte has a modern yard for repairs to vessels, including a synchro-lift with 200 tons capacity, and berths for repairing 20 vessels engaged in the national fishing industry, covering an area of 18,000 sq.m. which includes future space for four additional construction berths. There is also a vessel repair workshop with an area of 700 sq.m., and vessel repair offices and shops with an area of 1,000 sq.m.

AIRPORT: Vacamonte is only 25 minutes from Panama City and 25 minutes from there is the international airport of General Omar Torrijos Herrera.

WATCHMEN: The NPA has a complete security corps working throughout 24 hours and permanently guarding the port entrance.

POLICE/AMBULANCE/FIRE: Police 510360; Fire Brigade 532222 Ext. 117; Ambulance Tel: Port Authority.

SERVICES: In the port is a ship chandler, an electricity system capable of generating 4,687 kVA, Ships' Agents' Offices, Post Office, Defence Force Member, Customs, Ministry of Health, Warehouse (marine hardware, materials, and accessories) and Banks.

SHORE LEAVE: Officials of the Migration Authority grant a provisional card for coming ashore, including leaving the port area.

GENERAL: There are no restrictions with regard to depth of water, since the various areas of the port have been dredged as follows: the port access channel up to 5.5 m., the main maritime area to 5 m., and 4 m., the area of 'T' quay for tuna vessels to 9 m. The area of quay 'T' for tuna vessels is designed to take 8 tuna vessels of 55 m. LOA, 14 m. beam and 7 m. draft. At the fish quay, 8 vessels of 10 m. LOA can berth simultaneously. The 2 pier quays for shrimp vessels take 6 shrimp vessels of 20 m. LOA, 5.8 m. draft each, simultaneously. The 2 pier service quays take 48 shrimp vessels and give service and victualling to them.

DEVELOPMENTS: The NPA has 100 hectares of land adjacent to the port for industrial development. Here the industrial area will have plots of land from 2,000 sq.m. upwards for installations. The plots of land will be obtained by concession and those in Industrial Area No. 1 have already been acquired.

AUTHORITY: National Ports Authority, Apartado 8062, Panama 7, Panama. *Tel:* 69-5444. *Telex:* 2765. *Contact:* Lic. Nander A. Pitty V., Director General; Ing. Carlos Urriola, Director of Operations.

NOTES

Please also advise Shipping Guides Ltd.

Papua New Guinea

GENERAL:

APPLICABLE TO ALL PORTS IN PAPUA NEW GUINEA

(See also details under individual ports) **(See Plan Book)**

DOCUMENTS: International conditions i.e. at the first port of call in Papua New Guinea the following inward Customs documents are required to be handed to Customs Department within 24 hours of ship's arrival.

3 Copies Inward Passenger List.
7 Copies Inwards Customs Manifest.
3 Copies List of Crew.
3 Copies Articles in private possession of officers and crew Form 5.
3 Copies Stores List.
2 Copies Immigration Restriction Ordinance List (Form 6) being complete list of passengers disembarking and in transit.

If other than first port of call:
3 Copies Inward Passenger List.
7 Copies Inwards Customs Manifest.
Outward Customs Clearance from last port of call.

RESTRICTIONS: Night berthing is not recommended, but is subject to weather conditions in Lae, Rabaul and Port Moresby.

HEALTH:

(a) Vessels arriving directly from Australia. Pratique is given by radio to vessels which voyage directly from Australia to a Papua New Guinea port, Master of vessel notifies Quarantine Officer at the port of entry to which he is proceeding of ETA, the number of passengers and crew and whether there is any sickness aboard. This notification from Master is sent not longer than 24 hours and not less than 12 hours of ETA. If there is no sickness aboard a reply is sent stating that Pratique is granted, and when a vessel arrives the actual pratique form is delivered to Master of vessel or to Collector of Customs to hand to Master. Full Pratique is given.

(b) Vessels arriving from a Foreign Port. All vessels which arrive from a foreign port must anchor in the designated position and await arrival of a Quarantine Officer who boards the vessel by himself – no other person (except a Pilot) is to be allowed on board vessel until Pratique has been granted. If a Pilot is on board he must remain on board until Pratique is granted.

Cholera: All passengers and crew are required to be inoculated against cholera if the vessel is expected to arrive at a port in the country within 7 days of leaving an area where cholera is either endemic or is present.

Note: The presence on board of a qualified doctor will normally assist in the granting of Pratique.

RADIO: 2 radio stations are available.

(a) Port Moresby Radio – Call sign P2M operating between the hours of 2100 – 1000 hrs. GMT.

(b) Rabaul Radio – Call sign P2R operating 24 hours per day.

These stations are generally used for all contact with agents or Government Departments, etc.

VHF: VHF services are available at:

a. Port Moresby – Channel 16 and 12
Call Sign "Moresby Harbour Control"
b. Lae – Channel 16 and 12
Call Sign "Lae Harbour Control"
c. Rabaul – Channel 16 and 12
Call Sign "Rabaul Harbour Control"
d. Kieta – Channel 16 and 12
Call Sign "Kieta Harbour Control"
e. Madang – Channel 16 and 12
Call Sign "Madang Harbour Control"
f. Anewa Bay – Channel 6, 12 and 15
Call Sign "Anewa Bay Pilots"
g. Kimbe – Channel 16 and 12
Call Sign "Kimbe Harbour Control"
h. Alotau – Channel 16 and 12
Call Sign "Alotau Harbour Control"
i. Vanimo – Channel 16 and 12
Call Sign "Vanimo Harbour Control"
j. Wewak – Channel 16 and 12
Call Sign "Wewak Harbour Control"
k. Oro Bay – Channel 16 and 12
Call Sign "Oro Bay Harbour Control"
l. Kavieng – Channel 16 and 12
Call Sign "Kavieng Harbour Control"

Normal working hours are 0745 till 1606 hrs. local time, except for Anewa Bay where hours are 0700 till 2300 hrs. local time.

RADAR: No port radar services exist in Papua New Guinea.

TUGS: Berthing. Tugs are available in Port Moresby, Lae and Anewa Bay.

CRANES: There are no wharf mounted cranes in Papua New Guinea, however, mobile cranes are available in most main ports capable of lifting up to 20 tonne containers. Shippers are advised though to check this before shipping and with heavier loads prior advice and approval must be sought from the relevant Port Authority.

BULK CARGO FACILITIES: Except for Anewa Bay (copper concentrate) and the Jant Wharf at Madang (Woodchip), no bulk cargo facilities exist in Papua New Guinea. (Details of the above are given in the appropriate port summaries).

MEDICAL: Medical attention is available in most Papua New Guinea Ports, however as much advance notice as possible should be given by contacting the nearest radio station.

DRY DOCK: No dry dock or major repair facilities exist in Papua New Guinea.

GANGWAY/DECK WATCHMEN: Not usually necessary.

HATCHES: Opening/closing usually carried out by crew.

CONSULS: The following Consulate and Commission services are available.

American Consulate General, P.O.Box 3492, Port Moresby.	Phone 21-1447
Australian Consulate General, P.O.Box 1180, Lae.	Phone 42-3000
Australian High Commission, P.O.Box 9129, Hohola.	Phone 25-9333
Austrian Honorary Consul, P.O.Box 850 Port Moresby.	Phone 21-2588
British High Commission, P.O.Box 739, Port Moresby.	Phone 21-2500
Peoples Republic of China Embassy, P.O.Box 1351, Boroko	Phone 25-9856
French Embassy, P.O.Box 1155, Port Moresby.	Phone 25-3740/25-1323
German Honorary Consulate, P.O.Box 1549, Boroko.	Phone 25-6311
Indonesian Embassy, P.O.Box 7165, Boroko.	Phone 25-3116
Italian Consulate, P.O.Box 276, Lae.	Phone 42-3987
Embassy of Japan, P.O.Box 3040, Port Moresby.	Phone 21-1800
Korean Embassy, P.O.Box 381, Port Moresby.	Phone 25-4755

Swiss Consular Agency, P.O.Box 136, Port Moresby.	Phone 21-1307

CUSTOMS ALLOWANCES: Entry regulations permit 200 cigarettes or 1lb. of tobacco, and 40 oz. of wines or spirits.

Crew members may hold 200 cigarettes and 1 carton of beer (or 1 bottle of spirits) out of bond per week.

CARGO GEAR: Wharf equipment supplied by stevedores, load/discharge by ship's gear.

REPATRIATION: Possible, frequent scheduled air services to Australia, Hong Kong, Manila, New Zealand, Singapore and USA via Fiji.

TIME: Local time in all ports is 10 hours ahead of GMT.

HOLIDAYS: The only days on which cargo cannot officially be worked are Good Friday and Christmas Day.

TELEPHONES: Not available at present for ship to shore connection.

SHORE LEAVE: Crew members are allowed ashore.

IDENTIFICATION CARDS: Generally a seamans book is held at the main entrance to the port. Individual passes are not normally required for crew.

BERTH RESERVATIONS: A berth reservation system applies for all overseas vessels at all Papua New Guinea Harbours Board ports.

At Anewa Bay cargo vessels must vacate berth for concentrate carriers.

Samarai does not handle overseas traffic.

AUTHORITY: Papua New Guinea Harbours Board, P.O.Box 671, Stanley Esplanade, Port Moresby, Papua New Guinea. *Tel:* 21 1400 (8 lines) *Telex:* NE 22243 (A/B Harbours). *Cables:* Harbours, Port Moresby.

AITAPE: 03.08 S. 142.21 E. (See Plan Book)

(See General section on Papua New Guinea ports).

PILOTAGE: Not compulsory. Pilot Boarding Place: Lat. 3° 08.25′ S., Long. 142° 23.9′ E.

TUGS: Not available.

RADIO: Communications not available.

BERTHING: Position of wharf Lat. 03° 08.51′ S., Long. 142° 21.24′ E. Length of berthing head 18.3 m. (60 ft.). Width 6.2 m. (20.3 ft.). Height of deck above L.A.T. 2.5 m. (8.3 ft.). Minimum depth of water at L.A.T. at wharf head 4.3 m. (14 ft.) – subject to seasonal change. Maximum tidal range 1.4 m. (4.6 ft.)

MEDICAL: Hospital facilities 3 miles from port can attend to minor cases.

STEVEDORES: *Working hours:* 0700 – 1200 hrs., 1300 – 1800 hrs.

FRESH WATER: Not available to ships.

FUEL: Not available.

AIRPORT: Distance 1 mile, daily flights to Wewak and Vanimo.

CUSTOMS ALLOWANCES: 200 cigarettes or 250 grams tobacco. 1 litre of spirits or 1 litre of wine or 6 beers (total 4.5 litres) for each 7 days. Aitape is not a port of entry.

GENERAL: *Chart:* AUS 652

AUTHORITY: Papua New Guinea Harbours Board, P.O.Box 3, Aitape. *Tel:* 872044, 872052 (after hours). *Cables:* Portman, Aitape. *Contact:* Robert Parer, General Manager, W. & R. Parer Pty. Ltd., Agent for P.N.G. Harbours Board.

ALOTAU: 10.19 S. 150.27 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)

PORT LIMITS: Seaward Boundary: From a position in Lat. 10° 20′ S., Long. 150° 26′ E. bounded on the West by a straight line due North to the coastline. From the same point bounded on the South by a straight line due East to a position in Lat. 10° 20′ S., Long. 150° 28′ E. thence bounded on the East by a straight line due North to the coastline.

PILOTAGE: Pilotage is not compulsory. There are no pilots stationed at Alotau but a pilot will attend from Port Moresby given 48 hours notice of the ship's estimated time of arrival.

Pilot boarding ground: 10°19.2′ S., 150° 26.75′ E.

ETA to be sent not less than 12 hours prior to arrival via Port Moresby Radio (P2M) and to be confirmed not more than 5 hours and not less than 4 hours prior to arrival again via Port Moresby Radio (P2M).

ANCHORAGE: There are no recommended anchorage areas for large vessels in the vicinity of Alotau.

HEALTH: Quarantine Officer Tel: 61 1049. Health Officer Tel: 61 1164.

RADIO: None.

VHF: "Alotau Harbour Control" on Channels 16, 12 and 8 during working hours and when vessels are expected during non-working hours.

TUGS: Not available.

BERTHING: Overseas Wharf is 93 m. long 18.0 m wide, height of deck above L.A.T. 2.4 m., minimum depth of water at face at L.A.T. 10.0 m.

Vessels may berth either port or starboard side to at the discretion of the Port Authority.

Load/discharge is by ship's own gear (except under special arrangement).

Coastal Wharf: Length 55.8 m. (183 ft.) Width 9.8 m. Minimum depth of water 4.9 m. (16 ft.). Height of deck above L.A.T. 2.1 m.

Barge Ramp available.

STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required.

Licenced Stevedores: Alotau Stevedoring and Transport Pty. Ltd., P.O.Box 28, Alotau. Tel: 61 1318.

TANKERS: Facilities for Coastal Tankers only.

FUEL: Available by road tanker. Supplier: B.P. Also through pipe-line. Arrangements through stevedores.

FRESH WATER: Available in limited quantities and restricted periods of the year. Prior application to be made to the Port Manager.

REPAIRS: No facilities available.

CUSTOMS: Port of Entry. Collector of Customs Tel: 61 1034.

AIRPORT: Gurney Airport approximately 20 km. from Alotau is served regularly but not daily.

POLICE/AMBULANCE/FIRE: Police: 611222. Hospital: (No separate Ambulance) 611200. Fire: 611055.

DELAYS: Delays at Alotau are most unlikely.

GENERAL: *Storage:* Covered Storage Area for Overseas Cargo – 1,874 sq.m. Open Storage Area – 7,640 sq.m.

Chart: AUS 629.

DEVELOPMENTS: A 30 m. small ships wharf is proposed to be built in 1985 at Alotau Port.

AUTHORITY: Papua New Guinea Harbours Board, P.O.Box 42, Alotau, Papua New Guinea. *Tel:* 61 1276. *Telex:* NE 22243. *Cables:* Portman, Alotau. *Contact:* General Manager.

ANEWA BAY: 06.11 S. 155.33 E. (See Plan Book)

PORT LIMITS: Seaward Boundary – a line joining the Southern end of Takanupe Island and Karikiberia Shoal.

DOCUMENTS: Crew List – 4 copies; Ship's Store's List – 2 copies (P.N.G. forms); Crew Declaration Form – 2 copies of P.N.G. Form 5; Vaccination Certificates of all crew members for sighting; International Declaration of Health.

PILOTAGE: Compulsory. Boarding station 06° 07′ S., 155° 35.3′ E., from a tug 'Masthead' or a launch 'Kuruki', normally between the hours of 0600 and 2200, or in certain circumstances, as per arrangement. ETA advices 72, 48 and 24 hours in advance via Rabaul Radio or Port Moresby Radio to Boucop Loloho NE95812; when in close vicinity, VHF Channel 12.

ANCHORAGE: Available at Port Authorities advice, but safe anchorage exists 1 mile N.E. of Dakome Pt. in 30 fathoms of water.

APPROACHES: 3 km. wide channel runs in a Southerly direction between Kuruki Reef and Banaru Reef, to between Takanupei Island and Karikiberia Shoal. The depth of this channel is in excess of 180 m. After crossing the 180 m. line, depths exceed 35 m. until adjacent to the wharf. The only hazard near the approach is Bara Shoal, 1.6 km. Southward of Takanupei Island.

MAX. SIZE: Maximum draft permitted alongside is 12 m. (40 ft). The longest vessel yet to have berthed measured 226 m. (partly loaded tanker). It is envisaged that vessel to load copper concentrate should ensure that, on berthing, hatch covers are not more than 12 m. (40 ft.) above water line, to enable ship loader to be positioned on board.

HEALTH: Vaccination Certificates required. Quarantine Officer boards either with Pilot or at the berth. When anchoring, Free Pratique will be granted then. Code of signals 'Q' flag should be exhibited on arrival off Port. Pratique is automatic for vessels arriving from other P.N.G. ports, New Zealand and Australia.

RADIO: ETAs are best routed through either Rabaul Radio, Port Moresby Radio or Sydney Radio, who in turn will relay to Pilots and Agents.

VHF: The Port Control operates Channel 6, 12 and 16, but normally, messages between Vessels, Pilots, Port Control, Tug and Lines Boat are relayed on Channel 12. Therefore a vessel should use this channel when approaching. VHF services are available between 0700 hrs. and 2300 hrs. daily.

TUGS: 'Masthead' – 28 tons bollard pull – 1600 b.h.p., equipped with hydraulic warping winch and fire fighting equipment. Pilot may join incoming vessels from tug. It is common to use the tug's lines. Charges etc. on application.

BERTHING: Wharf (Position Lat. 06° 11.1′ S., Long. 155° 32.7′ E.) is 77 m. long with mooring dolphins located 59 m. and 107 m. Eastward and 59 m. Westward of main wharf. Maximum draft is 12 m. This berth is used for all vessels and normally starboard side alongside. Loading/discharge of general cargo, containers, etc., by ship's own gear.

CRANES: 140 ton mobile crane can be made available if required.

BULK CARGO FACILITIES: Bulk loading gantry for copper concentrate situated just Eastward of the main berth. Net loading rate approximately 800/1,200 tonnes/hr. Please note that gantry is a fixture and vessels are required to shift to facilitate loading.

SPECIALISED CARGO HANDLING FACILITIES: 2 × 25 ton forklifts available for handling of containers. Berth has proved suitable for certain Roll-on/Roll-off traffic. Westward of berth are provisions for discharge of white oils, black oil, and M.I.B.C. Small L.P.G. carriers anchor in position Lat. 06° 11.4′ S., Long. 155° 32.7′ E., and by way of hoses connected up to shore facilities.

STEVEDORES: The Port Authority (Bougainville Copper Limited) operates its own stevedoring function. Working Hours: from 0700–1500 and 1500 to 2300 hrs, 7 days a week. ETA advices as per "Pilots".

MEDICAL: Hospital facilities and medical clinic exist.

FRESH WATER: Available, but limited at times.

TANKERS: Heavy oils: 2×30 cm. marine connections to a 56 cm. main discharge line, giving a maximum discharge rate of 4,000 tonnes/hr.

Light oils: 1×25 cm. marine connection to a 20 cm. discharge line giving a maximum discharge rate of 700 tonnes/hr.

FUEL: Only small quantities of gas oil by road tanker.

CONSULS: None.

REPAIRS: Not available.

CUSTOMS: As per P.N.G. Regulations.

AIRPORT: Aropa Airport, 32 km. distant. Regular services to other P.N.G. centres, connecting to overseas centres.

TIME: GMT plus 10 hours.

HOLIDAYS: *Local holidays:* As for Papua New Guinea. Port is normally closed Christmas Day and Good Friday.

POLICE/AMBULANCE/FIRE: Initially B.C.L. controlled within Port area, otherwise 95 1222 (Police), 951333 (Fire), 951666 (Ambulance).

DELAYS: Estimated and advised as per weekly shipping schedule.

GENERAL: *Chart:* Aus. 683.

Provisions: Small quantities generally available through local Agents.

SHIPMASTER'S REPORT: 1975 (updated 1984).

Documents:

Crew List. (2 Copies of Papua & New Guinea forms to be filled in on arrival at pilot station).

Ship's Stores List. (2 copies of P.N.G. forms to be filled in on arrival at pilot station).

Crew Declaration Form: – (2 copies of P.N.G. Form 5 – Articles in Private Possession of Officers & Crew to be filled in on arrival at pilot station).

Vaccination Certificates of all crew members for sighting.

International Declaration of Health.

Pilotage: Two Pilots, employees of the Bougainville Copper Company Ltd., are available 24 hours a day. Pilot boards in position Lat. 06° 07′ S., Long. 155° 35′ 18″ E. Pilot vessel is a tug called the "Masthead", which has a dark blue hull and white superstructure or launch "Kuruki". Pilots listen on VHF Channels 12 and 16. ETA's will have been passed to the Pilots by the ship's Agents, as per charter party, but pilot boat should be advised by VHF when vessel is 2 hours and 1 hour respectively from pilot station. Channel 12 is monitored by Pilots daily 0700–2300 hrs. and when vessels are expected. Pilotage is compulsory.

Max. Size: Restriction mainly on draft. Least water on berth is 40 ft. Although the problem has not as yet arisen, max. length is also restricted to about 700 ft.

Pratique: Immigration Officer boards as vessel berths. International Code of Signals "Q" flag should be exhibited on arrival off port. Same officer deals with customs clearance.

Radio: ETA's to Pilots are best routed through Rabaul Radio, call sign P2R, who will pass the message direct to the Pilot Office. Port Moresby Radio may also be used for messages to the ship's Agents.

Tugs: Only one tug, the "Masthead", 28 tonnes bollard pull, is available. Tug's line always used.

Berthing: Only one berth in the port, with a least depth of 40 ft. alongside. The berth is used for the loading of copper concentrates and the discharge of general cargo and containers. Vessels intending to load copper concentrates should ensure that their hatch covers are not more than 42 ft. above the water line on arrival, to enable the loader to be positioned over her holds. In some cases ballast hatches may have to be left filled until after loading has commenced. The berth is approached at an angle of 45° and a mooring boat will take one head rope ashore first. The back spring should be sent ashore by heaving line as soon as possible. All vessels berth starboard side to the quay. The berth itself is 250 ft. long. Dolphins stand 175 ft. Westward and 135 ft. and 310 ft. Eastward of the ends of the wharf. The ore loader is not a movable fixture, and vessels are required to shift up and down the wharf to facilitate loading concentrates at the requisite hatches. When leaving the wharf the vessel is sprung off, using one head rope and the backspring.

Stevedores: Normal cargo hours for vessels loading are 0600 – 2300 hrs. but in cases where required cargo will be worked 24 hours a day. Stevedores are employees of the Bougainville Copper Company. Approx. loading rate for concentrates 750/1,000 t.p.h. Stevedores will render all possible assistance in shifting ship. For vessels discharging, mobile cranes capable of lifting up to 140 tonnes are available. Shore gangway is normally used.

Medical: There are good hospital facilities in both Anewa Bay itself and also in nearby Kieta. Advanced notice of required medical attention not normally necessary.

Tankers: Tankers are also discharged at Anewa Bay's only wharf. As with other vessels, draft is restricted to 40 ft., and length to about 700 ft.

Density: Varies between 1022 and 1025 according to season and amount of rainfall recently experienced.

Fresh Water: Available on the wharf except during periods of drought. Supplied by 3 in. hose at approximately 60 t.p.h. Can only be supplied at main wharf (not at Dolphins) and it is therefore sometimes necessary when loading concentrates to wait until after hatches are being loaded before hose can be put aboard.

Fuel: Only small quantities of MDO (Gas Oil) by road tanker.

Consuls: None.

Repairs: No facilities.

Dry Docks: None close by.
Surveyors: None.
Hatches: Steel hatch covers to be opened and closed by crew.
Customs Allowance: 200 cigarettes and 1 bottle spirits per person.
Repatriation: Regular flights from Kieta Airport (24 km. distant) to Port Moresby, where possible to link up with international flights. Repatriation can therefore easily be arranged from this port. Also possible via Honiara.
Time: GMT plus 10 hours.
Shore Leave: All crew members are allowed ashore. No shore passes required.
Delays: No delays normally experienced, but possible up to 24 hours max.
General: Berth very exposed to S.E'ly winds. Moderate ground swell experienced on berth at times. Considerable rain experienced throughout the year, mainly during the night and early morning.

AUTHORITY: Bougainville Copper Limited, P.O.Box 155, Arawa, N.S.P. *Tel:* 95-1022. *Telex:* NE95812. *Cables:* Boucop, Loloho. *Contact:* Captain J. I. Dalby, Manager – Shipping, Air and Port Services (Ext. 152) after hours 95-1627. Captain B. P. Ross, Superintendent – Marine Operations. Captain M. C. S. Ranson, Superintendent Stevedore Operations. Mr. B. C. Bennett, Superintendent Port Services.

KAVIENG: 02.35 S. 150.48 E. **(See Plan Book)**

(See General Section on Papua New Guinea Ports)
PORT LIMITS: Seaward Boundary.
Large vessels should approach from the Nusa Channel where the port limits are as follows:
From the beacon on Cape Siwusat by a straight line 220° (T) to the extreme North point of Usien Island thence by a straight line due West to position in Lat. 2° 37.87′ S., Long. 150° 44.57′ E., thence by a straight line due North to the Western extremity of Edmago Island. From the Eastern extremity of Edmago Island the line of the port limit crosses the Eickstedt Passage in the direction 253° (T) to the Southern extremity of Nago Island.
PILOTAGE: Pilotage is not compulsory but a Pilot will attend from Rabaul given 48 hours notice of the ship's estimated time of arrival.
Pilot Boarding Ground: Within 300 m. radius of a position with Eastern extremity of Edmago Island bearing due North 900 m.
ETA to be sent not less than 12 hours prior to arrival via Rabaul Radio (P2R) and to be confirmed not more than 5 hours and not less than 4 hours prior to arrival again via Rabaul Radio (P2R).
ANCHORAGE: Anchorage may be obtained in sand with depth 20 m. in a position East Reef Light structure bearing 042° (T) distant 890 m.
HEALTH: Quarantine Officer Tel: 942243. Health Officer Tel: 942179.
VHF: Call Kavieng Port Control on Channel 16, 12 and 6. Listening watch maintained during working hours and when ships are expected during non-working hours.
TUGS: Not available.
BERTHING: Overseas Wharf is 93.8 m. long, height of deck above LAT 2.7 m., minimum depth of water at face at LAT 7.0 m. Tidal range 1.2 m.
Vessels may berth port or starboard side to at the discretion of the Port Authority.
Load/discharge is by ship's own gear.
STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required. Working hours: Day shift 0800 – 1200 hrs., 1300 – 1600 hrs. Evening shift 1600 – 1900 hrs., 2000 – 2400 hrs.
Licensed Stevedores: Burns Philp (PNG) Ltd., P.O.Box 48, Kavieng. Tel: 942087 and New Ireland Shipping Agencies, P.O.Box 123, Kavieng, Tel: 942031.
FUEL: Diesel available through pipe-lines at the wharf. Suppliers: Shell, Mobil and B.P.
FRESH WATER: Available in limited quantities, provided prior application made with the Port Manager.
REPAIRS: No facilities available.
CUSTOMS: Port of Entry. Office, Tel: 942163. Residence, Tel: 942130.
AIRPORT: Kavieng airport is some 5 km. from the wharf and is served by daily Air Nuigini flights.
POLICE/AMBULANCE/FIRE: Police: 942222. Ambulance: 942040. Fire: 942000.
DELAYS: Delays at Kavieng are most unlikely.
GENERAL: *Storage:* Covered Storage Area: 750 sq.m. Open Storage Area: 3,000 sq.m.
Chart: Aus. 667.
DEVELOPMENTS: Feasibility study for development of Kavieng Port is well in hand.
Developments will include: Relocation and enlargement of the Copra Shed, erection of new Port Manager's office, relocation of amenities block and purchase of land from Shell Oil Co.
AUTHORITY: Papua New Guinea Harbours Board, P.O.Box 127, Kavieng, New Ireland Province, Papua New Guinea. *Tel:* 942182. *Cables:* Portman, Kavieng. *Contact:* John S. Kotmoi, Port Manager.

KIETA: 06.13 S. 155.38 E. **(See Plan Book)**

(See General Section on Papua New Guinea Ports).
PORT LIMITS: Seaward Boundary
By a straight line bearing 328° (T) from a point in Lat. 6° 10′ S., Long. 155° 42.3′ E., on the seaward edge of Gero Reef to a point in Lat. 6° 07.1′ S., Long. 155° 40.4′ E., thence due West to a point at the Northern most extremity of Banaru Reef.
PILOTAGE: Compulsory – Daylight hours only. (Pilot, Tel: 956063 (office), 956308 (residence).

Barge Ramp available.

STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required.
Licenced Stevedores: Alotau Stevedoring and Transport Pty. Ltd., P.O.Box 28, Alotau. Tel: 61 1318.
TANKERS: Facilities for Coastal Tankers only.
FUEL: Available by road tanker. Supplier: B.P. Also through pipe-line. Arrangements through stevedores.
FRESH WATER: Available in limited quantities and restricted periods of the year. Prior application to be made to the Port Manager.
REPAIRS: No facilities available.
CUSTOMS: Port of Entry. Collector of Customs Tel: 61 1034.
AIRPORT: Gurney Airport approximately 20 km. from Alotau is served regularly but not daily.
POLICE/AMBULANCE/FIRE: Police: 611222. Hospital: (No separate Ambulance) 611200. Fire: 611055.
DELAYS: Delays at Alotau are most unlikely.
GENERAL: *Storage:* Covered Storage Area for Overseas Cargo – 1,874 sq.m. Open Storage Area – 7,640 sq.m.
Chart: AUS 629.
DEVELOPMENTS: A 30 m. small ships wharf is proposed to be built in 1985 at Alotau Port.
AUTHORITY: Papua New Guinea Harbours Board, P.O.Box 42, Alotau, Papua New Guinea. *Tel:* 61 1276. *Telex:* NE 22243. *Cables:* Portman, Alotau. *Contact:* General Manager.

ANEWA BAY: 06.11 S. 155.33 E. (See Plan Book)

PORT LIMITS: Seaward Boundary – a line joining the Southern end of Takanupe Island and Karikiberia Shoal.
DOCUMENTS: Crew List – 4 copies; Ship's Store's List – 2 copies (P.N.G. forms); Crew Declaration Form – 2 copies of P.N.G. Form 5; Vaccination Certificates of all crew members for sighting; International Declaration of Health.
PILOTAGE: Compulsory. Boarding station 06° 07′ S., 155° 35.3′ E., from a tug 'Masthead' or a launch 'Kuruki', normally between the hours of 0600 and 2200, or in certain circumstances, as per arrangement. ETA advices 72, 48 and 24 hours in advance via Rabaul Radio or Port Moresby Radio to Boucop Loloho NE95812; when in close vicinity, VHF Channel 12.
ANCHORAGE: Available at Port Authorities advice, but safe anchorage exists 1 mile N.E. of Dakome Pt. in 30 fathoms of water.
APPROACHES: 3 km. wide channel runs in a Southerly direction between Kuruki Reef and Banaru Reef, to between Takanupei Island and Karikiberia Shoal. The depth of this channel is in excess of 180 m. After crossing the 180 m. line, depths exceed 35 m. until adjacent to the wharf. The only hazard near the approach is Bara Shoal, 1.6 km. Southward of Takanupei Island.
MAX. SIZE: Maximum draft permitted alongside is 12 m. (40 ft). The longest vessel yet to have berthed measured 226 m. (partly loaded tanker). It is envisaged that vessel to load copper concentrate should ensure that, on berthing, hatch covers are not more than 12 m. (40 ft.) above water line, to enable ship loader to be positioned on board.
HEALTH: Vaccination Certificates required. Quarantine Officer boards either with Pilot or at the berth. When anchoring, Free Pratique will be granted then. Code of signals 'Q' flag should be exhibited on arrival off Port. Pratique is automatic for vessels arriving from other P.N.G. ports, New Zealand and Australia.
RADIO: ETAs are best routed through either Rabaul Radio, Port Moresby Radio or Sydney Radio, who in turn will relay to Pilots and Agents.
VHF: The Port Control operates Channel 6, 12 and 16, but normally, messages between Vessels, Pilots, Port Control, Tug and Lines Boat are relayed on Channel 12. Therefore a vessel should use this channel when approaching. VHF services are available between 0700 hrs. and 2300 hrs. daily.
TUGS: 'Masthead' – 28 tons bollard pull – 1600 b.h.p., equipped with hydraulic warping winch and fire fighting equipment. Pilot may join incoming vessels from tug. It is common to use the tug's lines. Charges etc. on application.
BERTHING: Wharf (Position Lat. 06° 11.1′ S., Long. 155° 32.7′ E.) is 77 m. long with mooring dolphins located 59 m. and 107 m. Eastward and 59 m. Westward of main wharf. Maximum draft is 12 m. This berth is used for all vessels and normally starboard side alongside. Loading/discharge of general cargo, containers, etc., by ship's own gear.
CRANES: 140 ton mobile crane can be made available if required.
BULK CARGO FACILITIES: Bulk loading gantry for copper concentrate situated just Eastward of the main berth. Net loading rate approximately 800/1,200 tonnes/hr. Please note that gantry is a fixture and vessels are required to shift to facilitate loading.
SPECIALISED CARGO HANDLING FACILITIES: 2 × 25 ton forklifts available for handling of containers. Berth has proved suitable for certain Roll-on/Roll-off traffic. Westward of berth are provisions for discharge of white oils, black oil, and M.I.B.C. Small L.P.G. carriers anchor in position Lat. 06° 11.4′ S., Long. 155° 32.7′ E., and by way of hoses connected up to shore facilities.
STEVEDORES: The Port Authority (Bougainville Copper Limited) operates its own stevedoring function. Working Hours: from 0700–1500 and 1500 to 2300 hrs, 7 days a week. ETA advices as per "Pilots".
MEDICAL: Hospital facilities and medical clinic exist.
FRESH WATER: Available, but limited at times.
TANKERS: Heavy oils: 2×30 cm. marine connections to a 56 cm. main discharge line, giving a maximum discharge rate of 4,000 tonnes/hr.

Light oils: 1×25 cm. marine connection to a 20 cm. discharge line giving a maximum discharge rate of 700 tonnes/hr.

FUEL: Only small quantities of gas oil by road tanker.
CONSULS: None.
REPAIRS: Not available.
CUSTOMS: As per P.N.G. Regulations.
AIRPORT: Aropa Airport, 32 km. distant. Regular services to other P.N.G. centres, connecting to overseas centres.
TIME: GMT plus 10 hours.
HOLIDAYS: *Local holidays:* As for Papua New Guinea. Port is normally closed Christmas Day and Good Friday.
POLICE/AMBULANCE/FIRE: Initially B.C.L. controlled within Port area, otherwise 95 1222 (Police), 951333 (Fire), 951666 (Ambulance).
DELAYS: Estimated and advised as per weekly shipping schedule.
GENERAL: *Chart:* Aus. 683.
Provisions: Small quantities generally available through local Agents.

SHIPMASTER'S REPORT: 1975 (updated 1984).
Documents:

Crew List. (2 Copies of Papua & New Guinea forms to be filled in on arrival at pilot station).

Ship's Stores List. (2 copies of P.N.G. forms to be filled in on arrival at pilot station).

Crew Declaration Form: – (2 copies of P.N.G. Form 5 – Articles in Private Possession of Officers & Crew to be filled in on arrival at pilot station).

Vaccination Certificates of all crew members for sighting.

International Declaration of Health.

Pilotage: Two Pilots, employees of the Bougainville Copper Company Ltd., are available 24 hours a day. Pilot boards in position Lat. 06° 07′ S., Long. 155° 35′ 18″ E. Pilot vessel is a tug called the "Masthead", which has a dark blue hull and white superstructure or launch "Kuruki". Pilots listen on VHF Channels 12 and 16. ETA's will have been passed to the Pilots by the ship's Agents, as per charter party, but pilot boat should be advised by VHF when vessel is 2 hours and 1 hour respectively from pilot station. Channel 12 is monitored by Pilots daily 0700–2300 hrs. and when vessels are expected. Pilotage is compulsory.
Max. Size: Restriction mainly on draft. Least water on berth is 40 ft. Although the problem has not as yet arisen, max. length is also restricted to about 700 ft.
Pratique: Immigration Officer boards as vessel berths. International Code of Signals "Q" flag should be exhibited on arrival off port. Same officer deals with customs clearance.
Radio: ETA's to Pilots are best routed through Rabaul Radio, call sign P2R, who will pass the message direct to the Pilot Office. Port Moresby Radio may also be used for messages to the ship's Agents.
Tugs: Only one tug, the "Masthead", 28 tonnes bollard pull, is available, Tug's line always used.
Berthing: Only one berth in the port, with a least depth of 40 ft. alongside. The berth is used for the loading of copper concentrates and the discharge of general cargo and containers. Vessels intending to load copper concentrates should ensure that their hatch covers are not more than 42 ft. above the water line on arrival, to enable the loader to be positioned over her holds. In some cases ballast hatches may have to be left filled until after loading has commenced. The berth is approached at an angle of 45° and a mooring boat will take one head rope ashore first. The back spring should be sent ashore by heaving line as soon as possible. All vessels berth starboard side to the quay. The berth itself is 250 ft. long. Dolphins stand 175 ft. Westward and 135 ft. and 310 ft. Eastward of the ends of the wharf. The ore loader is not a movable fixture, and vessels are required to shift up and down the wharf to facilitate loading concentrates at the requisite hatches. When leaving the wharf the vessel is sprung off, using one head rope and the backspring.
Stevedores: Normal cargo hours for vessels loading are 0600 – 2300 hrs. but in cases where required cargo will be worked 24 hours a day. Stevedores are employees of the Bougainville Copper Company. Approx. loading rate for concentrates 750/1,000 t.p.h. Stevedores will render all possible assistance in shifting ship. For vessels discharging, mobile cranes capable of lifting up to 140 tonnes are available. Shore gangway is normally used.
Medical: There are good hospital facilities in both Anewa Bay itself and also in nearby Kieta. Advanced notice of required medical attention not normally necessary.
Tankers: Tankers are also discharged at Anewa Bay's only wharf. As with other vessels, draft is restricted to 40 ft., and length to about 700 ft.
Density: Varies between 1022 and 1025 according to season and amount of rainfall recently experienced.
Fresh Water: Available on the wharf except during periods of drought. Supplied by 3 in. hose at approximately 60 t.p.h. Can only be supplied at main wharf (not at Dolphins) and it is therefore sometimes necessary when loading concentrates to wait until after hatches are being loaded before hose can be put aboard.
Fuel: Only small quantities of MDO (Gas Oil) by road tanker.
Consuls: None.
Repairs: No facilities.

Dry Docks: None close by.
Surveyors: None.
Hatches: Steel hatch covers to be opened and closed by crew.
Customs Allowance: 200 cigarettes and 1 bottle spirits per person.
Repatriation: Regular flights from Kieta Airport (24 km. distant) to Port Moresby, where possible to link up with international flights. Repatriation can therefore easily be arranged from this port. Also possible via Honiara.
Time: GMT plus 10 hours.
Shore Leave: All crew members are allowed ashore. No shore passes required.
Delays: No delays normally experienced, but possible up to 24 hours max.
General: Berth very exposed to S.E'ly winds. Moderate ground swell experienced on berth at times. Considerable rain experienced throughout the year, mainly during the night and early morning.

AUTHORITY: Bougainville Copper Limited, P.O.Box 155, Arawa, N.S.P. *Tel:* 95-1022. *Telex:* NE95812. *Cables:* Boucop, Loloho. *Contact:* Captain J. I. KAVIENG: 02.35 S. 150.48 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)
PORT LIMITS: Seaward Boundary.
Large vessels should approach from the Nusa Channel where the port limits are as follows:
From the beacon on Cape Siwusat by a straight line 220° (T) to the extreme North point of Usien Island thence by a straight line due West to position in Lat. 2° 37.87′ S., Long. 150° 44.57′ E., thence by a straight line due North to the Western extremity of Edmago Island. From the Eastern extremity of Edmago Island the line of the port limit crosses the Eickstedt Passage in the direction 253° (T) to the Southern extremity of Nago Island.
PILOTAGE: Pilotage is not compulsory but a Pilot will attend from Rabaul given 48 hours notice of the ship's estimated time of arrival.
Pilot Boarding Ground: Within 300 m. radius of a position with Eastern extremity of Edmago Island bearing due North 900 m.
ETA to be sent not less than 12 hours prior to arrival via Rabaul Radio (P2R) and to be confirmed not more than 5 hours and not less than 4 hours prior to arrival again via Rabaul Radio (P2R).
ANCHORAGE: Anchorage may be obtained in sand with depth 20 m. in a position East Reef Light structure bearing 042° (T) distant 890 m.
HEALTH: Quarantine Officer Tel: 942243. Health Officer Tel: 942179.
VHF: Call Kavieng Port Control on Channel 16, 12 and 6. Listening watch maintained during working hours and when ships are expected during non-working hours.
TUGS: Not available.
BERTHING: Overseas Wharf is 93.8 m. long, height of deck above LAT 2.7 m., minimum depth of water at face at LAT 7.0 m. Tidal range 1.2 m.
Vessels may berth port or starboard side to at the discretion of the Port Authority.
Load/discharge is by ship's own gear.
STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required. Working hours: Day shift 0800 – 1200 hrs., 1300 – 1600 hrs. Evening shift 1600 – 1900 hrs., 2000 – 2400 hrs.
Licensed Stevedores: Burns Philp (PNG) Ltd., P.O.Box 48, Kavieng. Tel: 942087 and New Ireland Shipping Agencies, P.O.Box 123, Kavieng, Tel: 942031.
FUEL: Diesel available through pipe-lines at the wharf. Suppliers: Shell, Mobil and B.P.
FRESH WATER: Available in limited quantities, provided prior application made with the Port Manager.
REPAIRS: No facilities available.
CUSTOMS: Port of Entry. Office, Tel: 942163. Residence, Tel: 942130.
AIRPORT: Kavieng airport is some 5 km. from the wharf and is served by daily Air Nuigini flights.
POLICE/AMBULANCE/FIRE: Police: 942222. Ambulance: 942040. Fire: 942000.
DELAYS: Delays at Kavieng are most unlikely.
GENERAL: *Storage:* Covered Storage Area: 750 sq.m. Open Storage Area: 3,000 sq.m.
Chart: Aus. 667.
DEVELOPMENTS: Feasibility study for development of Kavieng Port is well in hand.
Developments will include: Relocation and enlargement of the Copra Shed, erection of new Port Manager's office, relocation of amenities block and purchase of land from Shell Oil Co.
AUTHORITY: Papua New Guinea Harbours Board, P.O.Box 127, Kavieng, New Ireland Province, Papua New Guinea. *Tel:* 942182. *Cables:* Portman, Kavieng. *Contact:* John S. Kotmoi, Port Manager.

KIETA: 06.13 S. 155.38 E. (See Plan Book)

(See General Section on Papua New Guinea Ports).
PORT LIMITS: Seaward Boundary
By a straight line bearing 328° (T) from a point in Lat. 6° 10′ S., Long. 155° 42.3′ E., on the seaward edge of Gero Reef to a point in Lat. 6° 07.1′ S., Long. 155° 40.4′ E., thence due West to a point at the Northern most extremity of Banaru Reef.
PILOTAGE: Compulsory – Daylight hours only. (Pilot, Tel: 956063 (office), 956308 (residence).
Pilot boarding ground: Within 400 m. radius of Lat. 6° 07.6′ S., Long. 155° 40.3′ E.
ETA pilot boarding ground not less than 12 hours prior to arrival via Port Moresby Radio (P2M) or Rabaul Radio (P2R). Confirm or amend ETA not more than 5 hours but not less than 4 hours prior to arrival again via Port Moresby or Rabaul.
ANCHORAGE: There are 2 recommended anchorages for large vessels in Kieta Harbour.
HEALTH: Quarantine Officer, Tel: 956073. Health Officer, Tel: 921266.
VHF: Call: Kieta Port Control on VHF Channels 16, 12, 8 and 6. Listening watch maintained during working hours and when ships are expected during non-working hours.
TUGS: 1,200 b.h.p. and 450 b.h.p. tugs available for hire from Bougainville Copper Pty. Ltd., at Anewa Bay.
BERTHING: Overseas Wharf 122 m. long, height of deck above LAT 3.0 m., minimum depth of water at face at LAT 8.5 m. Tidal range 1.7 m.
Vessels may berth either port or starboard side to at the discretion of the Port Authority.
Berth No. 2 (coastal): Length 58 m., depth at LAT 4.8 m.
Berth No. 3 (coastal): Length 58 m., depth at LAT 4.8 m.
STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required. Working hours: Day shift 0800 – 1200 hrs., 1300 – 1600 hrs. Evening shift 1600 – 1900 hrs., 2000 – 2400 hrs.
Licensed Stevedores: Rabaul Stevedores Ltd., P.O.Box 37, Kieta. Tel: 956350.
TANKERS: Discharge carried out at Anewa Bay.
FRESH WATER: Not available to overseas vessels. Coastal vessels may be supplied depending on availability and following prior arrangement with Port Manager.
FUEL: Diesel available from road tankers. Suppliers: Shell and Mobil.
CUSTOMS: Port of Entry. Collector of Customs, Tel: 956067.
AIRPORT: Aropa airport is some 19 km. from the port and is served daily by Air Nuigini.
POLICE/AMBULANCE/FIRE: Police Tel: 956222. Ambulance Tel: 951266. Fire Tel: 951333.

Channel 12 is monitored by Pilots daily 0700–2300 hrs. and when vessels are expected. Pilotage is compulsory.
Max. Size: Restriction mainly on draft. Least water on berth is 40 ft. Although the problem has not as yet arisen, max. length is also restricted to about 700 ft.
Pratique: Immigration Officer boards as vessel berths. International Code of Signals "Q" flag should be exhibited on arrival off port. Same officer deals with customs clearance.
Radio: ETA's to Pilots are best routed through Rabaul Radio, call sign P2R, who will pass the message direct to the Pilot Office. Port Moresby Radio may also be used for messages to the ship's Agents.
Tugs: Only one tug, the "Masthead", 28 tonnes bollard pull, is available, Tug's line always used.
Berthing: Only one berth in the port, with a least depth of 40 ft. alongside. The berth is used for the loading of copper concentrates and the discharge of general cargo and containers. Vessels intending to load copper concentrates should ensure that their hatch covers are not more than 42 ft. above the water line on arrival, to enable the loader to be positioned over her holds. In some cases ballast hatches may have to be left filled until after loading has commenced. The berth is approached at an angle of 45° and a mooring boat will take one head rope ashore first. The back spring should be sent ashore by heaving line as soon as possible. All vessels berth starboard side to the quay. The berth itself is 250 ft. long. Dolphins stand 175 ft. Westward and 135 ft. and 310 ft. Eastward of the ends of the wharf. The ore loader is not a movable fixture, and vessels are required to shift up and down the wharf to facilitate loading concentrates at the requisite hatches. When leaving the wharf the vessel is sprung off, using one head rope and the backspring.
Stevedores: Normal cargo hours for vessels loading are 0600 – 2300 hrs. but in cases where required cargo will be worked 24 hours a day. Stevedores are employees of the Bougainville Copper Company. Approx. loading rate for concentrates 750/1,000 t.p.h. Stevedores will render all possible assistance in shifting ship. For vessels discharging, mobile cranes capable of lifting up to 140 tonnes are available. Shore gangway is normally used.
Medical: There are good hospital facilities in both Anewa Bay itself and also in nearby Kieta. Advanced notice of required medical attention not normally necessary.
Tankers: Tankers are also discharged at Anewa Bay's only wharf. As with other vessels, draft is restricted to 40 ft., and length to about 700 ft.
Density: Varies between 1022 and 1025 according to season and amount of rainfall recently experienced.
Fresh Water: Available on the wharf except during periods of drought. Supplied by 3 in. hose at approximately 60 t.p.h. Can only be supplied at main wharf (not at Dolphins) and it is therefore sometimes necessary when loading concentrates to wait until after hatches are being loaded before hose can be put aboard.
Fuel: Only small quantities of MDO (Gas Oil) by road tanker.
Consuls: None.
Repairs: No facilities.

Dry Docks: None close by.
Surveyors: None.
Hatches: Steel hatch covers to be opened and closed by crew.
Customs Allowance: 200 cigarettes and 1 bottle spirits per person.
Repatriation: Regular flights from Kieta Airport (24 km. distant) to Port Moresby, where possible to link up with international flights. Repatriation can therefore easily be arranged from this port. Also possible via Honiara.
Time: GMT plus 10 hours.
Shore Leave: All crew members are allowed ashore. No shore passes required.
Delays: No delays normally experienced, but possible up to 24 hours max.
General: Berth very exposed to S.E'ly winds. Moderate ground swell experienced on berth at times. Considerable rain experienced throughout the year, mainly during the night and early morning.

KAVIENG: 02.35 S. 150.48 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)
PORT LIMITS: Seaward Boundary.
Large vessels should approach from the Nusa Channel where the port limits are as follows:
From the beacon on Cape Siwusat by a straight line 220° (T) to the extreme North point of Usien Island thence by a straight line due West to position in Lat. 2° 37.87′ S., Long. 150° 44.57′ E., thence by a straight line due North to the Western extremity of Edmago Island. From the Eastern extremity of Edmago Island the line of the port limit crosses the Eickstedt Passage in the direction 253° (T) to the Southern extremity of Nago Island.
PILOTAGE: Pilotage is not compulsory but a Pilot will attend from Rabaul given 48 hours notice of the ship's estimated time of arrival.
Pilot Boarding Ground: Within 300 m. radius of a position with Eastern extremity of Edmago Island bearing due North 900 m.
ETA to be sent not less than 12 hours prior to arrival via Rabaul Radio (P2R) and to be confirmed not more than 5 hours and not less than 4 hours prior to arrival again via Rabaul Radio (P2R).
ANCHORAGE: Anchorage may be obtained in sand with depth 20 m. in a position East Reef Light structure bearing 042° (T) distant 890 m.
HEALTH: Quarantine Officer Tel: 942243. Health Officer Tel: 942179.
VHF: Call Kavieng Port Control on Channel 16, 12 and 6. Listening watch maintained during working hours and when ships are expected during non-working hours.
TUGS: Not available.
BERTHING: Overseas Wharf is 93.8 m. long, height of deck above LAT 2.7 m., minimum depth of water at face at LAT 7.0 m. Tidal range 1.2 m.
Vessels may berth port or starboard side to at the discretion of the Port Authority.
Load/discharge is by ship's own gear.
STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required. Working hours: Day shift 0800 – 1200 hrs., 1300 – 1600 hrs. Evening shift 1600 – 1900 hrs., 2000 – 2400 hrs.
Licensed Stevedores: Burns Philp (PNG) Ltd., P.O.Box 48, Kavieng. Tel: 942087 and New Ireland Shipping Agencies, P.O.Box 123, Kavieng, Tel: 942031.
FUEL: Diesel available through pipe-lines at the wharf. Suppliers: Shell, Mobil and B.P.
FRESH WATER: Available in limited quantities, provided prior application made with the Port Manager.
REPAIRS: No facilities available.
CUSTOMS: Port of Entry. Office, Tel: 942163. Residence, Tel: 942130.
AIRPORT: Kavieng airport is some 5 km. from the wharf and is served by daily Air Nuigini flights.
POLICE/AMBULANCE/FIRE: Police: 942222. Ambulance: 942040. Fire: 942000.
DELAYS: Delays at Kavieng are most unlikely.
GENERAL: *Storage:* Covered Storage Area: 750 sq.m. Open Storage Area: 3,000 sq.m.
Chart: Aus. 667.
DEVELOPMENTS: Feasibility study for development of Kavieng Port is well in hand.
Developments will include: Relocation and enlargement of the Copra Shed, erection of new Port Manager's office, relocation of amenities block and purchase of land from Shell Oil Co.
AUTHORITY: Papua New Guinea Harbours Board, P.O.Box 127, Kavieng, New Ireland Province, Papua New Guinea. *Tel:* 942182. *Cables:* Portman, Kavieng. *Contact:* John S. Kotmoi, Port Manager.

KIETA: 06.13 S. 155.38 E. (See Plan Book)

(See General Section on Papua New Guinea Ports).
PORT LIMITS: Seaward Boundary
By a straight line bearing 328° (T) from a point in Lat. 6° 10′ S., Long. 155° 42.3′ E., on the seaward edge of Gero Reef to a point in Lat. 6° 07.1′ S., Long. 155° 40.4′ E., thence due West to a point at the Northern most extremity of Banaru Reef.
PILOTAGE: Compulsory – Daylight hours only. (Pilot, Tel: 956063 (office), 956308 (residence).
Pilot boarding ground: Within 400 m. radius of Lat. 6° 07.6′ S., Long. 155° 40.3′ E.
ETA pilot boarding ground not less than 12 hours prior to arrival via Port Moresby Radio (P2M) or Rabaul Radio (P2R). Confirm or amend ETA not more than 5 hours but not less than 4 hours prior to arrival again via Port Moresby or Rabaul.
ANCHORAGE: There are 2 recommended anchorages for large vessels in Kieta Harbour.
HEALTH: Quarantine Officer, Tel: 956073. Health Officer, Tel: 921266.
VHF: Call: Kieta Port Control on VHF Channels 16, 12, 8 and 6. Listening watch maintained during working hours and when ships are expected during non-working hours.
TUGS: 1,200 b.h.p. and 450 b.h.p. tugs available for hire from Bougainville Copper Pty. Ltd., at Anewa Bay.
BERTHING: Overseas Wharf 122 m. long, height of deck above LAT 3.0 m., minimum depth of water at face at LAT 8.5 m. Tidal range 1.7 m.
Vessels may berth either port or starboard side to at the discretion of the Port Authority.
Berth No. 2 (coastal): Length 58 m., depth at LAT 4.8 m.
Berth No. 3 (coastal): Length 58 m., depth at LAT 4.8 m.
STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required. Working hours: Day shift 0800 – 1200 hrs., 1300 – 1600 hrs. Evening shift 1600 – 1900 hrs., 2000 – 2400 hrs.
Licensed Stevedores: Rabaul Stevedores Ltd., P.O.Box 37, Kieta. Tel: 956350.
TANKERS: Discharge carried out at Anewa Bay.
FRESH WATER: Not available to overseas vessels. Coastal vessels may be supplied depending on availability and following prior arrangement with Port Manager.
FUEL: Diesel available from road tankers. Suppliers: Shell and Mobil.
CUSTOMS: Port of Entry. Collector of Customs, Tel: 956067.
AIRPORT: Aropa airport is some 19 km. from the port and is served daily by Air Nuigini.
POLICE/AMBULANCE/FIRE: Police Tel: 956222. Ambulance Tel: 951266. Fire Tel: 951333.

DELAYS: Delays rarely occur at Kieta but if so are of fairly short duration, rarely exceeding 48 hours.
GENERAL: *Storage:* Covered Storage: 2,780 sq.m. Open Storage: 14,720 sq.m.
Chart: Aus. 683.
DEVELOPMENTS: *Main Wharf:* The open storage area is to be increased and sealed for containers.
AUTHORITY: Papua New Guinea Harbours Board, P.O.Box 149, Kieta, North Solomans Province. *Tel:* 956066 or 956063. *Cables:* Portman, Kieta. *Contact:* A. Pakundu, Port Manager.

KIMBE: 05.33 S. 150.09 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)
PORT LIMITS: Seaward Boundary.
A line from Gigo Point due North for 1,695 m., thence in a straight line due East for 6,821 m., thence in a straight line due South for 2,438 m. to the Eastern extremity of Telagavu Point.
PILOTAGE: Pilotage is not compulsory but a Pilot will attend from Rabaul given 48 hours notice of the ship's estimated time of arrival.

Pilot boarding ground: Lat. 5° 30.5′ S., Long. 150° 13.5′ E.

ETA to be sent not less than 12 hours prior to arrival via Rabaul Radio (P2R) and to be confirmed not more than 5 hours and not less than 4 hours prior to arrival again via Rabaul Radio (P2R).
ANCHORAGE: There are no recommended anchorage areas for large vessels in the vicinity of Kimbe.
HEALTH: Health Officer, Tel: 935023. Quarantine Officer, Tel: 935002.
VHF: Call Kimbe Port Control on VHF Channels 16, 12 and 6. Listening watch maintained during working hours and when ships are expected during non-working hours.
TUGS: Not available.
BERTHING: Overseas Wharf is 60.9 m. long, height of deck above LAT 3.1 m., min. depth of water at outer face at LAT 10.7 m. Tidal range 1.2 m.

Vessels may berth either port or starboard side to at the discretion of the Port Authority.

Load/Discharge is by ship's own gear (except under special arrangement).
STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required. Working Hours: 0800 – 1200 hrs., 1300 – 1600 hrs., 2000 – 2400 hrs.
Licensed Stevedores: I. S. O'Hanlon, P.O.Box 27, Kimbe. Tel: 935107.
FRESH WATER: Available on request from Port Manager.
FUEL: Diesel is available by road tanker. Suppliers: Shell and B.P.
CUSTOMS: Port of Entry. Collector of Customs, Tel: 935056.
AIRPORT: Hoskins Airport is approx. 50 km. distant and is served by Air Nuigini several times a week.
POLICE/AMBULANCE/FIRE: Police: 935022. Ambulance: 935024. Fire: 935411.
GENERAL: *Storage:* Covered Storage: 745 sq.m. Open Storage: 6040 sq.m. *Chart:* Aus. 674.
DEVELOPMENTS: A small ships jetty adjacent to the barge ramp is to be built.
AUTHORITY: Port Manager, P.O.Box 65, Kimbe, Papua New Guinea. *Tel:* 935134. *Cables:* Portman, Kimbe.

LAE: 06.44 S. 146.59 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)
PORT LIMITS: A straight line bearing 167° (T) from Voco Point to a point at the Northern most extremity of Parsu Point on the Salamaua Peninsula.
PILOTAGE: Pilotage is compulsory – 24 hours a day. Tel: 42 2477 (Office), 42 1795 (Residence).

Pilot Boarding Ground: Lat. 6° 44.5′ S., Long. 147° 00′ E.

ETA at Pilot boarding ground not less than 12 hours prior to arrival via Port Moresby Radio (P2M) or Rabaul Radio (P2R). Confirm or amend ETA not more than 5 hours and not less than 4 hours prior to arrival (VHF Channel 16 – call "Lae Port Control" then to Channel 12 or 6 for working Channels.)
ANCHORAGE: There are no recommended safe anchorage areas for large vessels in the Port of Lae.
HEALTH: Quarantine Tel: 42 4199. Health Tel: 42 2033.
VHF: Call Lae Port Control on VHF Channels 16, 12, 8, 6. Listening watch maintained during normal working hours and when ships are expected outside normal working hours.
TUGS: Two tugs between 450 b.h.p. and 700 b.h.p. available for hire from private operator.
BERTHING: Overseas Wharf is 430 m. long, height of deck above LAT 2.7 m., min. depth of water at face at LAT 11.0 m. Tidal range 1.2 m.

Vessels may berth either port or starboard side to at the discretion of the Port Authority.

Load/discharge is by ship's own gear (except under special arrangement).
STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required. Working hours: Day shift: 0800 – 1200 hrs., 1300 – 1700 hrs., 1800 – 2200 hrs. Evening shift: 2200 – 0200 hrs., 0300 – 0800 hrs. (limited gangs).
Licensed Stevedores: Bunting Stevedores Pty. Ltd., P.O.Box 170, Lae. Tel: 42 3114. Robert Laurie (N.G.) Pty. Ltd., P.O.Box 1032, Lae. Tel: 42 3811 Rabaul Stevedores Ltd., P.O.Box 434, Lae. Tel: 42 4796. United Stevedores Ltd., P.O.Box 2191, Lae. Tel: 42 1099.
MEDICAL: Maximum possible notice should be given so that full arrangements can be made with regard to hospitalisation, etc. Full hospital facilities are available approximately 2.5 miles from the wharf.
TANKERS: Discharge and bunkering facilities are available for all ship requirements.
FRESH WATER: Sometimes restricted but generally available at the rate of 30 t.p.h.
FUEL: Diesel and fuel oil available at the wharf. Suppliers: Mobil, Shell and B.P.
CUSTOMS: Port of Entry. Collector of Customs, Tel: 424899.
REPAIRS: No repair facilities available.
SURVEYORS: Lloyd's Agent.
AIRPORT: Lae Airport at Nadzab is approximately 40 km. distant. Serviced daily by Air Niugini flights.
POLICE/AMBULANCE/FIRE: Police: 422222. Ambulance: 421211. Fire: 424333.

Fire alarms are connected to the Gatehouse which has a direct telephone link to the Police station for emergency purposes.
DELAYS: Lae is the largest and busiest of the country's ports (except for Anewa Bay) and at times delays for up to 48 hours can be expected.
GENERAL: *Storage:* Covered Storage: 14,285 sq.m. Open Storage: 39,000 sq.m.
Chart: AUS 574. BA 2054.
DEVELOPMENTS: A new sheltered tidal basin will be built over the next few years to the West of the existing port. The new berth (Container Terminal) Length 180 m. Depth 11.0 m. at LAT. Completion expected in 1984.

SHIPMASTER'S REPORT: 1978
Approaches: No difficulties were encountered either approaching or leaving. There is deep water close to the shore. Muddy water from the outflow of the Markham River is encountered off the port, but is of no navigational significance.
Wharf: Modern, well-fendered and convenient. Currents and tides alongside are irregular and unpredictable, being almost entirely influenced by the discharge from the Markham River. A tanker berth, consisting of concrete dolphins, is under construction close Eastwards of the main wharf and a pile-driving barge is operating. When berthing, some vessels use the off-shore anchor but under normal conditions this appears to be unnecessary and can in fact be something of an embarrassment when leaving. We did not use either anchor or tugs, weather conditions being good. Powered line boats are available and were used. There is a depth of water alongside of about 11 m.
Anchorage: The usual anchorage is as described in Pacific Islands Pilot Vol. 1, 9th Edition and Supplement No. 5 of 1976. We lay quietly to the port anchor in 30 m. of water, with 4.5 shackles in the water, in position with the Northern of the 2 beacons shown on Chart Aus. 385 bearing 268°(T) distant 2.1 miles approximately.

It is not customary to take a Pilot for the anchorage.
Pilotage: Compulsory when berthing and unberthing.
Tugs: There are 3 in the port, privately owned. As most of their income is derived from sources other than berthing and unberthing ships, their availability is uncertain. No doubt a vessel requiring a tug or tugs would be able to make advance arrangements.
Communications: Vessel came from Gladstone, Queensland, and our advices were sent through P2M, Port Moresby Radio, no difficulties being encountered.

Pilots and Harbour Control are available on Channel 16, VHF, when shipping movements are expected.
Documents Required:

5 Passenger Lists.
5 Crew Lists.
7 Inward Customs Manifests.
3 Lists of Crew Effects.
3 Stores Lists.
2 Arms and Ammunition Lists.

We were able to obtain local forms prior to arrival, and experienced no problems. Also see 'Pratique'.
Officials: The Bond and Beer Rooms are sealed on arrival. The Customs stuck rigidly to the rules and confiscated any undeclared goods, particularly alcohol, cigarettes and what they judged to be pornographic literature. No fines were levied nor charges brought.

The Port Authority allocates berths and decides priorities for vessels.

During our stay, and for a considerable period prior to then, the port had been very busy.

Depending upon the nature of her cargo and the rate of discharge, it is possible for a vessel to reserve a berth in advance.

Because such a vessel arrived when we were alongside and neither our cargo nor our rate of discharge brought us into the berth reservation category, we were obliged to go out to anchor until a berth again became available.
Cargo Working: Our cargo for Lae consisted of 1,524 tonnes of bulk wheat in No. 1 hatch and 9 containers, the heaviest of which was 19.76 tonnes, on No. 2 hatch. The containers were discharged in 3 hours 20 minutes by ship's gear, no problems being encountered.

Our grain cargo was discharged in 36 hours, including time taken rigging and unrigging the sucker and adjusting the length of the suction pipe. Thus, an average rate of 42.3 m/t.p.h. was achieved.

Grain is discharged by means of a portable sucker, weighing approximately 3.5 tonnes, placed on the hatch lids, where it stays throughout discharge. From the sucker, the grain is transferred to a hopper ashore and from there to lorries that transport it to the Mill, about 1 km. away. No significant delays on account of a lack of transport were encountered.
Working Hours: The standard working day is from 0800 hrs. to 2400 hrs. On 2 occasions, once successfully, attempts were made by receivers to start work at 0700 hrs.

The vessel being on Voyage Charter, receivers made strenuous efforts to arrange for discharge after midnight, but without success. They are also investigating making grain discharge an all-weather operation. This could easily be achieved by rigging a tent over the sucker and open portion of the hatch, but whether Union and/or Government Rules would permit this is another matter.

Pratique: If coming from Australia or New Zealand, Pratique is not required, nor is a Health Declaration. Nevertheless, Radio Pratique was requested but no reply was received.

Provisions: Available but very expensive. We stocked up prior to departure Gladstone and this proved to be a wise decision.

Fresh Water: Available from the wharf, at a rate of 15 tonnes/p.h. This is well water and not used by the local residents, who collect the rainwater off their roofs. To be on the safe side it was treated with Chloride of Lime.

Repairs: Only minor repairs can be undertaken. We called in a local firm for some non-urgent burning and welding work, but they were unable to do anything due to a products tanker discharging astern of us. The Chief Engineer reports that appearances suggest that competent work would be done, but that prices would be rather high.

Weather: Was hot and humid, with temperatures ranging from 23.2°C to 28.2°C. During the afternoons a South-Easterly breeze, about Force 2-3 usually came up, dying away in the evenings. Rain showers were prevalent, night and morning.

Health: Local residents confirmed that malaria is present at Lae and the usual precautions were taken on board.

AUTHORITY: Port Manager, P.O.Box 563, Lae, Papua New Guinea. *Tel:* 422477. *Telex:* NE 42414. *Cables:* Portman, Lae.

LORENGAU: 02.01 S. 147.16 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)

PORT LIMITS: Seaward Boundary.

From the Eastern extremity of Hauwei Island by a straight line due North for 2,050 m., thence by a straight line due East for 2,920 m., thence by a straight line due South for 2,000 m. to the Old Light House on Ndrilo Island.

PILOTAGE: Pilotage is not compulsory but a Pilot will attend from Madang given 48 hours notice of the ship's intention to call at Lorengau.

Advice from an officer of the PNG Defence Force may be obtained for ships proceeding to Lombrum Naval Base.

Pilot Boarding Ground: Lat. 01° 56.6′ S., Long. 147° 18.3′ E.

ETA to be sent not less than 12 hours prior to arrival via Port Moresby Radio (P2M) or Rabaul Radio (P2R) and to be confirmed at not more than 5 hours and not less than 4 hours prior to arrival. No VHF facility.

ANCHORAGE: Anchorage may be obtained in soft mud in depths of about 30 m. anywhere in Seeadler Harbour but an anchorage in position Bear Point 210° (T) 2,600 m. is recommended.

HEALTH: Contact Port Manager if Quarantine Office or Health Officer required.

TUGS: Not available.

BERTHING: Nabu Wharf at Lorengau is 15.2 m. long with a berthing dolphin 25.9 m. from the Northern end of the wharf. The height of the deck above LAT is 2.9 m., minimum depth of water at face at LAT 5.1 m. Tidal range 1.3 m.

Nabu Wharf is not suitable for large ships but overseas vessels occasionally use the wharf at Lombrum Naval Base in position Lat. 2° 02.1′ S., Long. 147° 22.6′ E., which now lies within the declared port of Lorengau, however the continued use of this facility is in doubt.

Berthing at Nabu Wharf may be delayed during the N.W. season, December-March.

STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required.

R. L. & V. J. Knight, P.O.Box 108, Lorengau. Tel: 409159
Manus Transport, P.O.Box 190, Lorengau. Tel: 409165.

FRESH WATER: Not available.

FUEL: Diesel available by pipe-line at Nabu Wharf and by road tanker. Suppliers: Caltex and Mobil.

CUSTOMS: Port of Entry. Collector of Customs Tel: 409034.

AIRPORT: Momote airport is some 45 km. from Lorengau and is served by Air Nuigini but not daily.

POLICE/AMBULANCE/FIRE: Police and Fire: Lorengau 409122. Ambulance: 409055.

DELAYS: Delays at Lorengau are most unlikely.

GENERAL: *Storage:* Covered Storage: None. Open Storage: 1,000 sq.m.
Chart: AUS 662.

DEVELOPMENTS: No development for the port is envisaged in the near future.

AUTHORITY: Port Manager, P.O.Box 21, Lorengau, Papua New Guinea. *Tel:* 409078. *Cables:* Portman, Lorengau.

MADANG: 05.13 S. 145.49 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)

PORT LIMITS: Seaward Boundary.

By a straight line due East from the Easternmost extremity of Kramket Island to position Lat. 5° 11.9′ S., Long. 145° 51.5′ E., thence due South to position Lat. 5° 13.5′ S., Long. 145° 51.5′ E., thence by straight line due West to a point on the Easternmost extremity of the Kalibobo (Schering) Peninsula known as Cape Kusseron.

PILOTAGE: Compulsory. Pilots based at Madang, Tel: 82 2351 (office), 82 2916 (residence).

Pilot Boarding Ground: Lat. 5° 12.7′ S., Long. 145° 50.1′ E.

ETA pilot boarding ground not less than 12 hours prior to arrival via Port Moresby Radio (P2M) or Rabaul Radio (P2R). Confirm or amend ETA not more than 5 hours but not less than 4 hours prior to arrival again via Port Moresby or Rabaul.

ANCHORAGE: Anchorage area is inside the Dallman Passage in the area to the North of the main channel bounded by Beliau Island to the West and Kramket Island to the East. Depth of water, 40 m. Good holding ground in soft mud. Ships should not proceed to anchorage area without Pilot's advice.

HEALTH: Quarantine Officer Tel: 82 2193. Health Officer Tel: 82 2224.

VHF: Call Madang Port Control on VHF Channels 16, 12, 8, 6. Listening watch maintained during normal working hours and when ships are expected during non-working hours.

TUGS: None available.

BERTHING: Overseas wharf 137.1 m. long, height of deck above LAT 3.1 m., minimum depth of water at face at LAT 10.1 m. Tidal range 1.2 m.

Vessels may berth either port or starboard side to at the discretion of the Port Authority.

Load/discharge is by ship's own gear (except under special arrangement).

A separate facility to serve woodchip vessels (and Caltex tankers) only is situated within Binnen Harbour West of the main wharf facilities.

STEVEDORES: 72 hours' notice preferred, but a minimum of 24 hours required. Working hours: 0800 – 1200, 1300 – 1800 and 1900 – 2200.
Licenced Stevedores: Rabaul Stevedores Pty. Ltd., P.O.Box 226, Madang. Tel: 82 2225. B. J. Back Pty. Ltd., P.O.Box 642, Madang. Tel: 82 2157.

TANKERS: Discharge at main wharf for both Shell and Mobil. Caltex discharge by floating pipe-line while moored at the Jant woodchip facility.

FRESH WATER: Limited supply available seasonally at wharves and following prior arrangements with Port Manager.

FUEL: Diesel and diesel fuel is available from road tankers. Suppliers: Shell, Mobil and Caltex.

REPAIRS: A coastal slipway at Madang but only minor deck repairs P.O.Box 605, Madang.

AIRPORT: Madang airport is 6 km. from the port and is served daily by Air Nuigini.

CUSTOMS: Port of Entry. Collector of Customs Tel: 82 2757.

POLICE/AMBULANCE/FIRE: Police: 82 2222. Ambulance: 82 2022. Fire: 82 2777.

DELAYS: Although there is only one overseas berth at the main wharf, Madang delays are not common and are of short duration when they do occur.

GENERAL: *Storage:* Covered Storage: 4,600 sq.m. Open storage: 8,830 sq.m. *Chart:* AUS 648.

DEVELOPMENTS: When traffic justifies expenditure an extension of the overseas wharf Eastward will be undertaken.

AUTHORITY: Papua New Guinea Harbours Board, P.O.Box 273, Madang, Papua New Guinea. *Tel:* 82 22351/2. *Cables:* Portman, Madang. *Contact:* Port Manager.

ORO BAY: 08.54 S. 148.29 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)

PORT LIMITS: Seaward Boundary.

From the extreme North point of the mainland on the South side of the entrance to Port Harvey by a straight line due North for 2,935 m. thence by a straight line due West for 2,760 m. to the coastline.

PILOTAGE: Pilotage is not compulsory but a Pilot will attend from Port Moresby given 48 hours notice of the ship's intention to call at Oro Bay.

Pilot Boarding Ground: Within 300 m. radius of a position with the North corner of Oro Bay wharf bearing 225° (T) distant 1,850 m.

ETA to be sent not less than 12 hours prior to arrival via Port Moresby Radio (P2M) and to be confirmed not more than 5 hours and not less than 4 hours prior to arrival.

ANCHORAGE: In sand and mud at 15 m. depth may be obtained on the leading marks 239° (T) distant 400 m. from the North corner of the wharf.

VHF: Call Oro Bay Port Control on VHF 16, 12 and 6. Listening watch maintained during working hours and when ships are expected during non-working hours.

TUGS: None available at present. Arrangements may be possible via Kamusi Timber if tugs required.

BERTHING: Wharf is 60.3 m. long, height of deck above LAT 2.5 m., minimum depth of water at outer face at LAT 11.4 m. Tidal range 1.3 m.

Vessels may berth either port or starboard side to at the discretion of the Port Authority.

Load/discharge is by ship's own gear (except under special arrangement).

Berthing may be delayed during the N.W. season, December – March.

STEVEDORES: 72 hours notice preferred, but a minimum of 24 hours required.
Licensed Stevedores: New Guinea Forwarding Agencies: P.O.Box 77, Popondetta Tel: 297050/297268. Carnell Carriers: P.O.Box 151, Popondetta Tel: 29 7095.

FRESH WATER: Not available.

FUEL: Diesel is available by road tankers. Suppliers: Shell and Mobil.

AIRPORT: Popondetta airport is 40 km. from the port and is served by Air Nuigini, but not daily.

POLICE/AMBULANCE/FIRE: Police: 29 7122. Ambulance: No service available. Fire: 29 7144.

DELAYS: Delays at Oro Bay are most unlikely.

GENERAL: *Storage:* Covered Storage: 739 sq.m. Open Storage: 4,645 sq.m.
Chart: AUS 520.

DEVELOPMENTS: The area around Popondetta is being developed as major palm oil plantations and this could eventually lead to expansion of the port.

AUTHORITY: Papua New Guinea Harbours Board, P.O.Box 160, Popondetta, Papua New Guinea. *Tel:* 29 7295. *Cables:* Portman, Popondetta. *Contact:* Murray M. Arua, Port Manager.

PORT MORESBY: 09.29 S. 147.09 E. (See Plan Book)

(See General Section on Papua New Guinea Ports)

PORT LIMITS: Seaward Boundary.

A straight line bearing 300° (T) from a point at the South Western extremity of Nateara Reef to a point at the Southernmost extremity of Sinari Reef.

PILOTAGE: Pilotage is compulsory – 24 hours a day. Tel: 212805 (Office), 214910 (Residence).

Pilot boarding ground: 9° 32.8′ S., 147° 06.85′ E. *OR* in bad weather the pilot boarding ground will be withdrawn inside the Basilisk Passage to a position Basilisk Beacon 220° (T) 950 m.

ETA at Pilot boarding ground not less than 12 hours prior to arrival via Port Moresby Radio (call sign P2M).

Confirm or amend ETA not more than 5 hours and not less than 4 hours prior to arrival (VHF Channel 16 – call "Moresby Pilot" thence switch to Channel 12 for working Channel).

ANCHORAGE: Vessels may, subject to permission being granted by the Pilotage Authority, proceed inwards without a Pilot to an anchorage area in the outer harbour centred in position North Point Manubada Island 090° (T) 1,275 m.

Depth of water 27 m. Good holding ground in soft mud and sand.

HEALTH: Health Officer Tel: 255566. Quarantine Officer Tel: 211475.

VHF: Call sign "Moresby Port Control" Channels 16, 12 and 6. Listening watch during normal working hours and outside hours when vessel expected.

TUGS: Two tugs of between 550 b.h.p. and 750 b.h.p. are available for hire from private operator.

BERTHING: Old Port:

	Length (m.)	*Width* (m.)	*Water Depth Below LAT* (m.)	*Deck Height Above LAT* (m.)

AUTHORITY: Port Manager, P.O.Box 270, Wewak, Papua New Guinea. *Tel:* 86 2298. *Cables:* Portman, Wewak.

NOTES

Please also advise Shipping Guides Ltd.

GENERAL:

DOCUMENTS: *Consular Documents:*

If ports on embarkation are non-Paraguayan, the Agency must submit an original cargo manifest and two copies, as well as three copies of the crew list to the Paraguayan Consulate. The Consul returns the original and one copy of each of these documents, and the Agency must ensure that these papers are mailed, time permitting, or delivered to the vessel.

Prior to Arrival:

Arrival Notice:

The time and date of the vessel's arrival shall be reported at least 24 hours in advance to the following Authorities: Port Authority (National Navigation and Port Administration), the General Prefecture of Ports (National Navy), Customs, Migration, and Maritime Health.

Information on Cargo for the Port:

The shipping Agency must receive duly in advance the following documents for presentation to the Authorities and for the preparation of the tally books: cargo manifest and stowage plan. It is of the utmost importance that manifests be received duly in advance, even if by telex, to avoid any delay in servicing the vessel.

The manifests and a written request that may be submitted 72 hours prior to the arrival of the vessel, must be delivered to Customs. Customs opens a Customs file and allocates a number to the vessel to expedite the processing of the import documents.

Requests for Port Services:

A request must be submitted to ANNP, indicating the expected time of arrival (ETA) of the vessel, to obtain clearance for berthing and port services. 5 copies of the manifests giving the number assigned by Customs to the vessel and 1 copy of the stowage plan must be presented, as well as copies of the tally books, and a list of container contents.

In the absence of manifests, clearance for berthing will not be given and, therefore, the cargo cannot be handled.

On Arrival:

Type of Document	*Number and Distribution of Documents*						
Basic Forms	*Gen. Pref. Ports*	*Customs*	*Immigration*	*Marit. Health*	*Veterinarian†*	*Agency*	*Total*
1. General Declaration(a)	1	–	–	–	–	1	2
2. Cargo Manifest	1(b)	1(b)	–	–	1	1	4
3. Crew List	1(b)	1(b)	1	–	–	1	4
4. Passenger List	1	1	1	–	–	1	4
5. Ship's Stores List	–	1	–	–	1	2	4
6. Crew Effects Declaration	–	1	–	–	–	1	2
7. Maritime Declaration of Health	–	–	–	1	–	–	1
8. Mail List	–	–	–	–	–	1(c)	1
Additional Documents:							
9. In-ballast Declaration	1	1(b)	–	–	–	1	3
10. Bills of Lading	1	1(b)	–	–	–	1	3

† Transitory provision of the Ministry of Agriculture, of November 1978.

(a) If the vessel has the forms, LAFTA/OAS Form 1 should be employed; if not, Agencies use their own form, containing data on 1 through 10 and 11A of the General Declaration.

(b) Visaed by the Consulate of Paraguay.

(c) For the Postal service.

Prior to Departure:

A departure request must be filed with Customs, to which the export cargo manifest and the provisional export permit must be attached. This procedure cannot be started until the entire cargo has been loaded.

After this request has been recorded by the Registration Division and the Cashier's Office, the Customs Administration issues the safe-conduct for departure.

Once the safe-conduct is obtained from Customs, this is attached to the crew list and submitted to the General Prefecture of Ports, which authorises clearance, and designates the Pilots who are to guide the ship on the stretch Asuncion-Confluencia.

NOTES

Please also advise Shipping Guides Ltd.

Peru

GENERAL:

DOCUMENTS:

Prior to Arrival:

Arrival Notice:

Notice of a vessel's arrival must be sent 24 hours in advance to the Captain of the Port, Customs, International Police, Migration and Public Health.

Information on Cargo and Passengers for the Port:

The Agency must have received the following documents by air, sufficiently in advance to submit them by the deadlines indicated in the following paragraph, and to prepare the tally sheets:

5 sets Cargo Manifest.
2 sets Freighted Cargo Manifest.
1 copy Passenger List.
6 copies List of Container Contents.
5 copies Dangerous Cargo List.
2 copies List of In-Transit Dangerous Cargo.
2 copies Stowage Plan.

Deadlines for Submission of Documents:

(a) Vessels from South American and Pacific coast ports are exempt from submitting documents by air mail in advance. However, the Agency must receive by telex, in sufficient time to prepare and submit before initiating tally sheet operations, the following information on regional cargo: marks, numbers, amount, class and weight of cargo, its location on board, shipper and consignee.

(b) Vessels from Panama and Colombian ports on the Atlantic. 24 hours before the vessel's arrival. Fine for failure to comply with the deadline.

(c) Vessels from Central American ports. 48 hours before the vessel's arrival. Fine for failure to meet the deadline.

(d) Vessels from any other port. 72 hours before the vessel's arrival. Fine for failure to meet the deadline.

Request for Port Services:

24 hours before the vessel's arrival, the request for pilotage and berthing, and port services shall be submitted to the marine terminal of the Peruvian National Ports Agency (ENAPU) on special forms.

On Arrival:

On entrance of the vessel, the following documents must be submitted on forms LAFTA/OAS 1 to 8:

Type of Document	*Number and Distribution of Documents*						
Basic Forms	*Captain of Port*	*Customs*	*ENAPU*	*Police*	*Migration*	*Public Health*	*Total*
1. General Declaration	1	2	2	–	–	–	5
2. Cargo Manifest	1	2	4	–	–	–	7
3. Crew List	1	2	–	1	1	1	6
4. Passenger List	1	2	2	1	1	1	8
5. Ship's Stores List	–	2	1	–	–	–	3
6. Crew Effects Declaration	–	2	–	–	–	–	2
7. Maritime Health Declaration	–	–	–	–	–	1	1
8. Mail List	–	2	2	–	–	–	4
Additional Documents:							
9. Clearance from last Port	1	–	–	–	–	–	1
10. In-transit manifest	1	1	–	–	–	–	2
11. "No passengers" Declaration	1	2	2	1	1	1	8
12. List of Passengers in-transit or "No in-transit Passengers" Declaration	1	2	2	1	1	1	8
13. List of Passengers Baggage or "No Baggage" Declaration	–	4	4	–	–	–	8
14. List of unaccompanied Baggage or "No unaccompanied Baggage" Declaration	–	4	4	–	–	8	16
15. Bill of Lading	–	1	2	–	–	–	3

Prior to Departure:

Clearance Documents:

The clearance permit must be duly paid for at the Bank of the Nation. Receipts therefore must accompany the request for clearance.

The clearance permit is requested from the Captain of the Port on a special form in triplicate, accompanied by 3 sets of the general declaration, the crew list and the list of passengers on board, in-transit or "no passengers" declaration.

At the time of clearance, a representative of the Captain of the Port returns on board a stamped set of these documents.

In addition, the following must be submitted before clearance:

Documents:

	ENAPU	*Migration*
Crew List		1
List of Passengers Embarked or "No Passengers" Declaration	1	
List of Passengers Baggage or "No Baggage" Declaration	1	
Bill of Lading for all cargo loaded	2 sets	

Within 24 hours after clearance, Customs must be given a copy of the export cargo manifest or a set of the bills of lading for all export cargo.

Request for Pilotage:

Requests for unberthing, including the request for pilotage shall be submitted daily at 1500 hrs. to the ENAPU on a special form.

SHIP REPORTING:

Position and Safety Information System in Peruvian Waters: National and foreign merchant and fishing vessels, of more than 1,000 g.r.t., are obliged to report their position by radio to Coastguard General Director, by Peruvian Coast Stations of Paita, Mollendo or Callao, if they enter, stay or depart from Peruvian waters.

Instructions on Preparing the Message Report:

(a) Message structure information:

Identification Message		SHIPREP (Identification System)
	A	A group of 2 letters Report "PW" (Ship enters into Peruvian waters) Report "SP" (Navigation plan or crossing route) Report "PR" (Position report. Ship crosses Lat. 12° S) Report "FR" (Final report. Ship arrives at Peruvian port or departs from Peruvian waters)
Vessel	B	Vessel's name, call sign and flag
Date and local time	C	A group of 6 numbers to indicate day, hours/minutes
Situation	D	Sailing port, last port of call or crossing
Latitude and Longitude	E	A group of 4 numbers to indicate: Latitude (degrees and minutes) with suffix N or S A group of 5 numbers to indicate: Longitude (degrees and minutes) with suffix E or W
Course	F	A group of 3 numbers
Speed (knots)	G	A group of 2 numbers
Destination Port	H	Arrival port or destination port
Estimated Time of Arrival (ETA)	I	A group of 6 numbers to indicate day, hours/minutes

(b) Message Report Types:

Message "PW" — Ship enters into Peruvian waters. Required information is as follows:
SHIPREP/A/B/C/D/E/F/G/H/I

Example:
FM: YAMAZURU MARU
TO: COASTGUARD GENERAL DIRECTOR

$$\text{SHIPREP/}\overbrace{\text{PW}}^{A}/\overbrace{\text{YAMAZURU MARU}}^{B}/\overbrace{\text{JEVF}}^{B}/\overbrace{\text{JA}}^{B}/\overbrace{\text{051200}}^{C}/\overbrace{\text{POHANG}}^{D}/$$

$$\overbrace{\text{1813S}}^{E}/\overbrace{\text{07620W}}^{E}/\overbrace{\text{330}}^{F}/\overbrace{\text{20}}^{G}/\overbrace{\text{SANNICOLAS}}^{H}/\overbrace{\text{06100}}^{I}$$

Message "PR" — Ship crosses to Peruvian waters (Lat. 12°S). Required information is as follows:
SHIPREP/A/B/C/E/F/G/H/I

Message "SP" — Ship departs from Peruvian port. Required information is as follows:
SHIPREP/A/B/C/D/F/G/H/I

Message "FR" — Ship departs from Peruvian waters or she arrives at the destination port. Required information is as follows:
SHIPREP/A/B/C/H

(c) Coast Station Frequencies:
Frequencies in order to get in contact with coastal stations.

Radio Station Name	*Call Signal*	*Frequencies Transmission*	*Frequencies Reception*	*Kind of Emission*	*Working Hours*
Paita Radio	OBY2	8527 2182-2738 156.70 156.80	8363.2-8366.4 2182 C.14 C.16	0.1A1A H3E/J3E F3E F3E	24
Callao Radio		460-500 8546 13015.5 2182-2738 156.60 156.70 156.80	500 8363.2-8366.4 12544.8-12549.6 2182 C.12 C.14 C.16	0.1A1A 0.1A1A A1A H3E/J3E F3E F3E F3E	24
Mollendo Radio		8490 2182-2738 156.70 156.80	8363.2-8366.4 2182 C.14 C.16	0.1A1A HE3/J3E F3E F3E	24

Note: Copies of radio messages are required at reception.

Vessels failing to comply, fined US$1,000.00 first time, US$5,000 for repetitions.

If unable to raise Peruvian Coastal Stations, notation to this effect must be entered in Radio Log, verified on arrival by Authorities to whom copies of messages must be given.

ATICO: 16.14 S. 73.43 W.

Atico is an open roadstead and unprotected. The main activity is the loading of fishmeal.
PILOTAGE: Not available.
ANCHORAGE: Vessels anchor in the open roads.
TUGS: 1 available.
LIGHTERS: 3 available, 100 tons each.
CRANES: None.
STEVEDORES: See "Pimentel" for working hours and overtime rates. There are 2 gangs available.
MEDICAL: Available at Mollendo.
FRESH WATER: Not available.
FUEL: Not available.
GENERAL: *Swell Period:* Heavy swell in the Winter months, June-September.

CALLAO: 12.03 S. 77.10 W. (See Plan Book)

DOCUMENTS:

Airmail copies must be presented to Port Authorities 72 hours before arrival of vessel as otherwise vessel will be fined. No docking is allowed until Cargo Manifests and Cargo Plan are presented.

Vessel copies to be delivered on clearing vessel inbound on arrival when Health, Customs and other Authorities board.

	By Air	*By Sea (With the Vessel)*
Cargo Manifests, including additionals. Must be faithful copies of Bills of Lading descriptions	5	*7
Same Manifests, but freighted	5	2
Cargo Manifests covering cargo shortshipped but manifested on previous vessels calling at Callao	5	*7
(If Master Stencils are airmailed, the required number of Manifests will be printed)		
Transit Cargo Manifests	–	3
Freighted copy of each Bill of Lading	–	4
List of Containers with their numbers	2	2
Content List, each Container, properly identified with marks, numbers and Bills of Lading numbers	2	2
Dangerous Cargo Lists showing complete description of goods, Flash Point, IMO Classification, Type of Label, marks, numbers and Bills of Lading numbers	3	3
Transit Dangerous Cargo Lists	3	3
Mail Manifests	5	5
Passenger Lists	1	*10
Transit Passenger Lists	–	*10
Tally Books	–	16
Stowage Plan	3	–
Consolidated Stowage Plan, prepared or checked on board	–	3
Visaed Tonnage Certificate or General Declaration from First Port receiving cargo for Peru and every port of call thereafter	–	1
Health Clearance, last port of call	–	1
Vaccination List	–	*1
General Declaration	–	*7
Crew List	–	*10
Crew Personal Effects Declaration	–	*3
Store List	–	*4
Sealed Consular Documents addressed to Customers, in envelope	–	1

*Must be made out on LAFTA Forms (See "Shipmaster's Report"). Also see "General" before first port.

PILOTAGE: Pilots must be requested by Agent and board ships outside port at anchorage. Various pilot launches painted white, black and red.
ANCHORAGE: Very large area to the West of entrance buoys.
RESTRICTIONS: Vessels of up to 32 ft. draft may enter at any time. Vessels of more than 32 ft. draft must enter at high water. Pilots available 24 hours.
MAX. SIZE: Length and breadth practically unlimited, draft 32 ft. plus height of tide making allowance for keel clearance.
RADIO: Radio Costera, OBC3, 460, 500, 8546, VHF 16 and 14 (Peruvian Navy 24 hours).

Arrival Advice: 24 hours' Notice of Arrival should be sent to the Captain of the Port and the Agent.

Shipowner's Report: October 1982.
Please note there is a new regulation for vessels calling Callao. All ships must send 1 hour prior to arrival at Callao Roads a telegram addressed to "Costera Callao" indicating their revised ETA. If this is not done and Authority gets notice of this, vessel will be fined.

As per experience this telegram arrives at "Costera Callao" after vessel has departed. Sometimes Authority asks for presentation of telegram copy.

Radio Officer's Report: September 1982.

During a recent call at Callao and Pisco at the beginning of September 1982, only slight difficulties were experienced in establishing radio contact with Callao Radio – OBC3.

However, Callao Radio seems mostly to be listening only on 8364 kHz HF, answering calls on its working frequency 8546 kHz. Also the station seems to be using "QRY-operation". Ships' radio operator will get his turn number, whereafter Callao Radio calls back in due time for QSO.

Even at a very close range, no answer was obtained on 500 kHz. However, a call on VHF Channel 16 was answered at once, and vessel was advised to shift to the above mentioned HF frequency for QSO.

HEALTH: Cable Agent requesting Free Pratique. Agent must be notified in advance if any illness or disease suspected on board. Free Pratique is hardly ever given unless Health Officer and Captain of the Port and other Officers board.
TUGS: Port Authority Tugs join vessel once inside mole, 1 or 2 as required, using vessel's lines, later passed to pier. 4 tugs available; 2 a 175 h.p., 1 at 500 h.p. and 1 at 800 h.p.
BERTHING: There are 9 piers with a total of 24 berths, 22 for larg vessels, and 2 for coasters.

The various berths of the port can be subdivided into areas for thei appropriate usage as follows:

	Quays	*Berths*
General cargo	1, 2, 3, 4, 5	1A, 1B, 2A, 2B, 3A, 3B, 4A, 5A, 4B.
Dry bulk cargo	11, 9	11A, 11B, 11C, 9A, 9B, 9C.
Liquid bulk cargo (Oil derivates)	7	7A, 7B.
Minerals	5	5B, 5C, 5D, 5F.
Logistic supplies and coastal vessels	9, 10	9D, 10A, 10B.

All piers except the petrol pier are connected to railway system fo unloading and loading to railway wagons.

Within port limits anchorages can be used for discharge of livestock scrap and occasionally for general cargo after permission obtained fro the Port Authorities.

Berths 5B, 5C, 5D and 5E are equipped with conveyor belts fo shipping granulated bulk ore.

Berths 9A, 9B and 9C have a conveyor belt for shipping fishmeal i pellets.

For discharge of grain, there are three pneumatic mobile suctio towers and silos with a capacity up to 23,000 tons. The average rate discharge of the pneumatic towers is 2×100/150 t.p.h. and 1×300 t.p.h

STEVEDORES: No particular advice necessary but Agent must receiv Stowage Plan beforehand to advise Port Authority of planned operatio

Working Hours: 1st shift 0700 – 1200 hrs. and 1300 – 1600 hrs. 2n shift 1700 – 2400 hrs. Both are compulsory, except 2nd shift on Sunday and Holidays. 3rd shift 0100 – 0700 hrs., optional, except after Sunday and Holidays when not worked. There is an additional charge of 25% fo the 3rd shift.

Lighters: In the port, a lighter service is provided by private concern to enable vessels to discharge at moorings, and thus reduce the tim they are at the quays.

CRANES: There are a number of cranes with lifting capacity from 4 ton to 50 tons. The Callao Naval Base has a floating crane with a liftin capacity of 80 tons, which can be called upon if necessary.
MEDICAL: Advance information as to sick crew members not require but helpful. Ample first class facilities in the Lima area.
TANKERS: *Petroleum Pier: Pier No. 7:* Max. depth 35 ft., howeve depth in approaches to berth is 33 ft. at HW and 31 ft. at LW, max. lengt about 200 m.

There are numerous loading and discharge pipe-lines of differen diameter to handle oil derived products.

These lines can be used simultaneously at the berths A and B, b also depending on store facilities on shore or delivery into trucks.

Discharging pressure of the lines: 100 lb./sq.in. for 12 in. to 22 i lines. On the pipe-line of 6 inches it is possible to reach a pressure 250 lb./sq.in., for discharge of LPG.

Connections: There are connections from 4 in. to 10 in. for all kind flanges.

Water: Supply of water is possible, 40 t.p.h.

Discharge of ballast or slops inside mole prohibited. Tankers loadi fish oil must arrive free of ballast.

DENSITY: Sea water.
FRESH WATER: All berths equipped with fresh water supply at a average rate of 30 t.p.h.
FUEL: The following are available from Petroleos del Peru, Bunker " 3,500 seconds, Petroperu No. 5 (intermediate 4) 400 seconds, Dies 2 (marine diesel) 100 seconds.
FIRE PRECAUTIONS: Use of Port Authority Fire Equipment mandato during discharge of petroleum products with charge for service. Safe equipment charge applied to all vessels on tonnage moved.
GANGWAY/DECK WATCHMEN: Recommended.
CERTIFICATES: All may be required but normally only the De Certificate is asked for. If Ratguards are not used on all lines, vess liable to fines.
CUSTOMS ALLOWANCES: Any amount over normal consumpti usually cause difficulties including searching.
CARGO GEAR: No additional requirements.
IDENTIFICATION CARDS: Supplied by Agent and stamped Immigration. Authorisation required for all crew members.

REPAIRS: Normal Deck and Engine repair facilities available throu private companies in Lima and Callao.

DRY DOCKS: Major repairs can be undertaken by the Naval Industrial Department, including careening and repairs in dock.
(a) Dry dock – length 632 ft., width 82 ft., depth 21 ft.
(b) Floating dock 107 – length 408 ft., width 48 ft., depth 20 ft.
(c) Floating dock 106 – length 288 ft., width 46 ft., depth 14 ft.
SURVEYORS: Lloyd's Register of Shipping, ABS, R.I., and N.V.
REPATRIATION: All foreign crew members who do not have Peruvian Visas, which only obtainable abroad, must be repatriated by quickest means (Air) by Agent, paying all detention expenses. Peruvian and foreign crew members available.
AIRPORT: Lima/Callao within city limits has regular direct international service to North and South America, Europe and Far East.
HOLIDAYS: Only 1st May when work is not possible.
DEVELOPMENTS: Quay No. 5 to be converted to a container terminal. Completion expected 1984.

SHIPMASTER'S REPORT: September 1980.
Navigational Notice: All vessel navigating in Peruvian waters to a distance of 200 nautical miles from the coast are required to radio their position, course, speed and destination every 12 hours to: "Capitania General de Costera y Capitania de Puerto Callao" via Callao Radio, which is very difficult to contact as naval traffic appears to be their main concern. Other coastal radio stations are even less available.
Documents: Cancel all reference to LAFTA documents which are now obsolete and also there is no longer any visaed or consular items to obtain. The requirements for air mailed copies still remains for bills of lading, cargo manifest and contents list where applicable. The remaining requirements are the same as listed.
Pilotage: The Pilots boarding station is 1.25 miles 095° from that marked on BA Chart 1853.
Anchorage: Very large area to the North and West of entrance leading line. The area to the South is reserved for Peruvian naval and merchant vessels which navigate therein without lights on occasions.
Restrictions: The maximum draft dictated by the entrance channel is 33 ft. 10 in. (10.30 m.). On occasions with a maximum tide, vessels in excess will be docked but the chances are based upon the Pilot's willingness. With a 3 ft. (1 m.) rise this vessel charted a minimum under keel clearance of 1.3 ft. on a draft of 34 ft. 3 in. within the channel outside the breakwaters.
Density: This was checked daily and found to be 1027.5 to 1028 in Berth 11.
Berthing: For discharge of grain there are 3 pneumatic suction towers on rails with 3 suction pipes to each. The two Southern units are reserved for loading road trucks while the third and most Northern discharges onto the silo belt only. Thus delays may be experienced due to lack of trucks and subsequent order of discharge regulated to accommodate this factor. There is a minimum depth of 36 ft. by hand lead at this berth.
Fresh Water: Very early request via Agent and follow up. Max. 10 t.p.h.
Gangway/Deck Watchmen: The strictest watch must be maintained at ALL hours for persons who board to steal. The worst are those whose identity card is for "Tribulante" indicating a seafarer, for they know where most ship's officers stow gear and where the keys to the chartroom are, etc. A patrol is required as well as a static gangway watch. Cargo thieves are very well organised.

Ashore, no person should travel alone in Callao or Lima.
Port Authority Permits: These are required for repairs, overside painting, etc., and a 3 man inspectorate will board to check progress and conditions.

SHIP'S OFFICER'S REPORT: January 1985.

Hull maintenance only possible after permission obtained from Port Captain.

A very extensive cabin search made on sailing day and articles not declared on arrival were taken away (if possible).

The following were not declared on arrival (but should have been declared): Cabin refrigerators, portable cabin heaters, Loadmaster computer.

In our case all charges and fines were waivered after consultations. Therefore if in doubt all items should be declared.

Make sure all ratguards are marked with ship's name otherwise they may be stolen and resold to the ship.

Ensure correct courtesy ensign is flown otherwise a fine will be imposed.

AUTHORITY: Port Captain, Terminal Maritimo de Callao.

CHANCAY: 11.35 S. 77.16 W. (See Plan Book)

Chancay is an unprotected open roadstead about 31 miles North of Callao. The main activities are the loading of fishmeal and discharging of fertilisers.
PILOTAGE: Compulsory. The Port Captain currently acts in this capacity.
ANCHORAGES: There is a good anchorage, in 5 and 8 fathoms of water, on a sand and mud bottom, located in the outer area of the bay, which is 0.5 mile long by 0.5 miles wide.
RADIO: *Arrival Advice:* 24 hours' Notice of Arrival should be sent to the Captain of the Port and the Agent.
TUGS: 2 Tugs of 56 h.p.
BERTHING: There is a pier for loading barges.
LIGHTERS: 12 lighters with a capacity of 40 tons each.
CRANES: 2×14 tons capacity.
STEVEDORES: The same system applies here as throughout the Republic, the tariff only altering according to the number of workers employed.

3 shifts and 2 more if necessary.
MEDICAL: Medical consultations possible.
FRESH WATER: Not available.
FUEL: Not available.
AUTHORITY: Port Captain.

CHIMBOTE: 09.05 S. 78.37 W. (See Plan Book)

Chimbote is a berth port with possibilities to load and discharge from and into lighters if berths are not available. Main activity: Loading of fishmeal and minerals; discharging of iron, steel, and general cargo.
DOCUMENTS:
For Entry
2 Entry Declarations (Form No.1).
1 Departure License of the last foreign port en route.
1 Maritime Health Declaration (Form No. 2).
2 Passenger Lists with entry baggage (Form No. 3).
1 Consular Roll of the last foreign port en route.
1 Consular Passenger List of the last foreign port.
Customs Administration
1 Original Cargo Manifest(s) with the Consular stamp. (Form No.4).
The envelope(s) from the Consul, enclosing copies of the Consular invoices, bill of lading and cargo manifest for the port with the Consular stamp.
1 Cargo Manifest (Form No.4).
1 Cargo Manifest of cargo, but with further destination for another national or foreign port (Form No. 4).
1 Cargo Manifest in transit.
1 Gross or Net Tonnage Certificate, with Consular visa.
1 Unaccompanied Baggage List (Form No. 5).
Customs
1 Entry Declaration (Form No. 1).
1 Cargo Manifest(s) for port without Consular visa (Form No. 4).
1 Manifest of Cargo for port, but with further destination for another national or foreign port, without Consular visa (Form No. 4).
2 Passenger Lists with entry baggage (Form No.3).
2 Unaccompanied Baggage Lists (Form No. 5).
1 Crew Personal Effect List.
1 Store List, food and spirits.
1 Mail List.
Port Administration
1 Entry Declaration (Form No.1).
1 Passenger List with entry baggage (Form No. 3).
1 Unaccompanied Baggage List (Form No. 5).
3 Cargo Manifests for the port, without the Consular visa (Form No.4).
3 Manifests of Cargo for port, but with further destination for another national or foreign port, without Consular visa (Form No. 4).
3 Sets of Bills of Lading.
Also see "General" before first port
PILOTAGE: Compulsory. Official Pilot boards vessels at entrance to bay and leads ship to appropriate anchorage according to draft. Private Pilot to moor to the quays of the "Corporacion Peruana del Santa" and to "Sogesa". Vessels enter the inner roadstead through Southern side of each channel. Depart through Northern side of channel.
ANCHORAGES: Good anchorages in bay according to draft. Anchorages are of mud and sand. Best place to anchor ship of medium draft is inner side of Paso del Norte, 6 fathoms deep, near port and safe. Another good anchorage for ship of medium draft is with Island bearing 170° and Rosas Blancas bearing 275°, 6 fathoms deep.
HEALTH: Health Authorities board on arrival.
RADIO: Hablanaves Radio at Talara and Trujillo (Buenos Aires), Radio Costera at Callao.
Arrival Advice: 24 hours' Notice of Arrival should be sent to the Captain of the Port and the Agent.
TUGS: 6 private, 3 of 80 h.p., 1 of 60 h.p. and 1 of 165 h.p. and 1 of 180 h.p. The Port Authority has two tugs, 1 of 400 h.p. and 1 of 200 h.p.
BERTHING: 3 Piers available.
No. 1 Pier: Length 158 m., width 16 m., depth alongside 27 ft. – 28 ft.
No. 2 Pier: Used only for the loading and discharge of lighters (fishmeal). Length 54 m., width 18.40 m. Average depth 4.5 m.
No. 3 Pier: Operated by Siderperu. Length 265 m., width 25 m., depth alongside 28 ft. – 31 ft. There are two bridges for discharging coke and minerals by clamp. (Total capacity 300 t.p.h.)
LIGHTERS: 12 for dry cargo: 2 at 150 tons and 10 at 50 tons. 10 tank lighters with a total capacity of 1,300 tons.
CRANES: 5 cranes: 3×17 tons, 1×13.8 tons and 1×6.25 tons capacity.
STEVEDORES: See "Callao".
MEDICAL: Agent arranges emergency attention. Hospital and private clinic available.
TANKERS: Three zones for load/discharge of fish-oil and lubricants. Ship loads fish-oil by barges at anchor. Discharge of fuel when ship anchored to buoys by means of submarine lines.
FRESH WATER: Two barges to supply fresh water to ships, one of 40 tonnes and one of 25 tonnes. Fresh water available at Pier No. 1.
FUEL: Available by tanker lorries if special arrangements are made.
GANGWAY/DECK WATCHMEN: Watchmen are necessary.
OPENING/CLOSING HATCHES: This job is carried out by stevedores.
CUSTOMS ALLOWANCES: Tobacco: 10 packets per person per week. Wine and/or Spirits: With approval of Customs, within normal consumption.
CARGO GEAR: Vessel's derricks used, the quay has fixed crane for 50 tonnes and 3 mobile cranes for 15 tons.
IDENTIFICATION CARDS: Needed for both crew and passengers.
CONSULS: Only the Vice-Consul of Spain and Panama.
REPAIRS: Only minor repairs are possible.
DRY DOCKS: "Sima" have a 15,000 ton floating dock.
REPATRIATION: Facilities for crew changes and arranging any necessary repatriation.
AIRPORT: Port has airstrip, but it is only for national use, not for international flights.
TIME: GMT minus 5 hours, all year round.
HOLIDAYS: Cargo work can be arranged on holidays with an extra 100% charge over basic pay. The only exception is 1st May, on which cargo work cannot be arranged.
TELEPHONES: No arrangements for placing telephones on board. They are about 50 m. from ship.

SHORE LEAVE: Crew members allowed ashore.
REGULATIONS: Not allowed to use wireless when ship is in port. Nor allowed to put any boat on the water without permission of Capitania del Puerto. Not allowed to throw any waste or litter into bay. Not allowed to make unnecessary sound signals.
GENERAL: *Swell Period:* February/March and June/October.
DEVELOPMENTS: New quays to be built.
AUTHORITY: Capitan de Puerto – Direccion Capitania de Puerto Chimbote.

CONCHAN: 12.10 S. 77.00 W.

Tanker Buoy berth about 30 miles South of Callao.
DOCUMENTS: Tankers calling at Conchan must first call at Callao anchorage to be received and cleared by Authorities. Not necessary to call at Callao after discharge as clearance is simultaneous with reception.
PILOTAGE: Private Pilot boards vessel at Callao anchorage and either remains on board or returns to take vessel out, as required by Master.
BERTHING: Vessels moor to buoys. One submarine line of 16 in. reducing to 12 in. at vessel's connection, running 1,000 m. from shore opposite Conchan refinery.
LAUNCH: Launch service between Conchan and Callao or Conchan and Fish Pier at Barranco, southern suburb of Lima, during vessel's stay in port.
GENERAL: Two Customs police and two refinery employees board at Callao and remain on vessel during discharge.

ETEN: 06.56 S. 79.52 W. (Port closed)

Eten is about 348 miles North of Callao. The port is an unprotected open roastead. All cargo operations are undertaken by lighters. The main activities are the export of sugar and import of fertiliser and general cargo.
PILOTAGE: Not available.
ANCHORAGE: Vessel anchors about 0.5 miles off the Mole Head in 7 – 8 fathoms.
RADIO: *Arrival Notice:* 24 hours' Notice of Arrival should be sent to the Captain of the Port and the Agent.
TUGS: 4 tugs of 80 h.p. each.
LIGHTERS: 13 lighters with a total capacity of 635 tons.
BERTHING: There is a pier for handling barges.
CRANES: 3 steam cranes, 2 × 2 tons and 1 × 15 tons. 1 diesel crane of 3 tons capacity.
STEVEDORES: See "Pimentel".
FRESH WATER: Not available.
MEDICAL: There is a hospital at Chiclayo 15 km. from the port.
CONSULS: Vice-consul of the Netherlands.
GENERAL: *Swell Periods:* Eten being an unprotected open road port it frequently occurs that the port has to be closed due to heavy swell. The swell comes up suddenly and is not subject to any specific period, but it occurs more frequently during June/September and the Easter week.

GENERAL SAN MARTIN: 13.48 S. 76.17 W. (See Plan Book)

PISCO: 13.43 S. 76.14 W.

PILOTAGE: Compulsory.
RADIO: *Arrival Advice:* 24 hours' Notice of Arrival should be sent to the Captain of the Port and the Agent.
Also see "Callao" – Radio Officer's Report.
TUGS: 16 tugs available. 10 h.p. – 800 h.p.
BERTHING: 1 quay with 4 berths each 175 m. in length. Max. draft 32 ft. (25,000 tons). Cargo is loaded by portable conveyor belts.
LIGHTERS: 28 wooden lighters for general cargo, total capacity 1,800 tons. 5 steel lighters (not immediately available), total capacity 600 tons. 3 lighters for liquid cargoes, total capacity 500 tons.
CRANES: 1×13.61 tons, 1×22.68 tons and 1×6.25 tons capacity.
STEVEDORES: *Working Hours:* 0800 – 1200 hrs., 1300 – 1700 hrs., 1800 – 2400 hrs., 0100 – 0700 hrs.
109 stevedores available.
MEDICAL: There is a hospital available.
TANKERS: *Submarine Pipe-line:* The pipe-line belongs to Petroperu. Position Lat. 13° 36′ 20″ S., Long. 76° 15′ 54″ W. Length of pipe-line 700 m., diameter 8 in. Pilotage is compulsory. Depth of water 7.5 fathoms. Pumping rate 70-75 t.p.h.
FRESH WATER: Available.
FUEL: Not available.

HUACHO: 11.07 S. 77.37 W.

Huacho is an unprotected open roadstead about 69 miles North of Callao. The main activity is the loading of fishmeal and minerals and discharging of fertilisers.
PILOTAGE: Not available.
ANCHORAGE: Vessels anchor in open roads.
RADIO: *Arrival Advice:* 24 hours' Notice of Arrival should be sent to the Captain of the Port and the Agent.
TUGS: 4 tugs available, 1 each at 50, 60, 72 and 180 h.p.
LIGHTERS: 29 lighters, total capacity 1,450 tons.
BERTHING: There is a pier for mooring barges, length 223 m.
CRANES: 3×13.60 tons each.
STEVEDORES: See "Pimentel" for working hours and overtime rates.
4 gangs of 9 men each available.
MEDICAL: Assistance available.
FRESH WATER: Not available.
FUEL: Not available.
GENERAL: *Swell Period:* Frequently during the Winter months (May-September).

HUARMEY: 10.06 S. 78.10 W.

Huarmey is an unprotected open roadstead for the loading of fishmeal.
PILOTAGE: Not available.
ANCHORAGE: Vessels anchor in the open roads.
RADIO: *Arrival Notice:* 24 hours' Notice of Arrival should be sent to the Captain of the Port and Agent.
TUGS: 4 tugs available, 2×145 h.p. and 1 each at 120 h.p. and 165 h.p.
LIGHTERS: 18 at 50 tons each.
CRANES: 1 of 2 tons capacity and 1 mobile crane.
STEVEDORES: See "Pimentel" for working hours and overtime rates.
3 gangs of 9 men each available.
MEDICAL: Assistance available.
FRESH WATER: Not available.
FUEL: Not available.
GENERAL: *Swell Period:* June to August.

ILO: 17.39 S. 71.21 W. (See Plan Book)

DOCUMENTS:
6 Entry Declarations.
4 Passenger Lists (disembarking).
4 Passenger Lists (in transit).
3 Personal Effects Lists.
3 Stores Lists.
1 Maritime Health Declaration.
3 Sets Cargo Manifest.
10 Cargo Manifest.
Also see "General" before first port.
PILOTAGE: No pilot station; there is a Pilot in the Capitania del Puerto, who should be notified in advance by Agents. Two hours' notice of ETA required. Pilot boards at anchorage 800 m. from extension of the SPCC quay.
ANCHORAGES: 400 m. to the North of the end of the SPCC quay, in 15 fathoms depth.
MAX. SIZE: See "Berthing".
HEALTH: Pratique given by Captain of the Port. In cases of suspected illness a doctor should be requested in advance. When the ship arrives from another Peruvian port Free Pratique is automatic.
RADIO: Cables connect with National Communications network. ETA sent to Port Authority and to Agencies.
TUGS: 1×690 h.p. tug available.
BERTHING: Berthing anytime. There are two piers, one belonging to Southern Peru Copper Corp. and one to ENAPU.
SPCC: Two vessels are able to berth alongside. Length of pier 520 ft., width 60 ft. Depth alongside varies from 35 ft. to 50 ft.
ENAPU: Length of pier 300 m., width 27 m. Depth alongside varies from 18 ft. to 60 ft. Vessels able to berth both sides. South side depth 18 ft. at inner end, 54 ft. at outer end. North side depth 24 ft. inner end, 60 ft. outer end.
STEVEDORES: Stevedores come under the Capitania del Puerto and are ordered by Agents.
Loading Rates: Copper sheets loaded 65 metric t.p.h. Fish-flour loaded at 100 metric t.p.h. in an 8-hour shift.
Working Hours: 0700 – 1200, 1300 – 1600, 1700 – 2400, 0100 – 0700 hrs. Ten gangs available of nine men each.
MEDICAL: Medical assistance ordered by Agents. Hospital "El Centro de la Salud", and the Saint Geronimo Hospital.
TANKERS: *Ilo:* Discharge line diameter 10 in., 2 lines, connection to the ship's manifold 8 in. Connection and flexible line working pressure 100 lb. A buoy mooring berth.
Depth of water 40 ft. pumping rate 80-90 t.p.h. Vessels of Petroperu have preference.
Punta Tablones: Discharge line diameter 12 in., connection to the ship manifold 8 in. Flexible connection line, working pressure 100 lb. or 400 b.p.h. A buoy mooring berth.
Max. length 750 ft. Depth of water 40 ft.
DENSITY: Salt water.
FRESH WATER: Available.
FUEL: None available.

GANGWAY/DECK WATCHMEN: Watchmen provided by Agents when necessary.
OPENING/CLOSING HATCHES: Strictly forbidden for the crew; must be done by stevedores.
CERTIFICATES: When the ship comes from foreign port it is compulsory to produce Certificate of Gross Tonnage.
CUSTOMS ALLOWANCES: Tobacco: 10 packets per person. Wine and/or Spirits: Sufficient for meal times. Normal crew consumption only.
IDENTIFICATION CARDS: Agents arrange for cards to be signed by Port Authority for each crew member.
CONSULS: None.
REPAIRS: Some minor repairs.
REPATRIATION: There are facilities for effecting crew changes and arranging any necessary repatriation. Those who are going to be repatriated must have a permit from the Port Authority to be allowed ashore.
AIRPORT: Ilo Airport, 8 km. Scheduled flights twice a week on Tuesdays and Saturdays. Regular airport in Tacna, 1.5 hours by taxi, scheduled flights twice daily to Lima.
TIME: GMT minus 5 hours. No alterations during the year.
HOLIDAYS: 1st January (New Year); Maundy Thursday and Good Friday; 1st May (Labour Day); 29th June (Saint Peter and Saint Paul); 28th and 29th July (Motherland Days); 30th August (Saint Rosa of Lima); 1st November (All Saints Day); 8th December (Our Lady); 25th December (Christmas).

Holidays which are not in the Calendar but are considered Holidays with reference to payments to the workers: 6th January (King's Day); 19th March (Saint Joseph); Corpus Christi (varies every year); The evening of the 24th June (India man day); 30th July (Motherland Day); 15th August (Feast of the Assumption); 24th September (Las Mercedes); 12th October (Race Day); 27th November (Tarapaca Battle); 9th December (Ayacucho Battle).
POLICE/AMBULANCE/FIRE: Southern Peru Copper Corporation operate fire service. Police, Tel: No. 3; Ambulance, Tel: No. 3.
TELEPHONES: No arrangements for placing telephones on board.
SHORE LEAVE: Crew members allowed ashore and identify themselves with cards signed by Capitania del Puerto given through ship's Agents.
GENERAL: Tank cleaning and well cleaning must be done 5 miles leeward of port. Not allowed to unload explosive cargo.
DELAYS: Only delays when quay is occupied by two ships. In the load/unload operations the port can attend to 4 ships simultaneously and 4 more when new quay (now being built) is completed.
DEVELOPMENTS: Terminal quay of 900 ft. long is now being built.
AUTHORITY: Capitan del Puerto, who is a Navy Officer.

LA PAMPILLA: 11.55 S. 77.09 W.

Tanker Buoy Berth about 30 miles North of Callao.
DOCUMENTS, ETC.: As for Callao.

Tankers calling at La Pampilla must first call at Callao Anchorage to be received and cleared by Authorities. Not necessary to call Callao after discharge as clearance simultaneous with reception.
PILOTAGE: Pilot boards vessel at Callao anchorage and either remains on board or returns by launch to take vessel out, as required by Master.
BERTHING: Vessels moor to buoys. 1 submarine line of 18 in. reduced to 10 in. at vessel's connection running 1,500 m. from shore opposite La Pampilla refinery. Max. size 200,000 d.w.t. or 250,000 d.w.t. with part load.
LAUNCH: Launch service between La Pampilla and Callao during vessel's stay in berth.
GENERAL: 2 Customs police and 2 refinery employees board at Callao and remain in vessel during discharge.

MATARANI: 17.00 S. 72.07 W. (See Plan Book)

Matarani is a berth port. Main activity: loading of minerals, wool, coffee, skins, tin-ingots, discharging general cargo. Matarani is an important transhipment port for cargo to and from Bolivia.
PILOTAGE: Compulsory.
RADIO: *Arrival Advice:* 24 hours' Notice of Arrival should be sent to the Captain of the Port and the Agent through Radio Station in Naval Station, frequencies as per Callao.
TUGS: 1×780 h.p., 1×690 h.p. and 1×800 h.p.
BERTHING: 1 quay with 4 berths. Length 540 m., width 20.15 m. Vessels of 570 ft. length can berth. Depth alongside 30 ft.

Berth 1A, 1B and 1C each 150 m. length. Berth 1D length presently 90.50 m., but being lengthened to 132.9 m. length.
CRANES: 5×10 tons, 4×6.25 tons and 1×20 tons lifting capacity.
MEDICAL: A hospital is available.
STEVEDORES: *Working Hours:* 0800–1200, 1300–1700, 1700–2400, 0000–0600 hrs.

9 gangs available of 15 men each.
FRESH WATER: Available.
FUEL: Not available.
GENERAL: *Swell Period:* From June to August.
DEVELOPMENTS: A Ro/Ro berth is under construction at the Southern end of Muelle de Atraque. Completion expected 1984.

PACASMAYO: 07.24 S. 79.35 W.

DOCUMENTS:
3 copies Voyage Log Extract.
2 originals and 5 copies of Entry/Exit Declaration, endorsed by Consul.
8 copies of Passenger Lists for the Port.
8 copies of Transit Passenger List.
4 copies of Store List.
4 copies of Personal Belongings Manifest.
13 copies of Cargo Manifest.
1 Maritime Health Declaration.
2 Crew Lists.
1 Vaccination List.
When this is the first Peruvian port, Gross Tonnage Certificates.
When having cargo for the port, Statement of Cargo, endorsed by Consul.
When Pacasmayo is the first or last port called, Lists or Manifests of cargo in transit (2 copies each).
Also see "General" before first port.

PILOTAGE: The port has no Pilots because it is an open bay.
ANCHORAGE: To the South of an East-West line from the quay, as there are obstacles to the North.
APPROACHES: Reference points are the lighthouse of Cruz Punta Pacasmayo with a range of 12 miles, and during the day the cylindrical tower of cement factory with a height of 50 m. situated in the S.E. of the bay. On the head of the quay there is also a small iron tower of 9 m. height with a permanent red light of 2 miles visibility. The quay is very old and only flat boats can moor.
MAX. SIZE: Wide anchorage without problems concerning length or breadth. Recommended draft 4 fathoms, but it is possible to find 6, 8 or 10 fathoms towards the West. Current from South to North at an average of 6 knots.
HEALTH: Sanitary control is carried out by the health doctor who comes on board with port officials. Normally, Masters notify any suspected illness or any other information by telegraph.
TUGS: They only bring in or take out flat bottomed barges to the vessel once the vessel is anchored.
BERTHING: Vessels anchor in open bay. There is an Iron Quay for the use of barges, length 533 m., width 10 m., depth at West end 3 m.
LIGHTERS: 9 lighters with a total capacity of 400 tons.
CRANES: 1×1 tons, 2×3 tons.
STEVEDORES: Agents order the number of gangs required. These gangs work at a tariff hour/ton and the amount is controlled by the Port Captain. The number of gangs (9 men each) depends on loading/discharging speed required and on the number of holds and winches available. For overtime rates see "Pimentel".
MEDICAL: Can be provided by Centro Preventivo del Area de Salud or by Hospital Regional de Chepen, 35 km. from port (150 beds).
DENSITY: Salt water.
FRESH WATER: Not available.
FUEL: Not available.
OPENING/CLOSING HATCHES: Carried out by the stevedores.
SHIP CERTIFICATES: Derat or Fumigation Certificate; Vaccination Certificate for Crew and Passengers; Tonnage Certificate when coming from abroad.
CUSTOMS ALLOWANCES: Only tobacco, wines, spirits required for normal consumption, which must be included in vessel's stores list.
CARGO GEAR: Ship's gear used.
IDENTIFICATION CARDS: Not required unless leaving the vessel.
CONSULS: There are no Consuls in the port.
REPAIRS: There is a small workshop in the port for minor repairs such as soldering, etc. There is no foundry.
DRY DOCKS: Nearest at Callao.
REPATRIATION: Members of crew and passengers can be repatriated subject to Port Authorities' permission and passport control.
AIRPORT: There is a small emergency airport 2 km. from the port where planes can land.
TIME: GMT minus 5 hours.
HOLIDAYS: Holidays have been restricted. The national official holidays are: 27th and 28th July (National Independence Days); 1st January (New Year); 25th December (Religious Fete); Maundy Thursday and Good Friday; variable days and 1st May (Workers' Day).
POLICE/AMBULANCE/FIRE: Police 2126; Ambulance 2225; Fire 2081.
TELEPHONES: It is not possible to install telephones on board. Communication by walkie-talkie radio.
GENERAL: Fresh and dry provisions can be supplied, such as meat, poultry, vegetables and fruits.
SERVICES: There is no tank-cleaning equipment and the discharge of tank washing and any other kind of garbage is forbidden, for the bay is a bathing area.
SHORE LEAVE: Allowed.
DELAYS: The vessel is anchored on arrival. Delays can occur due to heavy sea or rain in case of cement loading.
DEVELOPMENTS: When the mines of Micchiquillay (copper) start working, the loading capacity of the port has to be 100,000 tons per month. Consequently it is planned to build a quay for minerals or otherwise a floating island 6 miles from the port for loading raw materials by pipe-lines.
AUTHORITY: Captain of the Port.

PAITA: 05.05 S. 81.07 W. **(See Plan Book)**

DOCUMENTS:

5 Copies Peruvian "Declaracion de Entrada".
13 Crew Lists.
5 Cargo Manifests, from each port where cargo loaded, or negative.
5 Copies of each Bill of Lading.
3 Personal Effects Lists.
13 Stores Lists.
1 Tonnage Certificate from first and last port.
1 International Maritime Health Certificate.
13 Passenger Lists, disembarking, or negative.
13 Passenger Lists, in transit, or negative.
1 Clearance from last port.
1 Sealed envelope from Peruvian Consulate addressed to Customs.
(Documents should be visaed by Peruvian Consulate.)

Also see "General" before first port.

PILOTAGE: Compulsory. There are two Pilots, on 24 hour service. Arranged by Agent. The boat is an old disembarking launch, hoisting blue flag with a white "P" Pilot will board after Free Pratique has been granted by Port Captain and Health Authorities.

ANCHORAGE: Recommended in Lat. 5° 04′ S., Long. 81° 07′ W.

RESTRICTIONS: Draft restricted to 31 ft. at low water.

MAX. SIZE: Length and breadth practically unlimited.

HEALTH: Agent will notify Health Authorities about the vessel's arrival.

RADIO: Recommended Balboa Radio.

Arrival Notice: 24 hours' Notice of Arrival should be sent to the Captain of the Port and Agent.

TUGS: 1 tug of 850 h.p., 1 tug 360 h.p. and one launch 60 h.p. used by the Pilot.

BERTHING: One finger pier, length 475 m. width 36 ft. Four berths available, depths are as follows:

No. 1A (North-West Berth)	32.0 ft.
1B (North-East Berth)	32.0 ft.
1C (South-West Berth)	23.8 ft.
1D (South-East Berth)	22.9 ft.

A safety margin of 3 ft. should be observed. It is advisable to request (from Pilot) Berths "B" or "D", if empty, due to the prevailing winds. The berths have good fenders.

Cranes with capacity of 25,000, 15,000 and 10,000 lbs. available.

STEVEDORES: Arranged by Agent at 24 hours' notice.

Working Hours: 0800 – 1200, 1300 – 1700, 1700 – 2400 and 0000 – 0700 hrs.

Night Work: Possible, as long as it is ordered in plenty of time.

10 gangs of 9 men each available per shift.

MEDICAL: There is a local hospital with all facilities.

TANKERS: There are 4 mooring buoys 0.25 m. East of the finger pier. Facility is the property of Petro-Peru. Oil loaded and discharged by submarine pipe-line.

DENSITY: 1030.

FRESH WATER: There are 3 drinking water hydrants on each side of the pier. Vessels require pumps to take on water from the storage tank (capacity 14 tons).

FUEL: Not available.

FIRE PRECAUTIONS: Port Authority fire equipment stationed at the end of the pier.

STORES: Fresh provisions available.

GANGWAY/DECK WATCHMEN: Available on request.

CERTIFICATES: Not requested.

CUSTOMS ALLOWANCES: Two cartons and one bottle per person.

CARGO GEAR: No additional requirements.

IDENTIFICATION CARDS: Not required.

CONSULS: Ecuador.

REPAIRS: No facilities.

REPATRIATION: Allowed on request to the Port Captain.

AIRPORT: Piura, airport 55 km. with domestic flights to Lima International Airport.

HOLIDAYS: 1st May only.

GENERAL: Painting and chipping ship's side restricted. Very strict concerning rat-guards, disposal of garbage, etc.

AUTHORITY: Captain del Puerto.

PIMENTEL: 06.50 S. 79.56 W. **(See Plan Book)**

Pimentel is an unprotected open road port, loading/discharging only from/into lighters. Clearance is possible day and night, including Sunday and holidays, but of course with overtime additional. Main activity: Sugar export, import of fertilisers and general cargo.

PILOTAGE: Not available.

ANCHORAGES: Vessels usually anchor about 1.5 miles off the Pier Head in 7 – 8 fathoms.

RADIO: *Arrival Notice:* 24 hours' Notice of Arrival should be sent to the Captain of the Port and the Agent.

TUGS: 2 at 82 h.p., 2 at 120 h.p. and 2 at 134 h.p.

LIGHTERS: 15 lighters with a total capacity of 1,170 tons.

CRANES: On the mole there are 3 diesel cranes each 3 ton capacity, 3 steam cranes with 4, 6 and 15 ton capacity. Maximum dimensions of cargo handled 27 ft. (length)×15 ft. (wide)×21 ft. (height).

STEVEDORES: *Working Hours:* 0700 – 1100 and 1300 – 1700 hrs. Overtime (plus 100%) 1100 – 1300 and 1700 – 2400 hrs. Overtime (plus 200%) 0000 – 0700 hrs.

On Sundays and holidays an additional 100% to the above-mentioned tariffs.

MEDICAL: There is a hospital at Chiclayo 15 km. from the port.

TANKERS: *Submarine Pipe-line:* Diameter 8 in. max. draft 18 ft. 1 pipe-line for clean products and 1 for dirty products. Length of pipe-line 1,770 m.

FRESH WATER: Not available.

FUEL: Not available.

CONSULS: Vice-consul of the Netherlands.

SURVEYOR: Mr. Manuel S. Reyes H., sub-agent of Lloyd's of London.

GENERAL: *Swell Periods:* Pimentel being an unprotected open road port it frequently occurs that the port has to be closed due to heavy swell. The swell comes up suddenly and is not subject to any specific period, but it occurs more frequently during June-September and the Easter week.

PUERTO CHICAMA: 07.42 S. 79.26 W.

Puerto Chicama is about 295 miles North of Callao. Fishmeal is loaded from lighters in an open roadstead.

PILOTAGE: Not available.

ANCHORAGE: Vessels anchor about one mile from the Mole.

RADIO: *Arrival Advice:* Advise general Agents in Lima who will telephone Port Agents.

TUGS: 3 tugs available, 1 of 65 tons and 2 of 80 tons each.

BERTHING: 1 Pier, length 324 m.

LIGHTERS: 20 lighters with a total capacity of 1,000 tons.

CRANES: 4 cranes, 2 of 2 tons, 1 of 4 tons and 1 of 6 tons.

STEVEDORES: Working hours are from 0700-2400 hrs. These hours may be exceeded to complete loading. Five gangs of 9 men are available.

FRESH WATER: Not available.

FUEL: Not available.

GENERAL: *Swell Period:* During the months of June, July and August.

SALAVERRY: 08.13 S. 78.59 W. **(See Plan Book)**

DOCUMENTS: See "Callao".

PILOTAGE: Compulsory.

RESTRICTIONS: Harbour entrance is sand and liable to silting. Advisable to check draft requirements in advance, as depths are subject to latest dredging. Designed depths: Entrance channel 11.0 m. Basin 10.0 m. Berths 11.0 m.

MAX. SIZE: Approx. 25,000 d.w.t. with up to 29 ft. draft. Draft varies greatly and quickly due to heavy constant sanding, although dredging is practically continuous.

HEALTH: Cable Agent requesting Free Pratique. Agent must be notified in advance if disease suspected on board.

RADIO: *Arrival Advice:* 24 hours' Notice of Arrival should be sent to the Captain of the Port and the Agent.

TUGS: 4 tugs available, 1 each at 690 h.p., 190 h.p., 85 h.p. and 40 h.p.

BERTHING: *No. 1 Pier:* Length 225 m. Vessels able to berth both sides. Max. draft 28 ft. There are pipes installed for the discharge of liquids and loading of molasses and alcohol.

No. 2 Pier: Length 230 m. Vessels able to berth both sides. Max. draft 28 ft. This pier is specially for the loading of sugar in bulk, 2 loading bridges available, loading rate 300 metric t.p.h. each.

STEVEDORES: *Working hours:* 0700 – 2300 hrs. Sugar and molasses in bulk loaded 24 hours a day. 10 gangs available of 9 men each.

CRANES: 1×22.68 tons, 1×13 tons, 2×6.25 tons and 1×4.5 tons.

MEDICAL: At Trujillo, 15 km. from the port.

TANKERS: *Submarine Pipe-line:* Length 700 m., diameter of 10 in., depth 26 ft.

FRESH WATER: Available. Capacity of shore tank 800 tons.

FUEL: Not available.

REPAIRS: Workshops available.

GANGWAY/DECK WATCHMEN: Recommended.

CUSTOMS ALLOWANCES: Any amount held over normal consumption may result in Customs search being imposed.

IDENTIFICATION CARDS: Supplied by Agent and stamped by Immigration. Required for all crew members.

HOLIDAYS: Only 1st May when work is not available.

CONSULS: Nearest at Callao/Lima.

GENERAL: Due to constant swell and undertow which, during Winter months, May/September, may even close port, it is recommended vessel moor with greatest possible number of synthetic lines which must be constantly adjusted, otherwise usual line breakage will increase.

SAN NICOLAS: 15.14 S. 75.14 W. **(See Plan Book)**

LOCATION: The port of San Nicolas Bay is located between the parallels of 15° 09′ 30″ S. and 15° 14′ 30″ S.

The harbour and its approach were surveyed in 1962 by the Peruvian Navy Hydrographic Service and the following charts were published in 1965: Chart 2218 shows the San Juan and the San Nicolas Bay, Chart 2220 shows the Southern part and the pier area of San Juan Bay. Chart 2231 shows the Southern part and the pier area of San Nicolas Bay.

A vessel is considered to be an "arrived vessel" when, after entering San Nicolas Bay, she has arrived at pilot station (1 mile North of Pier Head).

DOCUMENTS: The following documents are required for presentation to Port Authorities on arrival and departure:

On Arrival:

Type of Documents	Total	Port Capt.	Customs	Immigration	Agent
Clearance from previous port.	1	1	—	—	—
Health Declaration (Declaracion Maritima de Sanidad). World Health Organisation Form. Reglamento No. 2 Anexo 5. (Master may prepare this upon arrival on form furnished by Agent if none available on board).	2	1	—	—	1
General Declaration Form No. 1 (Declaracion General). Instructions on reverse side of form to be provided by Agent.	5	1	2	—	2
Cargo Manifest (Sobordos) Form No. 2, for San Nicolas.	4	1	2	—	1
Cargo Manifest in Transit. (If there is any cargo on board).	3	1	1	—	1
Crew List Form No. 3. Instructions on reverse side of form.	5	1	2	1	1
Passenger List Form No. 4. To San Nicolas from all ports of call or statement that there are no passengers for San Nicolas.	5	1	2	1	1
Passengers Baggage Declaration. If there is any (itemised list).	4	1	2	—	1
Ship's Store Declaration (Store List/Bazaar List) Form No. 5, including itemised list of slopchest. It is most important that exact quantities of all stores be shown. Vessels at time of reception by Customs Officer will have physical check made, all quantities found in excess of those listed will be confiscated and vessel fined.	5	1	2	—	2
Crew's Personal Effects Declaration. It is most important that all cigarettes, tobacco, wine, spirits, radio sets, binoculars, cameras and all new articles in possession of Officers and crew be shown in this declaration.	4	1	2	—	1
Postage Manifest.	2	1	—	—	1
*P&I Certificate (copy).	1	1	—	—	—
*Hull Insurance Certificate (copy).	1	1	—	—	—

**Note:* If vessel does not have on board, Owners have to telex, giving name and number of companies covering them to prevent fines.

On Departure:

Type of Documents	Total	Port Capt.	Customs	Immigration	Agent
Health Declaration (Declaracion Maritima de Sanidad). World Health Organisation Form, Reglamento No. 2, Anexo 5. (Master may prepare this upon arrival on form furnished by Agent if none available on board).	1	1	—	—	—

Crew's Personal Effects Declaration. It is most important that all cigarrettes, tobacco, wine, spirits, radio sets, binoculars, cameras and all new articles in possession of Officers and crew be shown in this declaration.	1	1	—	—	—
Postage Manifest.	1	1	—	—	—

The above has been up-dated according to new Peruvian Government Regulations issued by Supreme Decree No. 011-83-MA dated July 18th, 1983.

The Master must be sure to get the corresponding clearance from the previous port, and to fill in the official forms provided by the Agency.

If the vessel has no forms on board, they will be filled in after arrival, and an extra set provided for the subsequent voyage.

Controls are very strict and any attempt to smuggle goods is heavily fined; the same applies to any contravention of port regulations, which are internationally known, such as anti-pollution measures, use of the radio whilst at anchor, disorderly conduct of crew members, etc.

Normally Masters can change foreign currency in the local banks. Any crew member or passenger going ashore with foreign currency should change his money in the bank. This is not now a strict regulation, as it was before. For security sake, however, it is better to change money in the bank or in the Agency Office. The Agency will help the Master with Peruvian cash advances, that he might require, or will direct crew members through proper channels to the local banks.

The following documents should be available for inspection:

Ship's Papers.

Valid Fumigation or Exemption Certificate.

Crew's Identity Documents.

International Vaccination Certificates of all persons aboard.

List with following data: Date and port of issue of Ship's Register, date and port of issue of Health Certificate, date of vessel's building and yard, list of ports of call with dates during previous four months.

PILOTAGE: Pilotage is compulsory for berthing. When approaching the pier, the docking speed should not be more than 50 cm. per second, or about 1 knot. No vessel may proceed to the pier until permission to berth has been granted. While loading, during periods of heavy swells and surge, a Pilot will be on board permanently. Masters are requested to make arrangements and facilities available.

Upon arrival in port, vessels must wait for Pilot. The starboard accommodation ladder must be rigged for Port Officials and Agency representatives. Ships approaching San Nicolas must fly their national, Peruvian, call letters and quarantine flags. If vessel is carrying any type of explosive material, she must fly "B" flag.

ARRIVAL ADVICE: All vessels proceeding to San Nicolas Port will telex to Empresa Minera del Hierro del Peru, Telex: 20005PE Hierrope; and Agentes Navieros San Nicolas, S.A., Telex: 21410PE Agnav; her ETA, 5 days, 48 hours and 24 hours prior to arrival.

When vessels are within or outside the 200 miles of jurisdictional Peruvian waters, they have to contact Paita (OBY2), Callao (OBC3), or Mollendo (OBF4) coastal stations, in order to transmit their messages; a Pre-Stowage Hatch List has to be transmitted to Agnav giving tonnage per hatch and loading sequence.

Berthing instructions and other messages from port Agent at San Nicolas will be transmitted by the above coastal stations.

The port Agency is Agentes Navieros San Nicolas, S.A., Telex: 21410PE. Any inquiry regarding berthing, loading, etc. will be answered promptly by the coastal stations above.

Changes in ETA should be transmitted as soon as possible.

Vessels can get in contact by VHF communication system (Channel 16) 4 hours before arrival at San Nicolas by calling Agnav.

Anything not related to vessels calling at San Nicolas or San Juan should be addressed to Head Office in Lima, Paseo de la Republica 3587, 8th Floor or P.O.Box 1229, Lima, Peru. Tel: 418314.

Also see "Radio".

BREAKWATER: A 2,653 ft. long breakwater has been built in order to reduce the effects of the swell alongside the pier. The breakwater is at the West side of the pier 875 yards off and does not run parallel to the pier, but at N. 36° 35′ 28″ E. angle. The North end of the breakwater is 1,430 ft. from the North end of the dolphin, but the perpendicular distance from the pier to the closest point of the breakwater is only 1,090 ft.

At the North end of the breakwater there is a light with the following characteristics: Fixed red light, visible 3 miles.

AIDS TO NAVIGATION:

(a) San Juan Lighthouse, located on Pt. San Juan, Lat. 15° 21′ 27.2″ S., Long. 75° 10′ 49.1″ W. Characteristics: 2 W.Fl. ev. 22.5 secs. light 0.4 secs. eclipse 3.6 secs. light 0.4 secs. eclipse 18.1 secs. Height of light above sea level 85.03 m. vis. 22 miles. Sector illuminated 360°. Type of building: Circular concrete tower, white.

(b) San Nicolas Lighthouse, located on Pt. San Nicolas in Lat. 15° 15′ 11.0″ S., Long. 75° 15′ 20.6″ W. Characteristics: 1 W.Fl. ev. 4 secs. Height of light above sea level 58.60 m. vis. 20 nautical miles. Sector illuminated 360°. Type of building: Square steel and plastic tower, painted 2 sides black and 2 sides white.

(c) Fixed red light, vis. 3 nautical miles, located on the head of the San Nicolas Pier.

(d) Around the dolphin which is North of the pier head, there are 9 red lights, 10 ft. above the water level and lower than the dolphin deck, visible only from 1 mile distance.

(e) There is a radio beacon located Lat. 15° 21′ 27″ S., Long. 75° 10′ 09″ W., transmitting on 395 kHz – 24 hours and signal letters SJN.

(f) In position Lat. 15° 14′ 36.5″ S., Long. 75° 14′ 08.5″ W. exists a luminous buoy with following characteristics: 1 white flash ev. 4 secs. light 0.4 secs. eclipse 3.6 secs. Sector illuminated 360° vis. 3 miles. Height 5 ft.

ANCHORAGES: The anchorage recommended for vessels waiting for berth is in inner portion of the bay, North of the parallel and East of meridian through San Nicolas Point in depths of 15 to 20 fathoms. When anchoring, it is essential to leave sufficient sea room, about 0.75 miles for ships to manoeuvre in and near the berth.

Wreck of M/S *Templar* lies in position: Lat. 15° 13′ 27″ S., Long. 75° 15′ 01″ W., or 341° from the pier head, distance 1.6 nautical miles. The obstruction lies in approximately 150 ft. of water. Clearance above the obstruction is 60 ft. Do not anchor in the vicinity of the wreck.

MAX. SIZE: The following are the maximum permissible vessel's characteristics to be accepted at the Hierro-Peru – San Nicolas Loading Pier:

LOA – 1050 ft.

Max. beam – For OBO's, or bulk carriers 53 m.
For ore carriers or O/O 161 ft. (49 m.)

Max. draft – 59 ft. (17.98 m.)

Max. airdraft – 40 ft. 3 in. (12.26 m.)

RADIO: Coast Radio Station "OAS" is located in port of San Juan and serves both San Juan and San Nicolas. This station listens on 500 kHz, 1200 – 2200 hrs. GMT each day. It handles traffic on 410, 425, 444, 448, 454, 468, and 480 kHz.

There is a new transmitter with the following frequencies schedule:

8,680 kHz – 1600 – 1630; 2000 – 2030 hrs. GMT

16,978 kHz – 1330 – 1400; 1630 – 1655; 2100 – 2200 hrs. GMT

TUGS: 2 small tugs available at 300 h.p. each

BERTHING: *Pier and Mooring Facilities:* The pier is located at the South side of the bay and is built in a North-South direction. It is constructed of pre-stressed concrete and steel pipe-lines with deck 1,000 ft. long and 50 ft. wide. The deck is 11 ft. 3 in. above MLW.

At the pier head, a 50 ft. diameter mooring dolphin has been constructed to make fast the stern lines of any vessel bigger than 900 ft. overall length. Distance from Northern end of pier to Northern end of dolphin 198 ft.

There are 3 big bollards, 2 pelican hooks and an electric winch to make fast the stern lines. There is also a connecting bridge from the pier to the dolphin, which is 148 ft. long.

There is a fendering system on both sides of the pier consisting of wood pilings and a continuous rail of laminated lumber and rubber cylinders which keep vessels 5 ft. from the concrete pier. On the West side of the pier (ore-loading side) there are 28 mooring cleats, 12 bollards and 3 double mooring bitts. At the centre of the pier-head there is one bollard. On the East side of the pier there are 23 cleats, 2 bollards and one double mooring bitt.

The depth of the loading berth at the West side of the pier is 18.9 m. alongside the pier and up 91.44 m. Westward from the pier fender, except in the place known as "anchor pocket" which is located between the pier-head and the dolphin. The anchor pocket is 70 ft. deep, 250 ft. long and 300 ft. wide. When docking the 2 anchors are let go in that pocket where enough water exists to prevent any collision of the ship with her own anchors when she is fully loaded.

The East side of the pier still has the original depth, which is 12.5 m. The bottom alongside is mud and sand. The ore ship loader has a pier straddle clearance height of 14 ft. and width of 12 ft. when the gantry is positioned inshore.

Berthing and Mooring: Vessels calling at San Nicolas for the discharging of general cargo must berth on the East side of the pier with the starboard side of the ship to the pier. Such vessels use their own regular mooring lines.

Ore vessels berth at the West side of the pier with the port side of the ship to the pier. Wires are not permitted as moorings to the pier except when attached to tension winches.

VERY IMPORTANT: While vessels are alongside the pier, engines must be ready for immediate use. Sufficient crew must be on deck at all times to tend mooring lines and heave in the slack as loading progresses. Failure to do so may result in a stoppage of loading and the vessel being moved out from the berth.

LOADING: Prior to commencement of loading the Master or Chief Officer will deliver to the port Agent a pre-stowage plan with the following information:

Total cargo required, calculated tonnage per hatch, sequence of loading, fuel on board, water and stores on board in long tons, and calculated draft and trim upon completion of loading.

Loading is generally carried out at a rate of about 4,000 long tons per hour.

Tonnage on board at any stage of the loading is available from the Loading Master, the Pilot on board, or at the scale house at the upper end of the pier. In order to avoid last minute delays, it is very important that a constant check be made of vessel's draft, ballast left to discharge and cargo on board during the entire loading. *Any change in tonnage of cargo required must be reported to the Port Agent or Loading Master not later than when there is approximately 2,000 long tons remaining for completion of loading, and always in writing.*

It is convenient to check drafts, ballast and tonnage of cargo on board each time the loading gantry shifts from one hatch to the next. While loading is actually in progress in a hatch, no loading interruptions are permitted except in case of emergency. At the termination of each pouring, a slip stating cargo loaded and draft readings, will be delivered to the Chief Officer.

In calculating the tonnage required to fully stow a hold, it should be remembered that cargo is spout trimmed only.

No trimmers/bulldozers are available at San Nicolas. Vessels will depart from the pier immediately upon completion of loading.

The Pilot will take the vessel out from the berth. If the Master wants to anchor in San Nicolas Bay prior to proceeding to sea, he must advise the Pilot who will in turn advise suitable anchorage. The Master will advise the Pilot of the estimated time of departure in order that this may be reported to the Port Authority.

Delays of port operations, as well as delays of other vessels waiting to berth, caused by a vessel which for any reason is not prepared and able to move from the pier when so ordered, *are chargeable to the vessel which causes the delay.*

Clearance papers, bills of lading, statement of facts and all necessary papers for clearance of the vessel will be delivered shortly after completion of loading. This can be accomplished while the vessel is being moved from the berth, or at anchor, but never alongside the pier when other vessels are waiting for loading turn.

CRANES: None.

MEDICAL: Medical attention may be arranged through the port Agent's office. No person will be attended unless he is provided with a letter from the Master authorising such treatment. All costs incurred will be for the vessel's account.

Send radio message advising how many people require medical attention in order to make proper appointments with doctors at San Juan Hospital. Otherwise the medical inspection will be very difficult.

STEVEDORES: *Working Hours:* 0800 – 1200, 1300 – 1700, 1800 – 2400, 0100 – 0700 hrs.

TANKERS: On the West and East side piers there are 3 raisers to which 3×8 in. diameter hoses can be connected to a main pipe-line of 16 in. diameter for the discharging of bunker C. Flanges are U.S. Standard (ASA). Location on the pier is for midship connection on vessels. Maximum pressure permissible is 125 p.s.i. and maximum temperature 135° F. The length of the 16 in. pipe-line from the manifold on the pier to the storage tanks is 4,840 ft. There are 3 storage tanks of 7,000 bbls., 67,000 bbls. and 252,000 bbls. Total capacity 326,000 bbls. The height of the tanks above MLW is 142 ft. to the bottom and 190 ft. to the top of the tanks. The intakes to the tanks are at the top.

Diesel oil is discharged in San Nicolas, only one diesel oil storage tank of 67,000 bbls.

There is a crew on the pier to sling the hoses; the vessel's crew is required to operate the winch, boom, hoist the hoses on board, and connect same to vessel's manifold.

BALLAST: Special attention is called to ballast requirements of vessels which do not need ballast in order to enter under the loading boom. Such vessels are required to carry sufficient ballast for safe handling during berthing. It is permissible to discharge clean ballast in the bay.

A ballast discharge rate of 4,000 long tons per hour is recommended. Any delay in loading operations due to slow deballasting, is not only on account of the vessel, but if any other vessel is waiting for loading turn, the vessel slowing down the loading process is liable to be undocked in order that the vessel waiting for turn to load may be docked. All time lost and expenses for undocking and redocking the vessel is for Owner's account.

FRESH WATER: Not available.

FUEL: Not available.

GANGWAY/DECK WATCHMEN: Recommended by crewmen to prevent stowaways.

OPENING/CLOSING HATCHES: Stevedores/crew.

CARGO GEAR: The loading boom extends 60 ft. from face of pier fender, and can be retracted from this position to a minimum length of 29 ft. Gantry with loading boom is mobile. Range of its mobility is 900 ft. starting at a point 110 ft. from the head of the pier. Shifting of vessels during loading is therefore not required. When not loading, the gantry is parked at the inner end of the pier, and its boom with the loading conveyor belt is raised in a vertical position. In the most vertical position the boom has a clearance of about 4 ft. inside the face of the dock fender.

After the gantry has been moved into loading position, the boom is lowered to horizontal position. Height from water level to underside of boom is 41 ft. Vessels must be ballasted so that height of any coaming or any other objects in the vicinity of the hatch where loading is to start will not exceed 40 ft. above waterline.

IDENTIFICATION CARDS: Required (Seaman's Book or Passport).

Also see "Shore Leave".

CONSULS: At Lima.

REPAIRS: Except in extreme emergency, ship repairs cannot be effected at this port.

TELEPHONES: Available, Masters are able to communicate with any port in the world.

REPATRIATION: In cases where crew changes are to take place in San Nicolas, at least 7 days' advance cable notice is required to obtain the necessary Immigration Authorities' permission. The advance cable must set forth name, nationality and passport number. If the above is not complied with, crew changes cannot be carried out. The above applies also to passengers.

GENERAL: It is forbidden to throw out garbage, debris or any kind of dirty ballast in the Bay.

It is forbidden to hunt seabirds; to throw out explosive material or to use any pyrotechnic object on board.

Vessels can do underwater work only with Port Captain's permission.

Reception: Official hours for Port Officials are from 0700 to 1100 and 1300 to 1800 hrs. Monday to Friday. Upon request, Port Officials will board vessels at any time day or night, Sundays and holidays included. Office hours for loading operations are from 0800 to 1600 hrs. Monday to Saturday.

Emergency Signals: A number of short blasts on the whistle indicates an emergency. The whistle will not be used except for emergency in accordance with Peruvian regulations.

Provisions: Provisions are available from a local ship chandler. Cable address: Pronamar Sannicolas. Cold, chilled and dry stores available upon arrival. Mailing address: Pronamar y Cia., S.A. c/o. Empresa Minera del Hierro del Peru. Apartado 1229, Lima, Peru. Neither Agnav or Hierro Peru has any interest in this independent company.

Stowaways: Unauthorised persons should not be allowed on board the vessel. Cases of attempted stowaways have occurred. Masters must take all necessary care and precautions to insure against unauthorised personnel being on board while in port.

Stowaways aboard on arrival should be reported to the Port Captain in order that the necessary steps be taken to prevent their unauthorised landing. It should be noted that all costs for the repatriation of stowaways is for account of the vessel concerned.

Crew Members Left Ashore at Time of Departure: Masters are requested to have all vouchers and lists of personal effects (in triplicate) prepared for delivery to port Agent as soon as possible covering deserters and hospitalised crew members.

A letter of authorisation is required when the port Agent is expected to provide hotel accommodation, meals, medical attention, transportation, travel expense, and/or cash advanced for account of vessel.

No man may be paid off from a foreign vessel without prior permission from the Port Captain. Under Peruvian Law, Agents are responsible for repatriation of all foreign seamen left in Peru. Masters will be requested to sign letter of indemnity covering seamen landed for hospitalisation, paid off, or desertion. Disembarking of crew or passengers for reasons other than emergency is not permitted at this port, unless the prior authorisation of Peruvian Immigration and Maritime Authorities is granted to that effect. Authorisation for disembarkation requires at least 7 days' prior notification by radio. The notification must provide names, passport number, age and nationality of persons to be embarked or disembarked.

WEATHER: There is generally a prevailing S.E. wind which may vary from a light breeze to a strong wind. The months of May, June, July, August and September are Winter months. Swell and surge are occasionally experienced in the port.

SHORE LEAVE: Shore leave may be granted at the Master's discretion. All crew members must be issued ship's passes before proceeding ashore. These must be shown to the Immigration Authorities when required. Peruvian laws and Immigration Regulations must be strictly adhered to in order to avoid unnecessary difficulties. Crew members are not permitted to travel 100 km. outside of San Nicolas – San Juan port areas without written authorisation or pass from the Master approved by Immigration Authorities.

CONDITION OF CARGO HOLDS: Cargo holds must be properly cleaned. In this respect, special care must be taken when vessel, prior to her arrival at San Nicolas, has carried the following cargoes: Gypsum, phosphate, pyrite, coal, sulphur, silica, aluminium, sand gravel or quartz, or any other ore containing arsenic, phosphorous, silica, aluminium or copper.

Prior to commencement of loading, cargo holds will be inspected by a Representative of the Shippers. Chief Officer has to accompany the Surveyor during the inspection.

MAIL: All mail received for holding by the port Agent, will be delivered to the vessel upon arrival. For quickest delivery, mail should be addressed as follows: c/o Agentes Navieros San Nicolas, S.A., Apartado 1229, Lima, Peru.

Officers or crew members should be advised that duties will be charged by the Peruvian Customs Authorities on contents of parcels mailed to them at Peruvian ports. Outgoing ship and crew mail will be accepted ONLY directly from the Master or his designated Officer. The vessel will be billed the corresponding amounts for postage.

AGENT: Agentes Navieros San Nicolas, S.A., P.O. Box 1229, Lima. Tel: 410636. Telex: 20005PE Hierrope. Cables: Agnav Sannicolas.

SUPE: 10.48 S. 77.45 W.

Supe is about 84 miles North of Callao. Cargo operations are undertaken in an open unprotected roadstead. The main activities at the port are the loading of fishmeal and discharging of fertilisers, cellulose and chemical products.

PILOTAGE: Not available.

ANCHORAGE: Vessels anchor in the open roads.

RADIO: *Arrival Advice:* 24 hours' Notice of Arrival should be sent to the Captain of the Port and the Agent.

TUGS: 8 tugs available, 1 of 65 h.p., 2 of 85 h.p., 4 of 134 h.p., and 1 of 165 h.p.

BERTHING: There is a pier for mooring barges, length 331.5 m.

LIGHTERS: 32 (14 of wood and 18 of steel) for dry cargo only. The capacity of the lighters varies from 50 to 100 tons. Total capacity being 2,100 tons.

CRANES: 3×9 tons and 1×11 tons.

STEVEDORES: See "Pimentel" for working hours and overtime rates. 5 gangs of 9 men available.

MEDICAL: There is a hospital at Barranca.

TANKERS: *Submarine Pipe-line:* One line 10 in. diameter for dirty products and one line 8 in. diameter for clean products. Depth of water 48 ft. At Paramonga there is a 10 in. line, depth 36 ft.

FRESH WATER: Not available.

FUEL: Not available.

GENERAL: *Swell Period:* June/August.

TALARA: 04.35 S. 81.17 W.

DOCUMENTS, and all general information, refer to "Callao".

PILOTAGE: Compulsory. In the vicinity of Talara there are several off-shore oil drilling platforms and near the entrance to the port there is a shallow of 24 ft.

ANCHORAGES:

Summer	Lat. 04° 34′ 09″ S.,	Long. 81° 17′ 36″ W.	9.25 Fathoms
Winter	Lat. 04° 34′ 12″ S.,	Long. 81° 17′ 29″ W.	10 Fathoms
3rd Position	Lat. 04° 34′ 03″ S.,	Long. 81° 17′ 42″ W.	6 – 10 Fathoms

RADIO: Arrival Notice should be sent at least 24 hours before arrival to Captain of the Port and Agent via the government radio station OAH. Station on 500 kHz from 0800 to 2400 hrs.

TUGS: 1×13.5 h.p.

BERTHING: At Talara there are 2 berths for loading fuel and water; 1 is a regular quay, the other a petroleum berth in which vessels lie, moored to dolphins alongside hose platform.

Quay length 385 ft., depth alongside 18 ft. to 34 ft.

Petroleum berth, length 585 ft., depth alongside 34 ft.

Talara is mainly a bunkering port as it is the main port for the Northern Peru Oilfields. The little general cargo discharged is done at the quay; bunkering being done at the quay and at the dolphin berths.

Larger vessels load/discharge into lighters at anchorage. Seven lighters are available, total capacity 1,400 tons.

CRANES: 3×5 tons, 1×31 tons and 1×22.5 tons.

TANKERS: See "Berthing".

Submarine Pipe-lines: 12 in. diameter. Vessels with a max. draft of 36 ft. can moor to the pipe-line.

STEVEDORES: It is possible to work 24 hours a day with interruptions at meal hours. 3 gangs of 16 men each available. Overtime only charged for Sundays and holidays at 50%.

FRESH WATER: Available alongside berths.

FUEL: Available alongside berths. Bunker "C" 3,500 seconds, Petroperu No. 5 (Intermediate 4) 400 seconds, Diesel 2 (marine diesel).

MEDICAL: A private clinic is available.

CONSULS: Panama and Nicaragua.

REPAIRS: Minor repair facilities.

GENERAL: Smoking is prohibited on deck, at the piers and near the refinery installation.

NOTES

Please also advise Shipping Guides Ltd.

Philippines

GENERAL

DOCUMENTS: *To be submitted in all Government & Private ports:*
1 copy of Quarantine Pratique.
6 copies of the Inward Cargo Manifest for all cargoes to be discharged in the Port.
2 copies of Cargo Storage Plan or Hatch List.
3 copies of Store List.
3 copies of Passenger List.
4 copies of the Crew List.
4 copies of the Crew Declaration List.
3 copies of Bonded Store List.
3 copies of Firearms and Ammunition Inventories.
3 copies of List of Drugs and Narcotics.

Original copies of all through cargo manifest destined to other ports to be deposited with the Customs Inspector on board and to be returned to the Master prior to the departure of the vessel.

Clearance from the last port.

SHORE LEAVE: Nationals of countries with whom the Philippines maintains diplomatic relations are allowed ashore after securing a pass from the Immigration Officer in the Port.

REGULATIONS: We quote below pertinent sections of PPA Administrative Order No. 13–77 regarding PPA General Port Regulations on Arrivals/Departures of Vessels and Berthing Regulations:

Article II – Arrivals and Departures

Section 4. *Notice of Arrival* – The Owner or Agent of every vessel other than a vessel of 100 g.r.t. or less, intending to call at a port shall, within the time specified in Section 29 of these Regulations, prior to the ETA, give notice in writing to the Authority of its arrival, and make application for a berth if it is intended to berth at the wharf, pier, or anchorage within the Port, Port District or harbour limits.

Section 5. *Particulars to be furnished* – The notice of arrival and the Application for a Berth shall be a form prescribed by the Authority and shall contain full particulars regarding:
(a) Name of vessel and its flag.
(b) The Gross Registered Tonnage (g.r.t.) and Nett Registered Tonnage (n.r.t.).
(c) Draft, LOA, and beam.
(d) Names of the Owner, Master, ship's Agent in the port of call.
(e) ETA and ETD of vessel.
(f) Tonnage of cargo to be discharged and loaded.
(g) Dangerous Cargo (Whether to be discharged or not).
(h) Number of passengers, disembarking and embarking.
(i) Any other pertinent information relating to the working (e.g. heavy lifts) or safety of the vessel in the port.

Section 6. *Hoisting of National Colours* – The Master of every vessel entering or leaving a port between sunrise and sunset shall cause to be hoisted its national colours and signal letters, if any. The national colours shall continue to be exhibited while the vessel remains in port.

Section 7. *Immigration and Quarantine Signals* –
(a) The Master of every vessel arriving from a foreign port shall exhibit the Customs, Immigration and Quarantine signals as prescribed by those government agencies. Such signals shall remain hoisted until the proper officer has given the permission to lower those signals.
(b) No vessel other than an authorised vessel shall approach within 200 m. to a vessel which is exhibiting the Immigration, Health, or Customs signals. An authorised vessel shall mean an Immigration, Health, Customs, Pilot Launch, or Philippine Coast Guard (PCG) vessel.
(c) No person other than a Pilot or authorised government officer(s) may board or disembark from any vessel coming from a foreign port until the vessel is cleared by the Immigration, Quarantine, Customs and PCG officers and the respective signals have been lowered.

Section 8. *Securing of Vessel before Discharge/Loading* – Every vessel entering a port shall be anchored or properly secured to a wharf, pier, or buoy before commencing the loading or discharging of cargo, and/or the embarkation or disembarkation of passengers.

Section 9. *Port Clearance* – No vessel shall leave a port unless in possession of a valid PPA Port Clearance issued by, or on behalf of, the Authority, in addition to the requirements of other government agencies and the final clearance issued by the PCG.

Article IV – Berthing

Section 29. *Berthing Regulations* –
(a) The allocation of a berth belonging to, or operated by, the Authority shall be at the Authority's discretion.
(b) A vessel shall be considered for berthing allocation only after the Agent of said vessel has filed an application for berth.
(c) All applications for berthing at pier/wharf/anchorage shall be submitted 24 hours before arrival for vessels on scheduled runs and 36 hours for tramping vessels (without regular schedules). In either case application should be filed within sufficient allowable time.
(d) All applications received after berthing meeting shall be deliberated upon the following day before the actual arrival of the vessel.
(e) No vessel shall be berthed or unberthed alongside a wharf or pier belonging to, or operated by, the Authority without its permission or contrary to its directions, nor shall any vessel occupy a berth other than the berth allocated to said vessel.
(f) First-come-first-served basis shall be the general rule in determining berthing priorities of vessels, subject to the exceptions hereunder provided. Vessel's arrival will mean the time a vessel drops anchor at the Anchorage Area when there is no available area or the time a vessel reaches the Port's Boarding Area when a berth is available.
(g) When the available berthing space is inadequate for berthing a larger vessel having the priority to berth, the smaller vessel next in priority which can be accommodated shall be allowed to berth on condition that should additional space be made available such that the larger vessel can be accommodated, the smaller vessel shall be moved to the anchorage to allow the larger vessel to berth.
(h) The Pilot manoeuvring a vessel to berth shall be advised by the Authority as to the position or berth which the vessel will occupy and the vessel shall comply with the directions or instructions therefor of the Authority and/or the Pilot.
(i) When a vessel scheduled to berth encounters some mechanical troubles thereby restraining said vessel from docking, an allowance of one (1) hour shall be given for repairs. If after the lapse of this grace period, said vessel is still inoperative, the priority to berth shall be passed on to the vessel having the next priority to berth.
(j) Vessels with berthing priority but scheduled to depart the following day shall be allowed to berth to allow passengers to disembark. Provided, however, that said vessel shall pull-out from berth to give way to passenger vessel scheduled to depart on the same day.
(k) Any vessel intending to berth solely for the purpose of loading fresh water, bunkering or victualling, before such vessel will be able to depart for another port, shall be given priority over other vessels, provided that such stay shall not exceed the time fixed by the Authority.
(l) Government-owned vessels on official business, vessels of foreign government not engaged in foreign trade, vessels under stress, and vessels carrying perishable articles or goods shall be given berthing priority over other vessels.
(m) Whenever practicable, passenger liner or tourist vessel shall, subject to the discretion of the Port Manager/OIC, also be given priority of a limited number of hours stay at berth over purely cargo vessel.
(n) Berthing priority of any vessel shall not be waived in favour of another vessel.
(o) Vessels waiting for cargoes shall be moved to anchorage to allow the next vessel to berth. However, said vessel shall be allowed to berth again, provided that cargoes for loading are ready, unless another vessel is allowed to take the berth temporarily by the Authority.
(p) Domestic vessels may be allowed by the Authority to dock at berths designated for foreign vessels if there are no other vessels waiting to dock at such berths.
(q) Shut-down time caused by heavy rains and other major calamities or accidents which will stop work on a vessel shall be excluded from the time limitation prescribed herein. However, breakdown of lifting gear and also loading of fresh water, bunkering and victualling which should be done simultaneously with cargo handling operations shall not be considered as reason for time extension.

AUTHORITY: Philippines Ports Authority, P.O.Box PA62, Manila. *Telex:* 40404 (ITT) and TA BX 0203. *Cables:* Phports Manila.

ANTIMONAN: 14.00 N. 121.55 E. (See Plan Book)

SHIPMASTER'S REPORT: 1976.

Berth in position Lat. 14° 00′ 30″ N., Long. 121° 55′ 30″ E. Vessel required to be ballasted to one third deadweight. Tidal range 6 ft. Nature of bottom at berth, mud and sand. Density 1025. Anchorage 0.5 miles S.E. of jetty.

Terminal Information: Ship's hoses used to rail only. Length of shoreline, 3,000 ft. diameter 8 in. Products handled at the berth, coconut oil and pellets of copra.

Port Information: Pilotage compulsory. Notice of 24 hours and 12 hours required. Pilot boards from a small catamaran flying the pilot flag. Boarding position 2 miles S.W. of the port. Vessel is able to enter or leave at any stage of the tide. Vessel cannot enter after dark and it is not advisable to leave after dark as some of the piles on the sea bed near the jetty are broken. Also there are no navigation lights in the bay and many vessels are fishing. Max. LOA 650 ft. Max. beam 100 ft. Max. draft 44 ft. No tugs available. Radio station used, Manila, though messages delayed in receipt at Antimonan.

Facilities Available: Fresh water in small quantities for cash. Fresh provisions, groceries and meats in small amounts, doctor and hospital.

No repair facilities, laundry, fuel or slop facilities.

Improvements: The face of the jetty is being piled and breasting dolphins created.

At the present time a barge is inserted between the ship and jetty as the piling is broken.

APARRI (Including Port Irene, San Vicente, Claveria, Mission, Abulog, Maconacon and Divilacan): 18.22 N. 121.38 E. (See Plan Book)

See "General" before first port.

PORT LIMITS: Quarantine anchorage or loading point.

DOCUMENTS: *Before the Vessel's Arrival:*

Submit/transmit to Philippine Ports Authority (PPA-PMU) Aparri, the vessel's Notice of Arrival, at least 48 hours before ETA for foreign vessels and 24 hours before ETA of domestic vessels.

Upon Vessel's Arrival:

PPA-PMU Aparri Safety Officer will inspect cargo handling gear of all incoming vessels.

Submit to PPA-PMU-Aparri a copy of the following documents:

Inward Foreign Manifest (for foreign vessels); Coasting Manifest (for domestic vessels).
Passenger Manifest.
Crew List.
Stowage Plan/Hatch List.
Transit Cargo/Manifest (if any).
Oath of Master.
Vessel's Roll Book – to be temporarily filed.
Vessel's Information Sheet – to be completed.

Before Vessel's Departure:

Submit to PPA-PMU-Aparri a copy of the following documents:

Outward Foreign Manifest (for foreign vessels); Coasting Manifest (for domestic vessels).
Passenger Manifest.
Transit Cargo Manifest (if any).
Oath of Master.

Entrance and clearance formalities in the traditional sense of the terms of foreign and domestic vessels shall remain with the Bureau of Customs until Port Management Unit's own clearance is duly stamped in the Manifest and after all port charges, fees, dues and other charges had already been paid.

Payment of charges leviable against the vessel and cargo shall be made either in cash, Manager's or Cashier's Cheque to the Port Management Unit.

Notice must be transmitted to Port Management Unit Office of Aparri when Export Entry is processed and Wharfage fee is paid to the Philippine Ports Authority – Manila.

PILOTAGE: ETA to be sent to Aparri Pilotage Station, Aparri, Cagayan. Pilot Boat is a motorised launch.

ANCHORAGES:

Port of Aparri: Boundaries – Lat. 18° 22′ 39″ N., Long. 121° 35′ 33″ E. Depth – 11 fathoms.

Port Irene: Boundaries – The portion between Nulton Pt. and Batulinao Pt. This bay known as Casambalangan. Depth – 12 m.

San Vicente Port: Boundaries – Lat. 18° 30′ 43″ N. Long. 122° 08′ 26″ E. Depth – 15 fathoms.

Sub-port of Claveria: Boundaries – Between Centenela and Lacaylacay Pt. Depth – 15 fathoms.

Port of Divilacan: Depth – 11 fathoms.

Mission Port (Cagayan): Boundaries – Lat. 18° 17.5′ N., Long. 121° 54.2′ E. Depth – 8 fathoms.

Abulog Port (Cagayan): Boundaries – Lat. 18° 28.8′ N., Long. 121° 26.5′ E. Depth – 9 fathoms.

Maconacon Port (Isabela): Boundaries – Lat. 17° 24.25′ N., Long. 122° 14.75′ E. Depth – 7 fathoms.

RESTRICTIONS: Enter channel in daytime only.

RADIO: RCPI. TELEFAST. PT & T. TELECOM. All in Aparri, Cagayan.

VHF: RCPI. TELEFAST. PT & T. TELECOM. All in Aparri, Cagayan.

RADAR: Pagasa Weather Bureau Radar, located in Bukig, Aparri, Cagayan.

TUGS: Available at Claveria, Aparri, Port Irene, Abulog, Mission, Maconacon and Divilacan.

BERTHING:

Port of Aparri: Anchorage area. Ship's side loading and ship's own gear. Cargoes handled at Shipper's log pond.

Port Irene: One available berth. Ship to pier with ship's derricks. Cargoes to be handled at a specified reclaimed area.

San Vicente: Anchorage area.

Sub-port of Claveria: Anchorage area. Ship's side loading and ship's own derricks. Cargoes handled at Shipper's warehouse log pond.

Port of Divilacan: Anchorage area. Ship's side loading and ship's own gear. Cargoes handled at Shippers log pond.

Mission Port: Anchorage area. Ship's side loading and ship's own gear. Cargoes handled at Shipper's log pond.

Abulog Port: Anchorage area. Ship's side loading and ship's own gear. Cargoes handled at Shipper's log pond.

Maconacon Port: Anchorage area. Ship's side loading and ship's own gear. Cargoes handled at Shipper's log pond.

CRANES: Truck mounted cranes.

BULK CARGO FACILITIES: None.

SPECIALISED CARGO HANDLING FACILITIES: None.

BRIDGES: No bridges.

STEVEDORES: North Luzon Port Services Inc. – Aparri, Cagayan. Krisandra Services Corp. – Port Irene. Taggat Industries Inc. – Sub-port of Claveria. ACME Group of Companies – Maconacon, Isabela.

MEDICAL: Aparri Emergency Hospital.

TANKERS: River stream-draft 16 ft. Discharge lines are through depot discharging pipe-lines Aparri, Cagayan.

DENSITY:

Port of Aparri: 30%.
Port Irene: Salt.
San Vicente Port: 30%.
Sub-port of Claveria: 30%.
Port of Divilacan: 30%.
Abulog Port: 30%.
Mission Port: 30%.
Maconacon Port: 30%.

FRESH WATER: None.

FUEL: Diesel, gasoline and kerosene.

FIRE PRECAUTIONS: None.

CONSULS: None.

REPAIRS: None.

DRY DOCKS: None.

SURVEYORS: None.

GANGWAY/DECK WATCHMAN: Available from Stevedore in Aparri.

HATCHES: Normally carried out by crew and stevedore.

CARGO GEAR: Cranes.

REPATRIATION: With permission of Bureau of Immigration, Aparri, Cagayan.

AIRPORT: Flights Monday, Wednesday and Friday (suspended at present).

TIME: GMT plus 8 hours.

POLICE/AMBULANCE/FIRE: Aparri Integrated National Police, Tel: 2-2222; Aparri Emergency Hospital, Tel: 2-2233; Aparri Fire Department, Tel: 2-2014. All in Aparri, Cagayan.

TELEPHONES: None.

SHORE LEAVE: Request permission from the Bureau of Customs.

SERVICES: None.

IDENTIFICATION CARDS: Issued by the Bureau of Customs and Philippine Ports Authority.

REGULATIONS: See "General" before first port.

DELAYS: Weather conditions.

SHIP SUPPLY SERVICE: *Water Taxi Services:*

There are 4 private operators engaged in the ship-to-shore transport of personnel duly registered and authorised by the The Port Authority, namely:

1. O. Ragonjan Water Taxi Services – Orlando Ragonjan (Operator/Owner).
2. G. Alveza Water Taxi Services – Gregorio Alveza (Operator/Owner).
3. Five Star Water Taxi Services – Domingo Raquipo (Operator/Owner).
4. Cartagena Water Taxi Services – Leonardo Cartagena (Operator/Owner) – c/o Mr. Napoleon Sotto..

The business addresses of the above operators are all located at Punta, Aparri, Cagayan.

Ship Supply/Shipchandling Services:

The Port Authority has granted a permit to operate to the Aparri Ship Chandlers, Inc. owned and operated by Myrna Casenas, with office located at Aparri.

All the above listed operators are based in Aparri, Cagayan. However, special arrangements could be made with any of them for precise details and other conditions relative to the services required including rendezvous positions. They could be contacted through local telecommunications systems available in the locality such as RCPI, PT & T, and the Philippine Long Distance & Telephone Co., Inc.

AUTHORITY: Philippines Ports Authority, Port Management Unit, Aparri, Cagayan. *Tel:* 2-2134. *Contact:* Simeon T. Silva, Jr., Port Manager. Captain German Yap, Chief Pilot. Captain Bonaparte Casenas, Co-Pilot.

Head Office: Philippines Port Authority, P.O.Box No. PA62, Manila, *Telex:* 40404 (ITT). 0203 (Tx Bx). *Cables:* Phports, Manila.

BATAAN (Limay): 14.30 N. 120.38 E. (See Plan Book)

(A) BATAAN. (B) BATAAN – CBM. (C) BATAAN – SBM. (D) PRODUCT PIER. (E) LPG PIER.

SECTION (A).

See "General" before first port.

PILOTAGE: Pilotage is compulsory, Pilots assigned by the Manila Pilots Association. Pilot boards vessel just off the berth.

ANCHORAGE: There is a good anchorage with depth of 9.1 m. – 11.3 m.

RESTRICTIONS: Approaches are open deep water. Vessels may berth and unberth at any hour and any stage of the tide. Keel clearance of 10 ft. required.

MAX. SIZE: LOA 1,000 ft. Max. draft 52 ft. at conventional buoy mooring. See "Section B".

RADIO: Manila Radio. At the berth, shore communication with vocaline JRC 475 transceivers on 465 MHz.

HEALTH: Port Health Officials board with the Pilot. Radio request for Free Pratique can be made prior arrival.

TUGS: Available.

BERTHING:

Private Piers	*Length* (m.)	*Width* (m.)	*Depth* (m.)
Bataan Refining Corp.	343.20	15.90	9.90 to 30.00
Planters Products	317.99	n.a.	14.60
LPG Pier	24.60	3.00	5.40

DENSITY: 1025.

MEDICAL: Doctor and hospital facilities available. Advance notice required of any medical attention needed.

TANKERS: *Products Pier:* Inner berth depth 13 ft. Outer berth depth 32 ft. Can accommodate vessel up to 530 ft. length. No slop discharge facilities available. Also see "Shipmaster's Report – September 1980" and "Section B".

FRESH WATER: Not available at berth. Can be supplied by barge.

FUEL: Bunkers, fuel and diesel, obtainable from berth, advance notice required.

REPAIRS: Repair facilities available at Philippine Shipyard and Engineering Co., located at Subic Bay, Zambales. Drydock capacity up to 300,000 d.w.t.

SURVEYORS: (1) Cargo Inspectors available.

(2) Surveyors such as Lloyd's Register, American Bureau, etc., have offices in Manila.

CERTIFICATES:
Certificate of Registration.
Certificate to Operate.
Certificates of Officers and Engineers (Licenses).
Officers and Seaman's book.

CUSTOMS ALLOWANCES: 200 cigarettes for each crew member, and 1 bottle of liquor for each crew member.

IDENTIFICATION CARDS: Essential.

REPATRIATION: Effecting crew changes and arranging necessary repatriation are carried out by the Immigration Office in the port with the assistance of the ship's Agent and the Foreign Embassy concerned.

TIME: Local Civil Time is 8 hours ahead of GMT throughout the year.

HOLIDAYS: New Year's Day (1st January); Bataan Day (9th April); Holy Thursday (variable); Good Friday (variable); Labour Day (1st May); Independence Day (12th June); Republic Day (4th July); All Saints' Day (1st November); National Heroes Day (30th November); Christmas Day (25th December); Rizal Day (30th December). When any holiday falls on a Sunday, the following day (Monday) is by law considered a public legal holiday. Employees of the Philippines Port Authority – Port of Manila, Limay Sub-Port, report for work on Saturdays, Sundays and Holidays.

GENERAL: Customs Inspector and 2 guards accommodated on board during vessel's stay.

BANKS: No American or European banks are operating in the area. Excellent banking facilities and services available at Manila.

EMERGENCY CO-ORDINATION CENTRE: For emergencies, please contact Philippine Ports Authority, Port of Manila, PNR Building, South Harbor, Port Area, Manila. Tel: 47-34-41 to 49.

Limay Sub-port is equipped with a radio for direct voice contact with PPA – Manila.

STORING: See "Prelims" page viii.

(1) Vessels can be stored by barge or "water taxi".

(2) Vessels can be stored by barge only after discharging at the anchorage.

(3) Not applicable.

(4) Not applicable.

(5) Companies which sell stores to ships calling at Limay must secure clearance from the Philippine Ports Authority – Port of Manila, Limay Sub-port and from the Bureau of Customs.

(6) Local riggers may be allowed to assist in storing.

SHIPMASTER'S REPORT: November 1979.
LIMAY: Lat. 14° 34′ N. Long. 120° 36′ E.

Documents: 3 copies of Visaed Crew List. The form for the crew list should be in the approved form and these are available from the Philippines Embassy at the loading port.
4 Copies of Ship Stores List.
7 Copies of Ordinary Crew List.
1 Copy of Maritime Declaration of Health.

Approaches: This is a very minor port with 1 berth for discharging dry cargo and 1 berth for tankers. The only conspicuous land mark is a single gantry crane. Limay Port Authority has a VHF station and can be contacted on Channel 13. The vessel has to clear Health and Immigration prior to berthing. The quarantine anchorage and pilot boarding ground is between 14° 30′ N. – 14° 31′ N. and 120° 37′ E. – 120° 38′ E. Immigration and Health Authorities board the vessel (generally only during daylight, especially since the weather deteriorates at night) on arrival and clear the vessel.

Pilotage: Pilotage is compulsory. 2 Pilots are available. The Pilots are from Manila and they are stationed at Limay for 2 weeks duration on rotation.

Port: The dry cargo berth is about 500 m. long consisting of 3 concrete dolphins on either side of the crane. The crane is gantry type with 6 tons SWL grabs. The berth juts out from the land and the discharged cargo is directly taken into the factory by conveyor. If there are no breakdowns cargo can be discharged at up to 3,500 tons per day.

Bulldozers are used to collect the cargo in the hold. The crane is fixed and the vessel has to be warped fore and aft if cargo has to be discharged from more than one hold. Stevedores work 24 hours. Berth is mainly used by the Farm Products Co., which imports muriate of potash and urea. They export NPK fertiliser. The maximum depth found alongside by hand lead and line was 48 ft. and minimum 41 ft.

There is one wreck near the dry cargo berth where a tanker blew up and sank. The position of the wreck is approximately Lat. 14° 30.3′ N., Long. 120° 37.3′ E. which is marked by an unlit buoy.

Tugs: 2 tugs are available. They are normally stationed at Manila and brought to Limay when vessel berthing/unberthing at Limay. 6 hours notice has to be given. The large tug is 750 b.h.p.

As per "Pilot" during the months of October-November the surface current runs North-South and the undercurrent which is very strong runs East-West. Due to this, it is very "tricky" while berthing and unberthing. Tankers are not berthed or moored during night. Dry cargo vessels may be berthed at night if weather is good. The pier is not very well lit. Moreover very often empty barges, etc., may be in the fairway to the berth and thus makes berthing or unberthing more difficult.

Density: Between 1017 and 1020 reducing during rains.

Fresh Water: Not available from the jetty. If required water can be supplied by barges from Manila, if given prior advice. It is expensive due to transportation.

Fuel: Can be arranged from Manila.

Repairs: Not available.

Stores: Available but expensive compared with Manila.

Watchman: It is advised to take watchman due to piracy which was reported recently. Generally watchmen are arranged by the Agents.

Hatches: To be opened by the ship's crew.

Customs Allowances: 1 bottle of spirits and 200 cigarettes per crew member.

Cargo Gear: Not required.

Repatriation: Can be arranged. The nearest airport is at Manila which is 2 hours by car.

Shore Leave: Shore leave is allowed. But no crew are allowed to pas through the factory. Boat has to be arranged to take crew to the neares village next to the factory. The nearest town is Balanga which is th capital of the District. Small mini buses run frequently between Lima and Balanga which is about 20 miles away by these buses.

Medical Facilities: Good medical facilities are available at Manila.

SHIPMASTER'S REPORT: September 1980.
Locally the port is known as Limay, Bataan. VHF Channel 11 appears t be used for all communications. 7 copies each of all forms.

If any crew members being repatriated then Agents require their fu names, nationality, ages, and passport or seaman's books number i advance.

Hand soundings alongside South side of jetty indicated 38 ft. an 34 ft. at Eastern end and about 450 ft. Westward (inshore) respective at LW.

Liberty boat from vessel to shore as crew personnel are not allowe through refinery. Vessel loaded Mogas at rates of between 250 an 450 t.p.h. Good holding ground in the anchorage off berth in Manila Bay – SBM for VLCCs being constructed in approximate positio Lat. 14° 31.7′ N., Long. 120° 38.8′ E. (See "Section B").

Experienced a strong Southerly current, about 4 knots, the day after typhoon passed about 100 miles to the North. This current due to floo waters leaving the bay.

3×500 h.p. tugs used for berthing, only pushing, do not make fas 2.5 hours to Manila by bus. No shore passes required. Fresh water b barge from Manila but very expensive. I was advised that the firs 137 tons would cost £285.00 including tug. For the next 163 tons tug an barge would cost £841.00.

SHIPMASTER'S REPORT: April 1981.
Ship to ship transfer into m/t "Petron Gasul".

Approaches: Chart BA 976. The approach is straightforward with goo fixes being available by radar and visual means. The light on La Monic is extinguished. Ample water and there is nothing to be gained by usin the South Channel.

Advised that the transfer position would be 14° 31′ N., 120° 37.5′ E although this may be altered slightly to suit "Petron Gasul" and may b affected by the amount of shipping at anchor off the refinery.

PNOC carry out a number of lightening operations in the area an awaiting tankers may be encountered between Lat. 14° 28′ N. t Lat. 14° 34′ N., and bounded by Long. 120° 40′ E. (This anchorage are is not official). Besides the buoys marked on the chart there is a moorin buoy in approximate position Lat. 14° 31.8′ N., Long. 120° 38′ E. Th red buoy has a pipe-line attached and you are advised to anchor we clear to allow PNOC vessels access to the buoy. There is a large whi cross on Mt. Samat which is not marked on the chart and affords a goo reference point for anchor bearings.

Large numbers of unlit fishing vessels may be met in the bay and th approach channels and especially so at sunset and sunrise. Thes fishing boats also haunt the anchorage area.

Advised by Agents that movements were limited between sunrise an sunset but this appears to depend upon the local Pilots. The anchorin on arrival was done without a Pilot.

Documents:
Clearance from Last Port of Call.
8 copies Crew List – visaed, if possible, at departure port.
List of Passengers.
Lists of Animals, Narcotics, Firearms, mails.
List of Bonded Provisions, including Deck and Engine Stores.
List of Animals, etc., were simply 'nil' statements and were perfec satisfactory.

Formalities are unlikely before 0800 hrs., and were straightforwar Bonded stores sealed and application may only be made after 10 day for an issue of cigarettes, etc.

Health: The doctor who clears for Pratique is a local doctor and will car out any necessary vaccinations. Very helpful. Crew requiring special or hospital treatment must go to Manila.

Shore Access: By means of small outrigger launch. The daily charge f 3 journeys to and from the ship was 800 pesos.

Agents: The main agency (C. F. Sharp) is in Manila although they statio a representatitve locally ashore in Limay. Attendance was very goo and only hampered by local communications by telephone, telex an VHF. Our visit coincided with the Easter holidays and this serious disrupted communications to and from U.K. As an urgency measu radio messages were sent via Manila Radio. VHF contact to Manila wa easy via Channel 16 and thence to working channel.

Transfer: Contact may be made with "Gasul" on Channel 13. Th "Gasul" in effect is used as a storage vessel by PNOC and delays ma be expected due to the status of her tanks on arrival and the availabil of fenders. This last is serious since there only appears to be one set fenders for all lightening operations and this includes oil tanker transfe

Small local gas tankers take the product from "Gasul" and as the are few in number this can also lead to considerable delay. A certa amount of blending of propane and butane is sometimes necessary in these craft and on the whole tends to lead to a very confused situatio as regards the probable time of commencement of transfer. Estimat varied wildly from day to day and perhaps the most reliable estimat may be gleaned direct from "Gasul".

The Master and Chief Officer will board to discuss the transfer an decide on the final transfer position.

A Pilot will board to shift to the new position. "Gasul" is manoeuvre alongside by a Pilot and 2 tugs. If necessary another tug may take a li from your stern to hold the vessel steady during berthing. Three of h lines each end further supplemented by our own moorings.

"Gasul" was well fendered with three (3.3 m.×6.5 m.) and tw (2.5 m.×5.5 m.) fenders.

Reputed to have a full range of hoses and reducers on board b some have 300 ASA flanges.

The transfer was completed without any difficulties although "Gasul" can only accept one grade at a time necessitating shifting lines from one manifold to another. VRL used.

Surveyors: SGS attended with PNOC surveyor. Figures based on our vessel's outturn since the gauging devices and temperature recorders on "Gasul" are suspect.

Pilots are reluctant to unberth during the hours of darkness and this decision will also be affected by the prevailing weather conditions. Two Pilots for the operation.

AUTHORITY: Bureau of Customs, Philippines Ports Authority – Port of Manila, PNR Building, South Harbour, Port Area, Manila, Philippines. *Tel:* 47-34-41/49. *Contact:* Commander Eduardo MA. R. Santos, Port Manager.

SECTION (B) — CBM.

LOCATION: The Seaberth of Bataan Refining Corporation is located at Limay Town in Bataan Province.

The berth is a conventional buoy mooring (CBM) system and is located in position 14° 32.1′ North., 120° 35.9′ East.

The enterprise is owned by Philippine National Oil Company and operated by the Bataan Refining Corporation.

Products handled: Crude oil, NSFO and jet fuel.

Also see "Single Buoy Mooring".

Immigration: Vessels coming from countries where Filipino Consular Authority is available are required to have, on arrival, visaed crew lists. However, in the event that the vessel, for some reason, is not able to obtain a visaed crew list, this requirement is waived, provided the Agent furnishes a guarantee for payment of the visa fee.

When the vessel has on board personnel from countries without political relations with the Republic of the Philippines, at least 2 Immigration Officers remain on board during the vessel's stay in port. These personnel are forbidden to leave the vessel and are not granted shore leave.

The following documents are required by Immigration on arrival:

Visaed Crew List (1 original and 1 copy).
Ordinary Crew List (12 copies).

Customs: Bonded lockers containing spirits, cigarettes, etc., are required to be sealed. Each crew member is allowed to retain 1 carton of cigarettes. Cigarettes in excess should be placed in bonded lockers.

A Customs Inspector and 2 guards will remain on board throughout the vessel's stay in port. Food and a spare cabin should be provided for them.

The following documents are required by Customs:

Crew Personnel Effects List (6 copies).
Stores List (6 copies).
Firearms and Ammunitions List (6 copies).
Bonded Stores List (6 copies).
Narcotics List (6 copies).
Currency belonging to Crew and Ship List (6 copies).
Last Port Clearance.
Ship's Register.

Outward Clearance: This clearance is granted by the Coastguard which boards the vessel prior to departure and effects the clearance on board.

Also, an Immigration Inspector goes on board, just prior to departure, and musters the crew and verifies that all crew members are on board.

The following documents are required for the outward clearance:

Port Clearance.
Immigration Clearance.
Customs Clearance.
Coast Guard Clearance.

The above documents are prepared and arranged by Agent.

APPROACHES: *From End of Sea Passage to Pilot Station:*

Manila Bay is entered between Limit Point and Cochinos Point. The entrance is divided into 2 channels, named South Channel and North Channel, by Corregidor and Caballo Islands; both these channels are deep and clear of dangers in the fairway.

As a general rule, vessels use the channel which provides the shortest route into the bay. Entry is not recommended during darkness or periods of poor visibility if vessel is not equipped with radar.

Vessels entering Manila Bay through the North Channel shall pass midway between La Monja Island and Guardia Shoal and shall proceed directly through the middle of the channel between Corregidor Island and the mainland, steering 070° until 1 mile distance from the shore is cleared. The same route shall be followed by vessels when leaving Manila Bay through the North Channel.

Vessels entering Manila Bay through the South Channel should not approach any shore closer than 1 mile and shall keep South of the restricted area, South of La Monja, Corregidor and Caballo Islands, which is embraced within The North section of the following bearings: 296° from El Fraile Island and 236° from Caballo Island lighthouse. Furthermore, on the Southern side of the channel, they should not approach the line joining El Fraile and the N.W. point of Limbones Island closer than 1 mile. The same restriction applies to vessels leaving Manila Bay through the South Channel.

Deep draft laden crude tankers should always enter through the Southern Channel, which is wider and deeper.

After having entered the channel, vessels should make for the Pilots embarking point. Pilot boat usually waits 2 miles off Lokanin Point. During the approach to the above position, vessels should steer clear of land for at least 1 mile.

Many fishing boats are operating in the area and very often they are without lights and unable to move from their fishing position as they have nets laid down. Therefore, utmost caution should be exercised; radar watch and visual lookout should be maintained and a wide berth, to the maximum possible extent, should be given to any fishing boat.

When entering or leaving the port, especially during hours of darkness, we suggest to consider having the tanker preceded, at a close distance, by a service boat or a tug boat. This boat steaming right ahead of the vessel could clear the vessel's way of fishing boats or other craft or could at least warn the tanker in advance of any danger laying ahead.

ANCHORAGE: Vessels awaiting berth should anchor about 0.5 miles S.E. of the Conventional Mooring Buoy (CMB).

RESTRICTIONS: *Controlling Depth:* Entry Channel more than 66 ft. below MLLW. Approach Channel 64 ft. below MLLW. Alongside Berth 64 ft. below MLLW.

LOA Limitation: 1,000 ft.

Breadth Limitation: Unlimited.

Berthing and Unberthing: No particular restriction applies and vessels are berthed and unberthed at any stage of the tide; also during hours of darkness except during particularly severe metereological conditions. Following unberthing, ship is expected to move out, preferably with assistance of tugs instead of using her own power. The strong turbulence created by the ship's propellers tends to get the hoses entangled with each other.

MAX. SIZE: Below are the maximum vessel sizes that are acceptable at the Bataan Refining Corp. – CBM facilities:

DWT	120,000 tons
LOA	890 ft.
Beam	135 ft.
Draft	52 ft.

However, crude tankers greater than 120,000 d.w.t. with LOA and beam up to 1,000 ft. and 160 ft., respectively, could be accepted at the sea berth if the tanker is partially loaded, such that draft does not exceed 50 ft. and if the prevailing climatic condition warrants safe berthing.

RADIO: Whilst at sea, vessel is to communicate with Philippine National Oil Co. – Manila via Manila Radio. VHF Channel 13 is the working frequency of PSTC, owners of tugs and service boats assisting the mooring.

In the arrival message, Master to include: ETA, forward and aft drafts, confirmation that instructions contained in port information are understood and will be adhered to, any requirement.

It is most essential that vessel confirms ETA 72, 48 and 24 hours before arrival.

Communications between vessel, tugs, mooring gang and refinery are well established by various portable VHF sets supplied by the refinery and contractors and working is on several channels.

HEALTH: The Quarantine Doctor boards the vessel in the outer roads during her approach to the port. After Pratique is granted, the Pilot, Customs and Immigration Officers, the Loading Master, the BRC representative, and the hose gang are allowed to board.

No Radio Pratique is contemplated.

The following documents to be ready prior to arrival of health officials:

Maritime Declaration of Health.
Vaccination Lists (4 copies).
Health papers of all ratings.

BERTHING: The sea terminal consists of 8 mooring buoys of 16 ft. dia.

Buoys 2, 3, 4, 6 and 8 are fitted with 1 self-releasing Pelican hook and buoys 1, 5 and 7 are provided with 2 Pelican hooks each.

Mooring/Unmooring: Currents usually set in a North-South direction at the berth, and vessel always approaches and enters the berth from South. However, berth is so designed that tankers, depending on prevailing wind and/or current direction, could enter from the North, if necessary. Mooring and unmooring may take place also during hours of darkness, provided meterological conditions are fair and visibility is good. Currents are weak and berthing or unberthing takes place at any state of the tide.

Berthing of vessels should be assisted by a Pilot, a Mooring Master, and a Radio Operator, the latter two of Luzon Stevedoring Company, which also provides the mooring gang. The Radio Officer brings along his own portable VHF radio set for communicating with the mooring crew and service boats.

Vessels usually approach the berth from a S.S.E. direction and are stopped some 3,000 ft. off the South end. From this point vessels proceed to and enter berth at dead slow speed between buoys 5 and 6. Just before entering, the starboard anchor is usually dropped. This anchor is dragged or paid out accordingly in order to check the vessel's bow. The bow is brought abeam of buoys 1 and 2 where the port anchor is dropped. Lines are then given ashore and the vessel is backed into final position approximately 40 ft. abeam of the floating beacon marking the pipe-end manifold. When using anchor, caution should be exercised so as not to foul the buoy legs or cargo pipes and hoses.

Usually, 3 powerful service launches are in attendance. These launches are suitable for handling the heavier wire ropes. Usually, 2 lines are run on buoys 1, 2, 7 and 8 and one to buoys 3, 4, 5 and 6. There is no particular requirement on whether ropes have to be of wire or nylon. Pilots indicated that they may require, at times when wind from S.E. is particularly strong, additional lines to be run to buoys 3 and 5.

Night berthing is carried out with the assistance of the service boats, which tie up alongside buoys 1, 7 and 8 and indicate quite effectively the approach and entry to the berth.

Vessels calling at the CBM should make use exclusively of wire ropes of suitable dimensions, quality and condition.

When leaving, vessel must be towed and engine of tanker shall be at standstill to prevent kinking of hoses caused by strong current generated by the tanker/vessel propeller.

HOSES: At present, 2 strings of hoses are used. Each string consists of 1 length of 20 ft. × 20 in. dia., 2 lengths of 30 ft. × 16 in. dia., and 3 lengths of 30 ft. × 12 in. dia. The 2 over-the-rail lengths are provided with a 12 in. ASA 150 p.s.i. hand-operated butterfly valves.

The end of each hose is marked by a buoy consisting of 2 cans welded together. When resting on the sea bed, the ends of the hoses are attached to these buoys by means of a chain. For lifting the hoses onboard, divers disconnect the chain from the cans and pass them to the vessel's derrick hook. The marker buoys remain on the water.

The hoses are connected and disconnected by a shore gang supplied by a contractor. It takes, on the average, about 1 hour 30 minutes to have 2 hoses connected and cargo started. Ullages and cargo calculations are carried out concurrently with connecting of cargo hoses. It takes about 30 minutes to 1 hour for disconnecting, but this is done concurrently with ballasting operations after discharge.

In order to expedite turnaround time, vessels should arrive with both derricks rigged for a minimum safe working load of 7 tons.

Blanks at 2 connections of the port manifold should be removed prior to arrival and 2 reducers, if available, should be installed to have the manifolds ready for the 12 in. ASA hose connections.

Safe working load and connections available should be notified to BRC prior to arrival.

Minimum acceptable manifold height above deck is about 20 in. Minimum spacing of ship's cargo manifold for connecting hoses to adjacent manifolds is about 18 in.

The hoses when in operation are not suspended from ship's gear but are fastened to the vessel's superstructure by means of chains.

There are no specific guidelines for disconnecting in emergency. The hose gang remains on stand-by throughout the operation and can be readily available.

Hoses are to be connected to the vessel's reducers with bolts and nuts fastened to every second hole of the flange.

The maximum pressure requested at the vessel's manifold is 150 p.s.i.

LOADING: *Description of Cargo System:*
Crude is presently received at the 8 buoy seaberth, located about 2,100 ft. off the end of the product pier. The current crude receiving facilities consist of a 28 in. dia. line. The line from the tank to the berth is about 4,700 ft. long. This includes the submerged section from the pier head to the berth of 2,040 ft. The end pipe-line manifold is fitted with 2 outlets. Each outlet is provided with a 20 in. butterfly valve, a 20 in. check valve and a 20 in. chicksan swivel joint where currently 2 strings of 1 × 20 in. dia. × 30 ft., 2 × 16 in. dia. × 30 ft. and 3 × 12 in. dia. × 30 ft. hoses are connected. The butterfly valves are manually operated by divers.

The pipe manifold is marked by a floating beacon, and in order not to put hoses under strain, the vessel's manifold should be abeam of this marker at a distance of about 40 ft.

FRESH WATER: Supply is by barge. Requirements should be included in arrival message. Ample notice is required if water is supplied by barges.

FUEL: Bunkering is by barge. Bunkering may take place concurrently with discharging operations. Ample advance notice required.

MEDICAL: The Agent will arrange for transportation to and from Manila for crew members requiring elaborate medical or dental attention; otherwise, they will be attended to in Manila.

REPAIRS: There are several repair firms in Manila that can undertake minor repairs. Requirements for repairs should be passed on to the Agent, and briefly outlined in ETA message. Major classification societies available.

STORES: Stores and provisions can be supplied by ship chandlers in Manila. Master should radio requirements at least 36 hours before arrival to the Agent so that stores can be transported from Manila to the ship on time. Bonded stores are unavailable, except for local beer. Laundry requires a minimum of 36 hours.

WEATHER/WIND/TIDE: *General:* Although the Bataan Refinery is only 26 miles across the bay from Manila, rainfall data is not exactly the same for both of these locations. This is partially due to the mountain directly behind the refinery, which tends to precipitate the S.W. monsoon immediately as they come over the mountain, dissipating them to some extent by the time they reach Manila.

The average rainfall for the Bataan Refinery is about 98 in. per year varying from 56 in. to 136 in. per year. Maximum and minimum air temperature are about 102°F and 58°F respectively.

Wind and Typhoon: During the typhoon season, from June through September, the winds are predominantly from the S.W. and are known as the S.W. monsoons. In October through January, the winds are from the N.E. For the month of February, the winds are predominantly from the East and in March through May, from the S.E.

The typhoons are frequent during their season and bring with them high winds and heavy rains. The typhoons generally go up the East coast of Luzon, however, late in the year, they cross the land mass.

Range of Tide: For Lamao, data obtained from the coast and geodetic survey of the Philippines are:

Extreme High Water	5.6 ft. (58 year record)
Mean Higher High Water	2.99 ft.
Mean High	2.54 ft.
Mean Tide Level	1.41 ft.
Mean Sea Level	1.36 ft.
Mean Low Water	0.29 ft.
Mean Lower Low Water	0.00 ft.
Extreme Low Tide	2.00 ft.
Mean Tide Range	2.25 ft.

There are no unusual metereological conditions associated with these tides.

Intensity and Direction of Currents: A hydrographic survey in February and March, 1958 indicated that current, at its greatest strength, to be not exceeding 1 knot. However, there was sufficient indication that the current is of the reversing type; that is, tidal in nature. Current varies from day-to-day, principally in accordance with the range of tide, its diurnal inequality, and its daily routine, whether diurnal or semi-diurnal. The rising tide is counteracted, to some extent, by the water which enters Manila Bay from rivers, and thereby lessening its velocity. The ebb tide is assisted by this water and accounts for the maximum recorded velocity, which, however, seems always to be less than 3 knots.

Water Density: Salinity varies from a high of 36.1 parts per thousand to a low of 4.6 parts per thousand during a monsoon. The mean salinities are 14 in June, the lowest month, and 34 in May, the highest.

The surface temperature of the sea water adjacent to the site ranges from about 76°F to 90°F.

Tankers arriving at BRC in laden condition should not consider this density variation, which is very difficult to predict and to determine.

Waves: About 2 ft. to 3 ft., based on information given by Pilots.

Sea Bottom: Upper layer of sea bottom is soft mud.

GANGWAY: For vessels at the CBM, gangway to be prepared an rigged prior to arrival, on port side.

SECURITY: Serious security problems may arise during nightime an strict surveillance and alertness must be exercised at all times. Guard supplied by a local contractor and arranged by the Agent should b employed at all times. Stores and cabins should be kept under lock.

Vessel's Master, at all times, should take positive steps to preven smuggling and keep native boats away from the ship and watch fo pilferage while the vessel is approaching or is in port. We believe tha security guards may be of help and we recommend Masters to use them at all times.

Shore leave may be arranged by Agent. Crews are ferried to and from the CBM to the near local village. Launch service is arranged by th Agent.

Crews of vessels moored at the product pier or LPG pier have also t go ashore by boat since nobody is authorised to pass through th refinery.

EMERGENCY PROCEDURES: BRC is not provided with a anemometer nor specific procedures to vacate the berth under sever metereological conditions. Should weather conditions deteriorate, th vessel's Master, in consultation with the Pilot, Mooring Master, and BRC representative, take the decision to vacate the berth.

A close watch should be maintained for typhoon and weathe forecast. At all times, vessels should maintain a state of readiness an engines should be kept on standby and at short notice. No repairs o tank cleaning should be allowed alongside.

BRC REPRESENTATIVE: An employee of a third party surveyor (representing BRC) boards the vessel after quarantine clearance t co-ordinate unloading operations. A ship-to-shore portable radio i placed on board for communication and controlling ship's discharg only. The BRC representative remains onboard throughout discharg and liaises between shore and ship. During the pre-discharge, soundin and final inspection after discharge, a BRC operator boards an accompanies the third party surveyor.

SHIPMASTER'S REPORT: June 1982.

Pilotage: Arranged by Manila Agent.

Health: Doctor will board and give Free Pratique and perform vaccinations.

Radio: Arrival message to include Master's name and number an nationalities of all crew.

VHF: Contact was made Channel 11 at 25 miles from S.W.

Tugs: One tug stands by during vessel's stay and 1 service boat i available for transportation to and from the shore.

Berthing: The sea berth has 4 buoys each side, with hoses on port side derrick required and shore hose gang for connecting. Buoys t starboard are numbered 1 to 7 buoys and to port are numbered 2 to from forward to aft in both cases and these numbers are referred to b Pilot when berthing. There is also a Loading Master on the bridge wh liaises for ship's positioning regarding hoses. 2 tugs for pushing an 1 tug puts line aboard. 2 service boats for running lines. It is best to have wires without rope tails and service boats are quite powerful enough t run the wires. 1st lines are headline to No. 1 buoy and stern line to No. buoy. Then usually No. 2 and No. 8 buoys, followed by No. 4 and No. buoys. Usual final moorings are 3 lines each to Nos. 1, 2, 7 and 8 buoys and 1 each to 3, 4 and 5 buoys. No. 6 buoy not normally used unless there is a strong offshore wind. It is advisable to keep a note of the orde of putting out ropes in case of letting go during the hours of darkness. O approaching berth it is usual to let go starboard anchor to 2 shackles The anchor is hove up before commencing to single up on departure.

Medical: If Doctor boards for vaccinations then he will attend to an patients.

Tankers: For Sea berth 2×12 in. reducers, for SBM 2×16 in. reducers

SECTION (C) BRC — SBM.

LOCATION: Position: Lat. 14° 31′ 32.47″ N., Long. 120° 37′ 48.90″ W

RESTRICTIONS: *Water Berth:* 94 ft.

Max. Operating Conditions: Wave height 8 ft. Wind speed 55 m.p.h. an current 3 knots.

MAX. SIZE: 300,000 d.w.t. 1,120 ft. LOA. 175 ft. beam and 70 ft. draft

BERTHING: The SBM is installed in Manila Bay, approximately 1 mile offshore. From the surface, all that is visible is the top of the 23 f diameter mooring buoy and 2×800 ft. long strings of floating loading hose. The mooring buoy is painted orange, yellow and white and th hose strings are orange and black spiral stripes. At night the buoy i marked by a white flashing light and the hose strings are marked b 8 white flashing lights. The hose strings will generally float in th direction of current but they may be influenced by the wind direction.

Preparation of the Tanker: Generally, 2 launches should be availabl for mooring tankers. 1 launch will be used to pass the mooring lines t the tanker forecastle. The other launch will pull the floating hoses to th side as the tanker approaches the mooring and then attach the tanke derrick lines to the hoses in preparation for hose hook-up.

All tools and materials required for the mooring and hose hook-u operations should be placed aboard the hose handling and moorin launches in readiness for passing to the tanker.

Prior to the approach of the tanker, the Pilot or other termina personnel should ascertain the size of the tanker's cargo manifolds, th capacity of its hose lift derricks, and the arrangement and capacity of it forward fairleads, bollards and winches. If spool pieces, lines an special fittings are required, these should be made ready.

The hoses may be brought to either side of the tanker, although it i customary that they be brought to the port side. The appropriate derric should be rigged for lifting the end of each hose string. The lift to th manifold of a loaded tanker will be approximately 4 tons. However, a lif capacity of approximately 11 tons will be required to lower each hos string from the tanker in a light condition (based on 70 ft. dra amidships).

A clear area is required adjacent to the manifold for storage of the pick-up buoys. Cables and come-alongs should be rigged to strong points in the vicinity of the manifold to tie-off the hoses.

A boarding ladder should be rigged on the tanker side opposite the operating manifold. Boat ropes should be rigged along each side of the tanker. Messenger lines should be made ready on the forecastle for picking up the hawsers.

The arrangement of fairleads, fittings and obstructions should be studied carefully to determine the best means of securing the tanker to the mooring.

The mooring fittings should be capable of withstanding the appropriate loads. If the environment should worsen to the capacity of the mooring or the tanker fittings then the tanker should apply ahead power, suspend discharging, lower the hoses and leave the mooring.

Each mooring line is provided with three individual tanker chafing chain assemblies as follows: Type "B", Type "C" and Type "D". Type "B" assembly remains connected to the hawser thimble at all times and is for use with vessels of 100,000 d.w.t. – 300,000 d.w.t. having chain stoppers or no conventional mooring fittings. The type "D" assembly is for use with vessels of the same size (100,000 d.w.t. 200,000 d.w.t) but equipped with mooring fittings of the "Smit Lock" design. When required, this assembly is connected to the primary triangular plate in the type "B" assembly, and the remainder of said assembly should be removed from the first Kenter Link until such time as unmooring operations take place.

The type "C" chafiing chain assembly is for use with vessels up to 100,000 d.w.t. and when required should be connected to the type "B" assembly at the first Kenter Link following the primary triangular plate and the remainder of the type "B" assembly removed until such time as again required.

At the end of chain assemblies type "B" and "C" is a secondary triangular plate for connection of the 500 ft. polypropylene pick-up ropes. These ropes are incorporated in the assemblies, strictly for the purpose of winching the mooring assemblies on board the vessel and should on no account be used for mooring. The chains must be brought partway through fairleads on the forecastle and secured to towing brackets, bitts or other fittings on the deck of the tanker.

Experience has indicated that no standard means of securing the chain can be advised since a wide variety of arrangements are apt to be encountered on a tanker forecastle. It is recommended that the chains are secured to Smits towing brackets or chain stoppers if these are available. Otherwise wires or ropes will have to be improvised to secure the chains to ship's fittings. It is important that, whatever means and fittings are used, the arrangement must be adequate to withstand severe loads.

Fairleads as close to the stem as possible should be used to pass the chafing chains. If available, a lead in the centre of the bow should be used to pass both lines. Arranging the mooring lines through fairleads as close together as possible will assure that loads are equally distributed between the lines and will minimise the possibility of parting a line.

Mooring: Prior to making the approach to the mooring, the Pilot and tanker Master should carefully study the wind, waves and current to determine the best approach direction. The approach should be made in the direction in which the tanker can best be handled at very low speed and can best be held stopped in the water. There is adequate depth to manoeuvre a loaded 300,000 d.w.t. tanker (70 ft. draft) within a 3,360 ft. (1025 m.) radius of the mooring buoy.

The side to which the hoses should be brought should also be determined. This is preferably the port side for tankers with conventional right hand screws as the tanker will then move away from the hoses as the tanker moves forward out of the mooring. At the single anchor leg mooring the hoses may be brought to either side of the tanker. In cases where it is evident that the hoses will tend to string to starboard of the tanker during the entire unloading operation, it may be preferable to bring the hoses to the starboard manifold.

The instructions given here assume that the hoses are to be brought to the port manifold. These instructions should be reversed if the hoses are to be brought to the starboard manifold.

The tanker may, if necessary in an emergency, drop an anchor or anchors while approaching the mooring. Anchors should not be dropped, however, within 200 ft. of the mooring buoy, or along the route of the submarine pipe-lines. If an anchor is dropped during an approach to the mooring, it may not be left down after the mooring is completed. A tanker may not remain moored to both the mooring buoy and its own anchor during unloading. Care must be taken not to foul the hose strings or mooring lines in dropping or lifting an anchor.

Just prior to the approach of the tanker to the mooring, the hose launch should pull the hoses to a position to port of the direction of approach. In making the approach the tanker must stay well clear of the hose. During the final approach the tanker should take a course which would pass to starboard of the buoy so that, if the tanker moves too far forward it would safely pass the buoy and not endanger the hoses.

As the tanker approaches the mooring, a messenger line should be passed from the forecastle to the mooring launch. The mooring launch should then proceed ahead and to port of the tanker and make the messenger fast to the port mooring pick-up line. If the large messenger line marker buoys are in position they should be removed from the line and stowed on the launch. The small buoys can pass through the ships fairlead and may therefore be left in position.

At this point the tanker should have only enough headway to carry it within about 150 ft. of the mooring buoy. As soon as the launch is clear, the messenger should be winched aboard the tanker as rapidly as possible. As the mooring pick-up line is winched on deck, it should be coiled on deck. When the chafing chain passes through the fairlead, it should be snubbed in the best manner possible to secure ship fittings.

Stern movement should be used if necessary to avoid overrunning the mooring. The tanker should be allowed to settle back slowly on the port mooring line. Meanwhile, the mooring launch should take another messenger line from the forecastle and secure it to the starboard mooring line messenger. As soon as the launch is clear, the starboard messenger should be winched aboard and the chafing chain made fast to ship's fittings.

Once the tanker is secured to the mooring, the engines should be placed on stand-by. Grease may be applied to the chafing chains at the fairlead to prevent wear. The mooring lines, chafing chains and other mooring gear should be inspected frequently while the tanker is at the mooring.

Connecting the Cargo Hoses: As soon as the tanker is securely moored, the hose launch may tow the ends of the floating hoses to a position beside the tanker manifold. The necessary tools and fittings should be made ready on the tanker deck. The manifold derrick runner should then be lowered to the launch and secured to the pick-up buoy of the hose nearest the tanker.

The hose should be lifted approximately 20 ft. above deck level and the end swung inboard. Make sure the hose is not lying over sharp edges at the rail. Anti-chafing material may be necessary to protect the hose. The hose should be securely tied-off with cables and come-alongs to strong points on the tanker.

Remove the blind flange from the hose end. There should be no danger of oil spillage because the hose remains sealed by the butterfly valve. Check the "O" ring seal on the quick coupling. The hose can now be connected to the tanker manifold by the quick coupling. The hose lifting chain may now be lowered and the hose marker buoy stowed near the rail. the second hose may now be lifted and connected to the manifold in the same manner.

Fit the hand wheels to the butterfly valve gear operators. The tanker manifold valve and butterfly valves may now be opened. *The butterfly valves should be locked in the open position. Under no circumstances should the hose end butterfly valves be operated while oil is flowing through the hose.*

The shore station should be notified that the tanker is prepared to begin discharging. When instructed by the shore station, pumping should begin. Pumping should begin slowly at first until crude oil is recorded reaching the shore station and it is determined that the whole system is operating satisfactorily. The hose launch should inspect the hose strings and the area around the mooring buoy for evidence of leakage.

When it is certain that the entire system is operating correctly, the pumping rate may be increased to the maximum rate prescribed by the shore station. The pumping pressure must not exceed 200 p.s.i. During discharge, periodical inspections should be made of the manifold connection, the entire hose system and the area around the mooring buoy. This inspection may be made from the deck and forecastle of the tanker during daylight hours, night or when visibility is poor, the inspection should be made from a launch.

At regular intervals the pressure at the manifold and the quantity of cargo discharged from the tanker should be recorded. These figures should be compared with those recorded by the shore station. Any marked discrepancy between quantities should be investigated immediately.

It is inadvisable to allow the tanker to get to a completely light condition. Ballast should be taken aboard as necessary to keep the tanker near ballasted trim with the screw completely submerged at all times.

Disconnecting the Hoses and Departing the Mooring: When discharge is completed, the butterfly valves and tanker manifold valves should be closed and the hand wheels removed and returned to the hose launch. Beginning with the hose string further from the tanker, connect the derrick to the hose pick-up chain with the marker buoy in place, and take up the weight of the hose. Depending on the freeboard of the tanker, the lift load may be great. Disconnect the manifold connection and replace the blind flange on the quick coupling. A small amount of cargo may spill into drip pans during this operation.

The hose securing lines should now be released. After both hoses are released the hose launch should pull the hoses away from the side of the tanker.

After the hoses have been disconnected and released and the tanker has taken on sufficient ballast, the tanker may leave the mooring by disconnecting and lowering the mooring lines. The mooring pick-up line should be attached to the chafing chain and the assembly should be lowered until the end of the chain is at the water surface. The mooring pick-up lines may then be dropped. The tanker should get up steam and may use power to move forward before dropping the lines.

Once the lines are dropped, the tanker may either drop slowly astern until clear of the floating hose or may proceed forward and to starboard to pass beside the mooring buoy on the side opposite the hoses. The tanker may then proceed on its voyage.

SHIPMASTER'S REPORT: September 1983.

Prior to Arrival: Prior to arrival Agent requests (if using SBM) height from deck to centreline of manifold, distance of manifold flange faces from side railings and the flange diameter PCD and bolt size manifold or reducers. Also requires dimension of fairlead opening, distance of Smith lock pin to fairlead, bracket clearance of Smith lock assembly and pin diameter.

Berthing: Our vessel (140,000 dwt.) berthed at SBM during SW Monsoon. We picked up one line from the buoy while larger vessels take two lines. PNOC officials will inspect vessel's Smith lock or other mooring arrangement. Used one tug for berthing with tug's line starboard.

Require Customs clearance before commencement of discharge.

Fuel: Bunker suppliers wanted payment or Agent's guarantee thereof before supplying.

Circular: Following letter received on arrival:

M/T ....Port of Limay, Bataan
Attn: M/T ....The Master/Chief Engineer

Gentlemen:

As in ports all over the world, the quality of the environment has become a matter of vital concern to the government. Thus, the Port of Manila Authorities have promulgated regulations covering water pollution, oil spillages and indiscriminate dumping of waste.

Our Company, VRV Resources Corporation, in line with the government's ever continuing campaign to keep Manila Bay and the waters surrounding the Philippine archipelago clean from oil pollution, service inter-island and ocean-going vessels on the *safe handling of slops, used oil* and *contaminated fuel.*

To service our ever-increasing clients, we have a fleet of self-propelled barges and trained personnel ready to receive and safely dispose of potential water pollutants efficiently and without any delay to the ships' schedule. This service is our contribution to the government's effort to keep Manila Bay clean without any expense to the vessel, that is *free of charge.*

SECTION (D) BRC — PRODUCT PIER:

The pier is an open concrete structure, finger shaped, extending 840 ft. in an East/West direction from a 280 ft. long causeway. The piling is of steel pipes covered by concrete from the pier deck to just below the lower tide level. There are 3 loading stations on each side (North-South) of the pier.

The structural strength of this pier is sufficient to safely handle up to 30,000 d.w.t. vessels. Stations 5 and 6 are provided with a fendering system consisting of panels made up of vertical members and horizontal walers faced with wooden rubbing strips and backed up by Raykin fender buffer units. At the other stations, fender panels, faced with rubbing strips and backed by resilient fender buffers, are used. Stations 5 and 6 are provided with 2 bollards of cast steel material of 50 tons capacity and 3 others of 25 tons which should be sufficient to handle fully loaded "Kure Class" vessels.

The fendering system is designed to absorb the impact of 18,000 d.w.t. approaching at a speed of 1 knot and it is suitable to contain the impact energy of the smaller vessels and barges using this pier.

Barges and vessels' Masters should carry out proper manoeuvring, limiting their approach speed of 2 knots and coming alongside almost parallel or at a small angle of incidence (10° max.).

Should Masters be unable to manoeuvre properly, assistance of a service boat or tug boat should be sought and charged to the vessel's Owners.

Berthing operations are normally witnessed by a BRC representative and claim for any damage is properly filed holding owners of vessels responsible. A fully loaded "Kure Class" vessel, down at her tropical mark and drawing 31 ft. 6 in. may be accommodated at this berth. Vessel would come alongside with her starboard side to, but special care should be exercised for the aft mooring arrangements since the stem of the vessel would be over the pier by about 50 ft. Approach to the pier is somewhat obstructed by the CBM. When going alongside either the North or South side of the pier, use the offside anchor for keeping the bow under control.

Considering the limited width of the dredged basin and presence of cross currents, 2 tugs of 400 h.p. each are recommended to manoeuvre in an out of this berth.

The Northern slope of the – 35 ft. below MLLW basin extends seaward parallel to the South face of the pier. In front of the jetty head, close to and parallel the to North slope of the basin the submarine pipes running to the CBM are laid down. The depth of water above these pipes is not well defined but is certainly less than that of the dredged basin. Deep draft laden tankers leaving or entering Station 5 should at all times avoid passing North of the Northern slope of the basin since a danger of running aground and hitting the submarine system exists.

Masters and Pilots should be aware and read poster placed at the pier end warning mariners of this danger.

Smaller tonnage should also make use of the Pilots and assistance of a service boat (100 h.p.) in view of cross currents when manoeuvring alongside or off Berths 5 and 6.

SECTION (E) BRC – LPG FACILITIES:

Alongside the breakwater, there is a "T"-shaped jetty designed to accommodate LPG vessels. The pier consists of 2 breasting and 2 mooring dolphins. The breasting dolphins are provided with a fendering system consisting of a panel made up of vertical steel members and horizontal waler faced with wooden rubbing strips and backed up by rubber arch fenders.

Maximum dimensions of vessels received at this berth are as follows: LOA 210 ft., beam unlimited, d.w.t. 700 long tonnes. Energy of absorbtion, maximum displacement and speed of approach are not available.

The approach basin to and alongside this berth has been dredged(in 1971) and sounding revealed a minimum depth below MLLW of 18 ft. Therefore, a max. draft of 16 ft. appears safely acceptable at all tidal conditions.

Because of the limited size of the basin and lack of any beacon or buoy indicating its extent, assistance of Pilot should be sought. Also, it would be advisable to request the assistance of a 100 h.p. service boat to enter and leave the basin since the approach and the clearing of the berth has to be made in a parallel direction to the axis of the berth.

LPG is loaded through a Niigata Chicksan loading arm which carries both the liquid and vapour lines. Liquid line is connected directly on the loading arm with a bolted 4 in. flange. The vapour line is connected by a section of 2 in. diameter × 5 ft. long hand rubber hose terminating in a 2 in. ASA flange. An additional 2 in. rubber hose is available should vessel's vapour and liquid connection be more than 5 ft. apart.

AUTHORITY: *Operator:* Bataan Refining Corporation, 7901 Makati Avenue, MCC P.O.Box 1053, Makati, Metro Manila, Philippines. *Tel:* 85-90-61/95. *Telex:* 22259 PNO PH, 63667 PNOC PN, 45270 PNOC PM, 14817 PNOC PS. *Cables:* Bataanref-Manila.

Plant Site: Limay, Bataan. *Tel:* 49-16-20/29, 48-17-77.

BATANGAS, Luzon (including Tabangao):
13.45 N. 121.03 E. **(See Plan Book)**

See "General" before first port.

PORT LIMITS: Batangas Harbour embraces all waters of Batangas Bay extending seaward up to an imaginary line connecting Cazador Poin and Matuco Point.

DOCUMENTS: Upon arrival, the following papers should be forwarded to the Authorities:

2 Crew lists (visaed).
3 List of Stores, Deck, Engine, Stewards Dept.
3 List of Stores, Firearms, Medicine and Narcotics.
6 Personal Effects Declaration.
6 Inward Manifest.
8 Ordinary Crew List.
Clearance from last port of call

PILOTAGE: Pilotage for shifting from Quarantine Anchorage, docking and undocking compulsory for all vessels engaged in foreign trade The vessel is met by the harbour pilot approximately 2 miles South of the wharf. Pilotage for entering the Batangas Harbour and anchoring in the Quarantine Anchorage is optional but pilotage for shifting therefrom o changing in the stream is compulsory for vessel engaged in foreign trade. At least 48 hours before ships arrival, advise ship's Agents o estimated time of arrival (ETA).

Visual Signals, "I need a Pilot" – The single hoist of the Internationa Code flag "G".

Sound Signals – "I need a Pilot" – the International Morse Code "G" o 2 prolonged blast, followed by 1 short blast of the ship's siren.

Pilot Launch: 25 g.r.t. white with a black "P" at both sides of bow and with International Code Flag "H" hoisted. At night time, all around white ligh on top of a red light in a vertical line, with green and red sidelights.

APPROACHES: "Suggested Approach" From the South between Matuco Point and Malajibomanok Islands, with an opening of 3.5 miles White flashing beacon on Malajibomanok Island duration 0.3 seconds every 10 seconds visible for 8 miles in clear weather. Islands and poin can be approached within 0.5 mile.

Landmarks and Coastal Lights: Government pier at Bo. Sta. Clara may be approached safely from either direction paralleling its face. Batangas church dome, Bauan church bell tower, refinery stacks and columns and wharves are good landmarks. Batangas Lighthouse is Gp. Fl. (3) green every 5 seconds.

ANCHORAGE: All vessels entering Batangas Harbour shall show their colours and signal letters shall be kept flying until the vessel is boarded by the proper Officials within 2 miles before arriving at the designated Quarantine Anchorage.

1.	13° 45′ 06″ N.	121° 02′ E.	Quarantine
2.	13° 45′ 13″ N.	121° 02′ 14″ E.	for vessels less than 1,000 g.r.t.
3.	13° 45′ 06″ N.	121° 02′ E.	for vessels over 1,000 g.r.t.
4.	13° 45′ 30″ N.	121° 01′ 55″ E.	for vessels over 3,000 g.r.t.
5.	13° 45′ 30″ N.	121° 01′ 42″ E.	
6.	13° 46′ N.	121° 01′ 15″ E.	for Caltex wharf
7.	13° 43′ 35″ N.	121° 02′ 50″ E.	for Shell wharf
8.	14° 42′ 54″ N.	121° 03′ 06″ E.	for Pacific flour mills pier
9.	14° 46′ 18″ N.	120° 58′ 15″ E.	for Batangas Bay Terminals, inc. pier.

MAX. SIZE: See "Berthing" and "Tankers".

TUGS: Tug service is not furnished by the two oil refineries. The use of a tug for berthing and unberthing is required. Although a tug is normally available at Batangas it may be necessary to dispatch a tug from Manila Accordingly, it is important for Masters of vessels to provide at leas 48 hours advance notice of ETA to ensure availability of the tug boat.

BERTHING: Berthing may be done any time during the day or at nigh and Masters should exercise their own judgement in this respect Vessels moor either port or starboard side to, depending on prevailing conditions.

Batangas Govt. Pier:

	Length (m.)	*Width* (m.)	*Depth* (m.)
Pier I	127.5	15	10.5
Pier II	105.0	15	10.00
	48.0	12	
Pier III	84.0	15	5.0

Bauan and Mainaga Pier:

Bauan: Lat. 13° 46′ 48″ N., Long. 121° 04′ 06″ E.
Mainaga: Lat. 13° 35′ 48″ N., Long. 120° 57′ 12″ E.

Alternative loading or discharging ports, but only in cases when there is congestion at the government piers at the Port of Batangas.

Pacific Flour Mill: Location: The area contained from the Southernmos pile of the Shell Refinery to the area West of Little Tabangao River extending 1 mile Westward.

Max. Size: LOA 492 ft., draft 45 ft.

Pier: Length 93 m. with 142.5 m. causeway, width 7.5 m., depth 14 m.

Special Regulations:

(A) That a navigational and mooring area of 0.5 mile from the Northernmost and Southernmost mooring dolphins of the PFM pier be free from fish traps and other fishing devices.

(B) That a freeway from incoming and outgoing vessels from the PFM pier be kept free from all fish traps of any forms, and/or any other fishing devices that may obstruct navigation for a distance of 0.5 mile North and South of the PFM pierhead outside of the 50 ft. depth contour approach to the pier.

Batangas Bay Terminal, Inc: Pier facilities: 3 breasting dolphins 80 m apart; 2 fender piles (wooden) and 2 mooring dolphins. Causeway 290 m. long.

Max. Size: LOA – 700 ft. Draft – 39 ft.

Location: The Batangas Bay Terminal, Inc. located at 13° 47′ 00″ N., and 120° 59′ 02″ E. It is in Bo. Bolo, Bauan, Batangas, the total area (shoreland) is 5.5 hectares and 18 hectares (foreshore) land.

Special Regulations:

(A) That the area contained between the S.W. site of the BBTI for a distance of 1 mile from shoreline North and South be entirely free permanently from all forms of fishing devices.

(B) That a distance of 100 yards around the pier be entirely free from all forms of fish traps, fish corrals, fish weirs, etc. and it be "Off Limits" to all unauthorised persons, including fishermen and those travelling by bancas underneath the said pier.

PNOC Shipping and Transport Corp.:

Max. Size: LOA 340 ft., draft 14 ft. Pier: Length 97 m., width 4.87 m.

PNOC Energy Supply Base:

Max. Size: LOA 426 ft., draft 25 ft.

All vessels proceeding to Batangas should radio either Caltex or Shell, whichever is their destination, their estimated time arrival at Batangas as early as possible, but not less than 96 hours before arrival, amending this ETA subsequently if it varies more than 2 hours from the original estimate in order to arrange towing gangs with the Luzon Stevedoring Corporation.

Vessels Loading Sugar: See "Iloilo – Shipmaster's Report".

STEVEDORES: Stevedoring is usually handled by Luzon Stevedoring Corporation.

MEDICAL: Both refineries have small hospitals for handling emergency cases. Should any ship's personnel need prolonged hospitalisation, arrangement will have to be made to transfer the patient to Manila or to the Provincial Hospital of Batangas where suitable medical attention is available. Dental treatment can be obtained from local dentists in the town of Batangas.

TANKERS: *Shell Refinery, Tabangao:* Jetty 1; two hoses of 10 in. diameter. Jetty 2; 4 arms of 12 in. diameter. Slops acceptable at 500 t.p.h. up to limit of 3,000 tons.

Two wharves with the following dimensions:

(a) Length 336 m. Concrete	(b) Length 700 m. Concrete
Width 9 m.	Width 9 m.
Depth 15 m.	Depth 15 m.

Crude oil is delivered by tankers of up to about 75,000 d.w.t.

LPG: Report: Dated June 1984.

1. Send ETA to "Shell Gas Manila".
2. Vessel to dock port side alongside.
3. Shore manifolds from stern to bow – Butane – Butane Vapour – Propane Vapour – Propane.
4. Shore flange characteristics:
   - Butane liquid 12 in. diameter ANSI 150 lb. flat flange.
   - Butane vapour 8 in. diameter ANSI 150 lb. flat flange.
   - Propane vapour 8 in. diameter ANSI 150 lb. flat flange.
   - Propane liquid 12 in. diameter ANSI 150 lb. flat flange.
5. Appropriate cross-overs and reducers for simultaneous discharge of propane and butane (both with vapour return) should be installed by ship prior to arrival.
6. Vapour will be returned to ship while discharging.
7. Cargo must arrive as cold as possible, propane at −43°C and butane at −10°C, during discharge. Ship's tanks back-pressure against vapour return must not exceed 80 millibars gauge. To achieve the above conditions, the ship may have to operate its refrigeration equipment at full capapcity during the inward voyage and while discharging cargo at the port.
8. The ship should provide an accommodation ladder or gangway.

Caltex Refinery Wharf: The Caltex Refinery including the island wharf is located North of the government pier and at night can be distinguished by illumination lighting on its structures and red aviation warning lights at the top of the columns. A gas flame at the top of the 150 ft. flare stack is also visible several miles from shore. The Caltex wharves are adequately lighted to facilitate night berthing or unberthing operations if desired. LOA 755 ft., draft 41 ft. Jetty designed for 45,000 d.w.t.

Location: Lat. 13° 48′ 24″ N., Long. 121° 01′ 00″ E.
Lat. 13° 46′ 12″ N., Long. 121° 01′ 36″ E. (Service Wharf)

Construction: 2 wharves with the following dimensions:

T-Head: Length 84 m., width 13 m., depth 14 m., with 2 mooring buoys 244 m. apart parallel to the berths facing the shoreline.

Island Wharf: 2 breasting dolphins 91 m. apart. Length 16 m., width 12 m., depth 27 m., with unloading platforms installed in between the dolphins and provided with 2×125 ton quick release hooks and 2×125 ton bollards.

Crude oil is delivered by 200,000 d.w.t. to 300,000 d.w.t. supertankers.

Special Regulations:

(A) That a distance of 100 yards. around each of the 2 wharves (including island wharf) be entirely free from all forms of fishing devices such as "bonbons" fish corrals, fish weirs etc., and that it be "Off Limits" to all unauthorised persons, including fishermen and those travelling by bancas within the areas.

(B) That a navigational and mooring area of 0.5 mile North and South respectively of the limits stipulated be likewise free from fish traps and other fishing devices, but with option to fishermen to fish with hooks or with bancas within the said area provided that they do not come within 100 yd. around the jetty.

(C) That a freeway for incoming and outgoing vessels from the Shell Refinery piers be kept free from "bonbons" and/or any other fishing devices that may obstruct navigation for a distance of 0.5 miles North and South of the jetty head outside of the 50 m. depth contour approach to the jetty.

See "Shipmaster's Report".

DENSITY: 1026.

FRESH WATER: Fresh water is available to vessels loading, unloading or bunkering at Batangas Port. It is delivered to the vessel through hose connections. The water satisfies the physical and chemical requirements for drinking water.

CUSTOMS ALLOWANCES: Sufficient amount for crew's consumption while in port.

IDENTIFICATION CARDS: Not required in the Port of Batangas. Pedestrian and vehicle passes required.

FUEL: Bunkers are available from the 2 refineries. Prior advice should be given through the ship's Agent.

FIRE PRECAUTIONS: At both refineries smoking or open fires are prohibited on the wharves or on vessels alongside or within 100 yards of either wharf. Furthermore, each vessel's personnel is responsible for the safety of its own ship at all times.

CONSULS: Consulates are stationed in Manila.

REPAIRS: *Keppel, Philippines:* (Finger Pier) Total berth of 300 m. with deep water, provides facilities for repair of vessels of up to 5,000 d.w.t.

Cranage: 1×5 ton travelling crane on floating deck; 2×37 ton crawler cranes; 1×12 ton mobile crane.

Hull shop: 80 m.×22 m. covered workshops equipped with 2 units 10 ton overhead travelling crane; 1×750 ton×6 m. long flanging press; 1×500-ton hydraulic portal press.

Machine shop: 80 m.×14 m. covered workshop equipped with 1×5 ton overhead travelling crane, 1×10 m. long×800 m. swing lathe, other lathes, milling machines, drilling machines, etc.

Electrical shop: Facilities for electrical repairs, rewinding, insulation repairs, etc., other shops are pipe and carpenter shop to give full range of services for new constructions and repairs.

PNOC Marine Corporation: Principal Facilities:

Shiplift Drydock:
- Lifting Capacity: 7,500 long tons.
- Length of Platform: 172.5 m.
- Width of Platform: 28 m.
- Maximum Draft Liftdock at MLLW without Keel Blocks: 7.97 m.
- Elevation at Top of Pier at MLLW: 4.6 m.

Transfer System Parameters:
- Total Rated Lift Capacity: 7,500 long tons.
- Maximum Lift Capacity: 11,300 long tons.
- Keel Block Bogie Jacks: 164 units (maximum).
- Outrigger Bogie Jacks: 46 units (maximum).
- Rail Lift Cylinders: 120 units (maximum).

Work Berths:

New Construction Berth No. 9: Capacity 7,500 long tons (light displacement weight). Length 168.3 m. Width 27 m.

Repair Berth No. 8: Capacity 7,500 long tons (light displacement weight). Length 168.3 m. Width 27 m.

Repair Berth No. 7: Capacity 5,000 long tons (light displacement weight). Length 108 m. Width 27 m.

Repair Berth Nos. 1 – 6: Capacity 2,700 long tons (light displacement weight). Length 108 m. Width 21 m.

Other Facilities, Buildings and Shops:

Lift Control Building. New Construction/Erection Area. Gantry Crane (50 ton capacity). Whirley Crane (42 ton capacity). Receiving and Control Building. Covered Fabrication Area. Steel Fabrication Shop. Open Storage. Carpentry Shop and Mold Loft. Vehicle Repair Shop. Power Plant. Propane Storage Pad. Flammable Storage. Oxygen Plant. Water Storage Tank. Pump House. Crane Control House. Warehouse. Gate and Control Building. Parking Area. Administration/Clinic Building. Employee Service. Canteen. Outfitting Shop. Piping Storage. Foundry Shop. Transfer Area.

DRYDOCKS: Keppel, Philippines has its floating dock with the following data of information: Max. length of vessels, 110 m.; Max. beam of vessels, 19 m.; Max. draft of docking, 5 m.

REPATRIATION: Pre-arrangement by ship's Agent and/or Master of the vessel and the Immigration Officer assigned on board the vessel.

AIRPORT: At Manila.

TIME: GMT plus 8 hours.

HOLIDAYS: New Year's Day (January 1st); Holy Thursday; Good Friday; Labour Day (May 1st); Independence Day (June 12th); R.P-U.S. Friendship Day (July 4th); Bonifacio Day (November 30th); Christmas Day (December 25th); Rizal Day (December 30th); Special holidays declared by the President of the Philippines are also included. If any other legal holiday falls on Sunday the following day is observed as a holiday. Cargo handling work can be arranged on any or all holidays with the vessel's Agent.

POLICE/AMBULANCE/FIRE: PPA Port Police: 725-2882. National Customs Police: 725-2971. Batangas City Police: 725-2125. Ambulance: 725-2890. Fire Department: 725-2470.

TELEPHONES: At present placing telephones on board foreign vessels is not available; however, telephone service is available on the jetty of both refineries.

GENERAL: *Discharge of Ballast:* No dirty ballast may be dumped into the territorial waters of the Republic of the Philippines. The refineries have provisions for off-loading a limited amount of oil water ballast.

Rat Guards: Rat Guards shall be placed on all mooring lines to the wharves and piers.

Parking Facilities: 7,226 sq.m.

DEVELOPMENTS: New coal discharge terminal to be completed in 1984 for vessels of 100,000 d.w.t., discharge rate 1,600 t.p.h.

SHIPMASTER'S REPORT: June 1982.

Caltex Island Wharf:

Prior to arrival call "Luzsteveco" (Luzon Stevedoring Co.) on Channel 16 or 11 for berthing information. Berthing is slow as pilot boat runs lines and is not powerful enough to handle big wires. Moorings are 3, 2, 2. We were advised 16 in. reducers but they prefer 14 in. which are more suitable for their hydraulic clamps. 4 surveyors on board for cargo. Boat required to get ashore.

AUTHORITY: Philippine Ports Authority, Port of Batangas, Batangas City, Philippines. *Tel:* 725-2862, 725-3793. *Contact:* Salvador L. Reyna, Port Manager.

BISLIG, Mindanao: 08.14 N. 126.22 E.

See "General" before first port.

PILOTAGE: Vessel should send direct advice to the Pilot or through its Agents 48 hours prior or at the very least 24 hours before ETA by commercial telegraphy.

There is no VHF operated by the Pilot.

Pilot boat is painted black (hull) and white (bridge and mast). International Code Signals used to call Pilot.

Pilot station is located at Lat. 8° 11.4′ N., Long. 126° 21.2′ E.

Pilot boat will be located (if by prior advice/arrangement by Master requiring specific service of meeting vessel outside of entrance and conducting vessel through channel to inner harbour) at Lat. 8° 16.85′ N., Long. 126° 26.50′ E. or 340°, 2.35 miles off Sanco Pt. Lighthouse.

Pilot will always board a vessel (outside of entrance) via the Pilot's or Jacob's ladder on the leeward side of the vessel.

ANCHORAGE: While waiting for a Pilot, the recommended anchorage (at entrance) is at Lat. 8° 16.1′ N., Long. 126° 26.1′ E. on or about this position and/or within an area of 0.5 miles radius from this point.

Quarantine anchorage or inner harbour is based on the point Lat. 8° 12.9′ N., Long. 126° 22.0′ E. to within 0.25 miles radius from this point as centre, otherwise 1 mile North of BBLCI Pier's end.

Working anchorage at stream. When vessel is through with all the port formalities, she has to go to a working area for loading/unloading operations, thus:

BBLCI. Vessels will anchor at least within a 0.5 mile radius from the tip of BBLCI pier.

PICOP. Is especially preferred during N.W. monsoon at least within a 0.5 mile radius from the foot/base of PICOP breakwater.

Bislig Bay. In general is bounded by a line from *(a)* Sanco Pt. to *(b)* Mawes I. to N.W., thence to *(c)* the town of Bislig to the S.W., thence to *(d)* the village of Mangagoy to the S.W., and back to *(a)* Sanco Pt.

MAX. SIZE: 30 ft. at PICOP Pier.

HEALTH: Any vessel can be given Free Pratique if upon inspection everybody is healthy, vessel is clean and all certificates of vaccination are complete. However, if there is a suspicious quarantinable disease, a probationary Pratique should be issued and after 6 days, if it was found out that there was no quarantinable disease at all, Free Pratique will be issued.

RADIO: RCPI, Clavecella and CRC.

TUGS: Tugs normally meet vessel with Pilot at the 5 miles limit and assist Pilot in docking, using ship's lines. 5 available. 4 at 225 h.p. and 1 at 112 h.p.

BERTHING: Berthing is on a first-come first served basis. During the N.E. monsoon berthing is in daylight only for precautionary measures.

BBLCI and PICOP maintain 2 piers and 1 marginal pier.

BBLCI: Pier Position Lat. 8° 11′ 51″ N., Long. 126° 21′ 55″ W. This is an all concrete pier 800 ft. long and 30 ft. wide with berthing space of 550 ft. on each side. Max. draft 28 ft. at seaward end, 22 ft. at shore end. Both sides are protected by dolphins constructed of pile fenders and large tyres as absorbers. Largest vessel to berth at pier at present is 18,500 tons gross. Lumber, veneer, plywood and logs are loaded at this pier.

BBLCI Marginal Pier. For vessels of less than 1,000 tons gross and 10 ft. draft.

PICOP Piers:	*Length (m.)*	*Width (m.)*	*Depth (m.)*
Pier I (concrete)	244	8.0	8.8
Pier II	130	17.7	9.1

There are several patches of reefs projecting N.W. of the channel from Sanco Point to the fairway leading to the PICOP Piers. The port therefore should be entered only during daylight.

January, February and March, the season of the N.E. monsoon, makes it difficult for approaching and securing ship because of strong winds and heavy seas.

CARGO HANDLING FACILITIES: Both companies have ample equipment. Fork lifts, lighters, mobile cranes max. lift 50 ton (BBLCI), and 75 ton (PICOP), sideloaders, trucks and trailers.

STEVEDORES: ETA should be advised 2 days before ship's arrival stating workable hatches and gang requirement for berthing and gang arrangement.

20 gangs available, shifts change at 0600 and 1800 hrs. when port is full. If only few ships in port change at 0600, 1500 and 2300 hrs.

MEDICAL: It is necessary for the Agent to receive advance notice if there is serious medical attendance and hospitalisation. However, less serious medical attendance does not need notification. Port of Bislig has hospital facilities with complete cholera, El Tor and typhoid vaccine available.

DENSITY: About 1025 with tendency to become heavier during dry season and on flood tide.

FRESH WATER: Available at East end of BBLCI Pier. The connection is 2 in., situated 100 ft. from the approach, discharge rate 20 g.p.m.

FUEL: Small quantities available. BBLCI maintain 3 tanks for Caltex.

1. Bunker oil tank	30,000 bbls.
2. Diesel oil tank	11,300 bbls.
3. Gasoline tank	5,100 bbls.

Tank trucks available to deliver oil and gasoline.

GANGWAY/DECK WATCHMEN: P1.00 per hour for at least 3 men.

OPENING/CLOSING HATCHES: Rigging of booms is done by ship's crew, while opening and closing of hatches is carried out by stevedores.

CUSTOMS ALLOWANCES: 200 cigarettes and 1 bottle liquor for each man.

IDENTIFICATION CARDS: Needed.

REPAIRS: May be made to ship's gear and equipment by arrangement with BBLCI. The company have an engine repair shop, machine shop and foundry.

AIRPORT: 5 km. distant; daily flights.

TIME: Local Standard Time is 8 hours ahead of GMT.

HOLIDAYS: On Christmas Day; New Year's Day and Good Friday. Cargo work may be arranged.

GENERAL: Engineering supplies available from BBLCI and PICOP. Dunnage available through BBLCI. Provisions available through chandler or market 1 km. from BBLCI Pier.

DEVELOPMENTS: More berthing facilities are on the programme for the next 3 to 5 years when the pulp and paper mill is in operation. Installation of more log-processing plants to increase shipments.

SHIPMASTER'S REPORT: June 1978

Bislig Bay – East coast of the Philippines – 8° 15′ N., 126° 25′ E.

Apart from the B.A. Charts, Philippine Charts 4627 and 4664 were used. (Available at Manila).

Directions: Experienced an insetting current along the coast before entering the bay. For High and Low water Bislig Bay see A.T.T. Hinatuan, No. 5057.

(a) The tower at Sanco Point has been destroyed though the foundation (5 m. high) is still visible when not obscured by trees when entering the bay.
(b) All buoys have disappeared.
(c) Beacon B was blown away but beacons A & C are conspicuous.
(d) Prominent Hill of 920 ft. in the direction of 230° was invisible because of morning mist.

Kept beacon "A" on bearing 205° till beacon "C" was 130° and the small island of Agonoy 270°. One way of keeping clear of the shallow depths near the entrance.

Altered course to 230° and steered for the Quarantine Anchorage when Agonoy was 320°.

There is one Pilot available. Pilotage is compulsory. He embarked halfway between Sanco Point and the anchorage from a prao, displaying a large H-flag.

Berthed starboard side to at the East side of the pier with starboard anchor one shackle in the water slacking away when necessary. Observed a noticeable swell on the other side of the pier.

Moored with 3 headlines and 1 spring forward. Two springs from Hatch VI leading forward and 2 lines from the fore-end of Hatch No. V, Hatch No. VI could not be accommodated alongside the wharf. Inferring not to stow any Bislig cargo in that hatch. It is possible but this hampers the despatch as cargo has to be driven by fork lift truck from the deck of Hatch VI to Hatch V.

Two small mooring boats assist in the berthing. On departure these 2 boats assisted in pushing the vessel around.

The normal Quarantine telegram, as for other countries, is not necessary for the Philippines.

Two cabins are required for Immigration and Customs.

Connection with shore: Via the offside gangway and prao. There is a curfew from midnight till 0600 hrs.

Cargo handling: The width of the wharf and the lack of fork lift trucks slowed down operations. Another factor is the presence of another discharging or loading vessel alongside the other side of the pier.

Agency: Agent from Manila Office flew from Manila to assist the local offices.

Fruits and vegetables available.

AUTHORITY: Collector of Customs.

CAGAYAN DE ORO, Mindanao: 08.30 N. 124.40 E.

(See Plan Book)

See "General" before first port.

DOCUMENTS:

Application for Berth.
Vessel's Information.
Inward and Outward Manifests.
Passenger Lists.
Oath on entering Vessel from Foreign Port.
Oath of Clearance of Vessel.
Crew Lists.
Store Lists.
Personal Effects Lists.

PILOTAGE: Pilotage is compulsory for vessels engaged in foreign trade of 100 tons or over, docking or leaving at or leaving the Government Wharf or any privately owned wharf in the Port of Cagayan de Oro.

Notice of ETA should reach the Pilot Association of Cagayan de Oro 24 hours before vessel's arrival. For purposes of berthing allocation, foreign vessel's ETA should be received by PPA 72 hours before arrival. Approaching vessels are required to blow whistle (2 long and 1 short blast) stop the engine and wait for the Pilot to come. A foreign vessel is met by the Harbour Pilot approximately 2 miles from the wharf except for vessels docking at Philippine Sinter which requires the Pilot to meet the vessels 5 miles from the PSC wharf.

ANCHORAGE: The depth of safe anchorage is 60 fathoms, about 400 m. from the shore.

MAX. SIZE: Max. draft of 13 m. alongside, 80 m. from the Northern portion of the quay; the rest 8.5 m. along the quay side.

HEALTH: Foreign ships will clear quarantine on arrival at Cagayan de Oro Harbour. Quarantine officers will board the vessel before the pilot's boat meets the vessel.

RADIO: It is not wise to send ETA of vessel through the radio station. ETA could be best transmitted through the different telegram offices in the city such as RCPI, PT&T, Telefast, Clavecilla and Globe Mackay which is worldwide.

TUGS: Tugs for hire are not available at the Government Wharf. However, Resins, Inc. maintains 1 tug for hire which can be made available by arrangement.

BERTHING: Berthing may be done any time during the day or during the night. Max. permissible ship's draft along the 80 m. portion from the North of the quay is 13 m. and 8.5 m. along the rest of the quay. The present quay is 477.7 m. in length giving a total of 8 berthing spaces.

CARGO HANDLING FACILITIES: The Gold City Integrated Port Service, Inc. has 2 serviceable cranes with capacities of 25 tons and 10 tons; Itadand Hydra truck crane with a capacity of 15 tons, 38 forklifts, 1 with a capacity of 20 tons, 1 with 15 tons, 1 with 5 tons and the remainder 3 tons.

MEDICAL: Hospital facilities are available in the city of Cagayan de Oro.

FRESH WATER: The Philippine Ports Authority supplies water at the Cagayan de Oro Port, fresh water which is safe for drinking. Water is delivered through hose connections direct from PPA's water pipes. With a capacity of loading 40 t.p.h. for every outlet. There are 8 outlets with meters installed.

FUEL: Vessels are required to apply for bunkering at PPA and a bunkering fee of P15.90 is charged per vessel. Fuel oil is supplied by the local distributors of Petron, Caltex, Mobil and Shell.

REPAIRS: Minor repairs, not to exceed 2 hours, may be allowed for vessels at berth upon approval by the Philippine Ports Authority. Major repairs have to be done at the anchorage.

SURVEYORS: None.

HATCHES: Opening and closing of hatches is carried out by the Gold City Integrated Service, Inc.

CUSTOMS ALLOWANCES: Sufficient amount for crew's consumption whilst in port.

AIRPORT: Lumbia Airport is 9 km. from the Macabalan Wharf and is served by regular airlines.

TIME: GMT + 8 hours.

EMERGENCY CO-ORDINATION CENTRE: Philippine Coast Guard Station, Port Area, Cagayan de Oro City. No telephone.

HOLIDAYS: New Year's Day (January 1st), Holy Thursday, Good Friday, Labour Day (May 1st), Araw ng Kagitingan (May 6th), Independence Day (June 12th), Phil. American Friendship Day (July 4th), Bonifacio Day (November 30th), Rizal Day (December 30th).

Special Holidays declared by the President of the Philippines are included. If a legal holiday falls on a Sunday, the following day is a holiday. Normally, the integrated port service works on the vessel regardless of the day except for a 4 hour break in the afternoon of Good Friday, Christmas and New Year's Eve.

POLICE/AMBULANCE/FIRE: Police Tel. 110; Ambulance: Tel. 35-01 (Northern Mindanao Regional Training Hospital). Fire: Tel. 112.

IDENTIFICATION CARDS: Seaman's Book and/or Passport, Shore Leave or Liberty Pass.

STORING: See "Prelims" page viii.

1. Truck.
3. Yes.
4. Yes.
6. Yes.

SHIP SUPPLY SERVICE: The following Chandlers operate in the Port:

Alpha Premier Enterprises, 30 Matilde Neri St., Cagayan de Oro City.

Amity Shipping Agency, 70 Gomez Cor. Capistrano Sts., Cagayan de Oro City.

Andres A. Maandig, Jr., Corrales Ext., Cagayan de Oro City.

Citizen Protective Agency, 1346 Buara, Puntod, Cagayan de Oro City.

Corinne's Kitchenette, Passenger Terminal, Port Area, Macabalan, Cagayan de Oro City.

D A Ship Chandler, 248 San Juan II, Lapasan, Cagayan de Oro City.

Frejeper, 165 Kolambog, Gusa, Cagayan de Oro City.

JBF Services Co., 199 Lapasan, Cagayan de Oro City.

Our Chandling Services, Dr. 2 Sombilon Apt., Corrales Ave., Cagayan de Oro City.

Pair Marine Supplies, 190 CM Recto Ave., Lapasan, Cagayan de Oro City.

Phil. Pisces Marketing & Services, 151 Pabayo-Gomez Sts., Cagayan de Oro City.

Portman Terminals & Warehousing, Inc., c/o Philippine Ports Authority, Macabalan, Cagayan de Oro City.

Q.C. Magada Shipping Agency, YMCA Bldg., J. Pacana St., Cagayan de Oro City.

DEVELOPMENTS: Phase II of port development in progress and will provide: 415 m. quay extension with 10.5 m. draft; 10 hectares reclamation area; construction of 5,000 sq.m. open Transit Shed and 5,500 sq.m. of Container Freight Station, basic marshalling yard and control gate-parking complex. Completion expected mid-1985.

SHIPMASTER'S REPORT: June 1978

Anchored 4.75 cables, 337° from the lighthouse. (F.R. 58 ft.) lowered 4 shackles into the water and after dropping slacked away to 7 shackles in the water in 50 fathoms of water.

Moored portside to owing to the distribution of the cargo in hatches Nos. V and VI. The Pilot prefers to berth starboard too.

Fore and aft springs, use nylon ropes (no wires, to facilitate the handling by the boatcrews). Small tugs push vessel alongside. Anchor lowered with 1 shackle in the water, slacking away when necessary.

Cargo handling was good. Pallets were nicely stacked on the wharf. Provisions, vegetables and fruit, available.

Recommendation: Arrivals at daylight only. Consult Agents before signing papers.

AUTHORITY: Philippine Ports Authority, Port of Cagayan de Oro, Port Management Unit, Macabalan, Cagayan de Oro City, Philippines. *Tel:* 44-48, 45-48. *Contact:* Rogelio G. Soledad, Port Manager.

CEBU, Cebu Island: 10.18 N. 123.53 E. (See Plan Book)

See "General" before first port.

GENERAL:

Port of Cebu City: General Description:

Situated at the city frontage between Cebu and Mactan Island. 4,474 m. of quayside (including international and domestic zones).

3 finger piers at 155×32.8 m. The international zone has a length of 451 m., excluding the 2 finger piers.

3 government transit sheds on each pier with a total area of 6,264 sq.m.

Total port area is 423,245 sq.m.

Port District of Cebu:

(a) The National main Port of Cebu.

(b) Aside from the main Port of Cebu, there are 11 other ports within Cebu Harbour namely:

1. The Ludo Private Port.
2. The Mandaue Municipal Wharf.
3. Ouano Private Wharf.
4. San Miguel Corp. Private Wharf.
5. Fil Oil Depot Private Pier.
6. General Milling Corp. Private Wharf.
7. Matimco Private Wharf.
8. Opon Municipal Wharf.
9. Mobil Oil Depot Private Wharf.
10. Caltex Oil Depot Private Wharf.
11. Shell Island Depot Private Wharf.

DOCUMENTS: *For Entry:*

7 Copies of the Inward Foreign Manifest listing therein all cargoes to be discharged in the port.
4 copies of the Cargo Stowage Plan.
3 copies of the Store List.
3 copies of Bonded Store List.
3 copies of Firearms and Ammunition List.
3 copies of List of Drugs and Narcotics.
3 copies of Passenger List.
3 copies of Crew List.

The original copy of the manifest for all through cargo destined for other ports to be deposited with the Customs Inspector on board.

For clearance:

3 copies of Post Office Clearance (for mail discharged or loaded).
3 copies of Request for Clearance.
5 copies of B.C. Form 101 (Customs Inspector report on departing vessel).
5 copies of B.C. Form 98 (Clearance of Vessel to Foreign Port).
5 copies of B.C. Form 198 (Oath of Master).
3 copies of Quarantine Clearance.
1 copy of Plant and Animal Quarantine Clearance.
7 copies of B.C. Form 88 (Outward Foreign Manifest).
6 copies of B.C. Form 88–A (Statistical Supplement).
5 copies of Master's Oath covering list of officers on board.
5 copies of Crew List.

PILOTAGE: At least 48 hours before arrival, the Shipmaster shall transmit to the ship's Agent in Manila through the Coastal Station, Manila Radio (DSZ, operated by the Association of International Shipping Lines), a message indicating the ship's position and the estimated time of arrival (ETA).

In turn, the ship's Agent shall pre-arrange the meeting time at the designated boat station through a telegram to the Cebu Harbour Pilots' Association.

Boat Station No. 1:

One mile off Black Buoy No. 1 in the vicinity of Bantolinao Lighthouse, Mactan Island for foreign vessels coming from the North of Cebu Harbour.

Boat Station No. 2:

One mile off Lauis Ledge, Mactan Island for foreign vessels coming from the South of Cebu Harbour.

Visual Signals: Request for Pilot. The single hoist of the international code flag "G".

Sound Signals: Request for Pilot. The international morse code "G" or 2 prolonged blasts, followed by 1 short blast of the ship's whistle.

Pilot Boats:

During night-time:

1. All around white light on top of a red light in a vertical line.
2. Side lights.

During daytime:

A motor launch of approximately 20 gross tons, with the single hoist of the international code flag "H".

ANCHORAGE:

(a) 1st Anchorage: In front of Pier 3 in position, Lat. 10° 17.8′ N., Long. 123° 54.90′ E. Depth MLLW=4 fathoms.

(b) 2nd Anchorage: In front of William Lines Warehouse in position, Lat. 10° 18.0′ N., Long. 123° 55.25′ E. Depth MLLW=5 fathoms.

(c) 3rd Anchorage: In front of Aboitiz Terminal in position, Lat. 10° 18.2′ N., Long. 123° 55.5′ E. Depth MLLW=6 fathoms.

South Stream:

(a) 1st Anchorage: Opposite Ludo Wharf in position, Lat. 10° 16.88′ N., Long. 123° 53.43′ E. Depth MLLW=6 fathoms.

(b) 2nd Anchorage: N.E. of Cawit Island in position, Lat. 10° 16.54′ N., Long. 123° 53.33′ E. Depth MLLW=8 fathoms.

(c) 3rd Anchorage: Lat. 10° 16.17′ N., Long. 123° 53.28′ E. Depth MLLW=6 fathoms.

(d) Explosive Anchorage: South of Lipata Point, West of Lauis Ledge.

Anchorage Instructions:

(a) Only 3 vessels of 600 ft. overall length can anchor at the anchorage with a safety margin for dragging and swinging during bad weather with 4 shackles in the water recommended for safe anchorage.

(b) For each vessel of 600 ft. overall length with 4 shackles of anchor chain in the water, approximate turning circle radius is 960 ft.

PORT LIMITS: The Port Limits of Cebu define as: Cebu Harbour as that portion of the Strait between Mactan Island and the Island of Cebu within the following boundaries: an imaginary line extending from Bantolinao Point, Mactan Island, due North (true) to the Island of Cebu; and an imaginary line extending from Lauis Ledge, Mactan Island, to Lipata Point, Island of Cebu.

RESTRICTIONS:

1. Foreign ships are not allowed to pass the North Channel, due to the bridge between Madaue and Opon. However, ships of 80 ft. vertical height from MLW and length of 300 ft. may pass with utmost care.
2. Draft limitation of 40 ft. for Cebu Channel while port established berthing spaces vary from 10 ft. up to 30 ft.
3. Ballast, oil are prohibited to be discharged within the Cebu Harbour and Philippine waters.

MAX. SIZE: See "Berthing".

HEALTH: Pratique obtained after Quarantine personnel have boarded, mustered crew and passengers, and examined ship's health documents. Pratique automatic if vessel coming from another Philippine port.

RADIO: Globe Mackay & Radio Corp. Call letters DZM. (Other call letters and frequencies available).

Working Frequencies: 4328 kHz, 6492 kHz, 8656 kHz, 12984 kHz.

Listening Frequencies: 425 kHz and 500 kHz; 6258.5 – 6265.5 kHz; 8354 – 8374 kHz; 12531 – 12561 kHz.

Master may contact Cebu Stevedoring Company through Channel 1 (156.7 MHz) and Channel 2 (157.8 MHz) VHF.

VHF: Harbour Pilots may be contacted on VHF Channel 16.

BERTHING: Berthing may be done at any time during the day or at night and Masters should exercise their own judgment in this respect. Vessels moor either port or starboard side to, depending on prevailing conditions.

Port of Cebu: Berthing of vessels engaged in foreign trade are limited to moor only at the following berthing areas.

(a) National Main Port:

Berth Number	*Length of Berthing space (m.)*	*Draft Limitation (ft.)*
7	193	30
8	258	18
Pier 1 South side	153.65	25
Pier 1 North side	153.65	25
Pier 2 South side	155.65	25
Pier 2 North side	155.65	25

(b) Ludo Private Port: Berthing of vessels engaged in foreign trade at Ludo Private Port are moored to concrete dolphins running N.E. or S.W. of the Ludo Pier. Draft limitation: 40 ft.

Port Establishment of Mandaue: Berthing of vessels engaged in foreign trade are not allowed at Mandaue. Draft limitation: 12 ft.

Port Establishment of Madan: Berthing of vessels engaged in foreign trade are allowed at General Milling Corporation Private Wharf, and Shell Island Depot Private Wharf.

Port District	*Draft Limitation (ft.)*
General Milling Corp. Pvt. Wharf	25
Opon Municipal Port	15
Mobil Oil Depot	25
Caltex Oil Depot	25
Shell Island Depot	30

Cebu is a principal port of entry open to both foreign and domestic trade.

Other Ports of Entry under PMU-Cebu.

I. Mactan. Another port of entry, N.E. of the Port of Cebu City. Considered as an industrial port, it has jurisdiction over all of Mactan, Shell and Olango islands. Average ship call is 145 vessels (foreign and domestic) per month.

Other ports of entry under the jurisdiction of PPA-Mactan but owned by private entities are:

General Milling Corporation – A 275 m. private marginal wharf with an average depth of 12.20 m. Foreign vessels usually carry raw wheat materials for processing at GMC mills.

Mobil Oil Philippines – 97 m. long with an average depth of 9.90 m. Has total storage capacity of 424,162 bbls. Used exclusively by tankers.

Caltex – Shell – 156.34 m. long with total storage capacity of 273,750 bbls.

II. Tagbilaran. Situated at the S.W. portion of the island-province of Bohol, the Tagbilaran Port has a total area of about 10,393.48 sq.m. Average depth is 3.28 m. (This is an ongoing project. Reclaimation to 90 m. × 28 m. × 6.30 m. depth).

Pilotage is compulsory which is handled by the Tagbilaran Harbour Pilots Association.

Philippine Sinter Corporation (PSC) Private Port: Situated in Garcia Hernandez, S.E. of Bohol and is 53 km. from Tagbilaran City.

III. Other Private Ports Which Also Serve as Ports of Entry.

Atlas Consolidated Mining & Development Corporation (ACMDC). Under the jurisdiction of the PPA Subport of Toledo, this private port caters to ocean-going vessels which unload imported machinery and equipment, anhydrous ammonia, sulphuric acid among others. While those exported are copper concentrates and pyrite cinders.

Durano Private Port in Danao, Cebu.

APO Cement Corporation Private Port in Tina-an Naga, Cebu.

Philippine Mining Service Corporation Private Port, located at the Municipality of Dalaguete, Cebu caters to foreign vessels to load dolomite with the use of conveyor belts.

National Power Private Port, located at Tina-an Naga, Cebu caters to foreign and domestic vessels to load or unload coal.

Total Bulk Corp. in Mandaue City.

Prime White Cement in Asturias, Cebu.

Petrophil Corp. in Mandaue City.

TUGS: The Cebu Harbour Pilots Association has available tugs of varying h.p. When additional h.p. is required, Cebu Stevedoring Co. can provide tugboat with h.p. ranging from 350 to 690 h.p.

BRIDGES: The Opon-Mandaue Bridge crossing the North channel is completed and open to traffic. According to Cebu Pilots Association, clearance is 76 ft. at HW and 80 ft. at LW.

STEVEDORES: Ordered by Agents, no ETA to stevedores necessary from Master.

Cranes (50 ton floating crane), forklifts, trucks, tugs, barges and lighters are used for cargo handling and are mostly owned by private contractors.

MEDICAL: No advance notice to Agents needed. Hospital facilities available anytime.

TANKERS: See "Berthing".

DENSITY: 1030.

FRESH WATER: Most berths supply by shore installation, otherwise by barge or trucks.

FUEL: Fuel oil can be obtained by arrangement with the different oil installations on Mactan Island.

FIRE PRECAUTIONS: Tankers discharging: smoking only allowed in saloon (officers), crew in the messroom.

GANGWAY/DECK WATCHMEN: Services of watchmen necessary subject Master's recommendation.

OPENING/CLOSING HATCHES: Stevedores, with aid of ship's crew.

CUSTOMS ALLOWANCES: (Tobacco) 1 carton a week for each crew member. (Wine and/or Spirits) 1 bottle a week for each crew member.

IDENTIFICATION CARDS: Required by Immigration Authorities.

CONSULS: Norwegian 9-77-20; Chinese 7-45-85; American 7-31-51.

REPAIRS: Minor repairs possible.

DRY DOCK: Cebu Shipyard – max. 1,000 d.w.t. only. 5 smaller dry docks available (300 d.w.t. – 800 d.w.t.).

REPATRIATION: Facilities available.

AIRPORT: Distance 7 miles from port and regularly served by all domestic airlines.

TIME: Local time based on the 120° East meridian. GMT plus 8 hours.

HOLIDAYS: Cargo can be arranged during holidays, which are the following: New Year (January 1st); Holy Thursday; Good Friday; Bataan Day (April 9th); Labour Day (May 1st); Independence Day (June 12th); Republic Day (July 4th); Bonifacio Day (November 30th); Christmas Day (December 25th); Rizal Day (December 30th).

SHORE LEAVE: Possible after clearance from Immigration.

SERVICES: Compass adjusting services available. Contact Captain Chong at G.P. Shipping Lines or Captain Basa at Aboitiz Shipping Lines.

DELAYS: Berthing on North side of piers depends upon tide and current. South side of piers, vessel can dock any time.

PROPOSED PORT DEVELOPMENT:

I. *Container – Foreign Trade Terminal:*

Foreign trade terminal to be constructed at the Northernmost section of the PEA reclamation. It will be provided with facilities for handling containerised cargoes (both in domestic and foreign trade) and conventional foreign cargo. It will also accommodate the bulk grain handled by the National Grains Authority (NGA).

The terminal will be provided with 550 m. of deep water quays (−9.00 m. below MLLW designed for the first generation container vessel and a 15,000 d.w.t. mixed cargo freighter) and a back-up area of about 18 hectares. Completion expected early 1985.

The terminal layout allocated berths for domestic and foreign container traffic and a berth for conventional foreign traffic. The Southernmost section of the new waterfront will be used for NGA bulk grain handling.

The 4 berths will be designed for gradual installation of heavy lift level-luffing and gantry container cranes. The back-up area of the 4 container berths will be provided with a wide operational quay apron. A container marshalling yard of 19 hectares is planned for high stacking by a travelling bridge crane, a CFS area consisting of a 13,000 sq.m. shed, container stuffing/unstuffing dock, and a cargo delivery dock. The whole of the terminal area will be protected by a security fence. An access to the terminal is provided through a control gate complex which will include truck and car waiting and parking area, weighbridges on a connecting lane to PEA-planned outside road system. The position of the gate was planned in coordination with PEA/BANCOM's urban and traffic planning of adjacent new business centres. An auxiliary gate will connect the terminal with the other sections of the port area.

The new quay is aligned parallel to the existing PEA reclamation bulkhead and is located 70 m. seaward of it. This alignment resulted from the operational layout requirements and the constraints of PEA/BANCOM's urban planning. The gap between the new quay lines and the existing PEA reclamation waterfront is bridged at the Southwestern and by a short pile bulkhead having water depth varying from 9.0 m. to 7.5 m. The bulkhead is planned to be utilised as NGA bulk grain berth. The Northeastern section of the gap will be closed by a rubble dyke. The area between the new and the existing quay will be reclaimed after removal of the overlaying unsuitable seabed layers.

The main shore structure of the terminal are the CFS-transit shed, the gate complex, administrative building, fire station, maintenance shop and mobile equipment compound and pavings.

II. *Domestic Conventional Berths:*

The existing marginal waterfront and the adjacent available back-up area, excluding the section assigned to the deep water terminal, will serve, after rehabilitation, the domestic container traffic.

Engineering and rehabilitation works at the existing port area cover the paving of the 40 m. – 50 m. wide apron along the PEA reclaimed area including the installation of relevant facilities fencing of the 50 hectare section of PEA reclamation to be transferred to PPA control, including paving of interval circumferential and circulation roads and associated utilities.

III. *Cargo Handling Equipment:*

The expected volume of container traffic and introduction of foreign container services to Cebu will require specialised equipment in the port.

For the 1984 phase the equipment to be provided shall be 3-level luffing cranes, 3 transtainers, 7 tractors and 28 trailers.

IV. *Future Port Development:*

Reclamation of an additional area in the shallow basin Northward of the existing port will serve as the room for expansion of the proposed facilities. The area is divided into three development stages with varying implementation schedules, depending on its viability.

The proposed reclamation will have wider potential back-up areas, less constraints in layout design and the availability of the areas for Stages II and III for future expansion of cargo handling facilities. The disadvantages include the shortage of suitable fill materials, the probable settlement in the newly reclaimed areas and longer construction. (Detailed surveys and soil investigations have already been completed for these sites).

AUTHORITY: Philippine Ports Authority, Port of Cebu, 3rd Floor, MSK Building, Corner Juan Luna and Lapulapu Streets, Cebu City, Philippines 6401. *Tel:* 9-18-59, 7-08-15. *Cables:* PPA-Cebu. *Contact:* Antonio B. Elumir, Jr., Port Manager.

AGENT: See "Manila".

DADIANGAS (General Santos City): 06.06 N. 125.09 E.

(See Plan Book)

See "General" before first port.

PORT LIMITS: Port of General Santos embraces all that portion of Saranggani Bay bounded by an imaginary line extending across the bay from Tampuan Point to Sumpang Point, thence along the shoreline until the point of commencement (Lat: 06° 06′ N., Long: 125° 09′ E.). This shall include all foreshore areas and delineated port area of Makar Wharf.

DOCUMENTS: Vessels calling at General Santos are required upon entry to submit to the Philippine Ports Authority the following: 2 copies of inward manifest, passenger and crew declaration list, 1 copy of cargo storage plan, and hatch list and vessel particulars.

PILOTAGE: Pilotage is compulsory for all vessels of foreign registry of 100 g.r.t. and over, and domestic vessels of 50 g.r.t. or over. The pilotage district covers the waters and harbours of the Port of General Santos, Mulbuk, Saranggani Bay, Glan, Kiamba and other ports of South Cotabato.

Pilot Boarding Ground: One mile East of Dole Pier by a red and white pilot launch flying the "H" flag. Privately owned pilot launches are used by the Harbour Pilots in serving vessels calling at General Santos. The pilot launches are painted white and red with the marking "Pilot" at their bows and fly a small Philippine flag and the red and white flags. These launches are stationed at the Western end of the quay.

One Pilot is on duty for 5 successive days on a 24-hour basis with one Harbour Pilot as reserve.

Docking Priority: As a general rule, the port has adopted the "first-come-first-served" basis in determining berthing priorities of vessels, subject to the exceptions hereinafter provided. Vessel's arrival means the time a vessel drops anchor at the Anchorage Area when there is no available area at the time a vessel reaches the port's Boarding Area when a berth is available.

Navigation Signals:

The following signals are recognised by all Pilots:

The pilot jack hoisted at the fore.
The international code signals or P.T.
The international code signal P.T. by flashing lights.

APPROACHES: At sea, navigating towards Dadiangas, there is only 1 navigational marker (Tinoca Point in Saranggani Strait) and that is an approach from the open Pacific, about 40 miles from Dadiangas. There are no buoys, beacons or other radar targets. The sea and harbour approaches are open and free of obstruction, and there is deep water almost to the beach, all the way into Saranggani Bay. The only apparent hazard on approach are the numerous fishing craft that are fishing at night and working along the traffic lane. Nevertheless, the fishing craft are well lighted.

ANCHORAGE: Vessels drop anchors at the designated area along the Saranggani Bay Cove near Barangay Bula Zone and just off the city. Vessels proceed immediately upon arrival to the anchorage area either to wait for berth at the public or private wharves or to wait for Customs boarding formalities and quarantine.

Anchorage of vessels is prohibited at the Fairway area, between the Dolefil Pier and Makar Wharf.

RESTRICTIONS: No restrictions on entering the harbour limits even at night time, but shipping Agents must notify and secure permits from the Authorities before incoming vessels are allowed to enter.

MAX. SIZE: See "Berthing".

HEALTH: Foreign vessels calling at the port are inspected by Immigration Officers to determine whether the vessels observe quarantine rules and regulations or whether the vessels are free from any quarantinable or communicable diseases.

RADIO: There is a privately owned radio installation in Dadiangas which should be listened to for special instructions and late priority needs.

Dadiangas – Dole/Stanfilco Marine
Call Sign – DXA2
Frequency – 8722
Power – 250 to 300 watts
Open – 0630 to about 0700 hrs. daily. Special arrangement can be made provided the station has been advised earlier.

When at anchorage, 1 hour's notice of berthing is to be given on VHF Channel 16 by the ship sailing into the wharf.

Estimated Time of Arrival (ETA) Notices:

The Master of the vessel sends a radio message to the ship's Agent in Manila containing advance shipping information as follows: name of vessel, port of destination, discharging/loading point (public or private wharf, at anchorage or at berth), ETA, LOA (length overall), estimated draft while alongside (in metres), nature and tonnage of cargo for discharging, and special berthing or cargo handling gear/equipment requirement.

The ship's Agent relays this shipping information at the earliest possible time to the shipping line branch/agency or Agent either by telegram, long distance or radio message which in turn, the branch Agent applies for berthing and/or anchorage allocation at the PPA, Port of General Santos. In the case of foreign or domestic vessel where it has no local Agent, messages are sent to the Harbour Pilot and to the government concerned agencies and its supervisor usually comes to arrange with agencies involved in the berthing/anchorage allocation of the vessel.

BERTHING: Berthing of vessel is done by Harbour Pilot and assisted by tugboat anytime during the day or night.

Generally, the length and breadth of a vessel entering the approaches of the Port of General Santos do not pose any problem. Vessels always berth head in, starboard side to.

On approach to the dock, walk the port anchor out until 1 shackle is at the water's edge. When about half a ship's length from the wharf, Pilot will order the anchor paid out.

	Length (m.)	*Width* (m.)	*Depth Alongside* (m.)	
Public Berth:				
Makar Wharf	561	20	8.5	MLLW
Private Berths:				
Dole Pier	145	18	11.5	
GMC Wharf	47	9	12.6	
Congson Pier	(under construction)			

BULK CARGO FACILITIES: Bulk cargoes can be discharged/loaded at Makar Wharf, Dole Pier and GMC Wharf.

Port Services:

a. Port facilities servicing the banana, fish and pine industries with the use of refrigerated cargo container equipment are at the Dolefil Pier.
b. Port facilities servicing copra/by-products and other agricultural products are at Makar Wharf and GMC Pier.
c. Port facilities handling containers using the vessels' cranes or booms are at Makar Wharf, Dole Pier and GMC Pier.

SPECIALISED CARGO HANDLING FACILITIES: The port has no cargo handling facilities for Roll-on/Roll-off vessels or gantry cranes.

BRIDGES: None.

STEVEDORES: Agent of incoming vessel should advise and arrange gangs with cargo handling contractor at last 24 hours before arrival.

MEDICAL: There are three hospitals in General Santos City: Doctors' Hospital, St. Elizabeth Hospital and the General Santos Emergency Hospital. Shipping Agent makes arrangements with hospitals concerned in advance.

TANKERS: There are no available discharge facilities for tankers at the port except at the designated anchorage area where devices are installed by oil companies to allow vessels to discharge their cargo.

DENSITY: Variable.

FRESH WATER: Supply of fresh water is available alongside the quay. The Authority (PPA) has its own water system capable of supplying fresh water simultaneously to all vessels lying alongside the wharf. Present rate is P5.00 per ton.

FUEL: Supply of fuel or bunkering is done privately by local oil companies. A vessel shall be allowed to refuel at berth provided prior permit from the Authority is secured.

FIRE PRECAUTIONS: As a precautionary measure, vessels intending to refuel at the port are required to provide fire extinguishers for use in case of emergency.

CONSULS: None.

REPAIRS: Minor repairs at berth may be allowed provided that a permit is secured from the Authority.

DRY DOCKS: None.

SURVEYORS: None.

GANGWAY/DECK WATCHMEN: Shipping Agents arrange with private security agencies the hiring of gangway/deck watchmen when the service is needed.

HATCHES: Stevedores usually open and close hatches. But when a vessel is of different model and the hatches are constructed differently, Crew members are requested to assist stevedores.

CUSTOMS ALLOWANCES: Quantity of goods permitted for each Crew member to be held out of bond are goods the crew can use personally, usually one or two bottles of wine and a pack of cigarettes.

CARGO GEAR: Special cargo equipment used in the discharge or loading of heavy lifts can be arranged with private contractor.

REPATRIATION: Shipping Agent can arrange this with the Bureau of Immigration Office.

AIRPORT: There are two airports intended for domestic flights: Buayan Airport located 10.5 km. N.E. from the port; and the Allah Valley Airport in Surallah, South Cotabato is located 75 km. from Makar Wharf. The frequency of flight is twice weekly.

TIME: GMT plus 8 hours.

HOLIDAYS: There are about 11 public holidays in the Philippines. Cargo work can be arranged with the contractor during any of these holidays.

POLICE/AMBULANCE/FIRE: Use telephone system. Contact is made through the operator.

SERVICES: Aside from the usual services rendered by the port, other ancillary services which are performed by private contractors are bunkering, re-watering, victualling, tug assistance, mooring, etc.

SHORE LEAVE: Crew members are allowed ashore provided that at all times there are sufficient personnel on board to attend in case of movement/shifting of vessel lying alongside the wharf.

IDENTIFICATION CARDS: Seaman's book or shore pass is sufficient.
REGULATIONS: PPA gate pass system is enforced to regulate and control the movement of vehicles and pedestrians in the port zone.
DELAYS: Work stoppages due to rain/inclement weather.
GENERAL: The Port of General Santos is considered the country's first modern port and is equipped with the newly introduced cylindrical rubber fenders fixed to the wharf's cope line which serve as protectors to both berthing vessels and the wharf.
AUTHORITY: Philippine Ports Authority. Port of General Santos, General Santos City.

DAVAO: 07.04 N. 125.38 E. (See Plan Book)

See "General" before first port.
PORT LIMITS: Vessels enter the port through the Southern entrance of Pakiputan Strait. A vessel is considered to be an "arrived ship" and laytime will commence (subject to Charter-Party Terms) at the Pilot's boarding position located approximately 3 miles off the lighthouse at Sta. Ana Pier.
DOCUMENTS: Required on entry
The Philippine Ports Authority (PPA):
3 Inward Foreign Manifest.
1 Cargo Stowage Plan and Hatch List.
1 Passenger List.
1 Crew Declaration List.
The Bureau of Customs (BOC):
7 Inward Foreign Manifest.
5 Cargo Stowage Plan and Hatch List.
5 Stores List.
5 Bonded Stores List.
5 Firearms and Ammunitions List.
5 Drugs and Narcotics List.
5 Passenger List.
5 Crew Declaration List.
Clearance from last port of call.
PILOTAGE: The pilot station is furnished with a copy of the approved Application for Berthing/Anchorage Permit filed with the Port Authority 36 hours prior to ship's arrival, serving as a notice for meeting an incoming vessel.
ETA Notices: The Master of the vessel sends a radio message to the ship's Agent in Manila through the coastal radio station (DSZ) Manila, operated by the Association of International Shipping Lines containing the advance shipping information as follows:
Name of vessel.
Port of destination and discharging/loading point.
ETA.
LOA.
Estimated draft whilst alongside.
Nature and tonnage of cargo for discharging.
Special berthing or cargo handling gear/equipment requirement.
The ship's Agent in Manila consequently relays this shipping information to the local Agent at the Port of Davao either by long distance telephone, telegram or telex. Where the vessel does not have a local Agent, necessary messages are sent to the Harbour Pilot and Government Agencies directly involved; the supercargo normally comes a day ahead of the vessel's ETA.

Continued next column.

Signals: The following signals are recognised by all Pilots:
To ask for Pilot by day:
The pilot jack hoisted at the fore.
The International Code Signals or P.T.
To ask for a Pilot by night:
The pyrotechnic light, commonly known as blue light, flashed eve 15 minutes.
A bright white light, flashed or shown at short or frequent intervals jus above the bulwark for about a minute at a time.
The International Code Signal P.T. by flashing lights.
Pilot Launches: A total of 6 launches are regularly used by the Harbou Pilots distinctively painted red and white with a number preceded by "P at their bows and fly a small Philippine flag and a red and white fla 3 Pilots are posted to attend to all pilotage needs of vessels on a 8 hour shift scheduled for 24 hours. The pilot launches are stationed a Sta. Ana Pier, Sasa Wharf and Hijo Wharf.
The Pilot's boarding position is at 7° 02.0′ N., 125° 39.0′ E.
TUGS: There are no regular tugboats for vessels entering the port. Tug may be availed of on pre-arranged conditions from Luzon Stevedorin Corp.
ANCHORAGE: General Anchorage.
Sta. Ana Anchorage: Vessels awaiting berth availability, anchor abou 450 yards N.E. or S.E. of Santa Ana Pier in 12 fathoms, mud The anchorage is well protected except during the S.W. monsoon.
Loading Anchorage.
Maco Anchorage: Anchor in 50 fathoms with the sawmill bearing 057 the white plantation house near the mouth of Madaum River bearin 288°, and, the Western tangent of Bassa Point bearing 223°. The botto is mud and evidently is good holding ground.
Tambungon Anchorage: Anchorage can be taken in 10 to 20 fathom with good holding ground.
Bunawan Anchorage: Vessels anchor Eastward of the ruined pier in 8 t 15 fathoms.
Tibungco Anchorage: Vessels anchor Eastward of the ruined pier abou 0.5 mile offshore in 12 to 15 fathoms.
Talomo Anchorage: Vessels anchor at the Southwestern part of the ba in 20 fathoms, mud bottom. It is open to the S.W. monsoon.
Daliao Anchorage: Vessels anchor about 300 yards Southeastward o the ruined pier in 8 to 15 fathoms. This anchorage is exposed to Easter winds and sea.
Tagabuli Anchorage: A deep inlet, 0.9 mile long and about 500 yard wide, is 2.3 miles Northward of Digos Point. The anchorage is protecte from winds, except those from E.S.E., is in the middle of the bay in 16 t 20 fathoms, mud bottom, where the width of the bay is about 400 yard between the edges of the reefs.
Malalag Anchorage: Anchorage for vessels of any size and with mor protection is Northeastward of the pier in 16 to 19 fathoms, mud bottom Vessels entering the bay for shelter will find good protected anchorag between the islet near the head of the bay and the North shore i 20 fathoms mud.
RESTRICTIONS: There are no particular restrictions in entering th harbour limits, even at night time, after prior advices have been serve and prescribed berth/anchorage permit has been secured from the Po Authority.
MAX. SIZE: Generally, length and breadth of any vessel does not pos a problem in entering the approaches of the Port of Davao, howeve berthing in individual ports varies on the ports' facilities an characteristics as listed: See table below.

Name of Port Facility	*Location*	*Controlling Draft (m.)*	*Length Overall (m.)*	*Approx. Heading/ Position*	*MLLW Elevation (Sea Level) (m.)*	*Remarks*
A. Principal Ports. (Port of Entry).						
1. Sasa Wharf	Sasa, Davao City	N–14.8 C–11.0 S–13.5	920.0	007°/187°	10.0	General cargo.

8. HPI Wharf	Madaum, Tagum Davao,	13.0	270.0	318°	4.3	General cargo, banana berth.
D. Municipal Ports						
1. Dawis Pier	Digos, Davao del Sur	5.0	27.0	6° 45′ N. 125° 30′ E.	2.5	General cargo, domestic only.
2. Malalag Wharf	Malalag, Davao del Sur	10.0	30.0	6° 36′ N. 125° 35.5′ E.	5.0	Cane molasses and general cargo.

HEALTH: Vessels arriving from foreign ports are subject to quarantine inspection at their first port of call in the Philippines. A vessel inspected and granted a Pratique in a Philippine port is not subject to quarantine inspection at its next Philippine port of call except when during the trip there has been a case of illness or death on board or its last Philippine port of departure is infected with a quarantinable disease.

Vessels from the U.S.A., Canada, Australia, or New Zealand are permitted to enter a port, disembark and commence operations provided they have complied with the provisions of the Controlled Free Pratique.

The following are required from the Master:

1. Maritime Declaration of Health duly signed by the Master.
2. Crew List.
3. A valid Derat and/or Exemption Certificate.
4. Cargo Manifest.

For any suspected disease or fever on board, the following will apply:

1. For quarantinable disease, special measures by the Quarantine Medical Officer will be undertaken to prevent its entry.
2. For a non-quarantinable disease, patients should be disembarked and hospitalised and the local Health Officer notified. For non-landing patients, they should be isolated on board and treated.

RADIO: Other than those mentioned under "Pilotage", all messages from vessels to Agents can be sent via Apo Communication Service in Davao City, HF frequency DXF and VHF, DXF-6.

VHF: Radio communication facilities are not available linking vessel to landside operations. Maritime Company of the Philippines and Everett Steamship Corp. have VHF radio sets capable of connecting a ship in port to local office communication.

RADAR: No radar facilities available.

BERTHING: For details of available berths and types of cargoes handled respectively thereat, see table of port facilities under "Max. Size". Normally, discharging and loading of cargoes are by ship's gear.

CRANES: 65 ton, 35 ton and 25 ton cranes are available at Sasa Wharf and 30 ton cranes at Legoil and Tefasco wharves.

BULK CARGO FACILITIES: Bulk cargoes, if any, are handled at general cargo berths. Loading rate is from 10-20 tonnes per net gang hour at Sasa government wharf and various banana berths.

SPECIALISED CARGO HANDLING FACILITIES: There are none available, except for those mentioned as oil berths, all other ports are utilised as multi-purpose berths.

BRIDGES: The fairway is clear of bridges.

STEVEDORES: Upon arrival, the Arrastre Stevedoring Company is furnished a copy of the Application for Berthing Permit which is filed 36 hours prior to ship's arrival. Based thereon, gangs are mobilised as would be necessary to service the size of cargoes to be handled.

Conventional cargoes are worked at the rate of 14 tons per net gang hour at Sasa government wharf.

MEDICAL: There is 1 government hospital and 4 private hospitals in the area equipped with adequate medical services and facilities.

TANKERS: Diameter of discharge lines at oil berths range from 1.5 in. – 8.0 in.

DENSITY: Average salinity – 1025.

FRESH WATER: Fresh water is available and delivered either through tank lorries or barges; tank barges also service vessels worked at loading anchorages.

Point of Delivery	*Distance (Nautical Miles)*	*Minimum Delivery (Tons)*	*Method of Delivery*
1. Source	—	—	
2. Sta. Ana	10	50	Barge
3. Sasa	12	50	Barge Lorry
4. Panacan	16	50	Barge Lorry
5. Panabo	24	100	Barge
6. Madaum	29	100	Barge
7. Maco & Malalag	31	200	Barge

FUEL: All grades available – bunkering and other special fuel.

Mindanao Trucking Corp Lanang, Davao City Tel: 7-55-15, 7-41-33.
Caltex (Phils) Inc Sasa, Davao City Tel: 7-82-52.
Shell Chemicals Co (Phils) Inc Sasa, Davao City Tel: 7-84-91, 7-91-17.

FIRE PRECAUTIONS: At the oil berths, there are no specific fire precautions other than the usual non-smoking precaution.

CONSULS:

Japanese Consulate	Tel. No. 7-37-81
Indonesian Consulate General	Tel. No. 7-84-86

REPAIRS: Engine overhaul; all types of deck repairs; underwater bottom cleaning.

DRY DOCKS: Temporarily non-operational; capacity – 1,600 g.r.t.

SURVEYORS: R. J. del Pan Mindanao Surveyors, Inc. representing Lloyds, A.B.S., N.K.K., Cargo and Marine Engineers, P&I Club, G.L. and Cargo Gear Bureau.

GANGWAY/DECK WATCHMEN: Watchmen recommended. Minimum cost per watchman – Philippine P.4.50 per hour.

HATCHES: Normally, opening/closing of hatches is carried out by the stevedores.

CUSTOMS ALLOWANCES: Crew members are allowed to bring out supplies to be held out of bond but not to cost more than P.10.00 per article. Generally, sufficient amount for crew's consumption while in port is permitted.

CARGO GEAR: Ship's gear usually used in loading and discharging. When shore cranes are needed, vessel's notice to Agent should contain the requirement.

REPATRIATION: The Immigration Station can effect crew changes and likewise, allow the disembarkation of alien seamen for repatriation to their countries of origin, provided, they possess valid travel documents. Final repatriation shall be effected in Manila after securing the necessary immigration clearances.

AIRPORT: Davao International Airport, 3 km. from Sasa Wharf. Regular daily jet flights to Manila and other major cities. Turbo-prop services available for other points.

TIME: GMT plus 8 hours.

HOLIDAYS: New Year's Day (Jan. 1st); Holy Thursday; Good Friday; Labour Day (May 1st); Independence Day (June 12th); National Heroes Day (Nov. 30th); Christmas Day (Dec. 25th); Rizal Day (Dec. 30th). Special holidays declared by the President of the Philippines. Work can be arranged on any holiday with the shipping Agent.

POLICE/AMBULANCE/FIRE: Police Tel: No. 7-26-48; Ambulance Tel: No. 7-27-31; Fire Tel: No. 07.

EMERGENCY CO-ORDINATION CENTRE: Philippine Port Authority, Sasa Wharf, Davao City 9501, P.O.Box 501, Philippines. Main office: Tel: 7-40-12, 7-17-33, 7-47-98; Sasa Terminal Office: Tel: 7-95-86; Sta. ANA Sub Office: Tel: 7-49-54. Mati Sub-port: Tel: 596.

TELEPHONES: No facilities for placing telephones onboard.

SERVICES: Cleaning on board is done either by stevedores or hired deckhands with the use of ship's equipment.

SERVICES AVAILABLE: Catering, laundry, Shiphandling.

SHORE LEAVE: Crew members are issued shore pass by the Bureau of Immigration Officers.

IDENTIFICATION CARD: Seaman's Book is sufficient.

REGULATIONS: All vessel's movements and works thereof are regulated by the Port Authority.

DELAYS: Usual causes of delays are due to non-availability of berth and rain.

GENERAL: Sasa Wharf, St. Ana Pier, and Mati Wharf are government port facilities; the others are privately-owned.

SHIP SUPPLY SERVICE:

Launches Services:

Arcal Development Inc. Cor. Guzman & 3rd Ave., Davao City. Tel: 7-69-32, Gen. Manager: Mr. Rafael N. Garcia.

Coco Traders Inc. Cor. 2nd Ave., Sta. Ana, Davao City. Manager Mr. Ricardo Ng Suy.

Garcia's Water Transportation, Dona Rosario Bldg., Guzman St., Davao City. Tel: 7-66-60. Manager: Antonio D. Garcia.

DEVELOPMENTS: Proposed construction of 60 m. × 108 m. transit shed and pavement of container stacking area with drainage and lighting system facilities.

SHIPMASTER'S REPORT: September 1977 (Updated 1984).

Documents:

14 Copies Inward Foreign Manifest
12 Copies Crew List
8 Copies Passenger List
8 Copies Narcotic List
8 Copies Personal Effects List
10 Copies Store List
5 Copies Vessel's General Information
8 Copies Money List
8 Copies List of Arms and Ammunition
8 Copies Parcel List
1 Copy Clearance from last port
2 Copies Quarantine Declaration
8 Copies Plant List
8 Copies List of Animals

Note: Narcotic List, Money List, List of Ammunition and Arms, List of Plants and Animals may be on the same sheet.

Radio/VHF Communications:

APO Communications DXF and Marphil Radio. The Agents Maritime Company of Phil and Everett Steamship Company are equipped with VHF in their offices.

Berthing (for bananas):

1. HPI Wharf – Del Monte, Banambo, Fruiti Rita bananas
2. Tadeco Wharf – Chiquita bananas
3. Pacinter Wharf – Dole bananas
4. MCP Wharf – Del Monte bananas.

Berthing (for general cargo):

Sasa Wharf: Max. draft North 14.8 m., Centre 11.0 m. and South 13.5 m.; max. length 920 m. with 1 Ro-Ro berth, 2 container berths and 4 general berths.

Hospital: Davao Medical Centre (government-owned); Brokenshire Memorial Hospital, San Pedro Hospital, Davao Doctors' Hospital, Ricardo Limsu Medical Centre. All hospitals located in Davao City.

Identification Card: Not required.

Shore Leave: Curfew hours from 2400 (0000) up to 0400 hrs.

Repatriation: Expensive. Crew to be escorted by one Immigration Officer from Davao City to Manila and all expenses including overtime of Immigration Officer to be charged to Owner's account.

Holidays: New Year – Jan. 1st; Bataan Day – April 19th; Labour Day – May 1st; Independence Day – June 12th; Fil-Am Day – July 4th; All Saints Day – Nov. 1st; Bonifacio Day – Nov. 30th; Christmas Day – Dec. 25th; Rizal Day – Dec. 30th.

Bunkers: Fuel, diesel and lube oils available, clearance takes only a short time.

Shipchandler/Laundry: Available, prices reasonable.

Working Gangs for Painting Cleaning etc (1984): Foreman: regular time – Peso 5.26/hour; overtime – Peso 7.10/hour. Ordinary workers: regular time – 4.35/hour; overtime – 5.87/hour.

Other charges: Meals. Foreman require 3 meals per day; ordinary require 2 meals per day. Transportation included in working hours.

Repairs of Ship's Instruments: Radar – any type; Radio – any type; Gyro – any type.

Ship Repairs: Minor.

Time: Standard time minus 8 hours on GMT (but 1977 was the first year with Summer time which commenced in March until September.)

AUTHORITY: Philippine Ports Authority, Port Management Unit, Port of Davao, P.O.Box 502, Sasa Wharf, Davao City 9501, Philippines. *Tel:* 7-17-33, 7-40-12, 7-47-98. Sasa Office 32-72, 33-82. Sta. Ana Office 7-49-54, 32-73. *Telex:* ITT 48200 or 40104 PPA-Davao. *Cables:* PPA-DAVAO *Contact:* Vicente T. Suazo, Jr., Port Manager.

AGENT: See "Manila."

DUMAGUETE, Negros: 09.15 N. 123.18 E.

REPORT: August 1983.

Bacong Ammonia Terminal.

PILOTAGE: Pilots/Port Officials come from Dumaguete City, which is approx. 10 km. North of Bacong Terminal.

MAX. SIZE: Max. draft 12 m., max. d.w.t. 20,000 tons.

TUGS: No tug assistance.

BERTHING: Length of pierhead – 40 m. Wooden fenders fore and aft, 40 m. from pierhead.

HOSE CONNECTION: 6 in. single manifold. Pipe-line 6 in. diameter, 300 m. long, leading to shore tank with 6,000 tonnes capacity.

GINGOOG, Mindanao: 08.50 N. 125.06 E.

SHIPMASTER'S REPORT: October 1982.

The loading berth for Copra expeller pellets is situated in position Lat. 8° 52.5′ N., Long. 125° 02.6′ E. This is not marked on the Admiralty Charts. There is deep water all around and the approach is fairly safe. The Pilot boards about 1.5 miles N.E. of the berth and approaches in a mechanised canoe with outriggers. Vessel is berthed either side alongside depending on the flood or ebb. No night pilotage. The loader height is sufficient and deep water at the berth. No VHF facilities. Repatriation not possible. Neither fresh water or bunkers can be supplied at this berth. No piracy or thefts but vigilance of security should not be neglected.

HONDAGUA, Luzon Island: 13.56 N. 122.14 E.

SHIPMASTER'S REPORT: 1974.

APPROACHES: B.A. Charts 3806 and 3475, neither of which are of very much assistance. There are no navigational marks by night, but the water is deep and we made a comfortable approach by Radar.

PILOTAGE: Minimum 12 hours' notice required. Pilot boards at Siain, a village 10 miles West of Hondagua on the North coast of the mainland. Pilot boat is a small dug-out canoe fitted with outriggers and an outboard motor, and by day exhibits the pilot flag, and at night a single white light similar to a normal fishing canoe. Pilot shouts to attract attention when close to the vessel at night.

DOCUMENTS: Officials embark at Siain but not before 0630 hrs. due to curfew. Accommodation ladder required. All documents required as for first port of entry, excepting quarantine which is not performed twice.

10 Ship's Store Lists.
8 Crew Personal Effects lists.
12 Crew Lists.
3 Health Declarations.
2 Visaed Crew Lists.
2 Plant Quarantine Lists.
2 Animal Lists.

Officials disembark again at Siain with the exception of the 3 Customs Officers, who remain on board and who require meals and accommodation.

TUGS: Not available.

BERTHING: One berth only, for grain discharge and for coastal tankers supplying fuel to the Mill. Berth lies East/West with approx. depth at LW East Dolphin 28 ft., Elevator about 34 ft. 6 in., and West Dolphin about 39 ft. The berth is thought not to be suitable for vessels exceeding 500 ft. LOA. The dolphins are of timber-pole construction, and the elevator is concrete. Arrival and departure from the berth is during daylight only. Mooring arrangement is 2 headropes to buoy, 2 breastropes to shore, spring-wire to bollard on elevator, 4 sternlines to concrete dolphin, and 1 spring-wire to bollard on elevator. An old landing-barge is used as a mooring boat, but this has only one engine on the port side and is not very manoeuvrable. A motorised dug-out canoe also assists, but is not powerful enough to pull a line very far. The elevator has two discharging suckers, but these are fixed and the vessel has to be shifted hatch to hatch. Combined capacity about 80 t.p.h. which could be improved, but foundations of conveyor-belt system damaged by earthquakes.

FRESH WATER: Available at berth but not of very good quality. Ship's hoses required.

AIRPORT: None. There is a train service to Manila, about a 6 hour journey.

CURFEW: Area is under Martial Law. Curfew from 2300 to 0600 hrs.

ILIGAN, Mindanao: 08.14 N. 124.14 E. (See Plan Book)

PILOTAGE: Pilotage for docking and undocking at government and privately owned piers/wharves for foreign vessels is compulsory. For domestic vessels pilotage is necessary only when docking. The Harbour Pilot meets the vessel 1 to 2 miles N.W. of the pier. Vessels coming from foreign ports intending to dock at any of the private piers will first anchor at designated anchorage area for boarding formalities.

ANCHORAGES: Anchorage areas are found at least 0.5 to 1 mile from beaches and wharves and the average depth varies from 37 m. to 56 m. The characteristics of the bottom near the beach is muddy. Beyond 0.5 mile is good holding ground of sand and gravel. In case of strong S.W. winds, vessels may resort to the natural protection of the mountains of Initao and Kiwalan.

RESTRICTIONS: See "Berthing".

MAX. SIZE: Max. LOA 240 m. Max. Draft 25 ft. and 15,000 d.w.t. at Pier No. 3 (For foreign-going vessels).

HEALTH: Vessels clear quarantine upon arrival from foreign port. Health Officer boards the vessel 2 miles off the pier at designated quarantine area.

TUGS: The Iligan Harbour Pilot's Association owns 2 tugs both serving the domestic and foreign vessels. The use of tug is necessary especially when docking and undocking foreign vessels on government and private piers. Additional tugs are also available if the Harbour Pilot thinks necessary. It is important that the Masters of vessels/shipping Agents notify the Harbour Pilot at least 48 hours in advance of vessels arrival to ensure the availability of tugs.

BERTHING: Berthing for domestic vessels may be done anytime of the day or night. Foreign-going vessels berth during daylight hours and undock at anytime.

	Length	*Width*	*Depth*
Pier No. 1 (Concrete)	96 m.	12 m.	5.4 m.
Pier No. 2 (Concrete)	96 m.	12 m.	5.4 m.
Pier No. 3 (R.C. Wharf)	240 m.	15 m.	7.62 m.

STEVEDORES: Domestic and foreign-going vessels proceeding to Iligan should cable their Agents or representatives as to their ETAs, at least 24 hours prior to arrival in order that the stevedoring company may assign sufficient number of gangs to the vessel. Later, if the ETA is revised, shipping Agent should immediately notify the Arrastre and stevedoring firm of change. The Arrastre and stevedoring firm that controls the government pier in Iligan is handled by the Iligan Merged Arrastre and Stevedoring Corporation (IMASCO).

FRESH WATER: Fresh water is available to vessels loading or unloading at Pier No. 1 and 3 which is equipped with connection direct from the City Waterworks.

FUEL: Bunkers are available provided prior notice is given through the ship's Agent.

IDENTIFICATION CARDS: Not required.

CONSULS: In Manila.

REPATRIATION: Local Immigration takes care of any repatriation or disembarkation provided advance notice and they are given names and destination of each crew member.

AIRPORT: Baloi Airport 15 km. Cagayan de Oro Airport 110 km.

TIME: GMT plus 8 hours.

HOLIDAYS: New Year's Day (January 1st); Holy Thursday and Good Friday (movable); Labour Day (May 1st); Independence Day (June 12th); RP-US Friendship Day (July 4th); Thanksgiving Day (September 21st); Christmas Day (December 25th); Rizal Day (December 30th). Special holidays declared by the Prime Minister of the Philippines are also included. Legal holidays which fall on Sundays are observed the following day. Cargo work can be arranged on any or all holidays with the vessel's Agent.

POLICE/AMBULANCE/FIRE: Police Tel. 101. City Hospital Tel. 20593. Fire Dept. Tel. 103

GENERAL: It is necessary during berthing and unberthing that the ship's engines, tackle and all other gear be in an operating condition and in a state of readiness for use at the moment's notice as required.

TELEPHONES: Placing of telephones on board foreign vessels is not available at present.

DEVELOPMENTS: Coal Terminal under construction, ship unloader to have 500 t.p.h. capacity.

SHIPMASTER'S REPORT: 1974

Approaches: B.A. Chart 3426. This is of not very much use as an approach chart as the scale is too small. However, the water is deep and therefore it does not matter too much. On this voyage we made an approach in darkness and solely on Radar. The only navigational light, a fixed red, being very hard to distinguish.

Pilotage: The Pilot boards about 1 mile N.W. of the piers. Pilot boat is a river-type launch about 50 ft. in length with a grey hull and a white funnel.

Anchorage: 2 cables from old-harbour piers. 7 shackles in 50 fathoms.

Radio: No VHF facilities.

Officials: Iligan is a Port of Entry. Officials board at the anchorage. Accommodation ladder required. Usual procedures take about 1 hour to 1 hour 30 minutes.

Documents:

20 Ship's Stores Lists.
14 Crew Personal Declarations.
3 Vaccination, and inoculation dates.
3 Ports of Call and dates for previous 3 months.

Immigration: Before leaving last foreign port for the Philippines, obtain 4 official Crew List Forms from the Philippine Consul. Complete these forms and have them visaed by the Consul who will retain 2, and return 2 to the ship. Passes are required for crew members going ashore.

Customs Allowance: 1 bottle and 200 cigarettes per person. 3 Customs officers live on board all the time, and require accommodation and meals.

Tugs: Up to 4 tugs available if required, but it is advisable to give notice of requirements well in advance, since these tugs may be engaged in towing barges elsewhere around the island.

Berthing: Quinalang Cove: 1 grain discharge berth. Depth at berth 40 ft. and ample room for a vessel of 600 ft. L.O.A. Discharge is by suckers direct to the Silo. There are 2 suckers with a combined average discharge rate of 100 t.p.h., but suckers are located in fixed positions requiring the vessel to be shifted hatch to hatch. Berth is well-fendered with a shore gangway. Stevedores supply a good hatch-tent for working in the rain. 1 bulk-copra loading berth, 600 ft. in length and draft said to be 32 ft. 1 bulk-cement loading berth, reported to be capable of accommodating vessels of 25,000 g.r.t.

Camp Overton: Located South of Iligan, there is reported to be a steel loading berth to accommodate vessels of 750 ft. length, and 36 ft. draft.

Fresh Water: Available at most berths.

Shore Leave: Crew members should take special care when proceeding ashore, and should not carry cameras or wear wristwatches, etc. It is advisable to return aboard before darkness.

Airport: About 20 miles distant. Daily flights to Cebu and Manila.

Stores: Fresh fruit available, also good supply of seafood.

Repairs: Only very minor repairs can be undertaken.

Time: GMT plus 8 hours.

SHIPMASTER'S REPORT: September 1976.

Coconut Oil Berth: Located at "Quinalong Cove" 08.17 N., 124.15 E. Least depth of water in channel from sea to berth – 40 fathoms. Mean tidal range 5 ft. Density 1025. Nature of bottom at berth – mud. Vessels can berth in daylight only, unberthing anytime.

Anchorage: 3 cables S.W. of City Pier. Depth at LW 70 fathoms, cable should be "walked out".

Vessel's hoses used, length of shoreline 300 m., size 12 in. No shore booster pumps used. Products handled, coconut oil and coconut products.

Pilotage: Compulsory. Pilot requires 24 hours' notice and boards 1 mile N.W. of City Pier.

Max. size of vessel that can enter the port of Iligan is 100,000 d.w.t. and draft 45 ft. Keel clearance required, about 2 ft.

5 small and medium size tugs available.

Nearest consuls are in Manila.

Facilities available: Fresh water, 5 t.p.h. Fresh provisions. Laundry.

No slop tanks, surveyor, repair facilities, fuel.

Documents:

2 Visaed Crew Lists (Philippine) from previous port. If diverted at sea, a copy of the diversionary cable required.
6 Ordinary Crew Lists.
6 Personnel Effects Lists.
6 Store Manifests.
6 Parcel Lists.
6 Arms Lists.
6 Mail Lists.
6 Narcotics Lists.
6 Animal Lists.
6 Plant Lists.
6 Cargo Manifests.
6 Transit Manifests.
6 List of Ports.
6 Currency Lists.

There is a cabin search by 4 Customs Officers, accompanied by 2 Ship's Officers. They collected an undeclared radio and 2 cameras. They did not impose any fine, as they said they had been courteously treated, and this was the vessel's first visit.

3 Customs Officers remain aboard, and have to be fed.

AUTHORITY: Philippine Ports Authority, Port of Iligan, Port Area, Iligan City, Philippines. *Tel:* 21013, 21022 and 21780. *Contact:* Ferdinand C. Piencenaves, Port Manager.

ILOILO, Panay: 10.41 N. 122.35 E. (See Plan Book)

See "General" before first port.

PORT LIMITS: Also see "Anchorage" – last paragraph. Iloilo Harbour is defined as that portion of Iloilo Strait within the following boundaries: an imaginary line extending from the Northern bank of Dumangas River, Island of Panay, across Iloilo Strait to Navalas Point on the Northern coast of Guimaras Island; thence along the N.W. and West shore of Guimaras Island to Luzaran Point thence along an imaginary line extending from Luzaran Point to the South bank at the mouth of Siuaragan River in the municipality of San Joaquin, Province of Iloilo, Island of Panay. Thence along the Southern shore line of the Island of Panay to the North bank of Dumangas River, the point of commencement.

DOCUMENTS:

Bureau of Customs:

1. On Arrival:
   7 Inward Foreign Manifests.
   3 Crew Lists.
   3 Personal Effect Lists.
   3 Store Lists.
   3 Arms and Ammunition Lists.
   3 Narcotics Lists.
   3 Mail Lists.
   3 Bonded Stores Lists.
   3 Passenger Lists.
   3 Storage Plan (if vessel has cargoes to be discharged).
   2 Bills of Lading.
   1 Clearance from last port of call.
2. On Departure:
   4 Statistical Supplement (for vessels leaving directly for a foreign port).
   7 Outward Foreign Manifests.

Philippine Ports Authority:

1. On Arrival.
   2 Inward Foreign Manifests.
   2 Passenger Lists.
2. On Departure:
   2 Outward Foreign Manifests.

PILOTAGE:

1. Application (notice) for pilotage services is usually made by a shipping Agent at least 24 hours before the vessel's arrival. Notice may also be tendered via a commercial telegraph office addressed to Iloilo Harbour Pilot Association, Muelle Loney St., Iloilo City. The Pilot Association does not own any VHF radio.

2. The Pilot Association owns 5 standard-designed pilot boats, with one being utilized as water taxi for vessel's crew intending to go on shore leave.

3. Request for pilotage services may be done in either of the following ways:
(a) 2 long and 1 short blast of the vessel's whistle.
(b) Continuous flashing of blue light during night time.
(c) Display of the international "G" flag during daytime.

4. There are 2 pilot stations where the Pilot may be taken aboard, namely:
(a) Sinapsapan Point at the South entrance, 8 miles from the port.
(b) Nabalas Point at the North entrance, 12 miles from the port.

5. With respect to the boarding and safety measures, the Pilot requires a sturdy and reliable pilot ladder.

ANCHORAGE: (proposed)

The anchorage of the Port of Iloilo is that portion of Iloilo Strait within the following boundaries: an imaginary line extending from Balabago Point, Island of Panay across Iloilo Strait up to Cabugao Point on the Northern Coast of the Island of Guimaras, thence along Northwest and West Shore of Guimaras Island to Bondulan Point; thence along Southern shore line of the island of Panay to Balabago Point, the Point of commencement.

Note: A vessel is considered "arrived" after it drops anchor at any point within the boundaries described above.

RESTRICTIONS: Generally, a vessel may enter the port from the pilot station at any time of the day or night. However, said entrance of the vessel is restricted by the draft of the vessel and the tide at the time of entrance. At MLLW, only vessels with a maximum draft of 28 ft. may enter or depart from the port. At high water (5 ft.) vessels with a maximum draft of 33 ft. may enter or depart from the port.

MAX. SIZE: Foreign pier has a total length of 345 m., Berth 2 (100 m.) has a controlling draft of 33 ft. alongside at MLLW.

HEALTH: The port has 1 Quarantine Doctor. Quarantine formalities are done while vessel is at the Quarantine Station. Notice for quarantine formalities is usually given by the shipping Agent 24 hours before the vessel's arrival.

The following documents are necessary for presentation to the Quarantine Officer on arrival.

A. On Arrival:
1. Derat Exemption Certificate. (If expired or about to expire, the same could be renewed at the port for a period of 6 months).
2. International Certificate of Vaccination. (If expired or about to expire, vessel crew could be vaccinated locally).
3. Maritime Declaration of Health. (Form to accomplish available locally).

Above documents are necessary for the issuance of Free Pratique.

B. On Departure:
1. Quarantine Clearance for Outgoing Vessels. (A fee of P4.00 or approximately $0.53).

Free Pratique is issued at the first port of call. It becomes automatic if the vessel intends to call at another port within the Philippines.

RADIO: Coastal Marine Radio Station:

Location:	Lat. 10° 41.4′ N., Long. 122° 32.8′ E.	
Call Sign:	DYV	
Frequencies:	8632 kHz.	0000 GMT – 0400 GMT 0600 GMT – 0900 GMT
	12948 kHz.	0900 GMT – 1130 GMT
VHF	Channel 16	

Also private telegraph companies with international relaying stations; Central Radio Communications, Radio Communications of the Philippines., Inc.

VHF: Retransco has a VHF radio. Frequency: Channel 1 – 156.8 MHz, Channel 2 – 156.65 MHz.

TUGS: Tugboats usually join vessels for docking and undocking operation. The services may be provided by the pilot's boat or tugboats of the Visayan Stevedoring & Transportation Corp. The charge is P150.00/tug during daytime and P180.00/tug during nightime.

BERTHING: Also see "Shipmasters Report".

The port has a foreign pier near the mouth of Iloilo River. It has a length of 345 m. divided into 3 berths of 115 m. each. The maximum draft alongside the pier at MLL is 28 ft. However, a vessel may be loaded up to the draft of 31 ft. (at MLL) with the use of a mule barge.

Usually, loading and discharging are done with the use of the vessel's own gear, except catch-all nets and crane for heavy lift cargoes which may be provided by the Stevedore operator.

The Arrestre operator is capable of handling general and heavy lift cargoes, cargoes in bags (like sugar, fertilizers, cements, copra cake, etc.). Bulk loading may be done also by "bleeding" cargoes in bags directly into the vessel's hold.

CRANES: 1 crawler crane with 15 ton capacity owned by private Arrestre. The Ministry of Public Highways has 4 heavy-lift cranes of 25 tons capacity.

BULK CARGO FACILITIES: Within the harbour limit of the port is sugar bulk-loading installation situated at Jordan, Guimaras Island. The berth is capable of accommodating a vessel with a LOA of 182 m. and a draft of 35 ft. at MLL.

Loading is done with the use of a mechanical conveyor which has a rated capacity of 400 – 500 tonnes per hour. The discharging gear has a maximum height of 30 ft. above HWL.

Cargo handled in this berth is exclusively sugar in bulk.

SPECIALISED CARGO HANDLING FACILITIES: The port is *not* specially equipped for handling containers or Ro/Ro traffic.

LPG facilities at Petron.

STEVEDORES: An advice of 24 hours before the vessel's ETA is required to prepare the gangs necessary to perform stevedoring services. Stevedoring services can average at the rate of 900 – 1,000 tonnes of loading/unloading per 24 hours.

MEDICAL: The port itself does not own any medical facilities. However, within the City itself are 6 modern hospitals which could be used by the vessel's sick crew. Vaccinations and inoculations may be done by the Quarantine Doctor who also issues corresponding certificates for the same.

TANKERS: Bunker is handled through 6 in. pipe-lines; however, Petron load bunker through a 4 in. pipe. "White oil products" are handled through 8 in. pipes. There are 2 privately owned oil-water separators.

Types of oil available: premium, regular, automotive diesel fuel oil, kerosene, and bunker C; rate of delivery: 10–12 t.p.h.

FRESH WATER: Fresh water can be supplied by a private supplier, Springwater Marine Services, Iloilo City. Water is supplied to the vessel while at anchorage or at berth from a water barge at the rate of 15 – 20 M.T./hour. cost is P16.00 ($2.13) per tonne. Water is safe and potable.

FUEL: Bunker fuel and fuel oil (of any desired viscosity) are available and can be supplied by Philippine Shell Petroleum Corp., Lapuz, Iloilo City. It can be delivered either by barge or by road tanker at the rate of 10 – 12 t.p.h. An advance notice of 24 hours prior to delivery is necessary.

CONSULS: British, at Hongkong and Shanghai Bank, Ledesma Street, Iloilo City, Tel: 7-50-86.

REPAIRS/SERVICES: The Iloilo Dock and Engineering Company offers the following major services: marine construction and repairs, conversion, machine shop, electronics navigational equipment installation and repairs, steel fabrication, sandblasting, engineering and project consultation. Other services offered: marine salvage, stevedoring and longshoring, lighterage, towing-harbour, inter-island and ocean warehousing and in-transit handling.

Radar: Repair of ships radar may be done by Louman & Sons Technical Service Inc. The company is capable of repairing radar, radio transmitter and receiver, fathometer and steering system. Usually contacted by the ship's Agent.

DRY DOCKS: Largest drydock at Ideco is Shipway 1: Length 587 ft., width 56 ft. depth (draft at MLLW, 10 ft. without keel blocks), capacity 2,500 L.T. There are 4 other smaller docks, and several side berths.

SURVEYORS: Local Marine Surveyor, Delpan.

WATCHMEN: Watchmen are optional, however if the Master so desires, watchmen can be hired.

HATCHES: Opening/closing of vessel's hatches and securing the vessel's derricks, are usually done by the stevedores.

CARGO GEAR: Load/discharge is effected by ship's gear. There is no special cargo equipment except for heavy lift cranes.

CUSTOMS ALLOWANCES: Vessels crew are permitted an individual allowance of 1 bottle of whisky and 1 carton of cigarettes per week. However, if necessary, the Master may request the Collector of Customs through the Customs Inspector on board for a further issue within the week.

REPATRIATION: Crew changes and repatriation may be effected by the local Regional Office of the Immigration Commission with the approval of its head office in Manila.

AIRPORT: An all-weather airport situated about 7 km. from the pier. Regular Iloilo – Manila flight is 3 times a day. Other flights Iloilo – Cebu, Iloilo – Davao.

TIME: GMT plus 8 hours.

HOLIDAYS: *Legal Holidays:* Sundays, January 1st, (New Year's Day); April 9th, (Bataan Day); May 1st, (Labour Day); June 12th, (Independence Day); July 4th, (Phil.-American Friendship Day); November 30th, (National Heroes Day); December 25th, (Christmas Day); December 30th, (Rizal Day).

Note:

1. Special Public Holiday may be issued by the President.
2. Under Philippine Law, if a legal holiday falls on Sunday, the following day (Monday) is also a holiday.

Regular working days in the Philippines are Monday through to Friday. Holidays notwithstanding, the Master/Agent may request continuance of stevedoring work after proper notice has been made with the stevedoring company.

POLICE/AMBULANCE/FIRE: Police Tel: 7-55-21; Fire Tel: 7-30-11; 7-49-89; Ambulance Tel: 7-25-61; 7-24-41.

TELEPHONES: PLDT (Tel Co.) can install a telephone on board a vessel at berth with the following charges:

P200.00	Deposit for the instrument, refundable upon return of the instrument.
74.41	rate/month
45.00	for services
3.00	electrician's fee
322.41	Total charges

Port Authority Telephone Numbers: Manager's Office: 7-69-45; Operations: 7-60-73; Administration: 7-76-43; Security: 7-29-79.

SERVICES: See "Repairs".

SHORE LEAVE: Shore leave is granted after the issue of shore passes by the local official of the Commission on Immigration.

IDENTIFICATION CARDS: Identification card is not necessary for the issue of shore passes. Visaed crew list will suffice.

DELAYS: Occasional congestion of the port may delay vessels berthing. Bunkering may be done whether the vessel is at anchorage or at berth.

GENERAL: Vessel's ETA has to be relayed to Philippines Ports Authority, Iloilo at least 24 hours before arrival.

DEVELOPMENTS: The proposed Iloilo Commercial Port Project has been approved in principle by the World Bank. It will be a container/foreign port equipped with modern container facilities and with ample back-up area. Quay length 400 m. Depth alongside 10.5 m. One Mobile crane and 3×28 ton forklifts to be provided. Completion expected mid-1985.

SHIPMASTER'S REPORT: 1977

There are 3 ports where bulk sugar loading facilities exist, Pulupandan (which see), Iloilo and Batangas Bay. Ships first call at Pulupandan on Negros Island, approximate position Lat. 10° 31′ 30″ N., Long. 122° 47′ 36″ E. and load up to a draft (SW) of 29 ft. The rate of loading by using 1 trimmer is about 300 – 400 tonnes per hour. Pilotage is compulsory and the Pilot boards in a position (approx.) Lat. 10° 27′ 24″ N., Long. 122° 46′ 12″ E. After completion of port formalities, the vessel is berthed alongside the Bulk Sugar Installation with a stationary conveyor.

The vessel then proceeds to Iloilo for loading up to 32 ft. This vessel, which is 675 ft. in length, loaded bulk sugar in hatches 2, 4, 6, 7 and 8. It was possible to load in hatch No. 1 also. The loading is done from a fixed conveyor with 2 trimmers and the loading rate is between 400 - 500 tonnes per hour. Finally the vessel proceeds to Batangas Bay and after the usual formalities, goes alongside the Batangas Bay Terminals Inc. (BBTI) at Bolo – Bauan – Batangas, where there is no draft restriction. The loading rate is about 300 – 400 tonnes per hour. Loading is done from a fixed conveyor with one manually operated trimmer. Pilotage is compulsory and ships awaiting Pilots can anchor either at Santa Rita or Santa Clara (Batangas City) or Tabangas.

The main sugar crop is brought to Iloilo, known locally as Sugar City, because it is the main sugar exporting port, from Negros Island, where most of the sugar farms and factories are situated. The sugar for export at BBTI is brought from factories around Laguna Bay by trucks. The Stowage Factor for bulk sugar worked out to between 40 – 41.

AUTHORITY: Philippine Ports Authority, Iloilo City.

AGENT: See "Manila".

JOLO (Jolo Island): 06.03 N. 121.00 E. (See Plan Book)

See "General" before first port.

DOCUMENTS: 4 copies each of Crew Lists; Passenger List; Import Cargo Manifest; Oath of Master and a copy of Vessel's Information Sheet.

PILOTAGE: Pilots are stationed at nearby Zamboanga City. Advice of ETA at least 3 days before is requested to facilitate arrangement of pilotage service.

ANCHORAGE: Anchorage areas are N.W. of Jolo Wharf and West of Caltex Depot.

MAX. SIZE: Main wharf; Draft 4 m. LOA: 60 m. At Caltex, Mobil and Petron Oil depot: LOA: No limit; Draft: 6 m.

HEALTH: Ships will be cleared by quarantine officers upon arrival at anchorage.

RADIO: Local Port Authority is equipped with SSB radio linking all Port Authorities nationwide. Ships may send message through Radio Communications of the Philippines, Inc. which has international connections.

BERTHING: Berthing space at main wharf is reserved for large foreign vessels; Max. permissible draft at MLLW is 4 m. (SW); Cargo handling by ship's own gear; Cargo may be worked at open storage and direct delivery only.

STEVEDORES: 24 hours advice before ETA is required. Stevedores provided by Sulu Dockhandlers and Forwarders, Inc.

MEDICAL: 2 hospitals are available.

TANKERS: The private wharf of Sulu Agro Industrial Corporation within the port limit is designed to handle Crude coconut oil.

FRESH WATER: Supplied by Sulu Water Works Authority with 4 in. piping all along the main wharf.

FUEL: Supplied by Petron Philippines, Inc.

FIRE PRECAUTIONS: Dangerous cargoes are worked at assigned berthing area.

CONSULS: In Manila.

REPAIRS: Minor repairs maybe undertaken by and within the vessel itself after permission is sought and granted by the Port Authority.

GANGWAY/DECK WATCHMEN: Customs Guard and Customs Inspector are on routine and continuous guard.

HATCHES: May be opened by stevedores.

CUSTOMS ALLOWANCES: Minimum quantity for personal use permissible only on board.

TIME: GMT plus 8 hours.

AIRPORT: Jolo Airport, flights to Zamboanga only, 2 flights a day.

HOLIDAYS: Cargoes are worked on holidays.

POLICE/AMBULANCE/FIRE: Central telephone system connects port Authority with Police, Ambulance and Fire Departments.

SHORE LEAVE: Curfew hour is from 2200 hrs. to 0400 hrs. Crew members are allowed ashore. Identification cards not necessary.

REGULATIONS: No discharge of ballast oil in any territorial waters of the Philippines.

DELAYS: Delays in cargo handling: Rain.

DEVELOPMENTS: Reclaimation in progress.

AUTHORITY: Philippine Ports Authority, Port of Jolo, Jolo, Sulu Philippines. *Contact:* Tantung L. Abam, Port Manager.

JOSE PANGANIBAN, Luzon: 14.18 N. 122.40 E. (See Plan Book)

See "General" before first port.

DOCUMENTS:

Inward Coasting Manifest.
Hatch Plan or Stowage Plan.
Vessel's Information Card.

PILOTAGE: Pilotage is compulsory. ETA advise should be sent to the Harbour Pilot Association, Legazpi City at least 36 hours before vessel's arrival. The vessel is met by the Harbour Pilot about 2 km. from the wharf aboard a boat displaying a pilot flag.

ANCHORAGE: Within Tanay Strait but not less than 500 m. from existing wharf.

RESTRICTIONS: Present port facilities could only allow vessels at anchorage considering the draft limitation and length of the pier.

MAX. SIZE: LOA 230 m. Draft 30 ft.

HEALTH: Vessels clear quarantine on arrival at Jose Panganiban Harbour. Quarantine Officers will normally board the vessel 2 km. from the wharf.

BERTHING: Present port facilities have been damaged by typhoon. Only 75 m. of the wharf is usable for berthing purposes. Length of quay 75 m., width 12 m. Max. depth of water 30 ft. Quay height above sea level 2 m. at high tide and 5 m. at low tide. Average rate of loading/discharging 18 tons per gang hour. Storage area 1.15 hectares.

CRANES: The port is not provided with shore cranes. Each vessel calling at the port is required to use her own gear.

STEVEDORES: Bicol Port Services.

MEDICAL: 1 government hospital located in the town about 3 km. from the wharf.

FRESH WATER: Can be provided by means of lorries and pipe-lines.

FUEL: All grades except premium gasoline obtainable from major oil depots and supplied by lorries alongside.

GANGWAY/DECK WATCHMEN: Available but not compulsory or necessary.

HATCHES: Opening and closing of hatches are part of stevedores' work or at the Master's option.

REPATRIATION: All facilities available for crew changes; good land and air connections.

AIRPORT: At the capital town of Daet, Camarines Norte.

TIME: GMT plus 8 hours.

HOLIDAYS: New Years Day (Jan. 1st); Holy Thursday; Good Friday; Labour Day (May 1st); Independence Day (June 12th); P.I. – U.S. Friendship Day (July 4th); Bonifacio Day (Nov. 30th); Special holidays declared by the Prime Minister of the Republic of the Philippines are also included. If any other legal holiday falls on a Sunday the following day is observed as a holiday. Cargo work can be arranged on any or all holidays with the vessel's agent.

SHORE LEAVE: Crews are allowed ashore in company of an Immigration Agent.

GENERAL: Vessels intending to call at Jose Panganiban shall apply for a berth space at least 24 hours before arrival. No dirty ballast may be dumped into the territorial waters of the Philippines. Rat guards shall be placed on all mooring lines. Berth allocation is on a first-come-first-served basis.

DEVELOPMENTS: Repairing of damaged wharf and water pipe-lines.

AUTHORITY: The Supervising Officer, Philippine Ports Authority, Legazpi.

LEGAZPI: 13.10 N. 123.45 E. (See Plan Book)

See "General" before first port.

DOCUMENTS:

Inward Coasting Manifest.
Hatch Plan or Stowage Plan.
Vessel's Information Card.

PILOTAGE: Pilotage is compulsory. ETA advise should be sent to the Harbour Pilot Association, Legazpi City at least 24 hours before vessel's arrival. The vessel is met by the harbour Pilot about 2 km. N.E. of the wharf aboard a boat displaying a pilot flag.

ANCHORAGE: Within the Albay Gulf outside the imaginary line within the vicinity of Legazpi Port from San Roque Lighthouse to the East breakwater with depths varying from 80 ft. to 100 ft. with good holding grounds. The bottom is generally of sand and coral.

RESTRICTIONS: Present port facilities allow for 1 vessel at a time considering the draft limitation and length of the pier.

MAX. SIZE: Legazpi Port: LOA – 120 m.; Draft – 25 ft.
Leg Oil Company: LOA – 230 m.; Draft – 35 ft.

TUGS: No tugs available. Motor launch is used to attend to mooring and unmooring.

BERTHING: Only the end of the wharf is usable by foreign vessels considering the draft limitation and constricted manoeuvring area. Legazpi Oil Company, Private Pier is, however, capable of accommodating vessels of any type and tonnage.

Legazpi Port: Length of quay 328 m. Width 30 m. Max. depth of water 30 ft. Quay height above sea level 2 m. at high tide and 5 m. at low tide. Average rate of loading/discharging 15.95 tons per gang hour.

Legazpi Oil Company, Private Pier: Length of quay 100 m. Width 10 m. Max. depth of water 60 ft. Quay height above sea level 3 m. at high tide and 6 m. at low tide. Average rate of loading/discharging 83.33 tons per gang hour. Facilities are suitable for handling of bulk copra, pellets, copra cakes and copra crude oil by conveyor and pipe-lines.

HEALTH: Vessels clear quarantine on arrival at Legazpi Harbour. Quarantine Officers will norrnally board the vessel 2 km. N.E. of the wharf.

RADIO: Following Stations are normally used:

RCPI	FILTEL
TELEFAST	CLAVECILLA
CRC	

CRANES: The port has no shore cranes. Mobile cranes are provided by the Arrastre Operator to load/unload cargoes on non-sustaining vessels.

STEVEDORES: *Legazpi Port:* Provided by Regal Arrastre and Stevedoring, Incorporated. Tel: 3168 and 3107.

Legazpi Oil Company, Private Pier: Provided by Norleinco Arrastre Services.

MEDICAL: 1 government hospital and 6 private hospitals available.

TANKERS: See "Berthing".

FRESH WATER: Can be provided by means of lorries.

FUEL: All grades obtainable from oil depots and supplied by lorries alongside.

GANGWAY/DECK WATCHMEN: Available but not compulsory or necessary.

HATCHES: Opening and closing of hatches are part of stevedores' work or at the Master's option.

REPATRIATION: All facilities available for crew changes; good land and air connections.

AIRPORT: 5 km. from port area. Flights to Manila twice a day.

TIME: GMT plus 8 hours.

HOLIDAYS: New Year's Day (January 1st); Holy Thursday; Good Friday; Labour Day (May 1st); Independence Day (June 12th); P.I. – U.S. Friendship Day (July 4th); Bonifacio Day (November 30th); Special holidays declared by the President of the Republic of the Philippines is also included. If any other legal holiday falls on a Sunday the following day is observed as a holiday. Cargo work can be arranged on any or all holidays with the vessel's agent.

POLICE/AMBULANCE/FIRE: Police, Tel: 4222; Ambulance, Tel: 4432; Fire, Tel: 2333.

TELEPHONES: Placing of telephones on board can be arranged with the local telephone company (MATELCO).

SHORE LEAVE: Crews can be allowed ashore in company of an Immigration Agent.

GENERAL: Vessels intending to call at Legazpi shall apply for a berth space at least 24 hours before arrival. No dirty ballast may be dumped into the territorial waters of the Philippines. Rat guards shall be placed on all mooring lines. Berth allocated is on a first-come first-served basis.

DEVELOPMENTS: Dredging of port basin to an average depth of 25 ft.

SHIPMASTER'S REPORT: April 1981.

Berth: Legazpi Oil Co. Jetty. Vessel loaded Copra Expeller Pellets in bulk.

For all details regarding control, pilotage, harbour installations, documents, etc., see "B.A. Pilot No. 33" and "Guide to Port Entry".

The docking manoeuvres were effected from an Easterly direction. The anchor was let go with 1 shackle prior to berthing. This served later, together with the rear cross buoy, to hold the vessel away from the pier (bad condition), and to heave off during the undocking manoeuvres.

The mooring buoys are secured to the bottom by 3 anchors each and 1 concrete block. However, their positions are not finite.

The vessel is to be maintained about 1.5 m. from the Dukes of Alba at the end of the pier, and therefore damage to the deteriorating pier is avoided.

A landing stage was positioned from the land, and was positioned likewise by the vessel on runners, since the vessel was rolling considerably in the persistent swell.

According to the Pilot, the swell in January is at its worst, and then the berth is not safe. During July and August, it is at its quietest in Albay Gulf. From October to December it is "Typhoon Time" and during November/December it is the heaviest rainy period, however, during the time we were in port there was considerable rainfall.

The pilot station has no VHF. The Pilot is ordered via the Agent, who was most co-operative. The pilot vessel brings the lines from the shore and to the buoys.

The copra expeller pellets were stored in a warehouse of approx. 80 m. × 50 m. According to the statement of the loader they were consistently loaded. The fresh goods, which came from the press at a temperature of approx. 44°C, were always loaded straight on top of the cargo already loaded. On board, temperatures of 32°C to 45°C between surface and core were measured.

According to the opinion of the loader the high cargo temperature is not dangerous, but he was emphatic that a danger existed through wetness.

The expeller was brought to the weighbridge by lorry and then moved to the pile.

The conveyor belt is not covered, and the nozzle reached right up to the landside hatch coaming on the vessel.

The wet conveyor belt was "operated dry" with expeller and the wet material piled on deck, where it was bagged and shipped back to land. Also where due to sudden rainfall the cargo in the hold became wet, this was carefully segregated by the trimmer, and sent back to the land.

A trim extractor is available, and was partly used. The main trimming work is carried out by a gang of approximately 25 men.

Every instruction given from the ship was promptly executed by the conveyor belt personnel.

Delivery rate: 55 t.p.h. (approx.).
Stowage factor: 1.7 cu.m. to the ton (approx.).
Working time: Around the clock.

The loaders made sure that no chemical additive such as benzene, benzol or hexane had been used to extract the oil, and handed over a certificate with the following values:

Moisture content: 9.6%; Oil content: 6.2%.

The certificate of an independent surveyor showed 8.51% humidity and 7.15% oil content.

SHIPMASTER'S REPORT: October, 1982.

Our ship was an 63,770 tons d.w.t. gearless bulk carrier of overall length of 225.03 m. which loaded 3,500 metric tons of Copra expeller pellets in bulk and stowing at an S.F. of 1.6 cu.m/ton. The loading terminal of the Legazpi Oil Company is situated in Lat. 13° 11.5′ N., Long. 123° 45.4′ E., which is unmarked on the Admiralty chart. There is over 54 ft. of water at the berth but the height of the loader is only 40 ft. hence it is important that ships do not arrive with a greater air draft than 39 ft. The port does not have VHF facilities or tugs. The Pilots are well experienced and normally meet vessels about 2 miles N.E. of the berth. The loader is protected by, recently constructed, 4 concrete dolphins and the vessel normally berths starboard side alongside. Two lines are passed to the shore side dolphins fore and aft, one line each to the seaward buoys and one line each to axis buoys and one spring fore and aft. The buoys are situated over 1,000 ft. from the axis of the berth and may necessitate joining of the mooring lines. The loading rate is about 80 t.p.h.

While we were at this berth we had the misfortune of encountering tropical revolving storm "Typhoon Irwing" which passed directly overhead. Berth was vacated when the storm was 150 miles from us to the East. Shelter was sought at an anchorage off the Legazpi harbour breakwater (bearing 230° – 1.0 mile from us). The eye of the typhoon passed directly over us within 24 hours and winds reached a velocity of 75 m.p.h. maximum. The holding ground was good and we rode out the typhoon with 9 shackles of chain out with engines going dead slow ahead when the winds increased to over 40 knots. With the aid of the doppler log on ground tracking and satellite navigator we were able to remain rock steady in the strongest gusts.

Wave heights at this anchorage was never more than one metre. The loading berth is directly exposed to sea and had we remained at the berth the vessel would have been pounded against the dolphins.

The Port Authorities are co-operative. There were no incidents of piracy or thefts.

AUTHORITY: Philippine Ports Authority, Port of Legazpi, P.O.Box 164, Legazpi City, Philippines. *Tel:* 20-12. *Contact:* C. E. Dinopol, Jr., Port Manager.

MANILA, Luzon: 14.35 N. 120.58 E. (See Plan Book)

See "General" before first port.

PORT LIMITS: Manila Harbour is defined as that portion of Manila Bay within the following boundaries:

A line extending from the Vitas Estero due West (270°) to its intersection with a line running South (180°) to Sangley Point Light, thence along this latter line towards Sangley Point Light until its intersection with a line running N.E. (075°) to the N.W. corner of the airport site to the shore to the mouth of the Vitas Estero, the place of commencement. (Philippine Coast Pilot, Part 1, Coast and Geodetic Survey, 1968 edition, p.5-92).

However, Port of Manila jurisdictional district includes that of the Pasig River and the Limay and Mariveles Sub-ports.

DOCUMENTS:

Quarantine:

Innoculation List of Crew.
Innoculation List of Passengers, if any.
Health Certificate from Last Port of Call.

Customs:

General Declaration (6 copies) – APAA Form.

Through Parcel List.
Foreign Currency List.

Note: Above documents are requirements depending if there is such cargo on board vessel.

In order to avoid delay, the Owner, Master or Agent of a ship bound for the Port of Manila must notify the following government and private entities (advance notice of arrival) at least 24 hours prior to ship's arrival.

1. Philippine Ports Authority – Harbour Division
   Attention: Harbour Master
2. Bureau of Customs – Boarding and Inspection Section
   Attention: Boarding Officer
3. Bureau of Quarantine
4. Commission on Immigration and Deportation
5. Bureau of Plant Quarantine
6. Bureau of Animal Quarantine
7. Philippine Coast Guard Boarding Team
8. Manila Pilots' Association (Private)
9. Arrastre Contractor (Private)

PILOTAGE: Pilotage in and out of Manila Harbour and to the piers and into the Pasig River is compulsory.

Agents or owners of vessels calling at the Port of Manila shall inform the Pilot of their vessel's arrival. Agents can contact the Pilots Association through Channel 13, 24 hours a day including Sundays and Holidays. Pilots are available day and night.

The pilot boat is a white vessel with a big letter "P" and the number of the boat painted red at the forward end of the vessel. It is usually located in the vicinity of Quarantine Anchorage where port formalities are conducted.

During bad weather, the pilot boat is located inside the breakwater upon the expressed permission of Port Authorities.

Foreign vessels are boarded outside the breakwater while inter-island vessels at Buoy No. 1 near the entrance to the Pasig River and off the lighted buoy North of North Breakwater.

Notice of vessel's arrival shall be made at least 24 hours before their arrival.

Lights exhibited when a vessel has a Pilot on board are white over red together with other regular navigational lights. Otherwise, only navigational lights are displayed.

During typhoons and bad weather, Pilots require vessels to rig the pilot or accommodation ladder on the lee side.

ANCHORAGES: Vessels which for any reason do not intend to enter either harbour or the river immediately on arrival may anchor anywhere outside of the Entrance Channel. There is also deep water anchorage inside the breakwater. Anchorage is regulated by the Harbour Operations, Port of Manila, Philippine Ports Authority.

Quarantine Anchorage: The Manila Quarantine Anchorage is bounded as follows: Beginning at the Manila Outer Harbour Lighted Buoy 1, approximate position Lat. 14° 33′ 09″ N., Long. 120° 54′ 04″ E. thence 000°, 2,360 yards to position Lat. 14° 34′ 23″ N., Long. 120° 54′ 00″ E., thence on a range of 076° 24′ (Customhouse in line with City Hall Tower), 4,000 yards to approximate position Lat. 14° 34′ 50″ N., Long. 120° 56′ 14″ N., Long. 120° 56′ 00″ E., thence 242° 30′, 4,440 yards to the Manila Outer Harbour Lighted Buoy 1, the point of commencement.

Forbidden Anchorage: Anchorage is prohibited in that portion of Manila Bay known as the Cable Area which is defined as follows: From a point approximately at Lat. 14° 33′ 42″ N., Long. 120° 59′ 05″ E., the junction of the breakwater forming the South side of the Yacht Basin with the shore of Manila Bay, thence along the breakwater to its end, from its end 255° to 3.65 miles North of Sangley Point Light, thence 066° to the shore of Manila Bay.

Explosives Anchorage: Vessels having gasoline, dynamite or other highly inflammable or explosive compounds on board are not permitted to berth at piers or wharves until such cargo has been discharged. Such cargo must be discharged into lighters from vessels at the anchorage within the circle with a radius of 175 yards centred in Lat. 14° 35′ 15″ N., Long. 120° 54′ 05″ E.

Other Special Anchorages: Lighters, scows, cascos and similar craft are prohibited from anchoring East of the breakwater, Manila Harbour, except in the following designated places:

(a) South of the new Luneta, inside of vessels' anchorages, but only in cases of urgent necessity and with special permission from the Surveyor of the Port.

(b) Along the East side of the West Breakwater and within 85 yards of it, and well clear of the fairway leading to the Engineer Island slipways and well clear of the manoeuvring space ordinarily needed by vessels docking or leaving the oil wharf. No craft shall moor along the breakwater beyond the sharp bend of the breakwater towards the gap.

(c) In the Inner Basin (Engineer Island) East and well clear of the fairway and then only in case of urgent necessity. It is provided that such craft during severe typhoon weather with special permission of the Surveyor of the Port, may anchor temporarily in the Inner Basin West of the fairway, but well clear of the vessels.

Others:

1. No vessel shall anchor or moor in any prohibited anchorage nor use an anchor in that area except for the purpose of assisting in berthing alongside or unberthing.
2. No vessel shall anchor in, or use an anchorage, other than for the purpose for which the anchorage is designated or intended.
3. No vessel shall anchor, berth, moor or lie:
   (a) In the approaches to a port.
   (b) In any principal fairway.
   (c) In such a manner as to obstruct the approach to anchorage or pier/wharf used by other vessels.
   (d) In a cable reserve area, or in any special anchorage indicated on the chart of the Port or Port district except for the purpose specified.
   (e) In a position which is likely to foul a vessel which is anchored, moored, or made fast to a buoy.

RESTRICTIONS:

1. No explosives or dangerous goods shall be loaded or discharged between 1800 hrs. and 0600 hrs. without the permission of the Authority.
2. No vessel or harbour craft with explosives or dangerous goods on board shall remain alongside any other vessel or craft, pier or wharf or other physical landing place between 1800 hrs. and 0600 hrs. without permission of the Authority.
3. No person shall smoke and no fire or naked light, other than navigation or signal lights prescribed by the Collision Regulations, shall be allowed on board any vessel or harbour craft which has or is about to receive on board any explosives or dangerous goods.

MAX. SIZE: The maximum permissible draft inside the port is 9.4 m.

TUGS: Tugs normally join vessel inside the breakwater.

BERTHING: There are 5 finger piers at South Harbour.

Pier No.	*Pier Length* (m.)	*No. of* Berths	*Depth* (m.)
3	375.96	4	10.70 – 11.35
5	361.59	5	11.35
9	385.96	4	11.08 – 11.68
13	433.79	7	8.53 – 10.06
15	396.96	4	10.70 – 11.35

Container Berths: There are 2 container berths at Berth Nos. 3 and 4 of Pier 3. Length 375 m.

One fixed Roll-on/Roll-off berth at Pier 13. 50 ton capacity.

CONTAINER HANDLING FACILITIES:

Manila International Container Terminal:

Address:	Isla Puting Bato, North Harbour, Tondo, Manila.
Telephone No.:	21-72-49 or 26-71-19. Philippine Ports Authority Office (Operations).
Location:	Located North of the Pasig River mouth primarily constructed to handle the foreign container traffic on a 94-hectare reclaimed area.
Navigational Approach:	The Fairway Channel has a length of 4,000 m. and a width of 250 m. Controlling depth is 12.2 m.
Tidal Range:	Mean Range – 0.763 m. Diurnal Range – 1.021 m.
Total Berth:	Length: 986.16 m. Width: 420.28 m. Depth: 10.70 m. alongside

Facilities

Container Yard 1 paved area	—	21.6 hectares
Rated capacity	—	4,650 TEUs daily
Average Container Volume stored Daily	—	1,600 TEUs (34% average space utilisation)
Reefer Facilities	—	40 Outlets/460 Volts
Container Freight Station Area 1	—	8,400 sq.m.
Rated Capacity	—	5,340 tons daily
Average Tonnage Stored Daily	—	4,280 tons daily (80% average space utilisation)
Berths	—	4
Total Length	—	900 m.
Average Depth at Berth	—	34 ft. (10.4 m.)
Average Length per Berth	—	215 m. except Berth No. 1 which has a length of 255 m.
Operational Berthing Space	—	850 m. (can accommodate 4 vessels at any given time with 150 m. LOA per vessel)
Berthing Hours	—	Anytime, with 24-hour notice
Working Hours	—	16 hours with 2 shifts (day/night)

Equipment

Shore Gantry Cranes	—	2 (1 diesel-powered and 1 electrically powered)
Capacity	—	35 tons SWL
Travelling Distance	—	645 m.
Waterside Outreach	—	35.05 m.
Back Reach (Landside)	—	10.66 m.
Upper Lift	—	1 container over 4 containers above deck
Lower Lift	—	8 tiers below deck
Straddle Carriers	—	6 Units
Prime Movers	—	18 Units
Forklifts	—	43 Units (42×3 tons and 1×10 tons)
Chassis	—	45 Units
Service Vehicles	—	7 Units
Ferry Boat	—	1 (MIPTI-owned)

Other Facilities

Weighbridge		—	Privately-owned
Back-Up Area DASSAD	For dangerous cargo	—	5,000 sq.m. with 2 CFS at 1,500 sq.m. each
NAWACO	For overstaying containers	—	28,000 sq.m. with 8 CFS at 1,254 sq.m. each
APEX		—	28,840 sq.m. with 1 CFS

CRANES:

	No. of Units	*Description*	*Capacity*
Container Crane (Liebherr)	2	Electric-powered	35 tons
Mobile Crane	8	Jib-type	10 – 35 tons
	1	Elevated cab	100 tons
Yard Gantry Crane (rubber tyred)	7	Diesel-powered	30 tons with spreader

CONTAINER/GENERAL CARGO STORAGE FACILITIES:

Transit Shed	*Number*	*Use*	*Capacity*
Pier 15	2	Transit sheds – temporary storage for import and export	6,000 tons/ 5,750 sq.m.
Pier 13	1	Transit sheds – temporary storage for import and export	3,000 tons/ 3,100 sq.m.
Pier 9	4	Transit sheds – temporary storage for import and export	13,000 tons/ 14,694 sq.m.
Pier 5	4	Transit sheds – temporary storage for import and export	12,000 tons/ 12,664 sq.m.
Container Yard	3	Asphalt paved	6,000 TEUs/ approx. 18 hectares
Container Freight Station	2	For stripping/stuffing storage purposes	10,000 tons/ 10,336 sq.m.
Dangerous Cargo Area	1	Partly covered storage area	7,000 tons
Open Storage Area	5	Asphalt paved	34,900 tons
Car Compound (STALAG)	1	For cars and other small vehicles	4,000 tons
Warehouses	8	Storage of import/export cargo	37,000 tons
Chassis Parking	1	Asphalt paved	2,000 TEUs approx. 2 hectares

Liquid cargoes are handled at South Harbour, at the anchorage only through ship to ship or in to lighters.

BRIDGES: None.

STEVEDORES: Arranged by vessel's Agent prior to arrival.

HEALTH: There are 3 types of Pratique that can be obtained at the port: Free Pratique, Provisional Pratique and Radio Pratique.

Foreign vessels calling at the port are inspected by Immigration Officers. When all the quarantine rules and regulations are complied with and the vessels found free of any quarantinable or communicable diseases, Free Pratique is obtained by the vessel.

On the other hand, if some of the conditions above are not satisfied, a Provisional Pratique is given by the Quarantine.

Radio Pratique is provided to army and navy ships on the following grounds:

1. A doctor is among the crew of the ship.
2. There is no member of the crew sick of any disease.
3. Vaccination Certificates of the crew are in order and valid.
4. The vessel is not from a sick area.

For vessels calling at the Port of Manila, but already coming from another port of entry in the Philippines, Pratique is automatic. However, if somebody aboard the vessel is sick during the voyage, Pratique shall still be obtained.

RADIO: The particular radio station to be used by a vessel to route ETA cables to agent is at the discretion and selection of the vessel.

Radio Officer's Report: August 1980.

Radio: Intercom Manila Radio, call sign (DZF) operated by the International Radio Communication Philippines. Serving ship to shore and vice versa, domestic and international communications, on HF, MF, and HF radio telephone on 24 hours operation.

VHF: The only coastal station equipped with VHF radio telephone listening on Channel 16 international calling frequency. Simplex and duplex operations on working Channels, for a direct contact with Agents.

Also accepting radio calls on land locally and international link via their local telephone network (PLDT).

VHF: Manila Pilots Association on Channel 16 and 13.

RADAR: No existing Port Radar Service.

MEDICAL: Notice from shipping Agents is required at least 24 hours in advance. There is one hospital clinic available at the port – the Roberto S. Oca Hospital Clinic located at Gate 4, South Harbour.

For quarantinable diseases, there is a 12-bed hospital, the Quarantine Isolation Centre is located at the airport.

TANKERS: Tankers are very seldom accommodated at the Port. The Limay and Mariveles Sub-ports receive tankers.

Rosario: Filoil Refinery Sea Berth: Is located at the entrance to Manila Bay position: Lat. 14° 26′ 30″ N., Long. 120° 46′ 40″ E. This position is 2.5 miles off the shore of Rosario, Province of Cavite.

The mooring area is marked by 6 mooring buoys. A ship's guide buoy marks the point where the ship's starboard anchor will be dropped upon entry into the berth. 4 other buoys inside the berth at midport mark the end of the submarine pipe-line, centre of ship's manifold and the hose ends respectively. The bearing of the centre of the berth is N. 65° E. The depth is 50 ft. at high tide and 45 ft. at low tide approximately.

The weather is quite good during the dry season, but is unfavourable during monsoon season (May to November). Wind and swells are mostly from a S.W. direction and usually prevalent during monsoon season.

It is emphasised that vessels moored at the berth must be in good condition to clear the berth immediately in case of an emergency. Ship's engines and gear must be ready with full power for immediate use. Ship's personnel should be at their stations at all times during mooring, unmooring and cargo unloading operations.

Radio: Filoil Makati Office may be contacted by dialling telephone Nos. 87-40-61 and 87-40-71. The Rosario Refinery may be contacted by dialling telephone Nos. 47-95-51 and 47-95-53.

Communication from the Sea Berth with the Refinery, Filoil's launch and Filoil Representative on board is through VHF radio. If VHF radio fails, the Filoil launch will be despatched to bring the message either way.

Filoil Representative on board maintains a radio watch and constant communication with the shore for general purposes and emergencies.

Luzon Stevedoring Company tugboats also maintain a constant radio communication with their representative at the shore. In case of emergency, messages can be relayed via these tugs.

Ship's Agent: All vessels carrying crude or other cargoes for discharge at Filoil Refinery Sea Berth must appoint their local ship's Agent who will provide them with the necessary ship husbandry services.

Notice of Arrival: They must report their ETA to Filoil Refinery Corporation, cable address "Filoil", Manila, Philippines, 3 days after leaving port of loading and 72 hours before arrival at Manila.

Pilot and Boarding Parties: Pilots are arranged for by the ship's Agent. Generally, Pilots board the tanker at the Manila Anchorage to assist the Master to moor in the berth and leaves at the Sea Berth after berthing.

Filoil Representative boards the tanker 1 mile before the Sea Berth, but if it is the first voyage, he boards the tanker together with the Port and Government Authorities at Manila Anchorage.

Tugs: Tugboat service is arranged for by ship's Agent. Tugs generally come from Manila. Give at least 48 hours' notice when ordering tugs.

Quarantine, Customs and Immigration: Manila is the port of entry for the Rosario Sea Berth. Therefore, entry and clearance must be arranged by the Ship's Agent at Manila. Boarding Officers board the vessel in the Quarantine Anchorage prior to arrival within the mooring area. Pertinent Government Officials should be given sufficient time, usually not less than 24 hours Monday to Friday, and 48 hours Saturday and Sunday. Generally, entry and clearance can be arranged by the Agent who should advise Customs well in advance of the vessel arrival.

Ballast, Bilge and Garbage Disposal: There are no ballast facilities at the refinery. Masters are advised that in Manila Bay, the Harbour-Pollution Regulations are rigidly enforced. Therefore no bilge water, oil contaminated water, garbage or similar refuse which may pollute the sea water in any way, is to be discharged overboard while the vessel is within Manila Bay and approaches thereto. The staff at Rosario are required to report any violation of this Philippine Merchant Marine Regulation.

Launch Service: Regular launch service for crew transportation is not available and has to be arranged through ship's Agent. The Luzon Stevedoring launch is used to run lines, assist in picking up cargo hoses, etc. Filoil's owned or hired launch is for the exclusive use of Filoil Representative and personnel boarding the vessel; however, transportation may be arranged through Filoil Representative in cases of emergency.

Medical: Medical attention can be arranged by the ship's Agent. There is a clinic at the refinery. The nearest hospital is 0.5 miles from the refinery.

Heading for the Sea Berth: As soon as government clearance (Pratique) is granted, vessel weighs anchor and heads for Rosario Sea Berth, a distance of about 16 land miles from Manila Anchorage.

Vessel Mooring Gears and Facilities: The vessel's bow is secured in the moorings by the use of both bower anchors. Therefore, ship must have both bower anchors ready for immediate use, each with a minimum of 150 fathoms of chain. Anchors, chains and anchor windlass must be in good condition and capable of heaving ship ahead with the chain or letting one chain go out on the run while heaving in on the other. Mooring Buoy No. 6 can be used instead of port anchor if 3 mooring lines are hooked up.

Vessels must be equipped with 10 in. manila or better mooring lines of not less than 8 in. circumference and not less than 90 fathoms in length of each line. 2 lines are required for each of 6 mooring buoys, 5 of which are aft to secure the ship's stern position. Therefore, 5 lines are to be available on the fantail for mooring to Buoy Nos. 1, 2, 3, 4 and 5.

Vessels having wire moorings secured on warping winches with surge valve and brake are acceptable. Warping winches must be adequate to handle mooring line under heavy strain. Efficient stopper lines must be readily available to "stop" mooring lines for transfer from winch to bitts without loss of tension.

All chocks other than roller (if free) shall be fitted with chafing gear to protect lines before berthing operation commences, endeavouring to install chafing gear after the ship has been moored has proven impracticable. Old fire hoses or substitute is suggested.

If in the opinion of the Pilot, the vessel's mooring facilities lines and/or gear are inadequate, he will inform the Master and Filoil Representative, and in such event the vessel will not be allowed to enter the moorings until such conditions are deemed satisfactory.

Docking Procedure: To moor, the vessel approaches the mooring heading due South. When in proper position, the starboard anchor is dropped and the chain allowed to run until vessel crosses the mooring area to a point where the port anchor is let go or when the mooring lines are dropped to Buoy No. 6. Then the engines are backed and the vessel with the assistance of the tug, manoeuvred into the mooring area where after lines are run to the 5 mooring buoys and then the anchor chains are brought tight simultaneously with the securing of the stern to the mooring buoys. The vessel is then heading due West parallel with the tide current flow.

When secured in the berth, vessel should not be closer than 10 m. from the end of the submarine pipe-line. Bower anchor chains should have spread of not less than 30° on either side of the ship's imaginary fore and aft line extended forward. Stern buoy moorings should be set as taut as possible and anchors form an approximate angle of 300° with water line.

Submarine Hose Lifting Gear and Manifold Connection: The derrick on the port side in way of the hose connection must be rigged to lift not less than 5 tons. The topping Lift shall be available to raise or lower the boom as required and the winch and whip shall be of a quality and nature to lift the hose exactly and evenly. The hose and fittings are considered to weigh 3 tons. The hose connecting gang and its supervisor are from Luzon Stevedoring Company and are under contract to Filoil. They will use the ship's machinery to raise the 2×10 in. hoses from the bottom and secure same to the ship's side. They will also disconnect the hoses and lower same to the bottom of the sea after completion of discharging of cargo. The ship's manifold must have 10 in. flanges for connection to 10 in. submarine hoses.

Safety Rules and Regulations:

Mooring lines must be in good condition and kept tight at all times.

Sparking smoke stacks must not be permitted. If for any reason a stack catches fire or emits live sparks, cargo operations must be stopped immediately on this and adjoining vessels.

Throw nothing overboard from deck or portholes while at Sea Berth.

During cargo and/or ballast operations, vessels shall show red flag by day and red light by night. No smoking amidships during cargo and/or ballast operations.

No chipping, repairs, welding or hot work is allowed on any vessel while at sea berth unless special permission is given and a safety permit obtained. The ship must always be ready to sail out at a moment's notice. The Authority decides when vessels at pier side and Inner Anchorage be shifted to Outer Anchorage during Typhoons.

Pumping crude oils must be stopped during electrical storms or if lightning appears in close vicinity.

In case of fire, shut down all pumping and sound alarm. Disconnect hoses so as to be ready to shift from berth. All vessels at berth must have main engines ready for use. Water, foamite and steam are never to be used on electrical fires. Use dry chemical or Pyrene. Use foamite, water fog, steam CO_2 or dry chemical on oil fires.

Avoid spilling oil on deck. If any oil is spilled, it must be cleaned immediately. Gasoline or naphtha is not to be used for cleaning.

Only Underwriter's laboratory approved flashlights permissible use in methane and air mixtures by the U.S. Coast Guard are to be used for loading, discharging, ballasting and/or repair work on vessels.

Ullage screens are to be kept in place during cargo and/or ballast operations.

No extension cord or portable cables which are connected to an electric power source shall be used on deck in way of cargo or fuel tanks unless vessel is certified gas-free.

Fire hose shall be laid out and suitable fire extinguishers available. Failure to comply with any of the above rules will result in the vessel being shut down. Sufficient copies are to be presented to the Master so that they may be posted in various places about the vessel. It is the Master's responsibility to see that these rules and regulations are enforced.

Discharge of Cargo: After hoses are connected the Filoil Representative will, after communication with the refinery, advise commencement of pumping. In the beginning the rate is to be slow and the Filoil Representative will advise when pumping rate is to be increased to maximum. Discharge of cargo may be stopped due to adverse weather conditions. In which event, the hoses are disconnected and the submarine hose lowered to the sea bottom. Cargo discharge will be resumed when the adverse weather moderates.

Crude oil discharge through 2×10 in. hoses 255 ft. long through a 10 in. check valve and 10 in. gate valve then into the 24 in. pipe-line which is 2.5 miles in length. The height of the shore tanks (foundation) above sea level if 15.5 ft. Pressure at the ship's side must not be less than 60 lb. Maximum pressure allowed is 120 lb. at the ship's side.

Stripping – Tank Draining: To keep a discharge time to a minimum, tanks should be stripped into one of the ship's tanks and the final stripping shall be from only one tank.

Board and Lodging Accommodation: Sufficient accommodation and meals are requested to be available and prepared for the Filoil's Representative in the Officers' quarters. He will remain with the vessel until casting off or until relieved to be of assistance to the crew.

DENSITY: Variable.

FRESH WATER: Fresh water is available from floating barges.

FUEL: This depends upon the requirement of the vessel. However, as to the quantity, the Philippine Government can only sell vessels sufficient for it to reach the next port of call.

FIRE PRECAUTIONS: The "Absolutely Non-Smoking Area" signs to be exhibited. Permission must be obtained from the Authority before following undertaken – welding work, onboard repairs, vessel imobilisation.

REPAIRS: Only minor repairs possible.

DRY DOCKS: *Bataan Shipyard and Engineering Co. Inc.:*

1 Graving Dock with max. length 164 m., breadth 23.16 m. and depth 12.19 m. Max. size 16,000 d.w.t.

1 Synchrolift for vessels up to 2,000 d.w.t.

Philippine Shipyard and Engineering Corp. (Philseco): Located at Subic Bay.

1 Graving Dock, 350 m.×65 m.×12.5 m.
1 Berth, length 300 m., depth 9 m.
1 Jetty, lengths 185 m. and 135 m., depth 9.0 m.
1×80 ton crane and 1×30 ton crane.

SURVEYORS: None.

GANGWAY/DECK WATCHMEN: This service is available whenever needed.

HATCHES: Stevedores usually open and close hatches. In special cases, when the vessel is of a different model and the hatches are constructed differently, crew members are requested to assist stevedores.

CARGO GEAR: See "Specialized Cargo Handling Facilities".

REPATRIATION: Shipping Agent can arrange this with the Bureau of Immigration.

AIRPORT: The nearest airport is the Manila International Airport, about 8 km. from the Port of Manila. This is served by regular airlines.

TIME: GMT plus 8 hours.

HOLIDAYS: There are about 11 national holidays in the Philippines. Working days are from Monday to Friday, for government employees, and Monday to Saturday, for private employees. However, the Port of Manila does not observe any of these holidays. Operations at the port are on a day-to-day basis.

Work stoppages may be declared on the following holidays:
Good Friday (1800 hrs. Thursday – 1800 hrs. Friday)
Christmas Eve (1800 hrs. 24th December – 1800 hrs. 25th December)
New Year's Eve (1800 hrs. 31st December – 1800 hrs. 1st January)

CUSTOMS ALLOWANCES: The only allowable quantity of goods to be held out of bond is that which the member of the crew can use personally. Usually, one or two bottles of wine and a pack of cigarettes. Those brought out from the vessel beyond this will be considered for commercial consumption and will therefore be charged.

POLICE/AMBULANCE/FIRE: Police Tel: 59-90-11, 59-43-44, 59-63-36, 59-64-49. Ambulance Tel: 59-60-61, 50-30-11. Fire Tel: 47-77-17, 88-00-58, 25-56-80, 87-21-20.

EMERGENCY CO-ORDINATION CENTRE: Philippine Coast Guard Tel: 483-257 (operations).

TELEPHONES: Arranged by vessel's Agent from the Philippine Ports Authority.

SERVICES: Apart from the usual services of the port, others are ship salvage, laundry and container leasing.

SHORE LEAVE: Crew members are allowed ashore as long as sufficient members of the crew are left on board to manage the vessel in case of unforeseeable incidents. This is necessary in order that the vessel can be removed from berth or anchorage.

IDENTIFICATION CARDS: Shore passes are issued by the Bureau of Immigration.

BANKS:

1. American Express Bank, 121 Paseo de Rojas, Makati, Metro Manila. (No telex available).
2. Bank of America, 8947 Paseo de Rojas, Makati, Metro Manila. Telex: 5049.
3. City Trust Banking Corporation, 399 Buendia Ave., Ext., Makati, Metro Manila. (No telex available).
4. Lloyds Bank International Ltd., 6813 Ayala Ave., Makati, Metro Manila.

REGULATIONS: No particular or unusual regulations are observed at the port.

DELAYS: The expected delays are: During inclement weather, some difficulty may be encountered in berthing, and when some of the specialised cargo handling facilities have failures.

DEVELOPMENTS: *Future Plans for the Manila International Container Terminal:*

1. Additional Ro/Ro facility to be constructed.
2. A third container berth to be constructed.
3. Four gantry cranes, 4 transtainers and 4 straddle carriers to be added.
4. Additional Container Freight Station (CFS) to be constructed under Phase II.

AUTHORITY: Philippine Ports Authority (PPA), P.O.Box No. PA 62, 5th Floor, B.F. Condominium, Aduana, Intramuros, Manila. *Tel:* 47-92-04, 40-81-66, 48-24-93. *Telex:* 40404 (ITT), Tx Bx 0203. *Cables:* Phports, Manila. *Contact:* Captain E. Santos, Port Manager.

AGENT: Wallem Philippines Shipping Inc., Wallem Philippines Buildings, 3rd Floor, Beaterio Corner, Legaspi Streets, Intramuruos, Manila, Philippines. Tel: 491211-19. Telex: 63328, 7420297, 7227624. Cables: "WALLEM".

MASAO (Including Nasipit): 09.06 N. 125.22 E. (See Plan Book)

See "General" before first port.

PORT LIMITS: From Bolo-bolo Point up to Diwata Point.

DOCUMENTS:

4 Crew Lists
4 Passenger Lists
2 Store Lists
4 Stowage Plans
2 Personal Effect Lists
2 Inward/Outward Cargo Manifests
1 Ship's Information.

PILOTAGE: Compulsory. Telegraphic address: Masao Pilots Butuan City.

ETA: Ocean going vessels – 24 hours' notice.
Coastal vessels – 12 hours' notice.

Pilot Boat Description: Upper structure white; lower structure, black with a letter "P" at the bow. During night time, when a vessel requires a Pilot, particular light used is permanent red at the uppermost portion of the boat and a flashing white light.

Location of Pilot Station: In Masao, Lumbocan, Butuan City, but they have office at San Francisco St., Butuan City near the Butuan R. C. Wharf.

For the Port of Masao, Lumbocan, Butuan City, there is no alternative area in the event of bad weather as it is an open sea. However, at the sub-port of Nasipit, vessels can seek shelter during bad weather because of its natural cove which protects the vessels against strong winds and heavy currents.

Location of anchorage for vessel awaiting a Pilot is at Quarantine Anchorage Area Lat. 9° 00′ 30″ N., Long. 125° 28′ 15″ E.

ANCHORAGES: Depth of safe anchorage: 75 m. deep along the shore line.

Masao Anchorage Berth:

Anchorage No. 1:	Lat. 9° 01′ 05″ N.,	Long. 125° 29′ 50″ E.
Anchorage No. 2:	Lat. 9° 01′ 00″ N.,	Long. 125° 29′ 40″ E.
Anchorage No. 3:	Lat. 9° 00′ 55″ N.,	Long. 125° 29′ 30″ E.
Anchorage No. 4:	Lat. 9° 00′ 45″ N.,	Long. 125° 29′ 20″ E.
Anchorage No. 5:	Lat. 9° 00′ 35″ N.,	Long. 125° 29′ 00″ E.
Anchorage No. 6:	Lat. 9° 01′ 15″ N.,	Long. 125° 29′ 45″ E.
Anchorage No. 7:	Lat. 9° 01′ 10″ N.,	Long. 125° 29′ 35″ E.
Anchorage No. 8:	Lat. 9° 01′ 04″ N.,	Long. 125° 29′ 25″ E.
Anchorage No. 9:	Lat. 9° 00′ 55″ N.,	Long. 125° 29′ 05″ E.
Anchorage No. 10:	Lat. 9° 00′ 50″ N.,	Long. 125° 28′ 55″ E.

RESTRICTIONS: None.

MAX. SIZE: Masao: No limit.

Nasipit: Maximum possible length of vessel is 550 ft., breadth, 65 ft., maximum mean draft is 25 ft.

TUGS: Tug assistance is only available at the port of Nasipit, if needed.

BERTHING: No berthing facilities available at the Port of Masao, Lumbocan, Butuan City. All vessels anchor at specified anchorage areas. Also see "Max. Size".

At the sub-port of Nasipit, foreign berthing space is available at the Nasipit Government Wharf and NALCO Wharf.

CRANES: None owned by the Authority nor by any cargo handling operators, but can be hired from the Ministry of Public Works and Highway or from private companies.

BULK CARGO FACILITIES: None.

BRIDGES: None.

STEVEDORES: For the Port of Masao, (Lumbocan), the cargo handling services are being undertaken by the PPA-Masao Port Services, the area of operation of which starts at Masao anchorage and along the coastline of 125° 24′ East of the municipality of Buenavista, Masao, Lumbocan, Magallanes, Cabadbaran, Tubay up to Agusan-Surigao coastline boundaries including Magallanes Bay up to Kayukanan Creek.

Cargo-handling services for the sub-port of Butuan is, likewise, handled by the PPA-Masao Port Services. It shall be noted, however, that the arrastre/stevedoring services for the 2 ports will be officially awarded to a new company late 1984.

The sub-port of Nasipit is being handled by the Nasipit Integrated Arrastre & Stevedoring Services, Inc. (NIASSI), whose jurisdiction starts at the Nasipit Government Wharf up to Long. 125° 25′ West of Buenavista, then going Westward including the municipality of Carmen.

ETA advice required to arrange gangs, at least 4 hours before arrival.

MEDICAL: Hospital facilities available:

1. Government hospitals:
   a. Butuan General Hospital
   b. Butuan Maternity and Children's Hospital
   c. City General Hospital and Medical Centre.
2. Private hospitals:
   a. Butuan Doctors Hospital
   b. Santos Hospital
   c. Villanueva Poly-Clinic and Hospital.
   d. Our Lady of Fatima Hospital.

DENSITY: Average density of water in the port and surrounding anchorage area is 1010 – 1012.

FRESH WATER: At the Port of Masao, Lumbocan, Butuan City, the supply of fresh water can only be made possible through the use of barges.

Water supply is available at the sub-port of Butuan through its licensed operators. However, at the sub-port of Nasipit, water supply can be taken from the Nasipit Lumber Company.

REPAIRS: Only minor repairs can be undertaken.

GANGWAY/DECK WATCHMEN: Service of watchmen is optional.

HATCHES: Opening or closing of hatches is normally carried out by stevedores.

AIRPORT: A few kilometers from the city is the Bancasi Airport which caters to domestic flights to and from Cebu and Manila.

HOLIDAYS: New Year's Day (January 1st); Holy Thursday, Good Friday and Easter Sunday; Labour Day (May 1st); Independence Day (June 12th); Fil-American Friendship Day (July 4th); Barangay Day (September 11th); Proclamation 1081 (September 21st); National Heroes Day (November 30th); Christmas Day (December 25th); Rizal Day (December 30th).

Cargo-handling operations, however, can still be arranged on these days.

POLICE/AMBULANCE/FIRE: Police: 115; Fire: 114; Ambulance: 24-14.

TELEPHONES: Not possible to place telephones on board.

SERVICES: Shipchandling Services, Mooring/Unmooring Services, Laundry, Water-Taxi, Cargo-Checking, Cargo Surveying, Carpentery, Forwarding, Bunkering. All ancilliary services operators are duly licensed by PPA.

SHORE LEAVE: After clearing inwards, crew members are allowed to go ashore without special permission.

AUTHORITY: The Philippine Ports Authority; Port Management Unit; Port of Masao, Butuan City. *Tel:* 31-98, 34-29. *Contact:* Ernesto J. Fernando, Port Manager. Tomas T. Alegarbes, Harbour Master.

MASBATE: 12.35 N. 123.31 E. (See Plan Book)

DOCUMENTS:

Inward Coasting Manifest.
Hatch Plan or Stowage Plan.
Vessel's Information Card.

PILOTAGE: Pilotage is compulsory. ETA advise should be sent to the Harbour Pilot Association, Legazpi City at least 36 hours before vessel's arrival. The vessel is met by the Harbour Pilot about 2 km. from the mouth of the channel of Masbate Bay aboard a boat displaying a Pilot's flag.

ANCHORAGE: Within Masbate Pass, but not greater than 500 m. from the mouth of the channel leading to Masbate Bay. The area within the Masbate Bay could only be used during emergencies and typhoons.

RESTRICTIONS: Present port facilities can only accommodate 1 vessel at a time due to draft limitation and physical length of the wharf.

MAX. SIZE: LOA – 300 m.; Draft – 28 ft.

HEALTH: Vessels will clear quarantine on arrival at Masbate Harbour. Quarantine Officers will normally board the vessel once it is inside Masbate Bay.

BERTHING: The entire berth length of the wharf could be utilised for the loading or unloading of cargoes. Length of quay 180.0 m. Width 10 m. Max. depth of water 30 ft. Quay height above sea level 2 m. at high tide and 4 m. at low tide. Average rate of loading/discharging 20 tons per gang hour.
CRANES: None available.
STEVEDORES: Provided by Masbate Consolidated Arrastre, Inc.
MEDICAL: One government hospital and three private hospitals.
FRESH WATER: Available by special arrangements.
FUEL: All grades obtainable from Caltex depot in the area and supplied by lorries alongside.
GANGWAY/DECK WATCHMEN: Available, but not compulsory.
HATCHES: Opening and closing of hatches are part of the stevedores' work or at the Master's option.
REPATRIATION: All facilities available for crew changes; good sea and air connections.
AIRPORT: 3 km. from port area. One flight to Manila daily.
TIME: GMT plus 8 hours.
HOLIDAYS: New Year's Day (January 1st); Holy Thursday; Good Friday; Labour Day (May 1st); Independence Day (June 12th); P.I.U.S. Friendship Day (July 4th); Bonifacio Day (November 30th); Special Public Holidays declared by the President of the Republic of the Philippines is also included.

If any other legal holiday falls on a Sunday the following day is observed as a Holiday. Cargo work can be arranged on any or all holidays with the vessel's Agent.

POLICE/AMBULANCE/FIRE: Police and ambulance can be contacted through the local PPA office.
TELEPHONES: Placing of telephones on board can be arranged with the local telephone company (PILTEL).
SHORE LEAVE: Crews can be allowed ashore in company of an Immigration Officer.
GENERAL: Vessels intending to call port at Masbate shall apply for a berth space at least 24 hours before arrival. No dirty ballast may be dumped into the territorial waters of the Philippines. Rat guards shall be placed on all mooring lines. Berth allocation is on a first-come first-served basis.
DEVELOPMENTS: Extension of the wharf by 80 linear metres.
AUTHORITY: The Supervising Officer, Philippines Ports Authority.

POLLOC: 07.21 N. 124.13 E. (See Plan Book)

LOCATION: The Port of Polloc lies on the Southern coast of Polloc Harbour which, itself, is located N.E. of Illana Bay at about 14 km. in straight line North of Cotabato City. It is situated at Lat. 07° 21′ 12″ N., Long. 124° 13′ 27″ E.
ANCHORAGE: Polloc Anchorage is contained between Lalayang Point and Polloc Island and provides a clear manoeuvring area some 3 km. in diameter with deep water along the marginal shallows which front the low cliffs of its Southern shore.

The anchorage along the Southern margin of Polloc Harbour also provides the port shelter and water depth as well as the best land and water frontage for the development of port facilities and of port-orientated industries.

Bongo Island, 6 miles long, is situated in the North Eastern part of the bay and affords some protection from the Westward to the Mindanao River Delta Area and Polloc Harbour.

HEALTH: Quarantine anchorage is set at Lat. 7° 22′ N., Long. 124° 14′ E.
BERTHING: Main marginal wharf – 400 m. long.
Depth alongside – 10.5 m.
Lighter dock – 67 m. long on both sides.
2 government transit sheds – 11,960 sq.m.
Total port area – 102,350 sq.m.
Total area for open storage – 42,940 sq.m.
Total area reserved for private warehouses – 75,645 sq.m.
GENERAL:

Tides: The tidal cycle is semi-diurnal and synodic form. The characteristics are as follows:
Highest Astronomical Tide = EL +2.3 m.
Mean High Water Springs = EL +1.9 m.
Mean High Water Neaps = EL +1.5 m.
Mean Low Water Neaps = EL +0.6 m.
Mean Low Water Springs = EL +0.2 m.
Lowest Astronomical Tide = EL −0.3 m.

Storm Occurrences: Mindanao is below the main typhoon belt and only minimal effects have ever been observed at Cotabato as a result of occasional typhoons over the island. This is thought to be due to the consistent nature of typhoons in this region which travel S.E. to N.W.

In the sheltered area of Polloc Harbour at the Easterly side of the Port of Polloc, the max. fetch of 8 km. is to the N.W. and only with winds of 40 knot during a storm will waves of 1.2 m. (4 ft.) be experienced. With an "onshore" typical wind of 15 knots from N.W., wave heights will be about 0.3 m. (1 ft.).

Port Site Description: West of the Haines Point which marks the Western Sarmiento boundary is the site of the port. A frontage of some 2 km. can ultimately be reclaimed from the shallows along this shoreline to provide land backing to the wharves of the port.

The Eastern half of the Southern shoreline is occupied by the extensive plywood factory of Sarmiento Industries which has developed its industrial complex on land reclaimed over the sand foreshore with filling from the high land behind.

Main Sub-ports: The Philippine Ports Authority took over on October 26, 1977, the Cotabato City Wharf and Parang Pier. The former is a port with a depth restriction on the bar resulting in ships anchoring in the open sea of the North Mindanao River mouth and there being served by lighters, ferry boats and barges; while the latter caters to large ships which load logs and plywoods at anchor. It contains a deep water pier at the East shore of the bay and also a submerged marine pipe-line for pumping ashore petroleum products into a Tank Farm at Parang.

The Cotabato City Wharf also services inter-island watercraft such as passenger/cargo motor launches and other small sea transports.

Access Roads: The Port of Polloc is accessible by land to Cotabato City through a 13 km. modern concrete pavement which winds up at Simuay Junction at the Cotabato-Davao National Highway extending some 9 km. more to reach the commercial centre. From this point, the port is accessible by all forms of land transport facilities to any place in the Cotabato area.

The port is also expected to serve the Southern-most principalities of the Province of Lanao Sur with the improvement of the Ganassi Road connecting the province with main artery of the Cotabato area.

SHIPMASTER'S REPORT: July 1984.
Port Limits: Entrance to bay.
Documents: Usual for Philippine Ports.
Pilotage: Pilot not available. Port used by coastal cargo and passenger vessels, and only occasional foreign vessels.
Anchorage: 5 cables off the berth.
Restrictions: Advisable to arrive in daylight for foreign ships. Depth alongside wharf 10.5 m. LWST.
Health: Pratique granted on completion of formalities, normal inspection.
Radio: Manila.
VHF: Not available.
Radar: None.
Tugs: None. One man with small private tug produced certificate that he had piloted vessel alongside even though he had only guided through bay in front of vessel and neither towed vessel or handled lines. He did not speak English.
Berthing: 400 m. of well fendered wharf. No shore cranes, ship's gear only – plywood in crates is the main export cargo.
Cranes: None.
Bulk Cargo Facilities: None.
Specialised Cargo Handling Facilities: None.
Bridges: None.
Stevedores: Good – but have a bad habit of smoking down holds. Used small forklift trucks down hold to stack cargo pallets of plywood – very competently handled.
Medical: Doctor and dentist available at Cotabato City.
Tankers: No facilities.
Density: 1025.
Fresh Water: Not available.
Fuel: Not available.
Consuls: None.
Repairs: No facilities available.
Dry Docks: None.
Surveyors: None.
Gangway/Deck Watchmen: Customs and Immigration officials on board throughout vessel's stay.
Hatches: Opening and closing by crew.
Customs Allowances: Normal allowance. Bond sealed.
Cargo Gear: Ship's gear only.
Repatriation: Possible – but not advisable.
Airport: South of Cotabato City. Daily connection to Manila.
Time: GMT plus 8 hours.
Holidays: Usual Philippine holidays.
Police/Ambulance/Fire: No telephones.
Telephones: None.
Services: None.
Shore Leave: Allowed. Shore passes arranged with Immigration Authorities. Going ashore advisable in daylight only – at night it is dangerous and movement on road prohibited after 2200 hrs. – many roadblocks manned by army.
Identification Cards: Shore passes issued but identity card advisable.
Delays: Subject to berth availability.

AUTHORITY: Philippine Ports Authority.

PUERTO PRINCESA: 09.44 N. 118.43 E. (See Plan Book)

See "General" before first port.
Puerto Princesa, a large irregular inlet between Bancaobancaon Point and Panagtaran Point, is 2 miles wide at the entrance, extending about 6 miles in a N.W. direction. Coral reefs about 0.5 miles wide making out on the entrance points narrow down the navigable width of the channel to about 1 mile, depths of 34 fathoms (62.2 m.), shoaling to 9 fathoms (16.5 m.) in the vicinity of the pier. The major portion of the Northwestern and Western part of the bay is mostly shoal. The shoreline is generally fringed with mangroves and fronted by mud flats. The surrounding land consists of extensive wooded plain, backed by a high mountain chain. Several small rivers navigable by launches and small boats empty into the bay. The inner part of the harbour is a good typhoon anchorage.
PORT LIMITS: About 1 mile South of the pier. This is the entrance to the inner harbour of Puerto Princesa.

PILOTAGE: Pilots can be contacted by radio message through the shipping Agent not less than 24 hours before ETA indicating among others the following information:

1. Name of vessel.
2. Name of shipping lines.
3. Country vessel is registered.
4. Type of vessel.
5. Overall length.
6. Draft.
7. G.r.t.
8. Volume of cargo to be discharged and storage required.
9. Nature of cargo.
10. Passengers disembarking, transit and embarking if any.

When Pilot is aboard the pilot boat, an international flag "P" will be seen flying at her foremast.

ANCHORAGE: Vessels not going alongside the T-shaped pier may anchor Southwestward of Princesa Point in 12 fathoms to 16 fathoms (21.9 to 29.2 m.), mud bottom. A better protected anchorage may be had in 9 fathoms to 10 fathoms (16.5 to 18.3 m.) about 400 yards Northward of the end of the pier.

RESTRICTIONS: At night, in approaching Puerto Princesa from offshore, the lights in the vicinity of Canigaran, Northward of the entrance, may cause some confusion to strangers as they are visible long before the Puerto Princesa Light can be seen. The port light which is fixed red, visible 7 miles over an area of 041°, only becomes visible close in and just off the mouth of the harbour. At daytime a course Southward of the range Thumb Peak-Tidepole Point clears the reef on the North side of the entrance. Mount Beaufort on range with Tidepole Point clears the reef on the South side.

MAX. SIZE: Vessels not going to dock alongside the pier may anchor in 9 fathoms to 10 fathoms or 12 fathoms to 16 fathoms. For vessels going to dock alongside the T-shaped pier, permissible length and draft are the following: Length – 277 ft. (92.43 m.) draft – 27 ft. (8.2 m.)

HEALTH: Quarantine doctors are assigned in the Port to board the vessel and check any suspected disease or fever.

RADIO: Vessels at sea usually send their radio messages through the Association of International Shipping Lines in Manila to their Agents.

VHF: Not available.

RADAR: No radar station in the port.

TUGS: Tug service can be availed of by communicating with the local shipping Agent.

BERTHING: The City has a T-shaped concrete pier with a berthing face of 92.43 m. (277 ft.) Depths 27 ft. (8.2 m.) alongside and 31 ft. (9.4 m.) about 6 yards off the face. The Northern and Southern ends of the "T" have depths of 11 ft. (3.3 m.) and 15 ft. (4.5 m.) respectively. The inshore arms of the "T" have depths of 11 ft. (3.3 m.) at each berth. Sailboats and other shallow vessels berth on each side of the concrete approach. Typhoon signals are exhibited from a pole at the foot of the pier.

CRANES: No cranes available.

STEVEDORES: Advise Agent on volume of cargo to be discharged, storage required and nature of cargo.

TANKERS: May drop anchor at anchorage area.

FRESH WATER: Water supply on a limited quantity. Rate of 2 to 3 t.p.h. Source of water now being developed and water supply will increase correspondingly at the pier.

FUEL: Diesel oil, gasoline and kerosene may be purchased in drums.

FIRE PRECAUTIONS: No smoking is allowed when vessels are refuelling within a radius of 100 m.
An improvised 3 in. hydrant is installed at the pier. The lines used to supply fresh water could be used in case of a fire.

CONSULS: Consuls from foreign countries in Manila.

REPAIRS: No repair facilities.

DRY DOCKS: For small boats only.

SURVEYORS: Lloyd's and other classification societies in Manila, none locally.

GANGWAY/DECK WATCHMAN: Watchman can be hired from local Security Agencies of the Port.

HATCHES: Opening/closing of hatches is usually done by stevedores.

CUSTOMS ALLOWANCES: Quantity permitted for each crew member to be held out of bond are the following: Cigarettes – 5 packs. Liquor – 1 bottle.

CARGO GEAR: Loading/unloading is effected by ship's gear.

REPATRIATION: No facilities.

AIRPORT: The airport is about 2 miles from the pier with a schedule of 2 flights from Manila and back daily.

HOLIDAYS: The following are the Philippine National Holidays: January 1st – (New Year's day), Maundy Thursday, Good Friday, April 9th – (Bataan Day), May 1st – (Labour Day), June 12th – (Independence Day), July 4th – (Fil-Am Friendship Day), November 30th – (National Heroes Day), December 25th – (Christmas Day). Cargo handling operations may be arranged on these days at overtime rates.

POLICE/AMBULANCE/FIRE: Puerto Princesa City has all these facilities. There is a provincial hospital in Puerto Princesa. Private practising physicians and drugstores are available.

TELEPHONES: Pilipino Telephone (Piltel) services the City throughout 24 hours with a long distance call between the Port and Manila anytime of the day. Telephone connections for vessels alongside the quay can be arranged with the Telephone Company.

SERVICES: No special services available.

STORING: See "Prelims" page viii.
(1) Truck Only.
(2) N.A.
(3) Trucks may proceed alongside.
(4) Yes.
(5) Regulations not applicable.
(6) Riggers available.

SHORE LEAVE: Crew members are allowed ashore provided they always carry with them their Seaman's book or Passport.

IDENTIFICATION CARDS: Seaman's Book is sufficient for crews to identify them when ashore.

DELAYS: Due to lack of some Port facilities, delay in berthing, loading, discharging and bunkering is sometimes experienced.

DEVELOPMENTS: A proposed 100 m. R.C. wharf extension on the Northern end and reclamation at the Northern foot of the approach, construction of transit sheds, fence, office, road networks, etc.

AUTHORITY: Philippine Ports Authority, Port Area, Puerto Princesa City 2901, Philippines. *Tel:* 2-21. *Contact:* Engr. Edwin L. de la Cruz, Port Manager.

PULUPANDAN: 10.30 N. 122.46 E. (See Plan Book)

See "General" before first port.

PORT LIMITS: The Pulupandan Pilotage District embraces the waters from the approach of the North and South Channel to Pulupandan Government Wharf including Philippine Bulk Corporation Wharf and also Banago Wharf and approaches. (Please take note that this definition of port limits is for the coverage of Pulupandan Pilotage District).

The seaward boundaries of the port within which a vessel is considered to be an *arrived ship* is bounded from the South Buoy at Lat. 10° 27′ N., Long. 122° 46′ E. and the North Buoy Lat. 10° 33′ N., Long. 122° 46′ E.

The "Notice of Readiness" is presented after quarantine and port formalities are completed after which acceptance laytime commences. Any deviation from this is subject to charter-party terms.

DOCUMENTS: The Master of the vessel should prepare the following documents in order to ensure a speedy clearance:
Clearance of a Vessel to a Foreign Port.
Oath on Entering Vessel to a Foreign Port.
Master's Oath.
Crew Lists.
Passengers Manifests (Disembarking and Embarking).
Cargo Manifests (Inward and Outward).
Advance Notice for ETA (Telegram).
Application for Berth.
Vessel's Information Sheet.
Identification Permit to PHILSUCOM (in case of exporting molasses and sugar).
Authority to Load (Telegram).
Guarantee Payment for Wharfage.
Charter Contract (Agreement of shipper and shipping company as to the activity of operations).

PILOTAGE: With the vessel's ETA, the Pilot can only presume that the incoming vessel is entering the port because most vessels usually wait beyond the harbour limits approximately 7 miles to 11 miles from the port. This is due to the restriction in the P.C. & G.S. Chart 4416 which is marked by red lines indicating "Anchorage Prohibited".

The area of "Anchorage Prohibited" is enclosed by the square red line bounded by Lat. 10° 30′ N. to the North side and Lat. 10° 23′ N. on the South side and Long. 122° 40′ E. to the West side and Long. 122° 50′ E. to the East side.

If a vessel anchors 10 miles from the pilot boat station, only the silhouette of the vessel can be seen so there is no guarantee that it is really the expected vessel. In this connection, the Agent makes assurances to the Pilot that it is the vessel expected in order for the Pilot to meet the vessel.

The telegraphic address is "Pulupandan Pilots", Pulupandan, Negros Occidental, Philippines. The required advance notice of ETA must be 48 hours before arrival. A follow-up notice of ETA must be sent 24 hours before arrival and if necessary an amendment of ETA if the vessel is further delayed. VHF is not available in the port of Pulupandan.

The pilot boat is 45 ft. in length with a wooden hull and superstructure painted white. The name "Pilot No. 3" painted in black on a white background is located at the upper portion port and starboard side.

At night time, a white light over the red light can be seen aside from the regular side lights. Sound signals requiring a Pilot are 2 long and 1 short blast on whistle and/or a display of pilot flag "H" during daytime.

ANCHORAGES: Though the Pilot boarding point is within the enclosed area of "Prohibited Anchorage", the vessel can drop anchor at this point and wait for the Pilot, depth 9 fathoms. Another anchorage area recommended for awaiting a Pilot is at Lat. 10° 33′ N., Long. 122° 46′ E. This point has a depth of 39 ft. Two miles North or West of this point is a good anchorage area, the depth ranging from 6 to 7 fathoms with a good holding ground.

The pilot boat is always stationed at the South end of the government pier South of Pandan Pt., for the look-out of incoming vessels. As soon as the expected vessel is sighted, the Pilot proceeds to the pilot boarding point Lat. 10° 27′ N., Long. 122° 46′ E. about 5 miles from the station. If the vessel cannot proceed to the boarding point, the Pilot will meet her beyond this point.

The specific requirement in boarding is a strong and well balanced Jacob's ladder to be placed on the leeward side of the vessel. A manrope is a necessity.

RESTRICTIONS: Entry to this port has no restrictions except in the case of bad weather when the pilot boat cannot proceed to meet the vessel. Since the loading point of a foreign vessel is mostly at Philippine Bulk Corporation Wharf, the docking and/or undocking is scheduled according to tide and current.

MAX. SIZE: The max. permissible length of a vessel handled at this port area particularly docking at PBC Wharf is 186 m. to 200 m. The controlling draft forward is 26 ft. and 30 ft. aft and after dredging a controlling draft of probably 30 ft. Vessels of this length are usually docked from slack to flooding and undocked from slack to ebbing.

HEALTH: Pratique procedure is a requirement for vessels calling at the port. The shipping Agent arranges Pratique procedure with the Department of Health, Department of Animal Industry and Department of Plant Industry. If there is a disease on board, the doctor of the Department of Health and the Plant and Animal Quarantine Officers will take the necessary action in curing the disease and preventing the spread of an epidemic.

RADIO: There is no radio facility available in this port.

VHF: VHF radio facility is not available at this port, hence, there is no communication with vessels approaching the port and also when manoeuvring within the port area.

RADAR: Radar facility is not available.

TUGS: There is no tugboat available at this port that can be readily used in case necessity demands. The Pilot usually requests the Agent and/or Master to hire a tugboat for docking and/or undocking. In most cases, tugs cannot be taken from Iloilo or Cebu. If ever, tugs can be hired from Cebu, the vessel having to wait for 3 days to 5 days.

In this regard, the Pilot will dock the vessel without tug assistance as requested by the Agent and/or Master in order not to delay the vessel. The Pilot encounters difficulties and risks in this situation but the Agent gives to the Pilot an additional bonus for his efforts.

BERTHING: The berth length of the Government Pier is 424 m., providing 241 m. as berthing space for secondary vessels and 183 m. for primary vessels. Secondary vessels usually handle molasses, sugar, lumber and fertilisers. Primary vessels handle as much as twenty-five commodities. Of these commodities, consumer goods, general cargo, metal and metal products, chemicals, live animals and empty bottles are the most common cargo handled.

CRANES: Cranes for cargo handling are not available.

BULK CARGO FACILITIES: The port area of Pulupandan includes the facilities and equipments of private piers of Philippine Bulk Corporation and Total Bulk Corporation.

The berth at PBC Wharf measures 189 ft. and the quay measures 442.09 ft. Conveyor gantry is the berth equipment used in handling molasses and sugar in bulk for exports. The max. height of the discharging-gear above HW level is 128.4 ft. at the discharging rate of 600 t.p.h. Max. loading depends on the draft of the vessel and max. draft is 22 ft. (salt water).

The quay of TBC measures 19.201 m. It has 1 tanker berth 40 ft. depth at MLLW. It has 5 mooring fender piles spaced at 13 m. with 2 mooring bollards 58 m. from both ends of fender piles. 25 ft. is the max. permitted draft.

Cargoes handled for exports through pipe-lines are molasses and alcohol. Load/discharge lines for molasses are 10 in. diameter, 8 in. diameter and 6 in. diameter while that of alcohol is 4 in. diameter. Max. loading/discharging rate for molasses is 350 m.t./h. and for alcohol is 70 m.t./h.

SPECIALISED CARGO FACILITIES: LPG and containerised cargo are also handled at the Government Pier but the port does not have facilities specially equipped for handling containers or liquid chemicals.

BRIDGES: There are no bridges in the harbour passage of Pulupandan port.

STEVEDORES: The shipping Agent should arrange with the arrastre/stevedoring office regarding the arrastre/stevedoring service to be rendered to the vessel. This can be facilitated by giving to the arrastre/stevedoring operator the schedule of the vessel's ETA. After the Customs Formalities which vary from 3 hours to 2 days are completed, the Agent should give to the arrastre/stevedoring office Notice of Readiness to discharge/load. When the Notice of Readiness is accepted, the arrastre/stevedoring workers can discharge/load cargoes from/to the vessel. The monthly average cargo tonnage discharged per vessel is 300 tonnes and 95 tonnes for loaded cargo. Cargo loaded and discharged at the government pier is mostly cargo from domestic vessels.

MEDICAL: Hospitals are not available in the port area but government and private hospitals can be easily reached by public vehicle as they are located in Bacolod City, 30 km. from Pulupandan.

A vessel is not allowed to berth and its crew and passengers not allowed to go ashore should there be fever, epidemic or any suspected disease on board. Inspection undertaken by the doctor of the Department of Health and the quarantine officers of the Department of Animal Industry and the Department of Plant Industry, by whom medical attention is given when needed.

TANKERS: See "Bulk Facilities".

DENSITY: Average salinity of water in the port is 1022 – 1023.

FRESH WATER: Water can be supplied by Nepoteco. Water from deep wells is delivered through a trucking service. The rate of delivery is 1 truckload per hour which costs P15.00 per ton.

FUEL: Fuel can be made available to the Master of a foreign vessel by notifying the shipping Agent of its need for fuel. The shipping Agent applies to the Department of Energy in Manila for the supply of fuel to a foreign vessel. If the application is approved, arrangement is made by the shipping Agent with the supplier.

FIRE PRECAUTIONS: Fire extinguishers are required for every office and establishment in the vicinity of the port.

CONSULS: Consuls are not available in the port of Pulupandan.

REPAIRS: There is no drydock facility in the port.

SURVEYORS: The nearest surveyor is the Del Pan Sugar Surveyors in Bacolod City.

GANGWAY/DECK WATCHMEN: The need for the service of watchmen depends upon the discretion of the Master of the vessel. The cost of their service is P4.50 per hour for the Port District of Iloilo of which the Sub-port of Pulupandan is included.

HATCHES: Opening and closing of hatches carried out by both the crew and the stevedores.

CUSTOMS ALLOWANCES: The quantity of tobacco, wine and spirits allowed for each crew member to be held out of Bond must not be more than for personal consumption.

CARGO GEAR: The loading/discharge of cargo to/from the vessel is effected by the ship's gear.

REPATRIATION: There is no repatriation office in the port.

AIRPORT: The Airport is located in Bacolod City which is 30 km. from Pulupandan. Average number of flights is from 6 to 7 per day to different cities in the Philippines (Manila, Cebu, Iloilo and Davao).

All international flights commence at Manila International Airport.

TIME: GMT plus 8 hours. Daylight saving time is sometimes observed during Summer. This is implemented through a letter of instruction from the President.

HOLIDAYS: The following are National Holidays which are also observed in Pulupandan.

January 1st (New Year's Day), Holy Thursday and Good Friday (these religious holidays have no specific dates but often fall in March or April), May 1st (Labour Day), June 12th (Independence Day), July 4th (Fil-American Friendship Day), September 21st (Declaration of Martial Law), November 30th (Bonifacio Day), December 25th (Christmas Day, religious holiday), December 30th (Risal Day).

Official holidays of legal nature are usually working days for the port users due to the nature of work, while holidays of religious nature are often non-working days even for the port users.

POLICE/AMBULANCE/FIRE: The following are the telephone numbers of fire and police departments and government hospital where an ambulance can be made available.

Fire Department: San Juan 066, 2-31-91; Rodriquez Ave. 065; Lopez Jaena 064.

Police Department: 067; 062; 069.

Ambulance: 068; 2-30-96.

These departments are located in Bacolod City. There is a police department in this town but it does not have telephone facilities.

TELEPHONES: There is no telephone facility at this port.

SERVICES: Special services for tank-cleaning equipment, facilities for discharge of tank-washings, compass adjusting, etc., are not available in this port.

SHORE LEAVE: Crew members are allowed to go ashore.

IDENTIFICATION CARDS: Identification cards are not required as shore passes.

REGULATIONS: Refer to PPA Port Rules and Regulations.

DELAYS: Delay in berthing is due to the draft limitation of the port and the position of the port in case of bad weather.

DEVELOPMENTS: There is regular dredging and maintenance of the port.

AUTHORITY: Philippine Ports Authority, Sub-port of Pulupandan, Port District of Iloilo.

SAN FERNANDO, Luzon: 16.37 N. 120.18 E. (See Plan Book)

See "General" before first port.

APPROACHES: Vessels enter the harbour through a channel marked by 2 buoys and 2 range lights 144.5° (fixed green and red light flashing every 3 seconds.).

PILOTAGE: Pilotage is compulsory. Vessel is met at mouth of harbour by pilot boat that flies a red flag with letter "P" in white. Pilot then brings the vessel to Quarantine Anchorage. Conventional signals are used to call Pilots.

ANCHORAGE: Located at centre of the bay with 8 fathoms to 9 fathoms and good holding ground. In the event of rough weather or strong monsoon wind, vessels in the harbour are brought here for safety.

MAX. SIZE: Size of vessels that could be serviced is controlled by depth along quay:

Pier	*Depth Pier Head*	*Depth Shore End*	*Length*	*Width*
Gov't. RC	54 ft.	12 ft.	600 ft.	60 ft.
Shipside, Inc.				
Timber	60 ft.	30 ft.	850 ft.	80 ft.
Philex Conveyor	32 ft.			
Coal Conveyor	49 ft.	13 ft.	460 ft.	19 ft.

HEALTH: Immediately after vessel anchors at Quarantine Anchorage, Quarantine Officers board and clear vessel. Imported grain will be fumigated on board vessel at anchorage.

Boarding Formalities: Members of party are BOC inspector and guards, Immigration, Philippine Coast Guards, Pratique is then issued to indicate vessel as "arrived" and subject to Charter Party terms, laytime will commence.

RADIO: No direct radio communication system with vessels at sea is available in the locality. Ship Masters report ETA to Agent in Manila who relay message to San Fernando by telex or commercial radiogram. The PMU San Fernando may be reached by Long Distance telephone 41-25-57 or SSB radio transceiver 8776.5 kHz.

Arrival Advice: 48 hours before ETA, ship Agent files request for berth at PMU office indicating: ETA, draft, LOA and breadth, consignee or shipper, type of cargo and stowage, dangerous cargo, (if any). Heavy lifts, (if any), number of hatches to be worked, vessel is self sustaining or not.

24 hours before arrival or earlier, upon receipt of Master's advice by telegram, a berthing schedule is issued by the PMU. Copies are furnished to: Pilot, consignee/shippers, Arrastre-stevedoring contractor, ship Agent.

TUGS: 1 tug owned by Shipside, Inc. of 1,100 h.p., engine equipped with Kort Nozzle, is available for assisting, docking and undocking and launch service. Tug assistance during docking and undocking at the Shipside Pier is compulsory while its use at the Government and Philex Piers are at the option of the Harbour Pilot. A shipping company may bring in tugboat to assist its own vessel.

Tug lines are available at no extra cost. Conventional signals are used by Pilot and Master of tugboat.

Tug assistance rates: 0800 hrs. to 1700 hrs, regular time – others overtime.

BERTHING: See "Max. Size".
STEVEDORES: Stevedores, longshoremen, checkers and watchmen for the 2 piers are provided by:

Government Pier – Northern Carriers Corp. Shipside pier – Shipside, Inc.

Stevedores, checkers, etc. are non-union members. Any number of gangs can be ordered on 3 hours' notice. Stevedores work on 3 shifts:

1st Shift – 0000 hrs. to 0800 hrs.
2nd Shift – 0800 hrs. to 1600 hrs.
3rd Shift – 1600 hrs. to 2400 hrs.

Sundays, holidays and nights, stevedores are paid overtime rates. Christmas, New Year's Day, Easter Sunday, Good Friday and Maundy Thursday, stevedores will work on double pay.
TANKERS: The 4 oil terminals maintaining tank farms in the port zone are Petrophil, Caltex, Shell and Mobil. They operate a common set of pipe-lines for white and black oil product passing under the Government and Shipside Piers. PMU policy is 1 tanker discharging at 1 pier at a time. A "boom" is available at the quay side.
MEDICAL: 3 modern hospitals staffed by trained physicians and specialists and 6 clinics. They are open 24 hours.
FRESH WATER: Fresh water available at both piers alongside the quay via pipe-lines. Pumping rate: 8 t.p.h – Summertime. 12 t.p.h. – Rainy days.

Water samples are tested weekly at the Wallace U.S. Air Force Station at Poro, San Fernando.
FUEL: Bunker and others, POL product obtainable and supplied by lorries.
FIRE PRECAUTIONS: Water pipe-line alongside the quay can be converted to a fire hydrant by manipulating the valves to suck sea water. The oil terminals in the area maintain chemical fire fighting equipment, a "boom" to contain oil spillage and "light water". Voice of America, Wallace U.S. Air Force Station, and the Airport all within a 3 km. radius to the piers, maintain modern fire trucks.
REPAIRS: Atlantic Gulf and Pacific Co. of Manila at Batangas operates ship repair facilities.
GANGWAY/DECK WATCHMEN: Available from Arrastre contractor upon request of ship Agent.
SURVEYORS: Mariaser Surveyors of San Fernando are available on request. Surveyors also available from Manilla, 270 km.
OPENING/CLOSING HATCHES: First open and last close normally carried out by crew. Stevedores operate the hatches when it rains.
CARGO GEAR: Arrastre operators maintain complete loading/discharging gear for bulk, general cargo and heavy lifts. Also available are:

11 units — Forklifts, 1 to 8 tons capacity.
2 units — Mobile cranes, 25 tons capacity.
1 unit — Floating crane, 100 tons capacity.

IDENTIFICATION CARDS: For control of persons inside the port zone and for security, I.D. should be available when requested by guards.
AIRPORT: San Fernando Airport is 3 km. South of Pier. Philippine Air Lines serve the port with 3 flights weekly.
TIME: GMT plus 8 hours.
HOLIDAYS: New Year's Day (January 1st); Holy Thursday, Good Friday; Labour Day (May 1st); Independence Day (June 12th); RP-US Friendship Day (July 4th); All Souls Day (November 1st); Bonifacio Day (November 30th); Christmas (December 25th); Rizal Day (December 30th).
POLICE/AMBULANCE/FIRE: Police, Tel: 41-25-77. Hospitals/Ambulance, Tel: 41-28-44, 41-23-55, 41-26-16; Fire Dept. Tel: 41-24-88; Phil. Constabulary Tel: 41-25-28.
TELEPHONES: Vessels docked at Shipside Pier may request telephone connection.
SHIP SUPPLY SERVICE: The following authorised ship supply service operators with addresses in this port are:

1. A. Neral Chandling and Laundry Services, 32 Mabinin Street, San Fernando, La Union, c/o Mrs. Aurora Neral (privately owned).
2. La Union Chandling and Laundry Service, Catbangen, San Fernando, La Union, c/o Mrs. Caridad Tabisola (privately owned).
3. Bureau of Quarantine, PPA Compound Poro, San Fernando, La Union, (launch services – government owned).
4. Shipside, Inc., Poro, San Fernando, La Union, (launch services – privately owned).

SHORE LEAVE: Crew members are allowed to go ashore without special permission.
GENERAL: *Discharge of Ballast:* No dirty ballast may be dumped into the territorial waters of the Republic of the Philippines.
Rat Guards: Rat guards shall be placed on all mooring lines to the wharf.
Refuse: May be collected by a truck at P25.00 per trip.
Accessibility: Port is accessible by road, rail and air transportation.
Provisions: Fresh vegetables can be supplied directly from the vegetable capital of the Philippines (Baguio City).
Rest, Recreation: Beach resorts with miles of clean beach just minutes away by car. First class hotels with swimming pools, air conditioned rooms. Baguio City, Summer Capital of the Philippines is 70 km. East and 5,500 ft. above sea level. A golf course at Camp John Hay, the R & R centre of U.S. Servicemen can be used by civilians.
AUTHORITY: Philippine Ports Authority, Port Management Unit, San Fernando, La Union, Philippines. *Tel:* 41-25-57. *Contact:* Adolfo Amor, Jr., Port Manager.

TABACO: 13.41 N. 123.58 E. (See Plan Book)

DOCUMENTS:

Inward Coasting Manifest.
Hatch Plan or Stowage Plan.
Vessel's Information Card.

PILOTAGE: Pilotage is compulsory. ETA advice should be sent to the Harbour Pilot Association, Legazpi City at least 24 hours before vessel's arrival. The vessel is met by the Harbour Pilot about 2 km. from the wharf aboard a boat displaying a Pilot's flag.
ANCHORAGE: Within the Tabaco Bay but not less than 500 m. from the existing facility.
RESTRICTIONS: Berthing space is limited due to its physical length and the existence of a shipwreck at the Northern end of the wharf.
MAX. SIZE: LOA 300 m., draft 28 ft.
HEALTH: Vessels clear quarantine on arrival at the Tabaco Harbour. Quarantine Officers will normally board the vessel 2 km. from the existing wharf.
BERTHING: The existing facility can accommodate two foreign-going vessels of regular size at one time. Length of quay 300 m. Width 12 m. Storage area 2 hectares. Max. depth of water 30 ft. Quay height above sea level 2 m. at high tide and 5 m. at low tide. Average rate of loading/discharging 22 tons per gang hour.
CRANES: 2 shore cranes available with capacities of 20 and 25 tons. For heavy lifts, vessels are required to use their own gear.
STEVEDORES: Provided by Tafworks Arrastre Corporation.
MEDICAL: 1 government hospital and 2 private hospitals.
FRESH WATER: Can be provided by pipe-line or hoses from the port facilities.
FUEL: All grades obtainable from major oil depots at Legazpi City which is approximately 27 km. from the port area and supplied by lorries alongside.
GANGWAY/DECK WATCHMEN: Available, but not compulsory.
HATCHES: Opening and closing of hatches is part of the stevedores' work or at the Master's option.
REPATRIATION: All facilities available for crew changes.
AIRPORT: At Legazpi City.
TIME: GMT plus 8 hours.
HOLIDAYS: New Year's Day (January 1st); Holy Thursday; Good Friday; Labour Day; (May 1st); Independence Day (June 12th); P.I-U.S. Friendship Day (July 4th); Bonifacio Day (November 30th); Special Holidays declared by the President of the Republic of the Philippines are also included. If any other legal holiday falls on a Sunday the following day is observed as a holiday. Cargo work can be arranged on any or all holidays with the vessel's Agent.
POLICE/AMBULANCE/FIRE: Police and Fire, Tel. 222; Ambulance, Tel. 215.
TELEPHONES: Placing of telephones on board can be arranged with the branch office of the local telephone company (MATELCO).
SHORE LEAVE: Crew allowed ashore in company of an Immigration Agent.
GENERAL: Vessels intending to call at the port of Tabaco shall apply for a berth space at least 24 hours before arrival. No dirty ballast may be dumped into the territorial waters of the Philippines. Rat guards shall be placed on all mooring lines. Berth allocation is on a first-come first-served basis.
DEVELOPMENTS: Salvaging of the shipwreck at the Northern end of the wharf, extension of the existing facility by 120 m.
AUTHORITY: The Officer-in-Charge, Philippines Port Authority, Port of Tabaco, Tabaco, Albay. *Tel:* 378.

The Port Manager, Philippine Port Authority, P.O.Box 164, Legazpi City. *Tel:* 2012. *Contact:* C. E. Dinopol, Port Manager.

TACLOBAN: 11.15 N. 125.00 E. (See Plan Book)

See "General" before first port.
DOCUMENTS: *Entrance Formalities:* For submission to PPA Harbour Section:

3 copies Inbound Coasting Manifest with enclosed or attached on each copy the following:

Crew List.
Oath of Master.
Passenger List (passenger vessels only).
Import Declaration (foreign vessels only).
Pratique (foreign vessels only).
Roll Book for presentation and clearance from last port of call also required.

Exit Clearance:

3 copies Outbound Coasting Manifest with attached or enclosed on each copy the following:

Crew List.
Oath of Master.
Passenger List (passenger vessels only).
Export Declaration (foreign cargo vessels).

PILOTAGE: The following signals from vessels requiring a Pilot are:

By day:

a) The pilot jack hoisted at the fore.

b) The International code signals or P.T.

c) 2 long blasts followed by 1 short blast on ship's whistle.

By night:

a) The pyrotechnic light, commonly known as blue light every 15 minutes.

b) A bright white light, flashed or shown at short or frequent intervals just above the bulwarks for about a minute at a time.

c) The International code signals P.T. by flashing lights.

Telegraphic address is Tacloban Harbour Pilot's Association, Tacloban City. 24 hours notice of ETA is required before arrival of vessels. No VHF in pilot boat or pilot station.

All pilot boats in general are painted white above the waterline and black below, with the letter "P" not less that 12.5 cm. in length on both bows above the waterline.

During the day, boat in use shall carry at the mast a red and white flag not less than 6 decimeters wide and 9 decimeters long.

The exact location where the Pilot has to be taken on board when entering Tacloban through San Juanico Strait is at Canauay Island about 2 miles N.W. of said Island. For vessels entering Tacloban Port through San Pedro Bay, the Pilot may be taken on board a mile North of Mariquitdaquit Lighthouse.

In case of bad weather, vessels are advised to drop anchor about 3 miles South of Dio Island when waiting for the Pilot.

With respect to safety measures while Pilot boarding vessels, it is suggested that the Master put his vessel to windward in a postion where the pilot boat is protected from big waves and strong winds. They must lower their accommodation ladder or rope ladder.

The location of anchorage for vessels awaiting a Pilot is either 1 mile North of Mariquitdaquit or 2.5 miles S.E. of Dio Island.

ANCHORAGES:

Dio Island Anchorage:
Position – 2 miles S.E. of Dio Island
Depth – 6 – 7 fathoms
Area – 4 square miles

Basey Anchorage:
Position – 1.6 miles West of Jinamoc Lighthouse
(Lat. 11° 15′ 36″ N., Long. 125° 04′ 32″ E.)
Depth – 4.5 fathoms
Area – 0.8 square miles

Tacloban Quarantine Anchorage:
Position – 0.5 miles South of Binatac Point
0.7 miles North of Panirungan Point
Depth – 4 – 5 fathoms
Area – 1 square mile.

RESTRICTIONS: Controlling draft for vessels entering Port of Tacloban via San Pedro Bay is 19 ft.

Due to numerous shoals, reefs and fish traps which abound in the area along the channel, vessels arriving at night must drop anchor either at the point 1.5 miles North of Mariquitdaquit or at the point 2 miles S.E. of Dio Island. The Pilot will conduct the vessels in at daybreak.

Tides in Tacloban show great inequality, mostly at HW. Mean range of tide is about 1.6 ft., whereas the Diurnal range is 2.3 ft. Flood current sets in a Northeasterly direction, while ebb current sets Southeasterly with a maximum velocity of 3 knots.

MAX. SIZE: See "Berthing".

HEALTH: Pratique is only necessary and required in the first port of entry; it is automatic when entering ports in the same country or state.

RADIO: Radio communication of the Philippines, Inc., Manila.

TUGS: Tugs normally join the vessel when inside Tacloban Harbour. For docking, tugs usually use the vessel's lines.

BERTHING: Inform local office of Philippine Ports Authority at least 24 hours before ETA if vessel on scheduled voyage and 36 hours before ETA if a tramping vessel.

Length of quay – 1,048.8 m., with 217.3 m. allotted for foreign vessels, 585.5 m. allotted for domestic vessels and 246 m. allotted for pump boats.

Maximum permissible ship draft at low water (sea water), Foreign vessels – 6 m.; Domestic vessels – 4 m. – 6 m.

Note: Actual depth along berth for foreign vessel at LW, 7 m.; Domestic, 4 m. – 7 m.

Load/ Discharge – Usually by ship's own gear but shore equipment available for rent.

BULK CARGO FACILITIES: See "Berthing" for berth details.

Cargoes handled: Copra, grain, abaca, sugar, rattan, lumber, drinks, goods in cartons, crated products, heavy lifts, steel bars, etc.

Facilties: Rope nets, rope slings, cable slings, spreader sets, sliding boards and pallets.

STEVEDORES: ETA advices should be furnished to stevedores through ship's Agent.

MEDICAL: Advance notice of required medical attention to ship's Agent essential.

TANKERS: No facilities.

FRESH WATER: Fresh water available delivered by water-tank truck.

FUEL: Only available to domestic (small) vessels.

FIRE PRECAUTIONS: Fire station in port area.

CONSULS: None.

DRYDOCKS: None.

GANGWAY/DECK WATCHMEN: Necessary for safety of vessel. Ship's Agent makes all necessary arrangements.

OPENING/CLOSING HATCHES: Normally carried out by stevedores.

CERTIFICATES: All documents required by International Shipping Rules and Regulations.

CUSTOMS ALLOWANCES: One carton cigarettes per week for each man. Wines/spirits at the discretion of the Collector of Customs.

CARGO GEAR: Load/discharge affected usually by ship's gear but shore equipment available for hire.

IDENTIFICATION CARDS: Needed for inspection by Immigration Officer.

REPAIRS: Not possible.

REPATRIATION: Immigration Officer effects crew changes and arranging necessary repatriations.

AIRPORT: Distance from airport, 9 km., and is regularly served by airlines.

TIME: GMT plus 8 hours.

HOLIDAYS: Depending upon agreement with stevedores, work may be performed during holidays.

POLICE/AMBULANCE/FIRE: All departments are within one minute's call from the harbour.

TELEPHONES: Can be connected on board if required.

SERVICES: No special services available.

SHORE LEAVE: Crew members allowed ashore.

REGULATIONS: No unusual regulations.

DELAYS: Berthing: When all berths are occupied upon arrival. Loading/discharging: Limited number of available haulers due to simultaneous operations of vessels at berth. Bunkering: Simultaneous bunkering of vessels.

AUTHORITY: Philippine Ports Authority, Port Area, Tacloban City.

TANAUAN: 11.06 N. 125.01 E. (See Plan Book)

SHIPMASTER'S REPORT: 1976

N.I.D.C. Coconut Oil Pier: Location of berth Lat. 11° 06′ 15″ N., Long. 125° 01′ 30″ E. The berth is 7 miles from the Pilot boarding point. Least depth of water in channel from sea to berth, 32 ft. At berth bottom is mud and sand. Density 1025. Docking and undocking in daylight only at any stage of tide.

Anchorage 1.5 miles North of Mariquitdaquit Light. Terminal Information: Use shore hoses. Length of pipe-line – 3,000 ft. connection at manifold – 8 in. Shore-booster pump not used. No steam. Product handled, coconut oil.

Port Information: Pilotage compulsory. Pilot requires 12 hours' and 24 hours' notice. Pilot boards 1 mile North of Mariquidaquit Island and comes from Tacloban. It is unsafe to enter and leave after dark. Vessels can enter and leave any state of tide. Max. LOA 1,000 ft. Max. beam 90 ft. Max. draft 31 ft. No tugs available. Vessel able to berth and unberth without aid of tugs.

Facilities available: Fresh provisions available from Tacloban, a small town, 20 km. away. Chandler requires payment in cash for goods.

Airport at Tacloban. Doctor and hospital available. Groceries, meats and laundry available.

No fresh water, repairs, Lloyd's Surveyor or fuel available.

VILLANUEVA: 08.35 N. 124.44 E. (See Plan Book)

SHIPMASTER'S REPORT: May 1980

LOCATION: The port of Villanueva is situated in Macajarlar Bay on the North coast of Mindanao Island in position Lat. 8° 34′ 45″ N., Long. 124° 44′ 22″ E. and has a clear deep water approach.

PILOTAGE: The Pilot and possibly Quarantine Officials board in position Lat. 8° 35′ N., Long. 124° 40′ E. by launch from Cagayan de Oro City.

APPROACHES: When approaching from the East, passage through the Surigao Strait creates no difficulties as there is deep water. There are good radar targets and no excessive tides or currents. Passage between Camiguen Island and the coast is also clear and deep. Numerous fishing vessels encountered throughout the area as well as frequent passings of coastal traffic.

ANCHORAGE: Although there is very deep water to close inshore there is an anchorage position, recommended by the Pilots, in position Lat. 8° 37′ N., Long. 124° 44′ 30″ E. which is 1 mile offshore.

TUGS: There are at least 4 tugs to assist with berthing, all modern efficient vessels of over 3,000 h.p. Tug's ropes used for towing.

BERTHING: Berth is in position Lat. 8° 34′ 45″ N., Long. 124° 44′ 22″ E. and is aligned 050°/230°. The berth is 350 m. in length and fendered with 7 'Yokohama' balloon type fenders. Vessels of up to 300 m. in length berth port side alongside, vessels over 300 m. LOA berth starboard side alongside. Depth alongside 23 m. – 29 m. Daylight berthing only but reported able to leave at any time.

Moorings: Standard mooring equipment used, line boat used to run head and stern lines.

Moorings usually 4 head/stern lines, 2 breast lines and 2 springs at each end of vessel.

LOADING: Loading is carried out by 1 loading unit with a capacity of over 4,500 t.p.h. The product, sinter ore, is a finished product with a stowage factor of 23 cu.ft.–24 cu.ft. per ton relatively clean and not much dust. The product can be loaded into holds previously containing coal without cleaning.

Discharge facilities exist on the same berth where there are 2 units using 60 ton grabs.

A thorough draft survey is carried out on arrival and again after loading completed.

GENERAL: After berthing the vessel is boarded by 14 port officials of various departments from plant quarantine to immigration, paperwork takes about 2 hours on arrival and again before departure after loading completed.

Fresh stores including fish are available of good quality and a reasonable price.

There is no VHF communication but telex service to Manila is reliable.

While alongside 3 Customs Officers/Inspectors remain on board and require food and accommodation on a 24 hour basis.

SHIPMASTER'S REPORT: January 1981.

VESSEL: LOA 259.0 m., beam 39.6 m., draft 52 ft. 6 in.

Discharged 109,000 tonnes of iron ore at Philippine Sinter Corp. Pier.

GENERAL: The pier of Philippine Sinter Corporation at Villanueva is located at the S.E. end of the "J"-shaped bay of Macajalar, in position Lat. 08° 34.45′ N., Long. 124° 45.24′ E., on the North coast of the Philippine island of Mindanao, in the province of Misamis Oriental. Villanueva is only a very small village. The nearest city is Cagayan de Oro, 24 km. (45 minutes) by car from the plant. Our Agent and almost all other offices of some importance, are located here.

DOCUMENTS: The Authorities and the Agents' representatives boarded the vessel at the anchorage (14 persons). The following lists were required:

- 10 Crew Lists.
- 8 Cargo Plans.
- 2 Vaccination Lists.
- 1 Maritime Declaration of Health.
- 6 Ship's Stores Lists.
- 6 Personal Effects Lists.

In addition, there were other lists, but the Agent had all of them made out in advance.

Telegraphic Free Pratique is obtainable. A telegram sent to the Agent 24 hours before arrival stating the number of Philippinos and Europeans is also compulsory.

Upon departure, no Philippino crew member is allowed to depart if his seaman's book has expired, so all seaman's books must be renewed before departure. Philippino citizens who are not seamen (wives, etc.) are not allowed to join the vessel in a Philippine port and stay with the vessel to its next port of call. Visiting was no problem, except that a special Customs Permit must be obtained.

PILOTAGE: Pilotage is compulsory both when anchoring and at docking/undocking. The Pilots have a portable CB radio, but no VHF. The pilot cutter is about 50 ft. long, with a large (for its size) white superstructure. Pilot boarding ground Lat. 08° 37′ N., Long. 124° 42′ E. for inbound vessels. For outbound vessels, Pilot leaves as soon as the vessel is turned, and is about 5 cables off the pier.

ANCHORAGE: The Bay of Macajalar is a deep water bay, with the exception of a shallow area centered at Lat. 08° 40.75′ N., Long. 124° 41.5′ E., and a strip of shallow water extending generally less than 0.5 miles off the coast.

The Villanueva Anchorage is the one exception on the East side of the bay. It is a ledge of less than 100 m. depth extending 1.4 miles Westward from Lat. 08° 37′ N., Long. 124° 45.5′ E. on the shoreline, and it is 3.5 cables wide. The recommended anchorage is 8 cables due West of Lat. 08° 37′ N., Long. 124° 45.5′ E. The depth here is 70 m. or less than 40 fathoms. We anchored here and found it to be good holding ground. Not being more than 0.8 miles from the reefs in a "J" shaped bay, consequently open to wind and sea from West to North, I would not like to anchor there in any strong Northwesterly wind.

In our case the wind was from N.E. to S.E. which, according to the Pilot, were the prevailing wind directions. We did, however, experience quite a bit of swell.

BERTHING/UNBERTHING: Docking and undocking is only done during daylight. There are 4 tugs available in Villanueva, each of 3,500 h.p. The Pilot brought the vessel parallel to the pier about 0.2 miles off, and the 3 tugs we used (1 forward, 1 amidships and 1 aft) pushed us alongside without difficulty. We docked starboard side to. There was, according to the Pilot, no preference for docking starboard or port to, that is, for vessel's discharging.

Vessels loading must always dock port side to due to the construction of the shiploader.

The docking sonar had, in my opinion, the big fault that the Pilot had to rely upon verbal information via the CB radio. A display board visible from the bridge would have enabled us to form instant opinions.

Undocking was a reverse operation; we were pulled by 2 tugs until 0.2 miles off the pier, then the third pushed us around.

CARGO HANDLING FACILITIES: The pier is a concrete structure that rests on several large pipes that are sunk down to bedrock. It lays in direction 049° – 229°. There is a "gangway" connecting the pier to the shore. The pier itself is 380 m. long and about 50 m. wide. Large airfilled bags are used as fenders, 6 m. – 7 m. long with a radius of 1.5 m. – 2.0 m. So even with a relative heavy swell the ship lays very nicely alongside this cushion.

We tied up with 4 head/stern ropes, 2 spring and 2 breast ropes. The discharging cranes are of the same type as "Kawasaki" have in the port of Chiba, max. 6 tonnes with clamshells of 30 tonnes, portable cranes. Hourly average capacity on lump ore 1,100 tonnes per crane, and on fine ore 1,400 tonnes. We averaged 2,794 tonnes with 2 cranes.

The discharging operation was impressive, with regard to speed and precision.

The ship loader was a normal type conveyor belt with an airdraft of about 40 ft. Loading capacity 4,000 tonnes p.h. Free rail area at pier about 280 m., no shifting while loading for a ship of our size.

SERVICES: There is good drinking water available at the pier. Bunkers are obtainable but at what quantity and price I was not able to find out.

As of repair facilities, I had the impression that only simple repair work could be carried out.

The city of Cagayan de Oro has an airport with a twice daily direct flight to Manila, and once a day connections with Cebu and Davao. There are no international flights.

International telephone service is extremely poor. One must make the call directly from the telephone company's office, and a 2 hour – 3 hour waiting time for Europe and the U.S.A. must be expected. A call to Manila may come through in less than an hour. The Agent had telex and this is the only sensible communication with Cagayan de Oro.

With mail from Europe and the U.S.A., one must reckon on 2 weeks to 3 weeks. It seems that all communications go through Manila, with the delays that this automatically causes.

The Agent had a minibus service from the plant to Cagayan de Oro. This proved a necessity, as taxis are scarce.

The ship chandler could only obtain foodstuff.

OPERATOR: Philippine Sinter Corporation.

ZAMBOANGA: 06.54 N. 122.04 E. (See Plan Book)

See "General" before first port.

PILOTAGE: Vessels approaching the port use International Code Signals for calling Pilot.

Pilot Station: Telegraphic address is Zamboanga Pilots, Zamboanga City. Estimated time of arrival (ETA) must be radioed 24 hours in advance. Pilots always on duty. Pilot boat is wooden launch painted white with red trimmings and displaying the pilot flag. The exact area where a Pilot will board vessel is in the vicinity of Little Sta., Cruz Island, for vessels coming from West, and near the vicinity of Rio Hondo for vessels coming from East. Alternative area in the event of bad weather is in the vicinity of Zamboanga Pier at a distance of at least 1 mile either way. Vessels awaiting Pilot should not necessarily drop anchor, provided 24 hours' notice of their ETA is given by local Agents or the Master, to the Zamboanga Pilots, for a Pilot is *always* on duty.

ANCHORAGES: Owing to the steep bank, strong currents and hard, uneven bottom, there are no good anchorages off Zamboanga. However, anchorage may be made anywhere Southward of the wharf at a distance of about 3 cables from shore Eastward of an imaginary line from the Tide Indicator, at a depth of between 25 fathoms and 30 fathoms and giving 7 shackles of chain in the water. This will hold vessel even at strongest current of 6 knots. In the event of very bad weather the vessel should transfer her anchorage to Caldera Bay, which is approximately
7 miles West of the anchorage area.

MAX. SIZE: No limits for anchoring. For berthing, up to 32 ft. draft.

HEALTH: Quarantine Officer will board the vessel for the necessary inspection of all crew on board. Thereafter he issues Pratique, if and when he finds that there is no disease or fever on board. The Pratique is valid until after the vessel departs to a foreign port.

RADIO: Universal Telecommunication Service, the Capitol Radio Telecommunication, the Telefast Radio Communication, the Radio Communications of the Philippines and the Telecom, operated by the National Government for receiving and transmitting radio messages. Night and day services.

TUGS: The position where tugs normally join the vessel is in the stream and the usual ship's lines or tug's lines are used. There is no charge collected for the use of the tug's lines.

BERTHING: The Zamboanga Government Wharf is about 800 ft. long with a depth at the latest survey of the following: East end 30 ft.; mid-section 25 ft. and West end 21 ft. There is a private wharf at Baliwasan and vessels of 15,000 g.r.t. can dock there with the following limitations: Draft forward must not exceed 32 ft.; draft aft must not exceed 36 ft., upon completion of loading. Vessels docking at this wharf can only be docked at *flood* tide (current running East to West) and can only be undocked in the same manner.

2 anchors must be used in berthing and vessels lay alongside the concrete pier port-side-to. This wharf in Baliwasan is for loading coconut oil and copra pellets only.

TANKERS: There are 4 oil depots at Gavilan Pt. and at Baliwasan. (Shell, Mobil, Esso and Caltex.) Max. tonnage of 4,000 gross with a draft of not more than 18 ft. can be moored for discharge.

STEVEDORES: The Master of the vessel shall cable to the local Agents so that contact can be made with the shipper to arrange gangs.

MEDICAL: It is necessary for Agents to receive advance notice of required medical attention. Hospital facilities are available at all times. Inoculations are also required by the Quarantine Officer upon boarding a vessel.

FRESH WATER: Fresh water can be obtained only at night-time due to low pressure. If there is no available space at the Zamboanga Pier the vessel has to wait at the anchorage for a berthing space to get water supply.

FUEL: Fuel, diesel, and crude oil available.

FIRE PRECAUTIONS: Smoking is entirely prohibited on board a tanker entering this port. The Master must advise all persons boarding his vessel.

GANGWAY/DECK WATCHMEN: The services of watchmen are necessary to stop looters from boarding the vessel.

OPENING/CLOSING HATCHES: Normally opening and closing by the crew, and if done by stevedores the vessel has to pay.

CUSTOMS ALLOWANCES: 200 cigarettes per man. Upon arrival in port the cigarettes are sealed in a bonded store by the Customs Authorities, and can be opened only upon permission granted by the Collector of Customs.

IDENTIFICATION CARDS: All crew members to have identification cards for immediate identification in case of trouble while the crews are on shore.

CONSULS: None available.

REPATRIATION: Effecting crew changes and arranging necessary repatriation are carried out by the Immigration Office in the port with the assistance of the ship Agent and the foreign Embassy concerned.

AIRPORT: Distance from Zamboanga Pier to the airport is 3 km. Served by regular airlines. There is a daily flight from Zamboanga to Manila by Philippine Airlines. Airport open to International flights.
TIME: Local Civil Time is 8 hours ahead of GMT.
HOLIDAYS: Cargo work can be arranged with the Stevedoring Company through the shipper to work during holidays, including Sundays.
POLICE/AMBULANCE/FIRE: Police Department, Tel. 06; Ambulance, Zamboanga General Hospital, Tel. 08; and Fire Department, Tel. 00.
TELEPHONES: Telephones cannot be installed on board when docked at the pier as is not allowed by the City Government.
SERVICES: Special services may be available, e.g. tank-cleaning equipment, facilities for discharge of tank-washings, compass adjusting, through representations to be made with the shipper or local Agent of the vessel.
DEVELOPMENTS: A new quay 210 m. length and 10 m. depth to be constructed. Completion expected early 1985.
AUTHORITY: Philippines Ports Authority, PMU-Zamboanga, Port Area, P.O.Box 360, Zamboanga, Philippines. *Tel.* 5191, 5192. *Contact:* Hector E. Miole, Port Manager.

NOTES

Please also advise Shipping Guides Ltd.

Poland

GDANSK: 54.21 N. 18.39 E. (See Plan Book)

ICE: Efforts made to keep port open all year round. Only in very severe Winter are difficulties experienced.

DOCUMENTS:

12 Copies Cargo Manifest.
2 copies Bills of Lading.
Discharge Books to be collected for presentation.
Ship's Register.
Maritime Declaration of Health.
Ship's Articles/Crew List 5 copies.
Derat Certificate or exemption from Sanitary Certificates, covering food cargoes and/or of animal origin, destined for discharge here.
Specification of Dangerous Cargo, even if in transit.
2 Stowage Plans.

PILOTAGE: Compulsory. Boarding in Gdansk Roads. Gdansk Pilot Station available on VHF, Channel 14.

ANCHORAGES: Gdansk Roads. Anchorages Nos. 1, 2 and 3 for ships up to 720 ft. LOA.

Anchorages: No. 1 draft 29 ft. 06 in.; No. 2 draft 34 ft. 05 in.; No. 3 draft 39 ft. 04 in.; Anchorages Nos. 4 and 5 for bulk carriers and tankers of Baltimax size, max. draft 59 ft. 00 in. No tides.

RESTRICTIONS: On arrival or if moving or in every case of emergency conditions contact Harbour Master's Office on Channel 14, Tel: 43-07-10.

MAX. SIZE: Baltimax size for ships entering North Port. Max. size of ships permitted to enter inner port: draft 33 ft. 6 in. brackish water, max. LOA 720 ft. Also see "Berthing".

HEALTH: Maritime Declaration of Health to be presented on arrival. In the event of suspected disease, the vessel should cable to "Quarantine Gdansk", or via Agents.

RADIO: Messages should be sent via Gdynia Radio.

RADAR/VHF: Port Radar Service acting with pilot station, can be contacted on VHF Channel 14.

TUGS: Join in Gdansk Roads. Vessel's lines must be used. Tugs compulsory for all vessels over 2,000 g.r.t. Tugs available up to 2,500 h.p.

BERTHING: Max. draft mentioned below is to be taken as normal water level. No tide. Max. difference from mean level is plus/minus 3 ft. subject to wind direction.

Name of quay	*Length*	*Max. Draft*
Marchlewskiego	563 m.	27 ft. 11 in.
Warynskiego	525 m.	31 ft. 06 in.
Oliwskie	635 m.	26 ft. 06 in.
Westerplatte	1,400 m.	29 ft. 06 in.
Ziolkowskiego	130 m.	17 ft. 00 in.
Obroncow Poczty Polskiej	240 m.	33 ft. 06 in.
Weglowe	800 m.	33 ft. 06 in.
Rudowe	740 m.	33 ft. 06 in.
XX-lecia PRL	1,243 m.	33 ft. 06 in.
Chemikow	210 m.	32 ft. 02 in.
Przemyslowe	235 m.	20 ft. 04 in.
Port Polnocny/North Port:		
Liquid Fuel Terminal	450 m.	49 ft. 03 in.
Coal Terminal	240 m.	49 ft. 03 in.

CRANES: Floating cranes of 26–300 tons capacity. Shore cranes up to 16 tons capacity.

Also see "General Cargo Handling Facilities".

BULK HANDLING FACILITIES: Coal Handling Facilities at North Port Coal Terminal capable of receiving vessel up to max. draft 49 ft. 03 in. Daily loading rate 50,000 tons. Also Inner Port-Weglowe Quay equipped with 7 – 10 tons cranes for vessels up to 33 ft. 06 in. draft. Bulk and liquid sulpher handled at Obroncow Poczty Polskiej Quay. Conveyor system for fertilisers in bulk. 20 tons grab cranes at Chemikow Quay. Grain elevator. In the event of no accessible berth and/or grain elevator not being available, such bulk cargoes are discharged by grabs. Vessels should be suitable for grab discharge.

Timber handling facilities at Rudowe and Westerplatte Quays.

GENERAL CARGO HANDLING FACILITIES: General cargo quays equipped with shore 3 – 16 tons cranes. Container handling on general cargo quays.

Passenger cargo/Ro-Ro terminal at Ziolkowskiego Quay.

TANKERS: Liquid Fuel Terminal at North Port.

Location: Southern part of the Gulf of Gdansk, 54° 25′ N., 18° 43′ E. approximately. Advisable route via "ZN" Beacon, to "ZS" Beacon, then anchorage on No. 5 Beacon 54° 27′ N., 18° 53′ E.

Facilities: 1 L-shaped jetty for berthing consists of 1 main platform and 4 main dolphins, fitted with quick release hooks. The main platform is fitted with gangway tower and 7 movable handling arms for loading and discharging purposes. Only 1 mooring place available. The jetty accessible for vessels having minimum 150 ft. (about 10,000 d.w.t.) and maximum 1,000 ft. (150,000 d.w.t.) length and 49 ft. 03 in. draft.

No facilities for liquefied gases.

For towing purposes there are 3×2,500 h.p. and 2×1,650 h.p. diesel tugs available, if necessary further 1,200 h.p. tugs are at hand. All tugs equipped with fire fighting equipment.

Cargo Handling Equipment: The 7 mobile handling arms, Luceat Production, are used as follows: No. 2, 3 and 4 for discharging of crude oil, rate about 10,000 cu.m./hr. No. 1 and 5 for loading bunker oil and water, rate about 2,000 cu.m./hr. No. 6 and 7 loading liquid fuels and refined products, rate 2,000 – 2,500 cu.m./hr. Loading pressure of vessel's pumps should not exceed 14.5 kg./sq.cm. at any time.

Facilities for handling of vessel's ballast water available.

Services: Marine diesel and fuel oil available at the jetty. Storage tanks located in the neighbourhood of the terminal and connected with central pipe-line system of Poland. Laboratory for testing purposes and repairing facilities available.

STEVEDORES: As gangs for the following day must be ordered before 1100 hrs., vessel's ETA should reach the Agents relevantly in advance.

Stevedores work 24 hours per day, which is considered to be between 2300 – 2300 hrs. following day. First shift from 2300 – 0700 hrs., second shift from 0700 – 1500 hrs., third shift from 1500 – 2300 hrs.

Timber, general cargo and heavy lift operations are usually performed in two shifts only between 0700 hrs. and 2300 hrs. Sulphur, superphosphates, phosphorites, apatites, grain and other awkward dusty cargoes worked in 4 shifts of 6 hours each.

Port works Sundays, holidays and free Saturdays at premium rates. 1 in 4 Saturdays are worked (see "Gdynia").

MEDICAL: No special notice required. Full hospital facilities available.

DENSITY: Salt content: Below 0.3%

FRESH WATER: Available at hydrants, and delivery to vessels in roads.

FUEL: Heavy, intermediate and thin fuels, marine diesel oils and gas oils available ex-shore installation or lighter. 48 hours' notice required.

GANGWAY/DECK WATCHMEN: Recommended and available.

OPENING/CLOSING HATCHES: Normally carried out by stevedores, crew allowed to handle.

CERTIFICATES:

Load Line Certificate.
Cargo Gear Certificates.

CUSTOMS ALLOWANCES: For 3 days – 160 cigarettes or 30 cigars or 150 gm. tobacco per crew member. Master is allowed double ration. 1 bottle wine and 1 bottle of spirits per crew member for each 3 days. Master is allowed double ration.

IDENTIFICATION CARDS: Each crew member must be in possession of a valid Discharge Book/Sailor's Book, and will receive a separate shore permit issued by the Immigration Authorities, entitling him to go ashore within the area of Gdynia/Sopot/Gdansk.

CONSULS:

Chinese People's Republic Consulate General, Tel: 41–64–76.
German Democratic Republic Consulate General, Tel: 41–43–66.
Soviet Consulate General, Tel: 41–06–13.

At Gdynia:

Belgian Consulate, Tel: 20–39–83.
Brazilian Consulate, Tel: 21–61–31.
Swedish Consulate, Tel: 21–62–16.
Italian Vice-Consulate, Tel: 21–51–15.

At Sopot:

Finnish Consulate, Tel: 51–50–52.
Also representing other Scandinavian countries.

REPAIRS: All types of deck and engine repairs performed by specialised ship repair yard.

Floating docks: No. 1, 6,400 tons lifting capacity, dimensions 135×25.20 m. No. 2, 8,000 tons lifting capacity, dimensions 156×27.20 m. No. 3, 11,000 tons lifting capacity, dimensions 176×28.00 m. 1 floating jack of 1,700 tons capacity and 3 minor docking pontoons.

REPATRIATION: Crew changes and repatriation can be arranged by MAG – Morska Agencja Gdynia. Crewing Department Telex: 054301. Supplies all ranks of crews to any Owners on request on the spot.

AIRPORT: Gdansk Airport.

TIME: Middle European Time, which is 1 hour ahead of GMT.

HOLIDAYS: New Year's Day (January 1st); Easter Sunday (movable); Easter Monday (movable); Labour Day (May 1st); Corpus Christi (movable); National Holiday (July 22nd); All Saints' Day (November 1st); St. Barbara, only for workers loading coal, (December 4th); Christmas Day (December 25th); Boxing Day (December 26th). On Christmas Eve and New Year's Eve, work stops at 1500 hrs. In justified and approved cases, overtime on Sundays and holidays can be arranged.

TELEPHONES: Available on most general cargo quays.

POLICE/FIRE/AMBULANCE: Police: Gdansk-Nowy Port, Wladyslawa IV-3, Tel: 31–48–61; Ambulance: Gdansk-Wrzeszcs, Al. Zwyciestwa 49, Tel: 41–10–00; Fire: Gdansk-Nowy Port, Na Zaspy 57, alarm phone Tel: 41–22–22.

STORING: Baltona ship chandlers supply ships with provisions, cabin, deck, bonded stores as well as spare parts for main and auxiliary engines. "Duty Free" shops for crew convenience.

SERVICES: Collecting of oily ballast waters to Ballast-water Treatment Plant. Cleaning of holds, bilges and ship's tanks.

AUTHORITY: The Port of Gdansk Authority, ul. Zamknieta 18, 80-955 Gdansk Nowy Port. *Tel:* 439-101. *Telex:* 0512324. *Cables:* Geport Gdansk. *Contact:* Janusz Janiszewski, Manager.

AGENT: Morska Agencja, Harbour Office Gdansk, Oliwska 33a – Gdansk-Nowy Port. Tel: 430–921 (day and night service). Telex: 051–2641.

GDYNIA: 54.32 N. 18.34 E. (See Plan Book)

ICE: On average, during most of the Winter periods both port and the roads are ice-free. Only prolonged and severe frosts may result in ice cover formation in basins and in the roads outside. Winds of gale force may shift some drifting ice floes from other parts of the bay and render navigation in the roadstead difficult. In such cases the approach channel and the port basins are kept free of ice and unobstructed to navigation by icebreakers of the Polish Ship Salvage Company and powerful tugs of the Port Authority. The cost of icebreaking is borne by the Port Authority. These phenomena, however, are rather rare, since Winters are usually mild in those areas.

PORT LIMITS: A vessel is an "arrived ship" and laytime commences from time of ship's entry into the roads.
DOCUMENTS:
11 copies Cargo Manifest.
2 copies Bills of Lading.
Discharge Books to be collected for presentation.
Ship's Register.
Ship's Articles/Crew List.
Maritime Declaration of Health.
Derat Certificate.
Sanitary Certificates covering food cargoes and/or of animal origin, destined for discharge here.
Specification of Dangerous Cargo (even if in transit).
2 Stowage Plans.
Load Line Certificate.
Cargo Gear Certificates.

PILOTAGE: Compulsory. Boarding in Gdynia Roads. Gdynia Pilot station available on VHF Channel 12. Traffic around the clock.
ANCHORAGES: Gydnia Roads at Buoy GD, up to 200 m. – 500 m. off port entrance. No tides.
RESTRICTIONS: Depth in main entrance 12.3 m.
MAX. SIZE: No limit on length, max. draft 39 ft. 04 in. at Hel Quay, also see "Berthing".

HEALTH: Maritime Declaration of Health to be presented on arrival. In the event of suspected disease the vessel should cable "Quarantine Gdynia", "Radio Medical Gdynia" or via Agents.
RADIO: Message should be sent via Gdynia Radio. Port Radar Service acting with the pilot station, can be contacted on VHF Channel 12, Gdynia. Contact Agent VHF Channel 7.
TUGS: 13 tugs available. Join vessel in Gdynia Roads. Vessel's lines must be used.

TELEPHONES: Available on most general cargo quays.

Placing of telephones on board is according to current costs per 24 hours.

GENERAL: Cargo is handled around the clock in 3 shifts of 8 hours each. Work on 3 Saturdays per month is paid by addition of 100 per cent. Sunday and holiday interruptions last from 2300 hrs. on Saturdays or days before holidays and terminate at 2300 hrs. on Sundays or holidays.

Transhipment of cargo at port rates. Extra fast despatch can be arranged at additional charges.

SERVICES: Hold cleaning, container and watchmen provided by "Port Service", Celna Street 5, extension telephone 50-34, 50-36; bunkering provided by "Port Service", extension telephone 50-42. Hold cleaning and container washing provided by Port of Gdynia Authority, Rotterdamska 9, Gdynia.

BANKS: Handlowy S.A., Branch Office, 81–370 Gdynia, Skwer Kosciuszki 14, Tel: 20-63-83.

DEVELOPMENTS:

1. Further development of the Baltic Container Terminal.

Extending of the Ro-Ro and Lo-Lo quays to the total length of 1,080 m. including next fixed ramp Ro-Ro berth at Hel II Quay.

Expanding of the container storage areas.

Building of the container cleaning station, vast parking areas and M+R workship for containers and road trucks.

After the completion of the first stage of construction of the Baltic Container Terminal the handling capacity of the Terminal will go up to 1.5 million tons/170,000 TEU per year and will be able to accommodate various types of container vessels up to 30,000 d.w.t. capacity.

The second and final stage of construction works will increase the handling capacity of the Baltic Container Terminal to 2 – 2.5 million tons/250 – 300,000 TEU per year.

2. Completion of Ro-Ro berth at Danish Quay as part of the Container Terminal at Polish Quay will increase the total storage area from 6 to 10 ha. The final handling capacity is to reach 550,000 tons per year.

3. Completion of modernisation of the last section of the Polish Quay – extension of the quay and equipping it with new cranes.

4. Total reconstruction and modernisation of general cargo warehouses.

5. Converting bulk cargo quays in Basin No. 3 into highly specialised general cargo berths.

Jugoslawianskie	100	6.2	General cargo	1×2-ton crane
Swinoujscie:				
Portowcow	215	11.43	Bulk cargo	2×7-ton cranes, 2×10-ton cranes, open storage space 684 sq.m., cargo bins, 3,580 sq.m.
Gornikow	260	12.80	Coal	4×10-ton cranes

Suitable for ships of 35,000 to 65,000 d.w.t. Special coal handling installation with loading capacity up to 30,000 tons per 24 hours. Open fully mechanised coal storage of over 440,000 tons capacity with wide range rubber-belt system for fast transport of coal to and from stores. Continuous electronic weighing system. Open storage space – 81,120 sq.m.

Wladyslawa IV	190	9.75	Lay-by berth	2×16-ton cranes
Chemikow	255	12.8	Bulk fertiliser	Gantry with arrangement
	+100	5.5	For barges	for loading and unloading.
Hutnikow	329	12.8	For lighterage	
	+100	5.5	For barges	

In Swinoujscie there is also a defreezing plant for railway cars and railcar dumper.

BULK HANDLING FACILITIES: See "Berthing".

STEVEDORES: 24 hours ETA required to arrange gangs.

1 in 4 Saturdays are worked.

e.g.: January 26th; February 23rd; March 9th and 30th; April 27th; May 25th; June 29th; July 27th; August 31st; September 28th; October 26th; November 9th and 30th; December 28th, whereas all other Saturdays in 1985 have been declared days free of work at the ports in question.

MEDICAL: Doctors and hospital facilities available.

TANKERS: All empty tankers have to give 24 hours ETA advice whether they are gasfree and name of last cargo carried. No residue discharge facilities.

DENSITY: 1000.

FRESH WATER: Fresh water supplied from hydrants on quays or by water tanker. The minimum charge is for 5 tons of water. For supply of water on Sundays and holidays a surcharge of 100% is levied. Cost per ton – via hydrant $1.41, via barge $3.75.

FUEL: All grades of Shell fuel oil and Castrol marine lubricants.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Normally opened by crew.

CUSTOMS ALLOWANCES: Each man – 160 cigarettes and 1 bottle of spirit. Master allowed double.

CARGO GEAR: No additional requirements; all gear supplied by stevedores except rain tents.

IDENTIFICATION CARDS: Each crew member must be in possession of a valid Discharge Book and will receive a separate shore permit issued by the Immigration Authorities entitling him to go ashore within the city area.

CONSULS: Swedish Consulate (represents Denmark and Norway), Soviet Union Consulate, Czechoslovak Consulate, German D.R. Consulate and Cuban Consulate.

REPAIRS: All types of deck and engine repairs. 2 ship repair yards.

Szczecin Ship Repair Yard, 13 Ludowa Street, 71-700 Szczecin. Tel: 22-44-51. Telex: 0422229 Storem Pl., Sz. Cables: Storem, Szczecin.

TELEPHONES: Telephone exchange of the Port Authority Szczecin 430-31/Trunk service connections with ships in the port. Port telephone numbers:

Port Fire Bridge – 370-12.
Port Office of the Civil Militia – 880-68.
Port Officer on duty – 889-44.
Port District Medical Dispensary – 428-21.

SERVICES: "Shipservice" – Enterprise for Maritime Services, 70-607 Szczecin, Przejazd 1 Street, Cables: Shipservices Szczecin Tel: 360-11, 385-47. Telex: 0422282 Ship Pl.

Marine Radio Service: "MORS" Morska Obsluga Radiowa Statkow. All services to any radar, radio or navigation equipment – orders via Morska Agencja Szczecin.

Compass adjusting available. Chart corrections possible. British Admiralty and Polish charts available.

SHORE LEAVE: Allowed.

STORING: See "Prelims", page viii.

1. Vessel can be stored by barge/motorboat/or truck.

3. Trucks can proceed alongside at the berth. Vessel can store from barge/trucks during loading/discharging operation using her derricks or port crane.

5. Customs Office must be informed about storing.

6. Local riggers (strictly port's workers) can be employed to assist with storing.

SHIP SUPPLY SERVICE: Supplied by Agent.

DEVELOPMENTS: The Szczecin port has been in the main developed as a general cargo port. A main investment effort has been directed toward an establishment of a modern general cargo potential. New berths and terminals working on the "Roll-on/Roll-off" and "Lift-on/Lift-off" system will be built. The investment will comprise: berths, storage space, cranes, trucks and the other equipment for transhipment of conventional and containerised general cargo.

The port of Swinoujscie is still being built up as a bulk cargo harbour, capable of serving large vessels. Simultaneously the port will be developing ferry services. A modern ferry terminal built up in 1972-1973 is under further development and a target project stipulates 4 berths and 10 arrivals and departures per day.

AUTHORITY: Port of Szczecin – Swinoujscie Authority, 7 Bytomska Street, 70-603 Szczecin, Poland. *Tel:* 430-31 (for further connections). *Telex:* 04222108 Zp Pl. *Cables:* Zetpees Szczecin. *Contact:* Mr. Jurand Kobylarz, Operational Director.

Harbour Master's Office of the Port of Swinoujscie supervises the traffic of ships and the observance of harbour rules in the Port of Swinoujscie.

AGENT: Morska Agencja w Szczecin, 4 Batorego Square P.O.Box 70-207, Szczecin. Tel: 465-63, 45235, Telex: 0422147, 0422148, 0422149.

Harbour Office at Szczecin – day and night service Tel: 39113, 89742. Telex: 0422235.

Harbour Office at Swinoujscie – Tel: 50-21. Telex: 0422330.

NOTES

Please also advise Shipping Guides Ltd.

Portugal

AVEIRO: 40.39 N. 08.45 W. (See Plan Book)

PORT LIMITS: A vessel is considered "arrived" when she is 3 miles from the piers.

DOCUMENTS:
5 Crew Lists.
4 Lists of Passengers Disembarked.
2 Lists of Passengers in Transit.
5 Cargo Manifests.
1 Manifest of Cargo in Transit.
1 Provision List and Spares.
2 Health Certificates.
2 Dangerous Cargo Lists (when applied).
2 Lists of Articles held by the Crew.

PILOTAGE: Send ETA to Agent by cable, 24 hours before arrival. Entrance depending on sea conditions and ship's draft.

Pilots can be contacted by VHF Channel 16 between 0800 – 1200 hrs. and 1400 – 1800 hrs. Tel: 39429. Telex: 37338 Inppda.

Pilot boat displays white flag, surrounded by narrow blue stripe, with black "P" in the centre. Pilot to be taken on board about 1 mile West of harbour entrance; vessel awaiting Pilot can anchor there, if weather permits.

Pilot station, located close to Aveiro lighthouse, hoists black cylinder on signal mast when entry not possible due to bad weather or any abnormal cause. Pilot boat has radar that can assist vessels during approach to harbour entrance.

ANCHORAGES: Anchor West of North Pier, at a distance of 1.5 or 2.0 miles.

RESTRICTIONS: Subject tide and bar conditions. Entering and sailing only during daylight.

MAX. SIZE: Max. draft 16 ft. to 18 ft. dependent on bar conditions. Max. length 90 m. to 100 m. depending on bar conditions.

HEALTH: Free Pratique automatic for vessels coming from other Portuguese ports. Vessels coming from other countries; Health Certificate must be delivered to Agent.

RADIO: Call Aveiro Pilots Radio on VHF. Radio station is Lisboa Radio.

TUGS: Two tugs, one of 240 h.p. and one of 500 h.p.

An additional tug of about 500 h.p. will be available in the near future.

BERTHING: A quay with 1,300 ft. length for handling general cargo; 10 gangways in concrete for ocean fishing boats; 6 electrical cranes of 3.6 and 12 tons and 15 mobile cranes for cargo-handling – 2×3 tons, 6×7 tons, 5×16 tons, 1×60 tons at 6 m., 1×100 tons at 7.32 m., 70 tons at 10 m. and 25 tons at 22 m.

SPECIALISED CARGO HANDLING FACILITIES: A terminal for handling wine, chemicals and turpentine; another for handling liquid combustibles and chemicals.

STEVEDORES: Advise Agent 24 hours before vessel's arrival.

MEDICAL: Hospital and clinics in town. Advance notice not required. Required vaccination certificate, and when ship comes from affected regions, also yellow fever certificate.

TANKERS: Private quay of GALP used by small-sized tankers. Two quays of JAPA for tankers, wine, liquid combustibles and chemicals.

DENSITY: About 1028.

FRESH WATER: Supplied by barges or tank-car or water net system. 20 t.p.h.

FUEL: Only diesel available. Smaller quantities supplied from trucks. Otherwise, from SACOR's private quay (pipe-line).

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Work usually done by crew.

CUSTOMS ALLOWANCES: 125 grams tobacco, and 1 bottle wine/spirits for each man.

IDENTIFICATION CARDS: Crew members going ashore will need a special card issued by Customs Officer and Maritime Authority. Ship's Agent takes these cards aboard, where they are completed in accordance with crew list. See "Lisbon".

CONSULS: Nearest Oporto, 60 km.

REPAIRS: All repairs can be carried out.

DRY DOCKS: 1 Drydock (100 m.×18 m.) for vessels up to 3,000 d.w.t. and 1 floating dock for vessels up to 1,200 d.w.t.

REPATRIATION: No difficulties for crew repatriation.

AIRPORT: Pedras Rubras (Oporto Airport) at about 70 km., with 2 flights per day to Lisbon and 1 flight per week to London.

Lisbon Airport (250 km.) is served by regular airlines covering all the world.

TIME: From October to April – GMT. From April to October – GMT plus 1 hour.

HOLIDAYS: New Year's Day; Liberty's Day (25th April); Portugal's Day (10th June); Workers' Day (1st May); 12th May (Municipal Holiday); August 15th, (Religious Holiday); Corpus Christi (movable); Proclamation of the Republic (5th Oct.); All Saint's Day (1st Nov.); Independence of Portugal (1st Dec.); Immaculate Conception (8th Dec.); Christmas Day. No work allowed on Christmas Day and New Year's Day.

POLICE/FIRE/AMBULANCE: Police 22022; Ambulance 115; Fire 22333.

TELEPHONES: None available on board.

SHORE LEAVE: Crew allowed ashore.

DELAYS: As a tidal port, arrivals and sailings are subject to tides. Delays may occur owing to bad weather, especially during the Winter months.

DEVELOPMENTS: Dredging harbour entrance.

AUTHORITY: Junta Autonoma do Porto de Aveiro, Avenida Dr. Lourenco Peixinho 110-2, Aveiro, Portugal. *Tel:* 24091/92. *Telex:* 37379 Japa P. *Contact:* Joao De Oliveira Barrosa, Managing Director.

AGENT: A. J. Goncalves de Moraes, Lda, 49 Av. Dr. Lourenco Peixinho, 3800 Aveiro. Tel. 24550. Telex 37590. Cables: Amoras. After hours Tel. 24666. Shipping and Forwarding Agents, Chartering and Brokers, Insurance Agents, Stevedoring.

FIGUEIRA DA FOZ: 40.09 N. 08.52 W. (See Plan Book)

DOCUMENTS:
Health Certificate (Pilot supplies form).
5 Crew Lists.
4 Lists of Passengers Disembarking.
2 Lists of Passengers in Transit.
5 Cargo Manifests.
1 Manifest of Cargo in Transit.
Provision and Spares List.
2 copies each Bill of Lading.

PILOTAGE: Compulsory. Send ETA to Agent by cable 24 hours before arrival. Convenient to try arrive 2 hours before high tide. Call Figueira Pilots on VHF Channel 16, from 0900 – 1700 hrs. Alternatively call Figueira-Pesca frequency 2182 kHz and listen on frequency 1834 kHz. Await Pilot 0.5 miles from the piers.

ANCHORAGES: South of N.W. Azimuth of North Pier, at a distance of more than 0.5 miles.

RESTRICTIONS: No services during night.

MAX. SIZE: Max. draft 14 ft. Max. length 90 m.

HEALTH: Free Pratique authorised for vessels coming from other Portugese ports. For vessels coming from other countries, Health Declaration supplied by the Pilot must be filled in.

RADIO: Figueira – Pesca listens on 2182 kHz permanently, except between 1900 hrs. (on Saturday) till 0100 hrs. (on Monday).

TUGS: None available.

BERTHING: The port is in the mouth of the Mondego River. The anchorage is in sand and outside the harbour.

Concrete Quay: Length 360 m. Depth 13 ft. – 14 ft.
Tidal Harbour: Water area 6 ha. Length of quayage 600 m.
Depths on Bar: MHWST 3.8 m. MHWNT 3.00 m.
There is about 320 m. of quayage for small ships and fishing craft.

CRANES:
1×6 tons at 24 m. (electric)
  12 tons at 20 m.
3×3 tons at 24 m. (electric)
  6 tons at 20 m.
1×1.5 tons at 24 m. (electric)
  3 tons at 16 m.
1×1.8 tons at 12 m. (mobile)
2×2.3 tons at 16 m. (mobile)
  16 tons at 3 m.
10 × fork lift trucks.

STEVEDORES: Advise Agent 24 hours before arrival.

MEDICAL: No prior advice is necessary. All medical facilities available.

DENSITY: About 1028.

FRESH WATER: Each quay has its own installations.

FUEL: Only diesel available.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Work usually done by crew.

CUSTOMS ALLOWANCES: No limit, but must be declared.

IDENTIFICATION CARDS: See "Lisbon".

CONSULS: France, Great Britain and Spain .

REPAIRS: There are two shipyards and repair facilities, also a slipway for ships up to 4,000 tons.

REPATRIATION: No difficulty in crew repatriation.

TIME: From last Sunday in September till last Sunday in March GMT and the rest of the year GMT plus 1 hour.

HOLIDAYS: New Year's Day; Good Friday; 25th April; 1st May; Corpus Christi (movable); 10th June; 14th June; 24th June; 15th August; 5th October; All Saint's Day (1st November); 1st December; 8th December; 24th December; 25th December.

POLICE/FIRE/AMBULANCE: Police 22022; Ambulance 22122; Fire 22122.

SHORE LEAVE: Crew allowed ashore.

DELAYS: As a tidal port, arrivals and sailings subject to tides. Delays may occur owing to bad weather, especially during Winter months.

DEVELOPMENTS: Dredging in progress.

AUTHORITY: Junta Autonoma do Porto da Figueira da Foz, Rua Engenheiro Silva 98, 3080 Figueira da Foz, Portugal. *Tel:* 22365, 22366. *Telex:* 52339 Porfig P. *Contact:* Joao de Oliveira Barrosa, Managing Director.

AGENT: A. J. Goncalves de Moraes, Lda., 262-Rua da Republica, 3080 Figueira da Foz – Portugal. Tel: 22584. Telex: 53017. Cables: Amoras. After office hours: 25016 and 24666 ("Aveiro" network). Shipping and Forwarding Agents, Chartering and Brokers, Insurance Agents, Stevedoring.

LEIXOES and OPORTO (Douro River): (See Plan Book)

Leixoes: 41.11 N. 08.43 W. Oporto: 41.09 N. 08.37 W.

DOCUMENTS:
Health Certificate.
5 Crew Lists.
Provision List — ship and individual.
Tobacco Declaration and Entrance Forms supplied by Agent on arrival.
5 Manifests and 2 copies of each B/L concerning cargo to be discharged.
1 Transit Manifest if cargo in transit exists.

PILOTAGE: Pilotage is compulsory for entry and leaving, with the exception of coastal vessels and national flag craft up to 500 g.r.t., coastal and local fishing vessels and pleasure craft. Available day and night in Leixoes, but in Oporto only between sunrise and sunset, and then dependent upon sea conditions. Vessels must communicate their ETA a minimum of 12 hours ahead and confirm again 4 hours in advance. Departures must be communicated 2 hours ahead between 0800 and 1800 hrs. This must be done via the Radar Station.

Pilot boat recognition:

By day – black hull, with the letter "P" painted in white. Also a flag may be hoisted which is white, lined in blue, and with a black letter "P" in the centre.

By night – a white light at the top of the mast forward and lower down a red light.

Call-up signals by ship's siren:

To call Pilot – Letter "G" in morse, or Letter "O".

To call pilot launch – Letter "O" in morse.

APPROACHES: *Leixoes:*

By day: Vessels coming from the North should take due heed of the Orca Rock situated 1,300 m. beyond the Northern Quay on the parallel 41° 10′ 37″ N. and should pass to the South of the breakwater light.

By night: Vessels approaching the port should be guided by the lights of the breakwater and then by the lights of the lighthouse, positioned at the heads of the North and South Moles of the Port, placing the Leca lighthouse in the middle of them.

Entrance Channel: The width of the port entrance between the heads of the breakwaters is 220 m.; in the foreport the channel widens to 500 m., from the entrance for 240 m. and is reduced again towards the entrance of Dock No. 1 to 113 m. By dredging, the depths are maintained at 10 m. The width of the entrance to Dock No. 2 is 58 m.

ANCHORAGES: *Douro River:*

Outside the port: Vessels may await entry, anchoring to the North of the alignment of the bar entrance lights of the Douro River in an area defined by the alignments of the Leca lighthouse, and the N.W. side of the Leixoes mole. In this area the depths vary between 16 m. and 21 m.

The anchorage is not safe in certain weather conditions.

Inside the port: Vessels can anchor with 2 anchors at the bow and 1 small anchor at the stern, and even by passing lines ashore at the following points: Alfandega, Cabrea, Pedras, Bicalho, Gas, Lugan, Carbonifera, Gaia and Monchique.

Leixoes:

Outside the port: Vessels can await entry, anchoring outside a radius of half a mile from the head of the breakwater to the West, and with an Eastern limit as the alignment of the Leca lighthouse with the breakwater light itself.

Anchorage is not safe during bad weather.

Inside the port: Vessels can anchor in the foreport.

RESTRICTIONS: *Douro:* Subject tide and bar conditions.

The main alignments of the bar, are as follows:

1. Tres Orelhas (a pillar with 3 battlements on the upper part, located at Sobreiras) or Marca Nova do Mato, on the Anjo (an archway on the Tower of S. Miguel da Cantareira);
2. Tres Orelhas by Marca Nova da Cantareira (light on iron column).

Marking of navigation channel – The channel is defined by 7 buoys.

MAX. SIZE: *Douro River:* Permitted draft on entering the port, variable with the state at the bar is from 18 to 19 ft. (HWST) and 16 to 17 ft. (HWNT).

The height of the tide of the port is: Average during Spring tides 2.30 m; average during Neap tides 1.80 m.

At times and particularly during the months of January, February and December, normal movement of vessels is affected by the rough sea which in conjunction with the river current causes frequent variation, both in the width and in the depth of the access channel, and necessitates annual dredging in order to guarantee conditions of navigability.

Leixoes: Cargo vessels 31 ft. Also see "Tankers".

HEALTH: Free Pratique authorised for vessels coming from other Portuguese Ports. For vessels coming from other countries Health Declaration supplied by the Pilot must be filled in, and delivered to the Agent. Radio Pratique also available.

BERTHING: *Douro River:* Gaia Quay: Length 280 m. Depth 18 ft. Estiva Quay: Length 80 m. Depth 11 ft. – 17 ft. Porto A Quay and Alfandega Quay are for small craft only.

In addition there are private facilities of Secil, Leiria Cement Company and Mobil.

Outer Harbour: The depth of water at the entrance and in the centre of the outer harbour is 10.00 m. at MLWST; Maximum rise of tides 3.99 m.; Minimum rise of tides 0.07 m.; Total water area 117.36 ha.; Breadth of entrance (harbour) 220.05 m.; Breadth of entrance (Dock No. 1) 113.00 m.

Dock No. 1: Length of North Quay 487 m.; South Quay 551 m.; Maximum draft 29 ft.

Dock No. 2: Length of North Quay 670 m. and South Quay 588 m.; Maximum draft 30 ft.

South Mole: Length of Quay 370 m.; Depth 20 ft.

Ro/Ro Terminal: Quay with a usable length of 145 m. and max. depth of water of 18 ft.

CONTAINER HANDLING FACILITIES: *South Side:* 115 m. of usable quays with a depth ranging from 12 ft. to 31 ft. The total open storage area for containers is 5.5 hectares. It is equipped with a jib crane with a 31.8 ton capacity and a reach of 23.02 m., 4 Karricons for container movement with a capacity of 30.48 tons and 8.44 m. lift, 2 side loaders with a capacity of 30 tons and 5.27 m. lift and also possibly front loading stackers with a max. capacity of 15 tons and a max. lift of 4.41 m.

North Side: 360 m. of usable quay with a depth of 30 ft. Its usable open area for containers is 1.55 hectares. It is equipped with two quay jib cranes with 35 ton capacity and 30.1 m. reach and 5 transtainers with a capacity of 35 tons and various reaches. It will have available 10 tractors/semi-trailers for container transport with a capacity of 50 tons.

CRANES: *Leixoes:* Dock No. 1: 1×94 tons on the North side and 8×3 tons and 2×5 tons on the South side.

Dock No. 2: 2×15 tons and 11×5 tons on the North side, and 20×5 tons on the South side.

South Mole: 6×5 tons.

Douro: Gaia Quay: 2×1.5 tons, 1×3 tons and 1×5 tons.

Porto A: 3×2 tons and 2×3 tons.

Customs Quay: 1×1.5 tons, 1×2 tons, 1×7 tons.

BRIDGES: Bridge at Leixoes between Dock 1 and Dock 2 opening regularly.

STEVEDORES: Ordered by Agents according to berth and cargo.

TUGS: Normally join the vessel.

At Leixoes: 6 tugs, 875–2,800 h.p. In the outer harbour up to 700 g.r.t., no tug required; from 700 up to 1,800 g.r.t. 1 tug compulsory. Over 1,800 g.r.t., 2 or more tugs required.

At Douro River: As a rule service necessary on arrival/sailings. Thus they join the vessel after passing the bar.

RADIO: *Leixoes Naval Radio Station:* Operated by the Leixoes Port Captaincy, working with permanent listening-watch on 2182 kHz for aid to navigation; receives and listens on frequencies 2182, 2097, 2566, 2657, 4474.5 and 7510 kHz. Transmits weather report and Notices to Mariners by radiotelephony for the coastal strip for a distance of 50 miles to seaward of the coast of Portugal at the times 0735 Z, 1005 Z, 1935 Z, 2205 Z, on frequency 2657 kHz.

It listens out permanently on VHF Channel 16 (156.80 MHz) for aid to navigation and has working Channels 11, 13, 19, 39 and 60.

RADAR/VHF: *Leixoes Radar Station:* Operated by the Administration of the Ports of the Douro and Leixoes, it is equipped with radar for control and support to navigation, and has a range of 18 miles. It also has VHF equipment, permanently listening out, working on the 156 – 175 MHz band, it being possible for any vessel, up to a distance of 50 miles to contact this station for identification, port matters and meteorological information. The listening Channels are 11, 12, 13, 16, 67 and 68.

FRESH WATER: Available alongside or by barge.

FUEL: Available from Shell, Petrogal, Mobil, Sonap and B.P.

MEDICAL: Masters to advise by radio prior to arrival if medical attendance is required on board. Hospital facilities available.

TANKERS: *Terminal Operator:* Petroleos de Portugal E.P. (Petrogal).

Pier A: Max. d.w.t. 120,000 tons. Depth of water: 12.0 m. Max. draft 43 ft. (with dredging). Max. draft in Octber 1984 – 43 ft. 06 in. At times max. draft is 37 ft. – 42 ft. Max. length: 217 m. Daylight berthing only.

Products Handled	Capacity t.p.h.	Hoses (in.)
Crude Oil	10,000 disch/2,000 load	4×12
Gas Oil	1,500 load	1×12
Fuel Oil	2,000 load	1×12, 1×10
Naptha	1,200 load	1×10

Pier B: Max. d.w.t. 27,000 tons. Max. draft: 29 ft. Max. length: 200 m. Berthing at night possible. Depth alongside 9.0 m. Depth in approaches 7.7 m.

Products Handled	Capacity t.p.h.	Hoses (in.)
Crude Oil	4,000 load	2×12
Gas Oil	1,500 load	1×10

LISBON: 38.30 N. 09.06 W. (See Plan Book)

PORT LIMITS: A vessel is considered to be an "arrived vessel" when, after entering the Tagus Estuary, she has left behind the alignment between the Torre of S. Juliao and the Torre of Bugio.

DOCUMENTS:

Health Certificate.

6 Crew Lists.

10 Passenger Lists.

2 Lists of Articles held by the crew: cameras, binoculars, radios, cigarettes, spirits, etc.

2 Stores Lists.

All to be signed by ship's Master.

Certificates for vessels up to 500 tons: – tonnage register, loading and navigation certificates.

For vessels over 500 tons: – tonnage register; load line; radio; safety equipment and navigation certificates.

Cargo Documents:

10 Manifests.

3 sets of Bills of Lading.

For cargo in transit: 2 Manifests.

PILOTAGE: Compulsory on the East side of the Tower of Belém. Pilot boat anchored outside the river at Cascais Bay, but Pilot can also board vessel inside the river at Belém Station.

Pilots are to be requested not less than 4 hours prior to the ship's arrival, by a radiogram addressed to "Pilotos Lisboa" stating ship's name, estimated time of arrival at the pilotage area (ETA), the station where ship wishes to take a Pilot, vessel's draft and means for the Pilot's embarkation.

Any vessel failing to correct her ETA may have to wait at Cascais before a Pilot is available to board.

Pilots can be contacted by VHF Channels 6, 13, 16 (permanent watch) and 73, and by radio-telephone (watch) 2182 kHz replying on 2341 kHz.

ANCHORAGES: Deep water anchorage limits:

(a)	38° 40.53′ N.	9° 23.00′ W.
(b)	38° 40.53′ N.	9° 24.70′ W.
(c)	38° 39.75′ N.	9° 24.70′ W.
(d)	38° 39.75′ N.	9° 23.00′ W.

MAX. SIZE: See "Berthing".

HEALTH: Ordinary visit made at central area with vessel anchored, from 0800 hrs. to 1900 hrs. Master may ask for Free Pratique to get ship moored immediately on arrival. For this, necessary to cable the Health Authorities, addressing cable as follows: Sanidade Maritima de Lisboa, Rocha do Conde de Obidos, maximum 15 hours and minimum 4 hours prior to the ship's arrival. Text of cable: "ship's name, nationality, code (MIBDU), day and time of arrival" signed by the Master.

RADIO: ETA to be advised by Master, to Agent, 24 and 12 hours before ship's arrival.

VHF: Channels 1–73 used in the port. Pilots on Channel 73, Port Authority on Channel 29, Maritime Police on Channel 39. Ship-to-Ship on Channels 01, 04, 06, 08, 11, 20, 63, 81 and 84. Tugs on Channels 09, 10 and 69.

TUGS: 6×420 h.p. – 2,500 h.p.

**Berth has Dukes of Alba which permit vessels of up to 25,000 d.w.t. to berth.

PORT EQUIPMENT/FACILITIES:

76 electric cranes on rails, capacity 1.5 tons – 12 tons, outreach 13.5 m. – 26 m.

2 Coles mobile cranes with capacity 15 tons and 30 tons.

3 container cranes with 30 tons, 30 tons and 33 tons capacity.

3 fork stackers with 2 tons, 2.75 tons and 12 tons capacity.

5 tractors, 5 tons – 30 tons capacity.

28 trucks, 1 ton – 12 tons capacity.

5 transtainers for 20 ft., 35 ft. and 40 ft. containers.

14 stackers, 12 tons – 40 tons capacity.

1 heavy lift crane, capacity 488 tons.

2 floating cranes, capacity up to 600 tons.

Tank Cleaning Station: Located at Porto Brandao; belonging to LISNAVE. It has 2 Dukes of Alba 120 m. apart, a service platform with 5 mooring points for vessels up to 60,000 d.w.t. and depth of 12 m.

The station occupies an approximate area of 60,000 sq.m. and has a storage capacity of 20,000 tons of oil and residue.

Cold Stores: Apart from the warehouses of the fish dock, there are those of FRISSUL – Entrepostos Frigorificos Lda. (Olivais) with a capacity of 15,000 tons, and Sociedad Continental de Alimentacao (Jardim do Tabaco) with 2,300 sq.m. and Comissao Reguladora do Comercio do Bacalhau (Alcantara) with 9,500 tons.

SPECIALISED CARGO HANDLING FACILITIES: *Container Terminal* at Santa Apolonia, length 870 m., equipped with 3 container cranes of 30/33 tons each, 14 stackers, 45 semi-trailers, 5 transtainers, tractors, etc., depth 8 m. – 13 m.

Roll-on/Roll-off Terminal at Alcantara for ferry boats and cargo. Ramp capacity 40 tons.

Grain Elevators and Silos at Poco do Bispo operated by EPAC. Unloading by elevator up to 400 t.p.h. Also see "Shipmaster's Report" and "Developments".

Cement Storage Terminal: This is at Poco do Bispo and is operated by Secil.

STEVEDORES: Ordered by Agents according berth and cargo.

MEDICAL: Masters to advise by radio prior arrival if medical attendance required on board. Hospital facilities available.

TANKERS: Shell and Petrogal berths exposed to 9 knots HWST current. Essential to use good new mooring lines.

Cabo Ruivo Terminal: This is operated, on a concession basis, by Soponata and has depths of 11 m., capable of mooring tankers up to 65,000 d.w.t. alongside its jetty.

Fuel Oil Facilities: The port of Lisbon fuel oil installations belong to private companies and are concentrated along both banks of the Tagus at the following points:

Sacavem and Cabo Ruivo (with oil refinery facilities), Montijo, Barreiro, Santa Iria, Porto Brandao, Porto dos Buchos.

Also see "Berthing".

DENSITY: 1025.

FRESH WATER: Usually supplied by barge unless vessel lying alongside a pier where water provided.

FUEL: Shell, Esso, Petrogal. These companies can supply through their own barges or alongside their private bunkering stations on pier.

IDENTIFICATION CARDS: Crew members going ashore will need a special yellow card issued by Agent and stamped with police visa. The cards are supplied by Agent to be completed on board in accordance with crew list particulars. With these shore passes crew members may circulate between Lisbon and Cascais, and Lisbon and Sintra.

Master and/or Owners will be fined Esc. $1,000 for any crew member found ashore without that card. A double fine will be imposed in case of recurrence.

Similar cards, but white, are required for passengers in transit.

CONSULS: Most countries are represented in Lisbon.

REPAIRS: There are several repair workshops. The biggest is Lisnave Shipyard with several docks, one for vessels up to 300,000 tons and a new dock where vessels up to 1,000,000 tons can be repaired.

AIRPORT: Within the Lisbon area. Regular International services.

REPATRIATION: No difficulties for crew changes or repatriation.

POLICE/AMBULANCE/FIRE: Maritime Police 607732; Ambulance 115; Fire 322222.

TIME: End September-end March – GMT. End March-end September – GMT plus 1 hour.

HOLIDAYS: 1st January; 19th February; 5th April; 25th April; 1st May; 6th June; 10th and 15th June; 15th August; 5th October; 1st November; 1st December; 8th December; 25th December.

DEVELOPMENTS: A large grain silo is under construction at Trafaria. (Completion expected 1984). It is owned by EPAC (Empresa Publica de Abastecimento de Cereais), and occupies an area of 9 hectares and has a capacity of 130,000 tons. It consists of a pier 254 m. × 20 m. and water depths of 14 m. to 17 m. and 4 ship unloaders with a capacity of 1,000 t.p.h. each. Container terminal and coal transhipment terminal also planned.

SHIPMASTER'S REPORT: July 1980.

Grain berths: All elevators and silos are now only used for discharging barges and handling small vessels in the coastal trade. All ocean-going bulk carriers are handled in deep water at the inner or working anchorage situated between 2.2 and 3.5 miles East of the overhead suspension bridge.

All vessels are discharged by means of a floating crane with a grab into barges, whether the vessel has its own cargo gear or not. The capacity of the grabs vary between 2 tons and 6 tons. The capacity of the barges range from 200 tons to 7,000 tons lighter ships.

Rate of Discharge: With 1 average floating crane 2,000 tons a day. With the maximum of 2 floating cranes, of which one is a big crane, an average of 5,500 tons per day is obtainable.

Anchorage: Holding ground is good, although care must be taken when floating cranes and many lighters are alongside.

Draft Restrictions: The draft depends on HW on the bar in the approaches to Lisbon.

Waiting Area: In case no berth is available at the working anchorage, vessels have to wait at an anchorage between 2 miles and 3 miles West of the suspension bridge along the North or South shore of the river.

A deep draft berth with an elevator is under construction on the South shore close to the suspension bridge.

AUTHORITY: Port of Lisbon Authority, Cais do Sodre, 1293 Lisbon Codex, Portugal. *Tel:* 362321, 370727. *Telex:* 18529 P and 18529 S Porli. *Contact:* Comm. F. Rodrigues Catanas, Deputy Manager.

AGENT: A. J. Goncalves de Moraes, Lda., 22 Rua do Alecrim – P.O.Box 2772 – 1119 Lisboa Codex. Tel. 364943 – 366671. Telex: 12296A, B & C. Cables: Amoras. After office hours Tel: 2750594. Shipping and Forwarding Agents, Chartering and Brokers, Insurance Agents, Stevedoring.

SETUBAL: 38.30 N. 08.55 W. (See Plan Book)

DOCUMENTS:

5 Crew Lists.
5 Passenger Lists.
Personal belongings of the Crew (portable radio, binoculars, cameras, etc).
Store List.
Health Declaration.

For cargo: Dangerous Cargo List. Cargo Manifest. Transit Cargo Manifest (if any). Copy of Bills of Lading.

PILOTAGE: The pilotage service is supplied exclusively by the Departamento de Setubal do Instituto Nacional de Pilotagem dos Portos which runs a permanent service.

To assure prompt attention requests for Pilots must be made in the following manner:

Entries: To send at least 6 hours beforehand a radiotelegram or a radiotelephone message preferably on S.S.B./AM to Pilotos de Setubal giving the name of the ship, ETA and draft.

This information must be confirmed on VHF or MF two hours before the ship arrives at the bar.

Departures and movement in the River: Between 0800 hrs. and 1800 hrs. on weekdays and 0800 hrs. and 1300 hrs. on Saturdays, Sundays and holidays to communicate by telephone or on VHF with the "Estacao de Pilotos de Setubal" at least one hour beforehand, giving the name of the ship, the time and place where the Pilot is required and the service needed.

Only in cases of emergency will requests be accepted outside these hours.

To effect requests for Pilots, the Pilots use the following means of communication:

VHF — Listening permanently on Channel 16 (156.80 MHz) being able to reply on any of the following Channels as requested: 11, 12, 13, 16 and 73.

MF — Listening in permanently on 2182 kHz, replying on 2132 kHz, their working frequency. Once contact has been established ships must change to this frequency. Communications can be made in SSB or AM according to the equipment of the ship.

Telephone No. 22914.
Telex: 43271 Inppds P.

The Pilots embark by motor launch based in Setubal and wait near the fort at Portinho da Arrabida when necessary and the weather permits.

To increase speed and safety on embarking and disembarking, ships of more than 4,000 tons gross, when light, and those of greater capacity in any condition, unless they have a door in the side or other modern means for Pilots to board and leave, and if the weather permits, should lower the gangway to about 3 m. above sea level and fix a rope-ladder so that it stays alongside the lower platform of the gangway.

Bad weather from the South, causing breaking waves at the edge of the shoals, sometimes prevents the pilotage service from operating.

In such conditions, ship must contact the Pilots to discover the state of the bar and limitations imposed on the pilotage service.

ANCHORAGES: Only inside harbour with a Pilot aboard.

RESTRICTIONS: No restrictions on night entry. At low tide vessels only up to 22 ft. draft. Max. draft 27 ft., length/breadth no restrictions.

HEALTH: Free Pratique automatically given when ships come from other Portuguese port. Otherwise, Health Certificate is to be handed over to Health Authorities during clearance procedures.

Maritime Health: This station is located next to the Commercial Dock, Avenida de Luisa Todi 80. Apart from normal sanitary visits, observation of sick crew members, etc., the station issues Derat Certificates to vessels of all nationalities. Tel: 2 39 22.

RADIO: Call through Lisbon Radio.

Coastal radio station known as "Setubal-Pesca", with call sign CUX9. Listens out permanently on 2182 kHz and replies on 1848 kHz. On receipt of the reply, vessels must change to 2284 kHz.

The station transmits weather bulletins and Notices to Mariners at 1105 hrs. and 1405 hrs., and makes general calls at 0205, 0505, 0805, 1105, 1405, 1705, 2005, and 2305 hrs.

TUGS: 5 available.

BERTHING: All installations are along the right (North) bank of the Rio Sado Estuary.

Outer Berths:

No. 1: Length 60 m. Depth 6.0 m. Located to the West of the Fishing Dock, used for salt traffic but can be used for other goods.

No. 2: Length 120 m. Depth 5.0 m. Located to the East of the Fishing Dock, used for berthing fishing craft.

No. 3: Length 130 m. Depth 7.5 m. Located to the West of the Commercial Dock, used for general cargo.

Inner Berths: Within the Commercial Dock.

No. 5: Length 30 m. Depth 8.0 ft. at LWST. One electric crane with capacity of 1 ton.

No. 6: Length 30 m. Depth 8.0 ft. at LWST. One electric crane with capacity of 1 ton.

Nos. 7 and 8: Both with reinforced concrete frontage. Used for passenger handling.

Fontainhas Quay: Length 530 m. Depth 9.5 m. – 10.5 m. Used for general cargo and served by railway line. Water and electric power points available. 10 electric cranes, 1.5 tons – 25 tons capacity.

Passenger/Ro-Ro Facilities: There is a passenger handling terminal serving ferries. In the Commercial Dock there is a Ro-Ro berth serving vessels running from Setubal to Troia.

Equipment: 5 mobile crane, capacity 2 tons – 7.5 tons, 5 stacker trucks (1×22 tons for 20 ft. containers, 1×6 ton and 3×3 tons).

Private equipment also available including 1×50 ton Coles mobile crane, 23 stacker trucks and 9 loading shovels.

Private Facilities:
Secil – Companhia Geral de Cal e Cimento: Length 104 m. depth 11 m. Products handled: cement, clinker, coal and sand.
Propam – Consorcio Portugues de Panificacao, S.A.R.L.: Depth 6 m. Pontoon quay.
Pirites Alentejanas, S.A.R.L.: Length 125 m. depth 9 m. Products handled: Pyrites.
Sapec – Societe Anonyme de Produits et Engrais Chimiques du Portugal: Pontoon – Length 80 m. depth 5.5 m. Quay – Length 100 m. depth 9.0 m. Products handled: Pyrites, clay, phosphates.
Mague – Construcoes Metalomecanicas: Length 91 m. depth 9 m. Products handled: Cranes, rolling bridges, alternators. Quay can take loads of 10 20 tons/sq.m.
Portucel – Empresa de Celulose e Papel de Portugal: Length 60 m. depth 7.5m. Pontoon berth handling paper pulp and raw materials.
Setenave – Estaleiros Navais de Setubal, S.A.R.L.: Construction and repair of vessels.
Eurominas – Electro-Metalurgia, S.A.R.L.: Length 130 m. depth 11.5 m. Products handled: Ferro-manganese and silicon manganese.

STEVEDORES: Ordered by the Agent some time in advance.
MEDICAL: Prior to arrival and in order not to delay ship's clearance, Master should inform by radio if medical assistance required, this only in case of contagious or epidemic diseases.
TANKERS: Shell Maritime installation with private pier. Discharge lines 4 in., 6 in. and 8 in.
DENSITY: About 1026.
FRESH WATER: Supplied from shore to all piers.
FUEL: Supply points available at Berth Nos. 1, 2 and 3 and Fontainhas Quay.
FIRE PRECAUTIONS: No smoking on deck or piers.
GANGWAY/DECK WATCHMEN: Available but not compulsory.
OPENING/CLOSING HATCHES: By crew unless otherwise specified in C/P. Stevedores usually help.
CUSTOMS ALLOWANCES: About 200 cigarettes and 2 bottles of spirits per man.
CARGO GEAR: Supplied by stevedores.
IDENTIFICATION CARDS: Supplied and filled in by the Agent. Crew members cannot leave Three Castles area (Setubal-Palmela-Sesimbra) without a special permit from Customs Guards obtained through Agency.
CONSULS:

Finland	tel. 26018
France	„ 24612
Spain	„ 22018

REPAIRS: All types available. Lisnave Shipyard and Dry Docks at Lisbon within about 50 miles.
Developments: Setenave has built a Shipyard for new building and repairs for very large ships in the estuary of Setubal.
The facilities consists of: 1 dock for ships up to 700,000 d.w.t. 1 dock for ships up to 350,000 d.w.t. New building berth for ships up to 700,000 d.w.t.
REPATRIATION: All facilities.
AIRPORT: Nearest at Lisbon, about 50 miles away.
TIME: From end September to end March – GMT. From end March to end September – GMT plus 1 hour.
AUTHORITY: Junta Autonoma do Porto de Setubal, Rua Antonio do Nascimento 7, 2900 Setubal, Portugal. *Tel:* 20095. *Telex:* 4300. *Contact:* Jose Norberto Catela das Neves, Director.

SINES: 37.57 N. 08.52 W. (See Plan Book)

PORT LIMITS: The vessel is considered to have arrived when 1 mile South of the West Mole.
DOCUMENTS:
1 Copy Bill of Lading,
1 Copy Residue Declaration,
1 Copy Ballast Declaration,
1 Photocopy of Tonnage Certificate (via the Agent).
PILOTAGE: Compulsory. Pilot service available 24 hours a day and to be ordered through Marine Services.
ANCHORAGES: (Provisional).
(a) Vessels up to 150,000 d.w.t. (minimum depth 20 m.). Between meridian 08° 52.4′ W. and between the parallel 37° 55.5′ N., and the 20 m. contour.
(b) Vessels of more than 150,000 d.w.t. (minimum depth 21 m.). Between meridian 08° 52.4′ W. and the line which joins the coordinate points:
1. 37° 55.5′ N.
08° 51.5′ W.
2. 37° 54.0′ N.
08° 51.0′ W.
and parallels:
37° 55.5′ N.
37° 54.0′ N.
RESTRICTIONS: Vessels of more than 50,000 d.w.t. may berth in daytime only. Vessels for Berth No. 2 of more than 150,000 d.w.t. berth and unberth in daytime only. In an emergency they may unberth any time.
MAX. SIZE: Max. LOA 350 m. Max. draft 22.5 m.
VHF: The Maritime Services are on Channels 16, 9 and 12. Many additional Channels available.
TUGS: 2×35 ton bollard pull and 3×25 ton bollard pull.
BERTHING: See Table overleaf.
STEVEDORES: Stevedores available for handling of stores, spares and small amounts of cargo. Application for stevedores should be made to the vessel's Agent.
DENSITY: 1025.
DIRTY BALLAST: Facilities available for receiving ballast and residue except for vessels over 150,000 d.w.t.
FRESH WATER: Available in unlimited quantities. Rate of delivery 60 t.p.h.
FUEL: Supplied by the refinery. Application to be made to the vessel's Agent.
SAFETY: Regulations supplied by the Port Administration.
REPAIRS: Repair shops available in Sines. Authorisation for repairs should be obtained from the Port Authority. Application for repair service should be made by the vessel's Agent.
SURVEYORS: Classification Societies represented in Sines and Lisbon.
CUSTOMS REGULATIONS: Same as other Portuguese ports.
REPATRIATION: Possible.
AIRPORT: At Lisbon 165 km. distance.
TIME: GMT. Summertime is kept in Summer.
SHORE LEAVE: Possible. Shore passes issued by Customs.
DELAYS: In Winter, vessels may suffer delays due to bad weather.
SAFETY: The following are some of the safety rules.
Loading and Discharging Operations:
Loading and discharging operations can be commenced only after the Master or his Deputy fills out and signs the Safety Check List.

1. The loading or discharging of static accumulator products such as: Gas oil, Kerosene, Jet fuel, Naphtha, Gasoline, etc., should commence in accordance with the following scheme (a cargo plan of the ship should be produced to the Safety Inspector who, together with the Operations Team Supervisor, will analyse it).

Any loading or discharging shall begin at a slow flow rate (not higher than 1 m./sec.):

(a) In case of loading, and until the ship's lines are full, free from air and water, and the product height in the tank bottom is sufficient (between 0.6 m. and 1 m.) to prevent both air dispersed product particles and liquid surface turbulence.

(b) in case of discharging, until the ship lines and loading arms are full and Refinery confirms that the product is rising in the tank.

Only after beginning in accordance with (a) or (b) above, may the loading or discharging speeds be increased up to 5 m./sec. or to the maximum the ship and Terminal can support, in the event that ship/terminal cannot reach that limit.

2. *Non static accumulator products* (crudes, fuel oil) loading or discharging should commence at a slow rate until:

(a) In case of discharging, the Refinery confirms that the product is filling the tank.

(b) In case of loading, the Chief Officer confirms that product is entering the tank or tanks in accordance with the cargo plan.

As soon as the above conditions are sustained the flow rate can be raised to the required rate.

3. *Loading or Discharging Operations Completion – Pressure Surges:*

The line length between Terminal and Refinery is about 8 km.

The following precautions should be taken while pumping in or off cargoes at high flow rates:

(a) The cargo pump rate should be slowly reduced when finishing or whenever there is a stoppage.

(b) Flow rates should change slowly by controlling the cargo pumps r.p.m.

(c) If the flow rate reductions or loading/discharging operations interruptions are controlled by valves they should be slowly reduced or closed.

Usually motor-valves have an acceptable closing speed which does not cause pressure surges when flow rate reductions or loading/discharging interruptions take place.

Simultaneous loading and deballasting operations are permitted if a previous agreement has been settled between Master and the cargo loader or receiver.

Ballast: Ballast in the cargo tanks cannot be pumped out into Sines Harbour waters.

On arrival Masters must declare the ballast loaded in the cargo tanks.

Ballast will be pumped out into inland ballast tanks or will remain on board. Terminal Safety Inspector may request the ballast tank measurements together with the bottom valves sealing.

The permanent ballast can be pumped out to the sea. Before pumping the permanent ballast into the sea, the Master must be sure it is not contaminated with petroleum products. Terminal Safety Inspector may require a sample of the ballast which will be sealed in the presence of the Master or his Deputy.

Crude Oil Washing – Inert Gas: Sines Terminal gives permission for crude oil washing (C.O.W.) during discharging.

However, this operation can only be permitted if the ship has an inert gas system in good working condition.

The tank atmosphere will be considered inert when the percentage of oxygen in it is not higher than 8%. Nevertheless, during operations, the oxygen percentage in the tanks cannot be higher than 5%.

If by any means the oxygen percentage increases to over 8% or its evaluation is doubtful, the washing procedures should cease at once.

The washing operations also cease if there are leakages or traces of leakages in the deck lines.

If the condition of the pipes is not satisfactory under a visual inspection the washing is not permitted.

Transhipment: This type of operation in the Sines Harbour is subject to the permission of the Port Authority and A.P.S. (Port Administration) who will set up the conditions by which the transhipment should be performed.

When this operation is a ship-to-ship transfer the correct functioning of the inert gas system is compulsory.

During approaching and mooring manoeuvres, ballast, deballasting, internal cargo transfers, bunkering, etc., are not permitted.

If there will be a gas concentration over the ships or the wind velocity is lower than 4 knots, the transhipment will cease.

Also there will be a stopping of the transhipment and separation of the ships if the weather conditions become unfavourable for that type of operation.

All the applicable safety rules should be strictly followed during the transhipment.

Gas Freeing and Cleaning of Ship's Cargo Tanks: Under previous permission of A.P.S. gas freeing and cleaning can be performed by a ship at anchor.

With bad weather threatening or wind velocity lower than 4 knots these operations should cease.

While alongside gas freeing and cleaning are not permitted.

Bad Weather: When there is bad weather threatening, all operations must cease, the tank lids must be closed and secured and the loading arms disconnected. In the case of bad weather, when it is likely the ship will exceed the safety limits of the loading arms, all operations should be brought to a stop.

Masters are requested to strictly follow the Operations Team Supervisor and/or the Terminal Safety Representative instructions.

Even with surplus mooring lines, there will still be a threat to the ship and/or the Port, and vessel must prepare to unberth.

In the case of a thunderstorm threatening from windward about 5 km. away the operations should cease and tank lids be closed.

Undertow: The Port of Sines, as with any other open port, is subject to the undertow effects. The phenomenon is due to waves which may have their source either in the North or South hemispheres.

At Sines the undertow effects show up between November and March. During that period the Masters must be more concerned about their ship's mooring. If necessary and taking into account the weather forecast for the laytime, Masters will be supplied with special safety instructions.

Watchmen and Crew: Master must maintain permanently on duty, sufficient number of qualified members of the crew to ensure the execution of manoeuvres, operations, to face an emergency and stand guard at the gangway.

Foodstuff, Lubricants or Spares: Foodstuff, lubricants or spares can be shipped aft if permission is granted by A.P.S. after ascertaining that there are no operations on board that involve tank lids opening or zones with gas concentrations (next to the pump house, blowers, etc.).

With ship alongside, shipping of foodstuff and spares can be done over the quay when the packages can easily be carried by hand.

Metallic objects or steel banded packages should be handled with care to avoid direct contact with the steel deck plate.

A ship with an inert gas system can receive heavy packages for shipping at the stern while loading, discharging or ballasting. If there is no inert system in the ship, packages to be loaded must be held until after loading.

Shipping of foodstuff, spares, etc., whether the ship is alongside or anchored can only be made with permission of A.P.S.

Visitors: Persons who are not crew such as family, visitors, technicians, etc., must carry a special permit issued by the ship's Agents.

Permits issued by the Terminal Authority are to be used for circulation in the Terminal premises only.

Visitors on board are the Master's responsibility.

During loading, discharging or ballasting operations visitors are not allowed to stay on the forecastle or amidship, especially women and children.

Crew Identification and Circulation in the Terminal: Crew are requested to keep with them their IDs which must be shown on request to any Terminal Officials.

Crew and visitors are not permitted to walk around the Terminal Zone and when in it Safety Rules in force should be strictly followed.

Mooring Lay Time: The ship is not permitted alongside more than 2 hours after operations are completed.

GENERAL: The anchorages are provisional. No difficulties arise in Summer. In Winter, the decision to anchor is at the option of the Master. It is recommended that in the event of bad weather, anchorage be suspended and that vessels should heave to off the coast.

DEVELOPMENTS: Development projects for the port of Sines are in hand on a large scale with a view to reception of coal, movement of ore and containers.

AUTHORITY: Administracao do Porto de Sines – A.P.S., Apartado 16, 7521 Sines Codex. *Tel:* 64021/9. *Telex:* 12027 Sinmar – P. *Contact:* J. Leal, Director of Operations.

VIANA DO CASTELO: 41.41 N. 08.50 W.

(See Plan Book)

DOCUMENTS:
Health Declaration.
3 Crew Lists.
Provision List (ship's and individual).
Tobacco Declaration and Entrance Forms supplied by Agents on arrival.
2 Manifests and 1 copy of each Bill of Lading concerning cargo to be discharged.
1 Transit Manifest if cargo in transit exists.

PILOTAGE: Always compulsory. ETA should be given to Agent with ample notice. Signals; during the day Flag "G" of International Code, and at night 3 long blasts. Boats black with white cabins. Pilots to be taken on board in outer or inner harbour respectively with bad or good weather.

ANCHORAGES: Outer or inner harbour according to weather conditions.

RESTRICTIONS: Entering and sailing only during daylight unless exceptionally good weather. Depth in entrance 4.25 m. – 4.88 m.

MAX. SIZE: Max. draft 15 ft. on HWST and 13 ft. on HWNT, with good sea conditions. Max. breadth 13 m. Also see "Developments".

HEALTH: Free Pratique authorised for vessels coming from other Portuguese ports. For vessels coming from other countries Health Declaration must be filled in and delivered to the Agents.

RADIO: Call Viana do Castelo Pilots frequency 2182 kHz and listen on 2132 kHz.

TUGS: No tugs.

BERTHING: Over 1,000 m. of Commercial Quays.

BRIDGES: 1 bridge which allows entrance/sailing at any time.

CRANES: 1×5.5 tons, 1×25 tons, 2×12.5 tons.

STEVEDORES: Ordered by Agents 8 hours in advance.

MEDICAL: No prior advice is necessary.

FRESH WATER: Supplied by shore installations.

FUEL: Only small quantities of gas oil can be supplied.

GANGWAY/DECK WATCHMEN: Available but not compulsory.

OPENING/CLOSING HATCHES: Work usually done by crew.

CUSTOMS ALLOWANCES: No limit, but must be declared.

IDENTIFICATION CARDS: Required.

CONSULS: France 22412. Spain 23018.

REPAIRS: All types of deck, engine and electrical repairs can be carried out.

DRY DOCKS: Three dry docks available.

	Length	*breadth*	*draft*
Dock 1	203 m.	34.0 m.	18 ft.
Dock 2	127 m.	18.5 m.	18 ft.
Dock Eng. D. Pacheco	104 m.	11.0 m.	16 ft.
Fitting Dock	190 m.	65.0 m.	21 ft.

No special equipment for tank washing is available.

REPATRIATION: No difficulties for crew repatriation.

AIRPORT: Nearest is Oporto Airport, 55 km.

TIME: From end September to end March – GMT. From end March to end September – GMT plus 1 hour.

HOLIDAYS: 1st January; Holy Friday; 25th April; 1st May; Corpus Christi; 10th June; 15th August; 5th October; 1st November; 1st, 8th, 24th and 25th December.

POLICE/AMBULANCE/FIRE: Tel. 115.

SHORE LEAVE: Crew allowed ashore.

DEVELOPMENTS:
1. Western breakwater, length 120 m.
2. Roadworks.
3. Marina.
4. New Commercial Quay, depth alongside 9 m.

AUTHORITY: Junta Autonoma dos Portos do Norte, 4900 Viana Do Castelo, Portugal. *Tel:* 22592, 24165. *Contact:* Antonio Maria De Menezes Nogueira, Managing Director.

VILA REAL DE SANTO ANTONIO: 37.10 N. 07.26 W.

DOCUMENTS:
2 Health Certificates.
3 Crew Lists.
1 List of Passengers in Transit.
2 Lists of Passengers Disembarking.
2 Dangerous Cargo Lists.
1 Ship's Register.
1 Tonnage Certificate.

PILOTAGE: Black boat, wooden hull, white "P" at bow. Stationed near buoy No. 1 (harbour entrance). All sea-going vessels entering or leaving harbour are obliged to avail themselves of the services of a Pilot. Latest 24 hours before arrival cable "Corporacao dos Pilotos de Vila Real de Santo Antonio" or to Agent. Departing vessels should apply for their Pilots at least 6 hours before the time of departure.

MAX. SIZE: Entrance channel 4,000 m. long, has a depth of 4 m. (12 ft.) at LW. Vessels drawing up to 5.5 m. (16 ft.) can enter under normal circumstances 1 hour before HW, a keel clearance about 1 ft. will be maintained.

TUGS: Tugs up to 105 h.p. available.

BERTHING: 1 pier 300 m. long. Depth at pier 20 ft.

STEVEDORES: Ordered by Agents. ETA to stevedores is necessary. No work allowed on Sundays.

MEDICAL: Inoculations in hospital Marques Pombal - Vila Real de Santo Antonio.

FRESH WATER: Obtainable alongside quay.

FUEL: Gas oil can be supplied in small quantities.

GANGWAY/DECK WATCHMEN: Compulsory.

OPENING/CLOSING HATCHES: Crew allowed to open and close.

CUSTOMS ALLOWANCES: About 200 cigarettes and 1 bottle of spirits per man.

CONSULS:
Britain, Rua Dr. Oliveira Salazar, No. 4
Finland, Avenida da Republica, No. 133
France, Avenida da Republica, No. 114
Greece, Avenida da Republica, No. 109
Italy, Avenida da Republica, No. 11
Netherlands, Avenida da Republica, 73

REPAIRS: There is 1 small ship repair yard at Vila Real de Santo Antonio.

HOLIDAYS: 1st January; Holy Friday; 25th April; 1st May; 10th June; 15th August; 5th October; 1st November; 1st December; 8th December; 25th December.

POLICE/AMBULANCE/FIRE: Police 66; Ambulance 202; Fire 202.

AUTHORITY: Junta Autonoma dos Portos de Sotavento Do Algarve, Rua Conselheiro Bivar 68, 8000 Faro. *Tel:* 22025, 22049.

NOTES

Please also advise Shipping Guides Ltd.

Puerto Rico

AGUADILLA: 18.26 N. 67.10 W.

DOCUMENTS: See "San Juan".
PILOTAGE: Mayaguez's Pilots provide service in Aguadilla. At least 24 hours advance notice required.
RESTRICTIONS: Open port, very deep, safe in good weather. Cold fronts from North cause very heavy swells. Vessels cannot berth during this kind of weather.
MAX. SIZE: 600 ft. long, 36 ft. draft.
HEALTH: Free Pratique granted on arrival.
BERTHING: *Harbour:* 1 mile North of the town is a conveyor pier with 1 dolphin berth at its head. Least depth alongside 12.2 m. (40 ft.). Length of mooring lines not less than 180 m. (600 ft.). Vessels tie up to 4 mooring buoys, with spring lines to 2 bollards at the loading tower. 10 in. connection to molasses line. 1 off-shore tanker berth with 9 m. (30 ft.) depth consists of mooring buoys and pile clusters, connecting platform and pipelines for discharging aviation gas for Borinquen Airport.
MEDICAL: 24 hours' notice preferred; local hospital available.
TANKERS: See "Berthing".
FRESH WATER: Available. 2 in. pipe-line with meter.
GANGWAY/DECK WATCHMEN: Usually crew members are used.
OPENING/CLOSING HATCHES: Performed by stevedores.
CUSTOMS ALLOWANCES: U.S. Customs regulations. For Customs service Aguadilla is under the jurisdiction of the Mayaguez Custom House.
IDENTIFICATION CARDS: Required to go ashore.
CONSULS: No local representation.
REPATRIATION: Can be arranged.
AIRPORT: 20 minutes' drive. Regular airlines.
TIME: Atlantic Standard Time, 4 hours less than GMT. No alterations during year.
HOLIDAYS: Refer to "San Juan".
SHORE LEAVE: Allowed.
DELAYS: No delays unless another ship is already berthed.
AUTHORITY: Puerto Rico Ports Authority (See "San Juan").

GUANICA: 17.57 N. 66.54 W.

DOCUMENTS: See "San Juan".
GENERAL INFORMATION: Refer to "Ponce".
PILOTAGE: Port operations are under the control of the Captain of the Port. Pilot services are available day and night, by previous arrangement with Mayaguez Pilots.
ANCHORAGES: Harbour is located 8 miles Westward of Guayanilla Bay. Though small, it is one of the best hurricane harbours in Puerto Rico.
TUGS: Available from Guayanilla.
BERTHING: Bulk sugar, bulk fertiliser and bulk grain handling facilities. Length 700 ft.; depth alongside 28 ft. During recent years, operations at the port have been practically nil.
FRESH WATER: Available in limited quantities for emergencies only.
FUEL: Available by trucks from Ponce.
MEDICAL: Medical assistance is available; if hospitalisation is required for any crew member, it will probably be necessary to arrange for admittance to a Ponce hospital.
CONSULS: None available locally, nearest at Ponce.
AUTHORITY: Puerto Rico Ports Authority (See "San Juan").

GUAYANILLA (incl. Tallaboa Bay): 18.00 N. 66.46 W.

(See Plan Book)

DOCUMENTS: See "San Juan".
PILOTAGE: Port operations are under the control of the Captain of the Port and Pilot services are available day and night. Pilots stand-by on VHF Channel 16 and operate on Channel 14. Arrangements should be made with at least 4 hours advance notice.
ANCHORAGES: Guayanilla is the largest hurricane harbour and one of the best in Puerto Rico. It has protected anchorage for 5 vessels. Maximum draft permissible is 42 ft. It is protected at its entrance by extensive reefs which extend a mile or more offshore. The entrance channel between these reefs is about 1.5 miles long and about 0.4 miles wide.
HEALTH: Pratique is not necessary. In case of continuous high fever or contagious disease, Agents must be notified prior to vessel's arrival. Agents will immediately contact Public Health for proper action.
RADIO: Chatham Radio (WCC) – Chatham, Massachussetts. Equipped with RCA automatic land line circuit direct to New York, N.Y., San Francisco, California and Washington, D.C.
TUGS: Available 24 hours daily from South Puerto Rico Towing Co., Tel: 809-835-2795, as requested by vessel.
BERTHING: The Union Carbide Company has berthing facilities for barge operations and LPG.

New port facilities for Pittsburgh Plate Glass are owned by the Puerto Rico Ports Authority. 2 berths at jetty, each 240 m. length. Depth alongside 35 ft.

Berths were recently dredged and actual restrictions are as follows:

**Refinery Dock – Guayanilla:*

DWT	80,000 tons	
LOA	830 ft.	
BCM	400 ft.	(Critical)
Draft	42 ft.	(South Face, Berth No. 5)
	42 ft.	(North Face, Berth No. 4).

**Petrochemical Dock – Guayanilla:*

DWT	50,000 tons	
BCM	449 ft.	
Draft	36 ft. 06 in.	(South Face, Berth No. 3)
	30 ft.	(North Face, Berths 1 & 2) Ships only
	28 ft.	(North Face, Berths 1 & 2) Barges only

*Commonwealth Oil Refining Co. Ltd. facilities.

Texaco: There is a private pier owned and operated by Texaco for the receipt of clean petroleum products. Berth 650 ft. long and 24 ft. deep being dredged to 36 ft. Diesel bunker available.
Punta Gotay Pier: 1 berth at Dolphins with depth 38 ft.
Punta Pepillo Pier: 1 berth at Dolphins with depths 12 ft. – 28 ft.
Tallaboa Bay: 1 Dolphin berth with depth 20 ft. and 1 jetty with depth 38 ft.

Also see "LPG".

LPG: Dolphin berth at Cayo Rio in Tallaboa Bay in position Lat. 18° 59′ N., Long. 66° 44.5′ W.
Report: February 1984.
Max. Size: Vessel's dimensions not to exceed: length overall 965 ft. Max. draft 41 ft. Max. beam no restriction.
Manifold Position: The manifold must be positioned within 50 ft. fore or aft of the midpoint of the vessel's overall length.
Dock: The dock has been designed to accept the breasting load from a ship (or ships if vessel to vessel discharging is arranged) of up to 109,000 long tons total loaded displacement.
Depths: Depth of the docking area and approaches has been increased by dredging to over 44 ft. Due to swell and tidal actions, the maximum allowable vessel draft has been set at 41 ft. This draft has been approved by the U.S. Coast Guard and nautical charts affected are being updated accordingly.
Mooring Basin: The docking area is 450 ft. wide and is designed to handle a 125,000 cu. m. (145 ft. beam) vessel and a 75,000 cu. m. (120 ft. beam) vessel moored side by side.
Hose handling: Although connecting hoses and supplying the equipment necessary for doing so is the vessel's responsibility, receivers can, at their discretion, make such connections provided that the carrier's manifold elevation above water plus its manifold distance inboard plus its manifold distance from the midpoint of the carrier's overall length is 60 ft. or less. If it is more than 60 ft. the carrier would have to provide hose handling assistance including a crane to lift the end of the loading hose to the deck.
Carrier/loading platform access: An accommodation ladder will be provided for those carriers that have a deck height of 25 ft. or less above the water and are accessible from loading platform. Carriers that cannot meet the above must provide their own accommodation ladder. Transportation from their accommodation ladder will be provided.
Sanitary waste removal: Dumping of sanitary wastes into Tallaboa Bay is not permitted. Therefore, for those carriers that stay in port for 20 days or more, removal of sanitary wastes by barge will be provided. The carrier must provide the means (to be approved by Union Carbide Company) of transferring the wastes from the carrier to the barge.
Potable water: Potable water is not available at berth, but fresh water is. A fresh water connection is available on the loading platform. The carrier must provide his own hose for hook up. Should the carrier wish to purchase such water a release must be executed.
Bunkers: Bunkers are not available.
Night navigation: No U.S. Coast Guard regulation prohibits the berthing or unberthing of LPG carriers at night unless the incoming/departing vessel is being moored alongside another (storage) vessel.
FRESH WATER: Available whenever requested by the vessel. Water delivery very slow (3 to 5 tons per hour).
FUEL: Available only whenever arranged by Owners of the vessel and/or charterers prior to arrival.
Fuel Dock: Length 680 ft. with deep water alongside. Mooring dolphins and moorings buoys installed to assist with clearing the dock.
MEDICAL: Medical service is available; hospitalisation at Ponce, which is only 15 minutes distant.
REPAIRS: Various marine contractors available in Ponce upon request. Minor repairs available in Guayanilla and Ponce. No drydock facilities in the area. For drydock facilities and other major repairs refer to "San Juan".
Radar: For radar technician contact local Agent prior to vessel's arrival. Various technicians available in San Juan.
REPATRIATION: Arranged by ship's Agents.
AIRPORT: International Airport in outskirts of San Juan served by regular airlines. Small airport in Ponce connects with San Juan.
CONSULS: None available locally; nearest at Ponce. Consuls available in Ponce are: Dominican Republic, Honduras, Norway, Venezuela.
CUSTOMS: For Customs service, Guayanilla is under the jurisdiction of the Ponce Custom House.
SHORE LEAVE: Foreign crew members are allowed to go ashore through U.S. Immigration.
IDENTIFICATION CARDS: Shore passes are sufficient for shore leave.
AUTHORITY: See "San Juan".

JOBOS (Aguirre): 17.56 N. 66.13 W.

DOCUMENTS: See "San Juan".
GENERAL INFORMATION: Refer to "Ponce".
PILOTAGE: The Port of Jobos is served by the Pilots of Ponce. Services must be arranged in advance.
ANCHORAGES: A fine land-locked harbour, located on the South coast, approx. 42 nautical miles Eastward of Ponce and 20 miles West of Point Tuna. Anchorage inside the bay is Southward of the pier in depths of 19 ft. – 24 ft., soft mud bottom.
RESTRICTIONS: The principal entrance is from Westward between Morrillo Cay and Ratones Cay.
TUGS: No tugs available.
BERTHING: To the West of the sugar pier (not in use and not buoyed) is an open concrete barge dock 632 ft. in length with a buoyed access channel for the receipt of fuel oils for the Water Resources Authority.
FUEL: No bunkers are available.
MEDICAL: Medical assistance is available; if hospitalisation is required for any crew member, it will probably be necessary to arrange for admittance to a Ponce hospital.
CONSULS: None available locally; nearest available at Ponce.
AUTHORITY: Puerto Rico Ports Authority (see "San Juan").

LAS MAREAS: (Guayama) 17.55 N. 66.10 W.

(See Plan Book)

The Puerto de las Mareas Terminal is located on the South side of the island of Puerto Rico. It is located approximately 26 nautical miles East of the port of Ponce. The nearest city is Guayama.

All vessels calling at Phillips Puerto Rico Core Inc., Puerto de las Mareas Terminal should be consigned to Phillips Puerto Rico Core Inc., and all official documents for such ships should show them so consigned. In conformance with port regulations, no vessel will be allowed to tie up alongside a pier without having first obtained a berthing permit from the Ports Authority Captain of the Port.
DOCUMENTS: See "San Juan".

The Passenger List must show full names, sex, age, nationality, and occupation of passengers landing at Puerto de Las Mareas. The ultimate destination of in-transit passengers must also be shown in the passenger list.

In most cases, outward clearance and cargo documents will be delivered on board by the ship's Agent, making it unnecessary for Masters to obtain such clearance in person from the U.S. Customs Office (Ponce).
PILOTAGE: The use of Pilots is compulsory for all vessels. Vessel's Agent will arrange for Pilot, upon receipt of the arrival notice. Pilot will board inbound vessels off the entrance to the harbour about 1 mile offshore.

When approaching the dock and channel, vessels must have one anchor, to be designated by the Pilot, free of the hawse pipe and ready for quick release if necessary to stop the vessel.
Note: Every vessel arriving or departing must provide, properly secured, a pilot ladder which conforms to the standards of construction normally accepted by international safety standards.
APPROACHES: The harbour is entered through a channel 250 ft. in width at its narrowest portion, bearing 025.6° (T). It is protected on the Eastern side by a rubble mound breakwater extending approximately 700 ft. from the shore line. The dredged channel extends out to the 40 ft. depth contour and has a width at this contour of approximately 900 ft., narrowing to 250 ft. approximately 2,100 ft. inshore from the 40 ft. contour. The 250 ft. wide portion of the channel is approximately 1,000 ft. long. At the inshore end of the 250 ft. wide channel, the harbour itself extends for a length of 2,300 ft. and a maximum width of 1,100 ft. The harbour has a depth of 38 ft. below MLW but the maximum draft allowable for inbound and outbound vessels is 37 ft. The above dimensions are given to the bottom of the channel; the sides of the channel and the harbour are sloped at 1 in 3.
NAVIGATIONAL AIDS:
A. Lighted Buoy LM: This sea buoy is located 300 ft. West of the centre line of the channel, 2 miles offshore from the end of the rubble mound breakwater. It displays a white light through 360° flashing Morse code letter "A". (0.5 seconds on, 0.5 seconds off, 2.0 seconds on, 0.5 seconds off). The buoy is painted with black and white vertical stripes and is fitted with a radar reflector. Water depth is 70 ft.
B. Channel Marker Buoys:

(1) Buoy 1: This buoy has 360° green light flashing 0.6 seconds on and 3.4 seconds off. It is painted black and has a green retro-reflective tape in buoy superstructure panels. Water depth is 40 ft.

(2) Buoy 2: This buoy has 360° red light flashing 0.5 seconds on and 2.0 seconds off. It is painted red and has red/orange retro-reflective tape in buoy superstructure panels. Water depth is 40 ft.
C. Channel Marker Navigation Lights: There are 4 channel marker navigation lights, 3 are located on piling, and 1 on the end of the rubble mound breakwater.

(1) Channel Marker Number 3: This marker is located on a single pile 400 ft. West from the centre line of the channel, 2,024 ft. inshore from the channel marker buoy No. 1. The light is located 25 ft. above MLW, and is displayed through 360°. It is a green light, flashing 0.6 seconds on and 3.4 seconds off. The marker is fitted with 3 ft. square dayboards with green retro-reflective centre and dark green reflective border, numeral 3.

(2) Channel Marker Number 4: This marker is located on a tower at the end of the rubble mound breakwater, 50 ft. above MLW. The light is displayed through 360°, red, flashing 0.5 seconds on and 2.0 seconds off. The marker has 4 ft.×4 ft. triangular dayboards with red retro-reflective centre and dark green reflective border, numeral 4.

(3) Channel Marker Number 5: This marker is located 175 ft. West from the centre line of the channel, 1,000 ft. inshore from the end of the rubble mound breakwater. It is on a single pile 25 ft. above MLW and displays a green light through 360° flashing 0.4 seconds on and 0.6 seconds off. The marker is equipped with 3 ft. square dayboards with green retro-reflective centre and dark green reflective border, numeral 5.

(4) Channel Marker Number 6: This marker is located 175 ft. East from the centre line of the channel, 1,295 ft. inshore from the end of the rubble mound breakwater on a single pile 25 ft. above MLW. It displays a 360° red light, flashing 0.4 seconds on and 0.6 seconds off. The marker is equipped with 4 ft.×4 ft. triangular dayboards with red retro-reflective centre and dark reflective border, numeral 6.
D. Obstruction Light: This light is mounted on the protective dolphin at 10 ft. above MLW and displays 3 fixed red lights through 360°.
E. Range Lights: LLNR 1380.55 front range light is mounted on a tower located on the centre line of the channel 3,500 ft. inshore from the end of the rubble mound breakwater. It consists of a quick flash white light 86 ft. above MLW and visible on range line only. The tower is fitted with a 6 ft.×12 ft. KRW dayboard, covered with red/orange reflective coating with an 18 in. white stripe down the centre.

LLNR 1380.56 rear range light is mounted 104 ft. above ground on a tower located on the centre line of the channel 5,500 ft. inshore from the end of the rubble mound breakwater. It consists of an equal interval, white, 3.0 seconds on and 3.0 seconds off. The tower is fitted with a 6 ft.×12 ft. KRW dayboard covered with red/orange reflective coating with an 18 in. white stripe down the centre.

RESTRICTIONS: The entrance channel has a depth below MLW of 40 ft. and the harbour itself has a depth of 38 ft. Hence vessels using the port are limited to a maximum draft of 37 ft. Vessels are required to have a minimum draft of 14 ft. forward and 24 ft. aft when entering or leaving the port.
HEALTH: Free Pratique is not required for vessels arriving at Puerto de Las Mareas, except when cases of communicable disease are on board. In such cases, U.S. Public Health Service doctors are available, and should be requested through the Agent 48 hours prior to arrival.
MAX. SIZE: Max. draft 37 ft.

RADIO: Agents of vessels or Owners or its representatives should advise Phillips Puerto Rico Core Inc. by telex, cable or telephone, 72 hours, 48 hours, and again 24 hours before their expected arrival at the sea buoy.

ITT Telex No. 3853347 "Philcorgya".
Puerto Rico Communication Authority-Telex No. 347.
Telephone (809) 865-1515.

Incoming vessels should advise the Agent by radio 48 hours and again 24 hours before their expected arrival at the sea buoy. Coast stations available for such advice are:

Lantana Radio (WOE) - Lake Worth, Florida. (Equipped with RCA automatic land-line circuit direct to New York City, San Francisco and Washington, D.C.)

Transmits Traffic Lists at (GMT) 0005, 0205, 0405, 0605, 0805, 1005, 1205, 1505, 1605, 1805, 2005 and 2205. Transmits weather bulletins at (GMT) 0105 and 1600.

New York Radio (WNY) - New York City. (Equipped with RCA automatic land-line circuit direct to New York City, San Francisco, California, Washington, D.C.)

Transmits Traffic Lists at (GMT) 0010, 0210, 0410, 0610, 0810, 1010, 1210, 1410, 1610, 1810, 2010 and 2210. Transmits weather bulletins at (GMT) 1000, 1400, 1600 and 2200.

Also equipped with teletypewriter (TWX) for direct communication with steamship companies in the United States having this equipment.

Chatham Radio (WCC) - Chatham, Massachusetts. (Equipped with RCA automatic land-line circuit direct to New York City, San Francisco and Washington, D.C.)

Transmits Traffic Lists at (GMT) 0050, 0450, 0850, 1250, 1650 and 2050. Transmits weather bulletins at (GMT) 0100, 1300 and 1700.

San Juan Radio (WCT) - Radio Corporation of Puerto Rico Marine Station, Transmits on 2530 kHz, receives on 2134 kHz, watch on 2182 kHz.

In addition to the above commercial radio facilities, incoming vessels may contact the port through radio facilities on tug stationed at the port. These facilities are as follows:

VHF radio: range 30 miles. Channel 16 (156.8 MHz), working frequency Channel 14 (156.7 MHz).

SSB radio: 12 MHz, 8 MHz, 4 MHz.

Call letters: WA 6617 and WS 6560.

Vessels diverted to Puerto de Las Mareas must furnish the required 48-hour and 24-hour notices of arrival, unless notice of diversion is received less than 48 hours before anticipated arrival, in which case the notice of arrival will be given as soon as notice of diversion is received. In such cases, however, Phillips Puerto Rico Core Inc. reserves the right to refuse to load or unload such vessels if tankage is not available for the cargo, or if cargo is not available to loading.

HURRICANES: The South coast of Puerto Rico is subject to winds of hurricane force, accompanied by abnormally high tides, during the late Summer and Autumn. In the event of such abnormal conditions, vessels may be required to put out additional moorings, or if necessary, to suspend all operations and put to sea until normal conditions prevail.
MEDICAL: Medical assistance or hospitalisation arrangements should be made through the Agent. If hospitalisation is required for any crew member, arrangements should be made through the ship Agent with hospitals located in the municipality of Guayama. Ambulance service can be furnished upon request to the Agent.

TUGS: The use of tugs is compulsory for arriving and departing vessels. Two tugs are stationed in the harbour to assist in docking, undocking and turning. Arrangements for the use of tugs should be made through the Agent well in advance of the vessel's arrival.

Tug Operator: McAllister Brothers Inc. Tel. (809) 721-8888 and 722-8111.

BERTHING: The dock at the terminal consists of a finger pier approximately 800 ft. in length inside the harbour with a tanker loading berth on each side. The finger pier consists of a cargo platform 45 ft. by 90 ft., fitted with fender piling and dolphins (3 breasting dolphins, 2 mooring dolphins and 1 protective dolphin). The cargo platform is connected to shore by a driveway 12 ft. 6 in. wide. The mooring and breasting dolphins outboard of the cargo platform are connected to each other and to the platform by a walkway. No launches are required to handle mooring lines. The top of the cargo platform is 12 ft. above MLW level. Water depth alongside the finger pier is 38 ft. at MLW. There is no current at the dock or in the harbour.

Bollards for mooring lines are provided on the breasting dolphins, the mooring dolphins and the turning dolphins.

Turning basin 1,100 ft. wide and 1,060 ft. long, outboard of the turning dolphin, is provided. The turning basin has a depth over its entire area of 38 ft. at MLW. Normal procedure will be for vessels to enter the harbour and turn prior to docking.

Vessels will be required to vacate berths promptly on completion of loading or discharging cargo. Permission to use a berth when not loading or discharging cargo may be granted under special circumstances, and must be requested through the Agent.

If the vessel fails to vacate the berth on the expiration of the allowed time, it will be held liable for payment of any demurrage and/or damages incurred by Phillips Puerto Rico Core Inc., as a result of delays to other vessels waiting berths, or for any other consequence of its failure promptly to vacate the berth.

TANKERS: The various cargoes available at the Puerto de Las Mareas terminal include motor fuel, cyclohexane, benzene, paraxylene, orthoxylene, mixed xylenes, paraffinic naphtha, and other special products. Feedstock for Phillips Puerto Rico Core Inc. facilities is naphtha, and there is a fuel oil unloading line. Cargo handling is accomplished through various sizes of lines, as follows:

Product	*Hose size (in.) (each side of dock)*	*Line size (in.)*	*Loading/ discharging rate with one pump*
Naphtha Feedstock	3 × 8	20	13,700 b.p.h.
Motor Fuel Regular	3 × 8	20	10,000 b.p.h.
Motor Fuel Premium	2 × 8	12	5,700 b.p.h.
Motor Fuel Unleaded	1 × 8	14	7,000 b.p.h.
Benzene	1 × 8	12	3,800 b.p.h.
Cyclohexane	1 × 8	10	4,000 b.p.h.
Paraxylene	1 × 8		5,000 b.p.h.
Orthoxylene	1 × 6	8	2,200 b.p.h.
LP-7 Raffinate	2 × 8	16	7,500 b.p.h.
Mixed Xylenes	1 × 6	8	2,000 b.p.h.
Toluene	1 × 8	8	800 b.p.h.
Fuel oil	1 × 8	12	3,500 b.p.h.
Ballast	1 × 8	12	6,000 b.p.h.
Domestic water	1 × 2	2	3 t.p.h.
Butane	1 × 6	16	2,000 b.p.h.

CONNECTING/DISCONNECTING HOSES: Service will be provided by the terminal to connect and disconnect hoses on the ship. Vessels are requested to have blanks removed from the cargo lines and hose handling booms rigged on arrival at the dock.

READINESS: Notice of Readiness to load or discharge is warranty that the vessel is in all respects ready to receive or discharge cargo, and that the vessel's equipment is ready and capable of loading or discharging petroleum or petrochemical products. Phillips Puerto Rico Core Inc. reserves the right to refuse to accept such notice of readiness if, upon inspection, the vessel is found not to be ready to receive or discharge cargo. Vessels may tender Notice of Readiness upon arrival, berth or no berth, according to the terms of the charter party or contract of affreightment under which they have been engaged.

BALLAST: Ship's Masters are reminded that they are prohibited by Puerto Rico law from pumping dirty ballast overboard when within the Puerto Rican limits. Facilities are provided for disposing of dirty ballast ashore at Puerto de Las Mareas. U.S. Coast Guard regulations are enforced for any discharge of dirty ballast, and any violations will be quickly detected and reported.

Ballast is pumped ashore through a 12 in. line, capable of receiving at a pressure at the ship's rail of 100 p.s.i. The ballast facilities are sufficient to accommodate 70,000 barrels of dirty ballast. Vessels are requested to arrive with minimum of dirty ballast.

FRESH WATER: Available at the dock in limited quantities.

FUEL: No bunkers are available at Puerto de Las Mareas. However, arrangements for bunkering at any other ports in the island can be made through the Agents.

STORES: May be ordered through the ship's Agent for delivery at the terminal.

CONSULS: No consular representatives are located in the vicinity of Puerto de Las Mareas. Some nations maintain consular representatives in San Juan. Further information can be obtained from the Agent.

REPAIRS: Complete repair and dry dock facilities are available in San Juan. Limited facilities for emergency repairs are available at Ponce. Requests for such services should be made through the Agent.

SURVEYORS: There are no classification society surveyors stationed at Puerto de Las Mareas, but they are available on call from Ponce or San Juan. Requests for survey services should be made through the vessel's Agent at least 24 hours prior to arrival.

CUSTOMS: U.S. Customs and Immigration Authorities will board vessels at the dock, except in unusual circumstances, in which case they will board the vessel at anchor outside the harbour. The vessels will be required to furnish an accommodation ladder.

American Flag vessels will not require Customs entry or clearance unless arriving from or departing to a foreign port.

FIREARMS: All firearms and ammunition should be shown on the stores list and will be removed from the vessel during its stay in Puerto Rican waters. Any violations of this regulation will result in fines and confiscation of firearms and ammunition.

SAFETY: The provisions of Part 35 "Operations" of the Rule and Regulations to Tankvessels, Subchapter D (CG-123) published by the U.S. Coast Guard are in force at Puerto de Las Mareas, and must be observed under penalty of fine and imprisonment as provided therein.

Particular attention is called to the following safety precautions:

(1) Vessels must be, and remain, in readiness to sail from the dock at any time. In the event of engine repairs, which might interfere with such readiness to sail, being required, written permission must be obtained from the Harbour Master before such repairs may be undertaken.

(2) Scuppers must be plugged during cargo-handling operations.

(3) Absolutely no smoking or open lights will be permitted on the dock or open decks.

(4) Screens in good conditions must be used over gauging hatches when not actually gauging.

(5) Operations may be suspended at the discretion of the Master, or may be required to be suspended by the Harbour Master, during severe electrical storms.

(6) In the event of a breakdown of communications between dock and the shore terminal during loading operations, and the need to shut off the flow of cargo to the vessel, an emergency signal consisting of a continuous sounding of the ship's whistle shall be given. The signal shall not be discontinued until the flow of the cargo has been shut off.

(7) An electrical bonding cable will be provided from the dock to the ship. This bonding cable must be firmly secured to a clean metal surface of the vessel's hull or cargo piping before hoses are connected, and must remain in place until the hoses are disconnected.

(8) The vessel must moor bow to seaward when feasible and be prepared to get underway on short notice. A towing cable shall be made ready forward and aft with the bight at water's edge.

(9) Each foreign flag vessel must be in possession of a valid Letter of Compliance issued by the Commandant, USCG for the carriage of the specific products to be loaded or discharged. All vessels must possess a Certificate of Financial Responsibility and be able to produce the same upon demand.

(10) Ship to ship transfer of cargo within the harbour is not permitted.

(11) All persons considered to be intoxicated or under the influence of drugs shall not be allowed to board the ships or enter the facilities during cargo operations.

Violations of these and other safety regulations, as described in Parts 35 of Subchapter D will result in the suspension of cargo-handling operations by the Harbour Master, or the PPRC dock personnel or safety inspectors, without recourse. Such suspension of cargo operations will continue until the violations are corrected or the safety hazards removed.

POLLUTION: *Oil Spill Avoidance:* All vessels must comply with the latest Commonwealth and Federal laws and regulations regarding prevention of oil spills. Such laws absolutely prohibit any discharge overboard of oily water, oily ballast or oil in any form. Since the harbour is an enclosed area with no flow of water through it, any violations, no matter how small, will be quickly detected and reported to the U.S. Coast Guard. VIOLATORS WILL BE VIGOROUSLY PROSECUTED AND ARE LIABLE FOR HEAVY FINES.

Sanitary Regulations: Pollution laws and regulations concerning sanitation apply to the harbour of Puerto de Las Mareas. Trash and galley waste will not be dumped into the waters of the harbour and must be kept on board until the vessel has sailed. Discharge of toilets and bathrooms into the waters of the harbour is prohibited. Sanitary facilities are provided on the dock for use by crew members while their vessels are at the berth.

MAIL: Official and personal mail may be addressed to the vessel care of Agent, and will be delivered to the vessel by the Agent on arrival. The Agent will accept official and personal mail from the vessel, and will ensure its delivery to the local U.S. Post Office, upon receipt of a mail transmittal slip to support disbursements.

SHORE LEAVE: When the vessel is berthed at Puerto de Las Mareas there normally are no restrictions on shore leave. In order to avoid delay in sailing, Masters are requested to ensure that all crew members are on board their vessel at sailing time. There are no facilities to provide shore leave from vessels at anchor awaiting berth.

Crew members from foreign vessels must carry their crewman's landing permit, Form I-95A, when on shore leave.

GENERAL: *Charts:* The general area and the harbour of Puerto de Las Mareas is shown in U.S. Hydrographic charts number 25677 and 25640.

Tides: Tides in the general area of Puerto de Las Mareas have an average yearly range of 0.8 ft. from MLW to MHW.

AUTHORITY: Puerto Rico Ports Authority, see "San Juan". Port facilities operated by Phillips, P.R. Core, Inc.

MAYAGUEZ: 18.13 N. 67.12 W.

DOCUMENTS: See "San Juan".
PILOTAGE: Ship's Agents must make arrangements with Captain of the Port Office at Mayaguez Pier well in advance, not less than 24 hours before arrival of vessel at harbour entrance. Pilot boats are painted black (hull) and white (topside) as required, showing the letter "P" on each bow. Pilots board 1 to 2 miles offshore of Sea Buoy depending on weather conditions. Pilot service available day and night.
ANCHORAGES: Close to the entrance channel and boundaries. Sufficient depths for larger vessels.
RESTRICTIONS: The bay is easily entered day or night and is a good harbour in any weather, except in a hurricane. The harbour is 3.8 miles wide, and offshore is protected by reefs which extend across the harbour entrance in a general North by West direction.

The principal channel is about 0.4 miles wide, with depths at the entrance of about 47 ft. to 120 ft. and it is marked by lighted buoys and the range. Depth in the inner channel is approximately 30 ft. and close alongside the pier from 28 ft. to 29 ft.
MAX. SIZE: Cargo vessels 600 ft. or more in length call at the port. Safe draft for operations at the wharf is 27 ft.
RADIO: Communication to all points, including ships at sea, is available through commercial systems. Cables-Telex via RCA Communications, Inc., a global service of Radio Corporation of America. ITT World Communications, Inc., tel. 830-3316. Puerto Rico Telephone Company, local and overseas communications services, 129 and 128.
TUGS: Not used at Mayaguez Port.
BERTHING: Berthing permit required from the Ports Authority. The Puerto Rico Ports Authority operates the terminal facilities which consist of a bulkhead wharf approximately 1,200 ft. long, apron width 30 ft., and transit sheds and open storage. There are other berthing facilities in the port which are owned by the tuna packing plants.
STEVEDORES: Arrangements are made by the ship's Agents or representatives.
MEDICAL: The Agent should know in advance of any medical needs so that he can make the necessary arrangements with the U.S. Public Health Service. Good medical and hospital services available.
TANKERS: See "Guayanilla".

Regular calls from Esso and Texaco to unload fuel by means of barges in order to supply tanks on land by means of pipes located at berthing facilities.
FRESH WATER: Available alongside the berth in 4 outlets to supply any amount required at any time. Hose connections of 2.5 in. or less, maximum pressure.
FUEL: All grades available.
FIRE PRECAUTIONS: Standard fire and safety precautions throughout. U.S. Coast Guard regulations.
GANGWAY/DECK WATCHMEN: Ship provides gangway watchmen.
OPENING/CLOSING HATCHES: By stevedores.
IDENTIFICATION CARDS: Required to go ashore.
CONSULS: Dominican Republic, France, Tel: 832-4322. Others at San Juan.
REPAIRS: Call San Juan facilities where complete salvage equipment is available. Service to other ports of the island.
REPATRIATION: Arranged by ship's Agents.
AIRPORT: Mani Airport, 15 minutes from pier, served by regular airlines daily from Mayaguez to San Juan.
TIME: GMT minus 4 hours all year round.
HOLIDAYS: Refer to "San Juan".
POLICE/AMBULANCE/FIRE: Telephone numbers: Police, 343-2020, 832-2300; Ambulance, 832-0496, 832-3212; Fire, 343-2330, 832-2330.
TELEPHONES: Can be arranged by Puerto Rico Telephone Company.
SHORE LEAVE: Allowed.
AUTHORITY: Puerto Rico Ports Authority (See "San Juan").

PONCE: 17.58 N. 66.37 W. (See Plan Book)

DOCUMENTS: See "San Juan".
PILOTAGE: Port operations are under the supervision of the Captain of the Port and Pilot services are available day and night.
ANCHORAGES: Harbour is protected from the prevailing Easterly trade winds by enclosing reefs. To the Southward the harbour is exposed and for this reason is not safe in a hurricane.
RESTRICTIONS: Depths: Entrance channel 36 ft.; turning basin, 31 ft.; anchorage, 40 ft.
MAX. SIZE: Max. draft 29 ft.
BERTHING: The municipal pier is a concrete and steel construction 430 ft. long by 100 ft. wide, with a steel and cement transit shed. The municipality has also built a concrete bulkhead wharf extending East-West for 2,260 ft. from the pier. To the North of the bulkhead wharf there is a manoeuvring basin 30 ft. deep. Depth alongside: Pier 1A, 30 ft.; Pier 2, 29 ft. 6 in.; Pier 3, 30 ft.; Pier 4, 30 ft.; Pier 5, East-side, 33 ft.; Pier 5, West-side, 32 ft.

A Paceco Portainer crane, capacity 40 ton for handling 20 ft., 35 ft. and 40 ft. containers is installed at the Trailer Wharf.

Ro/Ro ramp available.
FRESH WATER: Water is available whenever ordered in advance for 24 hour daily service or at request during office hours.
FUEL: Available by pipe-line: (Texaco only) diesel, gas oil, No. 6 fuel oil. By trucks (Chevron, Shell, Esso).
MEDICAL: Ambulance permanently available at dock area, hospital and doctor's service available as requested to the Agent.
CONSULS:

Colombia
Denmark
Dominican Republic
France
Honduras
Netherlands
Panama
Spain
Sweden
Switzerland

REPATRIATION: Arranged by ship's Agents.
TIME: GMT minus 4 hours.
HOLIDAYS: Refer to "San Juan".
DEVELOPMENTS: The expansion of the 260 ft. N.-S. bulkhead is completed and length increased to 600 ft. There is a 76 ton gantry crane in operation.

The Port Board is working on the development of a dry dock for ship repair.
AUTHORITY: Junta Administrativa, Muelle Municipal de Ponce, Apartado Postal 125, Playa de Ponce, P.R. 00731. *Tel:* 842-3095, 842-0170. *Contact:* Hector M. Leon Lopez, Superintendent.

PORT ARECIBO: 18.29 N. 66.42 W.

Port Arecibo is located on the North coast of the island, 32 nautical miles Westward of San Juan. There is a breakwater to afford some protection from heavy seas, but even so the port is not considered safe for vessel's operations, which are practically non-existent, except for a tug-barge operation (liquid chemicals are pumped out from a tank-barge alongside the pier through a pipe-line to P.R. Chemical storage tanks ashore). Also, industrial liquid wastes are pumped from a pierside tank into a barge, the barge towed way out to sea and the wastes pumped out overboard.

A sizable fleet of pleasure craft use a section of the berthing facilities. There has been a significant growth in tug-barge traffic calling at the port.

There is a pier 600 ft. long. Depth alongside is close to 20 ft., but there is a shallow spot towards the inshore end of the pier. There is also a 30,000 sq. ft. cargo shed and open storage area.

The port is mainly used as an industrial port.

Port installations are under the control of the Puerto Rico Ports Authority.

Port Arecibo is not a Customs Port of entry.

PORT FAJARDO: 18.20 N. 65.38 W.

The port of Fajardo lies on the East coast of Puerto Rico. There is a 250 ft. long concrete pier owned by the Puerto Rico Ports Authority for the passenger and cargo ferryboats and other craft which engage in inter island traffic to the islands of Vieques and Culebra.

Port operations are under the control of the Captain of the Port.

For Customs service, the Port of Fajardo is under the jurisdiction of the Fajardo Custom House.

SAN JUAN: 18.28 N. 66.07 W. (See Plan Book)

DOCUMENTS: Customs:

1. American flag vessels engaged exclusively in the coastwise trade (to or from American ports only, U.S. Virgin Islands ports excepted) are not required to make entry or to obtain clearance. A Permit to Depart is required, however, if loading coastwise cargo.

2. No formal entry or clearance is required for American yachts arriving or departing regardless of destination, but a report of arrival must be made within 24 hours after arrival from foreign ports or from the Virgin Islands.

3. All vessels arriving from foreign ports for discharging and/or loading cargo must report arrival within 24 hours and make entry within 48 hours. Vessels arriving in distress or for the purpose of taking on bunkers, water and/or stores and departing within 24 hours need not make entry or clearance, but must report arrival and comply with certain Customs formalities, such as reporting bunkers and stores taken, before departing.

(a) The following valid documents shall be available for examination and return to Master regardless of length of stay in port:
1. Register or Nationality Certificate.
2. Load Line Certificate (if over 150 tons).
3. Water Pollution Certificate (if over 300 tons).

(b) Additional documents, to be filed in duplicate for Customs purposes, are as follows:
1. Master's Oath of Vessel in Foreign Trade (C.F. 1300).
2. General Declaration (C.F. 1301).
3. Cargo Declaration (C.F. 1302) in the English language.*
4. Ship's Stores Declaration (C.F. 1303).
5. Crew Effects Declaration (C.F. 1304).
6. Crew List/Passenger List (Immigration Form I-418).
7. Clearance from Last Port (original only – if available).

(*) Only one copy of the Cargo Declaration is required for in-transit cargo for foreign ports.

4. NOTE: Specific procedures for the entry and clearance of vessels are extensively described under Part 4 of the Customs Regulations (19 Code of Federal Regulations, Part 4) and Title 46, United States Code. Questions on such procedures may be directed to:

District Director of Customs,
P.O.Box 2112,
Old San Juan, Puerto Rico 00902.
Attention: Carrier Control Branch.
Tel: (809) 725-3310
(809) 723-2780 Ext. 259

Or to the Port Director of Customs at the following sub-ports: Fajardo (809) 863-0950, Mayaguez (809) 832-0308, Ponce (809) 842-3195 or 842-1030.

Immigration: From 0800 – 1700 hrs., Monday through Saturday, no charges. Exceptions are Federal holidays, Sundays and periods from 1700 hrs. – 0800 hrs. daily, when overtime charges paid by the Federal Government will be charged to the steamship company according to specified tariff.

Documents required:

1. U.S. Crew List, Form I-418 (only one is necessary) duly visaed by the American Consul at port of departure: if there is no Consul available, list must be signed by the Master and sworn before an Immigration Officer on arrival.

2. If crew is to be given shore leave, Form I-95 is to be prepared for each member of the crew. If this form fully filled out for each member of the crew is not presented to the Immigration Inspectors, crew will be detained on board.

3. Both copies of Form I-95 must be printed (or typed) legibly, not written in script.

4. Whenever passengers are carried, a separate Form I-418 listing each passenger, must be presented in accordance with instructions thereon, together with a Form I-94 if required.

For additional information on Consular Clearances for the Dominican Republic and Venezuela, and Immigration Documentary requirements, said offices should be contacted directly.

Agent:
3 sets of Bills of Lading.
2 copies of Manifest (for San Juan only).
1 copy of Crew List.
1 copy of Stores List.
1 copy of Crew Purchase List.
1 copy of Narcotics List.
1 copy of Passengers List.

PILOTAGE: Pilot services are available day and night. Pilotage is compulsory for: all vessels of foreign registry; American flag vessels bound to or arriving from foreign ports and American flag vessels not having on board a deck officer duly licensed as harbour pilot for Puerto Rico waters.

Ships' Agents must make arrangements with pilot station well in advance (not less than 24 hours) of arrival of vessel at harbour entrance. Pilot boats are painted black (hull) and white (topside). Show the letter "P" on each bow. Pilots board 3 miles offshore of sea buoy. Call Pilot station on Channel 16 VHF. There is no inner anchorage for incoming vessels to wait for the Pilot.

Port Administration: Most of the port terminal installations are under the control of the Puerto Rico Ports Authority. Utilisation of all port terminal facilities is subject to prior application to the Puerto Rico Ports Authority and the issuance of a written berthing permit by the Operations Division of the Maritime Department of the Ports Authority, tel: 723-4011.

Vessels approaching to enter San Juan Harbour shall remain outside, not less than 3 miles to the North of the harbour entrance, to pick up the Pilot; and vessels ready to depart shall inform the Maritime Traffic Control or look-out station via radio-telephone of their intention.

ANCHORAGES: Deep draft anchorage "E", on the S.W. shore of Isla Grande, is for vessels awaiting Customs or Quarantine, and no vessel shall remain more than 24 hours without a permit from the Puerto Rico Ports Authority and U.S. Coast Guard Captain of the Port.

The effective size of this anchorage area has been reduced on its S.E. sector on account of the construction of barge mooring facilities that encroach on the area.

Restricted Anchorage "F" (Fox), shoreward of the West margin of Anegado Channel, is for vessels discharging explosives. Anchorage permit required from U.S. Coast Guard Captain of the Port and the Puerto Rico Ports Authority.

Anchorage "D", East end of San Antonio Channel, is for yachts, schooners and small craft.

RESTRICTIONS: Besides the harbour entrance channel (Bar Channel) and the main ship channel (Anegado Channel) with depths of 48 ft. and 36 ft. 6 in., respectively, there are 4 other navigable channels in the inner harbour:

The Army Terminal Channel, which runs in a straight North to South direction is approximately 1 mile long and 300 ft. wide with a depth of 37 ft. The channel leads into the turning basin off the Army Terminal on the South shore of the bay. On the Westerly margin of the channel there are located the pile clusters berthing facilities, silos and other shoreside installations for the receipt of bulk grain shipments and petroleum products.

The Puerto Nuevo Channel, approximately 1 mile long and 300 ft. wide, with an average depth of 30 ft. 6 in., runs East-Northeasterly from the Army Terminal Turning Basin to the Graving Dock Turning Basin. This provides access to modern marine terminal facilities in the Puerto Nuevo port zone.

The Graving Dock Channel, approximately 1 mile long and 300 ft. wide, with average mid-channel depth of 29 ft., runs in a general Southeasterly direction from Anegado Channel to the Graving Dock turning basin.

San Antonio Channel, approximately 1.5 miles long and 300 yards wide, with average mid-channel depth of 32 ft. 6 in.–36 ft. branches out from Anegado Channel for about 0.25 miles up to Isla Grande Light Beacon, thence along the North shore of Isla Grande in a straight West-East direction for about 1 mile to the small craft anchorage "D" and the Yacht Club. This channel is bounded on the North margin by commercial piers and the Frontier Base berthing facilities and in the South by Isla Grande marginal wharf and the container terminal facilities.

MAX. SIZE: Cargo vessels 750 ft. in length call regularly at the Port of San Juan. Channel to tanker's berth, 36 ft.

TUGS: Crowley Towing & Transportation, tel: (809) 723-6164, telex: ITT 3450056, RCA 3252660, and McAllister Brothers, Inc., Puerto Rico Branch, tel: (809) 724-2360, Telex: Towco 3450469, operate a fleet of tugs. Service is available day and night, subject to previous arrangements.

Use of tugs compulsory for docking and undocking vessels 8,000 tons displacement and over unless equipped with bow or side thrusters.

HEALTH: Foodstuffs and plants not to be taken ashore.

RADIO: Radio communication to all points, including ships at sea, is available through commercial systems. Cables, telex via RCA Communications, Inc., a global service of Radio Corporation of America, tel. 723-6170, San Juan, Puerto Rico. Also, Western Union International, tel: 725-2121, ITT All American Cables & Radio, tel: 723-3732, and ITT World Communications, Inc., tel: 725-1515.

The Maritime Traffic Control Station "KRS – 893" at Fort San Cristobal in San Juan harbour is manned around the clock for radio-telephone communication with incoming and outgoing ships' traffic. Transmitting vessels can communicate with the station through 156.8 MHz (Channel 16) for call and reply and working Channel 14, 156.7 MHz.

BERTHING: Finger Piers No. 1 – 7 and the open bulkheads between them are located in the Old San Juan waterfront and Piers No. 8 to 14 are situated in the section known as Puerto de Tierra on the outskirts of downtown San Juan at the North margin of San Antonio Channel.

With the exception of Pier 15 and Frontier Base which are Navy property, all the piers including those in the Old San Juan waterfront and the new facilities (Terminals A, B, C, D, E, F, G, H, J, K, L, M and 1/2 N) located in the port zone known as Puerto Nuevo, on the South shore of San Juan, are Ports Authority owned installations. The utilisation of the berthing and other facilities by maritime operators is subject to prior approval by the Ports Authority.

The Port installations in San Juan Harbour aggregate in the neighbourhood of 22,700 lineal ft. of berthing space; 1,100,000 sq.ft. transit shed area: 1,500,000 sq.ft. open storage area and 105 acres of marshalling yards. The latter facilities are located mostly at the Puerto Nuevo port zone and Isla Grande.

All vessels must request and obtain well in advance before arrival a berthing permit from the Ports Authority.

Pier 1: North shore of the harbour, in the Old San Juan waterfront, East of Customs Building and next Westerly to the ferryboat landing. Modern twin berth, 770 ft. long, double deck, cruise and passenger vessels' terminal, pierside passenger and baggage gangways, elevators, parking and shopping. Water and light facilities available.

Ferry Terminal: Next Easterly to Pier 1. Ferry terminal for the San Juan-Catano ferry fleet.

Pier 3: North shore of the harbour, Old San Juan waterfront next Easterly to the ferry terminal. Tourist ships' terminal similar to Pier 1. Depths in the approaches and alongside tourist piers 35 ft.

Wharf No. 6: Marginal wharf, 1,300 ft. long, accommodates cruise and passenger vessels. Water and light facilities available.

Pier 7: Northerly continuation of Pier No. 6; 472 ft. long, 1 berth.

Pier 8: East of Pier 7, finger pier, 3 berths, general cargo pier. Transit shed area and other covered storage 171,000 sq.ft., open area 40,000 sq.ft. Water and light facilities available.

Pier 9: East of Pier 8. Finger pier, 3 berths, general cargo pier. Net storage space pier shed 133,738 sq.ft. open area 40,000 sq.ft. Water and light facilities available. South berth is a tug–barge terminal.

Pier 10: North shore of San Antonio Channel. East of Pier 9. Open Finger pier, 1 ship berth, tug and barge terminal. No transit shed space. Water, fuelling facilities and light available.

Wharf No. 11: East of Pier 10, marginal wharf, 1 berth, 580 ft. of bulkhead, general cargo pier. Transit shed area 100,000 sq.ft. ample back area. Water and light facilities available.

Wharf No. 12: An extension of Wharf No. 11 Bulkhead 550 ft. long, wide apron, 15,000 sq.ft. transit shed area, 37,000 sq.ft. open storage. General cargo wharves. Water and light facilities available.

Wharf No. 13: Prolongation of Wharf No. 12: 28,000 sq.ft. transit shed area, 55,000 ft. open storage area, general cargo wharf. Water and light facilities.

Pier 14: Extension of Piers 12–13 bulkhead; marginal wharf, general cargo pier, wide apron. 446 ft. long, 40,000 sq.ft. transit shed area, ample marshalling area. Water and light facilities available.

Frontier Base Pier: Navy facility operated by the Puerto Rico Ports Authority under contract. 2 berths for sea-going vessels. Depth alongside 30 ft. Principally used for berthing of cruise vessels and conventional ocean carriers handling open storage cargo.

Isla Grande Terminal: South shore of San Antonio Channel. General cargo wharf. 1,500 ft. long bulkhead. Wide aprons. Transit shed 32,000 sq.ft. with 240,000 sq.ft. of paved open area. Easterly section of bulkhead for shallow draft vessels.

Container Terminals:

(a) In Westerly section, Bulkhead wharf 1,320 ft. long. Wide apron, ample marshalling yards for trailers. 2×45 tons capacity container handling cranes. Paved marshalling area approximately 1,800,000 sq.ft.

(b) On the South shore, berthing facilities, 300 ft. bulkhead wharf with adjacent areas for TMT's roll-on/roll-off operations. Shoreside concrete ramp extending out to seaward. Tug-barge operation, loading and unloading through bow and side ramps, about 30 acres for trailers on exclusive lease basis. Max. draft approximately 18 ft.

(c) Trailer Marine Transport roll-on/roll-off three level ramp, barge-tug operation; loading and unloading at bow. Max. draft 18 ft.

The lands in Isla Grande and the conventional cargo handling terminal facilities are U.S. Navy property under lease and operated by the Puerto Rico Ports Authority. These facilities are in the process of being transferred to the ownership of the Puerto Rico Ports Authority.

Pier 15: Bulkhead Wharf and Finger Pier used by commercial vessels. Containerised and general cargo facilities. U.S. Navy installation under lease to Perez & Cia. from Puerto Rico.

Pier 16: Navy installation under lease. Graving and floating docks. See "Repairs".

Puerto Nuevo Docks: Terminals "A" and "B" marginal wharves 2×500 ft. berths. 102,000 sq.ft. transit shed area. 2 cargo sheds. 30 ft depth alongside. General cargo piers. Limited open storage area.

Trailership Terminals: 3 at Isla Grande port zone, above, 10 at Puerto Nuevo port zone. Berths C, E, F, G, H, J, K, L and M and West Side Army Terminal.

Berths "J" and "K": P.R. Maritime Shipping Authority Roll-on/Roll-off terminal. Shoreside movable ramps for side loading and unloading. Extra wide pier platform, ample trailer marshalling yards. 600 ft. long marginal wharf.

Berth "D": 100,000 sq. ft. of transit shed space for break-bulk operations and cargo stripping and distribution. Marginal wharf 40 ft. wide, 600 ft. long. Ample trailer marshalling yard. 30 ft. depth alongside, approximately.

Berths "E", "F", "G", "H", "J", "K", "L" (900 ft.), and *"M":* 600 ft. each, continuous bulkhead wharves, lift-on/lift-off operation. Max. draft alongside 30 ft. Extra wide pier platforms. Ample trailer marshalling yards. Five 25 ton capacity pierside cranes are installed at Berth "E" to "H".

Army Terminal Pier: Finger pier; 3 berths. Approximately 50,000 sq. ft. transit shed area. East and West berths 600 ft. each. North berth 200 ft. Under the control of the Ports Authority. West side, ramp for Roll-on/Roll-off operation.

Isla de Cabras Pier: Explosives handling pier at Isla de Cabras. Ports Authority property.

BULK HANDLING FACILITIES:

Bulk Grain Handling Facilities: Berthing clusters, silos and other shoreside installations for the receipt of shipments of bulk grains (Nebraska Mills, California Rice Mills, Red Seal, etc.).

STEVEDORES: Arranged by the ship's Agents.

MEDICAL: Medical attendance and services are available for seamen at the United States Public Health Service in San Juan (out-patients). The Ashford Memorial Community Hospital handles internal cases.

TANKERS: *Caribbean Oil Refinery:* Pile clusters berth for handling gasoline and fuel oils, max. permitted draft 33 ft.

Navy Oil Pier: South shore of the bay, next Westerly to Terminal "A", Puerto Nuevo. G.S.A. property leased to Texaco, Esso, Shell. Berthing facilities 350 ft. long and 24 ft. MLW. Bunkers available.

FRESH WATER: Most of the piers have adequate installations to supply water.

FUEL: Served in barges either alongside the vessel at the pier or at anchor. Other combustible liquids are delivered in tank trucks by Shell, Esso and Texaco.

SURVEYORS: American Bureau of Shipping – Mr. J. A. Schilling – Exclusive Surveyor.

Lloyd's Register of Shipping – Capt. Francis B. Crocco.
Det Norske Veritas
Germanischer Lloyd
Chinese Register of Shipping
Registro Italiano Navale
Nippon Kaiji Kyokai
Hellenic Register of Shipping
Panama Bureau of Shipping
} Captain Francis Crocco acts as non-exclusive surveyor.

REPAIRS: (a) Puerto Rico Drydock and Marine Terminals, Inc., a commercial ship repair and drydock facility at Pier 16. Graving Dock: 632 ft.×83 ft.×24 ft. – reinforced concrete. floating dock: 200 ft.×40 ft.×15 ft. – reinforced steel. Two 1,000 ft. piers, 1,000 ft. bulkhead. Three cranes: Mobile diesel electric crane – 25 ton lift; Diesel mobile crane 50 ton lift and locomotive crane – 8 ton lift.

(b) San Juan Shipyard & Marine, at Isla Grande, operates dry docking and ship repair facilities including a marine railway and a floating dock 203 ft. long, 44 ft. beam capable of taking vessels up to 1,400 tons.

(c) Vaello Shipyard, at La Puntilla, Catano operates a marine railway for dry-docking and repair of small vessels.

DRY DOCKS: Puerto Rico Drydock and Marine Terminals, Inc., Miraflores St., Stop 11, Tel: 723-6010.

Vaello Shipyard, Inc., 1 Barbosa St., Catano, Puerto Rico. Tel: 788-1011.

San Juan Shipyard, Isla Grande, San Juan, Puerto Rico. Tel: 725-2258, 725-2282.

GANGWAY/DECK WATCHMEN: Ship provides gangway watchmen.

OPENING/CLOSING HATCHES: By stevedores.

IDENTIFICATION CARDS: Required to go ashore.

DEVELOPMENTS: The new port sector, under development at Puerto Nuevo, now at an advanced stage, will ultimately comprise 15 berths, of which 12 are already in operation.

Port facilities used predominantly by trailerships are located towards the Southern sector of the bay. These are marginal wharf type facilities immediately adjacent to the Puerto Nuevo Channel. Presently, the Ports Authority has initiated the final stage for the development of some 108 acres of land that will be used as back-up lands in connection with the ocean-front operations of Wharves "J" to "N".

These lands have been in a process of stabilisation over the last years and presently a project is already under way to remove the sand surcharge deposited on them. The material being removed is being used as surcharge material for the stabilisation of other areas.

It is anticipated that the on-going surcharge removal project will be finished around mid-1984. The degree to which this stabilised terrain will be further developed will depend on their demand for use by maritime interests.

AUTHORITY: Puerto Rico Ports Authority, G.P.O.Box 2829, San Juan, Puerto Rico, 00936. *Tel:* Maritime Traffic Control Station, 722-1457, 724-1412; P.R. YABUCOA: 18.02 N. 65.48 W. (See Plan Book)

Man-made harbour and channel located at the S.E. corner of Puerto Rico. Berthing facilities for deep draft tankers and a barge dock. Port and shoreside installations for the receipt and shipment of fuel oils and liquid chemicals for Puerto Rico Sun Oil Company, a petro-chemical complex and barge dock and shoreside facilities for Union Carbide Graphite of Puerto Rico.

Facilities consist of the following: Ship channel 500 ft. wide, 40 ft. depth. Turning Basin. Dock and operating platform for a max. of 100,000 d.w.t. tank vessels. Mooring, breasting and turning dolphins. Catwalks. Additional dock appurtenances (fire-fighting equipment, protective jetty, etc.). Pilot services available day and night and tugboats available.

Port operations under the control of the Captain of the Port.

For Customs service, Port Yabucoa is under the jurisdiction of the Fajardo Custom House.

AUTHORITY: Puerto Rico Ports Authority. See "San Juan".

Qatar

DOHA: 25.17 N. 51.32 E.

DOCUMENTS:

8 copies of the Unfreighted Manifest.
2 copies of the Freighted Manifest.
2 copies of the Hatch List.
2 copies of the Stowage Plan.
2 copies of the Dangerous/Hazardous Cargo List.
1 set of Bill of Lading.
1 set of Crew List.
A list of Food Stuff.
A list of Insecticides and any Poisonous Cargo.

Agents:
1 copy of the Arrival Report (Supplied by the Agent on boarding).
1 copy of the Crew List.
1 copy of the International Declaration of Health.
1 copy of the Passenger List (if applicable).

Port Health:
1 copy of Crew List.
1 copy of Dates and Types of Inoculations.
1 copy of the International Declaration of Health.

Immigration:
4 copies of Lists of Passengers Landing (if applicable).

Customs:
Bonded Store List (Bond will be sealed but issues are available).
Port Clearance Certificate should be procured before the vessel sails.

PILOTAGE: Compulsory pilotage for all vessels of 14 ft. draft or more. Naval vessels exempted. Application for a Pilot should be made to the "Doha Port Control" through VHF (Channel 16), 24 hours prior to the arrival of the vessel at the pilot station (via Bahrain Radio).

Pilot station keeps a VHF watch 24 hours a day on Channel 16. Call sign Doha Port. Similar watch kept on R/T 2182 kHz.

Pilot boat proceeds to the vicinity of the Doha Light Vessel, position Lat. 25° 16′ 08″ N., Long. 51° 41′ 05″ E. when the Pilot is required. Pilot launches are painted white. When the vessel is underway the Pilot requires a pilot ladder complete with manropes. When the sea is calm and the vessel is at anchor the accommodation ladder may be used.

ANCHORAGES: Near the Doha Light Vessel and Southerly from it only. Minimum depth of water 5 fathoms.

RESTRICTIONS: Depth of water in entrance is 27 ft. plus tide and the minimum depth of water required under the keel for manoeuvring in the channel is 3 ft.

MAX. SIZE: Max. length 620 ft., max. breadth 89 ft., max. draft 28 ft. 6 in. on favourable high tide.

HEALTH: The International Flag signals for Pratique must be flown and remain up until the vessel is cleared by the Port Health Authorities. A Port Health Official will board the vessel in the anchorage or at the Deep Water Jetty when the vessel is alongside. There is no Automatic or Radio Pratique available.

RADIO: ETA and Agent's messages should be routed through Bahrain Radio. Radio-telephone communications through Doha Port signal station. Calling and listening 2182 kHz. Working frequencies, 2638 kHz, 2738 kHz, 2570 kHz.

TUGS: 7 Government tugs are normally available to assist in berthing operations.

BERTHING:

5 Berths – Total length 956 m. (Deep Water Berths); depth alongside 9.1 m.

4 Berths – Total length 893 m. (Shallow Water Berths); depth alongside 7.5 m.

Outer and inner dredged approach channels, 8.2 m. and 9.1 m. depth (C.D.) Wharves for smaller craft: West Inner Wharf 207 m., Collins Jetty 135 m.; Country Craft Jetty 287 m.; Fish Factory Wharf 60 m. Depths 2.5 m. to 6.0 m. (C.D.)

Equipment: 2×70 ton, 4×40 ton, 3×30 ton, 3×20 ton, 2 straddle carriers, 2 container cranes and 122 trailers.

Transit storage areas at landward end of approach causeway with extensive paved open storage and transit sheds giving 16,722 sq.m. cover.

New transit storage area on extended main quay with extensive paved open storage, 5 transit sheds giving 30,000 sq.m. cover completed. Construction of 500 ton cold storage completed. Control tower for Doha Port also proposed.

Normally berthing and unberthing to and from the deep water jetty is with certain reservations:

(*a*) Draft and trim of vessel.
(*b*) Height of tide.
(*c*) Visibility from Navigation Bridge.
(*d*) Prevailing weather conditions.

The duty Pilot has the option to berth or unberth a vessel at his discretion after consultation with the Senior Pilot, when the above mentioned conditions are unfavourable.

STEVEDORES: ETA advice is required on the number of gangs workable. Advance notice is required for any heavy lifts (say in excess of 10 tons) and the consignee's name if possible as special arrangements have to be made for handling. Average discharge rate is 75 tons per hook per day.

MEDICAL: Unless an emergency no advance notice is required. Hospital facilities do exist and a doctor will visit on request. Current Vaccination and Cholera Certificates are required.

DENSITY: The density of the water is salt (1025) at all states of the tide.

FRESH WATER: Fresh water is available at the anchorage and when alongside the jetty and is supplied by tankers.

CARGO GEAR: No additional requirements apart from those required by International Law.

IDENTIFICATION CARDS: Discharge Books or Passports are required to be handed to the Police before any crew member may proceed ashore. See "Shipmaster's Report".

FUEL: Bunkers available from Qatar National Tanker and Bunker, Doha.

Actual Bunkering Locations:
Doha Port Harbour
Pilot Station Doha
Umm Said Harbour
Pilot Station Umm Said
Inner Anchorage
Outer Anchorage
Pilot Station – Halul Island

Grades Available: IFO 180, M.D.O., IFO other than 180 with 14 days' pre-notice, upon request.

Supply Method:
Barge QNB.1 – 2 products – 650 tonnes.
Tanker ZOR – 2 products – 5,300 tonnes. Equipped with 3 Yokohama fenders – 1.7 m. diameter × 4 m. on port side.

Pumping Rates: Barge: 2 pumps. 100 tonnes per hour. ZOR: 3 pumps. 750 tonnes per hour.

Operation: 24 hours per day – 7 days per week.

GANGWAY/DECK WATCHMEN: The Public Security Department (Police) post a guard at each gangway, but it is advisable that the ship also supplies a watchman. Before landing *every* crew member must lodge his passport or seamen's identity card with the guard when alongside the jetty and at the dock Police Station when at the anchorage.

OPENING/CLOSING HATCHES: This work may be carried out by crew or stevedores, but usually by the latter.

CUSTOMS ALLOWANCES: Qatar is "dry" and no official allowance is made. The bond is sealed on the ship's arrival.

CONSULS: The following countries maintain embassies in Qatar:

Bangladesh
Egypt
France
Gabon
Germany (F.R.)
Great Britain
India
Iran
Iraq
Japan
Jordan
Korea
Kuwait
Lebanon
Libya
Mauritania
Morocco
Oman
Pakistan
Saudi Arabia
Somalia
Sudan
Syria
Tunisia
U.S.A.
Yemen

REPAIRS: All kinds of repairs can be carried out. Metal-locking, bottom brushing and underwater welding.

REPATRIATION: Crew changes can be carried out. The Agents will need to know the names, discharge book or passport numbers and necessary information of dates, etc. well in advance for the Authorities. Repatriation is normally by air. Crew joining must have Seaman's Book.

AIRPORT: It is about 3 miles from the port to the airport. There are regular flights to Europe, U.K. and India by British Airways, M.E.A., Air India, P.I.A., Gulf Air, etc.

TIME: The standard time in Qatar is GMT plus 3 hours.

HOLIDAYS: The holidays in Qatar are usually religious and therefore fall on movable dates. As far as shipping is concerned there are only 2 days when work is not possible under any circumstances, Idd Al Fitr and Idd Al Adna.

POLICE/AMBULANCE/FIRE: Dial 999 and ask for service required.

TELEPHONES: Telephone available at the new Jetty. No. 414865.

GENERAL: Particular attention must be paid to:

(1)The Qatari flag must be flown at all times at the fore mast.

(2) Liquor is not allowed ashore and it is a serious offence to offer alcohol to a Qatari.

(3) Smoking is not permitted in any of the port areas.

SHORE LEAVE: Shore leave is permitted after the Immigration Authorities have cleared the ship and given permission, in writing, on the Crew List. Seamens' documents or passports must be deposited with the police at the gangway and retrieved on returning aboard.

SHIPMASTER'S REPORT: November 1984.

The Public Security Department warned me that the crew are not allowed to take a walk around the jetty when it is a holiday or the stevedores are not working.

Therefore, the crew must go directly outside the harbour limits or they stay on board.

The Security Department did not post a guard at the gangway but every crew member before landing must present his passport or Seamen's Identity Book to the Immigration and they issue a shore permit that will be shown to the guard together with the Seamen's Identity Book.

The guard will keep the Seamen's Identity Book and the crew can cross to the Harbour Gate with the Shore Permit.

When the crew come back to the ship they collect their Seaman's Identity Books at the Gate but can keep the Shore Permit for the next time they go ashore.

Before the ship sails all the issued shore permits must be returned to Immigration.

AUTHORITY: Department of Ports, Ministry of Communications & Transport, P.O.Box 313, Doha, Qatar. *Tel:* 413322 PABX. 414626 *Telex:* 4378 Mawani DH. *Cables:* "Mawani". *Contact:* The Harbour Master, Tel: 414287. A. Jaber Muftah, Director of Ports.

AGENT: Qatar National Navigation & Transport Co. Ltd., P.O.Box - 153, Doha. Telex: 4206 Melaha Dh. Cable: "Navigation" Doha Telephone: 321175/9, 23684, 21213.

HALUL ISLAND: 25.40 N. 52.25 E.

Halul Terminal S.B.M. **(See Plan Book)**

LOCATION: Halul Island (Position Lat. 25° 40.3′ N., Long. 52° 24.6′ E.) is part of the State of Qatar. Doha, the capital, is situated on the Eastern side of the country.

Halul Island is 52 miles in a N.E'ly direction from Doha. It serves as the export terminal for Qatar Marine Crude which is produced from the offshore oilfields of Idd El-Shargi, Maydan Mahzam, and Bul Hanine. The Halul Terminal is operated by Qatar General Petroleum Corporation (Offshore Operations).

Halul Island: The island is roughly circular in shape with a radius of approximately half a mile. The island is hilly, rising to an elevation of 202 ft. (61.6 m.). (Charts: U.S. Government charts: 62400, 62397, 62402, British Admiralty charts: 2886, 3950, 3517, 3953).

The island is fringed by a reef which in places extends about 3 cables offshore.

The island is barren, with a number of oil storage tanks, a small industrial complex and personnel living quarters. There is a harbour on the Southern side of the island which is only for use of small craft.

DOCUMENTS: Following papers are required on arrival:

Notice of Readiness.
2 Crew Lists.
2 Health Declarations.
1 Latest Light Dues Certificate.

The Berthing Officer acts as ship's Agent and on behalf of National Customs and Immigration Authorities.

PILOTAGE: A Pilot is at all times to be considered as an advisor to the Master. The latter shall remain solely responsible for the safety of his vessel.

Boarding: When VHF contact is made with Halul Control the Pilot will advise the Master whether he should proceed to anchor or whether a Pilot will board the vessel immediately.

A Pilot will board the vessel about 2 miles East of Halul Island. The vessel is expected to make (if necessary) a good lee for the pilot launch.

Ship Deficiencies: The Master should inform the Pilot of any deficiencies on his vessel and any unusual characteristics pertaining to his vessel e.g. lack of astern power, time to change from ahead to astern, etc.

Pilot Signals: The vessel must display the proper signals prior to and subsequent to the boarding of a Pilot.

Pilot Ladder: The vessel shall rig on the starboard side, a pilot ladder which must conform in construction to all recognised international standards for pilot ladders. On vessels over 50,000 d.w.t. there shall be rigged either a mechanical pilot hoist or a combination of pilot ladder and accommodation ladder.

In the latter case the Pilot must not be expected to climb more than 9 m. on the pilot ladder.

There must be provision for the Pilot to pass safely from the head of the ladder to the deck of the ship.

Any such pilot ladder must be rigged well clear of all overboard discharges. 2 manropes are to be fitted, one on each side of the ladder, together with a safety line if conditions warrant such. At night both the ladder and the point of access must be properly illuminated.

A responsible officer must be in attendance when shore personnel are boarding/disembarking.

Note: To prevent unauthorised persons from boarding the tanker unobserved, particularly at night, the pilot/accommodation ladder must be retrieved after the Pilot and his assistant have boarded.

NAVIGATION: A light is exhibited at an elevation of 220 ft. (67.1 m.) from a white concrete tower with a black top, 16 ft. (4.9 m.) in height, situated on the summit of Jazirat Halul. Light characteristic is Fl.W.R. 12 secs. W 19M R 9M. Sectors W 030° – 300° (270°) and R 300° – 030° (90°) over pipe-line area. On the Western and Eastern arms of the small boat harbour there are floodlights illuminating the breakwaters. There are various radio masts with red lights, the highest being 365 ft. above sea level. On each of the SBM loading points there is a light morse "U" every 20 secs.

Deepwater Channel: To the East of Halul there are 2 buoys marking a deepwater channel which is the recommended departure channel for all vessels.

H-1 Green conical – Quick flash green.
H-2 Red – Quick flash red.

Prohibited Navigation: The offshore oilfields are prohibited for navigation because of the numerous production stations, drilling rigs, wellhead jackets and oil and gas pipe-lines.

The location of the 3 oilfields are:–

1. Idd El-Shargi with centre Lat. 25° 28.9′ N., Long. 52° 22.6′ E. radius 2 miles.
2. Maydan Mahzam with centre Lat. 25° 36.0′ N., Long. 52° 33.1′ E. radius 2 miles.
3. Bul Hanine with centre Lat. 25° 25.5′ N., Long. 52° 44.0′ E. radius 5 miles.

Navigational Warning: Masters should be aware, when crossing any pipe-line, that many pipe-lines are not under the seabed and that the charted water depth may be reduced by at least 2 m.

It is strongly recommended that vessels do not pass South of Halul when making passage to/from Umm Said or Doha.

ANCHORAGES: Vessels are advised to anchor in an area centred on a position from Halul Island light 087° × 2.5 miles with radius 6 cables. Water depth is 70 ft. – 80 ft. and the bottom is sand.

Prohibited Anchorage: The area covered by the red sector of the Halul Island light is to be taken as a prohibited anchorage. This is due to the number of oil pipe-lines within this area.

MAX. SIZE: SBM No. 1 up to 22 m. draft. (In certain conditions of weather and tide a maximum draft of 25 m. can be accepted). SBM No. 2 up to 29 m. draft. Displacement limit of 640,000 tons for both SBMs.

HEALTH: See "Medical".

RADIO: *General:* QGPC (Offshore) has its own radio station in Doha call sign Alpha Seven Sierra (A7S). Cable address: Qatoff Doha PDS/4. Telex: Qatoff 4201 DH PDS/4.

A sub-station is also maintained on Halul Island (call sign "Halul Control").

A7S maintains 24 hour watch on 500 kHz while Halul Control maintains a continuous radio watch on VHF Channels 6 and 16.

Vessels bound for Halul should contact "Halul Control" approximately 6 hours prior to arrival on VHF Channel 6.

Long distance communication (initial ETAs, etc.) will normally be routed via Bahrain Radio. However, the 72 hour arrival confirmation and any other queries to the Agent can be sent direct to A7S.

Advance Notice of Arrival: A vessel must advise:

(a) Its ETA at Halul at least 72 hours before arrival.
(b) Confirmation of any amendment to its ETA at Halul 24 hours before arrival at Halul.
(c) On arrival at Halul, the exact time of arrival at Halul.

Note: Any failure to observe the laid down sequence of ETA advice may delay the loading of the vessel at Halul.

Vessels should contact Halul Control on VHF Channel 6 approximately 6 hours prior to arrival at Halul or as soon as VHF contact can be made.

Ships Loading at other Gulf Ports: Masters are advised that when they commence loading at the last port before Halul they should instruct their Agent to send a corrected ETA for Halul to QGPC (Offshore Operations).

Standard Cable: On receipt of the 72 hours ETA advice QGPC (Offshore Operations) will transmit via Bahrain Radio and/or A7S Doha a standard cable containing details of cargo, quantities, etc. (See below.)

If any vessel has any queries with regards to this cable or if the vessel can not comply with the requirements of the cable the Master should contact QGPC (Offshore Operations) immediately.

Halul Terminal Standard Cable via A7S or Bahrain Radio
Ship's ETA..............................
To: Master.................................... Call Sign..............................

We confirm your vessel to load approximately .... bbls Qatar Marine Crude for discharge...........loading temperature .... Degrees F, API..

Vessel to berth at SBM-1 or 2 approximately 3 miles, 130° off Halul Lighthouse.

Terminal will provide 2 mooring lines and you are requested to have 2 messengers ready forward.

Ship's **starboard** manifold and derricks/cranes should be ready to connect 2×16 in. hoses at SBM-1 and at SBM-2. You are requested to have 16 in./20 in. reducers ready. Derrick/crane should be ready to lift 10 tons.

Ship's crew guided by our foreman are required to moor vessel and connect hoses. When Berthing Master, for whom please make a good lee, has boarded, crew should be ready to immediately lift on board mooring gear from the pilot launch on their starboard side.

Please reconfirm final ETA when within range of Halul Control Channel 6. Information for berthing and hose conections will be given by Halul Control prior to arrival. Berthing Master will board 2 miles East of Halul. Please acknowledge. Confirm Derrick/crane equipment suitable. Advise deballasting time, maximum loading rate available, your draft on arrival and on sailing from the SBMs and if patented bow chain stoppers available, indicate type.

Qatoff Doha.

VHF: A Company VHF station on Halul Island, call sign "Halul Control" maintains a continuous watch on Channels 16 and 6 (Channel 6 being the working frequency). The station has a range of approximately 50 miles and incoming tankers should establish communications with this station when within range.

Ship to shore communication during loading is by portable VHF Radio telephone with emergency shutdown system, provided by the terminal.

TUGS: Not available.

BERTHING: Approach is from the open sea, passing to the Eastwards of Halul. There are 2 single buoy moorings. No. 1 SBM in position Lat. 25° 38.7′ N., Long. 52° 26.4′ E. This berth will primarily accommodate vessels up to 640,000 tons displacement. No. 2 SBM in position Lat. 25° 38′ 36″ N., Long. 52° 27′ 35″ E. This berth will accommodate vessels with up to a draft of 29 m. In both berths, mooring lines from the buoys are secured on the forecastle head using equipment provided by the terminal or using ship's bow chain stoppers if fitted. A suitable messenger rope should be ready for use. No moorings are used aft. The Berthing Master will advise in detail the mooring procedure.

	SBM 1	*SBM 2*
Position from Halul Lt.	138°×2.25 miles	126°×3.25 miles
Loading pipe-line	30 in.	48 in.
Submarine hoses	2×16 in.	2×24 in.
Floating hoses	2×16 in.	1×20 in. with 16 in. tail 1×24 in. with 16 in. tail
Length of hoses	1×960 ft. 1×990 ft.	1×1020 ft. 1×1000 ft.
Manifold Connection	2×16 in.	2×16 in.
Mooring Ropes	2×15 in. braided nylon grommets	2×15 in. braided nylon grommets
Water depth	105 ft. (32 m.)	120 ft. (36.5 m.)
Max. draft	72 ft. (22 m.*)	95 ft. (29.0 m.)
Loading rates	7,000 cu.m./hr.	12,000 cu.m./hr.

*Also see "Max Size".

HOSE CONNECTION:

Connection Position: Hoses will be connected/disconnected on starboard side by ship's crew. The Operations Assistant will give guidance to the crew as required.

Connection Sequence: The first hose will be the tanker rail hose string. It must be connected to the forward of the 2 manifold connections.

Hose Sizes: Tanker rail hoses on both SBMs are 2×16 in. diameter.

Ship Lifting Capacity: To lift these hoses a derrick or crane with a SWL of 10 tons minimum is required.

Connection: The hoses shall be bolted to the ship's manifold with a bolt in every other hole. When the hoses are connected the weight of each hose shall be taken by hanging a strop (supplied by shore) from the ship's derrick or crane.

LOADING:

Load on Top: If load on top has been practiced prior to arriving at Halul the Berthing Officer will measure the quantity of residue in the slop tank.

Commencement of Loading: Upon request from the ship's duty officer the Berthing Officer will instruct the shore to commence loading. Loading commences by gravity and when the ship is satisfied that the cargo is flowing into the ship, the shore will be instructed to start pumping.

Loading Rates: SBM 1 maximum loading rate is 7,000 cu.m. using diesel pumps.

SBM 2 maximum loading rate is 12,000 cu.m. using either turbine pumps or a combination of turbine and diesel pumps.

Quantity Checks: During loading, ship and shore should check the quantity of cargo loaded every hour and compare figures. If there is a large discrepancy, the quantities should be re-checked and if the difference remains, with no explanation from the ship, then an inspection of the pipe-line and hose systems may be necessary.

Valve Operation and Surge Pressures: During full speed loading, the ship should inform the Berthing Officer if any valve manipulation, which is likely to restrict the flow of oil, is going to take place. Ships should be aware of the potential dangers of creating a pressure surge by closing valves too quickly and/or restricting the flow of oil by other means, i.e. change of loading lines.

The Master will be held responsible for any apparent or subsequently apparent damage to the shore pipe-line and hose system, resulting from surge pressure(s) caused by failure of the ship's pipe-line/valve system or the mismanipulation of the ship's valves.

A pressure recorder will be installed at the ship's manifold for continuous monitoring of pipe-line pressures.

Completion of Cargo Operations: Final topping up operations should only be conducted in the presence of the Berthing Officer in the cargo control centre. The ship should give the shore 1 hour's notice of completion of cargo followed by 15 minutes' notice.

Loading can be completed by gravity which gives a rate of about 1,500 t.p.h.

Communications: Communication between ship and shore is by VHF radio (supplied by shore) which will be positioned in the cargo control room. This radio will have an emergency stop frequency. In the event of an emergency this facility can be used to stop the loading operation at the shore terminal.

Precautions: A watch must be maintained on the radio link with the shore. Connections at the manifold must also be watched continuously for any signs of leaks, ruptures, etc.

MOORING:

Preparations: When the Pilot has boarded, the ship's crew is required to use ship's derrick or crane over the side to lift the mooring and hose connecting equipment on board from the pilot/mooring launch. An operation is assistant will board with the Pilot. He will give guidance to the ship's crew on mooring and also on connecting the hoses.

Briefing: Prior to approaching the SBM the Master, Pilot and Officer delegated to duty on the forecastle should meet and the Pilot will brief all concerned on the mooring operation.

Mooring Operation: On approaching the SBM the ship should make ready a rope messenger suitable for passing over the stem of the tanker to the mooring launch. This rope will be joined to a 10 in. pick-up rope (500 ft.) which is in turn connected to a 50 ft. pick-up wire and then the chafe chain. Each chafe chain is connected to a 15 in. grommet of braided nylon.

The starboard mooring is always picked up first.

If the ship is not fitted with patent stoppers capable of accepting the chafe chain direct, the shore will supply two snotters. These snotters are 15 in. nylon, 40 ft. long with 5 ft. soft eyes in each end. Both eyes are placed on bitts and then thus created bight shackled to the monkey face in the chafe chain.

Safe practices: Masters and crew should be aware at all times of safe working practices while mooring the ship. Ideally the chafe chains should come through the central Panama Lead. If this is not possible, each mooring should be taken on board at points equidistant from and on either side of the centre line, as close together as possible.

SBM Security: From the time of completion of mooring, the ship shall station a lookout on the forecastle. This lookout must inform the Berthing Officer in the event that the ship is likely to come into contact with the SBM.

Immobilisation of Engines: Under no circumstances should the ship's engine be immobilised, but should be ready to manoeuvre at all times.

Maximum notice will, however, be given where conditions warrant the use of the main engine.

CARGO QUANTITIES/DOCUMENTATION:

Ullaging: On completion of loading the ship must ullage all tanks into which cargo has been received. The Master is required to complete an ullage report provided by the shore.

Early Departure Procedure: In order to avoid delays to ships, Halul Terminal follows the "Early Departure Procedure" for the completion of cargo documents. When cargo loading is completed the Berthing Officer will receive the departure papers from the shore. These will include documents completed as far as possible but without cargo quantities. The Master should sign these forms and retain on board copies of Bills of Lading for Master and consignee and any other completed documents. Final cargo figures will be transmitted by radio to the ship. The Master should insert these quantities in the various incompleted forms on board.

Departure from Halul Island will be dependant on ship/shore agreement on the preliminary cargo quantities.

Forms to be signed: The following is a list of forms which have to be completed for each parcel of cargo and received by the Master. (Not all documents are signed by the Master.)

Bill of Lading.
Cargo Maniest.
Certificate of Quantity and Quality.
Discharge Certificate.
Master's Receipt of Documents.
Arrival Report.
Disbursement Memo.
Certificate of Origin.
Ullage Report.
Customs Export Bill.
Customs Clearance.
Port Timesheet.

Discharge Certificate: We stress the importance of the Discharge Certificate placed on board at the completion of loading. It is absolutely essential that the Discharge Certificate should be completed in duplicate in respect of every discharge whether for entire or part cargo.

The Discharge Certificates will be accompanied by a letter of explanation giving guidance on the processing of these certificates and the attendant correspondence required.

DEPARTURE: *Unmooring:* When all ship's papers have been completed and the hoses disconnected the vessel is ready to sail. The port mooring should be released first. The mooring should be lowered to sea level and the pick-up rope paid out slowly to allow the mooring launch to receive the pick-up rope on board. The starboard mooring will then be released.

Pilot Disembarkation: When the vessel has been unberthed the Pilot will disembark to the East of the two SBMs and well clear of the submarine pipe-line area. Laden vessels should under no circumstances navigate in the pipe-line area to the South of Halul Island.

Final Figures: Final shore cargo figures will be transmitted to ship by VHF Channel 6 if the vessel has just left the berth. If the figures are not available at this time, they will be relayed via Bahrain Radio or A7S in Doha.

BALLAST:

Maximum Freeboard: The SBM loading points off Halul Island can be considered exposed location berths. To ensure that a vessel is always safely moored it may be necessary in times of marginal weather to maintain a certain maximum freeboard in order to reduce chances of shock loads on the moorings. The Pilot will advise the Master accordingly.

Deballasting: Vessels whose pipe-line/pump arrangements permit simultaneous loading and discharging of cargo tank ballast are expected to do so in order to maintain freeboard as low as possible.

The same applies to vessels with segregated ballast systems.

All other vessels will normally deballast prior to loading, however in marginal weather conditions such vessels may be asked to load part cargo prior to deballasting.

Dirty Ballast Facilities: No dirty ballast facilities available. All vessels must arrive with clean ballast.

DENSITY: At berth, 1028/1030 (approximately).

CARGO: Flash point below 32° Fahrenheit.

H_2S Content in Halul Crude: H_2S. Hydrogen sulphide has a disagreeable odour characteristic of rotten eggs which quickly deadens the sense of smell so that a dangerous concentration may be present which cannot be detected by odour.

If exposure to hazardous concentrations of this gas is likely to occur, appropriate safety precautions should be taken. Suitable respiratory protection should be available during ullaging and sampling.

The TLV is given as 10 p.p.m. but concentrations in enclosed spaces should be reduced as far below this level as practicable and if men are to work without breathing apparatus, a nil concentration should be achieved before entry is permitted and effective ventilation should be maintained.

On tankers regularly committed to the carriage of sour crude, H_2S gas indicators should be provided.

It is important to realise that the concentration of H_2S can be measured and expressed in two different ways:

The p.p.m. in the liquid, by weight;
The p.p.m. in the air, by volume.

Producing and Processing Departments at terminal often use the liquid measure for H_2S content, and this could be confusing to tanker officers who usually think of H_2S as expressed in air volume measure. There can be a vast difference between the two measures. The measure in air is higher and can be very much higher. For example, chemists have measured a concentration of 7,000 p.p.m. (deadly) in the vapour stream coming out of ullage opening when a tank is being topped off with a crude oil containing only 70 p.p.m. H_2S in the liquid. Therefore, it is of vital importance to appreciate that a sour crude can release a lethal concentration of H_2S into the air.

The following guide to the effects on exposed persons of various atmospheric concentrations of H_2S gives some indication of its dangers:

Measured in air by volume	
50 to 100 p.p.m.	Eye and respiratory tract irritation after exposure of 1 hour.
200 to 300 p.p.m.	Marked eye and respiratory tract irritation after exposure of 1 hour.
500 to 700 p.p.m.	Dizziness, headache, nausea, etc., within 15 minutes; loss of consciousness and possible death after 30 to 60 minutes exposure.
700 to 900 p.p.m.	Rapidly produces unconsciousness and death occurs a few minutes later.
1000 to 2000 p.p.m.	Death is apparently instantaneous.

Apparent death from H_2S is not irreversible as prompt and efficient artificial respiration may restore life.

The terminal should advise the Master if the cargo to be loaded contains H_2S in concentrations which cause the gases vented during loading to be hazardous if inhaled. When handling cargo with noticeable H_2S content or when ballasting after discharge of such cargo, it is recommended that the following precautions should be taken.

The officer supervising the operations should keep a sharp watch on personnel for signs of fatigue or distress.

Lifelines, breathing apparatus and resuscitator should be readily available.

Loading through the pump room should be avoided where possible to reduce the possibility of H_2S contamination of the pump room atmosphere.

Gas should be vented through the cargo tank venting system and, if open ullaging is necessary, the ullage plugs should be kept open only for a minimum period of time.

When ullaging tanks, personnel should work in pairs and stand at right angles to the wind direction in relation to the ullage opening.

Personnel should not enter a pump room without first starting the ventilation, checking that there is no gas present, and without someone else standing by. If any gas concentration is recorded, a self-contained breathing apparatus should be worn.

Other spaces into which H_2S may have been drawn should be ventilated and checked before entry.

Persons overcome by H_2S should be moved to a gas free area immediately and artificial respiration should be administered at once.

Gas tests should be made on deck and in accommodation at regular intervals and particularly during the topping-off periods. If concentrations exceed 10 p.p.m. inside the accommodation or 50 p.p.m. on deck more than 10 ft. from a gas outlet, the loading rate should be adjusted and if this does not result in a decrease of the gas concentration, loading should be stopped until conditions have improved or other suitable measures are taken.

During discharge, the pump room bilges should be kept dry.

During loading or ballasting operations, conspicuous notices warning of potential danger should be posted on deck and at pump room entrance, and at the entrance to any other space which could be affected.

MEDICAL: There is no doctor on Halul Island. If there is any sickness on board, details should be included in the vessel's ETA message.

In emergencies the services or advice of the QGPC Medical Officer in Doha may be obtained. If the doctor or patient has to be flown from Doha the vessel concerned will be charged for the helicopter hire and the services of the doctor.

TIME: Local time is GMT plus 3 hours.

FRESH WATER: Not available.

FUEL: Various grades of bunkers available, diesel and fuel, ex barge or lighters at Halul anchorage provided minimum 7 days' prior notice given. Also see "Doha".

CONSULS: The following countries maintain Embassies in Qatar.

Bangladesh
Egypt
France
Gabon
Germany (Fed. Rep.)
India
Iran
Iraq
Japan
Jordan
Korea (South)
Kuwait
Lebanon
Libya
Mauritania
Morocco
Oman
Pakistan
Saudi Arabia
Somalia
Sudan
Syria
Tunisia
United Kingdom
U.S.A.
Yemen (Arab Rep.)

REPAIRS: Not available.

SURVEYORS: (1) Watt & Grey, Abu Dhabi. Saybolt, Kuwait.
(2) Lloyd's Register in Bahrain.

TANK CLEANING: No facilities available and ships must arrive with clean ballast, lines and pumps.

SAFETY: Vessels must at all times comply with safety regulations as detailed in the ISGOTT (International Safety Guide for Oil Tanker and Terminals) published jointly by the International Chamber of Shipping and the Oil Companies International Marine Forum.

Safety Check List: This check list must be completed prior to loading. The Berthing Master and the Master of the vessel or a responsible officer will jointly carry out the safety inspection.

Cessation of Loading: If during loading operations, the Berthing Officer becomes aware of any unsafe working practice or safety hazard, loading will cease until such time when the safety hazard has been removed. All delays thus incurred will be for vessel's account.

Hydrogen Sulphide: It is brought to the ship's attention that Qatar marine crude contains Hydrogen Sulphide (H_2S). See "Cargo".

Emergency Towing Wire: Whilst moored to the SBMs all vessels must have Emergency Towing Wires ready, both fore and aft. The total length of the towlines must not be less than 100 m. when paid out. The eyes of the wires must be kept hanging just above sea level, ready for immediate pick-up by a tug/supply boat.

Tanker Emergency: In case of an emergency on board the Tanker the Berthing Officer must immediately be informed. He will act as liaison between ship and shore.

If for whatever reason the Berthing Officer is incapacitated the Master/Officer on duty must inform Halul Control, giving brief details of the type of the emergency via the portable VHF radio (walkie-talkie) provided by shore.

In case of fire, explosion, etc., cargo must be stopped immediately by requesting "Emergency Stop" via the walkie-talkie and/or via the emergency stop frequency (push-button) provided in the radio.

The Master may also call the QGPC radio station in Doha (call sign "Alfa Seven Sierra") on the ship's VHF Channel 16, giving details of the emergency and the kind of assistance required, if necessary.

CUSTOMS: Trading in liquor is *strictly* prohibited and no alcoholic drink should be offered to Arab nationals.

REPATRIATION: Changes of personnel can be carried out at Halul Island. This can only be carried out on a limited scale due to scarcity of accommodation and transport. For crew joining a ship, Owners should notify the Agency, at least 48 hours in advance of arrival in Doha, the details of the personnel and the arriving flight. Crew leaving a ship at Halul can be arranged but advance notice is required.

SHORE LEAVE: Not permitted.

GENERAL:

Meteorological Service: A daily 24 hour weather forecast is issued at 0930 L.T. This forecast covers the area of Halul Island and the offshore oilfields. Details of this forecast can be obtained from Halul Control or, if vessel is at one of the SBMs, from the Berthing Officer on board the vessel.

Tidal Information: Halul Island can be found in British Admiralty tide tables Volume 2. Halul is a secondary port based on the standard port of Shatt al-Arab.

Climatic Conditions: Masters and crews should be aware of the extreme climatic conditions which exist in the Halul area during the months of June through October. Everybody should be made aware of the dangers of heat and sun stroke.

Stores and Laundry: Not available at Halul Island.

Courtesy Flag: The Qatar National flag should be flown during daylight hours when a vessel is at Halul Island.

Mail Service: There is an excellent mail service from Qatar to all parts of the world. Qatar stamps must be used on all mail sent through the national post office.

Blue air letter forms are not accepted.

Mail will be handled after completion of the tanker mailing request.

AUTHORITY: Qatar General Petroleum Company (Offshore Operations) – Marine Department, P.O.B. 47, Doha, Qatar. *Tel:* 332666. *Telex:* 4201 Qatoff Doha. *Cables:* Qatoff, Doha. *Contact:* V. Austel, Marine Superintendent.

Agency: C/o Tanker Agency Department, QGPC (Offshore Operations) PDS/4. P.O.Box 47, Doha – Qatar, (Arabian Gulf). Tel: 332620. Telex: 4201.

UMM SAID: 24.54 N. 51.34 E. (See Plan Book)

DOCUMENTS: See "Doha".

BUOYED CHANNEL: All vessels wishing to navigate the Umm Said Buoyed Channel must obtain prior clearance from Umm Said Control who can be contacted on VHF Channels 14 or 16 or by Telex via Bahrain Radio, addressed to Petroqat Umm Said. This precaution is essential to avoid unexpected encounters with deep-laden oil tankers.

Approach to Umm Said Terminal: With Halul Island peak astern steer 235° for a distance of 31.5 miles to (K) Kareinein Light Buoy in position Lat. 25° 24′ 18″ N., Long. 51° 56′ 16.4″ E., thence 226°, 12 miles to (M) Mishut Light Buoy in position Lat. 25° 15′ 51″ N., Long. 51° 46′ 43.4″ E.

From Mishut Light Buoy steer 214° for a distance of 8 miles to (W) Wakrah Light Buoy, leaving this light buoy on the port hand.

From Wakrah Light Buoy steer 180° for a distance of 6.4 miles, to (H) Hul Light Buoy leaving this buoy to port.

From a position of 2 cables West of (H) Hul Light Buoy, steer 164° for a distance of 1.9 miles to pass between Nos. 1 and 2 Outer Channel Buoys, thence 158° 30′, 0.3 miles to pass between Nos. 3 and 4 Outer Channel Buoys, thence 178°, 0.9 miles to leave No. 6 Outer Channel Buoy on port hand, thence 173°, 1.6 miles to pass between Nos. 7 and 8 Outer Channel Buoys, thence 191° 30′, 1.6 miles to pass between Nos. 9 and 10 Outer Channel Buoys, thence 176°, 0.8 miles to pass between Nos. 11 and 12 Outer Channel Buoys.

From a position midway between Nos. 11 and 12 Outer Channel Buoys, steer 157° for a distance of 2.2 miles, leaving S.E. Arrif Buoy on the starboard hand, thence 217° for a distance of 3.25 miles, leaving S. Arrif Buoy on the starboard hand.

After rounding S. Arrif Buoy, steer 335° for a distance of 1.7 miles, passing close West of No. 1 Inner Channel Buoy, thence 003°, 1.1 miles, passing close East of No. 2 Inner Channel Buoy.

From a position close East of No. 2 Inner Channel Buoy, steer 348°, 0.5 miles to pass between Nos. 3 and 4 Inner Channel Buoys thence 323° to round Turning Buoy, leaving this buoy on the port hand.

From Turning Buoy steer a course to enter the designated Anchorage Area. The Northern limit of the designated Anchorage Area is a straight line joining the Turning Buoy and Fairway Buoy positions.

Masters of vessels anchoring at Umm Said are required to use the appropriate anchorage. With the exception of emergencies only, anchoring outside this area or obstructing the fairway is *not* permitted.

Prohibited Area: A prohibited area enclosed by the pecked lines (See "Plans") has been established. Masters of all vessels are prohibited from entering, anchoring or fishing within this area unless permission has been granted by the Corporation.

Outward Passage: The reverse track is followed as for the inward passage described above.

Charts: Admiralty Chart No. 3787 – Approaches to Musay'Id and Ad Dwaha.

Admiralty Chart No. 3950 – Fasht al Arrif to Ras Laffan.

Admiralty Chart No. 3786 – Umm Said Harbour.

Depths: In the Outer Channel there are least depths of 36 ft. (10.97 m.) in the vicinity of Nos. 1 and 2 Buoys, 3 and 4 Buoys and Nos. 9 and 10 Buoys.

Between the Outer and Inner Channel the depth varies from 40 ft. (12.2 m.) at Nos. 11 and 12 Outer Channel Buoys through 72 ft. (22.0 m.) and 78 ft. (23.8 m.) between S.E. Arrif and S. Arrif Buoys to 47 ft. (14.3 m.) close to No. 1 Inner Channel Buoy.

In the Inner Channel the least depth is 37 ft. (11.28 m.) between Nos. 3 and 4 Inner Channel Buoys.

From the Inner Channel to the Anchorage the depths vary from 43 ft. (13.1 m.) between the channel and Turning Buoy to 48 ft. (14.6 m.) at the Anchorage.

Tidal Conditions: In general the flood stream sets to the S.S.W. and the ebb stream to the N.N.E. the rate being up to 2 knots at Springs.

Cross sets will consequently be experienced in the channel, more particularly in the Northern part of the Outer Channel, between the Outer Channel and S.E. Arrif Buoy and between S. Arrif Buoy and the Turning Buoy. It should be noted that at the Outer Channel Entrance the flood stream continues to set to the Southward for some time after the tide has started to fall.

Tides: The tides in this area have a large diurnal component and at times there is only one HW and one LW in the 24 hours. This irregularity is more pronounced at Umm Said than at the Outer Channel Entrance for which predictions are made.

In December the HHW, or the only HW during periods of single day tides, occurs between 0500 and 1400 hrs.; in March between 2200 and 0900 hrs.; in June between 1800 and 0100 hrs. and in September between 0900 and 2100 hrs.

At Umm Said there are a few days in the year when the tide does not rise above 5 ft. (1.52 m.) and there are considerable periods each day when the predicted height of the tide is greater than 3 ft. (0.91 m.).

In the vicinity of Nos. 3 and 4 Inner Channel Buoys, HW occurs about 1 hour after HW at the Outer Channel Entrance and the rise of tide is slightly more than at the Outer Channel Entrance.

The HHW is normally 5 ft. (1.52 m.) or better rising to 8 ft. (2.44 m.) at exceptional Springs.

Abnormal meteorological conditions may affect all the above tides by ±2 ft. (0.61 m.).

PILOTAGE: Inward and outward pilotage is compulsory for all vessels loading at Umm Said Oil or NGL Terminals.

Pilot will board and leave vessels in the vicinity of (M) Mishut Buoy.

Tankers of 40,000 d.w.t. and over should have rigged, when in light condition, an accommodation ladder lowered to about 12 ft. above the water. This can be adjusted to suit conditions. A pilot ladder should be rigged immediately abaft the accommodation ladder, to within 2 ft. above the water. This will enable Pilot to ascend pilot ladder clear of launch, and then step on to lower platform of accommodation ladder. Vessels should comply with the current U.K. Merchant Shipping (Pilot Ladders) Rules.

Automatic pilot hoists should not be used unless such use is agreed to by the Pilot. On no account should weighted heaving lines be used in the vicinity of the pilot boat or mooring launches.

Pilotage is compulsory for dry cargo ships bound for Umm Said Anchorage. Pilotage performed by Doha Pilots.

RESTRICTIONS: In the case of crude oil shipments, mooring, loading and unmooring is carried out at all times (weather permitting).

NGL Jetty: Mooring and unmooring operations are normally restricted to daylight hours.

ANCHORAGES: Eastern Anchorage. Depth 48 ft.

Prohibited Anchorage: A Prohibited Anchorage has been established in the vicinity of (W) Wakrah Light Buoy to protect submarine pipe-lines laid in the area. A Yellow Can buoy (Fl. Y. 10 secs.) (Radar Reflector) has been laid in position Lat. 25° 13′ 51″ N., Long. 51° 45′ 23.4″ E. and a line drawn 073°/253° from the coast through this position marks the Northern boundary of the Prohibited Anchorage. A similar buoy (Fl. Y. 6 secs.) (Radar Reflector) has been laid in position Lat. 25° 8′ 18″ N., Long. 51° 41′ 54″ E. and a parallel line drawn through this position marks the Southern boundary of the Prohibited Anchorage.

MAX. SIZE: (Also see "Cargo Handling Facilities"). Draft of laden tankers leaving Umm Said is controlled by the depth at the outer end of the Outer Channel. This is 36 ft. (10.97 m.) below Chart Datum and Zero of Predictions. Tide rarely falls below 1 ft. above datum, so that there is normally 37 ft. (11.28 m.) or more in the channel.

Experience shows that even under the worst weather conditions there is no appreciable movement on larger ships in the Outer Channel. As deep-draft vessels always reduce speed between Nos. 3 and 4 Inner Buoys and in the Outer Channel, there is very little "draw down". Deep-draft vessels should endeavour to pass between Nos. 1 and 2 Outer Buoys at HHW for the Outer Channel Entrance.

Subject to the under-keel clearances mentioned hereafter, in general the draft limitations are as follows:

(a) Ships drawing 34 ft. (10.36 m.) or less can sail at any time on any day.
(b) Ships drawing 35 ft. (10.67 m.) will rarely have to use tides.
(c) Ships drawing 36 ft. (10.97 m.) will usually have to use tides.
(d) Ships drawing 37 ft. (11.28 m.) always have to use tides.
(e) Ships drawing 38 ft. (11.58 m.) will occasionally be neaped.
(f) Ships drawing 39 ft. (11.89 m.) will be neaped 120 days ± a year.
(g) Ships drawing 40 ft. (12.19 m.) can sail occasionally. The best months are June and July.
(h) Ships drawing 41 ft. (12.50 m.) are not worth programming as on the few days when predictions indicate they could sail, meteorological conditions may well cut the tides.

NGL Jetty: Max. acceptable length 950 ft., min. length 550 ft. Max. acceptable capacity 120,000 cu.m. Minimum acceptable capacity 30,000 cu.m.

Underkeel Clearance: The following table stipulates the *minimum* underkeel clearance for vessels using the Umm Said Channels.

Vessels up to 99,999 d.w.t. – 3 ft. Clearance
Vessels from 100,000 to 149,999 d.w.t. – 4 ft. Clearance
Vessels over 150,000 d.w.t. and 320,000 d.w.t. – 5 ft. Clearance
(See "Terminal Information – Berth limitations").
LPG Carriers (all sizes) – 5 ft. Clearance

Navigation in Shallow Waters: The navigation of deep drafted vessels at high speeds in shallow waters introduces certain hazards. Pilot/Mooring Masters and Masters of ships should be guided by the following:

(a) Due consideration should be given to the effect of draw down at speed on vessel's draft in shallow water, bearing in mind vessel's trim.
(b) If possible, confirm actual height of tide against predictions and if not, bear in mind that after strong winds the actual height of tide may be reduced and extra caution must be exercised for a few days during and after bad weather.
(c) Ensure accuracy of vessel's draft reading, including the midship drafts, having in mind the tendency of vessels to sag and the adverse effect of a small list.
(d) Reduce to a minimum safe speed to pass over and near shoal areas.
(e) Reduce to a minimum safe speed when negotiating turns in order to reduce heel under helm.
(f) Note that list can mean an appreciable increase in draft.
(g) When strong tidal streams are running across a channel, extra vigilance is required, and allowance made for set, particularly at reduced speed, to ensure vessel proceeds along mid-channel.

HEALTH: (Quarantine and Medical Clearance). Medical attention to Masters and crews of ships provided by Q.G.P.C. Medical Officer when asked for by Master.

RADIO: When advising their ETA ships must state their last port of call within the previous 21 days and report any sickness on board. If the last port of call is Bahrain or Ras Tanura, the previous port must be stated.

Vessels are requested to inform Petroqat, Umm Said by cable of their ETA at (M) Mishut Light Buoy and whether or not Pilot required, 72 hours and confirm 24 hours prior to their arrival. It should be clearly indicated that times quoted are in GMT. They should also state the quantity of cargo, in long tons, and the maximum loading rate required, deballasting time and whether able to load and discharge ballast concurrently. Any crew changes and/or medical treatment required should also be notified in this cable.

Except for Tankers, all vessels must contact Doha on VHF for ETA advice. Umm Said Terminals should be contacted for channel clearance.

These cables should be addressed to Petroqat, Umm Said, and passed via the Bahrain Coast Radio Station.

The following cable is sent to all vessels by Agent (Petroqat):

Quote:

Advise your ETA at pilot station Mishut (M) Buoy in GMT 72 hours and confirm 48 and 24 hours before arrival. Pilotage is compulsory and in order to confirm pilot boat arrangements essential you advise firm ETA 48 hours before arrival to avoid any delays. Rig combination accommodation/pilot ladder port side before arrival. Pilot hoist and weighted heaving lines must not be used. Tugs are available if required. Please advise your requirements 48 hours in advance.

It is preferred that mooring hawsers in general consist of rope where possible but all wire moorings or wires with rope tails are acceptable. Please note, however, that for safety reasons, all springs which are connected to the main jetty must be of rope or wires with rope tails.

Please advise your last cargo, and confirm that your tanks are cooled down and ready in all respects to receive your nominated cargo. Butane and propane can be loaded concurrently if required. Loading lines are 12 in. diameter and vapour return lines are 8 in. diameter all fitted with Class 150 ASA flanges. Your attention is drawn to the Prohibited Anchorage (Lat. 25° 10′ N.) safeguarding the submarine pipe-lines laid in the vicinity of Wakrah (W) Buoy.

If your vessel is fitted with telex which has high (75B) and low (50B) speed transmission, please ensure that your machine is operating on low (50B) speed mode to ensure that we receive clear, ungarbled text.

Petroqat Umm Said

Unquote.

Telex: Vessels fitted with telex machines may make contact through Telex No. 4050 Qpausd Dh. However, only the low (50B) transmission mode should be used to ensure the receipt of clear, ungarbled text.

High (75B) speed transmission mode must not be used.

VHF: Umm Said Terminal is equipped with VHF radio equipment operating on Channels 1 – 29 and 60 – 89 of international maritime mobile telephone service.

A continuous 24 hour listening watch is maintained on Channel 16, the call sign being "Umm Said". The range of station is approximately 50 miles.

TUGS: Given sufficient prior notice a tug can usually be made available on request.

BERTHING: Pilots act in same capacity as Mooring Masters in the berthing of vessels, after which they supervise raising of flexible hoses and connection to ship's manifold. During loading operation they act as the Corporation's representatives.

Vessel's crew are expected to assist with hose connecting.

North Berth is a Single Point Mooring in position Lat. 24° 53′ 37.2″ N., Long. 51° 34′ 54″ E., connected to the shore installation by a 36 in. submarine pipe-line. The seaward end of the pipe-line and buoy terminates in 2×16 in. flexible floating hoses. Vessels are moored by a single hawser from bow to buoy.

The following equipment should be carried by each vessel:

(i) One 4 in. circumference × 40 fathom messenger rope ready for use at the bow together with mooring lines of suitable size ready for use.

(ii) One good boat rope at least 200 ft. long ready at accommodation ladder position.

(iii) Derrick or crane rigged over the port side manifolds should be capable of lifting 16 in. floating hose to a height of up to 30 ft. above deck (S.W.L. 10 tons).

(iv) Reducers or adaptors if necessary to be bolted to the ship's manifold flanges so as to take 2×16 in. loading hoses.

Warning: Ship's anchors must never be used within 0.5 miles of this berth or the 36 in. submarine pipe-line and must therefore be well secured at all times.

The South Berth consists of a Conventional Buoy Mooring, connected to the shore by a 24 in. submarine pipe-line. The seaward end of the pipe-line terminates in 2×16 in. flexible hoses.

Vessels are moored at this berth by ship's anchors and mooring buoys. The following equipment should be carried by each vessel.

(i) Port and starboard anchors to be fitted with marker buoys and sufficient line. This will facilitate recovery of anchor in the event of loss.

(ii) One good boat rope at least 200 ft. long ready at accommodation ladder position.

(iii) 4 good mooring lines aft, of a suitable size for the vessel on which they are used. Each line should consist of 120 fathom hawser, tailed by a similar hawser and ready to run out when required.

(iv) 2 good mooring lines forward similar to the after lines for use on the Shama'al Buoy (No. 6).

(v) Two 3 in. circumference messenger ropes, one forward and one aft.

(vi) 2 good rope stoppers to be available forward. 4 good rope stoppers to be available aft.

(vii) Derricks or cranes rigged over the port side manifolds should be capable of lifting 16 in. flexible hose from the seabed to a height of up to 30 ft. above deck (S.W.L. 10 tons).

(viii) Reducers or adaptors (if necessary) bolted to ship's manifold flanges so as to take 2×16 in. loading hoses.

(ix) Carpenter's stoppers are provided on loan by Q.G.P.C. for use with Corporation's 4.75 in. wires. Chain stoppers must not be used.

Note. Where a vessel has 2 or more loading connections, the ship's flanges should not be less than 4 ft. apart.

TERMINAL INFORMATION:

Berth	*Max. t.p.h.*	*Fixed sea-line*	*Overrail hoses*
North (SPM)	6,500	One – 36 in.	Two – 16 in.
South (CBM)	5,000	One – 24 in.	Two – 16 in.

Depth of Water: Available depth of water at seaward end of sea-line is as follows:

North Berth (SPM)	65 ft. (19.6 m.)
South Berth (CBM)	48 ft. (14.6 m.)

An allowance of 8 ft. for South Berth has been made for height of sea-line end cradle above the sea bed.

Berth Limitations:

North Berth (SPM)	– 320,000 Summer d.w.t. Bow to manifold 590 ft.
South Berth (CBM)	– Maximum 320,000 tons Summer d.w.t. Minimum 50,000 tons Summer d.w.t.

Note: Minimum size of vessels at CBM is governed by vessels length – 650 ft. minimum.

Large tankers loading at either berth will be required to maintain a minimum of 20% of SDWT ballasted/loaded condition at all times and maintain an even trim.

After the vessel has been securely moored in berth, the hoses are lifted and connected to the ship's manifold.

The Mooring Master will not transmit any loading instructions to the shore until the officer-in-charge of the deck is satisfied that the hoses are connected correctly and that all valves have been set for receiving cargo.

While in berth, ships should be ready to move under their own power in the event of their breaking adrift, catching fire, fire in adjacent berths or other emergency. No repairs should be carried out while in berth which would immobilise the ship or impair her fire-fighting efficiency.

The Mooring Master will instruct the Master of the vessel as to any signals needed for local requirements.

The Mooring Master brings an intrinsically safe portable radio to the ship. The radio may not be used for private conversation.

The use of the ship's radio (including the VHF radio, except in an emergency) during loading is strictly prohibited. Portable intrinsically safe radios used by ship's personnel to control loading procedures is permitted however, provided such use does not interfere with ship/shore communications.

When loading is completed, hoses will be disconnected and lowered, under the supervision of the Mooring Master.

Ships will then proceed to an anchorage allocated by the Mooring Master or direct to sea.

NGL Jetty: This is a 'T' type jetty with breasting dolphins flanked either side by 2 mooring dolphins. Water depth at the berth is 42 ft. Chart Datum.

Suitable for berthing vessels of approximate dimensions LOA 550 ft. (168 m.) to LOA 950 ft. (290 m.)

Connections:

(a)	Propane Vapour Return	8 in.	150 ASA flanges
(b)	Propane Liquid	12 in.	150 ASA flanges
(c)	Butane Liquid	12 in.	150 ASA flanges
(d)	Butane Vapour Return	8 in.	150 ASA flanges

CARGO HANDLING FACILITIES: Government Pilots provide berthing assistance. See "Doha".

Max. draft permissible at any state of the tide – 33 ft.
Max. draft permissible at HW – 39 ft.
Max. LOA – 850 ft.

Berth Nos.	*Length* (m.)	*Length* (ft.)	*Depth* (m.)	*Depth* (ft.)

19	255	841.5	13.0	43.0	"
QAFCO N	212	700	11.8	39.0	Ammonia
QAFCO S	212	700	12.0	40.0	Urea

1. *Urea Fertiliser Export:*

Qatar Fertiliser Company – QAFCO Qatar Government joint venture with Norske Hydro who manage the project.

Fertiliser is in polythene bags of 50 kg. nett each.

Loading is by two independent loading towers. Depending on ease of access to ships' holds a 24-hour loading rate of 700 tonnes is given by the loading equipment.

The pile construction jetty lays at right angles to the shore line and along direction 310° – 130°.

Urea loading equipment is on the S.W. face of the jetty. Jetty face length between extreme end bollards is 800 ft. (244 m.).

2. *Ammonia Export:*

The N.E. face of jetty laying 310° – 130° of length 800 ft. (244 m.) has three functions, one of them being for ammonia loading. The pipe-line is 8 in. (203.2 mm.) diameter.

3. *Bulk Grain Import:*

QAFCO Jetty N.E. face is also used as the bulk grain discharge berth, to the Qatar Flour Mill Company situated at the shore end of the jetty.

Discharge Gear: Consists of portable grain suction/blown discharge units placed aboard vessel.

Also see "Terminal Information – NGL Jetty" and "Developments".

CARGO:

It is strongly recommended that all oil tankers loading at Umm Said are fitted with a fully operational Inert Gas System and that all cargo tanks are fully inerted before loading commences.

The right is reserved by the Terminal NOT to load any oil tanker not inerted if weather conditions at the time of loading are such that the build up of large concentrations of gas around the vessel will not be prevented.

1. Flash Point. Flash point of Qatar Crude is below 32° Fahrenheit.

2. H_2S Content. Qatar (Land) Crude contains concentrations of H_2S (sulphuretted hydrogen). This is an evil-smelling poisonous gas which can be lethal depending on concentration of gas in the air inhaled. It can be detected normally by its smell, but a high concentration of the gas rapidly paralyses sense of smell and may lead to a false sense of security. It is, therefore, important that when the presence of the gas is detected the area or compartment concerned must be left with all possible despatch until adequate ventilation can be carried out. The explosimeter will not detect this type of gas.

It is not intended to exaggerate the dangers of H_2S and if a vessel is fitted with an operational inert gas system then these dangers can be regarded as minimal. Large quantities of Qatar (Land) Crude have been carried in the past on non-inerted tankers without accident. However, in the light of experience gained, the under-noted precautions have been proved necessary to provide against a possible accident:

(a) During loading, venting of tanks should be allowed only through the agreed venting arrangements (as noted in the ship/shore safety check list).

(b) Manual ullaging of tanks should be kept to a minimum and, if undertaken, personnel should keep to windward of the tank openings and avoid breathing fumes as much as possible. Breathing apparatus should be worn if manual ullaging of tanks is to be undertaken over a prolonged period or in a confined space.

(c) Entry into pump rooms or any compartments where gas can collect should be avoided. If entry is considered necessary, then an approved breathing apparatus and lifeline should be worn by the person entering and other persons should be standing by, and tending the life-line. One of those persons on stand-by should be wearing a second breathing apparatus set and life line, ready to rescue the person entering the compartment should the latter be ovecome by fumes.

(d) Breathing apparatus, life lines and oxygen resuscitators should be readily available during all cargo and tank cleaning/gas freeing operations.

(e) During cargo discharging and tank cleaning/gas freeing operations, the gas ejector for the pump room should be kept running.

LOADING:

Readiness: Notice of Readiness will be received by the Corporation Representative provided vessel ready to load. Lay time will commence as stipulated in the export agreement between purchasers and vendors. A full cargo is deemed to be the maximum cargo which can be loaded in the ship at Umm Said consistent with safe underkeel clearance on sailing, as advised by Mooring Master.

The Corporation will make every effort to load tanker on arrival provided berth available and weather permits.

Advice from vessel which states she is ready to receive cargo is considered as final, and as indicating that every operation necessary aboard vessel has been completed. As soon as possible after such a signal has been received, and without further advice, loading will commence.

Full cargo is deemed to be the maximum cargo which can safely be loaded in the vessel at Umm Said. Completion of loading is subject to the normally accepted tolerances above or below the required cargo.

Tank Dips: During loading, hourly checks of vessel's tanks shall be made by ship personnel to determine cargo loaded for comparison with shore figures if required. This is to prevent loss of oil through a leaking hose and particularly applies at night when seepage of oil can remain unobserved.

Inspection of vessel's tanks will be made by a ship's Officer before loading and, if required, by a Q.G.P.C. Representative. Opening dips and closing ullages will be taken by ship's personnel and the quantity of cargo calculated.

Particular care must be exercised by ship's personnel, towards completion of loading, in the "Topping off" of tanks to ensure that the Terminal is given timely advice of any decrease in pumping rate required. Adequate "Stand-by" notice should be given before the final "Stop".

Loading Pumps: Three 2,230 h.p. pumps are used to load crude oil and it is important to note that any rapid changes in the oil velocity may cause pressure surges in the loading system. A pressure surge may rupture the flexible hoses connected to the vessel spilling dangerous quantities of crude oil onto the decks or surrounding areas and may also cause excessive damage to the Terminal installations. To avoid these risks, valve operations and tank switching should be done with extreme care. Please ensure that 15 minutes' notice is given for "Slow Speed" and/or "Stop" instructions. A letter of protest will be issued by the Shore Representative/Mooring Master on any occasion a pressure surge is generated, whether Terminal installations have been damage or not.

BALLAST: When a vessel enters Port waters in ballast, the ballast water for overside discharge *must be clean* and a declaration signed by the Master and delivered to the representative of the Terminal to this effect. Oily wastes, oily water or other refuse must not be discharged overboard in Port waters. Vessel's scuppers must be effectively plugged and leakage or spillage of oil aboard ship must not be swept or washed overboard whilst in Port waters.

The attention of Masters is drawn to the volume entitled "International Conference on Prevention of Pollution of the Sea by Oil" 1962 and subsequent publications issued by the International Maritime Organisation.

Vessels may be subject to heavy fines and liabilities for claims arising from pollution of the sea and shore areas.

In Umm Said the "load on top" system is normal procedure and Masters of all tankers are required to certify quantity of slops on board and their intention of "loading on top". If "load on top" system is not used the Master will be required to certify adequate reasons for not doing so, e.g., vessel drydocked in last port, etc.

Note:

(a) Essential that vessel is adequately ballasted to ensure safe handling and manoeuvring. Please comply with Mooring Master's requests as to ballast quantity and disposition.

(b) Umm Said is an open roadstead and subject to sudden changes in weather. Large tankers will be required to maintain a minimum of 20% of SDWT ballast/load condition at all times and maintain an even trim. Masters of all vessels should note that should a situation arise that a vessel has to vacate the berth due to adverse weather or for any other reason, the vessel will be required to have on board sufficient ballast/cargo to enable it to manoeuvre with safety; thus it is of great advantage to commence loading whilst discharging ballast or prior to completely deballasting to avoid leaving the vessel in a flying light condition.

(c) All pump room seacocks must be closed and lashed before commencement of loading unless loading is commenced prior to deballasting, when they will be closed and lashed after deballasting is completed.

FUEL: See "Doha".

FRESH WATER: Available at cargo berths but not at S.B.M., C.B.M. or L.N.G. Berth.

CUSTOMS ALLOWANCES: The State Laws of Qatar are very strict about the import of liquor and its consumption both on the mainland and on vessels in the harbour. No employee, whether senior or junior, is permitted to import any liquor direct or to bring any liquor ashore from vessels, and under no circumstances should liquor be offered for consumption on your vessel to any Q.G.P.C. employee unless he is of senior staff status. At the present time vessels enjoy the privilege of not having to seal their liquor stocks whilst in port, but you will readily appreciate that this privilege would be withdrawn if the above rules are not strictly observed whilst vessel is at Umm Said.

REPATRIATION: Immigration/Transit facilities for arriving or departing ship personnel are good. Ample notice should be given on passport details to ensure minimum delay to travelling personnel.

DISCHARGE CERTIFICATE: The Master of every vessel loading at Umm Said is handed a Discharge Certificate for completion by the Customs or Port Authority at port of discharge and return by air mail to Qatar General Petroleum Corp., P.O.Box 3212, Doha, Qatar within 40 days of sailing from Umm Said.

Instructions regarding the cable to be sent after discharging a cargo loaded at Umm Said must be strictly followed.

It must be emphasised that failure to comply with this requirement may result in delay or even boycott of the vessel upon return to Qatar.

It is therefore in best interest to ensure that Agent at port of discharge attends to despatch of this certificate and the cable with least possible delay. Airmail should be used for Certificate posting.

N.B. If the cargo is destined for onward transit, the final destination of the cargo must be advised on the Certificate.

SECURITY: The Government of Qatar and the Corporation are anxious to ensure that unauthorised persons do not board vessels loading at Umm Said. Vessel's co-operation is requested in checking the identity of all persons boarding.

Vessels are particularly advised to keep all points of access to vessel under surveillance at all times, and to provide maximum night illumination of vessel insofar as the safety regulations permit.

A State Police Launch is present in the area and may be available for assistance if required.

GENERAL: *Stores and Provisions:* At Umm Said there are no facilities for the supply of stores.

Q.G.P.C. Light Dues: A charge is made to cover the provision and maintenance of light buoys in the Approach Channel to Umm Said. This covers one visit to this port, both inward and outward passage.

Qatar Port Dues: The State of Qatar impose Port Dues on all petroleum carrying vessels which load hydrocarbon substances in one or more of the oil loading ports located in the State of Qatar which includes islands and offshore areas belonging to the State of Qatar.

Note: The G.R.T. for purposes of these calculations will be that shown on the Arrival Report signed by the Master.

M.E.N.A.S. Light Dues: M.E.N.A.S. Light Dues at rates fixed by the Middle East Navigation Aids Service are payable at Umm Said to cover both inward and outward passage through the Gulf.

DEVELOPMENTS: The new Umm Said port, opened in 1977, has a total water frontage of 4.5 km. of which 2.5 km. has been developed to provide deep-water berths and a harbour for small craft. Three berths at the Northern end having 15.5 m. minimum depth of water at MLLW are reserved mainly for the requirements of Qatar Steel Company and 2 berths at its Southern end having 13.0 m. minimum depth of water are reserved mainly for the requirements of Qatar Petrochemical Company. Three additional berths having 13.0 m. and two berths having 10.0 m. minimum depth of water at MLLW are available for specialised and general cargoes.

Inner approach channels and manoeuvring areas have been dredged to serve all berths in the new Port.

In addition there are wharves under construction which will be used by general cargo vessels, Ro/Ro vessels, car carriers and container vessels.

A chemical plant is also being constructed.

SHIPMASTER'S REPORT: October, 1980.

Vessel: 210,000 tonnes d.w.

Pilotage: This is now compulsory for the inward passage too for tankers. The Pilot/Mooring Master boards by boat from Doha at Mishut Buoy in position Lat. 25° 16′ N., Long. 41° 47′ E.

Agents/Operators: Qatar Petroleum Producing Authority has now been renamed Qatar General Petroleum Corporation and Notices of Readiness, etc., should be addressed accordingly. Cable address unchanged: PETROQAT.

Documents: No papers at all required from ship.

Radio: A7S was heard after contact had been established on VHF. The Mooring Master did not know of any ships ever using this station.

AGENCY:

(A) *Tankers:*

Qatar General Petroleum Corporation (Onshore Operations), P.O.Box 10070, Umm Said, Qatar. Telex: 4050 DH Qpaush. Cable: Petroqat. Umm Said. Terminal Tel. No.: 322569, 771219, 774221.

(B) *Other Vessels:*

Qatar National Navigation and Transport Co. Ltd., P.O.Box 153, Doha. Qatar. Telex: 4206 Melaha DH. Cable: Navigation. Tel: 321175/9. 23684, 21213.

AUTHORITY: Qatar General Petroleum Corporation (Onshore Operations), P.O.Box 10070, Umm Said, Qatar. *Tel:* 774210, 771852. *Telex:* 4050 Qpa Usd. *Cables:* Petroqat Umm Said. *Contact:* A. A. Al Najjar, Terminal Superintendent.

General Cargo: Director, Department of Ports, Ministry of Communication and Transport, P.O.Box 313, Doha, Qatar. *Tel:* 413322 PABX–414626. *Telex:* 4378 Mawani DH. *Cables:* Mawani. *Contact:* Harbour Master. *Tel:* 414287.

Reunion Island

POINTE DES GALETS: 20.55 S. 55.17 E.

(See Plan Book)

FLAG: French flag.
PILOTAGE: Compulsory for all vessels over 50 m. LOA. Pilot is normally ordered by ship's Agent, or in particular cases by the Harbour Master if contacted by VHF beforehand. Pilot launch carries regulation pilot signals. Pilot boards at the entrance to the port about 1 mile from the breakwaters. Pilot on VHF Channel 16, it is recommended that a watch be kept and ETA confirmed.
APPROACHES: *Channel and Buoyage:* The leading line 102° 30′ for entry is determined by day, by 2 rectangular white signs, bordered in red with a thick black line denoting the centre line. At night the leading line is 2 red lights. In the channel the depth is 10 m., 70 m. wide and is buoyed by 4 spars, 2 on each side.

The leading marks for access to the North Port, South and Fishing Port, respectively 009°, 189° and 260°, are marked as shown below:–

North Port: By day, 2 red rectangular signs, with a thick white line marking the centre line, at night, 2 fixed red lights.

South Port and Fishing Port: 2 rectangular white signs with a black vertical line marking the centre line by day. 2 fixed green lights by night.
ANCHORAGES: There are 2 anchorages in the roads near the port.
(a) In Baie de St. Paul in depths of about 40 m., well marked and safe except in very strong swell. Mooring buoy available in bay.
(b) In Roads of La Possession unmarked anchorage and little used.

If vessel requires a Pilot for anchoring, then anchorage dues are incurred. Vessels anchoring by their own means do not incur charges.
RESTRICTIONS: Manoeuvring is best done in the early morning or at daybreak because during the day wind can make movement difficult. The current in the channel varies in strength (between 1 and 2 knots) and direction. Its direction can only be determined by careful observation during the approach. As a consequence ships should be ready to anchor on instruction from the Pilot while transiting the channel. Vessels swing in the outer port using a long headline.

Berth No. 8 unsafe during swell periods.
MAX. SIZE: Under certain conditions, the topography of the port and jetties, access is limited to the sizes below:–

North Port: Length 160 m., beam 22.0 m., draft for entry 8.5 m. Greater with preliminary agreement of the Port Authorities. Departure draft fixed by the Port Authorities. (Length 160 m. if draft less than 8.50 m.).

South Port: Length 180 m. if draft less than 7.50 m.
175 m. if draft less than 8.00 m.
170 m. if draft less than 8.25 m.

Fishing Basin: Length 55 m. draft 4.50 m.

Otherwise entry or departure will depend on the Pilot's advice. Normally entry only occurs at the following times depending on the season. Maximum daylight 0445 – 1845 hrs.
RADIO: Saint Lys or Saint Denis Radio.
VHF: Harbour Master's Office equipped with VHF. Call on Channel 16 daytime only (Sunrise – Sunset).
TUGS: Only used to assist vessel manoeuvring in the port. Tug joins vessel in outer harbour. Ship's lines always used. Tug will also assist on roads (deliveries of mail).
BERTHING: Berth assigned by Harbour Master, basis vessel's length and draft. Tankers berth in the outer harbour at dolphin berth. No slop facilities.

Fore Port: (Channel: 70 m. usable width. Turning circle 300 m. Dredged to 10 m. Berth H, 175 m. long, dredged to 8.5 m.).

North Port: Access lock: 30 m. width, 10 m. depth.
Berth 1: 160 m. length, 8.50 m. depth.
Berths 2, 3, 4: total length 366 m., 9.00 m. depth. For 2 or 3 vessels.
Berth 5: 150 m. length, 8.5 m. depth. Quay is narrow due to cargo collection (mainly bagged cargoes).
Berth 6: (French Navy) 140 m. length, 6 m. depth.
Berth 7: 210 m. length, 9 m. depth. Bulk sugar loading berth.

South Port: Berths 8, 9: Each 190 m. length, 10 m. depth.
Berth S: 120 m. length, 8.5 m. depth.

Fishing Basin: 6 berths, 70 m. length, 5 m. depth.

The depths above are dredged depths.

Forklifts for handling 22 ton containers at certain berths.
CRANES: No shore cranes.
STEVEDORES: Normal working hours 0700 – 1700 hrs. Possible to work in meal hours 1100 – 1230 hrs. and 1700 – 1800 hrs.

Handling Rates: General cargo: 80/100 tons per day per gang. Bagged cargo: 2,500 bags (less than 80 kilos each) per gang per day.
TANKERS: Discharge at Berth Nos. 8 and 9.
DENSITY: 1025.
FRESH WATER: Available at all times by pipe-line at the quays. Rate 10 t.p.h. minimum.
FUEL: Fuel and marine diesel available at Berth Nos. 8 and 9.
MEDICAL: Doctor and hospital facilities available.
GANGWAY/DECK WATCHMEN: Not necessary.
OPENING/CLOSING HATCHES: Normally performed by ship's crew who also unlash and hook containers at the 3rd height.
REPAIRS: Repairs can be effected by S.M.A.G. Tel: 42.09.24.
REPATRIATION: All facilities available for crew change and repatriation.
AIRPORT: 30 km. away, daily connections world-wide (Air France, Air Mauritius, S.A.A. and Air Madagascar).
TIME: GMT plus 4 hours. No alterations during the year.
HOLIDAYS: No cargo work on May 1st or November 1st. Possible to work at overtime rates on January 1st, Easter Monday, Whitsun, July 14th, August 15th, December 25th and other holidays.
TELEPHONES: Police 42.00.17 and 42.15.80. Ambulances 18 or 42.06.53 (Private), Fire 18, Harbour Master 42.09.12. Telephones can be placed onboard at all berths.
SERVICES: Harold J. Thomson – P&I Club representative (Oceanus, Strike, London Mutual and others). Speaks excellent English, will assist with any shipping services or supplies. Tel. 42.03.10. Telex: 916252.
IDENTIFICATION CARDS: Seaman's Book compulsory, to avoid visa problems.
DELAYS: General cargo rates 500–1,000 tons per day depending on category and conditions.
SHORE LEAVE: Crew are allowed to go ashore.
DEVELOPMENTS: New port facilities at Baie De La Possession for vessels up to 220 m. LOA approved. Expected to be ready early 1986.

SHIPMASTER'S REPORT: 1978.
Documents: 3 Crew personal effects lists, 3 Crew lists, 3 Bonded stores lists. Declaration of Health (Supplied on arrival).
Pilotage: Pilotage compulsory. Pilot boards 1 mile off breakwater, minimum of 12 hours' notice required.
Anchorage: At Saint Pauls Bay, 5 cables offshore in depth of 20 fathoms – the water is too deep further offshore.
Restrictions: Vessels can enter and leave at any stage of the tide during daytime. Max. beam for North Port 22 m.
Max. Size: Length 180 m. with draft 7.50 m., length 175 m. with draft 8.0 m. and length 160 m. with draft 8.5 m.
Tugs: 1 tug available and required for berthing and unberthing in the North and South Port.
Radio: Radio station – Saint Dennis Radio "FFD".
VHF: Pilot and Port Authority Channel 16.
Special Bulk Facilities: Bulk sugar berth – rate 400 t.p.h. No quay cranes – no Ro/Ro facilities. Facilities for handling containers and storage space for containers in North and South Port.
Fresh Water: Available.
Repairs: Facilities available.
Services: Provisions, Bunker fuel, diesel available.

AUTHORITY: Arrondissemente Mixte, B.P. 08, 97420 Le Port, France. *Tel:* 42-09-55. *Telex:* SERMAR 916428. *Contact:* J. C. Le Clech, Le Chef de l'Arrondissement Mixte.
AGENT: SCAC Transport International, 97420 Le Port De La Reunion. Tel: 42-00-22. Telex: 916137.

NOTES

Please also advise Shipping Guides Ltd.

Romania

CONSTANTZA: 44.10 N. 28.39 E. (See Plan Book)

DOCUMENTS: As soon as vessel is boarded by the border control commission, the Master fills in a form of declaration in 4 copies, which together with Stowage Plan, Cargo Manifests, Sanitary Certificates, is handed to representative of the Agency. Also following documents are to be handed over at Harbour Master's Office:

Derat Certificate.
Certificate of Nationality.
Tonnage Certificate.
Safety Equipment Certificate.
Load Line Certificate.
Safety Radio-telegraph Equipment Certificate.
Ship's Register.
Safety Construction Certificate.

N.B. These documents will not be returned to the vessel until sufficent funds, in U.S. dollars, have been deposited by Owners to cover all vessel's disbursements.

Crew Lists and Passenger Lists must be typed in several copies (up to 7).

Purser's Report: 1976.

The Authorities require all the ship's certificates, discharge books, health declaration, and vaccination certfiicates. At least 10 copies of crew list, personal declaration and 2 copies of stores list containing all items of foodstuff, bonded goods and canteen.

PILOTAGE: Upon arrival in roads, a cable must be sent through radio coast station to Agent, stating hour of arrival and asking for Pilot. If entrance is not possible immediately due congestion Agent will call back the vessel advising when Pilot may board near the port entrance in order to berth vessel.

A Pilot is required for shifting in port, even for warping along the quay. Pilot boat has black hull with "Pilot" in white on sides, and white upperworks. Pilots operate 24 hours a day on VHF Channel 14 only.

MINEFIELDS: See charts of area.

ANCHORAGES: Anchorage areas in Constantza Roads are just near the new port works in an area up to 44 ft. depth. Length and breadth have no special restrictions. Actual official permitted draft for tankers 30.6 ft. will be soon improved in new tanker berths. Constantza Anchorage – East approach Nr. 2. Approach is between limits of Danger Areas Nos. 3B and 3A. Width 1.7 miles, length 15.3 miles, direction 270° – 090°. Centre line joins following positions.

C1: Lat. 44° 09.35′ N., Long. 29° 02.20′ E. At 17.5 miles on bearing 091° 12′ from Constantza Main Lighthouse (nr. 1.5).

C2: Lat. 44° 09.35′ N., Long. 28° 41.00′ E. At 2.25 miles on bearing 099° 12′ from Constantza Main Lighthouse (nr. 1.5).

On this approach non-degaussed vessels with a max. draft 12 m. may navigate.

MAX. SIZE: Vessels up to a max. draft 35 ft. to 36 ft. may berth in Constantza. See "Tankers".

TUGS: Tugs normally join vessel near port entrance assisting them until berthing.

RADIO: Constantza Coast Radio Station, call sign YQ1, frequency 462 kHz. Operation – daily starting at 0650, 1250 and 1850 hrs. GMT.

Agent requires 5 days', 48 hours' and 24 hours' notice of arrival.

VHF: Navlomar Office keeps watch on Channel 10, 0800 – 1300 hrs. and 1800 – 2000 hrs. They listen to vessels in the harbour and in the Roads.

BERTHING: 9 quays (approx. 2,000 m.), including facilities for Ro/Ro vessels and chemical fertilisers.

BULK HANDLING FACILITIES: Max. LOA 220 m., max. draft 36 ft. 2 cranes with grabs, discharge rate 4,000 tonnes per day (jib crane) and 10,000 tonnes per day (bridge crane).

In total there are 6 ore discharging bridges, 2 phosphate discharging bridges, 3 silos, 37 mobile pneumatic installations and 2 floating pneumatic installations.

CRANES: 150 quay cranes and 94 travelling cranes up to 100 tons capacity.

TANKERS: 5 oil wharfs under construction capable of berthing tankers up to 80,000 d.w.t.

MEDICAL: Crew members are offered medical assistance on all working days between 0900 – 1200 hrs. and 1300 – 1700 hrs.

FRESH WATER: Available.

FUEL: *Navlomar Bunkering Service: m.t. "Moreni" and m.t. "Zemes".* With the growth of shipping traffic and the need for greater speed in the bunkering of ships, Navlomar considered it essential to provide a more efficient service. A decision was therefore taken to replace the barge by new self-propelled bunkering vessels built in a Romanian yard using improved cago handling equipment.

The new tankers are equipped to receive gas oil, fuel oil, or a blend of both, and carry a variety of marine lubricants and other petroleum products. Its wide capacity and powerful pumps ensure speedy supplying with Romanian petroleum products of the best quality.

Characteristics: Owners, Navlomar Constantza; length, 54.2 m.; breadth, 10 m.; draft, 3.63 m.; displacement, 442 tons; speed, 6.7 knots; propulsion, 2 engines, "23 August" Bucharest; pumping rates, fuel oil 180 t.p.h., gas oil 190 t.p.h.; cargo capacity, fuel oil 747 tons, gas oil 401 tons, mixture 72 tons, oil in drums 30 tons; metering, fuel oil and oil meter fitted with temperature compensator and direct volume/weight conversion.

GANGWAY/DECK WATCHMEN: Watchmen recommended for special general cargoes. Cost will be arranged through Agent.

CUSTOMS ALLOWANCES: Small quantity permitted for each crew member out of bond but may be renewed if vessel stays longer in port.

HOLIDAYS: Official holidays in Romania: New Year's Days (1st and 2nd January); Easter Orthodox Monday (April); Labourer's Days (1st and 2nd May); Liberation Days (23rd and 24th August); Anniversary of Socialist Revolution (7th and 8th November); Christmas (25th and 26th December); Proclamation of the Republic (30th December).

REPAIRS: Largest dry dock in Constantza has 15,000 tons lifting capacity, second dock up to 8,000 tons.

TIME: Local time is GMT plus 2 hours. In Summer GMT plus 3 hours.

STEVEDORES: Working hours 0800 – 1700 and 2000 – 0500 hrs. Saturday afternoons, afternoon of days before holidays, Monday mornings and days after holidays until 0800 hrs. usually exempted in C/P although work may be effected. Loading and discharging are generally effected by shippers and receivers, respectively at their own expense and they may work also on holidays, Sundays and Saturday afternoons.

SHORE LEAVE: On completion of border inspection, crew can go ashore taking their Seaman's Books (or Passports) and the permits they receive from the soldier at the gangway. The permits must be returned to soldier upon coming back on board. In the event that crew members desire to visit places outside Constantza they must inform Agent.

GENERAL: From the time a vessel enters the territorial waters of Romania until she leaves the respective zone, i.e. 12 miles, it is compulsory to fly the Romanian flag. Ships that call at Constantza for the first time and have not got the Romanian flag on board must have it ordered through the Agent immediately upon berthing.

Following is an extract from "Notice to Sailors" issued by Authorities at Constantza:

1. Crew members are required to observe international rules covering work protection, port sanitation and Customs regulations, and in addition, Romanian law, both within the port and outside that area.

2. In order to avoid accidents concerned with port equipment, cranes, trucks, tractors and trains etc., crew members walking inside the port area are permitted to walk only on the main streets and between the berths where their vessels are moored, and/or to entrance/exit No. 1, the Navlomar Agency, the Harbour Station, the Navlomar tax-free shop or the Seamen's clinic.

3. Crew members are required to enter or leave the port area at gate No. 1.

4. Crew members are required to be back aboard their vessels by 0400 hrs.

5. Crew members wishing to visit other zones in the country are required to obtain a visa from the ship's Agent.

6. Transportation within the port by motor-boat which leaves the Harbour Station every 15 minutes and calls at all berths in the port, is available subject to crew members being in possession of the proscribed ticket issued by ship's Agent and duly signed and stamped by the ship's Master.

7. The tax-free shop is located next to the Harbour Station. All purchases must be retained aboard under Customs control until the vessel has sailed.

8. It is forbidden, either to bring in or to take out Romanian currency. Such currency is obtainable from Navlomar Agency at Master's request and for Owner's account. All Romanian currency remaining in crew members' possession must be returned to the Master before sailing, and the Master is required to return the currency to Navlomar.

9. The port Polyclinic is available for medical attention to crew members at the following times: Monday, Wednesday and Friday, between 1300 and 1600 hrs. Tuesday, Thursday and Saturday, between 0800 and 1300 hrs. In cases of emergency, assistance is obtainable by telephoning 16528.

10. Crew mail and messages are delivered daily by ship's Agents, and outgoing crew mail is collected for despatch at the same time.

SHIPMASTER'S REPORT: Rate of exchange is "Tourist Rate" which is approximately 3 times official rate. It is illegal to take Romanian money into or out of the country, any money which has not been spent must be returned to Agent in front of Customs when clearance is being given.

Any stages, gantlines or painting scows must be taken inboard at night. First opening and closing of hatches are for ship's account. Motor-boats operate a "taxi" service in harbour at a cost of 8 Lei per person per trip.

Control will only issue clearance after all cargo work, bunkering, etc. is completed.

At Mineral Berth iron ore is discharged by 2 large gantry cranes operating grabs, each working at approximately 200 t.p.h. Rate of discharge is frequently disrupted by shunting of railway trucks – 2 tracks serve 5 berths.

AGENT: Navlomar Shipping Agencies. Tel: 11970, 15274. Telex 14258, 14259, 14339. Cables: "Navlor Constantza".

SULINA: 45.11 N. 29.45 E. (See Plan Book)

PORT LIMITS: Line of Sulina Entrance and "Mile 2" on Danube River (Sulina Channel).

DOCUMENTS: Within maximum 1 hour from fulfilment of arrival formalities the Master or Chief Mate reports at the Harbour Master's Office where he tenders the following documents:

Certificate of Nationality.
Tonnage Certificate.
Safety Equipment Certificate.
Load Line Certificate.
Safety Radio-telegraphy Equipment Certificate.
Safety Construction Certificate.
Cargo Gear Certificate.

The above certificates are to be valid and not to expire before ship's sailing the port, Load Line Certificate and Cargo Gear Certificate not to be older than 12 months, and same remain with the Harbour Master until ship's departure when returned through the representative of the Agency that accompanies the Control Commission on departure.

PILOTAGE: Notice of arrival to pilot station at Sulina is to be sent in due time through Sulina Free Port Administration – Agency Department (Navlomar), telex numbers: 52294 (A Apl) and 52295 (B Apl)R.

Channel 16 VHF is continuously watched and ETA may be confirmed or adjusted whenever necessary on this frequency. There is no specific area where pilot boat is located, place where Pilot is to be taken on-board is generally the anchorage location.

Sulina – S.E. approach nr. 5. Width 1.6 miles. Length 7 miles. Direction 146°–326°. Centre line joins the following positions:

S1: 45° 03.01′ N., 29° 53.4′ E. At 11.5 miles on bearing 124° 24′ from Sulina Lighthouse (nr. 1.20).

S2: 45° 08.9′ N., 29° 47.9′ E. At 5.75 miles on bearing 095° 42′ from Sulina Lighthouse (nr. 1.20).

Thence on the No. 01 Sulina black light and whistle buoy, and afterwards on the line of Sulina Entrance leading lights (301° 12′) into Sulina Channel and so to harbour. On this approach non-degaussed vessels with max. draft 7 m. may navigate.

ANCHORAGES: Generally location of anchorage is communicated by pilot station, whether off-shore or inside the channel.

RESTRICTIONS: Vessels calling at Danube ports are obliged to wait in roadstead of Sulina, at least 1 mile away from the black buoy (a black floating cylinder marked "01" in white, which is lighted at night by green flashing light). All vessels both entering and going out of Sulina Channel as well as during navigation in the channel and Danube, are obliged to have on board a Danube Administration Pilot. As a rule, entering and leaving the Sulina Channel, as well as navigation in the channel, is prohibited after night-fall.

MAX. SIZE: The draft at Sulina Bar is 23 ft. (7.01 m.) Vessels up to 180 m. LOA and 7.01 m. draft can be accepted in Sulina Free Port. No tide restrictions.

Any other changes of official draft are broadcast daily, at 1150 hrs. on 1935 m. long wave.

MINEFIELD: See charts of area.

HEALTH: On arrival in Sulina Harbour vessel has to stop to complete border and sanitary formalities and after vessel has completed same, with Danube Administration Pilot on board, proceed to destination. After the vessel has completed manoeuvring to come alongside berth, she is boarded by the sanitary commission. If the vessel has passed the sanitary inspection she is boarded by border control commission which includes a representative of the Agency, the latter assisting the Master in fulfilling arrival formalities and facilitating meeting of any requirements on ship's part. The Master fills in a form of declaration in 3 copies which together with the Stowage, Plan, Cargo Manifest, etc., are handed to representative of the Agency upon his leaving ship. A supplementary declaration is to be completed by the Master, stating:

1. Who supports disbursement expenses (name, mail address, telegraphic address, number of telex).

2. Who supports the supplies of bunkers, provisions, other services, etc. (name, mail address, telegraphic address, number of telex).

RADIO: Constantza – coast radio station. Call signal YQ1, frequency 462 kHz. Operation daily, starting with 0650, 1250 and 1850 hrs. GMT. Contents of transmission: meteorological and navigation notices. Weather forecasts are broadcast in clear English or codified; radio notices to mariners and navigation warnings are broadcast in Romanian, Russian and English.

VHF: High-powered base-station operates in town of Sulina, 24 hours per day, using call-sign: "Pilot Sulina". All calling must be on Channel 16; all other authorities are to make contact on the same Channel (i.e. Navlomar Sulina, Harbour Captain's Office, Sulina Free Port Administration).

RADAR: Not available.

TUGS: Tugs can be ordered whenever necessary either via Sulina Free Port Administration or to Harbour Office; tugs of 2,400 h.p., 800 h.p.and 600 h.p. available for assistance and manoeuvring of vessels and barges.

BERTHING: 4 berths available, of which 2 are in the Maritime Transit Basin and 2 on the Danube River's wharves, both of them 180 m. in length.

Loading/discharge operations performed with floating equipment belonging to Sulina Free Port Administration which also provides shore equipment.

Transhipment with vessel's own gear (i.e. for heavy lift cargo, etc.) possible at all times of year inside the Maritime Transit Basin, or off-shore; for these kinds of operations, assistance (tugs, stevedoring, specialists) from Sulina Free Port Administration is optional.

CRANES: 5 floating cranes of capacity 10 tons to 32 tons available at all berths.

BULK CARGO FACILITIES: No special facilities available. Bulk fertilisers can be transhipped ex-barge, fertilisers in bags can also be stored in covered warehouse. Several types of ore can be handled and stored in open spaces.

SPECIALISED CARGO HANDLING FACILITIES: None available.

BRIDGES: No bridges.

STEVEDORES: Stevedores available 24 working hours per day, in 3 shifts, mechanised assistance available.

On Saturdays from 1400 hrs. till Monday 0700 hrs., or same interval before and after legal holidays, no shifts available except by previous special arrangements.

MEDICAL: Full hospital facilities without prior notice.

DENSITY: At the mouth of the Danube River, average salinity about 1018.

FRESH WATER: Fresh water available at all times from pumps in the Maritime Transit Basin and on several wharves of the town of Sulina.

FUEL: Fuel and complete stock of Shell Marine lubricants available. Prior notice at earliest convenience.

FIRE PRECAUTIONS: Usual fire precautions.

CONSULS: No consulates in Sulina.

REPAIRS: Routine maintenance and boilermaking assistance to light engineering standards. No foundry available. Mechanical workshop with qualified personnel available.

DRY DOCKS: A slipway of 6,500 tons displacement is available.

SURVEYORS: "Lloyd's" Agent as well as representatives of other classification societies and official surveyors can be brought in at short time.

GANGWAY/DECK WATCHMEN: Not necessary.

HATCHES: Opening/closing is normally carried out by the ship's crew.

CUSTOMS ALLOWANCES: Custom's procedure is different in Sulina from that at Galati and Braila as Sulina is a Free Port.

All ships operating exclusively in Sulina Free Port are exempted from Customs dues on condition that no prohibited items are brought ashore. Please also note that ships operating exclusively in Sulina Free Port might be required to pay only half of the usual channel taxes.

All the other procedures (changing of money, Custom control, interdiction to bring in or to take out Romanian currency, etc.) are the usual ones in Romanian Ports, and are to be communicated by Agent. (Money changed at the day's rate.)

Duty free shop available.

Agent to advise shipchandler well in advance of vessel's requirements (foodstuff, cigarettes, drinks, etc.).

CARGO GEAR: Rigging of derricks, good working condition of the winches and derricks, is the permanent obligation of the vessel according to requirements of working gangs. The hatch ways must be opened or closed to their full size. The removable beams or covers shall always be stowed on deck on the side where work is not being carried on, so that they may not hinder working gangs or cause accidents. During operations, the vessel is recommended to close the hatches with rain tents, ship's property, if bad weather. If cargo handling gear breaks down during operations, the waiting time of workers is charged against vessel and such time lost for breakdown of winches not to count as laytime.

Also see "Tugs" and "Cranes".

REPATRIATION: All facilities exist for repatriation and change of crew.

AIRPORT: No airport in Sulina. The nearest airport is in Tulcea (about 70 km. up the Danube River), 6 flights weekly to Bucharest.

TIME: Local time is GMT plus 2 hours. Summer time is GMT plus 3 hours, Summer programme lasting from end of April till end of September.

HOLIDAYS: Official holidays: 1st and 2nd January, 1st and 2nd May, 23rd and 24th August and 30th December. Cargo work can be arranged for these days.

TELEPHONES: This service is available aboard ship, at the Post Office or at Agency Department (Navlomar) Office. Telephone number of Sulina Free Port Administration is (915) 43664, 43242, 43243; local 325.

SERVICES: No special services available.

SHORE LEAVE: When Immigration formalities have been fulfilled, crew can go ashore with shore passes provided by the Agent.

IDENTIFICATION CARDS: Shore passes issued by Coast Guard and provided by the Agent or soldier at the gangway. The passes must be returned to the soldier upon coming back on board.

REGULATIONS: No particular or unusual regulations.

DELAYS: Berthing delays very infrequent.

BANKS: No American or European banks in Sulina, bank facilities can be arranged through Agent by connection to Bucharest, or Tulcea (The Romanian Bank for Foreign Trade).

STORING: See "Prelims" page viii.

1. Vessel can be stored by barge supplied by foreign partners, surveyance and guard of the barges being provided by Sulina Free Port Administration.

2. Previous notification for barge storage compulsory, details to be obtained through Sulina Free Port Administration's representatives.

3. No transhipment into trucks directly possible for the moment.

4. Fork lifts can be used on the jetty to handle stores.

5. No Customs interference regarding storing on the territory of Sulina Free Port, first period (negotiable) of storage free of charges, tariffs to be established by the Administration. Storage possible both in covered and open spaces, on platforms.

6. Riggers belonging either to the Administration or to Romtrans (Specialised Romanian Foreign Trade Enterprise for forwarding activity, which has an office in Sulina Free Port) can be employed, for sorting and arranging cargo on platforms and in warehouses.

GENERAL: From the time a vessel enters the territorial waters of Romania until she leaves the respective zone, i.e. 12 miles, it is compulsory to fly the Romanian flag. Ships that call at Galatz for the first time and have not got the Romanian flag on board must have it ordered through the Agent immediately upon berthing at Sulina Harbour. Throwing garbage overboard or pumping out dirty ballast or bilge water is allowed only beyond the territorial waters of Romania. Non-observance of these rules may result in fines varying between 3,000 and 10,000 lei imposed by the Harbour Master.

DEVELOPMENTS: The Maritime Transit Basin will allow, at the end of 1990s, entrance of 16 vessels of 180 m. in length at one time, and their operations with highly improved shore and floating equipment. A workshop for ship breaking will come into operation in Sulina Free Port.

SHIPMASTER'S REPORT: February 1984.

The entrance route to Danube River from Gura Sulina for Galatz and Braila is as follows: Arrival point Lat. 44° 47′ N., Long. 29° 55.8′ E. and from this point vessel is to steer 000° True till Lat. 45° 05.1′ N., Long. 29° 55.8′ E. and from this point 301° True to No. 1 Buoy. Because of shallow water the vessel must not go South of No. 1 Buoy. With radar, Sfantul Gheorge lighthouse was observed at 15 miles, Sulina at 20 miles and lighthouse at South Mole at 15 miles. Anchorage area is 2 miles East or 1 mile North of No. 1 Buoy. Pilot on VHF Channel 16. Pilot embarks 1 mile East of the No. 1 Buoy.

After anchoring near to Sulina, Customs, Immigration and Doctor board the vessel for clearance. After clearing the vessel another two Pilots board and vessel proceeds to destination. No navigation is permitted during the night for large vessels.

AUTHORITY: By Decree of State Council of Socialist Republic of Romania, Sulina Free Port Administration is both specialised foreign trade state enterprise and Port Authority in Sulina Free Port.

Sulina Free Port Administration, 202 Deltei St., 8829 Sulina, Tulcea County, Romania. *Tel:* (915) 43664, 43242, 43243 or local 325. *Telex:* 52294 and 52295. *Contact:* Mr. Micu Mihai, General Director.

AGENT: Navlomar Shipping Agency. Tel: 43008.

Galatz: 20, 13 Junie. Telex: 51260, 61309. Cables: "Navlomar Galatz".

Braila: 2 Imparatul Traian. Telex: 55232. Cables: "Navlomar Braila".

St. Helena

JAMESTOWN: 15.56 S. 05.40 W. **(See Plan Book)**

PORT LIMITS: Within 3 miles radius of the port. Laytime commences at the anchorage.

DOCUMENTS:

4 copies of Crew List.
4 copies of Passenger List.
1 copy of Health Form.

PILOTAGE: No Official Pilot.

ANCHORAGES: The harbour consists of an open roadstead with anchorages shown on charts.

MAX. SIZE: Any size vessel can enter the port. Maximum tide variation approx. 1 m.

HEALTH: Pratique will be granted by the boarding party or by telegram from Port Health Officer. If disease or fever suspected, Port Health should be informed by telegram 24 hours before anchoring so that the necessary precautions can be taken.

RADIO: Name: St. Helena Radio. Call sign for W/T working – ZHH. Frequencies: 500 and 461 kHz. A2, A1. 12963.5 kHz. A1. Working hours: 500 and 461 kHz – Weekdays from 0800 to 2000 GMT. Sundays from 0800 to 1300 GMT. 12963.5 kHz – Daily except Sundays from 1200 to 1300 GMT. Listening watch on Channel 5 and Channel 6.

Call sign for R/T working – St. Helena Radio. Frequencies: 2182 and 3162 kHz A3H, A3J and A3A. 4397.7, 8737.5 and 13150.4 kHz. A3J A3A. Working hours: 2182 and 3162 kHz – Weekdays from 0800 to 2000 GMT. Sundays from 0800 to 1300 GMT. 4397.7, 8735.5 and 13150.4 kHz are only operated on request and ships should answer on Channels 414, 807 and 1217 respectively.

VHF: Harbour Master has VHF facilities. Call sign "Port Control"; Channel 16, working Channel 6, Monday to Friday 0830 to 1600 hrs.

TUGS: None.

BERTHING: Vessels anchor in 18 – 20 fathoms of water.

CRANES: 2×10 ton and 1×30 ton heavy lift crane.

STEVEDORES: 48 hours' notice required by Agents Messrs. Solomon & Co. (St. Helena) Plc, also particulars of tonnage of cargo.

MEDICAL: Harbour Master should be notified if medical attention is required.

TANKERS: No facilities available.

FRESH WATER: Delivered by floating pipe-line at approximately 10 t.p.h.

FUEL: Limited stocks of diesel oil held for local use only.

CERTIFICATES: Vaccination Certificates required for all crew. Derat Certificate should be valid.

CUSTOMS ALLOWANCES: No restrictions. Free use on board.

CARGO GEAR: All discharge carried out by vessel's derricks into lighters.

CONSULS: French Consul. Appointed representatives for Denmark and Norway.

REPAIRS: Small repairs can be carried out (welding or turning, etc.).

DRY DOCKS: None.

SURVEYORS: Messrs. Solomon & Co. (St. Helena) Plc as Cargo Surveyor Agents for Lloyd's.

GANGWAY/DECK WATCHMEN: Supplied by Messrs. Solomon & Co. (St. Helena) Plc.

HATCHES: Opening/closing of hatches normally carried out by crew.

REPATRIATION: No facilities for crew changes. Only for those left behind for hospitalisation.

AIRPORT: No airport on St. Helena.

TIME: GMT throughout the year.

HOLIDAYS: New Year's Day (1st January); Good Friday; Easter Monday; St. Helena Day (21st May); Whit Monday; Queen's Official Birthday; August Bank Holiday; Christmas Day (25th December); Boxing Day (26th December). Cargo work can be arranged except on Christmas holidays.

POLICE/FIRE/AMBULANCE: Police and Fire, Tel: 626. Ambulance, Tel: 241.

SHORE LEAVE: No restrictions unless imposed by Immigration Department.

DELAYS: No delays in berthing. Loading or discharge can be delayed due to bad weather.

AUTHORITY: Harbour Master, The Wharf, Jamestown, Island of St. Helena, South Atlantic Ocean. *Telex:* 202 Govt HI. *Contact:* John Gilbert Cranfield, Harbour Master.

St. Kitts

BASSETERRE: 17.18 N. 62.43 W. (See Plan Book)

DOCUMENTS:
3 copies of Crew List.
3 copies of Passenger List.
1 copy High Duty Cargo List.
1 copy Crews' Personal Effects List.
1 copy Clearance from last port.
2 copies Ship's Stores List.
7 copies Manifest.
2 copies Bills of Lading.

ANCHORAGES: Harbour at Basseterre is an open roadstead and safe anchorage will be found at a distance of 0.25 to 0.5 miles from the shore opposite the piers in the centre of the town.

RESTRICTIONS: None.

HEALTH: The Harbour Master boards all vessels on arrival at port and inspects the clearance from the last port. If there are no health problems the vessel is immediately granted Pratique. If there is suspected disease or fever on board pre-notification is recommended. If this is done the Harbour Master will have a Medical Officer with him when he boards the ship on arrival.

RADIO: Contact is through Barbados Radio, call sign 8PO.

VHF: Port and Police on Channel 16 throughout 24 hours.

BERTHING: Main Berth: Length 400 ft., depth 30 ft.

Ro/Ro Berth: When berthing dolphins completed berth will be able to handle vessels 400 ft. – 700 ft. LOA. Depth of water 16 ft.

Sugar Loading: Mobile unloaders rated at 150 t.p.h.

CRANES: 5 ton lift, mobile (link-belt); 10 ton lift, mobile (Jones).

Cranes used on cargo pier for offloading barges, ferrying cargo from ship to shore and discharging 20 ft. containers.

STEVEDORES: ETA should be advised 24 hours before arrival of vessel, also tonnage to be discharged and number of gangs required. Discharging rate: 15 tons per gang per hour on bags. 6 tons per gang per hour on general cargo.

MEDICAL: Advance notice if possible – hospital facilities available. Valid Vaccination Certificate for passengers disembarking but not for in transit or cruise ship passengers.

DENSITY: 1025. No tides.

FRESH WATER: Available alongside main berth.

FUEL: Bunkering facilities soon to be available.

GANGWAY/DECK WATCHMEN: Not required.

OPENING/CLOSING HATCHES: Done by stevedores.

CUSTOMS ALLOWANCES: Half pound tobacco or 200 cigarettes. Wine and/or Spirit, 1 bottle.

IDENTIFICATION CARDS: Not needed, however, crew members are liable to be checked by Port Authority on entry and exit by security guard.

CONSULS: Dominican Republic, France, Netherlands.

REPAIRS: The sugar factory has a well-equipped shop for machine, welding and maintenance work. They can assist with most engine repairs.

DRY DOCKS: None.

REPATRIATION: Crew changes and repatriation can be arranged.

AIRPORT: 2 miles from town with regular daily connections to Antigua and Puerto Rico where onward passages to Canada, U.S.A., Great Britain and Europe can be arranged.

TIME: GMT minus 4 hours; no alteration.

HOLIDAYS: New Year's Day (January 1st); Good Friday; Easter Monday; Whit Monday; Queen's Birthday (date fixed by announcement annually); August Monday; Independence Day (September 19th); Christmas Day (December 25th); Boxing Day (December 26th).

POLICE/AMBULANCE/FIRE: Police Tel: 999; Fire Tel: 999; Ambulance (Hospital) Tel: 2515.

TELEPHONES: Available on request.

AUTHORITY: The St. Christopher – Nevis Port Authority, P.O.Box 186, Basseterre, St. Kitts. *Tel:* 4122. *Contact:* The General Manager.

AGENT: S. L. Horsford & Co. Ltd., P.O.Box 45, Basseterre, St. Kitts, W.I. Cable adress: Horsford, St. Kitts. Telex: 6822 Horsfd Skb Kc. Tel: Shipping Manager, Office 4086, Home 2101; Secretary, Office 2429, Home 8032.

St. Lawrence Seaway

ST. LAWRENCE SEAWAY (See Plan Book)

DOCUMENTS: For Agent in Montreal, 3 unfreighted copies of Complete Manifest for Seaway Toll purposes covering all cargo to be discharged in the Great Lakes.

The St. Lawrence Seaway Authority requires one Transit Declaration Form. Also for cargo to or from overseas one unfreighted copy of the complete Manifest is required.

In first U.S. port, a "Traveller" is made up by the Customs Inspector with the following documents:

2 complete sets of U.S. Cargo Manifests, plus 6 copies for Agents.
1 set Manifest of Cargo for first U.S. port.
4 Stores Lists.
4 Personal Effects Lists.
4 Firearms and Ammunition Lists.
4 Crew Lists, Form 1–418.
4 Narcotics Lists.
4 Vessel's Itinerary Lists.
Vessel's Registry and copies of Paid Tonnage Tax Certificates.
Health Pratique.
Clearance from previous port.
2 sets Bills of Lading.
3 copies Stowage Plan.

In subsequent U.S. ports the following are required:

5 sets Manifest of Cargo for that port.
The Traveller and Permit to Proceed issued in previous port.
2 Stores Lists.
2 Personal Effects Lists.
2 Firearms and Ammunition Lists.
2 Crew Lists.
2 Narcotics Lists.
2 Sets Bills of Lading.
3 copies Stowage Plan.

Vessels navigating St. Lawrence Seaway are required to complete applications for:

(1) Certificate of financial responsibility,
(2) Certificate of Insurance, form FMC 225,
(3) Oil discharge Assurity Bond, form FMC 226,
(4) Guarantee in respect of liability for discharging oil, form FMC 227.

These applications have to be filed with the Secretary of the Federal Maritime Commission before a certificate is issued. The oil pollution liability certificate should be retained aboard the vessel.

ICE ADVISORY SERVICE: Ships inbound from seaward between December 15th and April 15th should advise the Ice Information Officer, Sydney, 36 hours prior to entering Cabot Strait, stating their position, destination, whether loaded or in ballast. This procedure will facilitate the passing of ice information to the ship as necessary. Ice information is also available from radio stations at Halifax, Seven Islands, Wirringate and Grindstone. The Canadian Broadcasting Corporation Maritime Network also broadcasts ice information daily during the Winter navigation season. Supplementary ice information may also be obtained from the Canadian Marine Service Icebreakers.

During the ice season, radio broadcasts of ice information are made twice daily from Marine radio stations as follows: Cape Race, Newfoundland; Fox River, Quebec; Mont-Joli, Quebec; Halifax, Nova Scotia.

PILOTAGE: The first pilot station when entering the St. Lawrence River is at Les Escoumins, 80 miles West of Father Point. This Pilot will take the ship to the Quebec Pilot station 121 miles to the West. Off Quebec a new Pilot boards to take the ship to Trois Rivieres, where there is another change of Pilot for the remaining trip to Montreal.

Pre-clearance: Vessels intending to transit the St. Lawrence Seaway must be pre-cleared by a representative who shall assume responsibility to the authority for payment of all tolls and charges to be incurred.

Application for pre-clearance Form S-VM 429 may be obtained from the St. Lawrence Seaway Authority, 202 Pitt Street, Cornwall, Ontario K6J 3P7, or from the St. Lawrence Seaway Development Corp., Massena, New York 13662.

RESTRICTIONS: The average navigation season in the Montreal–Lake Ontario section of the St. Lawrence River is from April 1st to December 15th.

Montreal to Lake Ontario – Locks No. 1 to 7: Length between the breast wall and ship arrester 233.48 m., width 24.38 m., depth 9.14 m., channel depth 8.23 m.

Welland Canal – Locks No. 1 to 7: Length between the breast wall and ship arrester 233.47 m. to 234.21 m. No. 8: Length 365.76 m., width 24.38 m., depth 9.14 m., channel depth 8.23 m.

Sault Ste. Marie – Canadian Lock: Length 236.83 m.; width, 17.98 m. The channel depth (lower end) to the Canadian Lock is 6.10 m., with a normal depth of 5.56 m. over the sill. As Easterly gales raise, and Westerly gales lower the water levels below the Lock temporarily, it is recommended that Masters of larger vessels ascertain the available depth from the canal office prior to locking.

Information for U.S. Locks may be obtained from U.S. Corps of Engineers, Detroit District.

Speed Limits: 9.0 knots upbound, 10.5 knots downbound in the Beauharnois Canal; 8 knots in the Welland Bypass Channel and 6 knots in all other canals. The speed limits vary from 8.5 knots to a maximum 16 knots in remaining sections of the St. Lawrence River. Maximum speed limits for vessels in excess of 12 m. in length are contained in the Seaway Handbook. Changes are indicated through Seaway Notices.

For information relating to speed limits, on the Detroit, St. Clair and St. Mary's rivers contact the U.S. Coast Guard, Cleveland, Ohio or the Canadian Coast Guard, Toronto, Ontario.

MAX. SIZE: Length 222.5 m., beam 23.16 m., draft 7.92 m. Masts must not exceed 35.5 m. above water level. Other limiting dimensions are obtained in the Seaway Regulations.

HEALTH: All ocean-going vessels must obtain Free Pratique before entering the Seaway. Vessels entering the Seaway direct may receive quarantine inspection and clearance from the Canadian authorities at Montreal while at anchor awaiting entrance to the Seaway.

RADIO: *Notice of Arrival:* Master must give at least 24 hours' notice to Commander, 9th Coast Guard District, Cleveland, Ohio, of the vessel's ETA at Snell Lock. Also at least 24 hours' notice of ETA at first U.S. discharge port is required.

St. Lawrence Seaway Authority: Every vessel shall provide at least 24 hours' notice of arrival to the nearest Seaway Station, prior to an initial transit or in case reinspection of the vessel is required.

Calling In requirements are detailed in the Seaway Regulations.

Great Lakes: It is recommended that vessels within a radius of 30 nautical miles of a shore station use their FM transmitting and receiving equipment to ensure better connections. This pertains especially to vessels at anchor or in the proximity of a port or berth.

Radio Stations: Buffalo, New York, marine operator. Port Burwell, Ontario, marine operator. Geneva, Ohio, marine operator. Loraine, Ohio, marine operator. Rogers City, Michigan, marine operator.

IDENTIFICATION CARDS: In the first U.S. port, the Immigration Officer requires an alphabetical crew list made up on Form 1–418 and visaed by the American consul in the last overseas port. This crew list should contain the name of every crew member on board. Also needed are 3 copies of this crew list on the same form. The Immigration Officer will require all seamen's books and passports, to issue the completed crew landing permits made out on Form 1–95A. The Master will be given a crew list receipt which will indicate the names of crew members detained on board, if any. In case a crew member is detained on board, he cannot go ashore, and at irregular times an Officer of the Immigration Service will check if the crew member is on board. A fine of $1,000 will be imposed on the vessel for each detained crew member who is not on board.

TUGS: Whistle signals differ from those in international usage and are as follows:

1. Ship to Tug: 1 Long and 1 short (—.) = ship ready to proceed, O.K. or all right. 1 Long and 2 Short (—..) = let go the bow tow-line. 1 Long and 3 Short (—...) = let go the stern tow-line.
2. Both Ship to Tug and Tug to Ship: 1 Short(.) = work propeller ahead when stopped, *or,* stop propeller when working, either ahead or astern. 2 Short (..) = work propeller astern. 3 Short (...) = slow down or check. 4 Short (....) = work propeller strong in the same direction it is working at the time the signal is blown. 5 or more Short blasts (.....) = the standard danger signal.

SEAWAY EQUIPMENT: *Radio-telephone Equipment:* All vessels, other than pleasure craft of less than 19.80 m. in overall length, must be equipped with VHF radio telephone equipment, in addition to the FM equipment otherwise required. The radio transmitters must have sufficient power output to enable the vessels to communicate with Authority Stations from a distance of 48 km. and must be fitted to operate from the wheelhouse and to communicate on 156.55, 156.6, 156.65, 156.7 and 156.8 MHz.

Stern Anchors: Every vessel of more than 110 m., the keel of which was laid after January 1, 1975 is required to be equipped with a stern anchor.

Propeller Direction Alarms: Every vessel of 1,600 g.r.t. or more shall be equipped with

(a) propeller direction and shaft r.p.m. indicators located in the wheelhouse and the engine room; and

(b) visible and audible wrong-way propeller direction alarms located in the wheelhouse and the engine room, unless the vessel is fitted with a device which renders it impossible to operate engines against orders from the bridge telegraph.

Pitch Indicators and Alarms: Every vessel of 1,600 g.r.t. or more equipped with a variable pitch propeller shall be equipped with:

(a) A pitch indicator in the wheelhouse and the engine room; and
(b) effective April 1, 1984, visible and audible pitch alarms in the wheelhouse and engine room to indicate wrong pitch.

Disposal and Discharge Systems:

Every vessel not equipped with containers for ordure shall be equipped with a sewage disposal system (enabling compliance with applicable laws relative to sewage disposal).

Garbage on a vessel shall be:

(a) destroyed by means of an incinerator or other garbage disposal device; or

(b) retained on board in covered, leakproof containers, until such time as it can lawfully be disposed of.

No substance shall be discharged or disposed of onto a lock or tie-up wall by any means, including overboard discharge pipes.

Vessels not fitted for the Seaway as prescribed above, will incur expenses for the rental, installation and removal of compulsory fittings.

POLLUTION:

1. No vessel shall
   (a) emit sparks or excessive smoke; or
   (b) blow boiler tubes.

2. No vessel shall discharge into Seaway waters any substances not in conformity with applicable United States Federal Regulations and Canadian Regulations with the exception of the waters of the Welland Canal where two specific zones are established in which no substances shall be discharged, namely:
   (a) from lock 7 to mile 17; and
   (b) from lock 8 to the outer Port Colborne piers.

3. A record shall be kept of each location within the Seaway or adjacent waters where bilge water has been discharged.

4. Except as authorised by the Authority or the Corporation, no vessel shall discharge garbage, ashes, ordure, litter or other materials.

REGULATIONS: For additional information on regulations and procedures, Masters and Owners are urged to refer to the Seaway Handbook and Seaway Notices.

AUTHORITY: The St. Lawrence Seaway Authority, 202 Pitt Street, Cornwall, Ontario K6J 3P7. *Tel:* (613) 932-5170. *Telex:* 05-811517. *Contact:* Director of Operations and Maintenance.

St. Lucia

CASTRIES: 14.01 N. 61.00 W. (See Plan Book)

PORT LIMITS: From Lat. 14° 01′ 24″ N., Long. 61° 00′ 05″ W. thence in the direction of 301°T for 1 mile, thence in the direction of 211°T for 1.2 miles, thence in the direction of 121°T for 0.88 miles to La Toc Point at Lat. 14° 30′ 00″ N., Long. 61° 00′ 46″ W. thence along foreshore at the average HW mark from La Toc Point around La Toc Bay to Tapion Point, thence along to the Castries River mouth and thence to the opposite bank including all marine works, wharves and property vested in the Crown. All around the bay to Seraphin Point, thence all around the bay to Veille Ville Point, thence to St. Victor Point and thence all around the shore to Vigie Point and then to Lat. 14° 01′ 24″ N., Long. 61° 00′ 05″ W.

DOCUMENTS:

Report of Ship's Stores. Form 1.
Crew Members' Stores List. Form 2.
List of Unmanifested Cargo. Form 3.
Report of Ship's Manifest. Form 4. (4 copies).
Passenger Lists. (5 copies).
Steamship Company Release. (1 copy).
Crew List. (5 copies).
Clearance from Last Port of Call.
Outbound Cargo.
Loading List.
Customs Report Outwards (Form A7)
Vessel Manifest (Contents of Ship). Form 16. (3 copies).
Entry Outwards and Certificate of Rummage. Forms 9 and 10.
Loading Licence. Form 14.
Clearance. Form 17. Form 18 (Steamship).

Where possible, Cargo Manifests and Stowage Plans should be forwarded by Airmail, ahead of the vessel to the local Agents.

PILOTAGE: Pilotage is compulsory for all craft except for ships of less than 100 g.r.t., Her Majesty's ships, pleasure yachts and fishing vessels.

Notice of ETA and request for a Pilot must be made to the Harbour Master not less than 24 hours before ETA. Cable address: "Paslu". Telex: 6355 Paslu LC. Confirmation of ETA is required 2 hours before arriving at the Boarding Station. Channel 16 VHF is continuously watched and ETA may be confirmed or adjusted on this frequency. Pilot boat is a "Cheverton" built, 8.2 m. LOA, fibreglass hard top, with a "V" hull, single inboard 4236 Perkins diesel engine, complete with navigation and pilot lights. Painted black all around with letter "P" painted in white on both sides of bow. Name of pilot launch "Charles" painted in white at the stern.

The usual International Signals may be employed by vessels requiring a Pilot. The usual pilot boarding point 0.5 miles off Vigie Point. Ships that are 3 hours away are requested to call Vigie Lighthouse on S.S.B. 2182, VHF Channel 16, informing of ETA, draft and length.

Pilot boat stands by on Channel 16 VHF. Pilot station stands by on Channels 14 and 16 VHF.

Pilot boards vessels on the starboard side and for ships outward leaves on the port side.

In the event of bad weather ships will be advised accordingly.

Vessels awaiting Pilot may anchor between 1 and 2 miles N.W. of Vigie Point in 22 m. of water. Rock and sand bottom, very good holding ground, no shelter.

ANCHORAGES/APPROACHES: Deep and sheltered anchorage exists off Castries Harbour entrance. The approach channel is 91.44 m. wide with minimum depth of 14.75 m. to the port proper, which lies within an all protected harbour. The turning basin is 457.20 m. in diameter at a depth of 25.6 m.

Masters familiar with the Port of Castries may be invited to proceed to the Northern Anchorage/Quarantine Area not less than 3 cables off the Vigie promontory.

Care must be taken to drop anchor clear of the entrance range which is for in-going ships, 121°T on the Castries leading lights.

Also see "Pilotage".

RESTRICTIONS: Petroleum tankers are not moved during the hours of darkness except in emergency conditions.

MAX. SIZE: Ships up to 213 m. LOA and 9.1 m. draft can be accepted. No restriction on beam.

Also see "Tankers".

RADIO/VHF: Port Control on VHF Channels 16, 6, 12 and 14. Also 2182, 2146, 2381, 2527, 2582 and 2638 kHz.

TUGS: No tugs are available.

BERTHING: There are six berths numbered 1 to 6 inclusive.

Berth Nos. 1 to 3 are general cargo berths and have a total length of 356.6 m. The draft varies from 5.8 m. at Berth No. 1 to 8.2 m. at Berth No. 3. Berth Nos. 4 and 5 are of recent construction and consist of a reinforced concrete platform supported on concreted piles. Depth of water alongside at LW is 10 m.

Berth No. 4 is a container berth equipped with a heavy lift mobile crane for handling 20 ft. and 40 ft. ISO containers. It has a length of 152.4 m. and storage capacity for approximately 3,500 containers.

A new transit shed with an area of 6,882 sq.m. with cold storage facilities of 2,265.60 cu.m. for reefer cargo.

Berth No. 5 is a break bulk cargo berth as well as Ro/Ro facilities with a ramp 14.6 m. wide. It has a length of 182.9 m. and a depth of 10 m. below LW.

Berth No. 6 is a reinforced concrete deck supported on steel cased piles. The berth is 167.6 m. long and can accommodate vessels of 9 m. draft. It is a general purpose berth and handles banana traffic.

Within the port area there is a total shedded storage capacity of 17,205 sq.m. with a total upland of 15 – 17 hectares.

Dock water density 45.7 gm./cu.m. with prevailing winds from a N.W'ly direction.

Vieux Fort: Depth of 8 fathoms at the entrance and 5 fathoms within the Port. 2 berths, 500 ft. long, 27 ft. 6 in. deep. Also see "Shipmaster's Report".

BRIDGES: There are no bridges or other restrictions to prevent access to the port by vessels of not more than 9 m. draft.

STEVEDORES: The normal working hours are from 0700 – 1600 hrs. Mondays to Fridays. Special arrangements are required outside of the above hours and for Saturdays, Sundays and Statutory Holidays. The hiring or calling of labour are as follows:

Monday to Fridays for work commencing from 0700 – 1100 hrs. request to reach Union before 1500 hrs. previous day.
1100 – 1600 hrs. before 0900 hrs. on the same day.
After 1600 hrs. before 1400 hrs. on the same day.
For vessels working on weekends request to reach Union by 1530 hrs. on Fridays.
Average rate on break bulk general is 15 t.p.h. per gang.

HEALTH: Pratique is usually granted by the Pilot or Boarding Officer and Immigration Department alongside on behalf of the Ministry of Health. In the event of any suspected disease or fever on board, the vessel is not allowed within 91.4 m. of the wharves until Pratique has been granted by the Medical Officer.

MEDICAL: Full hospital facilities available without prior notice.

FRESH WATER: Good quality potable water available in unlimited quantities at 20 t.p.h. per connection ex-quay.

FUEL: Limited quantity for yachts and small vessels only. Refuelling jetty at La Toc Bay owned by Texaco.

TANKERS: Tanker and Liquefied Gas Terminals – available at Coconut Bay through floating pipe-lines.

Also see "Cul de Sac Bay".

CONSULS: British, French, Netherlands, Norwegian, Venezuelan.

REPAIRS: No facilities for large vessels. Routine maintenance or minor repairs are carried out. There is no foundry in the port.

DRY DOCKS: None available.

SURVEYORS: Lloyd's Agents are available and represent other Classification Societies and Surveyors. Others can be obtained from outside at short notice.

GANGWAY/DECK WATCHMEN: Gangway and gate watchmen can be supplied at Union award rates. Hold watchmen are required during discharge/loading operations. Shed watchmen are not necessary.

OPENING/CLOSING HATCHES: Ship's crew shall be required to raise and lower and position beams to the required height, opening and closing of McGregor and pontoon hatches. Wooden hatches are normally handled by stevedores while alongside.

CUSTOMS ALLOWANCES:

1. Wine or spirits not exceeding one quart in all, and
2. Tobacco, not exceeding half a pound, or
3. Cigars not exceeding 50 in number, or
4. Cigarettes, not exceeding 200 in number, or
5. Goods to the aggregate of $50.00E.C. belonging to a passenger, which accompany that passenger and when acquired abroad by him for his personal or household use or as souvenirs or gifts and admitted as such by the Comptroller of Customs.

CARGO GEAR: Discharge of general cargo is usually by ship's gear. Containers, if vessels are not self contained, may be handled by P&H crane 9125TC – 140 ton lorry mounted crane owned and operated by the Ports Authority.

REPATRIATION: Scheduled aircraft connect with all the English speaking islands of the Lesser Antilles several times daily from Vigie Airport which is 2 km. distant from Port Castries. Direct overseas flights arrive and leave from Hewanorra International Airport, Vieux-Fort at least once a week for the United Kingdom, New York, Miami and Caracas, Venezuela.

TIME: Local time is GMT minus 4 hours. Summertime is not used. All ETAs and other messages should be made in local time.

HOLIDAYS: New Year's Day, New Year's Holiday, Independence Day (22nd February), Carnival Monday, Good Friday, Easter Day, Easter Holiday, May Day (Labour Day) (1st May), Whit Monday, Corpus Christi, Queen's Birthday, Emancipation Day (1st Monday in August), Thanksgiving Day (1st Monday in October), National Day (13th December), Christmas Day, Boxing Day.

The port is closed for work on Christmas Day, Good Friday and May Day (Labour Day).

POLICE/AMBULANCE/FIRE: All emergency services are available through Port Police Station on Jeremie Street, within walking distance from the port.

Emergencies can be reported to Vigie Lighthouse on Channel 16 at any time. Emergency Police dial 99; emergency Ambulance dial 95; emergency Fire dial 97.

TELEPHONES: This service is available aboard ships at all berths by prior arrangement through the Agents. Standard rates apply.

SHORE LEAVE: When Immigration and Customs requirements have been satisfied there is no restriction on crew shore leave so long as they rejoin the vessel before departure. They should carry some sort of identification card or shore passes for security purposes especially for non-English speaking persons.

DELAYS: There are no delays for want of a berth. Berthing delays are very infrequent and no labour shortages.

REGULATIONS: Castries is within the Northern zone of tropical storms. The hurricane season usually extends from May to October each year and the port may be more or less affected at any time during that period. When a storm is expected to pass over the island, ships may be placed on short notice for sea in such circumstances and required to maintain themselves in seagoing condition at all times.

BANKS: Bank of Nova Scotia, P.O.Box 301, William Peter Boulevard, Castries, St. Lucia. Tel: 2292/95. Telex: 6385 Scobank L.C.

Barclays Bank International Ltd., Bridge Street, Castries, St. Lucia. Tel: 3306/3300. Telex: 6348 Bacladom L.C.

Canadian Imperial Bank of Commerce, P.O.Box 350, William Peter Boulevard, Castries, St. Lucia. Tel: 3751/3753/3739. Telex: 6352 Canbank L.C.

Royal Bank of Canada, William Peter Boulevard, Castries, St. Lucia. Tel: 2245 and 2684/85. Telex: 6309 Royalbk L.C.

EMERGENCY CO-ORDINATION CENTRE: The Headquarters of the Central Emergency Organisation is the Prime Minister's Office, Government Buildings, Castries, St. Lucia. Tel: 3203 and 3016. Telex: 6394 Foraff LC.

DEVELOPMENTS: Two dolphin berths have been constructed at Pointe Seraphin for passenger vessels with depths of 10 m. and 11.6 m. respectively. The infrastructure has not been completed and is intended to be used as a shopping centre.

SHIPMASTER'S REPORT: 1979.

Pilotage: Compulsory. Pilot boards 0.75 miles West of Vigie Light, ladder usually on the port side.

Restrictions: Vessel is able to enter and leave at any stage of the tide, day or night.

Max. Size: Max. draft 23 ft. 6 in.

VHF: Pilot on Channel 16.

Berthing: No. 6 Berth, West Wharf: Distance from entrance to berth 1 mile. Max. LOA (Approx.) 550 ft. Max. draft 23 ft. 6 in. There is mechanical equipment available to handle palletised cargoes, adequate storage space for breakbulk cargoes and palletised cargoes. The loading rate for bananas is 15 t.p.h. per gang with ship's derrick and the labour was satisfactory. Accommodation ladder required.

Services: Fresh water, fresh provisions, repair facilities, machine shop, Airport, laundry services, bunker fuel oil, diesel oil, lubricating oils, doctor, hospital, groceries and meats.

SHIPMASTER'S REPORT: 1979. Vieux Fort.

Pilotage: No ship exceeding 100 n.r.t. must enter without a Pilot. Pilot boards 0.5 miles S.W. of Mathurin Point (there is a strong N.W. current off Mathurin).

Restrictions: Vessel may enter and leave at any stage of the tide, day or night.

Max. Size: Max. LOA 520 ft.

Tugs: Tugs are not available and are not necessary for docking and undocking.

VHF: Available.

Berthing: One berth only available. Distance from entrance to berth 0.5 miles. Nature of bottom at the berth is mud. All banana loading is carried out by the side doors. Vessels berth port side to the quay. A very high rate of loading is attained (100 t.p.h.). A limited amount of mechanised equipment for handling palletised cargoes is available and also limited storage space for palletised and breakbulk cargoes. No equipment for handling containers is available, but there are storage facilities for containers arriving by tug/barge. Accommodation ladder required.

Services Available: Only fresh water, airport and doctor available (i.e. no fuel or provisions available).

AUTHORITY: Saint Lucia Air & Sea Ports Authority, P.O.Box 651, Castries, St. Lucia, West Indies. *Tel:* 22893/4. *Telex:* 6355 Paslu LC. *Contact:* George C. Girard, General Manager.

CUL DE SAC BAY: 13.59 N. 61.02 W. **(See Plan Book)**

LOCATION: The facilities of Hess Oil St. Lucia Limited (HOSLL) are located in Cul de Sac Bay (Lat. 13° 59′ N., Long. 61° 02′ W.) on the West coast of the island of St. Lucia, West Indies. Ready access for all vessels coming in from the Atlantic is provided by the St. Lucia Channel which lies between St. Lucia and Martinique. This channel is 17 miles wide and has general depths of 914 m. (500 fathoms).

PORT LIMITS: For tendering purposes a vessel will be considered as having taken arrival when it reaches the Pilot Station 2.5 miles due West of Bananes Point. A vessel's "Notice of Readiness" will not be accepted until the vessel has initially reached this point and notified HOSLL by VHF.

DOCUMENTS: The following documents are required for entry and clearance and are to be presented to the respective officers on boarding:

General Declaration for Ships.
Cargo Declaration.
List of Unmanifested Cargo.
Crew List.
Crew Members' Stores List.
List of Packages or Parcels Intended for discharge by Crew Members.

Normally it is necessary to have Customs entry completed before cargo operations can commence.

Customs clearance is accomplished by the vessel's Agent, cargo documents are placed onboard by the Terminal Department.

PILOTAGE: Service is available 24 hours a day and is compulsory for all vessels entering or leaving Cul de Sac Harbour. A HOSLL Pilot will assist the Master of any vessels docking or undocking at the Hess facilities, however, the Master of each vessel retains full responsibility for his ship at all times.

Vessels must remain at the pilot station 2.5 miles due West of Bananes Point until boarded by the HOSLL Pilot who will be placed aboard by a company tug.

The HOSLL Marine and Terminal Office is equipped with a VHF radiotelephone having the following channels:

Initial Contact: Channel 16.
Working Contact: Channels 11, 9 and 6.

Ships must call the HOSLL marine office on VHF at least 3 hours before arrival at the pilot station and advise of any change in their ETA.

Pilot Ladders: If the following regulations are not complied with, HOSLL Pilots may refuse to embark or disembark thus delaying the vessel.

(i) The Officer responsible for the embarkation and disembarkation of the Pilot is to be a Deck Officer.

(ii) The pilot ladder is to be properly secured and adequately lit at night.

(iii) The Pilot should be able to pass safely and conveniently from the head of the ladder onto the ship's deck. Where portable stanchions and bulwark ladders are used for this purpose, the portable stanchions must be rigidly secured to the ship's structure to prevent being unshipped and supported at not less than two points to prevent lateral movement. The bulwark ladder should also be independently attached and firmly secured. The stanchions should be of reasonable height and adequately capped to allow a firm grip.

(iv) The ladder is to be in good condition and its treads are to remain horizontal. The treads are to have a rough upper surface.

(v) The length of the ladder should not exceed 30 ft. Whenever the distance from sea level to a point of access on the ship is more than 30 ft. access from the pilot ladder to the ship must be by means of an accommodation ladder or other equally safe and convenient means.

(vi) The ladder is to be rigged so that each step rests firmly against the ship's side. Spreaders are to be provided not more than 10 ft. apart to prevent the ladder twisting.

(vii) A man rope or a safety line is to be secured at the vessel's rail and lowered over the side adjacent to and for the full length of the pilot ladder. A lifebuoy with self-igniting light is to be readily available.

(viii) The ladder is to be rigged well clear of any overboard discharges and at a place where the best lee can be provided to the boat carrying the Pilot.

(ix) Whenever a mechanical pilot hoist is used, a standard pilot ladder shall be at hand, ready for immediate lowering in the event of a hoist malfunction.

APPROACHES: Cul de Sac Bay is entered from the open sea between Bananes Point about 1 mile North of Marigo Point, and Ciceron Point about 0.75 mile farther Northeast. The tanker port area of Cul de Sac Bay ranges in depth from 40 ft. to 90 ft. below mean low water.

Vessels shall have their anchor windlass manned and their anchors ready to let go upon entering the approach to Cul de Sac Bay.

Navigation Aids: The entrance to Cul de Sac Bay is marked on the North at Ciceron Point by a 7 ft. × 7 ft. square green day marker mounted on a 25 ft. tower. The 7 mile flashing green light for this aid at elevation +40 ft. is programmed to flash 0.6 secs. on −5.4 secs. off.

On the South side of the entrance Bananes Point is marked with a 7 ft. × 7 ft. triangular red day marker mounted on a 15 ft. tower. The 7 mile flashing red light at elevation +85 ft. is programmed to flash 0.4 secs. on −3.6 secs. off.

A 10 mile leading light with a 4 ft. × 16 ft. day marker is installed upland at elevation +115 ft. This white light is programmed to flash 0.4 secs. on −3.0 secs. off.

All elevations given are above mean sea level.

At the inshore end of the bay, small buoys with flashing lights mark a submerged wreck and the shoal areas at the East end of Cul de Sac Bay.

ANCHORAGES: No anchoring is permitted in Cul de Sac Bay without specific permission from the HOSLL Marine Manager.

RESTRICTIONS: Only vessels inbound or outbound from Cul de Sac Bay may use or be present in the Cul de Sac approach area. No vessel shall enter Cul de Sac Bay except for the purpose of using the facilities located therein and then only in compliance with the directions of the HOSLL Marine Manager.

Ballast Drafts:

Vessel dwt	*Forward*	*Aft*
Under 20,000	12 ft.	18 ft.
20,000 to 35,000	14 ft.	20 ft.
35,000 to 50,000	15 ft.	21 ft.
50,000 to 85,000	18 ft.	24 ft.
85,000 to 150,000	28 ft.	32 ft.
150,000 to 200,000	30 ft.	34 ft.
Over 200,000	40 ft.	40 ft.

These guidelines will be adjusted as weather and vessel handling characteristics dictate. Advice concerning any variance will be provided to the vessel by the Pilot in ample time to prevent any unnecessary delays to vessel's ballasting.

MAX. SIZE:

Dock No. 2 (VLCC Berth):

Length – 1,300 ft. LOA.
Beam – No restrictions.
Draft – 82 ft.
DWT – 400,000 long tons.

Larger vessels can be accommodated, however, each such move must be discussed on an individual basis prior to entry.

Dry Cargo Dock:

Length – 750 ft. LOA.
Beam – No restrictions.
Draft – 40 ft.
DWT – 50,000 long tons.

HEALTH: Pratique is required and will be granted by the Customs/Immigration or Health Official boarding the vessel.

All vessels arriving from a foreign port will be boarded by Customs and Immigration Officers. VESSEL PERSONNEL ARE NOT ALLOWED ASHORE UNTIL PERMISSION IS GRANTED FROM THESE OFFICERS.

Quarantine is required only if vessel is coming from a plague infected area or if illness of a suspicious nature or there is a death (from any cause) onboard. The Master is obligated to report to the HOSLL marine office any of the above circumstances well in advance of the vessel's arrival at the pilot station in order that the Health Officials may be notified – failing which the vessel may be delayed.

RADIO: Masters must advise both HOSLL – St. Lucia and their Agents by radio 72, 48 and 24 hours in advance of their ETA giving the vessel's name, date and hour of arrival (local time) and the name of their past port of call otherwise delays to the vessel may result.

VHF: VHF radio frequencies:

1. Calling only – Channel 16
2. Harbour operations – Channel 11
3. Pilotage – Channel 9
4. Agency – Channel 6

Harbour tugs and the HOSLL Marine Dispatchers monitor VHF frequencies 24 hours a day. VHF call sign: Hess St. Lucia.

TUGS: Tug assistance in the harbour, docking and undocking is mandatory and is provided by diesel tugs, stationed in the port to provide this service. Additional tugs are available when required.

When tugs are alongside or assisting a vessel, all cargo tank openings must be closed, unless the cargo tanks are gas-free.

BERTHING:

Dock No. 2 (VLCC Berth): Vessels using this berth will be turned in Cul de Sac Bay and docked port side to.

This dock is equipped with four 16 in. Chiksan arms for handling crude oil and one 16 in. Chiksan for dirty ballast.

Dry Cargo Dock: Vessels using this berth will dock port side to.

This dock is equipped with:

1. Three 10 in. hoses for ballast.
2. Three 10 in. hoses for crude.
3. One 10 in. hose for distillates.
4. One 10 in. hose for gasoline.
5. One 10 in. hose for asphalt.

Also see "Max. Size".

Moorings: A line handling vessel and personnel will be provided for mooring.

Vessels shall at all times remain adequately secured alongside the berth by the use of ropes or wires which are in good condition and properly sized for the load they are likely to incur. Mooring lines shall be regularly tended and kept taut.

The use of automatic tensioning winches to hold mooring lines is forbidden.

Immediately on docking, emergency towing wires of sufficient length to reach the water's edge, with eyes on the outboard ends, must be paid out from the offshore bow and the after quarter. The inboard ends must be made fast to the vessel's bitts.

Wires shall be in good condition, of adequate strength and adjusted as necessary throughout loading/discharging operations to keep the eyes at or above the waterline at all times.

Rat Guards: Rat guards are required only if a vessel is coming from a plague infected area.

Gangway: Where HOSLL provides the gangway, a safety net will be rigged. When the vessel's gangway is used, we strongly urge the use of a vessel supplied safety net under the gangway.

NOTICE OF READINESS: Notice of Readiness to load or discharge is a warranty that the vessel is in all respects ready to load or discharge, and that all of the vessel's equipment (including, but not limited to tanks, pumps, valves and pipe-lines) is ready and fit to load or discharge petroleum and/or petrochemical products. HOSLL reserves the right to refuse acceptance of such Notice of Readiness unless the vessel is in all respects ready to load or discharge.

A vessel will not be deemed ready to load or discharge and pumping will not commence until the Senior Deck Officer shall have executed and delivered to HOSLL the "Declaration of Inspection Prior to Bulk Cargo Transfer".

LOADING/DISCHARGING: Loading or discharging must not start until the Master or Chief Officer has:

(a) Signed a certificate acknowledging receipt of HOSLL's Terminal Regulations.

(b) Displayed in prominent positions on board "No Smoking", "No Naked Light", "No Visitors" notices.

(c) Jointly executed a HOSLL "Declaration of Inspection" with the Terminal Representative certifying that all necessary valves ashore and aboard are properly set; that the agreed loading/discharging signals are understood, and that all other matters relating to safe cargo transfer operations are being carried out.

Bonding Cable: A ground wire from the dock grounding system shall be connected to all vessels or barges loading/discharging petroleum before any hose connections are made. This cable is not to be disconnected until after all hoses or Chiksan arms have been disconnected and blanked off properly.

Connecting and Disconnecting Hoses: A crew will be provided by the terminal to connect and disconnect hoses and Chiksan arms on the vessel. Vessels should have blinds removed from the cargo lines, reducers installed and drip pans in place on arrival at the dock. The HOSLL Dispatcher will advise on arrival the size and number of hoses or arms to be connected. Also see "Berthing".

Communications: HOSLL will supply a VHF radio to the vessel for emergency communication between the vessel and the dock watch during loading/discharging operations.

Cargo Handling Signals: All vessels loading or discharging petroleum cargoes shall fly a red (bunker) flag between the hours of sunrise and sunset and during the night show a red light visible from all parts of the horizon at a distance of not less than 1 mile.

Weather Conditions: The loading and discharge of all crude petroleum and its products will be stopped during any severe electrical storm.

Loading of low-flash products will be stopped during periods of calm when the heavy vapours cannot be dispersed readily enough to prevent hazards from accumulating gas pockets. Vessel's Officers are cautioned to be on their guard during such conditions.

In the event of abnormal weather conditions in the area such as a hurricane, vessels will be notified that additional moorings are required. If the situation so demands, Masters may be instructed to suspend all operations and proceed to sea until normal weather conditions again prevail.

Demurrage: Vessels are required to vacate berths promptly upon completion of cargo handling operation (loading or discharging operations as the case may be). Permission to lay alongside at any time the vessel is not engaged in cargo handling operations must be granted in writing by the Marine Superintendent.

If any vessel fails to vacate its berth upon completion of cargo handling operations and expiration of free laytime for dock usage as outlined below, the vessel will be responsible as follows:

(a) To pay dock demurrage at the rate as specified by HOSLL per hour or a *pro rata* share thereof for a fraction of an hour.

(b) To hold HOSLL harmless for any demurrage and damages incurred as a result of other vessels awaiting berth or for any other consequences of its failure to properly vacate the berth.

The following rules shall govern the determination of demurrage:

(a) One hour free laytime will be allowed after completion of cargo loading operations. This free time will start at the time cargo hoses are disconnected from the vessel's manifold on completion of loading or discharge of cargo. Vessels awaiting cargo papers and/or Customs Clearance must vacate the berth within 1 hour of such completion and move outside to wait for their papers.

(b) Four hours' free laytime will be allowed for ballasting after discharge operations.

(c) Ballasting times for VLCCs will be handled on an individual basis for each vessel.

Overloading: Masters are advised that the international laws regarding overloading are strictly enforced and they should be guided accordingly.

Vessels shall not arrive or sail overloaded. All expenses incurred in discharging or lightering overloaded cargo will be for the vessel's account. Vessels departing to zones requiring lighter draft may sail with the draft permitted in that zone plus an allowance for fuel and water consumption to the zone limit.

Sea Suctions: Pumproom sea suctions and discharge valves are to be sealed on arrival. Seals are not to be broken while the vessel is in the harbour area. If it becomes necessary to break a seal, permission must be received first from the HOSLL dock representative who will check and record the seal numbers.

BALLAST: St. Lucia laws prohibit the pumping of dirty ballast overboard while a vessel is within their coastal waters. All dirty ballast must be pumped to the facilities available ashore. However, if a vessel is especially equipped with clean segregated systems which are reserved for ballast use only, it is permissible to pump overboard at the dock after the ballast tanks have been inspected and approved by a Marine Department Representative.

In pumping dirty ballast ashore, the ballast is received through a 36 in. shoreline at a maximum discharge pressure to the shore installation of 120 p.s.i.

Also see "Restrictions".

MEDICAL: Limited emergency medical attention is available from the public hospital at any hour of the day or night. The vessel's Agency Representative should be contacted by the Master with any requests for crew medical attention.

For routine medical treatment, a Doctor will board the vessel when requested through the vessel's Agency. Dental treatment is available weekdays.

All crew members requiring medical attention should be available upon vessel's arrival.

FRESH WATER: Not available.

FUEL: Not available.

REPAIRS: Limited supplies of marine hardware are available on the island.

There are no facilities for major repairs closer than Puerto Rico or Curacao.

SURVEYORS: Representatives of the American Bureau of Shipping, Lloyd's Register and other maritime classification societies are available from Puerto Rico and Curacao on 72 hours' notice. The vessel's Agent will assist Masters in soliciting their services.

Representatives of SGS (Societe General de Surveillance S.A.) will be available for cargo quantity and quality inspection as required. Other outside inspection can be arranged upon adequate notice.

TIME: St. Lucia uses Atlantic Standard Time which is 4 hours slow of GMT all year round.

SHORE LEAVE: Under normal circumstances, no restrictions are imposed by the Immigration authorities on shore leave. Masters are requested to have all crew members on board at least 1 hour prior to departure time to avoid delay "waiting crew members".

HOSLL will provide the Master of each vessel with gate passes for the crew upon arrival.

Crew members are not permitted to walk through the terminal. HOSLL will supply transportation between the docks and the main gate at regular intervals. Crew members must make their own arrangements for transportation outside the main gate.

GENERAL:

Winds: The trade winds normally blow from an Easterly direction ranging from N.N.E. to S.S.E. Night winds are generally lighter than the daytime winds. About daybreak the wind speed begins to pick up, reaching maximum strength in the late morning or early afternoon. A return to the lighter night-time winds begins during the late afternoon, usually around 1600 hours.

In past years, hurricanes have occasionally passed close to and over the Island. Hurricane season runs normally from June through October of each year peaking in late August and September. For details see U.S. DMA Hydrographic Center – Sailing directions for the Caribbean Sea – Pub. 144.

Tides and Current: The tides are diurnal and small, the mean range being about 0.5 ft. and the diurnal range less than a foot.

Normally there is a current of 1.0 knot to 2.5 knots moving along the West coast of the Island in a Northerly direction.

Charts: Island of St. Lucia, U.S. DMA Hydrographic Center Chart No. 25521.

Anchorage in St. Lucia Island, U.S. DMA Hydrographic Center Chart No. 25528, B.A. No. 449.

Flags: Vessels entering Cul de Sac Bay during daylight shall fly their national flag and continue to do so during daylight hours when moored. All vessels of foreign registry shall fly the St. Lucian flag at the foremast when moored.

Visitors: No visitors are permitted in the dock area. Only persons on official vessel's business are permitted on the docks.

Mail: Official and personal mail will be delivered onboard by the vessel's Agent upon vessel's entry.

Mail received for vessels while in port will be delivered onboard prior to sailing. Outgoing mail is accepted from Master provided it is accompanied by a mail transmittal slip or support disbursements.

Laundry: Limited vessel's laundry facilities are available.

Liquor: The transportation of alcoholic beverages inside HOSLL's property is strictly prohibited; consequently, no liquor or beer may be brought or removed from vessels. The only exception to the foregoing is the delivery of bonded stores ordered by Masters for their vessels.

Swimming: Swimming in the dock area is strictly prohibited as sharks and barracuda frequent the harbour.

AUTHORITY: Hess Oil St. Lucia Ltd. (HOSLL). *Tel:* 809 452 3105 and 452 3904. *Telex:* 341-6346 A/B 6346 Hess Stl LC. *Cable:* Hessoil St. Lucia.

NOTES

Please also advise Shipping Guides Ltd.

St. Pierre and Miquelon

ST. PIERRE: 46.47 N. 56.10 W. (See Plan Book)

DOCUMENTS: Formalities completed on arrival. Advise Port Service beforehand of vessel's ETA, length, tonnage and draft 24 hours before arrival.

Declaration of Health.
Derat Certificate.
2 Crew Lists.
2 Passenger Lists.
2 Cargo Manifests of any cargo to be discharged.
2 Crew Declarations (tobacco, liquor, souvenirs).
Certificate of Registry.

PILOTAGE: Contact Pilot 1 hour before arrival calling TXU by radio telephone on 2182 kHz or VHF Channel 16. Permanent watch kept. Pilot boats equipped with VHF Channel 12, radar, and radio-telephone. Pilot launch available at entrance to N.E. channel in position 46° 48′ N., 56° 08′ W., in the vicinity of the Land Fall Buoy.

Pilot launch named *Radar,* length 45 ft. The hull is black and superstructure white with "Pilote" painted on each side. Pilot launch carries the International Signals for pilot launch day and night.

When the weather is bad contact Pilot on Channel 12 for instructions.

Pilot is compulsory for vessel of 150 g.r.t. and over.

ANCHORAGES: In the roads, depth 13 m., not secure in strong East winds.

Shipmaster's Report: The anchorage in the roads where fish is loaded ex-trawlers is not secure, even with moderate winds from any direction, and engines should be on stand-by continuously. Several ships have gone on the rocks in a matter of minutes.

MAX. SIZE: New Port: max. length 110 m. Old Port: max. length 70 m. Channel depth 5 m. below chart datum.

New Quay: Max. LOA 200 m. Max draft 10 m.

HEALTH: If suspected disease on board contact St. Pierre Health Service, tel. 41.21.11.

Masters of vessels arriving at St. Pierre may obtain Free Pratique via TXU. Message to be sent to Harbour Master Saint Pierre 24 hours before arrival.

In the message the Master has to specify name of vessel, total number of crew members, where ship coming from, and if everybody on board healthy; in these conditions flag "Q" is not necessary on arrival, but if any suspected disease or fever on board, advise Health Authority as well as Agent, and stand by instructions for berthing. Flag "Q" has to be flown on arrival in the roads.

RADIO: St. Pierre Radio, call sign TXU, receiving on 2182 kHz. transmitting on 2410 kHz.

Masters of vessels arriving are requested to send their ETA to Harbour Master Saint Pierre 24 hours before arrival and corrected by a further message if necessary. The ETA should be given in GMT. Also advise maximum draft and length.

Saint Pierre Radio is equipped with VHF Channels 16 and 25 and maintains permanent watch on Channel 16.

TUGS: No tugs available but the pilot launch (230 h.p.) will assist on Master's request.

BERTHING: Mole du Commerce; length 170 m., depth alongside 8.50 m.

Quai de Peche: length 135 m., depth alongside 6 m. to 7 m. Roll-on/Roll-off terminal, one ramp, max. capacity 50 tons, one shed 1,000 sq.m. for empty containers.

Mole Frigorifique: 3 berths, No. 1; 120 m. length, 7 m. depth. No. 2; 85 m. length, 6 m. depth. No. 3; 120 m. length, 5.5 m. depth.

Old Port: Quai de la Douane: length 123 m., depth 6 m.

Quai de l'Alysse: length 50 m., depth, 6 m.

New Quay: Located to the North of the Port. Depth alongside 12 m.

Pilot will inform Master of berthing prospects and any special requirements.

STEVEDORES: ETA notices are to be sent to Agent 24 hours prior arrival. Stevedore in Saint Pierre is Paturel Freres (tel. 41.32.95 and 41.32.96). Cable Address "Reltupa Saint Pierre". Telex Reltupa 20 QN.

Approximately 60 men are available for working on board vessels when loading/discharging or transhipping in the port. Crew are allowed to work only when no gangs are available.

One normal shift 0730 to 1600 hrs. every week-day, Saturday 0730 to 1200 hrs. Day overtime, every day 1600 hrs. to 1900 hrs. Saturday 1200 to 1600 hrs.

Work done with ship's derricks.

It is requested that a net be put under the gangway before starting work.

Pallets, slings, fork-lift and crane (5 tons) available at a charge.

TANKERS: 1 berth (New Quay) alongside dolphins in depth of 12 m.

MEDICAL: All facilities available.

FRESH WATER: Available at berths. Supplied by hoses, rate 25 cu.m./hr.

FUEL: Only diesel oil SG 825/840 at 15° C available at all berths.

OPENING/CLOSING HATCHES: Normally carried out by crew.

IDENTIFICATION CARDS: Each man to carry passport or seamen's book.

CONSULS: Local representatives for Canada, Netherlands, Norway, Portugal and Spain.

REPAIRS: Small repairs can be effected. Floating dock, capacity 550 tons, for vessels up to 13 ft. 6 in. draft.

REPATRIATION: Can be arranged.

TIME: GMT minus 3 hours all the year round.

AMBULANCE: Tel: 41.21.11 and 41.21.12.

AIRPORTS: Connections from St. Pierre to Halifax (Nova Scotia) International Airport.

TELEPHONES: Not possible to place telephones on board. It is possible to contact the shore on Channel 16 via Saint Pierre Radio.

SERVICES: Compass adjusting, radar repairs, radio, Decca, Loran and gyro-compass repairs and maintenance possible.

AUTHORITY: Officier de Port, P.O.Box 24, St. Pierre, St. Pierre and Miquelon. *Tel:* 41.24.10, 41.29.97. *Contact:* Captain Ronald Admond.

St. Vincent

KINGSTOWN: 13.09 N. 61.14 W. (See Plan Book)

PORT LIMITS: The imaginary line joining Old Woman's Point and Cane Garden Point.

DOCUMENTS:

Customs:
2 copies Ship's Stores List.
2 copies Crew's Stores List.
1 copy Crew List (in).
1 copy Crew List (out).
1 copy Passengers List (in).
1 copy Passengers List (out).
1 copy List of Unmanifested Cargo.
Clearance from Last Port.

Immigration:
1 copy Passenger List (in).
1 copy Passenger List (out).
1 copy Crew List (in).
1 copy Crew List (out).

Health Authorities:
1 copy Animal Declaration.
1 copy Derat Certificate.
1 copy Declaration of Health.

Harbour Master:
1 copy Passenger List (in).
1 copy Passenger List (out).
1 copy Crew List (in).
1 copy Crew List (out).

PILOTAGE: Agent to be notified of request for Pilot 24 hours prior to ETA. Boarding by Pilot at harbour entrance about 2 miles from anchorage. By day pilot boat flies pilot flag, by night shows signal-lights. Ship to fly "Request for Pilot" – flag by day and signal-lights by night. Also two long and one short blast (Morse Code "G").

ANCHORAGES: Well protected anchorages. Large vessels lie to in basin 90 ft. – 100 ft. depth. Average sized vessels berth at pier 27 ft. – 40 ft. depth.

RESTRICTIONS: None.

HEALTH: Port Health Officer boards vessel at anchorage. Requires Bill of Health or Master's Declaration, and a copy of Passengers List. Vaccination Certificates are no longer required. Passenger and Crew Muster no longer required. No one allowed to embark or disembark before Pratique granted and Immigration Officials have boarded vessel.

RADIO: Cables should be routed through Cable and Wireless (West Indies) Ltd. Tel: 71901. Telegrams and Telex: 93.

VHF: The Fort Charlotte Signal Station should be contacted on VHF Channel 16 by vessels approaching, entering, manoeuvring in and departing from the Port.

RADAR: None.

TUGS: None.

BERTHING: One berth 900 ft. long. Max. draft approx. 30 ft. (salt water). Loading/discharging by ship's gear. Break-bulk (palletised) cargo handled. 10 ft. and 20 ft. containers handled on a limited scale (max. gross weight 10 tons).

CRANES: None.

BULK CARGO FACILITIES: None at Kingstown.

Campden Park Bay, 2 miles North along the West coast – flour mill complex for receiving grain (bulk) and shipping flour. Max. draft 36 ft. One berth 300 ft. Loading gear – conveyor belt, height adjustable. Discharging into receiving hopper 25 ft. high. Loading: Max. 1,200 bags flour/feed per hour. Average rate 750 bags/hour. Discharge rate: Max. 60 t.p.h. per vacuvator, average 40 t.p.h. Two vacuvators normally used.

SPECIALISED CARGO HANDLING FACILITIES: No specialised berths for containers or Ro/Ro traffic.

Arnos Vale, a bay situated about 2 to 2.5 miles S.E. of Kingstown, features a buoy with a 4 in. floating line for LPG. Draft 14 ft.

BRIDGES: None.

STEVEDORES: 24 hours' notice of ETA required. Advise type of cargo, number of hatches to be worked, this required for arranging gangs of stevedores and longshoremen. Average discharge rate 3 – 5 tons per gang/hour.

MEDICAL: Advance notice to Agent of medical requirement is helpful. Hospital facilities available.

TANKERS: No facilities at Kingstown.

Arnos Vale (see "Specialised Cargo Handling Facilities") has available 3 buoys. Draft 24 ft., 17 ft. 6 in. and 14 ft. Serviced by floating and submarine line 6 in. and 4 in. Fuels available: White Products – Gasoline 93 R Octane, Kerosene Oil, Light Diesel Oil, Aviation Fuel; Black Products – R.C. 2 and Colas. Rate of discharge: White Products: 500 bbls./hr. Black Products: 300 bbls./hr.

DENSITY: Average 1025 oz/cu.ft.

FRESH WATER: Available. $3.00 (E.C.) per 100 gallons (I.G.). Delivery ex-pier by 3 in. line reduced by 1.5 in. nozzle – 2,500 gall./hr.

FUEL: Grades available. See "Tankers". 2 or 3 hours' notice during normal working hours required. Delivery ex Land-Tanker. Convenient to smaller craft only.

FIRE PRECAUTIONS: Usual precautions.

CONSULS: Consulate of the Netherlands (Mr. G. B. Palmer, P.O.Box 354. Tel: 71846).

French Consular Agent (Mr. Clifford Frank, P.O.Box 364. Tel: 61615).

Deputy British High Commissioner (Mr. M. D'ath, P.O.Box 132. Tel: 71701).

Embassy of the Republic of Venezuela. (Sr. Escobar C. Hernani, P.O.Box 852. Tel: 61374).

REPAIRS: Minor facilities only, e.g. minor mechanical repairs and simple welding, etc.

DRY DOCKS: None. There is a small mechanised dry-docking cradle (privately owned) for small to medium sized yachts at Union Island, an island of the Grenadines chain 40 miles South of St. Vincent.

SURVEYORS: Lloyds Insurance (London). London representative: Messrs. Hazells Ltd., Kingstown. Tel: 61311. Telex: Hazells 7512.

GANGWAY/DECK WATCHMEN: Watchmen recommended. Rates fixed per day.

CARGO GEAR: Loading/discharging effected by ship's gear.

REPATRIATION: Facilities for crew changes and repatriation available.

AIRPORT: Arnos Vale Airport 2 miles from Port. Scheduled flights.

TIME: GMT minus 4 hours. No alterations to clock during the year.

HOLIDAYS: New Year's Day, (1st January); St. Vincent and Grenadines Day, (22nd January); Good Friday; Easter Monday; Whitsun Monday; Labour Day, (1st May); Caricom Day, (1st Monday in July); Carnival Day, (1st Tuesday in July); August Monday, (1st Monday in August); Independence Day, (27th October); Christmas Day, (25th December); Boxing Day, (26th December).

BANKS: 1. The Royal Bank of Canada, Middle Street, Kingstown, P.O.Box 118. Tel: 61501, 61502, 61503. Telex: 7513.

2. The Canadian Imperial Bank of Commerce, Halifax Street, Kingstown, P.O.Box 212. Tel: 71587. Telex: 7532 VQ.

3. Barclays Bank International Ltd.,
(a) Halifax Street, Kingstown, P.O.Box 604. Tel: 61706. Telex: 7520.
(b) Bedford Street, Kingstown, P.O.Box 850. Tel: 71384. Telex: 7520.

4. The Bank of Nova Scotia, Corner White Chapel and Halifax Street, P.O.Box 237. Tel: 71601. Telex: 7546 VQ.

EMERGENCY CO-ORDINATION CENTRE: The Royal St. Vincent Police Station, Kingstown. Tel: 71211. Emergency: 99.

POLICE/FIRE/AMBULANCE: Police Headquarters/Fire Department, Tel: 71211. Emergency: 99. General Hospital, Tel: 61185.

TELEPHONE: Two telephones available, $25.00 per day per phone.

STORING: See "Prelims" page viii.
1. Vessels stored by truck.
2. No barges available.
3. Trucks allowed alongside.
4. Fork lift trucks can be used on jetty to handle stores.
5. Customs regulations regarding storing allows stores to be exported duty-free under Customs supervision, and sometimes Customs seals while in port.
6. Local Riggers available for assisting with storing.

SHORE LEAVE: No restrictions.

IDENTIFICATION CARDS: Seaman's Book adequate.

REGULATIONS: No unusual regulations.

DELAYS: Normal delays in berthing etc., as a result of limited docking area.

DEVELOPMENTS: Berth to be extended.

GENERAL: *Charts:* BA. 501 and BA. 791.

SHIPMASTER'S REPORT: January 1979.

Pilotage: Not compulsory. Pilot boards 0.5 miles South of Fort Charlotte Light. A heavy swell may be experienced and vessel is always rolling.

Restrictions: Vessel may enter and leave at any stage of the tide, however, berthing is not recommended during hours of darkness. Unberthing may be carried out at any time.

Max. Size: LOA 550 ft. Max. draft approximately 30 ft.

VHF: Fort Charlotte on VHF Channel 16.

Berthing: One berth only available, vessels always dock port side to. Wharf is concrete with hard rubber fenders. There are storage facilities for breakbulk cargoes and palletised cargoes, there is also mechanised equipment for handling bananas. There is no equipment for handling containers nor is there storage space for containers. Loading rate for bananas 15 t.p.h. per gang using ship's derricks. Vessel's accommodation ladder required.

Facilities Available: Fresh water, fresh provisions, airport, laundry services, doctor, hospital, groceries and meats.

AUTHORITY: The St. Vincent Port Authority, Kingstown, St. Vincent and the Grenadines, W.I. *Tel:* 61830, 71402. *Contact:* Harbour Master: M. Bennett, *Tel:* 71402. Port Manager: D. Byron-Cox, *Tel:* 61830. Chairman: Mr. O'Neil McIntosh.

Sao Tome and Principe, Republic of

NOTES

Please also advise Shipping Guides Ltd.

SAO TOME: 00.21 N. 06.44 E.

SHIPMASTER'S REPORT: May 1984.

DOCUMENTS:

6 copies Crew Lists.
6 copies Animal Lists.
6 copies Passenger Lists.
6 copies Arms & Ammunition Lists.
6 copies Ports of Call.
2 copies Personal Declaration.
2 copies Stores Declaration.
3 copies Cargo Manifests.

PILOTAGE: No service available.

ANCHORAGE: On the leading line shown on the chart, about 8 – 9 cables from the breakwater. By day or night the leading light structures are not easily recognisable. Vessels lie at anchor heading in a S.S.E.'ly direction and do not swing around to the tide. The ground, which is clearly visible when the sea is calm, is sand and holds well.

RADIO: Although Sao Tome has a listed radio station, it is not regularly attended and does not function properly. Masters are advised to send ETA messages via one of the major coast stations such as Cape Town. There is supposed to be a VHF station in port but this is also mostly unattended. There is telex connection to Europe.

BERTHING: *Cargo Handling:* If no other vessel in port, up to 200 tons per day in lighters of 40/60 tons each.

MEDICAL: There is a hospital and medical attention is available.

FRESH WATER: Not available.

AIRPORT: Sao Tome has regular flight connection with Luanda only. A once a month service to the Cape Verde Islands started in April 1984, on an experimental basis.

SHORE LEAVE: Crew members may go ashore but must return on board before 2000 hrs. They must carry their passports with them.

GENERAL: *Provisions:* There is no ship chandling service. Some small amounts of fresh vegetables can be purchased.

Customs: The ship's bonded stores are not sealed by Customs.

Immigration: One policemen stays on board throughout the ship's stay in port.

Currency: The local currency is Dobras, about 33 Dobras = $1.00 (April 1984).

Mail: Because of the lack of direct flight connections, it is advisable not to send mail to or from Sao Tome.

Saudi Arabia

GENERAL

TRAVEL FROM BAHRAIN: Travel is permitted from Bahrain to Saudi Arabia, *provided* travellers *(a)* hold a valid International Vaccination Certificate showing that the holder was immunised at least 5 days before travelling to Saudi Arabia, but not more than 3 months previously; *(b)* that any traveller proceeding to Saudi Arabia from Bahrain should have taken the prescribed doses of Tetracycline over the 48-hour period immediately before travelling. The fact that the passenger has taken the Tetracycline should be certified by the Bahrain Health Department.

TRAVEL TO SAUDI ARABIA: *Crew Members' Wives' Passports:* We have been informed that the Director General of Passports, Riyadh, has notified Director of Passports (Eastern Province) Dammam, that wives of crew members arriving in Saudi Arabia and wishing to join their husbands on board vessels, are required to obtain, prior to arrival, valid Saudi Entry Visas from Royal Saudi Consulate in their countries.

The visa endorsed in passport must state the intention of joining the particular ship to obtain exit via seaport.

AUTHORITY: The Ports Authority of the Kingdom of Saudi Arabia formulates policy for and supervises the management and operation of the following ports:

West Coast:	
Main Ports:	
Jeddah Islamic Port	Lat. 21° 28′ N., Long. 39° 10′ E.
Yanbu Commercial Port	Lat. 24° 05′ N., Long. 38° 03′ E.
Gizan	Lat. 16° 54′ N., Long. 42° 29′ E.
Minor Ports:	
Haql	Lat. 29° 15′ N., Long. 34° 56′ E.
Al-Khuraibah	Lat. 28° 04′ N., Long. 35° 10′ E.
Dhuba	Lat. 27° 20′ N., Long. 35° 45′ E.
Al Wajh	Lat. 26° 18′ N., Long. 36° 24′ E.
Umm Lajj	Lat. 25° 05′ N., Long. 37° 15′ E.
Rabigh	Lat. 22° 48′ N., Long. 39° 01′ E.
Al Laith	Lat. 20° 09′ N., Long. 40° 16′ E.
Al Qunfudah	Lat. 19° 08′ N., Long. 41° 04′ E.

Al Ugayr	Lat. 25° 39′ N., Long. 50° 13′ E.

INERT GAS SYSTEM: ARAMCO has been informed that the Government of Saudi Arabia has ratified the Solas Convention of 1974 and its 1978 Protocol on May 29, 1984. Therefore, ARAMCO is now obliged to enact the provisions of the said convention as soon as possible.

All Ship Owners/Operators to comply with the following:

1. Effective January 1st, 1985, all vessels of 70,000 d.w.t. and larger calling at any of ARAMCO's terminals to load crude/product cargoes must be equipped with an operable inert gas system in use.
2. Effective May 1st, 1985 all vessels of 20,000 d.w.t. and larger calling at any of ARAMCO's terminals to load crude/product cargoes must be equipped with an operable inert gas system in use.

Vessels not so equipped will not be accepted for loading as of the effective dates mentioned above.

The Solas Convention of 1974 represents a significant contribution to safety of tankers and oil installations and ARAMCO recommends that Ship Owners take immediate steps to comply with provisions of this convention as soon as possible and no later than the effective dates mentioned above. No exceptions will be allowed except in the most unusual circumstances.

Note: ARAMCO will follow the terms of the Solas Convention of 1974 and its 1978 Protocol *including* sections pertaining to exemptions. Any vessels exempted under this Convention will still, however, be required to comply with all Saudi Government Port Regulations as well as ARAMCO Safety Rules.

RULES/REGULATIONS: The Saudi Ports Authority has issued a set of rules and regulations for Saudi Arabian seaports. These rules and regulations became effective on September 10th, 1980.

Every vessel arriving in a port of the Kingdom must have a copy of these on board or must obtain one immediately on first arrival.

Hereunder follows an extract from these rules and regulations:

General Regulations for Cargo Stowage and Handling:

1. The stowage of cargo bound for ports in the Kingdom of Saudi Arabia must be arranged to ensure simultaneous and optimum rate of discharge from the maximum number of hatches compatible with the requirements of seaworthiness.

2. Where practicable all general and bagged cargo of uniform type and size is to be stacked and secured on pallets to facilitate quick discharge when shipped to the Kingdom of Saudi Arabia in conventional vessels.

3. Exceptions to palletisation:
   - a. Bagged cargoes may be pre-slung.
   - b. Bagged cargoes arriving in full ship-loads may be discharged loose provided that such cargo is taken by direct delivery and a minimum discharge rate of 1,200 tons per 24 hours is guaranteed.

   Bagged cargoes arriving in part ship-loads may be discharged loose provided that such cargoes are taken by direct delivery and a minimum discharge rate of 250 tons per hook per 24 hours is guaranteed.
   - c. Foodstuffs, if palletisation would adversely affect the total distribution costs, but the stowage must be arranged to obtain optimum discharge rates.
   - d. Cargo carried on schooners and small craft of less than 70 m. in length which are engaged in coastal trade within the Arabian Gulf, the Red Sea and to/from Somali ports.

The weight per bag shall not exceed 50 kg.

4. Tyres should be in bundles of appropriate size or pre-slung.

5. Bundled steel, profile iron, rebars etc., shall be fitted with slings or lifting points suitable for multiple handling.

6. Steel sheets shall be strapped and stacked in bundles of approximately 2 tonnes each. Wooden bearers and/or spacers shall be used in loading the bundles to facilitate discharge.

7. Pallets must be stowed in a ship's hold in a manner to facilitate discharge and make the best use of cargo handling equipment within the holds.

8. All cargo listed on the dangerous cargo list according to IMO rules must be stowed and handled as prescribed.

9. Masters and shipping Agents are to instruct their stevedoring contractors at loading ports to execute complete separation in accordance with bills of lading and the manifest, and will be held responsible for non-compliance with this regulation.

10. Comprehensive regulations govern the carriage of livestock by sea and their handling at ports in the Kingdom of Saudi Arabia, also the carriage and handling of bagged oil cake and scrap.

Unitisation of Timber:

11. Sawn timber, plywood and veneer is to be unitised. Timber cargoes shall be properly strapped to withstand multiple handling. Bundles shall be separated by skids or dunnage to facilitate lifting or handling by forklifts. Each bundle should weigh between 2 and 3 tonnes.

Bagged Cement, Lime, Gypsum and Similarly Packed Cargo:

12. Bagged cement in paper bags must be packed in 5-ply strengthened paper supported by an inner skin of polythene or similar waterproof material. If there is no synthetic layer, the bag must be made of extra-strengthened paper (minimum 6-ply), or of materials whose proven strength is at least equivalent to the above.

In the square of each workable hatch opening within the plumb of the ship's discharging gear, a block of bagged cement must be left in pre-slung form in flat straps capable of lifting the bagged cement in safe working loads without damaging the packaging. This block must have dimensions of at least 6 m. × 9 m. horizontally and these dimensions must be maintained down to the bottom layer.

(Additional regulations apply.)

13. The Master of any vessel carrying grain to a port in the Kingdom of Saudi Arabia, whether in bulk or in bags, shall present an official certificate from the country of origin stating that the cargo is free from infestation and that it has been fumigated either before or after loading, in addition to a certificate stating that the vessel was free of infestation prior to commencement of loading.

14. The discharge of cargo for transhipment to another port, whether in or outside the Kingdom is strictly forbidden.

The transfer of cargo from one vessel to another at anchorage or alongside berths at any Saudi port is strictly forbidden.

PORT REGULATIONS:

ARRIVAL:

1. Notification to the Port Management

1.1 The Owners of vessels bound for a port in the Kingdom of Saudi Arabia with cargo must give preliminary notice of the vessel's intended arrival to the Port Management of the discharge port or ports by telex or cable either directly or through the vessel's Agents on arrival at the first or sole loading port, before loading commences. Estimated time of arrival and estimated quantity of cargo by type must be given with the preliminary notice.

1.2 On completion of loading cargo for Saudi ports the following information must be sent to the Port Management of the discharge port or ports by telex or cable either directly or through the vessel's Agents:

- a. Vessel's name and former names, if any.
- b. Flag, port of registry and call sign.
- c. Length overall, g.r.t., n.r.t. and d.w.t.
- d. Expected draft on arrival.
- e. Expected time of arrival.
- f. Cargo particulars, including nature, weight, tonnage and stowage by hatches. Car carriers, Ro-Ro and container vessels to give both number and weight in tonnes of each type of unit.
- g. Any other cargo being carried for other destinations.
- h. If dangerous cargo is being carried, the quantity and class must be indicated in accordance with the IMDG code and it must be stated whether this cargo is to be discharged or is in transit.
- i. Number, position and S.W.L. of derricks and/or cranes, and particulars and positions of ramps.
- j. The number and nationalities of passengers to be disembarked or in transit.
- k. Expected requirements for bunkers and water.
- l. Name of vessel's Agent.

1.3 A vessel bound for a port in the Kingdom of Saudi Arabia for loading or bunkering must notify the Port Management immediately orders have been received to proceed to Saudi Arabia giving the information as in 1.2 above but relevant for loading or bunkering

1.4 A further notice of ETA is to be sent 5 days, 2 days and 1 day prior to arrival at the port.

Also see "Advance Notice Requirements".

2. Vessels Failing to Give Required Notifications

2.1 Any vessel failing to comply with the requirements under section 1 above or arriving later than expected under the revised ETA, may lose its berthing registration and will be held responsible for all expenses incurred by the Port Management.

2.2 Exemption from the requirements listed under paragraph 1 above may be granted by the Port Management to vessels engaged in coastal trading or which have departed from a neighbouring country, depending on the possibilities of proper communication between the relevant ports, and the duration of the vessel's voyage.

3. Permission to Enter Port

3.1 The Master of a seagoing vessel must have prior permission of the Port Management to enter the port. Such permission may be subject to special restrictions or conditions if:

a. The vessel arrives before or after the given ETA;
b. The vessel is in danger of sinking;
c. The vessel or the cargo is on fire or if there is the possibility of a fire, or if after a fire, it is uncertain whether it is completely extinguished;
d. The vessel is a tanker;
e. On account of the vessel's size or construction its movements or that of any other vessels or the port operations are endangered, hindered or impeded;
f. On account of the condition of the cargo, the vessel is dangerous;
g. The vessel arrives under tow;
h. The vessel is over-loaded;
i. The vessel has any person or animal on board suffering from an infectious or contagious disease, or if the presence of such infection, contagious or epidemic disease is suspected on board;
j. The vessel is powered by nuclear energy, the arrival of such a vessel must be notified in accordance with the requirements as prescribed in section 1;
k. If the vessel carries deck cargo which extends beyond her side.

4. Registration for Berthing

4.1 Vessels will be registered for berthing in accordance with the time given for arrival in the revised ETA. The Port Management reserves the right to refuse registration or to cancel the registration of any vessel already registered if required by port operations or for any infringement of these regulations by the vessel.

Sambuks, schooners or yachts without radio transmitting equipment shall register at the port control signal station (Harbour Master) immediately after berthing.

5. Priority for Berthing

5.1 Allocation of berths shall be under the control of the Port Management who, in case of excess demand on facilities, shall have the power to use their discretion to give priority to:

a. Vessels carrying passengers or pilgrims;
b. Vessels carrying livestock;
c. Vessels carrying essential or perishable foodstuffs;
d. Vessels carrying refrigerated cargo;
e. Any other vessel for special reasons.

6. Papers and Documents Required (see also special requirements for Jeddah Islamic Port and King Abdul Aziz Port Dammam).

6.1 *Vessel's Papers and Documents*

6.1.1 On arrival at any port in the Kingdom of Saudi Arabia the Master of each vessel shall present or make available for inspection the following papers and documents:

a. Log Books;
b. Registration Certificate;
c. Classification Certificate;
d. Load-line Certificate;
e. Building Safety Certificate;
f. Safety Equipment Certificate;
g. Radio and Wireless Certificate;
h. Cargo Gear Certificate;
i. Marine Health Declaration;
j. Vaccination Certificate;
k. Derat Certificate;
l. Clearance from the Last Port of Call;
m. Israel Boycott Declaration;
n. Ship's Stores List;
o. Grain Shipping Certificate if the vessel is carrying a grain shipment;
p. Mail Transport documents in accordance with the "International Postal Treaty" if any mail is carried aboard;
q. 5 Copies Crew List including name, nationality, date and place of birth, passport number and rank;
r. 5 Copies of the Passenger List including name, nationality, date and place of birth, passport number, port of embarkation, port of disembarkation;
s. 2 Copies of the List of Personal Effects of Crew and Passengers.

6.1.2 To obtain port clearance the Master of the vessel shall present or make available for inspection the following papers and documents to Port Management:

a. Log Book;
b. Registration Certificate;
c. Classification Certificate;
d. Load-line Certificate;
e. Building Safety Certificate;
f. Safety Equipment Certificate;
g. Radio and Wireless Certificate;
h. Port Stevedore Outturn Reports;
i. Receipt for Payment of Custom's Duties;
j. Shipping Note and Cargo Manifest for any cargo loaded.

6.2 *Cargo Papers and Documents*

6.2.1 The following papers and documents must be submitted to the Port Management not later than 48 hours prior to arrival (exemptions may be granted under certain circumstances at the discretion of the Port Management):

a. 5 Copies of the Cargo Manifests for Discharge, including any additions or amendments in English; 10 Copies of the original manifests accurately translated into Arabic;
b. 2 Copies of the Cargo Stowage Plan;
c. 2 Copies of the Hatch List or Bay Plan;
d. 2 Copies of the List of Dangerous/Hazardous Cargo fo Discharge;
e. 2 Copies of the List of Dangerous/Hazardous Cargo in Transit;
f. 2 Copies of the List of Heavy and/or Awkward Cargo whic requires special equipment;
g. 2 Copies of the List of any Wine, Spirits and Narcotics or Cargo o such nature on the vessel and its location or, in the absence o which, a nil return;
h. A Declaration of type of reefer cargo;
i. An Application for discharge permit;
j. Arms and Ammunition List or "Nil" Return.

6.2.2 *Specifications*

a. All copies of the manifests must be taken from the Maste Manifest.
b. The consignee column in all cargo manifests shall include the ful name and address of the consignee. If for legal/commercia reasons a bank or financial institution appears as consignee i the cargo manifest, the name of the final consignee, if known, has to be shown beside the name of the bank.
c. In case of transhipped cargo, the cargo manifest must show the name of the pre-carrying vessel, the port of transhipment and the bill of lading number for each consignment.
d. The List of Dangerous/Hazardous Cargo must show:
  (i) The technical name;
  (ii) The IMDG code class and UN number;
  (iii) The Quantity of each consignment;
  (iv) The location on board and bay number, if stowed i containers, or lash barges or on trailers.

6.2.3 *Exceptions*

a. Vessels will be allowed to produce the aforementioned papers o arrival, provided the Port Management has received the followin details by telex not less than 24 hours prior to arrival:
  (i) Name and flag of vessel;
  (ii) Port(s) of loading;
  (iii) Bill of lading numbers;
  (iv) Marks and numbers as per bills of lading;
  (v) List of dangerous/hazardous cargo;
  (vi) List of heavy packages above 3 tonnes and/or awkwar cargo lifts;
  (vii) Total number of bills of lading. LASH operators shall relate bills of lading to specific barge numbers;
  (viii) Statement of wine and spirit shipments for other ports showing where stowed or in the absence of which a nil return.
b. A vessel carrying more than 200 bills of lading consignments for discharge in any one Saudi port is requested to submit cargo manifests not later than 72 hours prior to arrival.

7. Exempted Vessels

Exempted from the provision of regulations 1, 2 and 4 are vessels entering in case of:

a. Distress;
b. Emergency refuge;
c. Force majeure;
d. Need of medical assistance.

8. Signals and Approach

8.1 Every vessel approaching the limits of a port must hoist the following flags:

a. Ship's signal letters (in case of VHF failure);
b. International code 'Q'-flag(s) in accordance with international health and safety regulations;
c. International code 'B'-flag if the vessel is carrying dangerous goods or hazardous materials;
d. The national flag of the country to which the vessel belongs.

9. The Flag of the Kingdom of Saudi Arabia

9.1 Every vessel entering a Saudi port must hoist the flag of the Kingdom of Saudi Arabia and keep it flying at all times throughout the stay in the port.

10. Pilotage

Pilotage is compulsory for all vessels entering or navigating within or leaving the pilot zones in the Kingdom of Saudi Arabia.

10.1 *Exempted Vessels*

The following vessels are exempted from the provisions of compulsory pilotage:

a. Saudi Warships;
b. Vessels of the government of the Kingdom of Saudi Arabia not designated for commercial use;
c. Vessels under 150 net registered tons;
d. Craft employed solely within port limits;
e. Yachts and pleasure craft;
f. Vessels operated by Port Management;

10.2 *Pilot Signals*

Every vessel subject to compulsory pilotage as above and which requires a Pilot shall:

a. From sunrise to sunset hoist the international code flag "G";
b. From sunset to sunrise give the letter "G"(– –·) by a signal lamp;
c. In the event of poor visibility caused by rain, fog or dust, sound the signal "G" (– –·).

Vessels equipped with VHF should call the Port Control Signal Station on frequencies published by the port as soon as the vessel enters within VHF range.

Vessels having a Pilot on board must hoist the international code flag "H".

11. Valid Cargo Gear Certificate

11.1 All vessels must have a valid Cargo Gear Certificate issued by one of the following societies approved by the Ports Authority:

1. American Bureau of Shipping.
2. Bureau Veritas.
3. Det Norske Veritas.
4. Germanischer Lloyd.
5. Lloyd's Register of Shipping.

6. Nippon Kaiji Kyokai.
7. Polski Rejestr Statkow.
8. International Cargo Gear Bureau Inc.

or any other competent authority recognised by the Government of the country in which the certificates are issued.

11.2 No rope, tackle, block, chain, hook or any other gear which is worn, damaged or otherwise unsuitable shall be used for the purpose of hoisting, lowering, heaving or otherwise handling of slung cargo or other articles. All cargo handling gear is to be tested and inspected according to Schedule B to these Regulations.

11.3 Vessels of more than 15 years of age at the start of a voyage as determined by the date of the first or sole Bill of Lading must carry out a cargo gear inspection of all cargo gear including deck machinery and the supply of power thereto, prior to loading for a Saudi Arabian port, and an appropriate inspection certificate should be issued.

This certificate is valid for a period of 6 months. No general statements will be accepted. The Surveyor has to state that the inspection has been carried out on each part of the gear, deck machinery and its power supply, that he has observed each derrick, crane, winch, etc., in operation and each part has been found in good working order, and that all required current inspections as per Schedule B in this part have been fulfilled.

The Inspection Certificate must be provided by an approved Survey Bureau, Classification Society or an approved Government Department. *Exemptions:* 11.3 above does not apply to vessels less than 70 m. LOA engaged in coastal trades (Red Sea, including ports in Somalia; Arabian Gulf and Gulf of Oman).

ADVANCE NOTICE REQUIREMENTS: The information below has to be telexed twice to respective Port Authority (with copy to Agent). The first telex to be sent (with estimated details) at the time vessel arrives at first port of loading, to be called 'preloading advice'. The second telex to be sent (with correct details) at the time vessel sails from the final port of loading, to be called 'final advice'.

1. Call Sign.
2. Vessel's name.
3. Owners/Line.
4. Nationality.
5. Agent.
6. LOA (m.)
7. Max. Draft (m.)
8. Hatches/holds.
9. G.r.t.
10. N.r.t.
11. D.w.t.
12. Vessel's previous name.
13. Vessel type.
14. Cargo type.
15. Total cargo weight tonnes.
16. Total cargo freight tonnes.
17. No. of containers/units.
18. No. of livestock.
19. ETA.
20. Actual arrival draft.
21. Hatchwise tonnage.
22. Year of build.
23. No. of LCL containers and quantity showing each bill of lading number in that container.
24. Fumigation and Cleanliness Certificates in case of foodstuff cargoes.
25. Each loading port name where cargo loaded for Saudi port.
26. Economic Speed.
27. Vessel position 48 hours before arrival.
28. Previous port prior to Saudi port.
29. Next port after Saudi port.
30. Vessel's Lloyd's registered number.
31. Port of Registry.
32. Hazardous cargo for Saudi port.
33. Hazardous cargo in transit for other ports.
34. P and I Club name and local correspondents.
35. Confirm that 5, 2, 1 day ETA notices with Call Sign, draft, cargo for Saudi port, hatchwise distribution, Master's name, crew number, nationality, previous/next port, vessel's position 48 hours' prior arrival and radar data will be supplied to port by the Principals/Master.

If the undermentioned information has not previously been given it is to be included in the advices:

(a) Type of radar.
(b) Frequency.
(c) Scan rate.
(d) Pulse width.
(e) Pulse peak power.
(f) Pulse repetition frequency.
(g) Beam width.

If the vessel is equipped with several radars the characteristics of each radar must be given.

Upon receipt of such information, the relevant Port Authority will give clearance date for the vessel to enter the port.

The following documents should arrive with the Agent in Saudi Arabian port latest 7 days prior to vessel's arrival date and subject to Arabic translation be submitted to Authorities latest 72 hours prior to vessel's arrival:

18 copies Cargo Manifest.
18 copies Freight Manifest.
18 copies Dangerous Cargo Manifest.
4 copies Hatch List.
4 copies Stowage Plan.
4 copies each Bill of Lading (3 Non-Negotiable)
4 copies Heavy Lift Cargo separately.

Saudi Arabian Port Authorities can be contacted by telex as follows:

Dammam	601138/9 (Dam Sa Sj)
Jeddah	401175, 401595 (Ports Sj)
Jubail	631005 (Jubpt Sj)
Gizan	911018 (Ports Sj)
Yanbu	461005 (Ports Sj)

POLLUTION: Fines and penalties for not complying with the International Convention for the Prevention of Pollution of the Sea by Oil, 1975 are:

(a) Discharging oil or oily-mixture within 100 miles from the Kingdom's Coasts – one year imprisonment or S.R.20,000 (Saudi Riyals) or both.
(b) Saudi Flag Ships discharging oil or oily-mixture in any prohibited zones or areas mentioned in the conventions, the same fine and penalty as in (a).
(c) Not keeping the oil record book in the ship – 6 months imprisonment or S.R.2,000 (Saudi Riyals), or both.
(d) Not keeping the oil record book up to date – fine up to S.R.5,000 (Saudi Riyals).

AUTHORITY: The Ports Authority, Kingdom of Saudi Arabia, P.O.Box 5162, Riyadh, Kingdom of Saudi Arabia. *Tel:* 01-476-0742. *Telex:* 201158 Ports Sj. *Contact:* Fayez I. Badr, President and Chairman of the Board.

AL KHOBAR: 26.17 N. 50.13 E.

ALSO SEE "GENERAL" BEFORE FIRST PORT.

PORT LIMITS:

Harbour Boundaries:

All shore-based port property enclosed by a fence following the shore line extending seawards to a line running between the following points:

Latitude: 26° 16′ 12″ N.	Longitude: 50° 12′ 54″ E.
Latitude: 26° 16′ 12″ N.	Longitude: 50° 13′ 18″ E.
Latitude: 26° 12′ 00″ N.	Longitude: 50° 13′ 36″ E.
Latitude: 26° 12′ 00″ N.	Longitude: 50° 19′ 20″ E.
Latitude: 26° 17′ 12″ N.	Longitude: 50° 19′ 20″ E.
Latitude: 26° 17′ 12″ N.	Longitude: 50° 13′ 06″ E.

PILOTAGE/ANCHORAGE/RADIO: There are no official anchorages, Pilots or radio facilities at Al Khobar port, which is only used by small craft.

BERTHING:

Berth	*Length (m.)*	*Depth (m.)*	*Remarks*
Total	500	3.4	General cargo and passenger, including a 10 m. wide quay ramp.

Total shed area (3 sheds): 8,200 sq.m.
Total open storage area: 6,900 sq.m.
Vehicle parking area: 6,900 sq.m. (inside security).
11,400 sq.m. (outside security).

Passenger terminal: 750 sq.m.

EQUIPMENT:

Forklifts: 5 up to 4 tons, 5 between 4 and 10 tons.
Mobile cranes: 3 up to 20 tons, 1 between 20 and 40 tons.

AUTHORITY: Al Khobar Port Management, *Contact:* Yousef A. Al Sharq, Port Director.

AGENT: See "Dammam".

DAMMAM: 26.30 N. 50.12 E. (See Plan Book)

ALSO SEE "GENERAL" BEFORE FIRST PORT.

LOCATION: Situated approximately mid way along the Eastern coast. It is the principal Port of Saudi Arabia in the Arabian Gulf.

PORT LIMITS: The Seaward Limits of the Port of Dammam are bounded by a line joining the following positions:

Lat. 26° 28′ 34″ N., Long. 50° 10′ 48″ E.
Lat. 26° 29′ 06″ N., Long. 50° 09′ 00″ E.
Lat. 26° 34′ 00″ N., Long. 50° 09′ 00″ E.
Lat. 26° 34′ 00″ N., Long. 50° 10′ 00″ E.
Lat. 26° 34′ 20″ N., Long. 50° 10′ 44″ E.
Lat. 26° 37′ 45″ N., Long. 50° 14′ 42″ E.
Lat. 26° 37′ 45″ N., Long. 50° 16′ 00″ E.
Lat. 26° 26′ 30″ N., Long. 50° 16′ 00″ E.
Lat. 26° 26′ 30″ N., Long. 50° 11′ 48″ E.

and thence to the shoreline by a line 2,000 m. distant from the East side of the causeway.

Within the Port Limits the approach channel to the port is marked by buoys in accordance with IALA "System A". Depth of the approach is 15 m.

FLAG: In addition to the quarantine signals (see "Health") which are to be shown until Pratique is granted, the Saudi Arabian Flag must be flown from vessel's foremast while in port of Dammam. Saudi flags can be hired or purchased locally.

DOCUMENTS: In order to comply with Port, Customs and Agent's requirements, the following documents should be submitted to the Port Management via the Agent, at least 48 hours prior to arrival of vessel at Dammam port:

12 copies of Cargo Manifest for each port of loading (which must include four copies in Arabic), all typed, stamped and signed.
2 copies of Freight Manifest.
3 copies of Hatch List.
3 copies of Stowage Plan.
List of Heavy Lifts.
List of Long Length Cargo.
7 copies of List of Dangerous Cargo on board, if any.
Arms and Ammunition List, or "Nil" return.

The particulars of the certificates required by the SOLAS regulations are entered on the Port's Form on the arrival of the vessel at the anchorage and the certificates are sighted after berthing.

Also see "Health", and "General" before first port.

PILOTAGE: The pilotage area commences at Buoy "D27" (i.e. the channel entrance). Pilotage is compulsory and the normal Pilot Boarding Area is between Buoys "D39" and "D40". The only vessels allowed to proceed South of this position without a Pilot are exempted vessels, and vessels which would, under normal circumstances, require the services of a Pilot but have been instructed by "Dammam Port Control" to anchor in the Holding Anchorage.

Vessels bound for Dammam must contact "Dammam Port Control" 1 hour before arrival at Buoy "D27", giving details of ship (see "Approaching"), and must not enter the channel until permission has been given by "Dammam Port Control".

"Dammam Port Control" operates on the following VHF Channels: 16, 12, 13, 19 and 22.

Vessels Exempted from Compulsory Pilotage: These include:

(i) Vessels of the Royal Saudi Navy.
(ii) Vessels of the Saudi Government which are not assigned for commercial use.
(iii) Vessels whose nett tonnage is less than 150 tonnes.
(iv) Port craft.
(v) Pleasure yachts.

Also see "Radio".

APPROACHING: *Directions and Regulations for Vessels Entering or Leaving Dammam Port:*

Dry cargo vessels drawing 10.4 m. (34 ft.) or less should approach and leave by the East Channel.

Vessels in excess of 10.4 m. draft and vessels from Northward should use the Main Channel.

Prior to vessels entering the Ras Tanura Channel they must contact "Ras Tanura Radar Control" on VHF Channel 10, identify themselves and state where bound. Normal listening watch should then be maintained on Channel 16.

Vessels bound for Dammam Port must call "Dammam Port Control" 1 hour before the vessel's arrival at Buoy "D27" and give the following information:

(i) Vessel's name.
(ii) Length overall.
(iii) Maximum draft.
(iv) Cargo tonnage and main commodity.
(v) Hazardous cargo, if any.
(vi) Whether the vessel has a list.
(vii) Whether the vessel has any mechanical defects.

Vessels must not enter or navigate within the Port Limits without the permission of "Dammam Port Control". Inward vessels shall report the time of passing Buoy "D27" and shall keep a listening watch on Channel 16.

The speed of vessels within the buoyed channel is limited to 8 knots and overtaking other vessels within the channel is prohibited.

Anchoring within the buoyed channel is prohibited.

Upon arrival, if a vessel is instructed not to anchor in the Holding Anchorage, the Pilot will board abeam of Buoy "D39".

ANCHORAGES: The following anchorages are allocated as necessary for vessels:

(i) *Holding Anchorage:* (Depth 15m.) bounded by a line joining the following positions:
Lat. 26° 31′ 42″ N., Long. 50° 11′ 29″ E.
Lat. 26° 31′ 52″ N., Long. 50° 10′ 00″ E.
Lat. 26° 33′ 24″ N., Long. 50° 10′ 00″ E.
Lat. 26° 33′ 46″ N., Long. 50° 10′ 47″ E.
Lat. 26° 32′ 29″ N., Long. 50° 10′ 43″ E.
This anchorage is marked by Buoys.

(ii) *Working Anchorage:* (Depth 10 m.) bounded by a line joining the following positions:
Lat. 26° 32′ 11″ N., Long. 50° 11′ 33″ E.
Lat. 26° 32′ 27″ N., Long. 50° 12′ 03″ E.
Lat. 26° 31′ 52″ N., Long. 50° 12′ 36″ E.
Lat. 26° 31′ 32″ N., Long. 50° 12′ 13″ E.

(iii) *Explosive Anchorage:* (Depth 8 m.) bounded by a line joining the following positions:
Lat. 26° 30′ 53″ N., Long. 50° 12′ 55″ E.
Lat. 26° 31′ 23″ N., Long. 50° 13′ 05″ E.
Lat. 26° 31′ 18″ N., Long. 50° 13′ 33″ E.
Lat. 26° 30′ 53″ N., Long. 50° 13′ 33″ E.

(iv) *Small Craft Anchorage:* (Depth 10 m.) bounded by a line joining the following positions:
Lat. 26° 31′ 32″ N., Long. 50° 12′ 13″ E.
Lat. 26° 31′ 52″ N., Long. 50° 12′ 36″ E.
Lat. 26° 31′ 27″ N., Long. 50° 12′ 58″ E.
Lat. 26° 31′ 00″ N., Long. 50° 12′ 43″ E.

Anchoring in the channel is strictly forbidden.

WEATHER: The peninsula of Saudi Arabia is almost of an equatorial climate. Summertime rising to over 50°C. Rain is generally scarce. During major part of year, but especially during Summer, the relative humidity is high. From July to September it frequently exceeds 85%.

Winds in this area are not predictable for more than a few hours. They vary in strength and direction, although prevailing winds are from N.W.

TIDE: The Diurnal tide range at Dammam Port is approximately 2.00 m. – 2.45 m. at Springs, and 0.80 m. at Neaps. The flood tide sets to the S.E. across the harbour entrance and the ebb tide sets to the N.W. The rate of flow is very much dependent on the wind force and direction but seldom exceeds 2 knots.

MAX. SIZE: See "Berthing".

RADIO: (Also see "Agents", "Pilotage" and "Vessel Appointments").

Dammam Port has a modern radio communications system as follows:

(i) *VHF* – (Call sign "Dammam Port Control"). A continuous listening watch on Channel 16.
Working Channels are: Channels 12, 13, 19 and 22.
(ii) *Radio Telephone* – Facilities are available.

Note: International VHF Channels 01, 68, 71 and 73 are used for port and pilotage operations. Vessels must NOT use these Channels when in the vicinity of Dammam Port.

Telex: Dammam Port is connected to the International Telex network. The telex address is 601138 or 601139 Dapm SJ.

Send the following information, by telex, 48 hours before arrival:

1. Name of vessel.
2. Flag.
3. Name, address, telephone number and telex of Agent.
4. Speed.
5. ETA.
6. Type of radar.
7. Frequency.
8. Scan rate.
9. Pulse width.
10. Pulse peak power.
11. Pulse repetition frequency.
12. Beam width.

Vessels equipped with more than one radar should give the information in Items 6 to 12 for each radar.

Information is available from "Dammam Port Control" covering local weather conditions and any local hazards to navigation that may be appropriate from time to time. For the future, it is planned to give assistance to shipping, navigating locally, by the provision of a Marine Control Tower with radar coverage.

Coast radio station at Dammam officially known as "Dammamradio" with call sign "HZG". Telex: 602600, 602603. Tel: 8276080, 8274449. It is already in service employing radiotelegraphy, radiotelephony and radiotelex to provide radio communication link between vessels at sea and land based concerns.

VESSEL APPOINTMENTS: (See also "Radio").

It is a pre-requisite for all vessels trading to any Saudi Arabian port to give the appropriate Port Management the undermentioned information by telex on arrival at the first Port of Loading for Saudi Arabia:

In the case of Dammam Port, telexes should be sent to: The Port Director General, Dammam Port Management. Telex Nos. 601138 or 601139 Dapm SJ.

(a) The information must be updated on leaving the final port of loading bound for Saudi Arabia:

1. Radio code (Call sign).
2. Vessel's name.
3. Owner/Line.
4. Nationality.
5. Agent.
6. Length overall (metres).
7. Maximum draft (metres).
8. Number of hatches.
9. Gross registered tonnage.
10. Nett registered tonnage.
11. Deadweight tonnage.
12. Previous name (if any).
13. Type of vessel.
14. Type of cargo.
15. Total cargo weight tonnes.
16. Total cargo freight tonnes.
17. Number of containers/units (where applicable).
18. Number of livestock (where applicable).
19. Estimated time of arrival.
20. Actual arrival draft.
21. Tonnage to hatch.
22. Year of building.
23. Last port of call.
24. Foodstuff liable to infestation (Fumigation Certificates).
25. Ports of loading for Dammam discharge.

The name of vessel *and radio code* should be given in every subsequent telex for reference.

The absence of any of the above information may delay the granting of an entry date to the subject vessel.

(b) The above information must be backed up by further confirmation of ETA at 5 days, 2 days and 1 day prior to arrival at each port of call in Saudi Arabia.

Note: Penalties may be imposed by the Saudi Ports Authority if the above rules are not strictly adhered to.

Berthing Arrangements: Providing the requirements above have been complied with, vessels will be allocated to berths, dependent upon type of cargo carried, prior to arrival. Berthing will then take place immediately upon arrival, weather permitting.

VHF: See "Radio".

HEALTH: In accordance with international practice, quarantine signals must be displayed by all vessels approaching Dammam port. These signals shall be displayed continuously until Pratique granted. Signals are as follows: Sunrise to sunset – Quarantine Flag; Sunset to sunrise – Signal Lights – red over white.

The Quarantine Officer will board the vessel either at anchorage or at pier.

Documents required for immediate inspection are the following:
International Maritime Health Certificate (from the last port).
Valid Derat or Derat Exemption Certificate.
Crew List (3 copies).
Passenger List, if any.
Valid Cholera Certificates (of a date not exceeding 3 months) for all crew members and passengers.
Valid Yellow Fever Certificates for all crew members and passengers.
Certificates of Inoculation against any communicable diseases prevailing at the ports of departure.
Ship's Log Books.

TUGS: Dammam Port has a large and varied fleet of Marine Craft to cover all the needs of marine operations, as follows:

Tugs (Total 15):

2 × 2,800 h.p.	4 × 950 h.p.
2 × 1,450 h.p.	4 × 800 h.p.
1 × 1,350 h.p.	1 × 460 h.p.
1 × 1,300 h.p.	

Launches for handling mooring ropes	4
Pilot launches	4
Fire fighting vessel	2
Inspection launch	1
Survey launch (fitted with latest Computerised survey equipment)	1
Buoyage tender	1
Floating incinerator	1
Barges (various)	13
Oil skimming launch	2
Waste collection vessel	1
Oil separator barge	3

The Port's tugs are available to assist vessels in mooring or unmooring.

A mooring gang and Supervisor are provided by the port when a vessel is docking or sailing. Launches are normally used at Berth Nos. 36, 37 and 38 only.

BERTHING: (Also see "Vessel Appointments").

In the main port there are 38 working berths for deep-sea vessels. They are located on 4 quays as follows:

East Port: *West Quay:* (King Abdul Aziz Pier, total length 2,500 m. approximately).

Berth No.	*Nominal Length (m.)*	*Depth (m.)*	*Berth Facilities*	*Type of Operation*
1	240	14	Grain Silos & Flour Mill	Grain/Dir. Dly GC
2	240	14	Zone-Barn	General Cargo
3	240	14	Zone-Barn	General Cargo
4	180	12	Shed-Zone	General Cargo
5	180	12	Shed-Zone	General Cargo
6	150	9	Shed-Zone	General Cargo
7	150	9	Shed-Zone	General Cargo
8	150	9	Shed-Zone	General Cargo
9	179	9	Shed-Zone	General Cargo
10	215	11	Zone	Load Fertiliser
11	180	11	Zone	General Cargo
12	180	12	Shed-Zone	General Cargo
13	180	12	Shed-Zone	General Cargo

Notes:

1. Where there is a shed on the berth the distance from the quay edge to the shed is 30 m.
2. All berths are rail connected.
3. There are 28 portal cranes on Berths 1 to 13, with capacities from 3 to 15 tonnes.

East Quay: (Total length 1,750 m. approximately).

Berth No.	*Nominal Length (m.)*	*Depth (m.)*	*Berth Facilities*	*Type of Operation*
14	180	12	Shed-Zone-Barn Ro-Ro Ramp	General Cargo/ Ro-Ro
15	180	12	Shed-Zone-Barn	General Cargo
16	180	12	Shed-Zone-Barn	General Cargo
17	180	12	Zone	General Cargo
18	180	12	Shed-Zone-Barn	General Cargo
19	180	12	Zone	General Cargo
20	180	12	Shed-Zone-Barn	General Cargo
21	240	14	Zone	Multi-purpose
22	240	14	Zone/Ro-Ro Ramp	Multi-purpose

Notes:

1. Where there is a shed on the berth, the distance from the quay edge to the shed is 40 m.
2. Currently 28 portal cranes are in use on Berth Nos. 14 – 20 inclusive. Their capacities vary from 6 to 15 tonnes.
3. Berth Nos. 21 and 22 make up Dammam Multi-purpose Terminal.

West Port: *East Quay:* (Total length 2,800 m. approximately).

Berth No.	*Nominal Length (m.)*	*Depth (m.)*	*Berth Facilities*	*Type of Operation*

34	180	12	Shed-Zone-Barn	General Cargo
35	205	12	Zone/Ro-Ro Ramp	General Cargo/Ro-Ro

Notes:

1. Where there is a shed on the berth, the distance from the quay edge to the shed is 40 m.
2. Berth Nos. 23 – 26 make up Dammam Container Terminal (DCT).

West Quay: (Total length 690 m. approximately).

Berth No.	*Nominal Length (m.)*	*Depth (m.)*	*Berth Facilities*	*Type of Operation*
36	180	12	Silos/Bagging Plants	Bulk Cement
37	180	12	Silos/Bagging Plants	Bulk Cement
38	180	12	Silos/Bagging Plants	Bulk Cement
39	150	14	Zone	Explosives/ Dangerous Cargo

Notes:

1. The 3 bulk cement berths are each leased to independent companies.
2. All berths are rail connected.
3. The quay, North of Berth No. 39, can be extended by 3,200 m. when additional berths are required in the future.

Updated information on available depths within the Port Limits can be obtained from the Harbour Master's Office.

In addition to the berths in the main port, a Small Craft Harbour is situated to the South of the East Port where small vessels, dhows, fishing vessels and a considerable amount of barge traffic (mainly LASH) are handled. The depth of water varies from 6 m. to 4.5 m. The purpose-built facilities provide in excess of 1,600 m. of quay, large back-up areas and covered storage.

SPECIALISED CARGO HANDLING FACILITIES: *Grain Terminal* (Berth No. 1): This terminal provides purpose built facilities for discharging all types of grain. These can be distributed to silo storage, or delivered direct to road, rail or to the adjacent flour mills. Discharge rate 480 t.p.h. with 2 pneumatic unloaders.

Ro-Ro Berths: There are 4 operational berths in the port with ramps for ro-ro vessels fitted with bow or stern access, as follows: Berth No. 14: At South end of berth. Berth No. 22: Dammam Multi-purpose Terminal. Berth No. 23: Dammam Container Terminal. Berth No. 35: At South end of berth.

Dammam Multi-purpose Terminal (Berth Nos. 21 and 22): This terminal provides facilities for handling multi-purpose vessels (i.e. Ro-Ro, containers and general cargo). It is equipped with 2 container gantries and another is under construction.

Damman Container Terminal (DCT): This comprises Berth Nos. 23, 24, 25, and 26. The stacking area also includes part of Berth Nos. 27 and 28 open storage areas.

The terminal has 6 container gantries, and another is under construction, and its own rail terminal, with 2 rail-mounted, wide-span gantries and container storage area.

Extensive covered facilities are available for Customs inspection and clearance purposes. A purpose-built container freight station (CFS) for handling LCL shipments is also available.

The quayside gantry rails extend to Berth No. 28, so enabling both this berth and No. 27 to be incorporated in the terminal if required in the future.

Bulk Cement Terminals: Dammam Port has allocated 3 berths for the handling of cement in bulk, namely Berth Nos. 36, 37 and 38. The berths are leased to three independent companies, each of whom has provided facilities afloat and on the quay. The three terminals are rail connected.

Silo Vessel "Falcon Cement" at Berth No. 36:

Operator:	REDEC Cement Ltd.
Vessel discharge rate:	20,000 T/day (pneumatic)
Storage capacity:	54,000 T
Total delivery rate:	16,000 T/day
Bulk delivery rate:	6,400 T/day
Bags delivery rate:	9,600 T/day
Shore silo:	6,000 T

Silo Vessel "Arabia Luluah" at Berth No. 37:

Operator:	Saudi Bulk Transportation Co. Ltd.
Vessel discharge rate:	8,000 T/day (by grab)
Storage capacity:	28,000 T
Total delivery rate:	6,500 T/day (pneumatic)
Bagging rate:	4,000 T/day
Bag outlets:	3
Bulk delivery rate:	5,000 T/day
Bulk outlets:	4
Shore silo:	2,000 T

Silo Barge "Unicement 1" at Berth No. 38:

Operator:	United Bulk Cement Co. Ltd.
Vessel discharge rate:	6,000 T/day (pneumatic)
Storage capacity:	26,500 T
Total delivery rate:	6,000 T/day (pneumatic)
Bagging rate:	2,000 T/day
Bag outlets:	4
Bulk delivery rate:	4,000 T/day
Bulk outlets:	3
Shore silos (2)	120 T.

Loading Berth: Berth 10 is allocated for loading Urea (fertiliser) which is manufactured locally by the Saudi Arabian Fertiliser Co. (SAFCO). The bagged Urea is transported by rail from the factory to the quayside where it is loaded directly into the vessel alongside by its own cargo handling gear.

Dangerous Cargo Terminal: This 150 m. long berth has a depth alongside of 14 m. It consists of an open quay for direct delivery only and is road and rail connected.

CRANES: *Floating Crane (Self-Propelled):* Its capacities and corresponding outreaches beyond the fenders are as follows: 200 tonnes, 10 m.; 170 tonnes, 12.5 m.; 140 tonnes, 17.5 m.; 125 tonnes, 23.0 m.; 80 tonnes, 25.0 m.; 60 tonnes, 27.5 m.

The maximum height of the hook above water level is 37 m.

Also see "Cargo Handling Equipment".

STORAGE AREAS: *Enclosed Transit Sheds:* Within the port area, including the CFS and Small Craft Harbour, there are 22 sheds with a total floor area of 151,520 sq.m.

Open Sided Barns: Similarly 12 barns provide a total floor area of 70,620 sq.m.

Open Areas (Zones): As a result of climatic conditions, a large proportion of cargo passing through the port is stored in the open. The total area, including the Small Craft Harbour and CFS, is as follows:

	sq.m.
Berth Nos. 2 – 13	355,800
Berth Nos. 14 – 22	438,800
DCT 23 – 26	412,700
Berth Nos. 27 – 35	744,600
West Port (West & South)	521,000
North Small Craft Harbour	43,000
West Small Craft Harbour	85,500
South Small Craft Harbour	192,200
Container Freight Station (CFS)	134,000
Hazardous Cargo Area	16,600
Total Area:	2,944,200

Inland Yard: This is situated at the landward end of the causeway. It is used for transit cargo storage, also for port materials storage. The respective areas available for cargo storage are: 5 sheds totalling 24,030 sq.m., open areas totalling 231,900 sq.m.

CARGO HANDLING DISCHARGE RATES: A strong and positive set of Port Rules is in operation. This guarantees high discharge rates and high standards of efficiency. Co-operation in observance of these rules by Shipowners and Agents makes a substantial contribution to the port's effectiveness. The most important of these rules are summarised below:

1. Every vessel calling at Dammam must make an appointment.
2. Every vessel, or Agent, must submit appropriate documentation prior to a vessel's arrival.
3. Any vessel over 15 years old shall obtain and submit a certificate issued by a competent and approved Authority that her cargo gear is in good working order before being allowed to discharge.
4. All cargo that is suitable shall be presented in unit loads on pallets or pre-slung.
5. No cargo shall be received into port premises in a damaged condition.
6. Every vessel shall be ready to discharge upon berthing. She shall continue discharging uninterrupted until all Dammam cargo is completed, whereupon she shall leave the berth without delay.
7. Overstowing Dammam cargo with cargo destined for another port is prohibited.
8. Transhipping cargo in Dammam for other ports is not allowed.
9. Cargo which is not removed from the Port by Consignees within 15 days is liable to be auctioned and sold.

The port's efficiency and handling rates are high, as indicated in the table below:

Indicative Handling Rates of Main Commodities during the Year 1981.

Cargo	*Weight Tonnes per Gang Hour*	
	Gross	Nett
Bulk Grain	43.8	43.8
Bulk Cement	277.1	277.1
Bagged Cement	12.0	12.7
Other Bagged Cargoes	12.5	14.2
Steel & Pipes	25.6	26.9
General Cargo	31.9	36.2

CARGO HANDLING EQUIPMENT: Dammam Port has an extensive and modern fleet of equipment. A proportion of the fleet has been allocated to each of the Stevedoring Companies berths and the nearby port of Alkhobar, for which Dammam Port Authority is responsible. The total present fleet (1984) is set out below:

Equipment Type	*Capacity*	*Availability Number of Units*
Forklift Trucks	0 – 4 tons	310
	5 – 10 tons	115
	11 – 25 tons	83
	Over 25 tons	16
	Total	524
Mobile Cranes	0 – 20 tons	84
	21 – 40 tons	78
	41 – 90 tons	5
	Over 90 tons	2
	Total:	169
Straddle Carriers	–	28
Gantry Cranes	31 tons	6
	30.5 tons	2
	Total:	8
Portal Cranes	3 tons	8
	6 tons	24
	15 tons	24
	Total:	56
Terminal Tractors	–	91
Towing Tractors	–	9
	Total:	100
Trailers G.S.	–	120
G.S./Container	–	44
Ro-Ro (MAFI)	–	139
Container	–	26
	Total:	329

STEVEDORES: Stevedoring operations on all berths except bulk grain, bulk cement and the container terminal (DCT) are performed by 3 contracted stevedoring companies.

MEDICAL: Masters may obtain medical attention for ship's personnel from Port Doctor who may, in case of serious illness or injury recommend treatment to a local hospital. Normally the Port Doctor will treat minor illness on board ship.

Urgent hospitalisation can also be arranged via the ship's Agent. Masters of vessels at sea may use services of Dammam Port Radio to obtain medical advice at any time.

DENSITY: The average density (salinity) of the sea-water in the Port of Dammam is 1030.

WATER: Water is available at all berths except No. 10, (but difficulty may be experienced with hose connection as some are not standard). Also, from a private water barge. Vessels requiring a supply of water should make arrangements through their Agent.

FUEL: There are several private Bunkering companies who operate in Dammam Port. By arrangement through the ship's Agent, bunkers can be supplied by barge at anchorage or alongside vessel at her berth. Various grades of fuel are available. Strict rules apply and severe penalties will be imposed should any oil spillages occur during bunkering operations or from any other cause. Anti-oil pollution equipment and dispersants are available.

Also see "Ras Tanura".

CUSTOMS: All materials to be either exported from or imported into Saudi Arabia are subject to examination by Customs Authorities. The importation of the following articles is completely banned.

(a) Alcoholic beverages, including beer and wines.
(b) Narcotics.
(c) Pornographic material.

Trafficking of the above items between ship and shore is strictly prohibited, regardless of whether vessels are alongside at berths or at anchor. Consumption of alcoholic beverages is prohibited during a ship's stay in port.

The following articles can be imported after obtaining permission from the authorities concerned.

(1) Explosives
(2) Fire Arms
(3) Antiques
(4) Religious material not pertaining to the Muslim faith.

CONSULS: The U.S. Consulate General resides at Dhahran (approximately 20 km. inland from Dammam). A British Consular Official visits the Dammam area on 1 day each week.

REPAIRS: A new ship repair yard will become operational during 1984. It contains 2 floating dry docks, with capacities of 22,000 tonnes and 10,000 tonnes, together with all necessary facilities to provide a complete range of ship repairs and maintenance services.

Deep sea divers, operating from modern and well equipped diving boats, are available at Dammam.

Repair and maintenance services for electronic equipment are available at Dammam Port.

Dry Dock: Main particulars:
Lifting capacity 22,000 tonnes.
Length overall 215 m.
Outside width 43 m.
Clear inside width 35 m.
Moulded depth to upper deck 16.45 m.
Immersion depth over keel blocks 7.55 m.

SURVEYORS: *Cargo Surveyor:* Cleghorn Wilton & Co., P.O.Box No. 314, Dhahran Airport, Saudi Arabia. Tel: 83-24737

Ship and Engine Surveyors (Engineers): Arabian Inspection and Survey Co. Ltd., (Agents for Lloyd's & Germanischer Lloyd), P.O.Box 59, Dhahran Airport, Saudi Arabia, Tel: 83-32089.

Arabian Establishment for Trade (act on behalf of Lloyd's and Bureau Veritas), P.O.Box 59, Dhahran Airport, Saudi Arabia. Tel: 83-22837, 83-21036.

Yusuf Bin Ahmed Kanoo (act on behalf of American Bureau of Shipping) P.O.Box 37, Dammam, Saudi Arabia. Tel: 83-23011

Orri Navigation Lines (act on behalf of Bureau Veritas and P and I Clubs), P.O.Box 1504, Dammam, Saudi Arabia. Tel: 83-26644.

AIRPORT: Very good airlines facilities are available from Dhahran Airport. Daily departures take place for any part of the world.

REPATRIATION: This is generally not encouraged but consideration will be given to urgent cases. Details should be verified through ship's Agent. Under Immigration Rules the crew must travel on valid seaman book or valid visa duly endorsed on passport by the Royal Saudi Embassy in the country from which the travel is undertaken. Transit visas are not allowed.

TIME: GMT plus 3 hours all year round.

HOLIDAYS: Dammam Port offers continuous cargo handling operations through the year and sufficient manpower is always available.

All ships must be dressed if they are in port, or entering port, on the following official holidays or events:

1. Eid Al Fitr.
2. Eid Al Adha.
3. Saudi Arabian National Day.
4. Royal visits to the port.

Port staff will advise vessels in port prior to any forthcoming event, and vessels approaching port will be advised by the Port Radio Control.

SHORE LEAVE: Ship's personnel and passengers are not normally permitted ashore unless special permission is granted by Immigration and Police Authorities. The necessary arrangements can be made by ship's Agent upon receiving the Master's request and Seaman's books. While in port, the vessel's personnel are under jurisdiction of the Law of Saudi Arabia.

EMERGENCY CO-ORDINATION: In the event of marine emergencies in the area, the Dammam Port Harbour Master should be contacted.

TELEPHONE: The port's telephone number is 83-32500 and is open for 24 hours. Expansion is planned which will include ship to shore communications at all berths.

(iii) Al Bank Al Saudi Al Fransi, P.O.Box 397, Dhahran Airport, Dhahran, Saudi Arabia; Tel. No. 8320153. Telex No. 601164 Safdam SJ.

(iv) Al Bank Al Saudi Al Holland, P.O.Box 70, Dammam, Saudi Arabia, Tel. No. 8323212. Telex No. 601015 Bashdm SJ.

STORING: Vessels may take stores on board and arrangements should be made through the ship's Agent.

AUTHORITY: Dammam Port Management, P.O.Box 2520, Dammam-31461, Saudi Arabia. *Tel:* 83-32500. *Telex:* 601138/9 Dapm SJ. *Contact:* Mohammed Suliman Al Muhanna, Port Director-General, Dammam Port Management.

AGENT: Gulf Agency Company Saudi Arabia, P.O.Box 86, Airport Post Office, Dhahran, Saudi Arabia, Cables "Confidence Dammam". Telex: 601069 ("GAC SJ") Telephone: Normal working hours 8323427, 8328762-4, 8323425; After office hours 8272077 (ext. 231), 8266630, 8261940, 8337987.

Vessels equipped with VHF, can communicate, when within range, with Agent on stand-by Channel 16 by calling "Confidence Dammam". Voice contacts may be also established via VHF, on the same channel as above, with Ras Tanura office, by calling "Confidence Ras Tanura". Once contact is established on Channel 16, communication will continue by switching on available working Channels as directed.

GIZAN (Jizan): 16.54 N. 42.29 E. (See Plan Book)

ALSO SEE "GENERAL" BEFORE FIRST PORT.

LOCATION: 390 nautical miles South of Jeddah and 360 nautical miles North of Aden.

PORT LIMITS:

Harbour Boundaries:

All shore-based port property enclosed by a fence following the shore line extending seawards to line running between the following points:

	Latitude	Longitude
Qarn Ash Shurra	16° 50′ 36″ N.	42° 33′ 00″ E.
Um al Kuthib	16° 48′ 30″ N.	42° 27′ 12″ E.
Jazirat Hibar	16° 54′ 12″ N.	42° 22′ 42″ E.
Ferafer Island	17° 00′ 00″ N.	42° 23′ 36″ E.
Qarn al Wada	17° 02′ 24″ N.	42° 28′ 18″ E.

DOCUMENTS: See "Health" and "General before first Port."

PILOTAGE: Compulsory, no offshore pilot station. Ships for Gizan should contact Gizan Port Control on VHF Channel 16, 2 hours before arrival.

Pilot Boarding Position:

Lat. 16° 53′ 48″ N. Long. 42° 27′ 00″ E.

APPROACHES: The Northern approach channel, is 82 nautical miles long, marked by 18 light buoys and 3 beacons and provides a safe depth of up to 12 m.

Positioned navigational marks are in accordance with "IALA System A" and fitted with radar reflectors.

The approach buoy "Gizan North" Lat. 16° 56′ 45″ N., Long. 41° 17′ 28″ E. with Racon code "G" as well as Beacon "No. 2" (Code "N") and the beacon "North Ghurab Island" (Code "B").

"Sail Makawa Island" beacon is equipped with white light Fl.4 secs. and black daymark.

A range light, true bearing 96.5°, leads into the port basin through an inner fairway dredged to 13.5 m. depth. For further details refer to B.A. Chart No. 15 and Notices to Mariners.

Southern approach closed.

Notice to Mariners No. 1987(P)/1984:

Approaches to Gizan – Modified North Channel to be established:

(1) The Ports Authority of the Kingdom of Saudi Arabia, has announced that the Northern approach channel to Gizan will be modified, to provide a minimum depth of 29 m. between N1 and N8 buoys, as follows:

(a) Buoyage to be established:

	No.	*Type*	*Colour*	*Character*	*Position*
(i)	N1	Lateral Starboard	Green	Fl(2)G. 9s	16° 59.70′ N., 41° 20.70′ E.
(ii)	N2	Lateral Port	Red	Fl(2)R. 9s	16° 59.77′ N., 41° 19.50′ E.
(iii)	N3	—	—	—	17° 02.15′ N., 41° 22.87′ E.
(iv)	N4	Lateral Port	Red	QR	17° 05.97′ N., 41° 24.50′ E.
(v)	N5	Lateral Starboard	Green	Fl(2)G. 9s	17° 13.60′ N., 41° 34.27′ E.
(vi)	N6	Lateral Port	Red	Fl(2)R. 9s	17° 14.57′ N., 41° 33.23′ E.
(vii)	N7	Lateral Starboard	Green	QG	17° 17.28′ N., 41° 42.67′ E.
(viii)	N8	Lateral Port	Red	QR	17° 18.70′ N., 41° 41.10′ E.

(b) Gizan North light-buoy, 16° 56.58′ N., 41° 17.5′ E. (approx.) is to be amended to: Q.

(c) No. 2 Beacon, 17° 16.8′ N., 41° 33.4′ E. (approx.) is to be amended to a red beacon, Fl(3) 12s.

(2) The modified channel will be opened to shipping on 29th August, 1984.

(3) Mariners are warned to navigate with caution from 22nd August, 1984 whilst work is in progress to change the navigational aids.

ANCHORAGES: *Anchorages within the harbour boundaries:*

Anchorage A. (Cargo vessels).

Lat. 16° 56′ 00″ N.	Long. 42° 27′ 00″ E.
Lat. 16° 54′ 30″ N.	Long. 42° 27′ 00″ E.
Lat. 16° 54′ 30″ N.	Long. 42° 25′ 48″ E.
Lat. 16° 56′ 00″ N.	Long. 42° 25′ 48″ E.

Anchorage B. (Petromin tankers).

Lat. 16° 53′ 00″ N.	Long. 42° 27′ 42″ E.
Lat. 16° 51′ 30″ N.	Long. 42° 27′ 42″ E.
Lat. 16° 51′ 00″ N.	Long. 42° 26′ 12″ E.
Lat. 16° 53′ 00″ N.	Long. 42° 26′ 12″ E.

There are no anchorages outside the harbour boundaries.

ARRIVAL ADVICE: Send ETAs to Gizan Port Management, Telex: 911018 Ports Sj and 911030 Ports Sj.

MAX. SIZE: Length and beam – No limit. Max. draft 10 m. and 12 m.

HEALTH: All vessels should abide by Health Regulations and present necessary documents to the Authorities in accordance with International Laws. Quarantine signals must be displayed by all vessels approaching Gizan Port. These signals must be displayed continuously until Pratique is granted. These signals are:

Sunrise to sunset: Quarantine flag – Yellow.

Sunset to sunrise: Signal lights – Red over white.

RADIO: Masters should give their Agents an ETA not later than 48 hours before arrival. There is no radio station in Gizan Port.

VHF: A base station operates in Gizan Port using the call sign "Gizan Port Control". A 24 hour watch is maintained on Channel 16. All calling should be on Channel 16. Tugs are working on Channel 12.

RADAR: Harbour radar system is under development.

TUGS: Normally join the vessel 3 miles West of breakwaters. Ranging from 850 h.p. to 1,500 h.p.

BERTHING:

Berth	*Length (m.)*	*Depth (m.)*	*Remarks*
7	122	10	General Cargo
8	175	10	General Cargo and Ro-Ro
9	175	10	Cement vessels

10	143	10	
11	217	12	
12	217	12	
1	205	12	
2	176.5	12	
3	176.5	12	
4	171	10	
5	171	10	
6	184	10	

Total Shed Area: 12,000 sq.m.

Total Open Storage Area: 140,000 sq.m.

Weighbridges: 1×60 tonnes.

BULK HANDLING FACILITIES: *Bulk Cement Terminal:*

Silo vessel at Berth No. 3.

Storage capacity: 50,000 tonnes.

Handling capacity: 10,000 tonnes per day; 750,000 tonnes per year

EQUIPMENT: *Marine Equipment:*

2 towing launches, 4 launches, 1 fire fighting launch, 10 self-propelled barges of 400 tons.

Cargo Handling Equipment: Cranes 4 × 16 ton, 2 × 20 ton, 2 × 40 ton, 1 × 90 ton. Forklifts 4 × 3 ton, 5 × 3.2 ton, 22 × 3.5 ton, 6 × 5 ton, 2 × 23 ton. Headmasters 4. Tractors 6. Trailers 19. Ro/Ro forklift 1 × 30 ton.

STEVEDORES: 36 working gangs available. 3 shifts of 8 hours each, 7 days per week.

MEDICAL: Doctors and hospital are available. Agents should be advised in advance of any medical attention required.

DENSITY: Average 1026.
FRESH WATER: Available, no barge supply.
FUEL: Marine diesel available by road tanker.
FIRE PRECAUTIONS: According to local laws, 1 tug is fitted with fire-fighting equipment.
CONSULS: None.
REPAIRS: Minor repairs possible.
SURVEYORS: The main classification societies are available in Jeddah.
GANGWAY/DECK WATCHMEN: 1 Coast Guard is stationed permanently on board. Coast Guards keep constant check on liquor seals and may search personnel going ashore.
CUSTOMS ALLOWANCES: The consumption of alcohol including beer is prohibited. Ship's bonded stores are sealed by the Customs after the vessel has been granted Free Pratique. Any alcohol found after this will be confiscated and a fine imposed of Riyals 1,000 per bottle and possible imprisonment for the offender(s).
REPATRIATION: Several flights daily from Gizan. A visa is required for entering or leaving the Port.
AIRPORT: Situated approximately 3 km. North East of Gizan Port. Several domestic flights daily.
TIME: GMT plus 3 hours all year round.
HOLIDAYS: Gizan Port offers continuous cargo handling operations throughout the year and sufficient manpower is always available.
POLICE/AMBULANCE/FIRE: Emergency Telephone Numbers:

Fire Brigade	322 0555
Ambulance	322 1692/1930
Hospital	322 1205
Police	322 1551/1832

SHORE LEAVE: Possible during daylight hours.
IDENTIFICATION CARDS: Shore passes issued on request.
DELAYS: There are no delays in berthing and discharging.
BANKS: Almost all national banks available.
STORING: All facilities to store a vessel by truck.
No ship chandlers available.

AUTHORITY: Gizan Port Management, P.O.Box 16, Gizan, Saudi Arabia. *Tel:* 07322-1145/1715. *Telex:* 911018 and 911030 Ports Sj. *Cables:* Ports Gizan. *Contact:* Dr. Hammoud A. Saadi, Asst. Director General.
AGENT: Gulf Agency Co. Saudi Arabia. Telex: 911018 ("Ports Sj").
Also see "Jeddah".

JEDDAH: 21.28 N. 39.10 E. (See Plan Book)

ALSO SEE "GENERAL" BEFORE FIRST PORT.
PORT LIMITS: *The boundaries of the harbour and anchorages of Jeddah Islamic Port:* The harbour boundaries are given below and include the tanker terminals and the adjacent waters between Ras Al Jahhas and Ras Al Aswad.
From an onshore position on Ras al Jahhas:

to	Lat. 21° 31′ 36″ N.	Long. 39° 07′ 54″ E.
	Lat. 21° 31′ 36″ N.	Long. 39° 06′ 00″ E.
	Lat. 21° 22′ 00″ N.	Long. 39° 06′ 00″ E.

To an onshore position on Ras al Aswad:

Lat. 21° 22′ 00″ N.	Long. 39° 07′ 50″ E.

DOCUMENTS: See "General" before first port.
Circular: Dated December 1983.
Vessels carrying dangerous cargo, arms, ammunition for discharge Jeddah or any other ports in transit are requested to provide the following information:
(a) A prior notification including the following information:
1. The name of the vessel, her flag and the Shipping Agent's name.
2. ETA.
3. Voyage number.
4. The particulars and the types of dangerous cargo, ammunition, weapons.
5. The quantity.
6. Number of parcels or packages.
7. The weight.
8. Cell location and stowed.
9. The Shipper's name.
10. Port of loading.
11. Consignee's name and address.
12. Port of discharge.
13. Next port for the vessel after departure Jeddah.

(b) The documents such as Manifest, Stowage Plan and Cell Number, Bay Plan, etc., are required to be submitted to the Port Authority 48 hours prior to arrival of vessel.
(c) In case vessel not carrying any dangerous cargo/arms/ammunition/weapons/Military hardware, the Agent should submit the written declaration as 'nil'.
(d) The Master of the vessel is also required to submit declaration for arms/ammunition/weapons to the Port Authority along with cell position, stowage position and how stowed. In case the vessel is not carrying AM Cargo the Master is also required to submit same declaration as 'nil'.
(e) The in-transit dangerous cargo/arms/ammunition should be stored separately so that Jeddah cargo can be discharged without disturbing in-transit cargo.
(f) The Port Management will hold you fully responsible for incorrect information.

Signed:
Acting Director General
Jeddah Islamic Port.

VESSEL APPOINTMENT SCHEME:
Vessels bound fo Jeddah Islamic Port with cargo must provide the following information:

AA. By telex or cable either directly or through the vessel's Agents on arrival at the first or sole loading port, before loading commences:
1. Radio Code (Call Sign).
2. Vessel's Name.
3. Owner and Line.
4. Nationality.
5. Agent.
6. Length Overall (m.)
7. Maximum Draft (m.)
8. Number of Hatches.
9. Gross Registered Tonnage.
10. Nett Registered Tonnage.
11. Deadweight Tonnage.
12. Previous Names (if any).
13. Type of Vessel.
14. Type of Cargo.
15. Total Cargo Weight Tons.
16. Total Cargo Freight Tons.
17. Number of Containers/Units (where applicable).
18. Number of Livestock (where applicable).
19. Estimated Date of Arrival.
20. Actual Arrival Draft.
21. Hazardous Cargo for Jeddah.
22. Hazardous Cargo in Transit for Other Ports.
23. Tonnage to Hatch for Jeddah Discharge.
24. Year of Construction.
25. Lloyd's Register Number.
26. All Ports at which Cargo has been loaded for discharge at Jeddah.
27. Number, Position and S.W.L. of Derricks and/or Cranes, and particulars and positions of ramps.
28. Economic Speed of Vessel.
29. Next Port of Call after Jeddah (irrespective of whether vessel has cargo for that port).
30. All other Ports at which the Vessel will have called between arrival at the first port of loading and arrival at Jeddah Islamic Port.
31. Last Port of Call before Jeddah.

Both the Registered Owner and the Operating Line or Charterer must be shown in item 3. If these are the same company this fact must be confirmed.

All previous names of the vessel must be declared in item 12, or a 'nil' declaration must be shown. Items 21 and 22 must include the tonnage of each. IMDG Class for discharge and in transit which will be on board the vessel at Jeddah.

On completion of loading cargo, items 15, 16, 17, 18, 19, 20, 21, 22, 23, 26, 29, 30 and 31 must be updated as necessary.

BB. A further notice of ETA is to be sent 5 days, 3 days, 2 days and 1 day prior to arrival at the port. The three day notice is to include the vessel's position (Latitude and Longitude or port) 48 hours before arrival.

CC. Vessels will not be cleared to call at Jeddah solely for the purposes of bunkering, taking stores or repairs unless the following information is supplied to the Port Management, *not less than 72 hours in advance of their arrival:*
1. Radio Code.
2. Vessel's Name.
3. Owner and Line.
4. Nationality.
5. Agent.
6. Length overall.
7. Maximum Draft (m.)
8. Gross Registered Tonnage.
9. Nett Registered Tonnage.
10. Deadweight Tonnage.
11. Previous Names.
12. Estimated Time of Arrival.
13. Actual Arrival Draft.
14. Hazardous Cargo in Transit for other Ports.
15. Lloyd's Register Number.
16. Expected Requirements for Bunkers and Water.
17. Economic Speed of Vessel.
18. Next Port of Call after Jeddah.
19. Last Port of Call before Jeddah.

Prior to the provision of any services being authorised an approval must be obtained from the Office of the Director (Traffic and Operations).

The final ship's Clearance Certificate will not be signed by the responsible Jeddah Port Management Officer prior to sailing unless it is accompanied by the original Advice Notice bearing Jeddah Port Management's stamp and the signature of the Clearing Officer.

DD. If the undermentioned information has not been previously given to the Port it is to be included in the Advices mentioned in AA and CC above:
(i) Type of Radar.
(ii) Frequency.
(iii) Scan Rate.
(iv) Pulse Width.
(v) Pulse Peak Power.
(vii) Beam Width.

If the vessel is equipped with several radars the characteristics of each radar must be given.

PILOTAGE: Pilotage is compulsory for all vessels above 150 n.r.t. entering, navigating within, or leaving the port, and is available 24 hours a day. Every vessel subject to compulsory pilotage and which requires a Pilot must:

(a) from sunrise to sunset hoist the International Code Flag 'G';
(b) from sunset to sunrise give the letter 'G' (– – ·) by a signal lamp;
(c) in the event of poor visibility caused by rain, fog or dust, sound the signal 'G' (– – ·).

Vessels equipped with VHF should call the Port Control Signal Station on Channel 16 as soon as the vessel enters VHF range. Vessels having a Pilot on board must hoist the International Code Flag 'H'. The pilot boarding area is one mile West of the Middle Gate beacons in position Lat. 21° 28′ 00″ N., Long. 39° 06′ 00″ E. The pilot boat is orange hulled with white upperworks with the word "Pilot" painted in black letters along each side of the cabin.

The Master of every vessel, when approaching the pilot boat for the purpose of picking up a Pilot, must reduce speed to the minimum steerage way, maintain VHF contact with the pilot boat and provide a good lee if necessary. Vessels must have rigged and ready for use a pilot ladder in good repair and provided with reliable manropes and in accordance with the specifications and terms described in the International Convention for the Safety of Life at Sea 1974. The ladder is to be well illuminated between dusk and dawn, and a lifebuoy with a lifeline is to be available at the ladder for immediate use. A boat rope, ready rigged from the break of the forecastle to abaft the pilot ladder, must also be provided.

Once the Pilot is on board, the Master must advise him of:

a) The draft, length, beam and manoeuvring speeds of the vessel. Such information is also to be displayed in a conspicuous place in the wheelhouse;
b) Any peculiarity, defect or factor which may affect the manoeuvrability of the vessel;
c) Any dangerous and/or hazardous cargo on board.

Vessels awaiting Pilot or documentation, anchor in "D" anchorage. Vessels with dangerous and/or hazardous cargo on board anchor in "C" anchorage. All tankers and vessels calling only for bunkers in "E" anchorage.

ANCHORAGE: Anchorages A, B, W1 and W2 are within the pilotage area and vessels may not enter, or leave these anchorages without a pilot.

The boundaries of the anchorages are as follows:

Anchorage A:

From	Lat. 21° 29′ 13″ N.	Long. 39° 08′ 40″ E.
To	Lat. 21° 28′ 18″ N.	Long. 39° 08′ 40″ E.
	Lat. 21° 28′ 18″ N.	Long. 39° 08′ 02″ E.
	Lat. 21° 29′ 13″ N.	Long. 39° 08′ 40″ E.

Anchorage B:

From	Lat. 21° 27′ 39″ N.	Long. 39° 06′ 54″ E.
To	Lat. 21° 27′ 39″ N.	Long. 39° 07′ 26″ E.
	Lat. 21° 26′ 04″ N.	Long. 39° 07′ 26″ E.
	Lat. 21° 26′ 04″ N.	Long. 39° 06′ 54″ E.
	Lat. 21° 27′ 39″ N.	Long. 39° 06′ 54″ E.

Anchorage W1:

From	Lat. 21° 27′ 46″ N.	Long. 39° 08′ 10″ E.
To	Lat. 21° 27′ 46″ N.	Long. 39° 08′ 42″ E.
	Lat. 21° 26′ 45″ N.	Long. 39° 08′ 42″ E.
	Lat. 21° 26′ 45″ N.	Long. 39° 08′ 22″ E.
	Lat. 21° 27′ 46″ N.	Long. 39° 08′ 10″ E.

Anchorage W2:

From	Lat. 21° 29′ 04″ N.	Long. 39° 07′ 16″ E.
To	Lat. 21° 29′ 04″ N.	Long. 39° 07′ 34″ E.
	Lat. 21° 28′ 27″ N.	Long. 39° 07′ 46″ E.
	Lat. 21° 28′ 27″ N.	Long. 39° 07′ 22″ E.
	Lat. 21° 29′ 04″ N.	Long. 39° 07′ 16″ E.

Anchorages outside the harbour boundaries:

Anchorage C:

From	Lat. 21° 28′ 00″ N.	Long. 39° 03′ 46″ E.
To	Lat. 21° 27′ 46″ N.	Long. 39° 04′ 40″ E.
	Lat. 21° 26′ 47″ N.	Long. 39° 04′ 22″ E.
	Lat. 21° 27′ 02″ N.	Long. 39° 03′ 28″ E.
	Lat. 21° 28′ 00″ N.	Long. 39° 03′ 46″ E.

Anchorage D:

From	Lat. 21° 28′ 16″ N.	Long. 39° 04′ 50″ E.
To	Lat. 21° 27′ 28″ N.	Long. 39° 05′ 58″ E.
	Lat. 21° 26′ 10″ N.	Long. 39° 04′ 29″ E.
	Lat. 21° 26′ 24″ N.	Long. 39° 04′ 15″ E.
	Lat. 21° 28′ 16″ N.	Long. 39° 04′ 50″ E.

Anchorage E (Tanker and bunkering anchorage):

From	Lat. 21° 23′ 19″ N.	Long. 39° 05′ 50″ E.
To	Lat. 21° 23′ 53″ N.	Long. 39° 05′ 56″ E.
	Lat. 21° 24′ 50″ N.	Long. 39° 04′ 53″ E.
	Lat. 21° 23′ 18″ N.	Long. 39° 04′ 01″ E.

APPROACHES: The lights of the new airport North of Jeddah shine brightly. These should not be confused with the correct approach to Jeddah port which is South of the airport.

RESTRICTIONS: There are no restrictions imposed upon entry for vessels of not more than 13.5 m. draft.

MAX. SIZE: The maximum permissible draft is 13.5 m. No restriction on beam. Vessels up to 300 m. in length are handled regularly at some facilities in the port.

HEALTH: Masters of vessels are required to notify Jeddah Port Health and Quarantine Department via Jeddah Radio prior to the vessel's arrival as follows:

a) Vessel's name, ETA, purpose of visit;
b) Complement and General Declaration of Health of crew:
c) Declaraton of Vaccination Certificates held, if any;
d) Declaration of Last Port and date of sailing;
e) Declaration of infected ports of call (Cholera and Yellow fever).

Additionally, the Agent is required to submit an arrival notice to the Port Health and Quarantine Department 48 hours prior to the vessel's expected arrival.

On arrival, before the vessel berths, the doctor boards and grants Free Pratique.

(a) Cholera: All arrivals from infected or endemic areas are required to possess a certificate showing 2 injections made not less than 7 days and not more than 30 days before arrival. For re-vaccination carried out within 6 months of a recorded vaccination or re-vaccination, a single injection renders the certificate valid for a further 6 months.

In addition, arrivals must submit a certificate dated not more than 7 days before their departure recording the negative results of stool culture. This certificate must be delivered by a licensed laboratory and attested by the Health Authority.

(b) Yellow Fever: All arrivals from infected or endemic areas are required to submit a valid Vaccination Certificate in accordance with International Sanitary Regulations.

(c) Mecca: All Muslim crew members who wish to visit Mecca (Makkah) and Medina (Madinah) should have in their possession 2 recent passport-size photos. These should bear the crew member's name and C.D.C. number to enable Agent to obtain permission for the pilgrimage. Crew members must also have in their possession the above-mentioned medical certificates, otherwise permission may not be granted to them to visit Mecca (Makkah) and Medina (Madinah).

TUGS: There are 10 tugs presently operated by the Port. The details of these are given below:

Jeddah 1	1,000 h.p.	Jeddah 10	800 h.p.
Jeddah 2	1,000 h.p.	Jeddah 11	1,960 h.p.
Jeddah 3	1,830 h.p.	Jeddah 12	1,960 h.p.
Jeddah 7	800 h.p.	Jeddah 13	(VSP 3,700 h.p. 1978 salvage tug)
Jeddah 8	800 h.p.		
Jeddah 9	800 h.p.		

1 tug of 1,300 h.p. and 2 of 2,500 h.p. with fire-fighting and pollution control capabilities are on order and expected to be delivered in mid-1982.

With the exception of Jeddah 13, tugs operate within the harbour limits only for the purpose of assisting vessels in berthing and unberthing. Tugs join vessels inside the Inner Gate beacons and normally require the use of the ship's lines. Where the latter are considered inadequate, the tug's lines are used at the vessel's expense.

BERTHING: The following categories of berth, with a draft range from 7.5 m. to 13.5 m., are available: Bulk Cement, Container Terminal, General Cargo, Ro-Ro, Bulk Grain, Livestock, Reefer, Motor Vehicles, Bulk Edible Oil and Passengers.

Berth No.	*Depth (m.)*	
1–8	11.00	Conventional, Ro-Ro & Passenger.
9	12.00	Grain & Conventional.
10–11	11.50	Bulk, Oil & Conventional.
12–30	12.00	Conventional & Cement.
31–33	14.00	Conventional.
34–37	14.00	Container Terminal.
38–41	8.00	Conventional.
42–43	11.00	Conventional.
Ro-Ro	8.00	Ro-Ro.

Please note: Conventional berth Nos. 31 – 33 can accommodate maximum draft 13 m. but delays may occur when vessels require these particular berths pending port situation at actual arriving date.

Storage: Adequate covered and open storage space is available in the form of Warehouses, Transit Sheds, Livestock Sheds, Dangerous Goods Warehouses plus Cells, Cool and Cold Stores, Container Terminals, Ro-Ro Terminal, Container Freight Station, Vehicle Parks, General Cargo Storage and Lube-oil Storage Facilities.

BULK CARGO FACILITIES:

Bulk Grain (Private User Facility):

Operator:	Grain Silos and Flour Mills Organisation.
Max. permissible ship-draft:	11 m.
Unloading:	Gantry booms/vacuum pipes and conveyor.
Loading:	Gantry boom/pipe and conveyor.
Height of gantry boom:	44 m. part at 80°. 33 m. operating at 30°.
Outreach:	22 m. from quay wall (loading). 24 m. from quay wall (unloading).
Outswing:	90°.

Bulk Cement (Private User Facilities):

Silo vessel:	Floating silo (70,000 tonnes capacity).
Operator:	Saudi Research and Development Co.
Max. permissible ship-draft:	11.5 m.
Bag and bulk outlets	Rate 7,000 tonnes per day (bulk)
Silo vessel:	Floating silo.
Operator:	Rolaco.
Max. permissible ship-draft:	11.5 m.
Bag and bulk outlets	Rate 6,000 tonnes per day (bulk) 5,000 tonnes per day (bagged)

Bulk Edible Oil (Private User Facility):

Operator:	Saudi Vegetable Oil and Ghee Co.
Max. permissible ship-draft:	11 m.
Unloading point:	A pump station pit and manifold is located on the quay for hose connection.

SPECIALISED CARGO HANDLING FACILITIES:

Ro-Ro Terminal (Common User Facility):

Max. permissible ship-draft:	7.5 m.
Mobile cranes:	2 of up to 40 tons capacity.
Forklift trucks:	127 of up to 33 tons capacity.
Head trucks:	67
Trailers/Chassis:	126 of up to 40 ft./100 tons capacity.

Jeddah Container Terminal East (Common User Facility):

Max. permissible ship-draft:	11.5 m.
Container cranes:	2 of 30.5 tons capacity with an outreach from the quaywall of 25.9 m./28.95 m.
Straddle carriers:	25
Forklift trucks:	27 of up to 33 tons capacity.
Head trucks:	22.
Trailers/Chassis:	42 of up to 40 ft./60 tons capacity.
Electricity supplies:	'Plug in' points for 192 reefer containers.

Jeddah Container Terminal West (Common User Facility):

Max. permissible ship-draft:	13.5 m.
Container cranes:	4 of 30.5 tons capacity with an outreach from the quaywall of 34.5 m.
Straddle carriers:	23.
Forklift trucks:	20 of up to 25 tons capacity.
Electricity supplies:	'Plug in' points for 192 reefer containers.

BRIDGES: There are no bridges or other restrictions to prevent access to the port by vessels of not more than 13.5 m. draft.

STEVEDORES: The port provides stevedoring services 24 hours a day, 7 days a week. For vessels wishing to discharge cargo at Jeddah Islamic Port, Shipowners or their Agents should provide ETA advice in accordance with the Rules and Regulations for Saudi Arabian Seaports, as follows:

(a) Before loading for Jeddah;
(b) On sailing last load port;
(c) At five, two and one day intervals before the vessel's ETA;
(d) On revising the vessel's ETA.

TANKERS: The Petromin facility has 2 berths in the oil basin and 2 in the inner harbour. Petromin provide their own tugs and launches.

The port does not have facilities for the handling of liquid chemicals or LPG carriers.

Jeddah Port Authority Circular: Vessel calling for bunkering supply or for repair will not be cleared/berthed unless following information is furnished to Jeddah Port Management before ship's arrival:

1. Radio Code.
2. Vessel Name.
3. Owner/Line.
4. Nationality.
5. Agent.
6. LOA.
7. MD.
8. G.R.T.
9. N.R.T.
10. D.W.T.
11. Previous Name.
12. ETA.
13. Arrival Draft.
14. Hazardous cargo transit.
15. Lloyd's Register Serial Number.
16. Requirements bunker and fresh water (approx.).

Before providing any facilities, a Permit Certificate has to be obtained from office of Asst. G. M. for Traffic.

Ship will not be cleared by Port Authority unless above Permit Certificate is attached with Original Arrival Notice signed and stamped by party concerned at Jeddah Port Management.

Also see "Shipmaster's Report No. 2".

CRANES: Rail-mounted electrical level luffing cranes of up to 15 tons capacity are available with an outreach from the quay wall of 25 m.

The port also has available 88 mobile cranes of up to 250 tons capacity, including a floating crane of 200 tons capacity. Other equipment includes 490 forklift trucks of up to 33 tons capacity and 145 trailers of up to 40 ft./60 tons capacity.

General cargo vessels must be adequately geared at each hatch. Port cranes may be hired on request or may otherwise be utilised at the Port Management's discretion.

RADIO: The Coast Radio Station, Jeddah Radio, call sign HZH (Telex No. 403799 RDJD DJ), can be called up at any time on 500 kHz. All vessels send telegrams to Agents, receivers and Port Authorities, etc. through Jeddah Radio.

Jeddah Radio is also on VHF Channel 16 for telephone calls to Agents and Jeddah ship repair yard.

VHF: Jeddah Port Control Signal Station has 4 VHF Channels:

a) Channel 16 (international distress, safety and calling Channel);
b) Channel 14 (Working Channel);
c) Channel 12 (Working Channel);
d) Channel 9 (Working Channel).

Vessels bound for Jeddah Islamic Port contact the Port Control Signal Station on Channel 16, then shift to a working Channel as advised to pass on ETA and other relevant information. When necessary, weather reports, notices regarding navigational aids etc., are broadcast to vessels on Channel 12 after having first been advised on Channel 16. In the event of distress or emergency, vessel traffic is controlled by the Port Control Signal Station as far as circumstances permit. Duplex is available for communication with the Agent for operational purposes.

RADAR: A port surveillance radar system is in operation.

MEDICAL: Full hospital facilities are available. The Agent should be informed of any medical attention required. Vaccination Certificates should be provided as previously specified (see "Health").

DENSITY: 1039.

FRESH WATER: Fresh water can be supplied by the port at berths Nos. 1–36.

The port can supply fresh water to vessels on written application to the Marine Department at a cost of SR 15 per tonne. The rate of delivery varies up to 50 tonnes per hour, depending on the number of vessels being watered at any one time and the hydrant arrangements at the respective berths. Supplies are normally available between the hours of 0700 and 1900 for cargo vessels and at any time for passenger and livestock vessels. The port owns a water barge which will shortly be available for the supply of fresh water to vessels at the anchorages at a cost of SR 20 per tonne.

Also available from private suppliers who currently charge between US$15 and US$18 per metric tonne and normally require approximately one week's notice. The method of delivery is by barge at a rate of 50 to 70 tonnes per hour.

FUEL: There are several suppliers in Jeddah who normally require between 1 and 2 weeks' notice of nomination, either through a broker or directly. All types of bunker oils are available and are supplied by tanker at varying rates of delivery.

If bunkering at anchorage, proceed to "Anchorage E".

Also see "Shipmaster's Reports" and "Reports".

FIRE PRECAUTIONS: Special rules apply concerning fire precautions and fire-fighting. Reference is made to the Rules and Regulations for Saudi Arabian Seaports, Part 1, section 7, and Part 3, section 4.

CONSULS: Most countries are represented in Jeddah.

REPAIRS: Several local agencies provide all types of shipboard repair work in the mechanical, electrical, electronic and refrigeration air-conditioning fields.

The Jeddah Shiprepair Yard has complete facilities for drydocking vessels, conversion work and all types of repairs to hull and machinery.

DRY DOCKS: Jeddah Ship Repair Yard:

	Dock 1	*Dock 2*
Max. d.w.t. (Approx.)	45,000	16,000
Lifting capacity (tonnes)	19,000	11,000
Length overall (m.)	215.00	165.00
Length over keel blocks (m.)	200.00	150.00
Clear width (m.)	33.50	25.00
Water depth over top of keel blocks (m.)	7.55	6.95
Pumping times (minutes)	90	90
Cranage (tons SWL × radius reach (m.)	2×7 ×20.5m.	2×7 ×20.5m.

SURVEYORS: The following Classification Societies are represented in Jeddah: Lloyd's, A.B.S., B.V., D.N.V., N.K.K., G.L. and RINA.

Cargo inspectors also available.

GANGWAY/DECK WATCHMEN: 1 coastguard is stationed at the foot of the gangway of vessels alongside. Coastguards keep constant check on liquor seals and may search personnel going ashore.

HATCHES: The opening and closing of non-mechanical hatches is normally carried out by the Port's stevedores.

CUSTOMS ALLOWANCES: Alcohol must be kept in bond and is not allowed to be consumed or landed within the Kingdom. There are no restrictions on tobacco.

CARGO GEAR: Discharge of general cargo and containers at non-specialised facilities is by ship's gear. However, a wide range of mobile cranes are available for hire at short notice (see "Cranes").

REPATRIATION: There are approximately 30 international flights daily to and from Jeddah. A visa is required for entering or leaving the country.

AIRPORT: The King Abdul Aziz International Airport is located approximately 30 km. North of the port.

TIME: GMT plus 3 hours.

HOLIDAYS: Friday is the weekly day of rest and prayer. The Hegira calendar of 12 lunar months consisting of 354 days provides for two Government holidays. The first, lasting one week between the end of the ninth month (Ramadan) and the beginning of the tenth month (Shawwal), represents the celebration of the end of the month of Muslim fasting. The second is for 10 days, from the 5th to the 15th of the twelfth month (Dhu-al-Hijjah). This is the period when Saudi nationals and Muslims from all over the world come to perform the pilgrimage in the Holy cities of Makkah and Madinah.

The port, however, operates continuously throughout the year, 24 hours a day, 7 days a week.

POLICE/AMBULANCE/FIRE: Masters of vessels should contact the Port Control Signal Station on VHF Channel 16.

EMERGENCY CO-ORDINATION CENTRE: In case of emergency, vessels should contact the Port Control Signal Station on VHF Channel 16. Requirements will be relayed to the Port's Operations Co-ordination Centre.

TELEPHONES: Facilities are available for telephone connection at certain berths, although there are currently no arrangements for placing telephones on board.

Public pay phones are available in the port area.

SERVICES: *Tank Cleaning/Compass Adjusting/Life-Raft Servicing:* There are presently no facilities in Jeddah for tank cleaning, compass adjusting or life-raft servicing.

Fumigation: Fumigation services are available in Jeddah.

Garbage Disposal: The port has a waste incinerating vessel with one waste collection launch and one oil skimming launch. A charge is levied for this service at a rate of SR 1 per metre ship length per day or part thereof.

STORING: Subject to approval from the Customs, Coastguard and Health Authorities, there are no restrictions for the storing of vessels by truck or barge.

IDENTIFICATION CARDS: Shore passes are issued. However, discharge books or passports must be left at the gate and collected when re-entering the port area.

SHORE LEAVE: Permitted on Agent's application to the Immigration Authorities and the Coastguard.

BANKS: Al Bank Al Saudi Al Fransi (Saudi French Bank), P.O.Box 1, Jeddah. Tel: 6448852/6442853/6423521/6423344. Telex: 4001168 Safjed SJ.

Al Bank Al Saudi Al Hollandi (Saudi Dutch Bank), P.O.Box 6677, Jeddah. Tel: 6446731/6446732. Telex: 401012/401207 Bashjid SJ.

Citibank NA, P.O.Box 833, Riyadh. Tel: 4024060/4020270. Telex: 200195 Citifex SJ.

Saudi British Bank, P.O.Box 109, Jeddah. Tel: 6423251/6423621/6446628. Telex: 401051/402048/400493 Sabb SJ.

Banking services provided by the National Commercial Bank are available at Gate No. 2 of Jeddah Islamic Port. Tel: 6442711/6445388.

REGULATIONS: The Rules and Regulations for Saudi Arabian Seaports are published in booklet form and are available on request from the Agent. Every vessel arriving at the port must have a copy on board or obtain one immediately on arrival.

Every vessel entering Jeddah Port must hoist the Flag of the Kingdom of Saudi Arabia and keep it flying at all times throughout its stay in the port.

Vessels wishing to unload cargo at Jeddah Islamic Port must apply to the Director-General by telex for a berthing appointment prior to loading for Jeddah.

DELAYS: Subject to the timely completion of clearance formalities, there are no delays in berthing, loading, discharging or bunkering.

GENERAL: *Other important information:*

(a) Mean height of quay surface from water alongside berth is 2.25 m.

(b) Width of fenders is 30 cm.

(c) Height between highest and lowest recorded tides is 1.02 m.

(d) For reference, please see BA. Chart Nos. 2599 and 2577 and Red Sea Pilot.

Other facilities include:

(a) Modern equipment to combat oil pollution, including an oil recovery vessel, oil separation barges and a full range of spraying equipment, absorbants, dispersants and oil containment barriers. Tugs with pollution control facilities are available.

(b) An integrated fire-protection and fire-fighting system incorporating a sophisticated control centre with electronic monitors for fire alarm and detection equipment, linked with a highly efficient network of sprinklers in all buildings, transit sheds and warehouses. In addition, the port has its own fire station equipped with a full range of appliances. Water-borne facilities are also available in the form of a 1,700 h.p. fire-fighting vessel. A second fire boat is due for delivery in 1982.

(c) *Miscellaneous marine craft and equipment comprising:*

4 self-propelled barges,
12 flat-top barges of 400 tons carrying capacity,
6 pilot boats,
6 service launches,
7 barge towing launches,
4 mooring launches,
1 buoy-laying vessel,
1 hydrographic/VIP launch.

DEVELOPMENTS: Plans are well advanced for the construction of a Livestock Terminal in the S.W. area of the Port. The main berth will be dredged to a depth of 14 m., with berthing to a depth of 8 m. available for smaller vessels. The terminal will receive all livestock entering Jeddah.

Another project, scheduled for the N.W. area of the Port, will involve extensive land reclamation and the creation of harbour basins. A broad spectrum of service and support facilities will be provided, including a multi-purpose/ro-ro terminal, a car terminal, a heavy load terminal, a service harbour and a control tower. This project is expected to be completed 1984.

SHIPMASTER'S REPORT No. 1: 1975.

Berths: These are good, well fendered, and have depths of 33 ft. alongside most of them.

Anchorages: These are both protected and restricted by the series of coral reefs off the port. Due to congestion, the anchorages are very crowded and it is necessary for ships to moor rather than lie to single anchor. Holding ground is not good and when the afternoon breezes blow strongly it is sometimes prudent to have engines on stand by. At night it is frequently calm and fenders are required as ships make contact.

Bunkers: Bunkers are available by barge. On this vessel's last call ships calling at Jeddah for bunkers only were waiting up to 3 days. On our first call, although bunkers were ordered in good time, they were not delivered at all.

Tugs: There seems to be 2 harbour tugs and a number of smaller ones for towing lighters etc. They seldom appear when ordered, this was confirmed by the Pilots.

On our last call, although ship was manoeuvring with difficulty, tugs were not available either for entering port or berthing.

Pilots: Pilots are excellent. Pilot boat waits in El Hariq, North of Qaram Reef. Under no circumstances will Pilot meet ships further out. Departing, Pilot leaves in "Middle Gateway" or before.

Navigation Aids: Port only operates in daylight and there are no lights. The airport radio beacon is very useful especially as in the reduced visibility so often encountered in the Red Sea, nothing is seen visually until the ship is inside the outer dangers.

There are a number of chimneys and water towers visible to the North of the port, but these are not marked on the charts.

The radar picture can be misleading when compared with the coastline on the chart. The strongest echo is given by the anchored ships.

Qaram beacon is lying on its side at present. The wreck on the next reef to the South, which looks like a small ship under way, is usually seen first.

Agency Service: All requests for water, cash, shore labour etc. must be made in good time. At anchor, Agent's launch visits only infrequently. On vessel's last call, Agents did not board ships in the anchorage at all, even though the ship was in a certain amount of trouble. The normal practice seems to be for the Master to go to the agency office himself to chase things up. The office staff are all most pleasant and helpful.

There is good telex communication, except on Fridays, but telephone calls to UK are all but impossible. By local custom, the agency closes at 1400 hrs., reopens at 1900 hrs. daily.

SHIPMASTER'S REPORT No. 2: 1976.

Report on New Clean Oil Terminal.

Charts Required: BA 2599 Approaches to Jeddah, BA 2577 Jeddah Harbour.

Pilot Station: Lat. 21° 27′ 15″ N. Long. 29° 06′ 00″ E.

Position of New Clean Oil Terminal:
Lat. 21° 26′ 55″ N. Long. 39° 09′ 20″ E.

Approach to Terminal: Through Middle Gateway, Inner Gateway then South for 10.5 cables.

Depths: Least depth in approach channel 50 ft. and at berth 40 ft.

Moorings at Berth: Both anchors down with 6 shackles of cable on each. 8 Stern lines to buoys, viz 2 lines on each quarter to stern buoys. 2 Quarter lines on Starboard side to Starboard Quarter buoy. 1 line from main deck to Starboard Quarter buoy. 1 line from main deck to Port Quarter buoy.

Cargo Hoses: 3×8 in. Floating cargo hoses connected to Port side manifolds, viz, one for Mogas/Jet fuel, one for A.D.O./Kero and one for Fuel oil. Shore ends of hoses connected to manifolds on causeway. Shore line sizes given as Mogas/Jet Fuel 8 in. A.D.O./Kero 12 in. and Fuel Oil 12 in.

Back Pressure: Back pressure allowed 100/115 p.s.i. giving the following discharge rates. Mogas/Jet Fuel 160 m/t.p.h., A.D.O. 320 m/t.p.h., Kero 340 m/t.p.h. Fuel Oil 300 m/t.p.h.

Bunkers: Fuel Oil and Diesel Oil are shipped at berth after discharge of cargo.

Fresh Water: Not available at berth.

Accommodation Ladder: Rigged on Port side.

Shore Leave: By boat, takes 20 mins. to cover the 1 mile distance. No one is allowed to land on the causeway.

Seamens' Identification: To leave dock area seamen must deposit their Seamans I.D. Card, C.D.C. Book or passport at the dock gate. Documents are picked up on return to dock gate.

Communications: Jeddah Radio H.Z.H. can be contacted on 500 kHz. and no traffic lists are sent.

Jeddah Port is now operating a VHF Station "Jeddah Signal Station" which can be contacted on VHF Channel 16, but meantime is only concerned with berthing of dry cargo ships. This VHF station is British manned, but is not in contact with Pilots by radio or telephone.

Tanker Operations Communications: Jeddah Oil Refinery can be contacted on VHF Channel 11 when approaching pilot station and will pass messages to Agent and inform Pilot when requested to do so. Unfortunately information supplied by using this method is not always reliable as sometimes they don't know what tanker movements are scheduled. Usually Pilot will take vessel into anchorage if discharging berth is not available. No berthing operations are conducted in the Port of Jeddah between the hours of sunset and sunrise.

SHIPMASTER'S REPORT No. 3: July 1977.

Bunkering Large Tankers: The bunker vessel was calling us on Channel 16 as soon as we were clear of the Gulf of Suez. We contacted him about 300 miles away and gave an ETA. Despite these long ranges it was very difficult to contact him when we were approaching the port. The Master speaks reasonable English, and said he was coming out to us and would come alongside on our starboard side.

Our vessel was stopped in the water and the bunker vessel was soon sighted coming towards us. The "Al Jawhara" about 3,000 d.w.t. is registered at Jeddah and manned by South Koreans. They have air-fired heaving lines with soft padded weights at the end. They have adequate fenders and mooring lines and the berthing operation took only 15 minutes. The weather conditions were ideal with no wind or swell. They advised their maximum pumping rate was 800 long t.p.h. During the 8 hours we were bunkering we did not drift any appreciable amount, despite a force 3 wind blowing most of the afternoon from the N.N.W.

The Master of the bunkering vessel intimated that he would not come outside in the future. A vessel of our size, LOA 886 ft. and draft 59 ft. would, in my opinion, have to anchor well South of Qaham beacon. The anchorage area to the West of Qaham beacon was fairly crowded although there were, apparently, fewer ships there than usual.

The Agent boards the vessel and requires a copy of the Crew list. No other officials boarded.

SHIPMASTER'S REPORT No. 4: May 1977.

Vessel anchored in the Outside anchorage (Qaham beacon bearing 137° True × 1.1′) brought up with 6 shackles on the port anchor in 35 fathoms of water, and in a stiff Northerly breeze this seemed to suffice.

Contact was made with the Jeddah signal station when about 30 miles away. Approaching from the South the high rise buildings of Jeddah show clearly at 48 miles on the radar screen. The first visual object sighted was the beacon on Mismari Reef. There is also a wreck on the reef which comes into view at the same time. On this passage along the coast we remained outside 100 fathoms at all times. The coastline South of Jeddah is very sandy and low and does not show readily on the radar. The aero beacon at Jeddah gives a strong signal on the D.F. and can be recommended for an approach bearing. The high rise buildings of the city came into view at about 20 miles.

We were ordered to anchor and await the Pilot outside Qaham Reef. The Agent's representative arrived unannounced at about 1500 hrs. by launch. He collected the papers for entry and brought with him copies of the papers in Arabic which are required for the Port Authority, Customs and Doctor. He explained that when he received the clearance he would inform the pilot station. It is necessary to have a Pilot to enter the outer gateway which lies between Jahan Reef to the North and Qaham Reef to the South. There is no pilotage from 1800 hrs. to 0700 hrs. in the morning. Our Pilot arrived on board with very little notice at 1100 hrs. He took the ship to the S.W. anchorage and anchored her with Qaham Reef beacon bearing 307°(T)×0.82 miles. He explained that with only 14 Pilots employed and with cargo vessels taking priority over bunkering vessels that would account for our delay in entering the harbour. We anchored in 18 fathoms with six shackles on the starboard anchor.

The bunker vessel "Vitoria" arrived alongside at 1515 hrs. with heavy oil only. She commenced bunkering at 1610 and completed at 2210 hrs. for 740 tonnes H.O. The "Vitoria" is quite a sizeable craft with the appearance of a small coaster. She has tyre fenders over the side and in the stiff Northerly breeze ranges freely, however with ample fuel hose there was no movement at the ship's fitting.

The diesel fuel was delivered by a small barge which tied up alongside our port side. The barge arrived at 1630 hrs. and commenced pumping at 1715 to 2030 hrs. for 132 tonnes. The barge then returned to base for a new load and returned to the vessel at 0635 hrs. He bunkered from 0705 to 0855 hrs. for 74 tonnes. His maximum lifting is 150 tonnes. This was not made clear to us by the Agent so any vessel requiring more than 150 tonnes of D.O. will require two lifts plus. The name of the bunkering firm was El Howi. We did not require any fresh water and as it costs 20 U.S. dollars a ton it is not recommended.

There was no shore leave from the anchorage and no cash was drawn. Bum boats are not allowed in the harbour by the Harbour Authorities. A providore called by in his boat but we required no stores.

The pilot boat is a large white craft with raised cabin three-quarter length and has "Pilots" written in black on the side of the cabin. A traffic list is broadcast at 0700 hrs. each morning for ship's berthing. They use Channel 16 for calling and Channel 12 for relaying messages. The Agent states they are not allowed to have a VHF Channel. It would be much better if they did have their own channel for direct communication. The ship's radio station must close when the papers are signed for entry. It is a very busy port with a lot of commercial traffic and also bunkering ships are increasing in number. There were approximately 65 ships at anchor and alongside. The Pilot informed me it was optional to have a Pilot for sailing and as it was very straightforward I sailed on completion of bunkering without having a Pilot. We were under way at 1000 hrs. for a total detention time of 44 hours 3 minutes.

Our vaccination certificates were all in date for three years, but we had no cholera or yellow fever certificates. With going to the outside anchorage I do not think they are too concerned but I think if the vessel had to go alongside for cargo work the authorities would be stricter about the certificates.

The Authorities normally call on board but with the wind blowing fresh they allowed the Agent to come out to collect the papers. The Agent's representative, spoke excellent English and was most helpful. He endeavoured to obtain a Pilot for us after clearing the ship inwards but was unable to do so in the time remaining before 1800 hrs. Therefore I think it is important to be off the port before 1000 hrs. if the vessel is to enter the port. The roadstead anchorage is about 4 miles from the piers and the launch that is used for transporting the Agent is slow. The Agent delivered the clearance before the bunkers were delivered and was in attendance prior to our departure.

ETAs and information sent via Aden Radio 72 hours in advance of arrival. Jeddah only has medium wave station and can be contacted 24 hours in advance of arrival.

Messages sent to Agent and Port Health Jeddah Port Administration: Sample message to Port Health: Vessels name, call letters, British ship ETA 1500 Saturday 7th for bunkers only gross tonnage 7,740 nett, 4234 Last port Lyttelton N.Z. Sailed 16th April Next port of call Patras Greece Crew 42 All well Doctor onboard All crew have smallpox vaccination certificates Stop Vessel has not called at any port infected with cholera or yellow fever.

Master

SHIPMASTER'S REPORT No. 5: December 1983.

Delays during bunkering experienced as vessel could not be cleared between 1730 and 1000, due to Customs Officers working hours.

REPORT: September 1983.

Fuel: For all vessels calling at Jeddah for bunkers only under Tranship Agency the following procedure must be followed to ensure fastest turnround:

AA) Pre-arrival information (which must reach Tranship offices at least 48 hours prior to arrival of vessel).

(i) Call sign
(ii) Vessel's name
(iii) a) Owner's name
  b) Line
(iv) Nationality
(v) Agent
(vi) LOA
(vii) Max. draft in metres
(viii) GRT
(ix) NRT
(x) DWT
(xi) Vessel's ex-name
(xii) ETA
(xiii) Actual arrival draft
(xiv) Hazardous cargo in transit for other ports
(xv) Lloyd's Register No.
(xvi) Expected bunker requirements
(xvii) Date of building
(xviii) Last port.

BB) Arrival time.

Please note that vessel must anchor at Jeddah prior to 1700 hrs. for clearance/bunkering same day. For vessels arriving after 1700 hrs. and during hours of darkness, clearance is carried out following morning at approx. 1000 hrs.

CC) Please instruct Master –

(i) To cable Tranship "Dammam" with ETA 5 days and 24 hours through Bahrain Radio, quoting as part of cable address Reg. No. 39 and Account No. 1451855.

(ii) If Southbound through Red Sea, give time passing Suez through Canal Agent with ETA Jeddah.

(iii) On approaching Jeddah, contact our tug "Omar" or supply tankers "Marwah I/II/III/IV" at max. range on VHF Channel 13 giving best anchoring times.

(iv) All vessels to anchor in "E" (echo) anchorage area:

Latitude:	Longitude:
21° 23.3′ N.	39° 06.0′ E.
21° 24.7′ N.	39° 05.1′ E.
21° 22.0′ N.	39° 03.1′ E.
21° 22.0′ N.	39° 05.9′ E.

Alternative reference for area "E" is bearing 230°×2.8 miles from Qaham beacon.

(v) Advise Jeddah signal station (VHF Channel 16) of arrival time, name of Agent (Tranship) and that vessel is calling for bunkers only.

(vi) Please note our cable address is "Tranship Jeddah".

DD) Vessel information: To minimise time taken to connect hoses, Owners/Master should telex Tranship at least 48 hours prior arrival with following information.

(i) Hull/superstructure colour.
(ii) Major identification features e.g. cranes or derricks, position of superstructure, funnel markings, etc.
(iii) Bunker manifold size (4-6-8 inch or equivalent).
(iv) Position of bunker manifold and height above waterline.
(v) Max. pumping rate acceptable for F.O. and D.O.

REPORT: May 1984.

Operational instructions for Owners and Masters of vessels taking offshore bunkers from Bakri Bunker Trading Co. at Jeddah:

1. *Radio Contact/Operating Position:*

"al Bakry" (call sign HZGH) maintains continuous watch on VHF Channel 16. VHF range this area is 3-400 nautical miles and Masters should therefore establish contact at least 24 hours ahead of arrival Jeddah. Working channel will be agreed between Masters when contact established, and rendezvous point will be advised by the Master of the bunker vessel, well in advance.

Please note that Customs/waterguard operate only during the hours of daylight. Customs launches leave quay at 0900 daily and clear vessels in order of arrival through approximately 1700 hrs. Vessels arriving too late are not cleared until following day.

2. *Notice:*

a. Wherever feasible vessels taking bunkers from Bakri Bunker Trading Co. must send a cable at least 120 hours prior to arrival off Jeddah to 'best service Jeddah' giving following information in accordance with port management instructions:

(1) Radio code, (2) vessel's name, (3) owner/line, (4) nationality, (5) Agent, (6) LOA, (7) max. draft in m., (8) g.r.t., (9) n.r.t., (10) d.w.t., (11) all previous names, (12) Jeddah ETA, (13) actual arrival draft, (14) details of hazardous cargo in transit for other ports, (15) Lloyd's Register number, (16) Expected requirements of bunkers and water, (17) quarantine requirements of port doctor – name of last 3 ports of call/no. of crew and their state of health/validity of vaccination certificates for cholera, smallpox, and yellow fever, confirmation that none of the crew will go ashore.

Please note: Prior to the provision of any services being authorised, an approval must be obtained from the office of the Assistant Director General (Traffic and Operations.)

The final ship's clearance certificate will not be signed prior to sailing by the responsible Jeddah Port Management officers unless it is accompanied by the original advice notice bearing Jeddah Port Management's stamp and the signature of the clearing officer.

b. Owners must also send a telex minimum of 72 hours prior to their vessel's arrival off Jeddah to Bakri Bunker Trading Co. (Telex: Jeddah 401557 "Bakri SJ" or Jeddah 402125 Penta SJ) repeating the information contained in the cable sent from their vessel. This telex must also confirm that none of the crew of vessel will go ashore. Failure to provide the above information in time could delay clearance by Jeddah Port Management and result in vessel being delayed.

c. Both messages a. and b. must be updated 48 hours and 24 hours ahead of arrival.

3. *Operating/Manoeuvring:*

Will be advised by Master of "al Bakry" on VHF.

4. *Supplies:*

Supplies are made subject to the general terms and conditions for the sale of marine fuels of Bakri Bunker Trading Co. Ltd.

5. All vessels calling for bunkers with Bakri Bunker Trading Co., must comply with the laws of Saudi Arabia, including courtesy flag requirements.

Vessels have recently been delayed by boycott office and Port Authority in Jeddah due belated receipt particulars, especially Lloyds number/all former names. If this data not received minimum 72 hours ahead vessel's arrival, delay will ensue.

AUTHORITY: Jeddah Port Management. *Tel:* Jeddah 6471200. *Telex* 401175 Ports Sj. *Cables:* Ports Jeddah. *Contact:* Mr. Mohammed Ali Al-Ghaithy, Acting Director-General, Jeddah Islamic Port. Mr. Hamid S. Abdulmannan, Vice Director General. Mr. Mustafa M. Hariri, Director of Technical Affairs and Director of Traffic and Operations. Mr. Hassan Burhan Hamdi, Director of Marine Affairs.

AGENT: Gulf Agency Company Saudi Arabia, Algosaibi Centre, Andlus Street, Al Hamra, P.O.B. 2038, Jeddah, Saudi Arabia. Tel. 6531964, 6531968, 6535060, 6535056. After office hours: 6319928, 6373728, 6651823, 6829555. Telex: 401047 ("Gaship Sj"). Cables: "Gulfagency", Jeddah.

JU'AYMAH: 26.56 N. 50.03 W. (See Plan Book)

ALSO SEE "RAS TANURA – SECTIONS (A) AND (B)".

(A) CRUDE OIL TERMINAL.
(B) LPG TERMINAL.

(A) CRUDE OIL TERMINAL.

This section gives specific information regarding Ju'aymah Crude Terminal which includes the Single Point Mooring Berths and is to be read together with "Ras Tanura – Part A".

LOCATION: The Ju'aymah Crude Terminal loading facilities are located approximately 18 miles N.N.W. of the Ras Tanura Terminal and 7 miles offshore.

These facilities consist of an oil metering and manifolding platform, a terminal control platform and 6 Single Point Mooring Berths. The oil metering and manifolding platform is in the following position: Lat. 26° 54.8′ N., Long. 50° 01.2′ E.

Ju'aymah Crude Terminal: The terminal is an ARAMCO crude oil and fuel bunker loading facility designed for loading and topping-off deep draft tankers. The terminal consists of the following facilities:

An Oil Platform (130 ft. by 390 ft.) located in 50 ft. (15.24 m.) of water. This platform receives crude oil and fuel bunkers from the storage tanks on the shore to the S.S.W. through 4×56 in. submarine crude pipe-lines each being about 35,770 ft. long.

The platform is well lighted with general purpose lighting. In addition 1 fixed white light has been established on each corner of the platform with a range of visibility of approximately 5 miles. A Control Platform (70 ft. by 70 ft.) is located 150 ft. North of the oil platform and connected to it by a walkway bridge. This houses the communications and radar equipment, testing laboratory, offices, control system and meteorological equipment. This platform is marked by a fixed red aircraft warning light.

Single Point Mooring Buoys have been established between 1 and 4 miles to the N.E. of these platforms. Crude oil and bunkers are received at each buoy from the oil platform through 1 bunker and 2 crude oil submarine pipe-lines which are connected to the buoy by flexible submarine hoses.

Each buoy is fitted with 2×24 in. floating crude loading hoses with 16 in. or 20 in. tail hoses and 1×12 in. floating bunker loading hose. The length of the string is approximately 1,100 ft. (335 m.).

When an SPM is removed ashore for maintenance, a marker buoy may be installed to indicate the position of the underwater pipe-line and anchor chains.

PILOTAGE: *Pilot Boarding:* A Pilot/Mooring Master and an SPM Representative will board inbound vessels by helicopter if possible as advised.

They will advise the Master on all manoeuvres and operations relative to berthing, connecting and disconnecting hoses and unberthing. They will also provide all communications between vessels and shore during cargo loading and be the ARAMCO Representative with respect to safety observation and other requirements.

These two persons will remain on board the vessel throughout the loading and unmooring and suitable accommodation for them is to be provided.

Dependent on weather and other conditions, vessels will be advised by Ju'aymah Pilots to proceed to a position approximately 8 miles E.N.E. of Ju'aymah Platform and make a lee for the Pilot to board or for the launch carrying mooring and hose connecting equipment. Vessels shall not proceed closer to the berths than this position without instructions from the Pilot/Mooring Master.

INBOUND TRAFFIC PROCEDURE: See "Ras Tanura – Part B" – Traffic Regulations.

Vessels Proceeding Direct to Ju'aymah Crude Terminal: As per "Ras Tanura – Part A" – Navigation – Inbound Traffic Procedures to the Entry Buoy and to a position approximately 2.5 miles N.E. of Buoy 3a.

According to advice from Ras Tanura Port Radar and Ju'aymah Pilots should turn into the Ju'aymah Pilot Boarding Area to anchor or be berthed on arrival.

Vessels Proceeding from Northern Holding Anchorage to Ju'aymah Crude Terminal: Should enter the Separation Scheme under advice of Ras Tanura Port Radar and Ju'aymah Pilots and proceed as above.

Max. Draft in Arrival Channel: The max. draft is 70 ft. (21.34 m.) for vessels proceeding along the Inward Channel of the Ras Tanura Separation Scheme bound to Ju'aymah Crude Terminal.

Vessels Proceeding from Ras Tanura Terminal to Ju'aymah Crude Terminal: Should depart Ras Tanura Terminal and follow the Departure Channel towards the Mid-Channel Marker Buoy R.T. 1. The vessel should then proceed exercising due diligence through the Caution Area and with the advice of Ras Tanura Port Radar and Ju'aymah Pilots into the Ju'aymah Pilot Boarding Area either to anchor or be berthed on arrival.

Prohibited Area: No vessel shall enter the Prohibited Area without a Pilot on board. Under no circumstances shall anchors be used in the vicinity of the berths due to the existence of numerous submerged pipe-lines.

ANCHORAGE: The area West of No. 3 Beacon is used as a final holding anchorage and for vessels awaiting arrival clearance, cargo clearance, sailing documents, etc.

Vessels must leave the inbound route to the berths clear when selecting an anchoring position in this area.

RADIO: *Underway:* At all times when underway in the Arrival Channel and Pilot Boarding Area, vessels must maintain contact with Ras Tanura Port Radar on VHF Channel 10 and with Ju'aymah Pilots on Channel 16 or one of the following VHF working Channels: 10, 11, 12, 13, 14. Prior to arrival vessels will be contacted by Ju'aymah Pilots who will request certain updated and additional information for the use of the Pilot/Mooring Master who will berth the vessel.

At Anchor: A good listening watch should be maintained on VHF Channel 16. Vessels will be called by Ju'aymah Pilots with berthing and other information and instructions.

Under Pilotage and at Berth: The Pilot/Mooring Master will carry a portable intrinsically safe multi-channel radio by means of which all communications regarding approach, mooring and cargo loading will be made. These radios are fitted with an emergency tag which activates an alarm at the Control Platform when removed.

He will also carry battery chargers for these radios during the vessel's stay in the terminal.

In addition, the vessel's VHF radio should be available on the bridge and in the Cargo Control Room for back up communications.

HEALTH: *Pratique and Quarantine:* At Ju'aymah Crude Terminal, no person is permitted to board a vessel, nor is she permitted to proceed to the berth until inward clearance formalities have been completed and the Authorities have visited the vessel. Vessels topping off from Ras Tanura Terminal will already have completed these formalities.

However, during adverse weather conditions permission may be given by Government Officials for the Pilot to board and moor the vessel before clearance is given. Should this occur and weather conditions continue to preclude clearance during the loading operation, the vessel must when unmoored anchor and wait for clearance formalities to be completed.

BERTHING: *Preparations:* Line handling during mooring and unmooring is to be performed by the ship's staff under instructions of the Pilot/Mooring Master.

Vessels assigned to the Ju'aymah Crude Terminal SPMs must be fitted as recommended in the OCIMF publication "Standards for Equipment Employed in Mooring of Ships at Single Point Moorings".

Mooring to strops secured to bitts is not permitted.

During the approach, while mooring and while secured in the berth, the vessel's anchors MUST be secured by stoppers to prevent accidental dropping with subsequent damage to the undersea pipe-lines and equipment.

Both port and starboard derricks should be rigged ready to lift the mooring and hose connecting equipment from the launch on either side. A trolley should be available to transport this equipment about the vessel's deck.

The following vessel's equipment should be ready on forecastle head:

a) Two messenger lines 3 in. to 3.5 in. circumference (24 mm. to 28 mm. dia.) 500 ft. (150 m.) in length.
b) Sledge hammer, large crowbar, large marlin spike, adjustable wrench/spanner.
c) Bag of sawdust or sand.
d) Large flashlight (for night mooring).

Procedure – Mooring:

a) ARAMCO mooring and hose connecting equipment will be lifted aboard the tanker from the launch on either the port or starboard side by means of the ship's derrick.
b) Ship's staff will prepare the forecastle head for the mooring operation at the instructions of the Pilot/Mooring Master.
c) As the vessel approaches the berth, a mooring boat will bring the port hawser pick-up rope (10 in. circumference – 80 mm. diameter) and make it fast to the messenger.
d) At the boat's signal the pick-up rope is hove on deck and by means of this, the chafing chain is lifted in the bow chock and to the mooring bracket.
e) Under the direction of the Mooring Master, the chafing chain is secured in the vessel's mooring arrangement.
f) Ease back on the pick-up rope until the weight is taken up.
g) Repeat for the second mooring hawser.

Procedure – Unmooring:

a) Take the weight of the mooring assembly on the pick-up rope, using the windlass.
b) Disconnect the chafing chain from the mooring arrangement.
c) Slowly slack the pick-up rope until the support buoy is in the water and taking all of the weight of the chain.
d) Pay out the pick-up line either to a mooring boat or as the ship clears the berth.

BERTHING FACILITIES: At the berths, cargo hose connections are 16 in. or 20 in. and bunker hose connections are 12 in. arranged to be connected abaft the crude loading connections. All flanges are 150 ASA.

In order to avoid delays, vessels should have reducers ready at the port side manifold to adapt to these sizes. Maximum crude loading rate is 130,000 bbls.p.h., and maximum bunker loading rate is 5,000 bbls.p.h.

The Single Point Mooring Berths are either Catenary Anchor Leg Mooring (CALM) or Single Anchor Leg Mooring (SALM) types.

Berth No.	*Type*	*Lat. N.*	*Long. E.*	*Minimum Water Depth* (ft.)	(m.)
31	CALM	26° 55.6′	50° 02.4′	93	28.35
33	CALM	26° 57.0′	50° 02.7′	103	31.39
34	SALM	26° 56.6′	50° 04.3′	124	37.79
35	SALM	26° 55.6′	50° 03.6′	112	34.14
36	CALM	26° 55.6′	50° 04.9′	122	37.19

Note: The following crudes are available at Ju'aymah Crude Terminal: Arabian Light Crude, Arabian Medium Crude, Arabian Heavy Crude. Arabian Berri Crude is NOT available.

LOADING: *Loading Hose Connection and Disconnection:* In order to secure the floating hoses to the vessel's manifold, the manifold arrangements must be as recommended in the OCIMF publication – "Standard for Tanker Manifolds and Associated Equipment (May 1975)" and "Tanker Manifolds and Associated Equipment (3rd Edition 1981)".

Preparation – On the Port Side:

(a) Derrick rigged for maximum height and load lifting capacity (10 tons minimum for 16 in. hoses and 15 tons minimum for 20 in. hoses). If possible, the topping lift of the derrick shall be on its own winch.
(b) Two 16 in. or 20 in. 150 lb. ASA flange connections on selected cargo manifolds and one 12 in. 150 lb. ASA flange on the after bunker manifold.

(c) Drip trays, sawdust or sand, dispersant and fire fighting equipment in position.

(d) The following are normally supplied by ARAMCO but their presence will prevent delays in case of deficiency or malfunction: Chain block (not normally supplied), Handy Billy, heaving line, spare spanners, spare wire strop, spare bolts.

Procedure – Connecting Hoses: Connecting and disconnecting of cargo and bunker hoses is to be carried out by ship's staff under instruction of Mooring Master.

(a) Lower derrick hook to the mooring launch which will connect it first of all to the forward hose.

(b) Heave up until the blank flange is level with the hose rail.

(c) Unshackle hose snubbing wires and secure guy ropes to the flange.

(d) Continue heaving up the hose as directed by the Mooring Master.

(e) Secure snubbing wires in a manner to facilitate possible slackening as directed.

(f) Lower the hose to bring the hose flange to the manifold and check the alignment of the flanges.

(g) Lower the hose onto the drip tray and remove the blank flange.

(h) Using the nylon band sling supplied, lift the hose and connect it to the manifold. Never use a wire strop for lifting a cargo hose.

USE ALL OF THE BOLT HOLES AND A GASKET.

The second cargo hose and the bunker hose are connected in the same way.

After all hoses are connected, the cargo hoses must be supported in way of the vessel's side rail by means of the nylon bands supplied and the vessel's derrick.

Procedure – Hose Disconnecting: On completion of loading cargo or bunkers manifold valves must NOT be closed until the Mooring Master directs. This is important for line clearing.

(a) Strop the after hose to the derrick hook, take the weight and disconnect the flange.

(b) Replace the blank flange using *all* of the bolts and a new gasket. Tighten the bolts in sequence to avoid uneven tension on the flange.

(c) Lower hose to deck and secure.

(d) Repeat with forward hose and wait until backfilling of the hoses is complete.

(e) Bunker hose should be disconnected and securely blanked as soon as bunkering is completed and secured on deck until cargo loading is completed. It should be lowered into the water during backfilling of the cargo hoses.

(f) When backfilling is completed, secure the derrick hook to the lifting hook of the after hose and raise the hose until the weight is taken off the snubbing wires.

(g) Release the snubbing wires, lower the hose to rail level and shackle the snubbing wire to the flange.

(h) Lower the hose end into the water and trip the hook to release.

(i) Repeat for the forward hose.

Return all ARAMCO tools and equipment to the steel basket, stow in a seamanlike manner and prepare for lowering to the launch on either the port or starboard side dependent on weather conditions.

Loading Procedures: The loading operation will be controlled by radio voice communications between the Mooring Master on the loading vessel and the Control Platform.

All operations including switching of tanks and topping off must be directly and personally supervised by a ship's officer. Upon being informed by the loading vessel's personnel that the vessel is ready to start loading, the Pilot/Mooring Master will request the loading to proceed according to the previously agreed plan with respect to start-up rates, maximum loading rates and topping off rates.

Under no circumstances is the flow to the vessel to be stopped by the vessel whilst switching tanks etc. Need for emergency shutdown of loading aboard the vessel must be communicated by radio from the loading vessel to the Control Platform.

In the event of failure of the radio communications system, the vessel will sound five long blasts on the vessel's whistle followed by 1, 2, 3, 4, 5 and 6 short blasts for a vessel at Berth 31, 32, 33, 34, 35 or 36 respectively.

Loading operations will be stopped and will not be resumed until communications have been re-established.

It is the responsibility of the vessel to advise the Mooring Master to shut down cargo and bunker loading when the vessel's cargo and bunker requirements are met.

Cargo Calculations and Release: The American system of cargo measurement in Barrels with temperatures in fahrenheit degrees according to the ASTM-IP is used by ARAMCO and the Saudi Arabian Government for cargo measurement purposes. Ship's cargo loaded figures should be available in these units. Generally, if the difference between average normal ship measurement and official cargo measurement is satisfactory the ship will be released to sail, and the Pilot/Mooring Master will leave after unmooring is complete. If the ship/shore difference is large, the Pilot/Mooring Master will survey the cargo according to laid down ARAMCO inspection procedures after unberthing and report his findings to ARAMCO Terminal Planners. The ship is required to stay until released by ARAMCO if ship/shore difference occurs.

Departure: Upon completion of unmooring, the vessel will make a lee for the mooring and hose connecting equipment to be discharged into the launch on either port or starboard side. Depending opon conditions the Pilot/Mooring Master and SPM Representative may leave on the launch or later by helicopter. A separate departure channel has been provided for all vessels using the Ju'aymah facilities. The vessel will proceed via the departure channel between Beacon J1 and Buoy J2 and thence towards the Exit Buoy JE. The vessel should then set an Easterly course North of JD Buoy to the Ju'aymah Light Float.

EMERGENCY PROCEDURES: In addition to the general principles described in Part A of "RAS TANURA", the following apply to Ju'aymah Crude Terminal:

(a) Should a fire or explosion occur at a buoy mooring, the Oil platform or Control platform, all cargo operations will be stopped and all vessels should stand by to disconnect and unmoor when so instructed by the Pilot/Mooring Master or Port Captain, or when the need to take such action becomes self-evident.

(b) The local signal for emergency is a continuous ringing of the vessel's alarm bells supplemented by more than 6 short blasts followed by 1 long blast of the vessel's whistle. Assistance may be summoned on VHF Channel 16. Location, nature of emergency and type of assistance required should be given. (See "RAS TANURA" Part B – EMERGENCY SIGNAL).

BALLAST: *Arrival Ballast Condition:* Due to the exposed location at the Ju'aymah berths, tankers should arrive with sufficient clean water ballast for safe handling having due regard to the existing sea and weather conditions. Unless otherwise instructed, vessels must arrive with propellers just covered and trimmed not more than 8 ft. (2.44 m.) by the stern.

GENERAL: *Boarding Vessels at Berth:* Small craft are not allowed in the vicinity of the vessel and no one is permitted to board or leave a vessel while cargo loading operations are in progress. Should it become urgent to board or leave for any reason during cargo loading, the Pilot/Mooring Master must be contacted to request permission to shut down the cargo loading operation while the small craft is alongside.

S.P.M. Maintenance: In addition to the mooring boats a larger maintenance vessel works on hoses, buoys and subsea systems (RIMTHAN 2).

In bad weather, this work is extremely difficult and involves possible danger to personnel.

For this reason, vessels are requested to give as much assistance as possible by taking seamanlike care of the mooring and hose equipment and returning it to the water ready for the next tanker and in such condition as they would like to find it.

Hose/hawser maintenance is expensive and if ARAMCO judges that a vessel has misused any hose or hawser the vessel will be liable for the expenditure incurred in making repairs.

(B) LPG TERMINAL

This section gives specific information regarding Ju'aymah LPG terminal loading facilities and is to be read together with "Ras Tanura" – Part A.

LOCATION: The Ju'aymah LPG Terminal is located approximately 15 miles N.N.W. of Ras Tanura Terminal and 3 miles S.S.E. of Ju'aymah Crude Terminal Control Platform.

The loading facilities consist of a two-berth pier approximately 6 miles from the shore in position:

Latitude: 26° 52.0′ North
Longitude 50° 02.9′ East

connected to the shore by a trestle.

Ju'aymah LPG Terminal: The Terminal is an ARAMCO operated facility designed to load refrigerated liquefied petroleum gas (RLPG) aboard LPG Carriers ranging in size from approximately 25,000 cu.m. to 200,000 cu.m. capacity.

The onshore complex consists of fractionation, refrigeration, compression and storage facilities. Product storage consists of seven insulated dome-roof tanks of 600,000 barrels capacity each – four in propane (A-140) service and three in butane (A-160) service. Booster and shipper pumps are located in the onshore tankage area. In addition to the LPG product tanks, there are two 50,000 barrel bunker fuel oil tanks and one 30,000 barrel black diesel tank.

A trestle, approximately 6 miles long, connects the onshore facilities to a two berth, offshore loading platform.

A radar station is located on the loading platform for proctection of the facility. This radar station is known as "Ju'aymah NGL Radar".

The trestle consists of an access roadway and a pipeway for the product and bunker lines.

A tower crane is located in the centre of the loading platform.

A helicopter landing platform and two small flares are located near the seaward end of the trestle which is lit by sodium vapour street lamps and emergency navigation lights at night.

PILOTAGE: *Pilot Boarding Position:*

In normal conditions of weather and traffic, an arriving vessel will be advised to proceed from the Ju'aymah Pilot Boading Area by a route South of Buoy J4 to a position 1.5 miles S.E. of SPM 36 to make a lee to pick up the Harbour Pilot. The Pilot will then advise on manoeuvring the vessel to the assigned berth.

INBOUND TRAFFIC PROCEDURES: See "Ras Tanura – Part B" – Traffic Regulations.

Vessel Proceeding Direct to Ju'aymah LPG Terminal: As per "Ras Tanura – Part A – Navigation – Inbound Traffic Procedures" to the Entry Buoy and make for a point approximately 2.5 miles N.E. of Buoy 3a. Under advice of Ju'aymah Pilots and Ras Tanura Port Radar turn into the Ju'aymah Pilot Boarding Area to anchor or to be berthed on arrival.

Vessel Proceeding from Northern Holding Anchorage to Ju'aymah LPG Terminal: Enter the traffic separation scheme under advice of Ras Tanura Port Radar and Ju'aymah Pilots and proceed as above.

Vessel Proceeding from Ras Tanura Terminal to Ju'aymah LPG Terminal: Should depart Ras Tanura Terminal and follow the departure channel toward the mid-chanel marker RT 1. The vessel should pass through the Caution Area with the advice of Ras Tanura Port Radar and Ju'aymah Pilots into the Pilot Boarding Area either to anchor or to be berthed on arrival.

ANCHORAGES: *Ju'aymah Pilot Boarding Area:* The area West of No. 3 Beacon is used as a final holding anchorage and for vessels awaiting arrival clearance, cargo clearance, sailing documents, etc. as for Ju'aymah Crude Terminal. Ships must only use this anchorage when directed to do so by Ju'aymah Pilots and must leave the inward route to the SPM berths clear when selecting an anchoring position in this area.

Ju'aymah LPG Anchorage: This anchorage has been laid out approximately 2.5 miles N.E. of the loading pier to provide a tank cooling area for gas tankers. The depth of water varies between 16 m. and 30 m. (52 ft. and 98 ft.) and holding ground is fair.

BERTHING: *Mooring Procedure:* Mooring boats are not used at Ju'aymah LPG Terminal. Vessels should have heaving lines ready to take the shore messenger after landing alongside. The messenger is then made fast to the vessel's mooring line which is then hove ashore by a capstan. Heavy wires should be sent one by one and ropes two at a time. Jetty crews are continuously on duty to handle mooring lines but will not handle mooring lines aboard vessels.

BERTHING FACILITIES: The 2 loading berths are situated on opposite sides of a platform aligned 335° true compass bearing. Berth 51 being the East (outer) berth and 52 being the West (inner) berth. Minimum water depth at the berths is approximately 78 ft. (23.8 m.) at ISLW (Indian Springs Low Water). There are 4 breasting dolphins at each berth and 6 mooring dolphins. The tower crane located in the centre of the platform is used for moving operational and maintenance equipment. RLPG is loaded via 16 in. LPG loading arms. Maximum loading rate is 15,000 bbls.p.h. per arm. Therefore combined maximum for 2 grades is 30,000 bbls.p.h. Each berth is equipped with 4 LPG loading arms each of which may be used for butane liquid, propane liquid or vapour return. The loading arm connections can be adjusted to fit 12 in., 14 in. or 16 in. 150 ASA flanges. All LPG loading arms are fitted with quick connect/disconnect hydraulic couplers (QCDC). Each LPG loading line has an associated circulation return line. The bunker loading connections can be adjusted to fit 6 in. or 8in. 150 ASA flanges. One bunker/black diesel loading arm is located at each side of the LPG loading station.

Both fuel oil bunkers and marine diesel oil are available at the Ju'aymah LPG berths. The nominal loading rate for fuel oil bunkers is 5,000 b.p.h. and for marine diesel oil is 600 b.p.h. These can be loaded through both of the 8 in. loading arms located on either side of the LPG loading station.

LOADING: *Trim and Stability:* During loading and deballasting operations, the vessel should at all times be adequately stable and in good trim to leave the berth at short notice in the event of an emergency. Excessive lists and trims are not permitted.

Loading Arm Connections: Jetty crews are on duty continuously to handle loading arms and make all connections and disconnections. All loading connections are equipped with electrical insulated flanges therefore ship to shore bonding wires are not required.

Due to the size and bulk of the QCDC couplers, a clear area around each manifold flange of at least 60 cm. (24 in.) is required.The vessel should have suitable 150 ASA reducers and spool pieces fitted to the manifolds it is intended to use.

Loading Procedures: Vapour line must be connected prior to loading LPG cargo of coolant. All excess vapour which cannot be handled by the vessel's recovery equipment will be metered to flare. It is the responsibility of the vessel to advise the jetty operators to shut down cargo and bunker loading when the vessel's requirements of cargo and bunkers are met.

Special regulations govern the acceptance and loading of gas tankers in the Port of Ras Tanura which includes Ju'aymah LPG Terminal.

Cargo Calculations: The American system of cargo measurement in BARRELS with temperatures in fahrenheit degrees according to the ASTM-IP is used for cargo measurement at this Terminal. An independent Inspection Agency is appointed by the Offtaker/Buyer to determine cargo quantity loaded aboard.

Departure: Upon completion of loading, cargo calculation and disconnecting cargo arms, the vessel will be unmoored and the Harbour Pilot will disembark. The vessel will then be free to leave the Port via the Ju'aymah Departure Channel if Early Departure Procedure is used and all relevant documentation is on board. Otherwise, the vessel will proceed to the Ju'aymah Pilot Boarding Area or Cooling Anchorage to await document delivery by the Agent, at the direction of the Pilot.

Contact with Ju'aymah Pilots must be maintained on VHF Channel 16 when in the Ju'aymah Crude Terminal approach area.

GENERAL: *Emergency Procedures:* In addition to the general principles described in Part A of "RAS TANURA" the following apply to Ju'aymah LPG Terminal.

In the event of a fire or explosion at the pier or on board a vessel which is berthed alongside at the Terminal, the local alarm signal will be a series of 10 short blasts on the ship's whistle at which an Emergency Shutdown system will be activated to immediately stop all cargo loading to vessels at the berths. (See "RAS TANURA – Part B" EMERGENCY SIGNAL). In case of a situation requiring urgent removal of a ship from the berth, a system of sequential automatic loading arm disconnection is fitted. This system will only be activated after very careful evaluation of the situation by all parties.

Duty Harbour Pilot and Tugs: Whenever a vessel is at one of the berths at the LPG Terminal, a Harbour Pilot will stand by on the loading platform in constant communication with the vessel(s) and jetty staff by means of the dedicated UHF radios. Pilots on duty for 8 hours (0600 – 1400, 1400 – 2200 and 2200 – 0600 hrs.).

Tugs stand by moored in sight of both loading berths.

RADIO: *General:* The onshore production facilities of the LPG Terminal are known as the NGL (Natural Gas Liquids) Plant, etc. This name is often used in reference to the Terminal. No LNG (Liquefied Natural Gas) is exported from the Terminal.

Underway: In the arrival channel, vessels must maintain contact with Ras Tanura Port Radar on VHF Channel 10. Outside the channel, vessels must maintain contact with Ju'aymah Pilots or Ju'aymah NGL Radar as directed on VHF Channel 16 and working Channels 10, 11, 12, 13 or 14.

At Anchor: A good listening watch should be maintained on VHF Channel 16 for information and instructions from any of the following sources:–

(a) Ras Tanura Pilots,
(b) Aramco Terminal Planners,
(c) Ju'aymah Pilots,
(d) Ju'aymah NGL Radar.

Under Pilotage: The Harbour Pilots carry portable, intrinsically safe radios for contact with tugs which operate on Aramco dedicated mooring frequencies. In addition, the ship's main VHF radio should stand by on Channel 13 for back-up communication.

At Berth: A portable intrinsically safe radio will be supplied to the vessel by the terminal. This radio operates on a UHF frequency dedicated to each berth by means of which constant communication can be maintained during loading. This radio is fitted with a pull-off tag which, when removed, activates an alarm on the radio console in the Control Room and the Pilot Office.

SHIPMASTER'S REPORT: December 1979

The following is a radio message received by the Master from his Agent.

Important Notice Revised Government and Port Regulations Ras Tanura Please acknowledge your compliance.

Para One

Port Authorities now insist that all vessels are not to sail from Ras Tanura (Ju'aymah) until a port clearance (titled sailing report) has been delivered on board STOP Therefore vessels must have onboard both Port Clearance and P2/50 permit of departure before sailing STOP

Para Two

Anti Pollution regulations are now being strictly enforced by Saudi Arabian Government Authorities with heavy fines/delays to vessels/possible arrest for Masters of offending vessels therefore you are strongly advised to AAA Log and report to the Pilot Officer any oil slick P3/50 sightings BBB Closely monitor deballasting operations CCC Acknowledge receipt only of any protest letter submitted by ARAMCO for any alleged pollution incident DDD Advise us immediately a protest letter for an alleged pollution is received on board and name of your P and I Club EEE Issue P4/50 Arab with a separate counter protest letter as required copied to us STOP

Para Three

Please ensure all repeat all alcoholic beverages and pornographic material are removed from cabins/lounges and placed in bonded store for sealing STOP Stores and chillrooms must also be sealed if containing alcohol STOP Vessels are P 5/53 subject to search on arrival and penalties are severe for infringement of Saudi Regulations STOP

Para Four

On arrival Ras Tanura ensure you call this Office advising anchor time and most important advise when Pilot boards your vessel to proceed to berth/SBM in order to avoid delay in clearing your vessel STOP+

SHIPMASTER'S REPORT: December 1980.

Ju'aymah LPG Terminal (N.G.L.):

Approaches: As for Ras Tanura, but use Main Channel only not Eastern Channel. Follow Main Channel to Beacon 3, proceed into Ju'aymah Waiting Area then proceed into "Ju'aymah LPG Anchorage" passing West of Buoy "J6".

Only vessels with authorisation from Ras Tanura Pilot Office will be allowed to proceed direct to LPG Anchorage. If waiting, the Northern Holding Anchorage is used as normal.

Departure: Depart by "Ju'aymah Departure Channel" under control of Ju'aymah Radar.

Control: Can be confusing. The LPG Terminal does not come under Ju'aymah Pilots but Ras Tanura Pilots which must be contacted at all times.

Listen to berthing schedule from "HZY" at 0700 hrs. GMT and 1900 hrs. GMT for berth number and time.

Call "Ras Tanura Pilots" as soon as possible before arrival to find out if loading at North Pier or Ju'aymah.

If cooling down, vessel can take coolant at one berth and load at another, Ju'aymah or North Pier and vice versa.

For transiting Ju'aymah SBM and Waiting Area, Ju'aymah Radar should be contacted.

VHF: At present very overloaded, with both Ras Tanura Pilots and Ju'aymah Pilots using Channel 14 and Ras Tanura Radar and Ju'aymah Radar using Channel 10.

Pilots: Board in Northern Area of LPG Anchorage South of SBM No. 36 from a tug. Pilot ladder-gangway arrangement used when in ballast.

Anchorage: About 1.5 miles to N.E. of pier, South of SBMs. Moderate holding ground so use plenty of cable.

Tugs: Two powerful tugs used. Secure in "American Style". Unberth using a long line. Tugs ropes used. Whilst ship is on LPG Berth both tugs on instant stand-by tied to buoys near Berth No. 52 (inside). It takes 15 minutes to get to Berth No. 51.

Aramco have 6 new tugs being built. 3 of which are Voith Schieder vane tugs of 4,000 h.p. 2 tugs will be used at the LPG Pier.

Notice of Readiness: Tender when ready to load, or if straight on berth at first line ashore. Berth Supervisor acknowledges only. Agent also gets acknowledgement from Aramco.

Conditions: Vessels berth on No. 51 (outside) with winds up to 30 knots but depends on sea conditions and probability of damage to ship or tugs.

Unberth in most conditions at Berth No. 51.

Berth No. 52 (inside) is a bit more awkward and weather conditions are more carefully assesed.

Pier: Berth Head North at Berth No. 51 – port side to, and starboard side to at Berth No. 52. Pilots say there could be conditions such as weather and ship type that may warrant a departure from this rule.

A most imposing structure some 6 miles long with two LPG Berths at present heading S.E. 2 more berths are planned bearing N.W. on the other side of the pier making a "T" configuration.

Water depth at ILWS is 78 ft. at both berths.

Fenders are massive flat beds of timber and rubber and steel plates with rubber and hydraulic springs which I gather can withstand tremendous forces. The pier has been designed for 200,000 cu.m. LPG ships. We lay alongside Berth No. 51 in force 5 with large swell quite happily. The pier was not built for vessels of less than 75,000 cu.m. but due to lack of large vessels and trade conditions quite small ships of down to 15,000 cu.m. have been berthed.

Small vessels cause problems as they can fall inside the fenders on berthing and the Chiksans have to be fitted with spool pieces.

Gangway: A shore gangway on rollers and self levelling with hoist is landed on foredeck from forward end of Chiksan deck.

The berths have a tower crane between them for handling spool pieces and general maintenance. Ship's derricks not used.

Loading Limitations:

Minimum Distance Manifold to Platform Deck Edge	20 ft.
Maximum Distance Manifold to Platform Deck Edge	50 ft.
Minimum Manifold Height above ILWS	25 ft.
Maximum Manifold Height above ILWS	100 ft.

At the lower operating limit fo the arms (i.e. 25 ft. above ILWS) because of the cut-off at maximum outreach, ships of a manifold height of less than 27 ft. would not be loaded.

Minimum distance apart of manifold lines centre to centre 4 ft. (from Official Aramco advice in Pilot Office).

The manifold distance apart (4 ft.) is overcome at present by the use of spools.

Loading: 16 in. Chiksans with auto-couplings (QCDC). 2 loading and 2 vapour each side of jetty.

Spool pieces are connected by ship's crew, Chiksans by shore personnel.

Rates of between 50 b.p.h. to 30,000 b.p.h. (4 to 2,500 tonnes p.h.) total on each product can be achieved. This may be less if 2 ships are taking same product.

Coolant and bulk can be taken on different berths either Berth Nos. 51 – 52 or at North Pier Nos. 6, 8 and 10. We were due to go to North Pier for bulk but in the end took both at Berth No. 51.

Different metering systems from 3 in. to 12 in. are used at each berth.

50 b.p.h. – 900 b.p.h. 1×3 in. meter for low rates such as coolant and topping off.

300 b.p.h. – 4,000 b.p.h. 2×6 in. meter intermediate.

1,900 b.p.h. – 16,000 b.p.h. 3×12 in. meter full rates (1 meter standby).

Lines can be inter-switched between products but maximum of about 30,000 b.p.h. on any one product.

Butane and Propane can be sub-cooled by 5°F by Freon chillers.

Moorings: Basic arrangement 3, 3, 2, each end. Springs first. But variation due to vessel configuration and size may be made.

Lines sent away by heaving line, mooring boats not used.

All lines on quick release hooks with Capstans alongside.

Fire Wire not to be loosely lashed on deck. Made fast with 5 turns on bitts and bight held up by heaving line.

Vapour Return: At present not charged and flared about 1 mile down pier. We were allowed to use it quite freely but this might change.

The amount of vapour being flared can be noted in the Control Room, situated between berths, and is very accurate.

Control Room: Between the two berths is an accommodation block with the Control Room on top with anti-glare windows. Various rooms for duty personnel are situated on different decks with the Shift Supervisor on the bottom deck near the entrance.

The Agent can be phoned from here.

The Control Centre on top is well worth a visit, being most impressive. The Pilots Office and Radar Room can also be found in the Control Area.

Ship's particulars are on a computer with any adverse points as well.

Access: Private cars not allowed on pier. The idea is that all personnel use the Aramco provided bus or helicopter service which lands on helipad at the North end of the berth.

Agent: Requires advance notice of ship's movements and actual notice of movements at all stages. Aramco do not always advise Agents and due to distances involved confusion and delay can result.

Agent will arrange for medical attention to crew members. In an emergency call "Ras Tanura Pilots" who will arrange a Coastguard helicopter to come to berth or anchorage. This usually takes about 30 minutes from calling Pilot Office. Also advise Agent.

General: Bunkers are available from Chiksans at each end of loading arms. Used for both fuel and diesel. 8 in. couplings.

No fresh water available.

All usual conditions apply as for Ras Tanura.

All Air Bill items to anchorage.

Copy of Saudi Port Regulations required but does not apply to Ras Tanura area.

Agent brings down Customs who seal up and handle Immigration matters.

Berth owned by the Saudi Government Company "Petromin" not Aramco.

Aramco operate the berth on a management basis.

AUTHORITY: Arabian American Oil Company, Port Control Centre, North Pier, Ras Tanura, Saudi Arabia. *Tel:* 37250. *Contact:* S. M. Al Shibar, Port Captain – Terminal Marine Piloting Division.

AGENT: Gulf Agency Company Saudi Arabia, Aramco Mail Box 621, Ras Tanura 31941, via Dhahran, Saudi Arabia. Cables: "Confidence" Ras Tanura, Ship-Shore Traffic via Dammam Radio. Telex: 651011, 651059 ("GAC RT SJ") Phone: 6673180, 6670632, 6670636 (24 hour service), 6670624. After office hours phone: 6670644, 6670925.

N.B. Please address crew mail to Rahima P.O. Box 72, Ras Tanura, via Dhahran, Saudi Arabia.

Note: G.A.C. Ras Tanura are connected to the Bahrain Telex Bureau. Messages from ships to G.A.C. Ras Tanura may therefore be addressed "Bahtag 80-1450433 Confidence Ras Tanura" via Bahrain Radio, and they will then be relayed direct by telex to Ras Tanura.

Agent will be responsible for all ship's business, which includes obtaining inward and outward clearance, pratique, medical facilities, provisions, repatriation, repairs and diving services.

JUBAIL: 27.01 N. 49.40 E. (See Plan Book

ALSO SEE "GENERAL" BEFORE FIRST PORT.

(A) COMMERCIAL PORT. (B) KING FAHD INDUSTRIAL PORT IN JUBAIL.

(A) COMMERCIAL PORT.

LOCATION: The Jubail Port Complex is located on the East Coast of the Kingdom of Saudi Arabia, approximately 80 km. North of Dammam. The Port Complex comprises 2 ultramodern facilities: The Commercial Harbour to the South and The King Fahd Industrial Harbour to the North. These harbours have separate entrances and are under separate port managements.

PORT LIMITS: All shore based port property enclosed by a fence extending seawards to include the approach channel as far as Buoy Nos. 11 and 12, the Tanker Anchorage, Freighter Anchorage and Explosives Anchorage to a line running between the following points:

Lat. 27° 04′ 03.7″ N., Long. 49° 36′ 52.2″ E.
Lat. 27° 06′ 00″ N., Long. 49° 41′ 08″ E.

Port Boundaries:

1.	Lat. 27° 04′ 03.7″ N.,	Long. 49° 36′ 52.2″ E.
2.	Lat. 27° 06′ 00″ N.,	Long. 49° 41′ 08″ E.
3.	Lat. 27° 07′ 09″ N.,	Long. 49° 41′ 08″ E.
4.	Lat. 27° 07′ 09″ N.,	Long. 49° 44′ 27″ E.
5.	Lat. 27° 08′ 20″ N.,	Long. 49° 45′ 11″ E.
6.	Lat. 27° 10′ 39″ N.,	Long. 49° 47′ 00″ E.
7.	Lat. 27° 10′ 35″ N.,	Long. 49° 50′ 00″ E.
8.	Lat. 27° 12′ 47″ N.,	Long. 49° 52′ 15″ E.
9.	Lat. 27° 15′ 28″ N.,	Long. 49° 51′ 33″ E.

DOCUMENTS: On arrival at the Port the Master of the vessel shall present or make available for inspection the following papers and documents:

Log Book.
Registration Certificate.
Classification Certificate.
Load Line Certificate.
Building Safety Certificate.
Safety Equipment Certificate.
Radio and Wireless Certificate.
Cargo Gear Certificate.
Marine Health Declaration.
Vaccination List.
Derat Certificate.
Clearance from Last Port of Call.
Israel Boycott Declaration.
Ship's Store List.
Grain Shipping Certificate (if the vessel is carrying a grain shipment).
Mail Transport Documents in accordance with the International Postal Treaty (if any mail is carried aboard).
5 copies of the Crew List.
5 copies of the Passenger List.
2 copies of the List of Personal Effects of Crew and Passengers.

To obtain port clearance the Master of the vessel shall present or make available for inspection the following papers and documents to Port Management:

Log Book.
Registration Certificate.
Classification Certificate.
Load Line Certificate.
Building Safety Certificate.
Safety Equipment Certificate.
Radio and Wireless Certificate.
Port Stevedore Outturn Report.
Receipt for payment of Custom's Duties.
Shipping Note and Cargo Manifest for any cargo loaded.

Cargo papers and documents: The following papers and documents must be submitted to the Port Management not later than 48 hours prior to arrival:

5 copies of the Cargo Manifests in English.
10 copies of the Original Manifests translated into Arabic.
2 copies of the Cargo Stowage Plan.
2 copies of the Hatch List or Bay Plan.
2 copies of the List of Dangerous/Hazardous Cargo for Discharge.
2 copies of the List of Dangerous/Hazardous Cargo in Transit.
2 copies of the List of Heavy and/or Awkward Cargo.
2 copies of the List of any Wine, Spirits and Narcotics, or in the absence of which a nil return.
A Declaration of Type of Reefer Cargo.
An Application for Discharge Permit.

PILOTAGE: Pilotage is compulsory for all vessels of more than 150 n.r.t. Pilots available 24 hours a day, 7 days a week. Pilots will board in the vicinity of No. 17 Channel Buoy. Port Control Station is continuously manned, to be contacted on Channel 16, vessels requiring a Pilot shall use the International Signals. Notice of ETA refer to Rules and Regulations for Saudi Arabian Seaports, Part 1, Para 2.

Pilot Boarding Position: Lat. 27° 07′ 00″ N. Long. 49° 47′ 00″ E.

ANCHORAGES: There are 3 anchoring places: Freighter Anchorage, Tanker Anchorage and Explosives Anchorage, areas between the following buoys and positions:

Freighter Anchorage:

Light Buoy "17/ANCH"	Lat. 27° 06′ 00″ N.	Long. 49° 45′ 19″ E.
"ANCH 4"	Lat. 27° 08′ 20″ N.	Long. 49° 45′ 11″ E.
"ANCH 3"	Lat. 27° 10′ 39″ N.	Long. 49° 47′ 00″ E.
"15/ANCH"	Lat. 27° 10′ 35″ N.	Long. 49° 50′ 00″ E.

Tanker Anchorage:

Light Buoy "13/ANCH"	Lat. 27° 12′ 47″ N.	Long. 49° 52′ 15″ E.
"ANCH 2"	Lat. 27° 15′ 28″ N.	Long. 49° 51′ 33″ E.
"ANCH 1"	Lat. 27° 17′ 25″ N.	Long. 49° 55′ 15″ E.
"11/ANCH"	Lat. 27° 16′ 15″ N.	Long. 49° 57′ 36″ E.

Explosives Anchorage:

Light Buoy "EXPL 1"	Lat. 27° 02′ 00″ N.	Long. 49° 50′ 22″ E.
"EXPL 2"	Lat. 26° 58′ 19″ N.	Long. 49° 51′ 02″ E.
"EXPL 3"	Lat. 26° 56′ 49″ N.	Long. 49° 52′ 47″ E.
"EXPL 4"	Lat. 26° 55′ 41″ N.	Long. 49° 51′ 35″ E.
"EXPL 5"	Lat. 26° 57′ 32″ N.	Long. 49° 49′ 20″ E.
"EXPL 6"	Lat. 26° 59′ 50″ N.	Long. 49° 49′ 56″ E.

RESTRICTIONS: The Port can be approached 24 hours daily.

MAX. SIZE: Berth Nos. 1 to 8: Max. acceptable draft 11.4 m. Berth Nos. 9 to 16: Max. acceptable draft 13.6 m.

HEALTH: Quarantine Free Pratique as per International Rules and Regulations. Health Officer will board when the ship is moored.

VHF: Jubail Port Control continuous watch is maintained on Channel 16. Working on Channel 66. Radar Surveillance Channels 17 and 69.

RADAR: Surveillance and Control System Operational.

Position: Lat. 27° 11′ 39″ N., Long. 49° 57′ 26″ E.

Structure: Grey circular concrete tower with white radar scanners atop.

Height: 43 m. from ground to radar antenna.

Light: Fixed red warning light atop antenna.

Continuous radar surveillance is maintained by the Saudi Ports Authority over the whole extent of the modified Jubail Ports Approach Channel. All ships should inform Jubail Ports Control on VHF Channel 66 prior to entering or crossing this approach channel.

TUGS: 8 tugs ranging from 900 h.p. to 5500 h.p. are stationed at Jubail, of which five have Voith Schneider propulsion. 3 mooring launches assist in berthing manoeuvres. All tugs are fitted with fire fighting equipment.

BERTHING:

Berth Nos. 1 to No. 8, general cargo berths; total length 1,700 m., depth 12 m.

Berth Nos. 9 and 10, multi-purpose berths; total length 600 m., depth 13 m.

Berth Nos. 11 to No. 14, general cargo berths; total length 1,000 m., depth 13 m.

Berth Nos. 15 and 16, container terminal; total length 520 m., depth 14 m. Equipped with 2 Ro-Ro ramps for stern and quarter ramp vessels.

Storage Facilities: 10 transit sheds with a total of 87,000 sq.m. and open storage area of 290,000 sq.m.

Cargo Handling Facilities: 67 forklift trucks ranging from 3 to 35 tons, 19 mobile cranes ranging from 20 to 100 tons, 19 head trucks and tow motors, 40 trailers, chassis and cargo dollies of up to 100 tons, 20 weighbridges of 60 tons capacity. Discharge/load normally effected by ship's gear.

Container Terminal: Storage facilities: 135,000 sq.m. total terminal area. 100,000 sq.m. Container Storage Area, 14,000 TEUs stacking capacity, 120 plug-in facilities for reefer container/trailers (480V., 60 cyc.). Container Freight Station 18,000 sq.m., 60,000 sq.m. storage area. Empty Container Storage Area for long term storage outside Customs area.

Container Handling Equipment: Four container gantry cranes of 30.5 tons under spreader; 9 transtainers of 30.5 tons under spreader; 20 head trucks; 44 container chassis; 18 electric forklifts; 2 forklift trucks of 20 tons; 2 forklift trucks of 35 tons, 16 weighbridges of 60 tons capacity.

Outer port storage area for lease to port customers: 2 warehouses of 18,000 sq.m.

Bulk Cement Terminal: Silo vessel at anchorage. Storage capacity 30,000 tons, handling capacity 5,000 t.p.d. (800 t.p.h.).

STEVEDORES: First shift: 0700–1900 hrs., second shift: 1900–0700 hrs., 7 days a week. Sufficient gangs available to work 4 hatches on every vessel.

Minimum discharge rates breakbulk cargo: 1,000 tons per berth per day. Container terminal: 20 TEU's per workable crane per hour.

DENSITY: 1030.

MEDICAL: Full hospital facilities available, arranged by the Agents.

FRESH WATER: Available, arranged through Agent.

FUEL: Fuel oil, marine diesel and marine gas oil are available, arranged through Agent.

CONSULS: American Consul General at Dhahran.

SURVEYORS: International Marine Surveyors and Classification Society Surveyors are on call from Dammam.

GANGWAY/DECK WATCHMEN: The Coastguard will station a guard at the gangway to prevent unauthorised boarding and landing.

CUSTOMS ALLOWANCES: Possession and/or consumption of alcoholic beverages including beer, table wines and liquors is strictly prohibited in Saudi Arabia. All alcoholic beverages are to be under lock and key during vessel's stay in port.

No restrictions on tobacco and cigarettes.

HATCHES: Opening and closing is carried out by stevedores.

REPATRIATION: Arrangement through Agent. Distance to Dhahran Airport: 120 km. Airport is served by regular airlines. Jubail Airport under construction.

AIRPORT: Dhahran Airport 120 km.

TIME: Local time is GMT plus 3 hours. All ETAs and other messages should be made in local time.

HOLIDAYS: No holidays apply for stevedores.

SHORE LEAVE: To be arranged through Agents.

REGULATIONS: See "Rules and Regulations of Saudi Seaports".

TELEPHONES: Available.

PORT PROCEDURES: Also see "General" before first port.

Notification to Jubail Port Management:

1. The owners/charterers of vessels bound for Jubail with cargo must give preliminary notice of the vessel's intended arrival to the Port Management by telex or cable either directly or through their Agents on arrival at the first or sole loading port, before loading commences. ETA and estimated quantity of cargo by type must be given with the preliminary notice.

2. On completion of loading cargo the following information must be sent to the Port Management by telex or by cable either directly or through the Agent.
   a. Vessel's name.
   b. Flag.
   c. Length overall.
   d. Expected draft on arrival.
   e. ETA.
   f. Cargo particulars, including nature, weight, tonnage and stowage by hatches.
   g. Any dangerous cargo being carried for other destinations.
   h. If dangerous cargo is being carried, the quantity and class in accordance with the IMDG Code whether to be discharged or in transit.
   i. Expected requirements for bunkers and water.
   j. Name of vessel's Agent.

3. A further notice of ETA is to be sent 5 days, 2 days and 1 day prior to arrival at the port.

Vessels failing to give required notification:

Any vessel failing to comply with the requirements under paragraph 1, above, or arriving later than expected under the revised ETA, may lose its berthing registration.

Cargo Papers and Documents:

1. The following papers and documents must be submitted to the Port Management no later than 72 hours (for vessels with more than 200 Bills of Lading) or 48 hours (other vessels).

Prior to arrival:
   a. 5 copies of the Cargo Manifests for discharge, including any additions or amendments in English:
      10 copies of the original Manifests translated into Arabic.
   b. 2 copies of the Cargo Stowage Plan.
   c. 2 copies of the Hatch List or Bay Plan.
   d. 2 copies of the List of Dangerous/Hazardous Cargo for discharge.
   e. 2 copies of the List of Dangerous/Hazardous Cargo in transit.
   f. 2 copies of the List of Heavy and/or Awkward Cargo which requires special equipment.
   g. 2 copies of the List of any Domestic Wine or Spirits or Cargo of such nature on the vessel and its location or, in the absence of which, a nil return.
   h. A Declaration of Type of Reefer Cargo.

2. All copies of the Manifests must be taken from the Master Manifest.

3. The List of Dangerous/Hazardous Cargo has to show:
   a. The technical name.
   b. The IMDG Class and UN number.
   c. The quantity of each consignment.
   d. The location on board respectively in each container or on each trailer or in each barge.

4. Non-compliance will lead to penalties and/or fines.

General Regulations for cargo stowage and handling:

1. The stowage of cargo bound for ports in the Kingdom of Saudi Arabia must be arranged to ensure simultaneous and optimum rate of discharge from the maximum numbers of hatches compatible with the requirements of sea-worthiness.

2. Where practicable all general and bagged cargo of uniform type and size is to be stacked and secured on pallets to facilitate quick discharge.

3. Bundled steel, profile iron, rebars, etc. shall be fitted with slings or lifting points suitable for multiple handling.

4. Steel sheets shall be strapped and stacked in bundles of approx. 2 tonnes each. Wooden bearers and/or spacers shall be used in loading the bundles to facilitate discharge.

5. Masters and shipping Agents are to instruct their stevedoring contractors at loading port to execute complete separation by Bills of Lading and the manifest, and will be held responsible for non-compliance with this regulation.

6. No damaged package or item is to be discharged from any vessel, barge, pontoon or handling craft until it has been repaired or repacked in such a manner as to permit it to be handled without further loss or damage to contents of the package or the item itself.
   a. Where the original outer carton, box or bag is replaced, the replacement carton, box or bag shall be made in the same manner to allow it to be identified with the Bill of Lading and the manifest.
   b. The Port Management has the right, after notifying Customs, Authorities and ship's Agent concerned, to get rid of or destroy damaged good which may cause harm to installations or public health at the expense of the Owner of the goods or the ship's Agent.

Out-turn Report:

1. After completion of the discharging operation of a vessel the Port will furnish an out-turn report which shall indicate the cargo discharged.

The out-turn report must be signed by the ship or ship's Agent. Refusal to sign does not invalidate the report.

2. The ship's Agent has the option of conducting his own counter-tally. Where this is not done, the Port tally must be accepted. If an independent counter-tally is undertaken by the shipowner/Agent, the Port tally supersedes.

3. The cargo handed over into the custody of the Port shall remain at the entire risk and responsibility of the shipowner or its Agents or owner of the goods while on the port premises. The Port Management shall not be responsible in any way for any damage or loss that may occur to goods while within the port premises, whether such damage or loss was the result of accident or negligence on the part of the Owner of the goods or not, except in the case of wilful or gross negligence of port employees.

Storage of goods:

1. The goods will be stored by the port in accordance with marks and numbers and in Bill of Lading lots in those areas stated in the out-turn report.

2. The Port may store suitable cargo in the open areas.

3. The Port may refuse the storage of goods if:

a. There is insufficient space in the Port.

b. The inherent properties of the goods render it dangerous or impossible.

4. Except for Customs purposes, no goods or materials stored in the Port are to be unpacked on Port premises without the special permission of the Port Management and Customs.

5. Consignees or their Agents shall remove their goods from the Port within 15 days of completion of discharge of the carrying ship or such period as may be announced by the Port Authority.

6. All cargo, irrespective of whether it has been cleared through Customs or not, which has not been removed from the Port within 15 days of completion of discharge of the carrying vessel may be moved to a special area. All such cargo may be sold by public auction 21 days after completion of discharge of the carrying vessel. These periods may be changed by an announcement of the Port Authority.

GENERAL:

Rubbish: It is strictly prohibited to throw any garbage, rubbish or food leftovers into the port and territorial waters of the Kingdom.

Every violation of the provision of this article shall cause the ship's Master to be penalized with a fine of up to 10,000 Saudi Riyals.

Vessels calling at Jubail Port will be supplied with plastic bags for garbage disposal.

The stevedore's ship superintendent must be contacted before the vessel has finished loading/discharging operations to take care of disposal of the bags.

The charge for garbage disposal service will be SR. 300 – per vessel.

Documentation: Jubail Port Management will not permit any vessel to berth if documents have not been submitted as follows:

1. Manifest for vessels with more than 200 Bills of Lading at least 72 hours before arrival.

2. Manifest for all other vessels, Stowage Plans, Hatch List etc., at least 48 hours before arrival.

Jubail Port Management will grant berthing permission subsequently not earlier than 72 hours after receipt of documents as per case 1 and not earlier than 48 hours as per case 2.

Vessels discharging cargo to Aramco Overseas Company (AOC) at the Commercial Port:

General instructions and communications procedures.

1. When carrying vessel leaves loading port, details of tonnage aboard for discharge to AOC and tentative ETA at Jubail should be cabled/telexed to Saudi Arabia telex 601220 (ARAMCO SJ) commencing message "DHAMDDSB/AOC TRAFFIC DHAHRAN".

2. 10, 5, 3 days and 1 day prior to arrival, Master of carrying vessel must transmit updated ETA to "DHAMDDSB/AOC TRAFFIC DHAHRAN" via ARAMCO radio station. (call sign HZY) which operates the following receiving schedules:

Frequency (kHz)	Approx. Range (miles)	Daily Operating Time (GMT)
500	500	Continuous
8480	2,000	0400 – 1800
12811	2,000	0600 – 1800
16960	2,000	1000 – 1100

3. Vessel must proceed initially to Jubail Pilot Boarding Anchorage, contacting the Jubail Harbour Master on VHF Channel 16 upon arrival. The anchorage is approached from Al-Jurayed (Latitude 27° 12′ N., Longitude 49° 57′ E.) and is bounded by the following co-ordinates:

Latitude: 27° 03′ N., Longitude: 49° 44.0′ E.
Latitude: 27° 04′ N., Longitude: 49° 45.5′ E.
Latitude: 27° 03′ N., Longitude: 49° 47.5′ E.
Latitude: 27° 02′ N., Longitude: 49° 45.5′ E.

4. Pilotage is compulsory. Coast Guard officials will normally board with the Pilot to commence initial clearance procedures. Customs and Health Authority will complete clearance once the vessel is alongside berth. For guidance the Port currently offers 14 m. water depth in the approach channel and 12 m. alongside the berths (by prior arrangement, it may be possible to utilise the container berths which offer a depth of 14 m. alongside).

5. The AOC Port Master at Jubail, or his authorised representative, will attend on board alongside berth, once clearance has been completed, in order to accept Notice of Readiness for the vessel. AOC staff will be available on board or at shipside throughout the discharge period to protect the safe discharge of AOC cargo and the AOC Port Master, or his representative, will again attend on board prior to sailing in order to countersign the Statement of Facts for the discharge.

6. AOC discharges at Jubail will generally be on a "free-out" basis but will be accomplished by the Ports Authority stevedores. Charges for stevedoring on AOC free-out cargo will be settled directly between AOC and Saudi Ports Authority. Agents must nevertheless notify the Ports Authority of expected vessel arrivals, booking berth space and stevedoring in accordance with the normal customs of the Port. In submitting manifests for AOC cargo to be the Ports Authority, however, Agents should attach to each manifest written advice that stevedoring charges will be settled by AOC.

7. Certain material to be discharged by AOC at Jubail will have been ordered from Saudi vendors and will be consigned "C&F Jubail Commercial Port Free-Out Discharge" with "Ultimate Consignee ARAMCO" included in the body of the Bill of Lading. Such cargo will be accepted by AOC at Jubail in exactly the same way as cargo consigned directly to AOC and Bills of Lading duly endorsed by the original consignee will be presented.

8. In addition to the normal tallying of cargo by the Ports Authority stevedores, AOC will be carrying out a counter-tallying operation in their own interest. This will be aimed at eliminating the possibility of shortlanding, and recording the factual circumstances of cargo damage and at prompt and accurate reconciliation of discharged and manifested quantities. The co-operation of all Masters and Agents is sought in this activity, particularly in the countersigning of any relevant damage or out-turn reports.

9. All requirements stated in this Notice are those of AOC and are *in addition* to any other procedures required by the Saudi Ports Authority. Any Saudi Ports Authority requirements mentioned herein are for guidance only and should be verified with Saudi Ports Authority.

10. Direct enquiries on operational matters to the Terminal Operations Co-ordination Desk or, failing a reply, to the Assistant Superintendent. Address enquiries on policy matters to the Assistant Superintendent or, in his absence, to the Superintendent. Local liaison at Jubail Commercial Port will be handled by the AOC Port Master or his deputy who will also handle all *urgent* enquiries at night, weekends and holiday periods. Telephone connection to the AOC Port Office is expected in the near future.

11. Until further notice, AOC will be handling only duty exempt cargo through Jubail. Cargo which is dutiable, or subject to import permit restrictions, will normally be routed to Dammam. Exceptionally, if isolated dutiable consignments are inadvertently laden to Jubail instead of Dammam, they will generally be handled at Jubail. Similarly small shipments of duty exempt cargo consigned in error to Dammam will generally be handled at that port. It should no longer be necessary under normal circumstances, therefore, for any cargo to be diverted for discharge to a port other than the one to which it was originally laden.

AUTHORITY: Saudi Arabia Ports Authority, Port of Jubail, P.O.Box 276, Jubail, Kingdom of Saudi Arabia. *Tel:* (03) 361-0600. *Telex:* 631005 JUBPT SJ. *Cables:* Ports Jubail. *Contact:* Hamad Saleh Al-Hawas, Port Director General, Jubail Port Management.

(B) KING FAHD INDUSTRIAL PORT IN JUBAIL.

PILOTAGE: Compulsory. Pilots will board from a fast launch in the vicinity of No. 17 Channel Buoy and the Freighter Anchorage. Pilot boarding equipment must comply with the International Convention for the Safety of Life at Sea 1974. Vessels with a high freeboard must provide an accommodation ladder combined with a pilot ladder.

RESTRICTIONS: Entry possible 24 hours a day.
